SUDAN.

A PERFECT WINTER RESORT.

Khartoum, at 1,200 feet above sea level, enjoys an ideal winter climate. Constant sunshine, tempered by invigorating breezes, acts as a rapidly effective tonic on those in search of health and pleasure.

KHARTOUM is a modern town with handsome buildings and gardens along the banks of the Blue Nile. The Grand Hotel and other Hotels offer *en pension* terms to visitors.

OMDURMAN, the wonderful African Metropolis, instinct with all that is most characteristic of native life, lies near by, stretching for seven miles along the shore of the great river. Every African nationality and tribe are here represented practising their arts and crafts in the markets.

¶ *The journey between Cairo and Khartoum is one of continued interest, and is performed by Express Steamers and Dining and Sleeping Car Trains, on which the catering is of the highest order.*

SUDAN GOVERNMENT RAILWAYS AND STEAMERS

NOTES OF THE WEEK.

Palestine and the Mandate.

In our issue last week the policy that we have urged in regard to Palestine was summed up in a series of Notes in the course of which it was stated that the injustice done to the Palestinians does not lie in the acts of the British Administration in Palestine, but in the fact that the Zionist Organisation had been encouraged to the point of declaring through one or other of its mouthpieces that Palestine was to be made, on the strength of the Balfour Declaration, "as Jewish as England is English"; it was urged further that it was necessary for the British Government to reconsider its present relations with the Zionist Organisation, while not abandoning the spirit of the Balfour Declaration. The official statement of British policy in Palestine embodied in a telegram sent last week by the Colonial Secretary to the Palestine Administration follows closely the lines suggested. The Balfour Declaration is reaffirmed, but it is specifically stated that "His Majesty's Government have no such aim in view as that Palestine should become as "'Jewish as England is English'"; the establishment of a full measure of self-government is promised, and as the next step a Legislative Council with a majority of elected members will be set up immediately. "The special position of the Zionist Executive," continues the statement, "does not entitle it to share in any degree in the government of the country," and it is added: "The executive of the Zionist Organisation have formally assured His Majesty's Government that the activities of the Zionist Organisation will be conducted in conformity with the policy set forth in the statement."

The Need for New Brooms.

This is a perfectly satisfactory statement as far as it goes, and the Arab Delegation in London will put itself out of court, if it does not return at once to Palestine and insist upon an honest attempt on the part of the Arabs to allow the new policy or system to make good. But it will be fairer to Palestine, and fairer to all concerned, if the working of the new policy is entrusted to new hands. In the difficult circumstances in which he has had to govern the present High Commissioner has done well; he has laid the foundations of the administration of Palestine on a plan that the country will act wisely in following in the future; he has been fairer to the Arabs than the majority of them are inclined to admit, and he has held the balance far more evenly than was probably the intention of the British Government that it should be held when it sent Sir Herbert Samuel to Jerusalem at the prompting of the Zionist Organisation. Under ordinary conditions everyone would wish that a High Commissioner with such a record should complete his full term of office; but the conditions are not ordinary. The Arabs will never give credit for complete disinterestedness to a Jewish High Commissioner, and Sir Herbert Samuel will probably never feel justified in reducing the armed guard at Government House to the couple of sentries that suffice for His Majesty's representative even in a disturbed Egypt. Distrust at the top of the Administration must breed distrust and unrest through all strata of the population. It will also be fairer to the Zionist Organisation that there should be a non-Jewish High Commissioner now that it is called upon to show that it is capable of carrying out its admittedly good work of promoting the material prosperity of Palestine without the political privileges which merely retarded the development of the country.

Bulgarian Reparations.

Every European country is interested in the improvement of continental transport, and a weak spot in any one may handicap all. It is to be hoped, therefore, that the authorities concerned will not penalize Bulgaria in railway matters merely because she was on the losing side of the War, but will pay some consideration to the necessity of keeping railway improvements as far as possible on a level on all trans-continental lines. These remarks are prompted by the report that the Central Commission of Reparations has called upon the Bulgarian Government to surrender nine hundred railway trucks of Austrian origin for distribution among the Succession States. We have no further information on the subject, and it may be that in the general scheme of continental traffic these trucks promise to be more useful in the possession of the Succession States than in that of Bulgaria. But if this is not the case, the demand should not be persisted in. It is known that both national and international transport has been gravely handicapped in Bulgaria by lack of rolling stock; Roumania, on the other hand, as one of the Succession States, has expressed herself satisfied with the progress already made in the rehabilitation of her railways.

A Common-Sense Adjustment.

Bulgaria has just succeeded in purchasing from Austria and Hungary, to relieve her serious shortage of rolling stock, a little more than a thousand trucks,

Digitized by Google

522691

of which half are in process of being delivered. Before the balance can arrive she is expected to hand over nine hundred of her present wholly inadequate total. We can only hope that the whole matter will be reviewed in the light of common sense. The Allies want Bulgaria to make good economically, in order that she may meet their demand for monetary reparation. With additional rolling stock it is held to be possible to augment the railway revenue by nearly fifty per cent.; but if she is not allowed to increase adequately the number of her trucks, the additional money will not be forthcoming. There is no need for unduly favourable treatment for Bulgaria. The Austrian trucks in question, it may be presumed, in the absence of contrary information, represent in the ordinary course of railway interchange a similar number of Bulgarian trucks that found their way to Austria-Hungary during the war. All that is asked by those interested in the economic reconstruction of the world is that it should be somebody's business to see that these matters are settled on a practical basis, and that Europe should not be engaged in the foolish practice of cutting off her nose to spite her face.

Two Trials Completed.

Sentence has been passed in two notable trials in the Near East, one in Bucharest and one in Belgrade. In the former, the criminals responsible for the outrage last December in the Roumanian Senate have been awarded sentences ranging from one year's imprisonment for the lesser fry up to penal servitude for life in the case of Max Goldstein, the principal offender. Bearing in mind the character of the outrage and the loss of life to which it led, these sentences cannot be regarded as excessive. Indeed, the Court Martial seems to have taken a much more lenient view of the case than might have been expected; but we may conclude that it regards the prospects of Communism in Roumania as very slight, and has consequently been able to show mercy, even though it was quite undeserved. In the second case, the trial at Belgrade was one in which some 200 persons were accused of aiding and abetting the organisation of "Bulgarian" *komitaji* bands in Serbian Macedonia. The number of prisoners lends the trial a certain importance, but it is satisfactory to learn that over eighty of them were acquitted, while only five were sentenced to death, and seven to twenty years' imprisonment. A significant point is that the Skoplye Municipality was shown to have been among the most active agents of the "Bulgarian organisation,"—"a fact which," says the Belgrade correspondent of the *Morning Post*, in reporting the trial, "caused much local indignation."

A Dilemma of the New Egypt.

It is to be feared that the question of compensation for British members of the Civil Service in Egypt is proving a hard nut for the new Government to crack. In the absence of evidence to the contrary we may credit both sides with a strict sense of fair play and the best intentions. Here then is the problem. The Egyptian Government does not want to lose at one fell swoop every British official; it would like to pick and choose, and most probably it would prefer that by far the greater majority should remain at first. It is most anxious that some should go. If, however, it offers terms of compensation that are generous or merely fair, there is risk that all the British officials will jump at the offer and leave, and there would be a lump sum to be paid that Egypt would probably have difficulty in meeting. The British officials, on the other hand, feel themselves entitled to generous compensation, and do not want to be penalised if they meet the Government's wishes by remaining in the service. It would never do to forgo compensation now, and find themselves dismissed a few months or a year hence at the caprice of an arbitrary superior, without the same compensation. If the compensation on retrenchment were subjected from now onwards to a graduated scale, it would mean that with immediate payment, just or generous, the amount in subsequent years must prove too onerous a burden upon the Egyptian Government. In the circumstances it can hardly be wondered at that the question is being long and earnestly debated on both sides. Somehow or other the Egyptian Government, we feel confident, will find means to make the *beau geste*.

Threatened Police Strike at Teheran.

Among the problems by which the new Cabinet at Teheran finds itself confronted, that of satisfying the demands of the Police of the capital for their pay appears to be one of the most urgent and, we fear, one of the most difficult. The Force, it may be remembered, went on strike last April because salaries were much overdue; and though the difficulty was then bridged over, the trouble has now broken out again, acutely. The men say that their pay is several months overdue—and apparently their statement is not challenged—and they announce their intention of going on strike this week unless the arrears are paid up. Without going into details, it may be said that such a contingency must be particularly painful for Teheran to contemplate at the present time, and it is safe to say that the Government will strain every nerve to meet the men's demands as far as possible; but its financial position is understood to be so unsatisfactory that even this comparatively small demand may prove too great a strain on its resources.

A Lesson for the Press.

In one way, however, the Teheran Cabinet has shown itself determined to take strong action. For some time the Persian Press has been overstepping the bounds of decency in its criticisms not only of its own Government, but also of the British Legation. This has roused the Persian Government to action, and two newspapers were suspended on June 27, while the heavy hand of the Censor fell on a third, which had one of its choicest anti-British articles deleted. Moreover, it is announced that the Government intends to introduce in the Mejliss a Press Act, forbidding the publication of scurrilous articles of the kind, and imposing heavy fines upon the offenders. This is undoubtedly a step in the right direction, and it is to be hoped that the new Government will lose no time in giving effect to its plans. If it will face other difficulties in the same spirit, it will almost certainly find many of them less formidable than they appear.

Indian Politics.

A shrewd and sympathetic survey of political conditions in India is contributed by Sir Thomas Bennett to the current issue of the *Asiatic Review*, and it comes at a convenient time, when the various parties are preparing for a more or less strenuous autumn campaign. Sir Thomas revisited India recently, and his impression was, to put it briefly, that the new Constitution is working differently in different parts of the country; the machine is not, as hostile critics say, fit only for the scrap-heap, but it still requires an expert driver, aud the individuality of the provincial Governor is at present the dominant

Digitized by Google

feature of the situation. We are a long way yet from automatic working, and, that being so, there is no justification whatever for the cry for increased powers which has been raised in India during the past year. Indians in fact are still very far from realising either the extent of their opportunities under the existing Constitution, or the amount of hard work they must do in order to make the most of them; the education of the electorate has so far made very little progress, and unless it is taken in hand promptly and effectively, the next election may prove a very unpleasant surprise for men who imagine that their position is secure.

The Compulsory Vote.

We are not entirely confident that Sir Thomas Bennett's incidental sneer at the idea of compulsory voting is justified so far as India is concerned. It is true we have managed without that device in this country, but England manages to do without a good many things which other races eventually find that they require. The compulsory vote is making headway among English-speaking democracies, and we notice that the idea is finding some favour in France, where a Commission has just recommended that voters who do not vote should be penalised in various ways, among others by an increased rate of income tax. It is arguable that India can learn some things from France better than from England, and there are some grounds for thinking that the Indian democracy, when at last it shall come into being, will be more like Jacques Bonhomme than John Bull; but, apart from that general question, there is the important consideration that the habit of voting can be acquired only by practice, and a little gentle compulsion at the outset might do much to hasten the realisation of the democratic vision. At any rate it is a question which Indian politicians might study to their own benefit.

Indians in the Empire.

One point in Sir Thomas Bennett's review which may be commended to the attention of every part of the Empire is his insistence on the reaction in India of events in other quarters of the world. Disabilities imposed on Indians, be it in Africa, or America, or Australasia, foster the ugly brood of racial antipathies to an extent out of all proportion to their intrinsic importance. "Kenya" is a mere name to most of us, but in India its mention arouses intense exasperation among people who might have difficulty in finding it on the map; and, as Sir Thomas says, "those who cherish the ideal of India as an integral part of the Empire, will do well to recognise the dimensions of this problem of the status of Indians in the British Commonwealth." Happily the latest news from Australia indicates that Mr. Sastri's mission is progressing favourably; diffficulties in that part of the Empire are being smoothed out one by one, and, apart from concrete results, the friendliness of his reception should produce a definite result on Indian sentiment.

THE WEEK AT HOME.

Monday Evening.

The War in Dublin.

It has been emphatically an Irish week. Immediately after the assassination of Sir Henry Wilson, Mr. Churchill pointed out to the Irish Provisional Government that they must now assert themselves or go under. They had gravely compromised their authority during the past six months by inaction, and done something more than compromise themselves by their compact with Mr. De Valera and the attempt to burke the elections. But the elections returned an unexpectedly large majority for the Treaty, and thus strengthened the position of the Provisional Government; they had consequently no longer the least reason for tolerating the Republican movement, which wanted to make the position of the Government and of the Treaty impossible.

Mr. Churchill's plain speaking in private—it was perhaps technically not quite an ultimatum—was reinforced by his speech in the House of Commons on Tuesday, in which he repeated his forcible language so that all the world might hear. But Mr. Collins had already taken the hint, and action was determined on.

The Four Courts of Justice had been seized weeks before by Rory O'Connor, a Republican who is said to be more of an extremist than Mr. De Valera, and he had not been disturbed. On Wednesday morning he was summoned to surrender,and when he refused, artillery was brought into play. Either the rebels put up an unexpectedly strong fight, or the attack was not pressed too hard for fear of damaging the beautiful building beyond repair; at any rate, it was not until Friday that the garrison made unconditional surrender. A touch of the ridiculous had been given to the proceedings by the discovery that the Chief of Staff of the Irregulars attempted to enter the stronghold disguised in the uniform of a nurse.

The Prospect for Ireland.

On Thursday the vacillating public opinion of the Free State is said rather to have supported the rebels, no doubt on account of their firm stand, and the authority of the Provisional Government hung in the balance. On the day after the fight, however, it seemed to be agreed that the display of firmness had strengthened the prestige of Mr. Collins,who had won the game with not much to spare.

The game, but by no means the rubber yet. Rory O'Connor is down and out, but Mr. De Valera has now put himself at the head of the rebels. Hotels and post offices, to say nothing of banks, have been seized by the Republicans in Dublin; they are said to have a dozen different quarters in the capital alone. In the rest of the country they are also busy challenging the authority of the Free State, but it is, of course, impossible to say how much support they will have, or what guns and ammunition they hold.

One thing seems certain—the compact is at an end, the prospect of an agreement between Provisional Government and Republicans has vanished, and whatever guns the Republicans have will be used. It does not seem in the least likely that they will throw up the sponge after the first encounter, and even if Mr. De Valera did so, the gunmen would not. His side has at

least the advantage of the support of that large anarchist and Bolshevist element which attacked the British Government two years ago. It was a convenient missile to throw at the hated Saxon, but in fact it was not so much against the British Government as against all governments, and Mr. Collins has now inherited the evil legacy.

Having gone so far, he can hardly go back without stultifying himself entirely. The Republicans will certainly never forgive him, for life has been lost—there are forty or fifty dead, according to the latest accounts—and if he carries on he will wreck their plan. The more hopeful prophets expect that the rebellion will fizzle out in a day or two. But this seems rather doubtful; if definite civil war is averted, there is likely to be a long series of sporadic guerilla outrages, which it would tax the ingenuity of any Administration to put down. It is useless to predict anything in Irish affairs, but I doubt whether this trouble will settle down so quickly as is hoped.

One integral element in the situation defies calculation, but it must be mentioned nevertheless. The British Government has not intervened in the fighting, and such British troops as still remain in Dublin have been confined to barracks. But the British Government has seized cargoes of munitions intended for the Republicans, and confiscated them on the high seas; it has supplied Mr. Collins with arms and ammunition for the subjugation of the rebels, and told him quite plainly that unless he subjugated them he could not keep his plighted word on the Treaty. All this is perfectly constitutional and proper, but the Republicans care nothing for constitutional propriety, and their propaganda now takes the line of representing Mr. Collins as a traitor to his country, and a mere tool in the hands of London. In other words, Irish freedom is still an illusion, and will remain so until the sacred Republic is proclaimed, and the Provisional Government must henceforth be regarded, in their opinion, as the British Government in disguise.

It is difficult to say what effect this will have on the emotional masses. The Irish correspondents of the London papers seem uncertain, and it happens that I have never been in Ireland, so that I am incapable of forming a judgment. But in most parts of the world I have noticed that propaganda backed by a gun is generally effective, and the Republicans will certainly use force if necessary, as well as its gentler sister persuasion.

The Desert of Westminster.

English politics have been tame and flat by comparison. The House of Commons is ploughing the dreary desert of finance; it sat up one night till three o'clock to discuss the price of beer; the Die-Hard attack on the Government failed again, and Mr. Austen Chamberlain has been in bed with a bad cold. That is a fair summary of the political week. The political writers, in fact, have been so hard put to it to justify their existence that they have had to discuss the possible return of Mr. Bonar Law to the Government and, when the topic died of inanition, they were reduced to the probability of a general election. When the bucket brings up no more than that the well is dry indeed.

Mr. Shortt's Reprieve.

The outcry against Mr. Shortt seems now to have died down. The *Daily Express* declared that he "must go," but as he showed no signs of obeying Shoe Lane, the *Express* turned its attention to the explosion of the atom which was to dinsintegrate the world, if not the solar system; in which case I do not quite see what advantage the "£8 a week for Life" the *Express* insurance scheme would have been to its readers. (Do angels need £8 a week?) This sensation-hunt, of course, was founded on a superficial knowledge of Sir E. Rutherford's experiments on the atom at Cambridge; in any event, Mr. Shortt was forgotten. As a matter of fact, he is not a bad Home Secretary, and does not seem much disturbed by newspaper clamour, which is as it should be. It is well known that his ultimate ambition is to be a judge, and that his affection for politics is limited.

The Wimbledon Week.

There were crowds at Wimbledon last week for tennis, in spite of the rain and the rather bleak conditions. The new ground, which was opened by the King, appears to be a great improvement on the old; it is more comfortable, has more accommodation, and is probably better for the players than the rather cramped quarters at Worple Road. Tennis has gone ahead quite extraordinarily of late years, and it is now an international game in the sense that neither cricket nor golf can claim to be.

I hear that croquet is also reviving, that a croquet week is actually held every year, and that men of otherwise blameless characters are not ashamed to be seen carrying the implements of croquet to and from the tournaments in the train, as they would a cricket bat or a set of golf sticks. This must be true, for there is even a newspaper devoted entirely to croquet, which takes itself and the game very seriously. Amazing! They will soon be reforming hop-scotch for the benefit of middle-aged gentlemen.

More Electric Railways.

The tube railways issued a prospectus last week for capital required for improving and extending their lines. It is one of the issues under Government guarantee, and therefore ranks as a trustee security; it will provide a good deal of work, and thus reduce unemployment. The South Eastern Railway is also about to electrify its suburban branches, following the example of the Brighton and South Western Lines, but I understand that the Great Eastern will still rely on steam for its enormous local traffic, as will also the Great Northern. This, however, will in the long run, hardly prove to be a wise policy, electricity having fairly justified itself for surburban services; the real meaning of the decision probably is that in both cases a conservative board of directors dislikes the introduction of a new method of working.

OCELLUS.

TOPICS IN PARLIAMENT.

THE NEAR AND MIDDLE EAST.

From Our Own Correspondents.

EGYPT.

Cairo, June 22.

The Coming of Summer.

This morning King Fuad and his Ministers left Cairo by special train for Alexandria, whither the seat of Government is now transferred for the summer. The High Commissioner and Lady Allenby, together with the Residency Staff had already left on Friday last for Ramleh, and from now onwards Cairo will follow its usual aestival existence.

As if to mark the occasion a heat-wave has set in this week. Cairo has weltered with the thermometer varying between 104 degrees F. and 106 degrees F. in the shade. Coming after an unusually cool spring and early summer, this sudden hot spell has made itself very severely felt; but in Egypt man must suffer that cotton may thrive, and consolation for the majority of the people is to be found in the fact that a high and steady temperature, particularly at night, is just the thing that the cotton crop wants in order to counteract the sad effects of the short water supply.

The Royal Family.

Following on the recent edict regulating the order of succession, the King has issued a new decree laying down the organisation of the Royal family. There is little in this document differing from what was already in existence, the only real innovation being that a special council is now created to deal with questions of personal status concerning members of the Royal family and to advise the King on important family matters. The council is to consist of the President of the Senate, the Minister of Justice, the head of the King's Cabinet, the Chancellor of Al Azhar, the President of the Native Court of Appeal, the President of the Supreme Mahkama Shari'a and the Grand Mufti, with a Prince of the Royal blood as President—Prince Djemil Tussun, nephew of the King having been appointed to that post.

Government Officials' War Bonus.

There is woe and lamentation in Government circles on account of the Cabinet's decision to knock off a further third of the war bonus as from the first of this month. Considerable discontent has resulted therefrom, and has manifested itself in meetings and deputations and telegrams to the King and the Prime Minister. It is, however, mainly confined to the lesser-paid grades, the higher grades having now either very little war bonus left or—the case of the most senior officials—none at all.

This reduction of the war bonus is particularly hard on the smaller categories, because, in the first place, no bonus to meet the extra cost of living was granted by the Egyptian Government until long after all employees in other walks of life had received these necessary additions to their wages, and secondly, far from enabling them to catch up the lee-way they had made, the maximum of 92 per cent. granted was quite insufficient to meet the cost of living, which had risen to about 200 per cent. above pre-war. Even to-day the lower paid officials are in a bad way, seeing that they are left with only one-third of their war bonus, while the cost of living is still about double what it was in 1914.

What appears to have aggravated the case is that the regrading which has been under consideration for two years now has not yet been put into operation. There was, I am assured, a distinct understanding when the last reduction in the war bonus took place that no further reduction would be made until the regrading had been introduced and the stff was beginning to enjoy the benefits thereof. If such a promise was made, one can quite understand the bitterness and discontent which are now prevalent. The protests have not, however, had any weight with the Government, which has adhered to its decision; but there are distinct signs of a hastening up of the regrading formalities, so there is a hope that the trouble of the lower grades will not last long.

The Foreign Officials' Compensation.

Meanwhile there is no further news with regard to the compensation of European officials. It is stated that there is no truth in the news that relations in regard to this question had been broken off between the Cabinet and the Residency, and that on the contrary, discussions are still continuing between the High Commissioner and Sarwat Pasha. The vernacular press has been making a great fuss about the question, and particularly the enormous amounts which, according to it, the foreign officials would take away from Egypt.

All statements with regard to the total cost of any scheme of this description should, however, be accepted with great scepticism; for "total cost" means the departure of every official; which is obviously out of the question. As a matter of fact the amount which any scheme would cost Egypt would be entirely dependent on the way the Egyptian Government behaves towards its foreign personnel, for the majority of the latter do not want to leave, provided their future and decent treatment can be assured. Indeed, if the Egyptians make their position congenial to them, they will be able to retain all the officials they want to keep, and thus will reduce the compensation bill to a minimum, and a very small sum at that. If on the other hand they do not behave wisely and fairly, then the amount they will have to pay will naturally rise accordingly. In any case, however, there is no doubt that in the interest of both the Egyptian Government, which wants to retain a large proportion of its foreign personnel, and of the foreign officials, the majority of whom would prefer to remain, a definite scheme, even though it be a provisional one, is absolutely essential; for it is obvious that the lack of some agreed scale and retiring conditions must produce greater uneasiness among the foreign officials, a larger demand on their part to be permitted to retire, and a consequent greater call on the Egyptian Treasury, together with a greater disorganisation of the service.

The Mixed Tribunals.

The Mixed Court of Appeal has this week suffered a serious loss in the retirement of its President, Monsieur Laloe, who has been a member of those Courts for many years, and succeeded last year to the presidency on the retirement of Monsieur Bernardi. The expressions of regret which have been forthcoming on every side have been characterised by a sincerity which is eloquent of the high position this distinguished jurist has gained in the esteem not only of his colleagues but of all who have had any knowledge of his work.

Both Monsieur Bernardi and Monsieur Laloe have been relatively young to retire from the Bench, and are certainly younger than any of their predecessors. The reason the Mixed Court is deprived of their service is that a year ago the magistrates were admitted to the benefits of the Pension Law which prescribes sixty-five as the age-limit, whereas before that concession was granted to the Mixed Courts no such limit was imposed. It is true that the absence of a limit has at times led to some abuse, but one would have thought that some middle course, that of fixing a slightly higher age-limit than sixty-five, would have been adopted, in view of the acknowledged fact that at that age lawyers and judges are still capable of a great deal of valuable work.

The appointment of a French Counsellor to succeed Monsieur Laloe on the Court of Appeal has given rise

SCHOOL OF ORIENTAL STUDIES.

Digitized by Google

to a little incident. Promotions from the lower Court can, according to the law, only be made after consultation with the higher Court. It appears that the Egyptian Government submitted the name of a French First Instance Judge to the Court of Appeal and that the latter expressed its disapproval of the nomination. The Egyptian Government is said to have insisted on the appointment, and the Mixed Court of Appeal is equally firm in its attitude towards the judge elected. The question arises, Can the Egyptian Government compel the Mixed Court of Appeal to accept a colleague against whom it has passed an adverse vote? Legal circles are watching with great interest the manner in which the situation in this connection will develop.

PALESTINE.

Jerusalem, June 25.

The House of Lords' Resolution.

The chief local topic of interest during the last few days has naturally been the resolution passed in the House of Lords in favour of the postponement of the confirmation of the Palestine Mandate and the modification of certain classes in the present draft in the interests of the majority of the inhabitants of the country. As was to be expected, the Arabs magnify the episode to the scale of a great victory scored by the Palestinian Arab Delegation, while the Jews seek to minimise its importance. Yet on the whole the Arab Press is strikingly moderate and restrained. The organ of the Arab Delegation, *Es-Sabah*, for example, is perfectly aware that the vote on the debate only marks a moral victory, and does not represent the final solution of the question. The Government may well disregard it. But *Es-Sabah* thinks that the promised debate in the House of Commons will be strongly influenced by the facts of the situation in Palestine as divulged in the course of the arguments in the Upper House. And it adds, even if the worst comes to the worst, and "Suppose that the Jews succeed in influencing the extreme parties in Parliament and gain a majority" and so set at nought the Lords' decision, yet the result shows us "that a large group of English notables, the landed and ruling classes, support us and are at one with us against their Government, which is endeavouring to crab our rights; so that even if we have to stand up and defend our rights by force, many of these our supporters will approve our action and use it as a weapon to fight their foes, who are also our foes. Therein lies the obvious gain,"

One of the Jewish papers, on the other hand, received a long cable from its English agent proving the worthlessness of the Lords' motion even from a moral point of view, and insisting that it was only a surprise vote snatched from a meagre House deliberately "packed" by the notorious anti-Semitic group at a time when most of the more respectable Lords had gone off to Plymouth to welcome back the Prince of Wales! But there is no mistaking the perturbation produced in Jewish circles at this "serious blow" to their cause.

A Delegation for Mecca.

The arrangements have been completed for the despatch of the delegation to Mecca to spread anti-Zionist propaganda among the pilgrims who are performing the *Hajj*. Three members have been chosen: Abul-Kher Effendi, Sheikh Abdul-Kadir and Rafik Bey. They are to leave for Jedda at the beginning of July. The idea of the delegation, its constitution and its method of election have all been subjects of attack from various quarters and for various reasons, and the unanimity in the ranks of the Moslem-Christian Association (the Society ultimately responsible for all the anti-Jewish movement since the British occupation) is no longer complete. There is real fear among the Christian Arabs that the Hejaz Delegation will link up the Palestinian dissatisfaction with the Pan-Islamism which is being fostered in the Moslem world from Morocco to Iraq. The Palestinian Christian Arab is alive to the fact that he need not fear much over the "Jewish Peril"; he has by no means a low opinion of his own intelligence, and is confident that with a Christian mandatory Power watching his interests, and the many great Christian Powers looking jealously on, any danger of unscrupulous Jewish dominance, or even "predominance" (there is supposed to be a difference between the two) is purely imaginary. Furthermore the Christian Arab knows that though the Moslem is in a majority of something like nine to one in Palestine, the advantage of numbers is outweighed by his own advantages in the way of superior education. So long as the questions under solution remain internal Palestinian ones, he can feel himself moderately secure. But if Pan-Islamism once ceases to be a hope and becomes a power, his own position becomes parallel to that of the Armenians. It is instructive to notice that the breach in the ranks of the Moslem-Christian Association is being chiefly fostered by the elements in the Palestinian Arab Press known to have French or Syrian-French "relations."

Hospital Work.

Some of the money which had been subscribed by the English community here towards the wedding present of Princess Mary had remained unspent. This has been utilised to found a Maternity Ward in the Government Hospital in Jerusalem, to bear the Princess name. The formal opening ceremony took place last Wednesday, when the ward was declared open by the Acting-High Commissioner, Sir Wyndham Deedes. The Jews have taken mighty umbrage at the idea that they considered was conveyed by certain speakers at the ceremony, that this was the only institution of its kind in the country, whereas the fact is that the "American Zionist Medical Unit" has done comparatively extensive work along these lines. In fairness to Jewish activities the good work they have accomplished with their hospitals throughout the country should be stressed; and their medical help is held out to all sections of the community. Only it is an unfortunate fact that sympathetic co-operation between the Government Department of Public Health and the Jewish Medical Organisations is

Digitized by Google

not always complete. One hesitates to attach blame to either side. Perhaps there is a tone of self-sufficiency about the one which sometimes disturbs more cordial relations.

Smugglers Outwitted.

The Palestine Customs and Revenue Department has recently covered itself with glory as the result of catching out certain well-known Jaffa merchants who were indulging in tobacco-smuggling on a huge scale. Nearly 200 bales of tombac ((the leaf tobacco used for the hookah) were seized, and the resulting fines came to some £3,000.

New Enterprises.

An attempt is shortly to be made to remedy the amazingly defective hotel accommodation of Jerusalem. A hotel is to be built on modern lines in the district known as Nikofarias—to the north of the new road to the station. It is to contain 250 double bedrooms, 100 bathrooms, 75 storerooms, besides the usual dining rooms, kitchens, drawing rooms, etc. The plans also include summer and winter gardens. The promoters intend to conduct in conjunction with the hotel a laundry, which will also cater for the general public, an ice plant and cold storage, and a modern bakery, the two latter also on a sufficiently large scale to meet the needs of the city.

Another scheme which arouses curiosity is the proposed "Arab Economic Development Association," the objects of which comprise "all that contributes to the welfare and benefit of the country, its development and progress in education, instruction, economic conditions and character." The economic objects of the Association include the formation of companies, the establishment of banks, the undertaking of commercial and agricultural enterprises. This includes the encouragement of native iudustries as well as the establishment of factories for such industries as are likely to assist the "fellah" in order to enable him to progress and to raise his agricultural standing.

GREECE.

Athens, June 24.

The Chios Celebrations.

King Constantine, accompanied by Prince Paul, the Ministers, and a large number of Deputies and officials, attended the centenary celebrations of the defeat of the Turks by the Greeks and the freedom of the island. His Majesty was received with great enthusiasm by the whole population amid indescribable scenes of rejoicing, similar to the reception by the Athenians on his return to the throne.

Bombardment of Samsoun.

Following the expression of the British Government's point of view that bombardment of Turkish towns by the Greek Fleet hinders the negotiations for a settlement of the Asia Minor question, it is understood that orders have been issued by the Greek Government to the Fleet to confine its operations in the future to the blockade of the Turkish coast. The actual damage caused by the bombardment of Samsoun is not yet known.

Refugees from Russia.

Owing to the outbreak of typhus and other fevers on board refugee ships from Russia, the Government have enacted that no more ships will be allowed to enter Greek ports. Arrangements have been made to open an auxiliary quarantine station on the small island of Makronissi, off the south coast, where between nine and ten thousand refugees will be sent when the arrangements are complete.

The War in Asia Minor.

So little is heard of actual operations that one is apt to forget that a Greek army of over 300,000 men is in the field. The new Commander-in-Chief, General Hadjianestis, has completed his tour of inspection of his troops and is expected to return shortly to Athens to make a report to the Government. The troops are stated to be in first-class condition and eager "to wipe off the face of the earth the whole of Kemal's forces." Considering that the male population has been under arms for nearly eleven years, the spirit shown is quite wonderful, especially when the terrible weather conditions prevalent in Asia Minor during the winter months are known.

The Boule.

Several sessions during the week were taken up with the question of woman suffrage, but no decision was taken. A very large amount of propaganda work was done by the Greek women before the return of King Constantine, and the Government no doubt wishes to reward them for their labours. There can be no question that the women of this country are just as able as the men to sum up the political situation.

Interest in the new agrarian law has overshadowed all other questions; a very large number of members will speak, so it will be some time before a decision is taken. Discussion of this and similar questions keeps the public mind off international politics and so enables the Government to carry out its policy, necessarily a waiting one, to learn what the Allies may arrange in regard to Asia Minor.

The General Situation.

The general situation in Greece is peculiar. The Government, if not actually bankrupt, is in very difficult financial straits, while individually the people have any amount of money, in spite of the fact that half of the bank notes have been paid into the forced Loan.

The forced Loan affected primarily the least well-off classes, persons who kept their small available funds at the banks or in their pockets. Kindly disposed creditors also suffered, because those who owed debts rushed to pay them during the days of grace allowed. In many cases people paid debts which had been written off as "bad" many months before.

Prices in drachmae continue to rise, but the general demand does not appear to diminish—especially in Athens, where the shopkeepers continue to reap a heavy profit, altering their prices to keep pace with the foreign exchange rates.

What is going to be the outcome? Matters cannot go on as at present. So long as the war continues Government expenses cannot be very much reduced, and no steps are being taken officially to develop the resources of the country. Greece is first and foremost an agricultural country—there are many thousands of acres of wheat-growing lands in Macedonia and Thrace which are lying uncultivated. These lands require no reclamation—they are ready for the plough. The only way to put Greek finances on a lastingly sound basis is to develop agriculture. Money is required to purchase animals, build dwellings, and to provide seed: the land is available. Unfortunately the population is not. Every effort therefore ought to be made by the Government to induce settlement on these lands. Free gifts of land with loans for the purchase of necessities, repayable on easy terms, should be made to settlers, who would be under some form of control. Control could most easily be exercised by requiring the cultivators to bring their crops to certain threshing centres where the Government would provide machinery, for the use of which a percentage charge in kind could be made.

The primary aim would be to provide sufficient wheat to supply the necessities of the country and this could be done easily and quickly. There are thousands of refugees in and around Greece at the present time and, though few may be agricultural labourers, with proper organisation they could be employed and some use made of their labour. Hydro-electric power is also quite undeveloped, with the result that many tons of foreign fuel are imported; this could be avoided.

The first and foremost daily thought of the authorities should be the production of the people's food. Once that is started on a large scale, we can look forward with hope to a rapid advance in the financial position of the country; but without such development the repeated sacrifices made by the people since 1912 will be wasted, because an idle and unpopulated land is not only a burden but a real danger to a country.

YUGOSLAVIA.

Zagreb, June 27.

Shifting Politics.

After prolonged excitement Parliament is now taking a rest, though nominally still sitting. The Electoral Law, in spite of being set up on very broad and democratic lines, gave occasion to the Opposition and the extreme Left members for unprecedented conduct in the Skupshtina. The Speaker was obliged to suspend two Members from ten meetings for having booed and whistled while the Bill was read. This had the desired effect, since order was quickly established when the offending Members realized that, besides being morally punished, they would have deducted from their allowances some 1,800 dinars.

In Croatia the state of affairs is not particularly bright, and the recent disturbances in Zagreb have caused the Government to close down some of the Separatist societies, which had gone too far in creating and maintaining ill-feeling between the Serbs and Croats.

M. Raditch, the Separatist leader, remains as mysterious as ever. He receives hardly anybody, and even a personal visit by M. Protitch had not much effect in changing the situation. M. Raditch is losing followers every day, for he has not been able to fulfil the promises made two years ago, and the people, having lost faith in him, are readily going over to his opponents, who are displaying greater activity in view of the coming elections, which are expected to change considerably the distribution of parties.

General News.

Ali Ahmed Bey, who is now discussing with the Belgrade Government the possibilities of a commercial treaty between Albania and Yugoslavia, has expressed himself highly satisfied with the results of these meetings.

Owing to some differences of opinion among the Cabinet Ministers, the Minister of the Interior has resigned, and M. Davidovitch, the ex-Premier, is expected in some quarters to succeed to the post.

Much has been said lately about Prince George of Serbia, but the truth appears to be only that the Prince's wound in the spine, which he received on the Drina front in 1914, is accelerating neurasthenia to such an extent that his Royal Highness has been taken to a private nursing home near Paris.

ALBANIA.

Tirana, June 19.

The Italian Post Office at Durazzo.

Under the Turkish régime Italy and Austria-Hungary had post-offices in every important sea-port, and often even in the interior of the country. Further, France, Great Britain, Germany, and Russia had post-offices at Constantinople and in other important towns. Since the Congress of Luishnia (January, 1920) and the creation of a definitely Albanian Government, Albania has declared that she could not tolerate on the part of foreign Powers anything which might derogate from the independence and sovereignty of the country. There could not, therefore, be any question of re-establishing foreign post-offices. However, Italy continued to maintain her military post-offices at Valona, Durazzo, and Scutari, under the pretext that there were still Italian garrisons in Albania. But as long ago as last March the remaining Italian soldiers at Durazzo left the country, and the Albanian Government demanded the withdrawal of the afore-mentioned military post-offices, as well as of the two radio stations at Durazzo and Scutari. The Consulta had given it to be understood that this withdrawal would take place shortly, and that a postal convention between Italy and Albania would soon be concluded.

While waiting for this withdrawal, the agent at Durazzo of the Puglia Shipping Company on June 13 stuck up a bill on the door of his office bearing the inscription "Royal Italian Posts." On the following day the prefect of Durazzo caught sight of it as he passed by the agency, and immediately had the notice pulled down; after which he betook himself to M. Gobi, the Italian Consul, to recount to him what had taken place.

The same day the Albanian post-bag was due to be sent by the Puglia agency to Bari. The agent refused to take delivery of it, and the bag had to be redirected—via Scutari—to Cettigne, by the Yugoslav postal service, to make its way to the centre and west of Europe.

At the time of writing the incident has not yet been settled. The fact is that, without the good will of the Yugoslav postal authorities, Albania would have been isolated from the rest of the world. The Albanian telegraph wires were linked up with the Serbian wires on May 20; but this is the first time that the post-bag has been sent via the Serbian route.

Foreign Representatives.

On June 13 there arrived in Tirana Mr. Maxwell Blake, who has been sent to Albania by the United States Government, to investigate and report upon the political situation. Mr. Blake has come on from Morocco, where he has been for some time American Consul.

It may be remarked here that the United States have not yet officially recognised Albania. The Albanians find it difficult to understand this attitude of the Washington Government, since there is nothing to hinder America from following the example of many of the European States—Germany and Portugal have both lately accorded their recognition of the Albanian Government. Albania supports a consul at New York, who issues visas for passports, and so forth, but officially he is not recognised. It is much to be hoped that Washington will not long delay entering into official relations with Tirana.

I have told you in one of my previous letters that M. Béguin Billcoq, French Consul at Scutari, had been nominated Chargé d'Affaires. M. Billcoq, who elects to continue residing at Scutari, has just presented his credentials at Tirana. The ceremony was strictly official, and a military guard of honour was provided; for though his Letter of Credence was addressed to the Minister for Foreign Affairs, the French representative wished to invest the ceremony with pomp, and the Tirana Government was glad to signalise the resumption of relations with France.

The Internal Situation.

Events continue to follow the same course in the North, where disarmament goes forward without any incident. Bairam Tsuri has now retired to Gussinye, on Yugoslav territory. Hassan Prishtina and Mustapha Kroya, two of the most active figures in the troubles of last March, have also taken refuge on Serbian territory. Hamid Toptani is at Belgrade, enjoying the hospitality of the Yugoslav Government, according to all reports. Certain others who took an active part in the creation of trouble have sought refuge at Bari, Italy, Thus, Italy and Yugoslavia share the honour of offering asylum to mischief-makers and stormy petrels. It is to be hoped that no ill results for Albania or for peace will follow; for it would be unfortunate indeed if the two countries referred to allowed their territory to be used for the creation of fresh trouble.

The energy and the wise action of the Government have produced very good effects ; and to-day it may be said that there are no clouds on the horizon.

The Court Martial continues its inquiries. Last week Mustapha Ndrogi was publicly hanged. He was an old adherent of the famous Essad Pasha, and he was involved in the March disturbances. Those who are sentenced to imprisonment are confined at Argyrokastro, in the South.

BULGARIA.

Sofia, June 26.

Frontier Bands.

It is announced that the League of Nations has consented to act as arbitrator in the dispute between Bulgaria and her neighbours, Greece, Yugoslavia and Roumania, over the activities of frontier bands. It is likely that the matter will come up for discussion in the middle of July, and that each country will send representatives to Geneva. Meanwhile the Government continues to deny categorically the accusations brought against Bulgaria by her neighbours. It states that all possible steps have been taken for the extermination of frontier bands, and that the authorities are not in any way implicated in the *komitajis*' activities. Well-informed circles consider that, if the activities of these bands do not cease, Bulgaria's neighbours may well take matters into their own hands and send troops over the frontier. Such measures would no doubt be illegal, but in the Balkans " Might is Right," and all the might is on the side of Bulgaria's neighbours. In the event of such an event occurring, it will be interesting to see what policy is pursued by the Great Powers. Will they adopt a policy of impassiveness or will they come to Bulgaria's rescue ? The former is the more likely.

Government and Inter-Allied Commission.

During the last ten days frequent meetings have been held between the Government and the Inter-Allied Commission. M. Tourlakoff, Minister of Finance, has represented the Government, and it is understood that relations, which formerly were bad, are now considerably better. The Government has passed the two Laws demanded by the Commission, namely those referring to the fiduciary circulation and the List of Revenues.

The chief point now at issue is the revenue of the coal mines. The Commission demand that the whole revenue should be shown, whilst the Government wish to show only the net revenue. As last year the mines were run at a loss, it is naturally of no advantage to the Commission, if the net revenues were shown.

Sir Elliot Colvin, the British Delegate on the Commission leaves to-day for England, and Mr. Bruce, his Secretary-General, will act for him.

The Position of the Russians.

It is unfortunate to have to record that the persecution of Russians has not stopped. Russians are now accused of acting as informers and spies to the Military Organ of Liquidation. Whenever the latter body lay their hands on any hidden arms or ammunition, some unfortunate Russian is singled out for vengeance on the ground that it is he who is responsible for the Commission's find. The persons who persecute the Russians are not numerous, and do not directly represent the Government. Nevertheless they are persons of authority and their action is highly detrimental to Bulgarian interests. Once a country is accused of persecuting foreigners, it is difficult to rebut the accusations, and although Dr. Benes, the Czecho-Slovakian Prime Minister, remarked in a recent speech that internal political diffIculties had forceed Bulgaria to persecute Russians, this excuse does not carry much weight. Practically every Bulgarian, except the Communists, has a warm corner in his heart for the Russians, and it is extremely regrettable that a few persons are permitted to go against their countrymen's wishes and inclinations. A good example of how the Russians regard Bulgaria is furnished by the refusal of a thousand Russian invalids in Constantinople to enter Bulgaria. These invalids knew that no work and no charity awaited them in Constantinople, but they preferred to remain where they were rather than come to Bulgaria, where both work and charity were available.

The Inundation.

The storm of rain and hail that broke over Sofia and district a week ago was the heaviest ever experienced. Some thousands of the poorer classes have been rendered homeless, whilst the damage to the country and the crops is very considerable. Fortunately the storm was to a large extent local, and in Northern Bulgaria the damage is comparatively slight. An idea of the severity of the storm can be gained by the size of the hail stones, some of which were as large as a hen's egg. A relief fund has been opened in Sofia with the object of helping those who have had their homes destroyed.

Bulgaria's Eastern Frontier.

For some time past there has appeared in the *Echo de Bulgarie* a series of articles entitled " Propos du Jour." These articles are usually couched in a sarcastic vein and are believed to be the work of a foreigner well known in Sofia for his anti-Ally sympathies. In any case the " Propos " of June 23 is worthy of reproduction and reads as follows :

" Divine Providence decreed that Bulgaria's Eastern frontier should be guarded by the sea. Our Eastern neighbour is called Black, but it is neither black in colour nor in actions. If it had been a land frontier, no doubt we should have had to give up more territory, pay more reparations, and deliver more cattle and war material. Even the *komitajis* would have felt obliged to make incursions over the frontiers. But the Black Sea will never become a member of the Little Entente. The Black Sea may not be free itself, but it gives to Bulgaria the only free frontier the latter possesses. God bless the Providence that gave us the Black Sea as our Eastern Frontier ! "

CYPRUS.

Nicosia, (undated).

The High Commissioner.

On account of Mr. Stevenson's indisposition, Mr. C. D. Fenn has taken over temporarily the duties of High Commissioner. Major Bolton, Commissioner of Limassol, will act as Chief Secretary, being replaced by Mr. Montagu ; Major Flinn, Commandant of Police at Nicosia, will act as A.D.C. and Private Secretary. The Governor will leave for England very shortly.

The " National Council."

This body continues to pose as representing the Greek community. It has been discussing the idea of submitting the " Cyprus question " to the League of Nations ; but many of the more sober-minded and

reflecting persons disapprove not only of ridiculous propositions such as this, but of various other results of the Council's deliberations. At a meeting on May 21 it passed resolutions expressing regret at the decision of the British Government which, it says, "refuses justice to the Cypriot people." They will, it asserts, carry on the struggle for freedom, and hope that H.M. Government will not continue to govern by force, and against the will of the people. They speak of the Cypriot people as if they constituted the whole population, always ignoring entirely the 60,000 Moslems, whose rights and interests the British Government is pledged to bear in mind and respect.

General News.

The Greek Archbishop has sent a telegram to the President of the Pan-Christian Congress at New York, joining in the protest against Turkish oppression in Asia Minor.

The Russian refugees left Limassol for Bulgaria by the last Lloyd Triestino Steamer.

Mr. X. O. Pharmakides of Limassol is about to publish his Lexicon of the Cypriot dialect. The seventh and last section of the work (of about 700 pages) has been published at Athens, and has won a prize of 500 drachmae there.

The High Commissioner, who is much better in health, has resumed his duties. He will go on leave as soon as he feels completely recovered.

The Birthday of King George was celebrated at Nicosia and other towns. The name day of the King of Greece coincided, and was duly observed by the Greek community.

Sir Stanley Fisher, Chief Justice, has left for England on leave, ending on September 23. Mr. Bowring, the Treasurer, has taken leave for the same period.

ASIA MINOR.

Smyrna, June 16.

Since the arrival of the new Commander-in-Chief of the Greek Army, General Hadjianestis, who, unlike General Papoulas, is an old friend of M. Sterghiades, the Greek High Commissioner, the relations between the Civil and Military authorities have been most cordial. This state of things is least appreciated by the ever-increasing crowd of "backsliders" who have profited by the quibbling between the two authorities. It is estimated that there are 50,000 *rayahs* (Greek Ottoman subjects) serving in the Greek army in Asia Minor, and the Greek authorities claim that they are all "volunteers." General Hadjianestis is expected to withdraw gradually Athenian regiments from the front and fill the gaps with regiments of Anatolian Greeks.

CORRESPONDENCE.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper.

'ANGORA AND DR. NIHAD RECHAD BEY."

To the Editor of "The Near East."

Sir.—In a letter from your Constantinople Correspondent dated June 11, zand published in your issue of the 29th June, there is some information relating to myself. Would you permit me to rectify certain points in your Correspondent's communications which are rather inaccurate.

Referring to my statements in the House of Commons made on the 24th May last, in an answer to a question put to him by a Deputy, Yusuf Kemal Bey stated before the National Assembly—literally :—

> "We have no official information relative to the declarations of Dr. Nihad Rechad Bey in the House of Commons. As you are well aware no mandate to negotiate peace can be given to anybody without previous notice to the National Assembly, whose claims and aspirations are made public in the National Pact. Even the Commissary for Foreign Affairs who is a mandatory of your Assembly is under the obligation of acting within the limits of the said pact. Dr. Nihad Rechad Bey is not a Plenipotentiary of our Assembly."

It is obvious that under the present circumstances there cannot be any question of sending here any official representative on behalf of the Angora Government, and I have never declared to anyone in this country that I was here in an official capacity.

This being so, there is naturally no question of my being a Plenipotentiary with the power of speaking in the name of the Angora Government, and I have never stated in the House of Commons that I was such a Plenipotentiary. In the same way the Deputies in the House of Commons who honoured me with certain questions could not in any way engage the British Government's word. Nevertheless an exchange of view between a certain number of Members of Parliament and a Nationalist Turk seemed to me not void of interest for both parties, and the meeting was organised in that spirit.

I am, etc.

London, July 3. N. RECHAD.

(All those who are personally acquainted with Dr. Rechad Bey will be glad to learn that there is such a satisfactory explanation of the ominous word "repudiated" which had evidently been applied in Angora to summarise Yusuf Kemal Bey's remarks.—Ed.)

Sir,—As having contributed the account you published of Réchad Bey's statements at the House of Commons on the 24th ult. may I be permitted to correct your Constantinople Correspondent in certain of his comments in his letter of the 11th instant ?

The facts are as follows. Owing to the present political situation between Turkey and England neither Angora nor Constantinople can have a resident Minister-Plenipotentiary in England. Special Missions have on two occasions come under Ministers with full powers to negotiate, but only "unofficial" Representatives remain here.

Nihad Réchad Bey, in making his declarations to Members of Parliament, technically did so in his private capacity, but, nevertheless, he was and is the Representative of the Angora Minister for Foreign Affairs, though not a Plenipotentiary of the Angora Government. So much for that.

An interpellation was, it is true, made in the Angora National Assembly because, before Réchad Bey's report to H. E. Youssouf Kemal Bey had arrived, it had been inaccurately said in Angora that Réchad Bey had agreed to sacrifice Adrianople and/or agree to Thrace being a "Buffer-State." Having sat next to Réchad Bey at the meeting in question, I know exactly what transpired and it just happens that in my account of the proceedings (which would have been too long to relate in full) I did not mention the Adrianople incident. The late Sir J. D. Rees leant across the Chairman (Sir Martin Conway) and asked Réchad Bey whether, if satisfaction were to be given to Turkey on every other point, she would be prepared to waive the question of Adrianople. Réchad Bey did not quite catch the question, which I then repeated to him, and Sir John then also wrote it down. Réchad Bey at once said that Turkey could not waive the question of Adrianople. Also he never said that "Thrace could be a buffer state,', but that, in his view, there *might* be a possibility of the constitution of a buffer state between Turkish Thrace and Greece so that there might be no common frontier.

The Angora Minister of Foreign Affairs (being, as explained, without full details) replied to the interpellation that he did not know what had been said but that, as Réchad Bey was not a Plenipotentiary, it did not matter as far as Turkey was concerned, what he promised.

I believe that the circumstances are as I have explained

I am. etc.,

June 30. A. P. TULLY.

PRESS ON THE NEAR EAST.

In consequence of inquiries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

The Turk.

In the *Westminster Gazette* of June 27, Mr. Roy Elston sets out his impressions gained in a recent attempt to reach Angora. After a statement that Angora was impossible of access to an Englishman, he gives an interesting study of the Stamboul Turk :—

> Queer people these Turks, and an endless study. In the north of Anatolia they are one thing ; in the south, another ; and in Stamboul a type less fitted to form a criterion of the race than in any other part of the Sultan's dominions. With one foot in the Orient, and the other in the Occident, this Turk of Stamboul has lost his identity, despite his fez and nargileh. In Anatolia, however, amid the wild and natural surroundings that welded out of nomad tribes a nation strong enough to rule from the Black Sea to the Danube, from Cairo to Baghdad, and drew from it a culture not suspected to-day, the virile and robust Turk is still to be found, retaining outwardly, as well as inwardly, his type. Hence my desire to observe this type where previous experience had taught me it was most to be found ; that is, in the lands east of Brusa, lands swept by fierce winters, parched by garish summers, and yielding its wealth with a struggle.
>
> This land of Nationalist Turkey, controlled from Angora's uncertain walls, having been denied to me, my thoughts were directed farther south to the fertile plains and valleys watered by the snows of Ida's heaven-ascending peaks, and yielding its riches with a prodigality that has destroyed successive nations. And here again, of course, obstacles arose to block my way ; for in this north-western corner of Asia Minor, a country ruled at one time by princes of the Teucri, and now, it seems, not ruled at all, is a field for the enterprise of predatory brigands whose chief delight is to raid the villages situated beyond the Greek line of occupation, but who frequently do not go as far, and content themselves with terrorising their own neighbourhood.
>
> It seems a hopeless task to oust brigandage from Turkey ; an essential phase of the Turk's character is his love of such things, and he soon grows sick of the restraints imposed by modern rules of law and order. And the same conditions extend to the higher affairs of Turkey ; for it is useless to try to erect on Islamic morality the conventions and constitutions of modern Europe, and useless, I think, to expect the government of Turkey to be anything else than it is; Islam will be Islam no longer when the Porte is a reflex of Whitehall.

The Macedonian Problem.

To the *Morning Post* of June 20 its Athens correspondent contributes an article which endeavours to provide a key to the solution of the Macedonian problem. He begins by stating generally the attitude of Europe towards Macedonia :—

> An interesting fact brought into prominence by the success of the League of Nations' arbitration in the Upper Silesian question last year was the favourableness of the present situation in European politics for the settlement of certain Near Eastern questions, including that of Macedonia. Macedonia is the square where the Vardar highway from Central Europe to the Ægean, and the Via Egnatia, which joins Constantinople to the Adriatic, cross ; and Salonica is the toll-gate. And whereas it is essential that whoever keeps the toll-gate should own the whole square, if he is to be responsible for his own security at the gate—which is the only practical arrangement—Europe cannot afford to allow him to be also the owner of a whole road. This disqualification applied to a Russia or a Central European Power working through a Bulgarian or Serbian extension even more, perhaps, than to a Power whose seat was at Constantinople. And it is because of this vital consideration that Greece, with the consent of Europe, has become the keeper of the gate, and the problem has been narrowed down to the form in which it presents itself to-day ; that is to say, to the problem of insuring the gate-keeper's security in the square.
>
> This is in the main an internal problem—a question between the gate-keeper and the inhabitants of the square. Let it be said straightaway that the inhabitants are members of so many intermingled creeds and races that the partitioning of the square in accordance with principles of "self-determination" would be a disastrous solution for enormous minorities. The Treaty of Bucharest purported to make such a partition after the Balkan Wars, and promptly had the effect of renewing the old distressing *régime* of propaganda, persecution, and nationalism run wild. Europe, however, cannot well dispose of the country without reference to its population, and, in particular, to its most typical element, the true "Macedonian," whose origin is unknown, but whose tongue identifies him more closely with the Bulgar. An essential part of the business of those who interest themselves in some Western city in the progress of events in the square will be to comprehend the figure who will be watching them from the Eastern hills—the interested and interesting figure of the Macedonian.

He proceeds to explain the psychology of the Macedonian, for the understanding of which, he says, two things must be considered : the Macedonian's love of his land, and his race feeling. And he concludes by sketching a practical arrangement for providing the Macedonian peasant with land :—

> The principal question in the internal settlement of Macedonia to-day is the problem of the racial minorities who have become separated from their land, the refugee problem, the most prevalent, and perhaps the most dangerous of Balkan evils. Exile unites Balkan refugees into well-organised, feverishly active, and somewhat dangerously tempered bodies infected with the irresponsibility of having all to regain and nothing to lose. This is evidently a serious menace to the *status quo* in Macedonia. What is being done to deal with it ? For the situation of the Macedonian refugee Europe has provided two remedies. One is offered by a treaty in which Greece guarantees the protection of the minorities who chose to adopt Greek nationality and live under Greek rule, ensuring them freedom to worship in their own churches and to educate their children in their own language in their own schools. The other is the scheme of facilitating voluntary emigration, which is the object of a special convention on reciprocal emigration between Greece and Bulgaria, signed at the instigation of the Allied and Associated Powers. The treaty concerning the special *régime* for minorities is at present unratified, and in any case presents grave difficulties of application while Greece is still, even theoretically, in a state of war. The Emigration Convention, on the other hand, possesses very practical advantages to recommend it. The Macedonian peasant's deepest need is for land. The Convention offers him the liquidation of his abandoned property and puts in his hand the price of equivalent land in the country whither his racial sympathies have attracted him. There is plenty of this land, land left by Greek and Turkish refugees, land freed by the break-up of the big landed estates under the new Bulgarian land reforms. And a Bulgaro-Macedonian peasant with land to work on and no foreign neighbours in the next village may be considered to be very satisfac-

torily established as a good peasant and a good Bulgarian.

Here then is a scheme on which the statesmen of Europe would surely do well to keep an eye. The two Governments of Greece and Bulgaria, who have to advance the money for the abandoned properties liquidated, are alive to the advantages of the emigration solution; but both have much else on their hands. Some encouragement from the other Powers, a knowledge that Europe is taking an interest in this attempt to solve one of its problems, might do much to support their efforts.

In commenting upon the above-mentioned article the *Glasgow Herald* of June 22 states that there are clearly obstacles to any such solution of the problem, and it continues :—

> There is no difficulty about land, plenty of which is available both in Macedonia, from whence many Turks have fled never to return, and in Bulgaria, where numbers of former great estates have been broken up. But the sorting out of thousands of refugees and their transportation to and settlement upon congenial plots distant, perhaps, some hundreds of miles from those upon which they formerly subsisted, is a process requiring great skill in organisation and involving very considerable expenditure. The Greek and Bulgarian Governments are understood to be alive to the advantages of the scheme, but they ask to be supported by the encouragement of the other Powers on the ground that they both have their hands full in other ways. We confess that the appeal leaves us cold, more especially if by "encouragement" pecuniary assistance is meant. The trouble in Macedonia is almost entirely due to the congenital inability of all Balkan peoples to remain settled and content for more than short periods, and, having resumed possession of the country, it is Greece's business to bring its alien inhabitants into line with her own people in the matter of diminished lawlessness and irresponsibility. If she cannot prevent one of her own provinces from becoming a nuisance to Europe she is hardly fit to have complete control of Thrace, much less to add the entire Smyrna vilayet to her already greatly distended territory.

The Middle East.

The *Morning Post* of June 28 contains an article which considers the problem of Palestine and Iraq. It begins by showing what difficulties and obscurities have been caused by the use of the conception of "Mandates" :—

> All this, however, is very confusing to the Palestinians and the inhabitants of Iraq. All of them, even those effendis who for the sake of possible political preferment affect not to see it, know in reality that, were it not for the presence of the British, Palestine and Iraq would fall to the forces of internal chaos and external aggression. The problems which affect these countries—internal jealousy and differences of race and religion, external threats from such as Wahabi, Turk, Zionist, or Kurd—are small in themselves and can easily be kept in control by a strong administration. In so far, therefore, as the term "mandate" means "protection" it has the enthusiastic support of the races which inhabit the Middle East. Why not, therefore, call it a Protectorate straightaway and eliminate the factor of uncertainty? There is no real reason except that the word Protectorate appears to be held in disfavour, to be considered to mean dependency, and to imply permanence without any reference to eventual self-determination. Therefore the word mandate has been chosen. It is like "Suzerainty" in lieu of "Sovereignty" in South Africa of old, and will probably suffer the same fate. In Palestine there is no feeling against the idea of a British mandate, but in Iraq some feeling does exist. The inhabitants of Iraq would prefer to see the situation defined and stabilised by a Treaty, and not kept vaguely in the air under a mandate.

The writer of the article proceeds to estimate the effect of Great Britain's withdrawal from Palestine and Iraq :—

> Palestine, unless some other Power, Italy, America, France, Egypt, or Turkey, agreed to take the mandate, would revert to a state of chaos and civic disruption, the Zionists would be impelled either to give up their claims or persuade some other Power to further them. In any case there would be war, which would hardly be likely to benefit anybody economically, least of all England. In Iraq there would be almost immediately an invasion by the Kemalists from the North and the Wahabis from the South, the methods of conquest employed by neither of these being in full accordance with the ideas of civilisation. All British and American interests both in Iraq and Persia would have to be abandoned, and the world would be the poorer.
>
> It cannot be denied that the Government was prodigal of British money in the Middle East during the war, and the two years after, but the astonishing wave of "squandermania" was no worse in the Middle East than it was in England. It has, however, now ceased, and has, in fact, been followed by a sharp reaction. Expenditure in the Middle East must be looked upon as capital outlay, and it will bring in a wonderful return if properly managed. The possibilities of development in Iraq alone are enormous; far greater than ever appeared possible in the case of Egypt a hundred years ago, but Government expenditure must be limited to the needs of ensuring security in the country and reduced to the minimum provided that security be assured, for without true security no development can take place, and any money spent would then be wasted. This, it can be said, is being done.

After asserting that the dangers threatening Iraq have been exaggerated, he concludes by sketching the future of the two Arab countries :—

> Thanks to the firmness, tact, and personality of that able administrator, Sir Percy Cox, and the success of the co-operation of the Air Force and the native levies, the expense to the British taxpayer will be very small indeed, and once confidence and security have been assured the development of the country will be very rapid. Two things are yet to be obtained, however—the mandate or treaty defining the relations between Great Britain and Iraq and the power of the Iraq Government to grant concessions for the development of the country. Further, it is of the utmost importance that the interests of the inhabitants of Iraq themselves be considered when these concessions are given, and that firms and syndicates who take them up should allot a portion of shares to be raised in the country; otherwise there will be endless trouble. If British and Arab private enterprise be allowed full play in co-operation it will result in a new Iraq and will help us to know "What to do with our sons." If the British evacuate Iraq, "bag and baggage," the Kemalist Turk will come in instead, and there will be a very sorry tale of more murdered Christians to tell.
>
> The case of Palestine is more complex, the problem being entirely religious and political. In spite of the reiterated assurances of zealots to the contrary, Palestine is of little commercial value to Great Britain, and she has no military value whatsoever. But that is no reason why we should relinquish our obligations to Palestine, neither is it a reason for her being a source of expenditure. Palestine needs an impartial Administration, a severe Geddes Axe, and an end to political turmoil, given which she should be the cause of no more trouble or expense to the Colonial Office than, say, Newfoundland. If British Administration can give freedom and justice to her people, and can render her economically self-supporting, then let us accept the mandate. If not, and if other candidates be in the field. their claims should be considered.

NEAR EAST BOOKSHELF.

THE TRAGEDY OF AN EMPRESS.

"THE REAL TSARITSA." By Madame Lili Dehn. (London: Thornton Butterworth. 15s. net.)

In 1907 Mlle. Lili Smolsky married Captain Charles Dehn, an officer of the imperial yacht 'Standart' and of the Mixed Body-Guard. His girl-bride soon won her way to the Empress Alexandra's heart, and for upwards of a decade she lived on terms of the closest intimacy with Russia's luckless Rulers. She has now given the world a graphic but one-sided picture of their jealously-guarded environment. In her artless narrative the last Tsaritsa stands revealed as a woman of deep culture, and in many respects a worthy daughter of our lamented Princess Alice. Like most of her family she suffered from invariable shyness, which was too often mistaken for pride; and she had a large share of the obstinacy in pursuing ideals which had enabled the Coburg Dynasty to play a leading part in the world's affairs. It has been said with perfect truth that we are all congenital Platonists or Aristotelians—either absorbed in things of the Spirit or in the contingencies of material life. Alexandra belonged to the former category. She adopted her husband's religion with a convert's zeal, and became, in common parlance, "more Catholic than the Pope." An ingrained tendency towards mysticism made her an easy prey to the boorish Rasputin, who appears in these pages as an unconscious tool of the revolutionary party and the German agents who swarmed throughout Russia. But the charge of pro-Germanism which was so often hurled at her devoted head had no foundation in fact. Alexandra was essentially an Englishwoman with a thick Russian veneer. In Mme. Dehn's words:—

> She was English in her dress, her personal habits, her absolutely Victorian outlook; some of her ideas respecting the *ménage* were those of a *Hausfrau*, but even these were English, as domesticity has always been an English virtue.

She cherished the little Tsarevitch—victim of an hereditary disease—as the apple of her eye, and four charming daughters were living evidence of their mother's enlightened training.

Nicholas II. shines in Mme. Dehn's story as a model of all the domestic virtues, and the head of a family united in the bonds of love. Without a particle of pride in his composition he was devoted heart and soul to Russia, and had a profound sense of the responsibilities entailed by his position. He was emphatically a good man in every sense of the word, and his love of manly sports was never allowed to interfere with the absorbing routine of official duty. His ruin and that of Russia arose from a fundamental error in his outlook on life. The imperial pair fondly believed that they could inhabit, so to speak, a watertight compartment. Mme. Dehn admits that

> They wished to lead the lives of private individuals; but in Russia it has never been possible for a Tsar to be human. He was an emblem, a representative of crystallized traditions: he united in himself the roles of Father of his people and splendid, all-conquering, unapproachable Tsar. An Emperor or Empress in mufti, so to speak, has never appealed to the popular imagination.

When the ignorant and superstitious masses discovered that their idol was but a human being, autocracy lost its ancient glamour, and the only force which could have stemmed the torrent of revolution was rudely thrust aside. Nicholas II. and his consort were blind to the subversive movement which had been gathering force since the disastrous struggle with Japan, and gained irresistible momentum in the Great War. They drifted helplessly towards their doom; but when it came they bore the cruellest reverses with heroic fortitude.

Mme. Dehn believes that the cataclysm which has wiped Russia from the list of civilised Powers was quite inevitable. A superman of Napoleon's calibre might, indeed, have been strong enough to "ride the whirlwind and direct the storm"; but such transcendent genius as he possessed recurs perhaps once in a millennium. If the Emperor Alexander III. had lived for another decade he would certainly have avoided coming to blows with Japan; and would have enlisted the ardent patriotism which thrills in every true Russian's heart in a death-struggle with the sinister forces making for revolution. His son's unfitness to cope with a task so tremendous leaps to light even in Mme. Dehn's biassed story; but she makes no reference to the atmosphere of intrigue, corruption and self-seeking which stifled her imperial master; to his secretiveness and his inability to judge character which led him to bestow high office on incapables and rogues. Mr. Wilton's "The Last Days of the Romanovs," which has been reviewed in these columns, affords a far more accurate picture of the last Tsar of Russia and his unhappy Egeria. He describes Nicholas II. as a man of pure and lofty aims, but cursed with a weakness of will which caused him to see everything through his consort's eyes. Indeed the only crucial step which he took at a distance from her was his abdication. The Empress appears to have been imbued with the feudal notion current in her caste that Russia was a heritage to be preserved intact for her son. She was, therefore, always prone to advocate reactionary measures, while the Emperor's instincts favoured liberalism. The resulting antinomy serves to explain the vacillations which marked the close of the imperial era in Russia and finally plunged her in anarchy. Nicholas II. would have adorned any private station; as an autocrat he proved a tragic failure, and uxoriousness was the chief factor in his ruin.

F. H. S.

MR. TWEMLOW'S GODSON.

"THE VENEERINGS." By Sir Harry Johnston. (London: Chatto & Windus. 8s. 6d. net).

Sir Harry Johnston has again carried on the careers of some of Dickens' characters, this time of those in "Our Mutual Friend." "The Veneerings" is a chronicle concerning the resurrection, through John Hammond's skill and hard work, of the firm of Chicksey, Veneering and Stobbles, which is finally shown as a famous vegetable drug business, with a great experimental garden for drug plants in the Pyrenees in charge of Madame Sophie de Lamelle, who is none other than Sophronia Lammbe.

It is easy to see how much Sir Harry must have enjoyed himself in writing this rather rambling chronicle, in which he has combined the pleasant tasks of continuing the histories of the Harmons, Veneerings and Lammbes from 1865 to 1906, and of giving, through the travel letters of his hero, Mervyn Veneering (Mr. Twemlow's godson), descriptions of New York, South America and South Africa.

A difficulty about making a narrative out of one's ideas of what happened to the characters of a famous book, after their creator ceased to chronicle their doings, is to know whether to treat them frankly as the creations of the great author's mind or to write of them as real people who can take part in the history of their period. Sir Harry seems to us to have fallen between two stools in regard to this problem. He begins by telling us what he imagined happened to the Veneerings immediately after Dickens left them in the last chapter of "Our Mutual Friend," and it seems bewildering and unconvincing later to find the characters referring to Dickens and his works. Although the best written part of the book is in the latter half, where Sir Harry introduces us to Rhodes himself and also gives us a glimpse of the Jameson Raid, a picture suggesting grim reality, it makes all the detailed counting up of babies and of ages, in which he indulges to the last and which only owes its interest to the connection with Dickens' creations, seem out of place and unimportant. But Sir Harry writes with a sense of enjoyment and with an almost childish love of detail—as in the account of the luncheon given by Sir John Harmon to the directors of his firm—that would disarm the most critical reader. There is one thing which makes him the strangest

Digitized by Google

person to continue Dickens' stories and that is that he is really so much more interested in things—the *Exposition Universelle* of '67, the Deceased Wife's Sister Bill, discoveries in medicine, the fashion for bicycling and so on—than in people.

Next to the fun of actually imagining what happened "afterwards" to book people is the fun of eagerly reading to see what someone else has caused to happen to them and experiencing the thrill of coming on such sentences, for instance, as "Mortimer Lightwood was a rather cynical-looking gentleman about Mr. Harmon's own age, who used in these later days, an eyeglass when he wished to make sure of anything and anybody." There is something comforting in finding Bella and John Harmon and Lizzie and Eugene Wrayburn brought so near to our own times. With Sophie Lammbe and Georgy Podsnap (Mr. Podsnap he kills very soon) Sir Harry has been wonderfully successful. But there are some characters of whom he has realised that they would refuse to move for any but their great creator, and that they could not draw breath outside the magic, glamorous world in which they first came to life. These he has wisely left alone, the Boffins are out of sight in a country cottage, Silas Wegg does not hobble into view and, although a great deal is made of various members of the Wilfer family, we are given no fresh glimpse of the majestic wave of Mrs. Wilfer's gloves.

A VADE-MECUM FOR PALESTINE.

"HISTORICAL SITES IN PALESTINE." By Lieut.-Commander Victor M. Trumper, R.N.R., M.R.A.S. (The Nile Mission Press, 37 Sharia Manakh, Cairo, Egypt. 3s. 6d, post free.)

In a preface to this book the author states that the information contained in it was originally issued in four parts for the members of the Egyptian Expeditionary Force, and from the fact that over twenty thousand copies were sold he argues rightly that the publication in book form is likely to prove useful not only to those who visit Palestine, but also to the Bible student and all those who for any reason feel interested in what he calls "the most wonderful of all lands.". We can heartily endorse Commander Trumper's claim. Without in any way going deeply into his subject or actually breaking new ground he has compiled a handy book of reference, which will certainly appeal to the majority of those for whom it purports to be written. No one can visit Palestine without being stirred by its biblical associations, and even the most perfunctory traveller will like to know that not only the chief cities, but practically every place he passes by rail or road as well has its links with the past centuries. A single quotation will illustrate the author's treatment of his subject. Under the heading El Kerak we read:

This important place, eleven miles from the east shore of the Dead Sea, was the capital of Moab, and goes under several names in the Bible. It is called Kir-Hareseth in II. Kings, iii. 25, in the account of the rebellion of the King of Moab, when he attempted to throw off the yoke of the King of Judah. It is mentioned several times in the prophecies of Isaiah and Jeremiah. There are the remains of a strong Crusaders' castle, and originally the only entrances were two rock-cut tunnels. It was twice unsuccessfully besieged by Saladin, before it finally fell, after the battle of Hattin had broken the Crusaders' power.

Longer articles are devoted to Joshua's campaigns, the history of Jerusalem and Napoleon's Expedition to Syria in 1799. Difficulties of reference owing to the arrangement of the book are overcome by a full index. No visitor to the Holy Land should be without this small volume, although they may not take kindly to its unconventional English.

BOOK RECEIVED

"The Mystery Girl." By Carolyn Wells. (Philadelphia & London: J. B. Lippincott Company. 7s. 6d. net.)

Arrangements have been made by the Zionist Organization in Jewish centres in Roumania for the training of boys in trades before sending them as emigrants to Palestine.

The Mixed National Assembly of the Armenians of Turkey, Gregorian, Umat, and Protestant, has decided that the Armenian National Delegation in Paris is to be the sole official body representing the cause of Armenia in Europe.

MUSICAL NOTES.

THE LAND OF PROMISE.

It is the fashion in this country among the ignorant, and the privilege among the informed, to speak slightingly of American composers. Despite all boosting, all propaganda, and all political nonsense, we remain placidly attached to our belief that no good musically has yet come from the United States. The land whither flock the new stars, whence fade the old stars, and where everyone is convinced that he is suffused in the radiantest of aesthetic lights, has not yet produced a composer of indisputable genius. Its most widely boomed heralds are either, like Mr. John Alden Carpenter or Mr. Charles Wakefield Cadman, thoroughly bad, or, like the subject of the book under review, thoroughly mediocre; in short, either commercial or pleasantly second-rate.

The author of this book makes a curious study. In the space of a few months Mr. Porte has insisted that a non-offending public should read, or perhaps only study, three very similar books: the first on Elgar, the second on Stanford, and now this third on MacDowell. Each of them has been marked by most painstaking labours and the completest absence of musical criticism. This omnivorous adulation, indeed, on the part of Mr. Porte, is really rather a serious matter; because, though it may be well that in discussing works with which the English public is not familiar he should go to any old lengths of praise, when we do happen to know the particular works this peculiar facility in laudation makes even the unwariest of us a little suspicious. And this is a pity, because obviously Mr. Porte has no axe to grind; he is one of those protestants who takes his zeal neat, scorning to dilute it with discretion or even with discrimination.

Everybody knows, of course, that MacDowell, like our own Gerrard Williams, has been labelled and in fact docketed as a miniaturist. Such classification is always wrong, and Mr. Porte rushes to disprove it, but, unfortunately, thus: "Nearly all his small pieces are musical photographs of the fancies of an impressionable and sensitive imagination." This sentence is neither less nor more than what I believe is called "punk." How in the world can a great composer be a "musical photographer"? And what, even in heaven, is the "fancy of an imagination"? Later, in talking of MacDowell's bigger, or rather longer, works, Mr. Porte says: "Admirers think them only equalled by such creations as Beethoven's *Sonata Appassionata*." Still, as long as they are only equalled by Beethoven, I suppose it is all right, and that the ordinary man may continue without too discreet a blush to listen to things like Op. 109, Op. 111, and the later quartets. MacDowell and Beethoven! William Watson and Shakespeare!

The thesis is simply outrageous. Think of the "Woodland Sketches" or the "Sea Pieces," which every schoolgirl knows and plays, or the "Tragic Sonata" or the "Indian Suite," which every concert-goer knows, and then tell whether their composer was a "great music maker." There is finer music than MacDowell's that still falls far short of greatness.

But we have no doubt that MacDowell as a man did much for the musical training of Americans. He appears to have been an excellent teacher, and as a lecturer he certainly said some very intelligent things. He was a thorough musician, with wide sympathies and extensive knowledge; and it was, I imagine, in such work as the revivification of old music (*e.g.* his transcriptions of the 18th. Century harpsichord and clavichord pieces, which were published a few months ago), and the cultivation of an independent frame of mind in Americans, that his chief value lay. America is a land of infinite possibilities, obvious potentialities, and constantly threatened actualities, which last, however, never yet have been fully realised. Musically speaking, it is undoubtedly the Land of Promise, for it has everything but creative genius. MacDowell may have been, who knows? the Telemann, or perhaps the Parry of the Twentieth Century.

PERSONAL AND GENERAL.

To-day.
July 6 (New Style).
June 23 (Old Style).
Julkada 11, 1340 A.H. of the Moslem Calendar.
Tamuz 10, 5682 of the Jewish Calendar.

His Highness the Maharaja of Kapurthala has returned to town from France.

Sir David Yule has left Marseilles in the P. and O. s.s. Devanha for Bombay.

The Maharaja of Rajpipla has left London for a short visit to New York.

A Memorial Service for the late Field Marshal Sir Henry Wilson was held in Cairo on July 2.

Lady Manning has arrived in England from Ceylon, and is staying at 10, Wilton Place, S.W.

Lieutenant-Colonel Douglas Capitaneano, Military Attaché at the Roumanian Legation, has returned from Vichy, and is now staying at Worksop.

Viscountess Allenby, who is coming to England, sailed on June 30 from Alexandria for Trieste in the steamship 'Helouan' on her homeward journey.

Sir Horace Rumbold was due to arrive at 3, Grafton Street on July 4 from the British Embassy, Constantinople, for a short stay.

M. Beza, who has been delivering a series of lectures at Cluj University, has returned to London. The lectures, which were largely attended, were a great success.

The King and Queen of Yugoslavia are expected to return to Belgrade from their honeymoon during the course of next week.

The marriage arranged between Captain John O'Bryen Steward, Indian Army, and Elaine M. F. Ramsden, will take place at St. Andrew's Church, Bath, on July 15.

Sir Elliot Colvin, British Representative on the Reparation Commission in Bulgaria, returns to England this week on leave.

M. Gavrilovitch, Minister for the Kingdom of Serbs, Croats and Slovenes, with the first Secretary of the Yugoslav Legation, and Dr. Stancioff, Minister for Bulgaria, are still at The Hague.

The engagement is announced of Captain T. B. Lawrence, M.C., elder son of Captain J. Lawrence, Indian Army, and Phyllis, younger daughter of Sir Arthur Carkeek, Penventon, Redruth, Cornwall.

A marriage has been arranged between Audrey, only daughter of General Sir Charles Townshend, M.P., and Lady Townshend, and Lieutenant the Count Baudouin de Borchgrave D'Altena, of the First Regiment de Guides, Belgian Army.

The engagement is announced of Captain Douglas S. Warren, I.A.R. (late 26th Punjabis), son of Ernest B. Warren, of Streatham, and Margaret (Greta) G. Wright, elder daughter of Mr. and Mrs. Charles H. Wright, of Fairlawn, Weybridge.

THE PERSIA SOCIETY.

President: *Lord Lamington, G.G.M.G., G.C.I.E.*

Founded in 1911 to study all questions of common interest to Great Britain and Persia.

Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1.

The marriage arranged between Lieutenant Hugh de L. Standley, R.N., eldest son of Mr. A. W. E. Standley, late P.E.D., and Mrs. Standley, of Bikanir, India, and Corona Elsie (Nan), only daughter of Dr. C. R. Crawford, of Southsea, will take place at St. Jude's, Southsea.

An engagement is announced between Francis D. M. Crackanthorpe, late R.N., elder son of Dayrell E. M. Crackanthorpe, C.M.G., of Newbiggin Hall, Westmorland, and Lilian, elder daughter of Mr. and Mrs. Charles Cary-Elwes, of Courtlands, Eltham, and grand-daughter of Sir Roper Parkington.

The annual dinner of the Central Asian Society will take place at the Imperial Restaurant, Regent-Street, to-day, July 6. Viscount Peel, Secretary of State for India, will be in the Chair, and the Earl of Ronaldshay will be the guest of the Society.

A marriage will take place in Bucharest early this month between Charles V. H. Bryan, of the Roumanian Consolidated Oilfields, younger son of the Rev. H. J. and Mrs. Bryan, of St. Nathaniel's Vicarage, Liverpool, and Esmée Norah Evelyn, only daughter of Colonel Sidney Harvest, of South Brent, Devon.

The Yugoslav Chargé d'Affaires, M. Yevrem Taditch, M. Chedo Miyatovitch, a former Minister in London, the personnel of the Legation, and many members of the Yugoslav colony were present at the Russian Church of St. Philip, Buckingham Palace Road, on June 28, when a *Te Deum* was sung in celebration of Kossovo Day.

A marriage has been arranged, and will take place on July 18, between Alexander Francis Maconochie, Indian Civil Service (retired), eldest son of the late Alexander Maconochie, Home Office, and Ethel Mary Oakes, United Berkeley Club, Knightsbridge, niece of Sir Edward Marshall Hall, K.C.

The King has awarded the Albert Medal to Captain George Hubert Bland, M.C., 105th Mahratta Light Infantry, in recognition of his gallantry in saving life at Moghul Kot in August of last year. A Stokes mortar shell having fused prematurely, Captain Bland seized it, at the risk of his life, and threw it over the parapet.

Princess Andrew of Greece, who arrived in town recently from Athens, was the guest of the Greek Chargé d'Affaires and Mme. Rizo-Rangabé at dinner on June 28. The Hon. James Gerard, formerly American Ambassador in Berlin, and Mrs. Gerard, Commander and Mme. Jean Bouboulis, several members of the Greek Colony, and the staff of the Legation were also invited.

The following decorations have been conferred by the King of the Serbs, Croats, and Slovenes on the following British naval officers in recognition of their services during the War. The King has given unrestricted permission to the officers to wear the decorations in question.

Order of the White Eagle.

First Class (with Swords).—Cdr. Richard G. Hervey, O.B.E., R.N.

Order of St. Sava.

Fourth Class.—Surg. Cdr. Lidbrooke F. Cope, O.B.E., R.N.

APPOINTMENTS.

The King has appointed General Sir George Wentworth Alexander Higginson, G.C.B., to be a Knight Grand Cross of the Royal Victorian Order. Sir George served in the Crimea, and is 96 years old.

OBITUARY.

The death has occurred of Colonel Robert Charles Goff, a notable artist. He saw service in the Crimea, Ceylon, and Malta.

In memory of M. Také Jonescu, the eminent Roumanian statesman, who died recently in Italy, a service was held in the Greek Church of St. Sophia, Moscow Road, Bayswater, on July 1. The Great Archimandrite, the Very Rev. Dr. Pagonis, officiated, assisted by the very Rev. Dr. Basdekas, the Archimandrite. The Secretary for Foreign Affairs was represented by Mr. J. B. Monck, and others in the congregation included the French Ambassador, the Roumanian Minister and Mme. Titulesco, with the personnel of the Legation, the Czecho-Slovakian and the Polish Ministers, the Chargé d'Affaires of the Kingdom of the Serbs, Croats and Slovenes, Prince Cantacuzene, Princess des Pian Karadja, Lieutenant-Colonel Sir Albert Rollit (the Roumanian Consul-General), Sir Willoughby and Lady Dickinson, the Dowager Lady Boyle, Sir Edward and Lady Boyle, Lady Trotter, Mr. H. A. Gwynne, M. R. T. Djuvara, M. N. Misu, Miss Halahan, Mr. Wickham Steed, Professor Gerothwohl, M. Leon Gaster, M. N. Ciotori, Dr. and Mrs. Seton Watson, M. and Mme. Syrett, Mme. Gologan, Mrs. James Brown, M. C. Sauerwein, and M. Scarlatesco.

THE PALESTINE MANDATE.

The Council of the English Zionist Federation have issued the following statement :—

The resolution of the House of Lords on June 21 on the question of the Palestine Mandate was undoubtedly due to the campaign of misrepresentation that has been systematically conducted during the last twelve months. The main grounds upon which Lord Islington secured support for his motion were the alleged violation by the British Government of so-called pledges to the Arab inhabitants of Palestine, and the reported exercise by the Zionist Executive of political control in Palestine. Both of these grounds are purely fictitious. The so-called pledge of 1915, which was addressed to the Sherif of Mecca, did not refer either expressly or by implication to the Arabs in Palestine ; whilst the proclamation of Lord Allenby in 1918, which expressly speaks of Syria and Mesopotamia but does not mention Palestine, could obviously not have been intended as an annulment of His Majesty's Government's Declaration of November 2, 1917. The allegation that the Zionists exercise political power in Palestine is entirely unsupported by any evidence. The Zionist Executive has never taken and does not take any part whatsoever in the administration of Palestine. All the district governors of the country are British Christians, whilst both in the senior and junior branches of the civil administration the Jews form a small minority.

It was also alleged by one of the speakers that the Government has " spent millions of money upon Zionism." The fact is that the Government has not spent a single penny upon the immigration or settlement of a single Jew in Palestine. The only money spent by the Government has been upon the troops, which are required as much for the maintenance of order among the Arabs themselves as for the protection of the Jews, and which are needed not less for the safeguarding of British Imperial interests in the Near East. The entire cost of the civil administration of Palestine is borne out of the internal revenue, to which the Jews contribute in more than a proportionate measure. On the other hand, the Jews have brought into Palestine during the last few years close upon £4,000,000, by which the Arabs must inevitably have benefited very greatly.

A systematic attempt has, moreover, been made to arouse prejudice against the Palestine Mandate, because of the agreement with Mr. Rutenberg, which, it is said, has been secured by favouritism and will be highly profitable to international finance. It must therefore be placed on record that the only schemes relating to water-power stations on the Auja and the Jordan submitted to the Palestine Administration were those drawn up after prolonged and laborious investigation by Mr. Rutenberg, an engineer of high standing, who has carried out important contracts in Italy, who held a position under the pro-Ally Government of Mr. Kerensky, and afterwards advocated the formation of the Jewish Regiment that fought in Palestine ; that the money to be raised for the realization of the projects in question will be largely subscribed by Zionist institutions and Jewish bodies interested in the development of Palestine ; that all profits between 10 and 15 per cent. will be divided between the operating companies and the Palestine Administration, and all profits above 15 per cent. will go entirely to the Palestine Administration for the general improvement of the country.

On the other hand, the pledge made by His Majesty's Government to the Jewish people in the historic Balfour Declaration of November 2, 1917, has been officially re-affirmed on several occasions and is embodied in the Mandate which awaits ratification at the next session of the Council of the League of Nations. That pledge has stirred the hearts and roused the hopes of the Jews throughout the world, for it will render possible the fulfilment of the age-long aspirations enshrined in their prayers. Such fulfilment will in no way prejudice the rights and interests of the non-Jewish inhabitants of Palestine : those rights will be unaffected and those interests only advanced.

The Council of the English Zionist Federation are confident that His Majesty's Government will honour the pledge that it has made to the Jewish people ; and, as citizens of Great Britain, they expect that the members of the House of Commons, in the forthcoming debate on the Colonial Office Vote, will express their unqualified approval of the policy pursued by His Majesty's Goverment in relation to Palestine.

An information bureau for tourists has been opened in Beyrout by the French Administration in Syria.

General Gouraud, French High Commissioner of Syria, last week laid the foundation-stone of the new harbour works at Alexandretta, which will ultimately enclose a port with over a hundred acres of paved quays, to be connected by a railway through the Amanus mountains with Aleppo.

According to the Constantinople correspondent of a Russian newspaper published in Paris, the Imperial Palace at Livadia, in the Crimea, is being prepared for occupation by Lenin.

THURSDAY, JULY 6, 1922.

THE ALLIES AND TURKEY.

The first week of Signor Schanzer's visit to England would seem to have been devoted to the discussion of other subjects than the Near East. During the War, when it was a question of Italy's abandoning her neutrality and joining the Allies, there were protracted negotiations with the Rome Government on the subject of the Italian terms. The agreement ultimately signed was of very wide scope, embracing Europe, Asia and Africa in regard to each of which Italy was found to entertain extensive ambitions that the Allies were called upon to gratify. The subsequent course of events, ranging from Capporetto to President Wilson, caused the greater part of this agreement to be modified; but it has to be inferred that Italian claims in the various directions have been in abeyance rather than abandoned. Opportunity has been taken by the Italian Foreign Minister of his presence in London—at a time when the British Government is anxious to make some headway in the Near Eastern settlement—to revive Italy's African claims, with the result that it was only towards the end of the week that the subject of the Turkish question was even broached. The desire to cover all the ground where British and Italian foreign policy touch was a natural one; but in view of the fact that the peace of Europe, to say nothing of a large part of Asia, hinges on a speedy settlement of the Turkish problem, it might have been thought that this question would have been given priority in the Anglo-Italian discussions. In a few weeks' time the French Prime Minister is expected in London again, to deal more fully with the Near Eastern settlement, and if any progress is to be made then, it is essential that the Entente Governments should have a clear-cut scheme for their consideration. Insistence upon other matters, however important, in regard to Jubaland, Tangier or even the traditional site of the Last Supper in Jerusalem, would suggest that any settlement of the Near East is a matter more of bargaining than of principle. We trust that no unworthy suspicions on this score will attach to the Italian visit; but French uneasiness on the subject will at least be comprehensible, if M. Poincaré should find that no advance towards a Turkish settlement has been made as a result of the discussions between Signor Schanzer and the British Government.

In regard to any solution of the Near Eastern Question, we have frequently pointed out in these pages that there can be no real settlement which does not leave Turkey more or less a united community. The tendency of the Allies seems to be to address themselves solely to the Greek and to the Kemalist point of view. It is true that Constantinople is now as Nationalist as Angora, and at one time it seemed as if a slight readjustment of administrative personnel would compose the differences of the two rival Turkish Governments. But there is no longer any prospect of this being the case, if the Kemalist declaration of war on the Khalifate has actually been made. Any settlement to be lasting, therefore, must take into consideration the status of the Khalif, and it is for the Allies to decide whether they will identify themselves with the present holder of the title, in an attempt to rally to him the best of the Ottoman world, or whether they will merely aim at separating Greeks and Turks, while leaving Turkey embroiled in civil war. Mustapha Kemal's power, it must be remembered, rests almost entirely on the presence of the Greek army in Asia Minor. If the land now occupied by Greek troops were restored to Turkish jurisdiction, a substantial portion of the Kemalist army would leave Angora and return to its own districts. Although religion may rest lightly on the Committee of Union and Progress and a certain number of "advanced" Turks, it still has a potent influence over the nation as a whole, and if the secular enemy withdrew from Asia Minor, there can be little doubt that the Khalif's appeal would rally to his side numbers of those who must be weary of fighting and of the sacrifices that it entails. A question for the Allied Governments to decide is whether they consider that the Constantinople Government offers a better chance of security for minorities than Angora. Mustapha Kemal has long since sacrificed the greater part of the sympathy that his first patriotic stand evoked; he has failed to realize when his point is won, and now maintains simply a "mad-dog" attitude towards Europe as a whole. Whether his policy is his own, or is forced upon him by his extremists, may be left an open question; but the responsibility rests with him. His power is more likely to be undermined from within, by desertion, than by attack from without. Consequently a scheme that promised to eliminate him while leaving a more or less unified Turkey under the Sultan, must be a sounder proposition than the marshalling of Balkan armies, which can only strengthen Mustapha Kemal's hand.

It is unfortunate that the Allied Governments seem able to approach the Near Eastern Question only from entirely different planes. To Italy and France it is mainly an economic matter; a settlement is judged by the prospect of concessions that it holds out, and so long as Mustapha Kemal exercises some measure of jurisdiction over the territory where the potential concessions are located, the French and Italian view is that Angora must be placated. To Mr. Lloyd George Angora is now synonymous with atrocities, and there can be no settlement of the Near Eastern Question until a paper nostrum has been discovered which will render Christians in the wilds of Anatolia immune against Turkish knives and bullets when they seize the lands mortgaged to them or rack-rent their tenants, and which will prevent the Turks, when at war, from taking Oriental measures of precaution against the activities of enemy subjects in their midst. That the quest, which has not the slightest interest for the French and Italian Governments, is likely to prove a long one, does not seem to have occurred to the British Government; for Mr. Lloyd George still waxes eloquent in London over Turkish atrocities as he did in Paris, San Remo, Genoa, or wherever the Allies have held conference, and nothing practical is done. French and Italian support could, however, be won for a scheme which offered to place in control of the grant of concessions in Turkey an authority likely to prove more reasonable than Angora. If the same scheme promises to supply all the guarantees for minorities on which the British Government sets special store, then there will be some chance of the Allied Powers falling into line on the Near Eastern settlement. The rehabilitation of the Constantinople Khalifate over Angora apostacy suggests the kind of practical solution required; it would not be difficult to work out the details. The ground has been well prepared; the Greeks are ready to evacuate Asia Minor under proper safeguards, Angora is weary, the Sultan must reassert himself against an irreligious movement or go under for all time. What is required is that the Allied Powers should understand the essential elements of the situation, and realize that two or three million pounds judiciously spent now will be cheaper than the expenditure to which they stand committed with their present policy of frequent discussion and *laisser faire*.

THE FOURTH HOLY CITY OF IRAQ.

By E. S. Stevens.

We left Baghdad by the night-train, and dozed through the night—Arabs and Indians shout so noisily at each station that one might imagine a riot in progress. We reached Samarra in the cool clear hour before dawn, and were soon able to distinguish the sober outlines of the walled city, three miles away, its golden dome catching the first shafts of light. At six, having breakfasted, we made our way to the spot where a weather-beaten "Ford" waited to carry us over the narrow strip of desert between us and the river, for the Tigris flows between city and station. There were patches of corn wherever we looked, whitened to harvest, some cut and lying on the ground in roughly bound sheaves. A short run along the desert track brought us to a group of mud-houses, where *arabanas*, a few Arabs and dirty children, half-naked and crawling with flies, awaited travellers and pilgrims. A shabby Seyyid, wearing the green turban of holy descent, informed us that the ferry, a raft slung on a wire rope, was no longer working. We must cross the river by *gufa** a mile up river, for the floods made the current dangerous for *bellums* (boats). This personage was a professional guide to pilgrims, for in every shrine-city there are a large number of people who make their living out of pilgrims—most of the population, in fact, in one way or other. The Seyyid continued: "But part of the road is under water, and your car cannot ford it."

There was nothing for it but to engage one of the *arabanas*—ramshackle, springless, cushionless, four horse brakes, the high wheels of which rolled uneasily on their axles as though they would come off any moment. In this we rattled over devious ways, splashing through the flood when we came to it, until the four lean horses came to a stop where a *gufa* was drawn up to the bank. We got in, and the *gufachi* slung a towing rope over his body and waded up-stream. His two small boys waded beside the *gufa*, keeping her away from the shallows. Bleached grass grew down to the water's edge, the coarse desert grass so readily replaced by corn in these rich alluvial districts. After wading steadily for twenty minutes, his clothes tucked up to his waist, the *gufachi* turned riverwards, for this was merely flooded area. When we had reached the actual river-bed, he jumped in with his helpers, and began to paddle the boat across, at an angle; for Samarra, on the high opposite bank, was by this time a good distance down-stream. The current was so swift and strong that it took only a few minutes before he landed us at the landing stage below the city. Then we walked uphill to the gate of the city.

SAMARRA, FROM THE AIR.

Samarra is a miniature Nejef as far as outward appearance goes, but within it is utterly different. From without, like Nejef, it looks severe, fortress-like, medieval. Like Nejef, a golden dome and minarets rise above its brick buttresses, with the same promise of enclosed beauty. But once inside, the larger city is a town, full of townspeople, and one would not guess that the clean desert came up to its very walls. It is a maze of intricate streets, darkened from the sun, peopled by pale fanatics, its evil-smelling alleys suggestive of crime and intrigue.

Samarra gives a very different impression and is an open, clean, sweet-smelling desert-city. Fanatics one sees, as one would see them in any Shiah city, but they

* A *gufa* is a large, bowl-shaped basket, made water-tight by a coating of bitumen. Some of these round craft are huge; ours would have held thirty people easily.

ASK FOR WHITE HORSE WHISKY BY APPOINTMENT

Digitized by Google

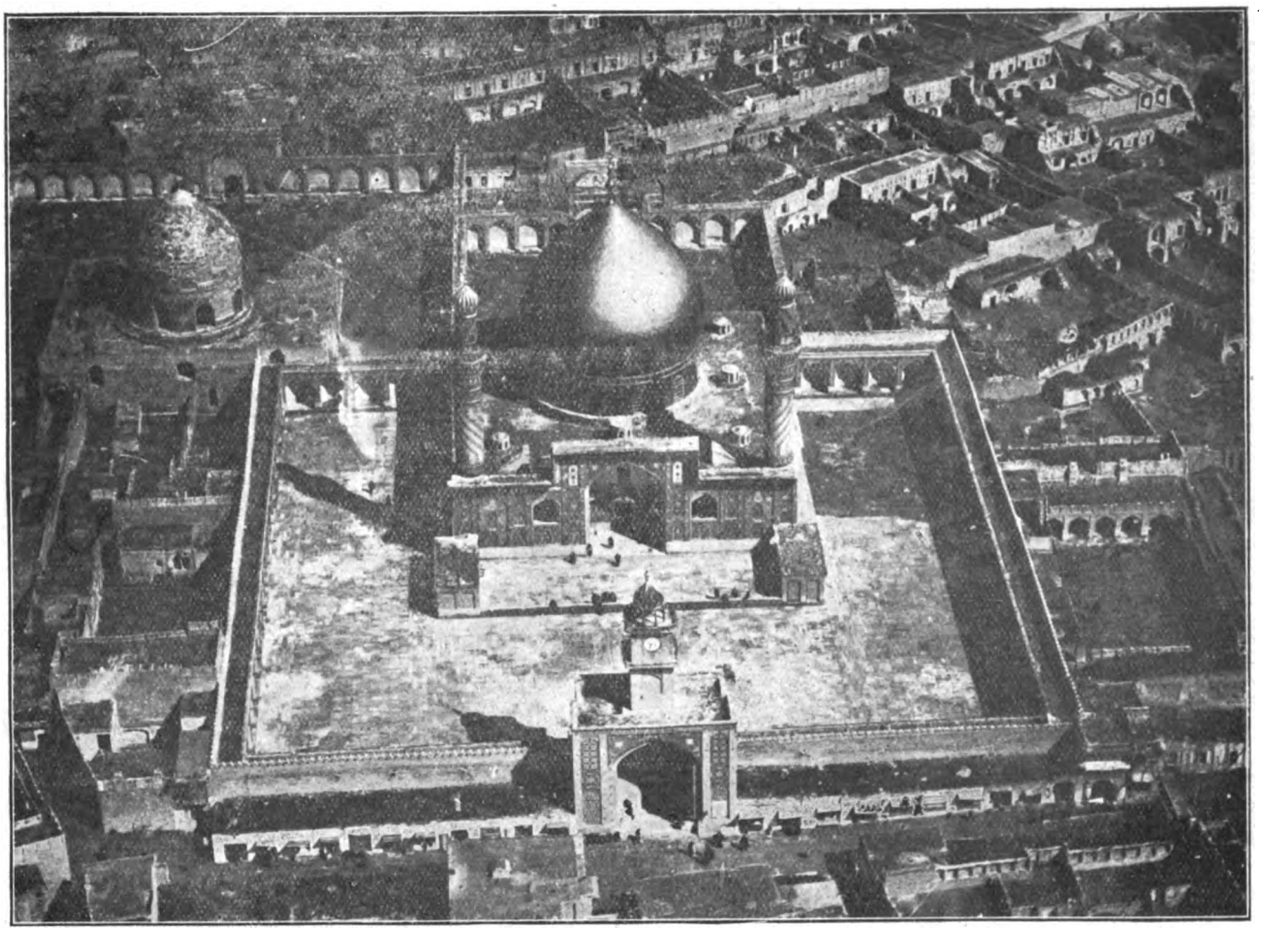
do not scowl until the whole atmosphere seems charged with hate. On the contrary, we were met with kind looks and hospitality. Permission was given freely to inspect the mosque from a neighbouring roof, and a way was courteously made for me when I took a photograph, from the great tiled gateway, of the mosque, of the courtyard, haram and minarets within. Like all these Shiah shrines, it is very lovely, with its dome of beaten gold blazing in the sunshine, its flower-like minarets covered with delicately gay Persian tiles, and its invitation to the holy of holies within, richer, as one may guess than without. Beneath the golden dome is the *sirdab*, or cave, from which the twelfth Imam, Mohammed-bin-Hasan-el-Mahdi, a boy of twelve, is said to have disappeared, and from this cave he will re-issue in the last triumphant apotheosis of Islam. The tenth and eleventh Imams, Ali el Askari and his son Al Hasan, are also buried in Samarra. The local legend is that the pursuing soldiers fired the *sirdab* in which the boy had taken refuge and then filled it with water. But as no trace of a body was ever found the Shiahs declare he had vanished into the earth.

Our first visit was to the Law Courts, where we were received by the two judges, religious and civil, both wearing the white turban of the Sunni scholar, and slightly contemptuous of the heretic townsmen. They complained to us of the difficulty of getting vegetables, and that the natives were too unenterprising to sow anything but wheat and barley. The city is close to the river, and but a small dole from each pilgrim would buy a pump installation. As it is, water must be purchased within the city from water-carriers who bring it up from the river and sell it at one anna a small skin, (or *jood*), a considerable item in the day's household expenses.

Samarra now exists only as a shrine, and has dwindled down to the present little city, but it has a long past. The great Friday mosque, built by the Khalif Mu'tasim when he moved his capital and court from Baghdad to Samarra and changed the name of the city to "Surra-man-raa" ("Who sees it rejoices"), was built outside the present city, on the site of an older worship. For the minaret to his mosque he utilised an existing monument, hoary even in his day, a *ziggurat*—a tower with an outside spiral path going to its top—a typical Chaldean "high place." Up the broad winding way cattle might be driven to be sacrificed at the top. Mu'tasim put the tower to no such pagan purpose. From its wind-blown top the muezzin called the daily prayer, and his voice could be heard by all in the new-built city. A Turkish officer once bet that he would ride to the top of the Malwiyah. Half way his heart failed him, and history does not relate how he got his horse down.

The tower, the Malwiyah, battered but sturdy yet, stands just outside the ruins of Mu'tasim's mosque about half-a-mile without the modern city wall. A climb up the spiral way gives a wonderful view of old and new Samarra. Immediately below is the ruined mosque, derelict in the desert. The walls are all that is left of the structure, and these were further damaged during the War, when breaches were made in them for military purposes. Behind the mosque, neat within its snug Shiah walls, is modern Samarra, flat-roofed and brown, its dome a-flame in the sun. To the right, northwards towards Tekrit, lies old Samarra or Eski Baghdad, the Surra-man-raa of the Abbassids, where seven successive Khalifs lived in magnificence. But theirs was not the glory of their forbears; for they were practically prisoners, allowed a show of power and spiritual authority by their Turkish masters. A Turkish bodyguard saw to it that no Arab intrigue endangered the real masters of Iraq, and Mu'tasim, looking over the well-planned, beautiful city which had sprung up at his command, might well sigh as he remembered Mansur and the city of Baghdad, built when the Khalifate was at its zenith of pride and strength.

To see how well Mu'tasim designed his city it is better to get higher yet. From an aeroplane one can see the symmetrical lines of road, public building and palace as clearly as if a map of the original town were before one. The designer of a modern garden city could not do better. From a great height one can read the plan, almost



SAMARRA; THE GREAT MOSQUE.

Digitized by Google

illegible from the blurred foundations below, of the entire vast city which, with its suburbs, extended along the river for twenty-five miles.

From the Malwiyah one sees only a confused jumble, indications of buildings, with here the ruined Bet-al-Khalifa, or Mansur's Palace, with its standing arch, and in the distance what the local Arabs call Bet-el-Ashiq (the Lover's House). Here and there other fragments show themselves. But of the other palaces, of whose splendour one reads in Arab history, the cost of which was said to have amounted to eight millions sterling, there is little distinguishable trace.

If you stand within the archway of the Bet-el-Khalifa, looking over the old river bed towards the Bet-el-Ashiq, local gossip will tell you a pretty story. A young man once had the luck to catch sight of the Khalif's daughter, walking in her father's garden beside the Tigris. She wore a gown of rose, or flame-colour, of texture so fine that the enraptured youth could see the gracefulness of the form beneath. He fell violently in love and had the temerity to ask her hand. The Khalif refused, and the lover fell into an extreme of love and longing. He used to swim the river by night that he might look upon the garden where she walked, or perhaps, who knows? through the offices of a menial catch a glimpse of the lovely girl herself. At last, however, they said—but did not tell me how—the consent of the father was gained, the pair wedded, and the bridegroom built for her pleasure the palace known as Bet-el-'Ashiq, or Kasr-al-Ma'shuk—Palace of the Beloved. Legend says too, that the bridge, the ruins of which still span the disused river bed, was also built for this lady, so that she might walk dry-shod to her father's house. History quarrels with this legend. The Kasr-al-Ma'shuk was built by Mu'tamid, son of Mutawakkil, the last of the Khalifs to live at Samarra. Mu'tamid did not end his days in el-'Ashiq, but before his death in 892 A.D. moved his court back to old Baghdad. With him the glory of Samarra departed. One by one, palaces, houses, streets, quarters, fell into ruin and disappeared, and one more dead city was added to the many dead cities of Iraq. For the Arab is always a nomad, moving his cities as he moves his tents. A village, inhabited one year, is deserted another, and the mud bricks soon disintegrate and become part of the soil again. Of the first Baghdad hardly a brick remains.

Another landmark, seen when one stands on the ancient tower is the *tell*, or mound, locally known as "Julian's tomb." I am afraid I have not heard what antiquarians think of it, but many local legends have gathered about it. One says that the mound was formed by Julian's soldiers above the body of their beloved leader—each soldier bringing a nose-bag full of earth. Another story says that Julian was such a *shaitan*, or evil person, that they heaped the huge mound on him "to keep him down." Another story, discarding Julian altogether, tells of a wicked Pasha, who having extorted grain beyond his dues, made it into a heap in the desert, covering it lightly with mud, Bedouin fashion, to preserve it. Allah, in his wrath at such avarice, turned all the grain into earth, and the Pasha breaking the crust of dried mud, found nothing left of his ill-gotten hoard.

It is scarcely odd that Julian's name should be linked to-day with this city, so fatal for him. A day's march from Samarra he died, and at Samarra his retreating army, bearing the body of their young commander, crossed the Tigris on *keleks*, or rafts buoyed with skins. We read that many, attempting in their armour to imitate the natives and swim over on skins (a favourite method to-day), were drowned.

In many ways Samarra is a city of lost causes. The honours paid to Ali and his doomed race alone kept the modern city alive. Its walls are only a hundred years old, built, I was informed, by a Persian lady, a pilgrim to the shrine, to protect it from marauders. The town has a clean bill of health, and that is to the credit of the town authorities, for not only does the pure desert air sweep through the streets, but the town itself is wholesome. I visited the quarters of the mounted police, and was surprised at the smartness of the men, the cleanliness and comfort of the stables, and the cared-for appearance of the horses. It is not so in every town in Iraq. The officer in command, a good-looking smart Iraqi, whom we took by surprise, took us to his house to drink tea from the customary Persian glasses. Upon his roof-top, as upon many others in Samarra, storks had built their nest, choosing the wind-chimney which conveys air to the deep *sirdabs*, or cellar rooms, to which residents descend in hot weather. In Samarra, as in Nejef, these *sirdabs* are very deep, consisting in some cases of several subterranean stories.

Of the gardens in which the Khalifs and their myrmidons walked, so famed in story, there is no trace. A thousand years have obliterated them. Patches, reclaimed from the desert by hand-plough, unirrigated but for rain, show the richness of the soil. But for these occasional strips of wheat and barley, all is desert and coarse grass as far as the eye can reach. A short distance farther on and the rich alluvial plain of Iraq proper ceases, and the table-land begins, which stretches up to the hills of the north.

BRITISH POLICY IN PALESTINE.

Official correspondence with the Palestine Arab Delegation and the Zionist Organisation is published in the form of a White Paper (Cmd. 1700), price sixpence. The net result of the correspondence is summed up in the last dispatch given, a telegram sent by the Secretary of State for the Colonies to the Officer Administering the Government of Palestine. Sent on June 29, this message runs as follows:—

A White Paper will be laid on Saturday the 1st July covering correspondence between His Majesty's Government and Palestine Arab Delegation and Zionist Organisation from 21st February to 23rd June, 1922. This correspondence includes official statement of British policy in Palestine of which summary follows:—

(1) His Majesty's Government re-affirm Declaration of November, 1917, which is not susceptible of change.

(2) A Jewish National Home will be founded in Palestine. The Jewish people will be in Palestine as of right and not on suffrance. But His Majesty's Government have no such aim in view as that Palestine should become Jewish as England is English.

(3) Nor do His Majesty's Government contemplate disappearance or subordination of Arab population, language, or culture.

(4) Status of all citizens of Palestine will be Palestinian. No section of population will have any other status in the eyes of the law.

(5) His Majesty's Government intend to foster, establishment of full measure of self-government in Palestine, and as the next step a Legislative Council with a majority of elected members will be set up immediately.

(6) Special position of Zionist Executive does not entitle it to share in any degree in government of country.

(7) Immigration will not exceed economic capacity of country at the time to absorb new arrivals.

(8) Committee of elected members of Legislative Council will confer with administration upon matters relating to regulation of immigration. Any difference of opinion will be referred to His Majesty's Government.

(9) Any religious community or considerable section of population claiming that terms of mandate are not being fulfilled will have right of appeal to League of Nations.

The executive of Zionist Organisation will formally assure His Majesty's Government that the activities of Zionist Organisation will be conducted in conformity with policy set forth in statement. Correspondence will be forwarded by next mail. Meanwhile you may issue above summary of statement for publication on Monday, July 3rd.

AN EGYPTIAN POEM.

(The following is a rough translation of a poem, which has been published in several Arabic papers in Cairo, by Ahmed Showki, who is the first poet of Egypt, where he is very popular. He is called the "King of Poets" (*Malek esh-Shuara*). He was, so to speak, Court Poet to the ex-Khedive Abbas II, who showed him great favour, and whom he lauded in his poems. After the fall of Abbas, he left Egypt and spent some time in Spain, where he made a study of the Arabian period of Moslem rule. Subsequently he returned to Cairo. He is at present in Europe, having taken with him a son, who is to be educated in France.)

Know that happiness and justice are for those who can aspire.
Egypt cannot have her share until she dons her new attire.
We are in a time of trial, of anxiety, and care:
Let us not be overjoyful, neither let our hearts despair.
For a man cannot see clearly when the eye is filled with tears,
And the morning light is darkness for the slave of doubts and fears.
Long indeed may be our pathway, but we now can see the dawn:
And of patience and endeavour all success alone is born.
Now may Egypt and her Ruler, long in bonds, regain their own.
By the will of the Almighty now the path of hope is shown.
For whoever strives in earnest all his objects shall attain.
Allah will reward the worker, and no effort is in vain.
Yet must all await the future, with its train of good and ill.
Much is gained, and more will follow, through our own united will,
When our own deputed leaders, whom the nation soon will choose,
Deal with all our troubles wisely, and all other aid refuse.
Trust their wisdom, whether progress speedy or deferred may be.
Vain is disunited effort; union leads to victory.
Onward bravely, but your counsel keep discreeetly, one and all.
He who fights will never pause to count the tale of those who fall.
"What of Crowns?" you ask I tell you cast all care of these aside.
Who is worthy or unworthy, leave the future to decide.
Who shall wonder that the late Protectorate has ceased to be?
Greater wonder that unlawful bonds so long should bind the free.
Speak, O Allenby, and tell us frankly with what sword you fought,
When you struck the foeman prostrate, and reduced his power to naught.
Was it with the blood-stained weapon worn upon the battlefield,
Or the sword of peace worn on the day which saw the vanquished yield,
—When you heard the voice which justly has for forty years appealed?
Sheathe your sword, you who, as victor, in Jerusalem have stood;
For the Cross was not of iron, but was fashioned out of wood.
So, reflecting on the countless hosts who bow before its might,
Know that power may come of weakness, and that victory crowns the right.

To King Fuad.

Hail, O scion of a race whose arms have shone in victory,
Who have ruled our Nile's rich valley from its sources to the sea,
Who have triumphed proudly o'er the lands of Roum, by sea and land,
And whose flag has flown triumphant on Arabia's furthest strand,
Have you won your Crown by favour, or by merit of your own?
Think how Ismail before you did great honour to the throne.
Now with other kings and Powers it is given to you to vie,
On the throne which mighty Pharaohs held in power and majesty.
So our nation will support you, giving gladly all you ask,
Should you take the people's peace and welfare as your constant task.
Long has Egypt striven bravely; now success may Allah send.
If we strive by different methods, all are working to one end.
Some have died still young, (1) and some in hard exile have nobly perished, (2)
Some have suffered much, but not despairing, always hope have cherished, (3)
But their deeds in golden letters by their followers will be read.
You, our King, will nobly follow where your ancestors have led.
If you found your princely task was hard before the crown you gained,
Harder now in royal palace is the work to be sustained.
Base your rule upon wise judgment, acting rightly with the nation:
Make the people's will its pillars, and firm justice its foundation.
Soon the nation for their new born Council will elect their own.
See that they are worthy, not as figures carved of wood or stone.

To the Egyptians.

O my people time will judge the present; now with you it lies
Either to debase your Ruler, or to raise him to the skies.
May he, on your help relying, show you—less by words than deeds—
That he holds a trust, as Sovereign, to fulfil the nation's needs,
Sharing all their cares and burdens. Only so, in turn, shall they
Loyally their own Protector learn to honour and obey.

(1) Mustapha Kamel (Founder of the National Party).
(2) Mohammed Bey Farid (died in Germany).
(3) Abbas Hilmy (ex-Khedive).

NOTES AND NEWS.

Devonshire Square
E.C. 2.

Burmah Oil Dividends.

The gross profits of the Burmah Oil Company for the past year show a very considerable decrease on the total for 1920 at £3,150,500 as compared with £4,891,500. In this respect the company's experience has been much the same as that of all the other leading oil companies. The main reasons for the decrease are to be found, of course, in the lower prices for the commodity, but the company has also been affected by the fall in the Indian exchange and increased working costs. Allowing for depreciation the net profit amounted to £1,902,790. Out of this amount £20,000 is placed to insurance reserve as before, £200,000 is allocated to the general reserve, an increase of £5,000, and £162,000 is absorbed by the Preference dividend as against £42,000 the previous year, the difference being due to the issue last year of £3,000,000 Eight per cent. Preference shares. On the Ordinary shares the dividend is again 30 per cent., absorbing £1,543,000, and £359,600 is carried forward subject to the corporation profits tax. The maintenance of the Ordinary dividend has been due to the saving resulting from the abolition of the excess profits duty which was estimated last year at £1,800,000.

Turkish Unified.

Commenting on the further payments on Turkish Unified coupons in these columns two weeks ago, I suggested that far worse investments could be found at the price at which the stock then stood. Evidently that opinion has been somewhat widely shared, judging by the number of transactions that have since taken place in the stock. Even now the stock is only a few points higher than it was then, and it still looks a most inviting medium for investment.

Cotton Growing in the Empire.

The annual report of the British Cotton Growing Association makes encouraging reading. The production of cotton in what are termed new fields in the British Empire last year amounted to 165,000 bales, a great improvement on previous records, and even better results are anticipated this year. As an instance of the useful work being done by the Association mention may be made of its guarantee of the price of cotton to the Nigerian natives, a step which undoubtedly safeguarded the cotton growing industry in that region. It seemed probable that the guarantee would involve the Association in a very substantial loss, but the rise in cotton prices in the autumn saved the position, and as a matter of fact the Association is able to show the satisfactory net profit of £16,702 on the year's working.

The Swansea Refinery.

Last week saw the formal opening of the Anglo-Persian Oil Company's refinery by Mr. Stanley Baldwin, M.P., President of the Board of Trade. In a sense the ceremony was a somewhat belated one for the refinery has now been in operation for many months, and already something like 500,000 tons of refined products have been produced. At the opening Sir Charles Greenway explained that it had been delayed so as to give those concerned a better opportunity of judging the character and efficiency of the refinery. One would imagine that those who were present can only be of one opinion regarding this great enterprise of the Anglo-Persian Oil Company. It has been a stupendous undertaking, and those responsible for its inception have shown a quite unusual degree of imagination and initiative. The actual construction of the refinery has taken something like three years, and the nature of the work can be gathered from the fact that the area covered by the refinery amounts to about 650 acres. The cost of the work has been under £3,000,000, and a very large saving on this figure could have been made, Sir Charles explained, had the construction been delayed to the present time, but it was essential that they should "have the refinery completed and be in a position to place on the home markets the qualities of oil on which we are going to stake our reputation before the expiry of the contracts for some of our products which are terminating at the end of this year."

A Fallacious Axiom.

When the prospect of the refinery was mooted before the war, there was a good deal of criticism, since it has always been the custom to have refineries placed as near the source of production as possible. Sir Charles pointed out that they had been able to show that this axiom was entirely fallacious provided that the country in which the refinery was situated was able to consume all or nearly all of the products produced. The results of the policy pursued have given complete satisfaction, and it has been decided to increase the capacity of the refinery by 50 per cent., while the company has the work in hand for smaller refineries in Scotland, France, and Australia.

Bank of British West Africa.

The regions with which the Bank of British West Africa is particularly concerned have felt the effects of the trade depression to a special degree, and it is therefore not a matter for surprise that the report of the bank which has just been issued shows a substantial reduction in profits, the figures being £105,935 as compared with £139,803. The proposed final dividend is 3 per cent. making 6 per cent. for the year as against 8 per cent. for the previous period.

Commerce and Industry.

REPORTS FROM OUR OWN CORRESPONDENTS.

BULGARIA.

Sofia, June 26.

New Taxes.

Among the new financial measures proposed by the Government are the following: 1. A 10 per cent. tax on all first class hotels and restaurants; 2. A 30 per cent. tax on luxury articles such as silks, wines, etc.; 3. The issue of two State Lotteries each year; 4. A tax on the net revenue of the coal mines; 5. Compulsory subscription to the *Official Gazette*; and a host of other taxes which would mainly affect the townspeople.

GREECE.

Athens, June 24.

Foreign Exchange.

After many days of discussion the Minister of Finance has come to an agreement with the bank managers and the operations of the Consortium will recommence on June 26. The price of sterling has been increased from 105 to 140 drachmae.

The sterling available for the Consortium is stated to be:—Advance by the State through the National Bank £1,000,000, National Bank £200,000, Bank of Athens £60,000, Commercial Bank £25,000, Ionian Bank £15,000, Eastern Bank £15,000, sundry other banks £55,000, total £1,370,000.

The price of sterling on the free market is 165 drachmae, while the franc stands at 3.20 drachmae.

Markets.

Wholesale prices continue to increase. Quotations (in drachmae) are:—Coffee 20½ per oke; American sugar first quality 8.10; American rice 7.20; Corfu olive oil, first quality 8.30; "Nelson" flour 4.30; local wheat 2.40; local barley 2.00; Cabot "Hooper" 195 piece; English sacks 2½ lb. 8.10, 2¼ lb. 7.20. With the increased Consortium price of sterling customs duties automatically increase in proportion so imported goods will rise still further.

YUGOSLAVIA.

Zagreb, June 27.

The Zagreb Sample Fair.

The Zagreb Sample Fair was opened on June 17, in the presence of the Minister of Commerce and Industry. The Minister in his opening speech praised the energy of Croatians and pointed out that all political differences may be smoothed away by establishing strong commercial relations between the two provinces. The number of new factories and industrial concerns is increasing daily, and it is very interesting to see that it is by means of Serbian and Croatian capital that the national prosperity is being promoted.

The Fair itself is the only one of its kind so far. Last year's Ljubljana Fair was on a much smaller scale and more of a local affair, whilst the Zagreb people have done everything possible to make their fair an international event. The Committee had much to do in distributing 8,000 sq. metres which they bought among the applications they received for the sites. There are altogether some twelve privately owned pavilions and five large stands with a number of stalls allotted to local or foreign manufacturers. French, British, and Czecho-Slovak manufacturers are in their own pavilions, while the others have exhibited their manufactures in the ordinary stands. The French are exhibiting textiles, perfumes, motor cars and light machines and tools. The Czecho-Slovaks have gone in more for heavy machinery, textiles, agricultural machinery, and generally speaking, well represent the industries of Czecho-Slovakia. The Associated British Manufacturers (Near East) Ltd. have built a neat pavilion divided into a number of boxes, each member of the Association having a box at his disposal. The Association practically covers all the main branches of the British industry, and has succeeded in creating a strong interest amongst buyers. Visitors to the British exhibits leave the stands assured that business with England is not out of the question and that it can be done to their advantage. British goods are coming more into the picture every day and with the credit schemes now being worked by Captain Mapplebeck, the able organizer of the British representation at the Fair, they will continue to do so.

The Germans are now working on different lines, but while their "peaceful penetration" is camouflaged, they are undoubtedly making no headway and are on the contrary losing ground. Constant fluctuations of the mark with the consequent refusal of German manufacturers to deliver against the orders booked a long time before are doing much to damage German prospects in this part of the world.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on June 23 were as follows:—Agricultural Bank of Egypt, £5 1-16, Alexandria Water Co., Ltd., £8 11-32; Anglo-American Nile Steam, £2 27-32; Associated Cotton Ginners £29-32; Banque d'Orient, Fr., 51; Behera Ord., £E8 3-16; Brasseries d'Egypte, Fr., 51; Building Lands of Egypt, £1 1-32; Comptoir Fin et Com. d'Egypte £1 5-16; Consolidated Lands, Pt., 7⅛; Credit Foncier Fondateur, Fr. 990; Credit Foncier Act., Fr. 695½; Credit Foncier 1886 Oblig., Fr. 317½; Crown Brewery Priv., Fr. 113; Crown Brewery Div., Fr. 130; Eaux du Caire, Capital, Fr. 86; Eaux du Caire Jouissance, Fr. 112; Egypt and Levant, S.S. Ord., 31s. 6d.; Egyptian Delta Light Railways, £4 21-32; Filature National d'Egypte £11; Immeubles d'Egypte Soc. an des ., £3; Khedivial Mail S.S. Ord., 100s.; Khedivial Mail S.S. Ord Pref £3½; Kom Ombo Ste an de Wadi., £4 3-16; Kom Ombo Ste an Fondateur, £35; Land Bank of Egypt, Parts de Fond., £46; Lots Turc £40¼; Menzaleh Canal Navigation, Pt. 250; Egyptian Markets, 20s. 6d.; Nungovich Hotels, £7 5-32; Ramleh Railways, £3 1-16; Salt and Soda, 32s. 9d.; Sidi Salem £31-32.

Owing to the rapid progress made this year with the building of dwelling houses and public buildings, says Reuter's Sofia correspondent in a message dated June 19, the supplies of cement and fire-clay in Bulgaria have proved insufficient, and the Government have therefore decided to permit the importation of these commodities free of Customs duty. A bill to this effect will shortly be introduced in the Sobranje. According to municipal information there are more than six hundred new buildings or annexes in Sofia alone.

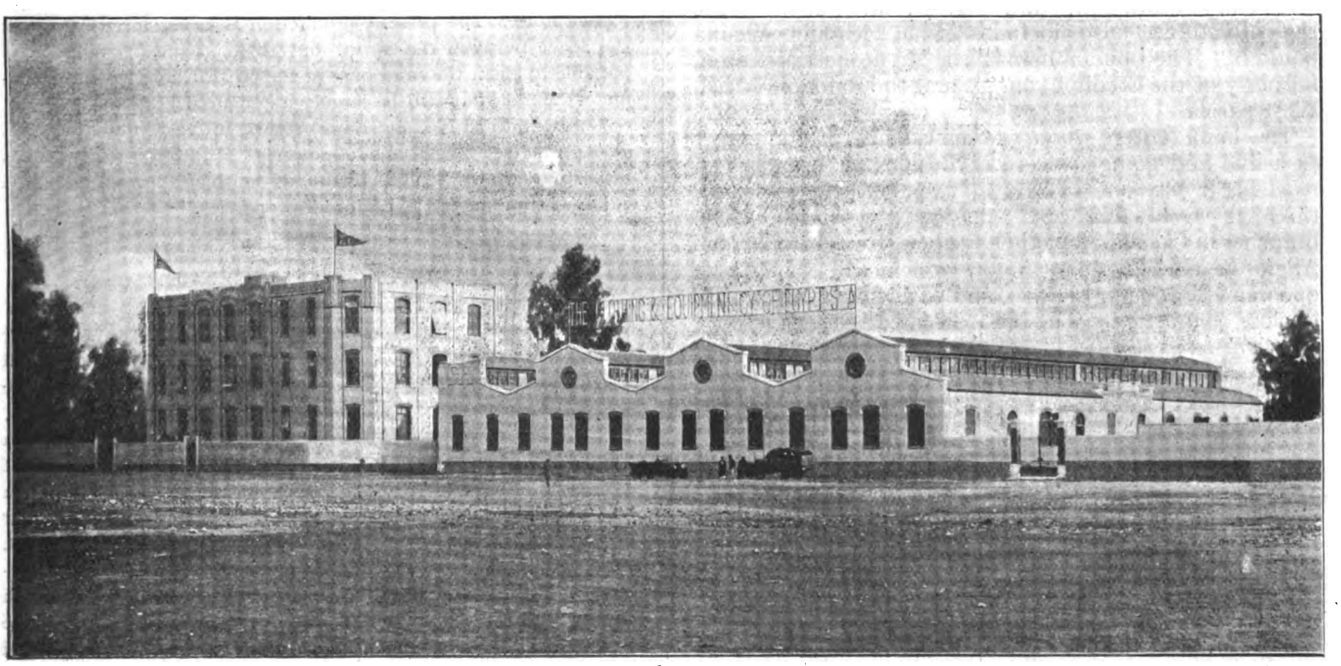
Egyptian Industries.

I.—The Clothing and Equipment Company of Egypt.

Hitherto Egypt has shown a tendency to believe that it can rely on only two main sources of revenue, cotton and tourists. Neither, as the event is proving, is necessarily an Amalthea's horn ; cotton values fluctuate most embarrassingly, and tourists are being called upon to pay so much in order to reach Egypt that they have little to spend on purchases when steamer passages and railway fares have been defrayed. Sidky Pasha, Egyptian Minister of Finance, has been well advised, therefore, to lay stress on the necessity of encouraging industrial enterprise in Egypt. Not only will the population, as it increases, require other spheres of employment than that of agriculture, but the Egyptian Government will also need greater resources to meet the new charges that an independent State must inevitably incur. The Minister of Finance naturally wants to see industrial enterprises carried out by the Egyptians themselves, but he realises that they lack at present both the mentality and the education required for the successful application of Egyptian capital to this end, and that he can only hope to see the goal reached by the judicious co-operation of foreign and Egyptian capital, with foreigners and Egyptians working together. Thanks to the foreigner industrial activity has not been altogether lacking in the country ; although the number of manufacturing industries is still small. It may not be without interest, therefore, to deal in these pages with some of the manufacturing enterprises already established in Egypt, and a start will be made with the Clothing and Equipment Company, whose factory is situated in the Shariah Nashaty, Shubra District, Cairo.



The Shubra Factory of the Clothing and Equipment Company of Egypt.

Although the substantial factory in Shubra dates only from 1915, the Company has been in existence for forty years. It was in 1882 that Messrs, J. Compton and Sons, Ltd., first established themselves in Egypt at the request of the British Government in order to assist in the outfitting of the troops. Those were days of considerable military activity, for apart from the British troops in the country, the British authorities had to re-establish a native army and form a gendarmerie. For many years all the clothing supplied by the Company was made in England, and it was not until seven years ago that a scheme for a local factory materialised. Native tailors were secured and were trained by English tailors sent out for the purpose. Until 1920 only contract work was attempted, but as there appeared to be a good demand for ready-made civilian clothing which before the war came almost entirely from Austria-Hungary, the decision was taken to build a second factory for this class of goods.

To carry out this scheme an Egyptian company was formed with a capital of £150,000, which took over the business from Messrs. J. Compton and Sons, and Brigadier-General C. W. Compton became General Manager. The task of training a sufficient number of tailors for this extension of the business proved a formidable one ; but teachers and pupils stuck to their work, service with the company was popular and to-day the standard of workmanship maintained in the factory, as can be seen by any visitor, compares favourably with that of any similar undertaking in Europe.

The factories, as may be inferred from the illustration on this page, comprise a number of well built buildings, which are equipped with up-to-date machinery supplied by Messrs. Singer and Co. Power is obtained from the Company's own engines, as, owing to the fact that in Egypt no difference is made between electricity for light and that used for power purposes, the cost of the latter is prohibitive for industrial companies. Working at full pressure the Company employs some eight hundred people, most of whom are men ; women are employed for certain classes of work only. Except for the nationality of the workers there is little to distinguish the factories from similar works in other countries, for the the highest British standard is aimed at. The Company has its own shops in Cairo and Alexandria for the sale of its ready-made clothing, and the retail operations are to be extended to other towns in Egypt as opportunity offers. Contracts with the Egyptian and Palestine Governments include not only uniforms for soldiers, policemen and railway staffs, but also saddlery and other equipment. Labour conditions in Egypt are on the whole favourable, and thanks to the standard of work maintained the Company is in a strong position for holding its own with all comers in Egypt and the Middle East.

ANGLO-AUSTRIAN BANK RECONSTRUCTION

A British Institution.

An event of more than ordinary interest from the point of view of British commerce took place on July 1, when the re-constructed Anglo-Austrian Bank formally opened its doors for business at its head office, 24 Lombard Street. The institution is now an entirely British bank. The terms on which it has been reconstructed are briefly the payment to shareholders in the old bank of 15s. for each 240 kronen shares. Certificates of indebtedness and a number of ordinary shares have been accepted by the Bank of England against the amount owing to it for pre-moratorium bills, while the required new capital has been provided by the issue of preference shares. The bank possesses an extremely strong board of directors. General Sir Herbert Lawrence, the chairman, was a director of the old bank, and possesses an extensive knowledge of banking on the Continent, while the vice-chairmen are Mr. Spencer Smith, a director of the Bank of England, and Dr. Rosenberg. Other directors are Mr. E. W. H. Barry, of the Imperial Ottoman Bank, Sir Ernest Harvey, Sir Gordon Nairne, Comptroller of the Bank of England, Sir Henry Strakosch, and Mr. G. M. Young, while the directorate also includes some leading Vienna bankers. The London manager is Mr. Robert McLaren, formerly of the Credit Lyonnais and the Bank of British West Africa.

The bank enters upon the new stage of its career as a live and going concern. Besides 24 branches in Austria, it has one in Hungary, one in Italy (Trieste), three in Roumania and one in Yugoslavia. The branches in Czecho-Slovakia have been transferred to the Anglo-Czecho-Slovakian Bank, which will shortly be opening a branch in London, and with which the bank is in close connection. The branches mentioned give it an excellent *locus standi* to begin with, and the intention is, it is understood, gradually to extend them throughout South-Eastern Europe, giving to that region a characteristically British banking institution. Therein lies the importance of the reconstruction. The solidity of things British especially in connection with banking affairs, is well appreciated on the Continent, and there is every reason for believing that the Anglo-Austrian Bank will be able to make a very real contribution to the solution of the problem of the reconstruction of South-Eastern Europe. It will make for increased confidence in the countries concerned and will enable them to obtain facilities that would otherwise be outside their reach.

To British trade the bank may mean much. It has been said often enough that trade follows the flag. Whether that be true or not it is beyond question that trade follows the bank, and the development of the Anglo-Austrian Bank in South-Eastern Europe can scarcely fail to have a very real influence on British commercial endeavour. The bank, it may be pointed out in this connection, in addition to ordinary banking business will specialise in the provision of trade information, and it may be hoped that now this new and and extremely useful channel of assistance lies open to them British merchants will contrive to set aside their traditional attitude of *laissez faire* with regard to commerce with the States in the neighbourhood of the Danube, and will take advantage of the bank's services.

The Minister of Commerce of Czecho-Slovakia has reduced to ½ per cent. of the invoice price the tax on the exportation of coal and combustibles manufactured with coal.

A tax of £E.1 per ton of 1,000 kilograms has been imposed on sugar manufactured or refined in Egypt. This tax will be refunded in the case of export of sugar manufactured in Egypt.

According to the *Gazette de Prague* the transport of goods by Czecho-Slovak vessels on the Danube has now commenced and will be continued regularly between Bratislava, Lom, Rustchuk (Bulgaria), and Giurgiu (Roumania).

OIL NOTES AND NEWS.

Roumanian Consolidated.

Production June 1 to 17, 1000 tons. Metres drilled 235 (7771 ft.). Development work :—Moreni, Well No. 44, depth 841 metres, cased with 7 in. casing to 831 metres. Well No. 61, depth 686 metres, rotary drilling completed ; preparing for final water test. Well No. 71, drilled 162 metres to 167 metres. Well No. 83, depth 739 metres, erection of Pennsylvanian draw-works nearly completed. Well No. 102, depth 377 metres, cased to 365 metres with 14 in. casing ; making official water test. Well No. 104 depth 898 metres ; dredging completed ; well in good condition. (Reported by cable June 27 :—Now cleaning hard plug of sand at 798 metres : well gassing much harder). Well No. 106, drilled 68 metres to 278 metres ; preparing to set 14 in. casing. Chiciura Well No. 10, drilled 8 metres to 630 metres. (Reported by cable :—Water test successfully made ; inserting 7 in. casing preparatory to drilling into oil). Aricesti, Well No. 3, erecting new derrick to replace one damaged by gale. Well No. 6, cased to 34 metres.

The company received the following cables from Roumania on July 3 :—

"Moreni, Well No. 104 (Stavropoleos) flowed hard for short time sand and oil and then plugged up ; immediately afterwards commenced flowing between casings ; 600 tons already secured ; well still flowing ; pumping and tankage facilities satisfactory." (Office note : The present production is being forced through the space between the 8¼ in. and 10 in. casings. When it is possible to clean the sand plug in the central hole (8¼ in. in diameter) the output will be largely augmented.)

"Moreni, Well No. 44 (Bana) struck oil yesterday (Sunday) at 842 metres ; well made powerful eruption ; this proves hitherto unknown rich oil stratum at depth and largely enhances value of company's Bana Moreni properties."

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated June 26 :—Season.—During the week June 18 to 25 monsoon was active in North-East India, Upper Burma, South Burma and Peninsula generally. On June 20 it strengthened in South Bengal and West Coast of Peninsula, but weakened in Bihar. On June 21 it extended in Gujerat, and from June 23 to 25 it was active generally all over India, but in less strength in the Peninsula than in other parts. Condition of Crops.—June 23.—Bengal—Monsoon active in low-lands and paddy and jute doing well. Punjab—American cotton suffered severely in lower Chenab Colony owing to temperature being much below normal. Bihar and Orissa—Monsoon rain generally sufficient and prospects of sugar-cane normal. Paddy good. More rain wanted in Chota Nagpur and Orissa. Assam—Prospects of tea fair. Jute improved. Autumn rice moderate. Markets.—June 22—Bombay cotton market steady. Fine M.G. Oomras Rs. 463 July, Rs. 480 September. Bombay cotton arrivals from September 1, 1921, to June 16, 1922, were 3,101,000 bales as compared with 2,371,000 bales during the same period of the last year. June 22—In Bombay imported piece-goods market demands improving owing to rising cotton. Buyers and sellers active and large speculation reported in old stocks at low rates. Local goods firm and rates tending upwards. June 24—Calcutta jute and gunny markets steady, but little business passing. At tea sale on June 20 there was falling off in Dooars. Qualities from Assam attractive, but buyers less keen. Low medium fannings and brokens not wanted and sold at reduced rates. Well made leaf tea, particularly Pekoes, in good demand and sold freely at former prices. Bombay and Persian demands strong. 28,904 packages sold to date at an average price of 4 annas 5 pies per lb. Shellac.—June 23—Market active. T.N. Rs. 198. June-20 to 23—Rangoon rice market absolutely stagnant. Special Straits quality rice quoted at Rs. 496 June, but no business done. Labour.—June 24—Indian seamen's strike at Calcutta docks ended, but many stevedores' coolies still out, but work on steamers proceeding normally with imported labour. No change in bank rates.

Information has been received through the Colonial Office that the tax hax been abolished on coal and fuel oil exported from Gibraltar.

Fiat Progress.

Considerable strides in public favour continue to be made by the Fiat Car, not only in this country but abroad. One of the most arduous reliability trials yet held in Australia has, I believe, just been won by a Fiat, and the result of the Sardinia trial, just completed, should do much to enhance the already high European opinion of the car.

Sardinia has never figured prominently in motoring annals, and probably few could say whether the Italian island possesses roads suitable for motor cars or not. Thanks to the invitation of the Automobile Club of Turin, Sardinia has just held its first motor race, with an endurance test of 112 miles open only to amateurs, and a 310 mile speed contest open to all comers.

The high average speeds maintained in the open race, notwithstanding the hilly, winding and difficult nature of the course which tested men and machines to the utmost, shew that the roads have a very fair surface. In the 1,500 cubic centimetre capacity class, the driver of a Lancia was first with an average speed of nearly 39 m.p.h. for the whole distance, this being faster time than the leader of the 2,000 c.c. class, driving an Ansaldo. The fastest car was a Ceirano with an average speed of 50 m.p.h. The endurance test was won on a 10 h.p. Fiat, a similar Fiat taking second place. Next in order came a Lancia, two more Fiats and an Ansaldo, so that altogether the Fiats did remarkably well.

Fuels and Piston Speeds.

In the course of the paper on the use of Diesel engines for marine purposes to which I referred last week the speaker dealt with the subject of the four and the two-stroke engines, and also of opposed piston two-stroke engines using solid injection and air injection of fuel. As a matter of fact, the best fuel consumption with the solid injection system seems to be associated with high maximum pressures. When the maximum pressure was limited to 500 lb. per sq. inch, the fuel consumption was usually slightly higher than with the air blast system. Here it must be remembered that the permissable mean pressure for two stroke engines depends largely on the efficiency of the scavenging process.

The piston speeds of engines of the two-stroke type are generally between 500 and 700 feet per minute. Comparatively low piston speeds have been adopted on account of the desirability of making use of a low scavenging pressure in order to secure a good mechanical efficiency, and to keep the revolutions low on account of the propeller efficiency. Two-stroke engines, however, are not necessarily limited to low piston speeds. In the paper mentioned the author took the view that the Diesel engine must be considered, in the near future, for propelling large vessels requiring something like 16,000 h.p. per shaft. The further development of the marine Diesel will probably continue on two-stroke lines, and the cost of manufacture will probably be reduced. The present higher cost of the larger units made for land use is no doubt due to the comparatively small demand to date.

Gas and Concrete.

Apropos of the subject of low grade fuels and gas productions, mention may be made as to the proved suitability of concrete for the construction of bins, coke and ash bunkers, tar and liquor tanks, gantry and pipe supports, floors at various levels required to carry heavy weights, transporters and railways, oxide stores, platforms, gangways, etc. The Provan works of the Glasgow Corporation have made extensive use of this material, and it is considered that reinforced concrete is equal if not superior to any other building material for this class of work. The chief advantage lies not so much in its strength as in the fact that it is not attacked by acids and does not corrode. It is practically impervious also to oil and tar, withstands heavy usage, and is quickly, easily and cheaply erected.

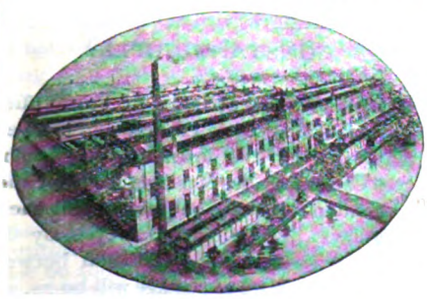
A new method of concrete caisson construction which is being adopted for some construction work in Ireland is also worthy of notice as it presents some novel features. The general practice in connection with reinforced concrete caissons of the type usual in marine construction type is for these to be built up of a sufficient height to leave the upper part of the structure above water level after it has been launched. The new method is for these to be launched before completion, and for the upper parts to be added whilst the caisson is in the water but suspended by cables from lighters. The structure is gradually sunk as it is being built up, and the advantages are that handling is facilitated, heavy and expensive appliances for launching the caisson are not needed and the men can work on the site. It appears that on this method the lower caisson is made with four square compartments open at the top, one being in each corner. Into each of these, a temporary wooden caisson is filled, the joint being made watertight by any of the usual methods. These bunker caissons project above the surface after the concrete structure has been sunk, after which they are removed. The upper concrete caisson is afterward sunk into place on the lower and submerged portion.

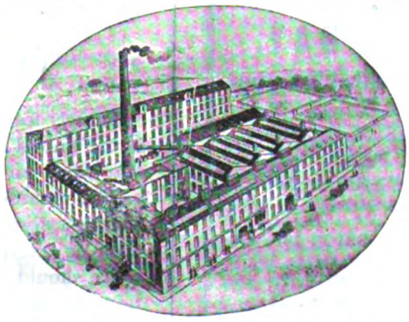
Owing to the termination of their lease, Messrs. Walter Judd, Ltd. have removed to 81-87 Gresham Street, E.C.2. The firm's telephone number remains the same, viz., London Wall 3651-2.

The Egyptian *Journal Officiel* contains a Customs notice stating that from August 1, 1922 consignments of chemical manures will not be admitted into Egypt unless accompanied by an official certificate of analysis.

Cable Address: "Lobo, Dundee." **LOW & BONAR, Ltd., Dundee, Scotland.** *All Cable Codes used.*

Manufacturers of JUTE SACKS and JUTE CLOTH for all purposes
Also of WATERPROOF CANVAS and TARPAULINS, YARNS, TWINES, ROPES, etc.





Shippers of all classes of JUTE, LINEN and COTTON FABRICS, also of CALCUTTA SACKS.

SHIPPING INTELLIGENCE.

TRANSIT TRADE OF ALEXANDRETTA.

The following extracts are taken from a recent report by H.M. Consul at Alexandretta :—

Being an important port of transit for the large trade from and to the interior, it is impossible to give details of the goods imported at Alexandretta for local consumption, as they are included in the general returns of the port. However a quarter of the amount of certain goods received, such as sugar, flour, coffee, and arachides, may be considered as locally consumed.

The total value of the goods imported at Alexandretta during 1921 has been returned at £768,610, while the value of exports from Alexandretta last year was placed at £217,481. The chief imports, in point of value, into Alexandretta in 1921 were manufactured goods £138,107, petroleum and benzine £102,500, grain £99,680, drugs and mineral oil £75,930, hardware, woodware, and sundries £53,039, and wines and spirits £50,652. Among goods more definitely classified than some of the foregoing were provisions £30,330, iron, hardware, and machinery £28,655, leather and hides £26,170, lead, tin, zinc, and steel £25,228, cloth £18,994, and paper and stationery £18,393. The leading exports from Alexandretta during the year under review were wool £38,128, native manufactures £35,403, soap £28,105, pistachio nuts £21,965, provisions £20,639, and silk cocoons £17,485.

The port has not yet resumed all its normal importance, owing partly to the unsettled conditions prevailing in the country, especially in the interior, while the last Franco-Kemalist Agreement, which, owing to the new frontier, deprives the Vilayet of Aleppo of its most important markets, such as Aintab, Killis, Marash, etc., is unfavourable to the restoration of the trade of the port.

Mail communications are maintained by the steamers of the Khedivial Mail Line, a British steamship company, the Lloyd Triestino, the Servisi Marittimi, and the Messageries Maritimes. An agency of the Banque de Syrie operates in Alexandretta.

The Government of the Mandatory Power contemplate the construction of a harbour at Alexandretta and a direct railway line connecting Alexandretta with Aleppo via Baylam. There is also a scheme for draining the swampy part of Alexandretta. The only work which is being done, however, is the repair of the road between Alexandretta and Aleppo.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis :—

Anchor Line.—S.s. Olympia for Bombay (Liverpool, July 15) ; s.s. Castalia for Bombay, (Liverpool, August 3).

Anchor Brocklebank Line.—S.s. Mahronda for Calcutta (Birkenhead, July 15); s.s. Mahratta for Port Said, Colombo, Madras and Calcutta (London, July 18) ; s.s. Matheran for Calcutta (Birkenhead, July 29) ; s.s. Anchoria for Port Said, Colombo, Madras and Calcutta (London, August 5) ; s.s. Mahanada for Port Said, Colombo, Madras and Calcutta (London, August 26).

ANCHOR LINE

First-Class Passengers only.

LIVERPOOL TO BOMBAY.

KARACHI via Bombay calling at Gibraltar & Egypt.

LARGE STEAMSHIPS. UPPER DECK CABINS.
FITTED WITH ELECTRIC FANS.
RECOGNISED BY INDIAN GOVERNMENT.

PASSENGER SAILING DATES—

OLYMPIA, JULY 18.	ELYSIA, SEPT. 20.
CASTALIA, AUG. 9.	CIRCASSIA, OCT. 20.
SCINDIA, AUG. 22	OLYMPIA, NOV. 7.
MASSALIA, SEPT. 8.	CASTALIA, NOV. 21

Anchor Line (Henderson Brothers), Ltd
16, Gracechurch Street, London, E.C.3.

Clan Line.—S.s. Clan Macbride for Colombo, Madras and Calcutta (Birkenhead, July 13).

Cunard Line.—S.s. Pavia for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, etc. (Glasgow, July 10, and Swansea, July 14) ; s.s. Malta for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Swansea, July 12).

Ellerman Line.—S.s. Fabian for Gibraltar, Malta and Alexandria (Liverpool, July 20) ; s.s. Andalusian for Genoa, Leghorn, Naples, etc. (Liverpool, July 20) ; s.s. Cressado for Gibraltar, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, July 29).

Ellerman's "City" Line.—S.s. City of Durban for Calcutta (Birkenhead, July 17) ; a steamer will sail from Birkenhead on July 31 for Calcutta.

Ellerman's "Hall" Line.—S.s. Borderer for Bombay, Karachi and the Punjab (Liverpool, July 11).

Glen Line.—S.s. Glenariffe for Port Said, Port Swettenham, Singapore, etc. (London, July 13) ; s.s. Glenamoy for Port Said, Port Swettenham, Singapore, etc. (London, July 28) ; s.s. Glenogle for Port Said, Port Swettenham, Singapore, etc. (London, August 10).

Harrison Line.—S.s. Inventor for Calcutta (Liverpool, July 8) ; s.s. Electrician for Port Said, Port Sudan, Aden, Mombassa, etc; (Birkenhead, July 13) ; s.s. Collegian for Calcutta (Liverpool. July 29).

Henderson Line.—S.s. Chindwin for Port Said and Rangoon (Birkenhead, July 21) ; s.s. Burma for Port Said and Rangoon (Birkenhead, July 26).

Holt Line.—S.s. Laomedon for Port Said, Port Swettenham, Singapore, etc. (Glasgow, July 13) ; s.s. Peleus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, July 13) ; s.s. Teiresias for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, July 13) ; s.s. Antilochus for Port Said, Port Swettenham, Singapore, etc. (Swansea, July 20) ; s.s. Agamemnon for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 12) ; s.s. Helenus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 12).

Johnston Line.—S.s. Peruviana for Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Sulina, Galatz and Braila (Liverpool, July 22).

Moss Line.—S.s. Esneh for Casablanca, Gibraltar, Algiers, Malta, Port Said, Jaffa, Haifa, Beyrout and Famagusta (Liverpool, July 8).

Papayanni Line.—S.s. Trentino for Melilla, Malta and Alexandria (Liverpool, July 12).

P. and O. Line.—S.s. China for Bombay (London, July 14) ; s.s. Nellore for Colombo, Madras and Calcutta (London, July 14) ; s.s. Nankin for Colombo, Madras and Calcutta (London, July 28) ; s.s. Plassy for Bombay (London, July 28) ; s.s. Malwa for Bombay (London, August 11).

P. and O. British India Line.—S.s. Hatipara for Colombo, Madras and Calcutta (London, July 9) ; s.s. Mulbera for Bombay and Karachi (London, July 14) ; s.s. Merkara for Bombay and Karachi (London, July 28) ; s.s. Ethiopia for Colombo, Madras and Calcutta (London, July 29) ; s.s. Mashobra for Colombo, Madras and Calcutta (London, August 8).

Prince Line.—S.s. Algerian Prince for Malta, Alexandria, Syrian Coast and Cyprus (London, July 19) ; s.s. Stuart Prince for Tunis, Malta, and Alexandria (Manchester, July 24) ; s.s. Cyprian Prince for Tunis, Malta, and Alexandria (Manchester, August 5).

PARCELS FOR CONSTANTINOPLE.

Parcels for Constantinople are now accepted at Post Offices in the United Kingdom for transmission via France, and, between Marseilles and Constantinople by the fortnightly steamship service maintained by the Compagnie des Messageries Maritimes. The first despatch from London was made on June 7, and thereafter on alternate Wednesdays. Parcel mails conveyed by this route should take from 14 to 15 days in transmission between London and Constantinople. The rates of postage will be 2s. 3d., 3s. 6d., 4s. 3d., for 2 lb., 7 lb., and 11 lb. parcels respectively. Parcels intended for transmission by this new service should be directed "**via France.**"

Near East Markets.

LONDON PRODUCE REPORT.

Lemon Supplies Excessive.

(*From Our Own Correspondent.*)

London, Monday Evening.

Sugar.—Home refined has been in moderate demand at firm rates. Tate's cubes and mineral water sugar are firm at 56s. 6d. and 50s. 6d. respectively. London granulated and Lyle's granulated are steady features at 50s. 3d. and 50s. 6d. respectively. Foreign descriptions have been steady. West Indian crystallized has come to business at 43s. 6d. while white Mauritius shows no change at 47s. White Java has shed 4½d. at 20s. 6d. Cane sugar quotations are :—June, 17s. od. ; July, 17s. od. ; August, 17s. od. and September, 17s. od. White sugar quotations are :—June, 22s. 6d. ; July, 22s. 3d. ; August, 22s. 6d. ; September, 22s. 4½d. ; and October-December, 21s. 7½d.

Coffee.—An unsteady tone has again been in evidence. East Indian and Costa Rica have both dropped 2s. at 116s. and 110s. respectively, while Nairobi has advanced 2s. at 106s. Quotations are :—July, 64s. 6d. ; September, 63s. 3d. ; December, 61s. 7½d. ; and March, 61s. 9d.

Dessicated Coconut.—A bright tone has been in evidence during the week. Prices are firmer, and it is hoped that a steady tone will prevail for some weeks.

Rice.—The market remains unchanged, the demand being quiet.

Green Fruit.—An exceptionally large quantity of South African oranges has arrived, but the demand has been weaker. The condition of the fruit is all that could be desired. The demand for oranges will no doubt improve on the termination of the strawberry season, which comes to an end shortly. The market for lemons is overstocked, owing to the poor request. Shipments are being restricted until the supplies have been worked off. The market for apples is exceedingly dull owing to the bad condition of the fruit. Egyptian onions are still in favour, while prices are steadier.

Oilseeds.—Prices have again risen. Indian linseed has advanced 3d. to 21s. 3d., while La Plata has gained a like amount at 20s. Rapeseed has risen with Toria 3d. up at 19s. Steadiness prevails in cottonseed. Egyptian black is unchanged at 11s. 10½d. Sakellarides is firm at 11s. 3d. as also Indian at 9s. 3d.

Oils.—Steadiness prevails. Linseed oil shows no change at 43s. 6d. Rape oil has been firm. Crude is 45s., and refined is 48s. All quotations of cotton oil are unchanged. Deodorized is at 48s. ; Egyptian crude is 42s. ; technical is 41s. 6d., and refined is 48s.

Oilcakes.—Quotations are unsteady. Cottonseed cake and coconut cake have both dropped 10s. at 160s. and 200s. ton respectively. Linseed cake has gained 10s. at 280s. ton, while cottonmeal cake is 20s. higher at 280s. ton.

ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud and Co., Smyrna, report as follows for the week ended June 17 :—

Sultanas.—The total estimated arrivals to date amount to 174,240 bags, the sales are 172,440 bags, and the estimated stock unsold amounts to 1,800 bags.

Markets.—Sultanas.—The few small purchases effected this week show a slightly easier position. The prospects of a big yield this summer, running into possibly over 40,000 tons, is having its effect on dealers' minds. There is a desire to clear all old stocks before new season's fruit is at hand.

Figs.—Crop prospects have materially improved this week owing to a spell of warm weather which has helped to mature the male figs. Considerable concern was felt on this score owing to the immature condition of the male figs which are essential at this moment for the fertilisation of the female figs which constitute the crop.

According to the Cairo Correspondent of *The Times* the Egyptian Government has decreed that imports of cotton goods must be folded in a width of either a metre, or yard, or a recognized fraction thereof, and that each roll must be clearly marked with the total length contained. No imports will be allowed unless they comply in these particulars. The decree becomes operative one year hence.

THE CONSTANTINOPLE MARKET.

Increased Activity.

An Imperial Ottoman Bank report from Constantinople dated June 24 states :—

The market has shown signs of some activity of late ; some transactions have been carried out for Anatolia through the ports of Adalia and Mersina. On the other hand consignments for for the Black Sea have notably decreased since the bombardment of Samsoun. The accelerated rise of sterling which is quoted at Ps. 734 increases the difficulties of importers.

Manufactures.—Despite the absence of business prices are more steady by reason of the rise at Manchester and in America and the new recovery in the rate for sterling.

Sugar.—America continues to maintain prices at a high level. All the same the exportation of the new crop of Java having commenced and the latest news regarding the crop being favourable a decline is to be anticipated. Here prices are firmer following the rise in the exchange. Quotations :—American £22 per ton, Dutch £25 per ton.

Coffee.—Prices are rising and the crop of Rio and Santos is reported to be inferior in quality. Quotations are :—Ps. 50-56 in transit according to quality.

Cyprus Harvest Prospects.

A report received by the Imperial Ottoman Bank from Nicosia for the month ended June 15 states :—

The prospects for a good crop increase as the harvest goes on. The barley crop will certainly be inferior to that of last year, and perhaps will be one-third below the amount required for local consumption. The quality is, however, promising.

Cocoons.—The prospects for a plentiful crop seem to be fulfilled. Exporters are, however, dissatisfied by reason of the big prices ruling locally, which reduce the margin of profit that the Marseilles market now leaves them.

Carobs.—The carobs market presents no animation whatsoever. The exportation has been limited during the month under review. The prospects for the coming crop are middling. Prices fluctuate about £6 per ton c.i.f.

PALESTINE MARKET CONDITIONS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Jaffa, June 10.

The soap trade in Jaffa has commenced to recuperate, and large quantities of olive oil have been arriving from Smyrna and Italy.

Jaffa, June 17.

The export of melons to Constantinople has commenced. The crop this year is said to be very good. There has been a small local rise in the price of barley.

CURRENT PRICES.

General Produce.—Bacon: (Continental), 140s. cwt.; (Canadian), 124s. cwt.; (American), 107s. 6d. cwt.; butter (Danish), 225s. cwt.; (Australian), 214s. cwt.; (New Zealand), 227s. cwt; cheese (Canadian), 91s. cwt.; (New Zealand), 100s. cwt; lard 68s. cwt.; eggs (Danish), 16s. 6d per 120; (Styrian), 9s. 9d, per 120; chillies, 157s. 6d. cwt.; cloves (Zanzibar), 1s. 2½. lb.; cocoa (Ceylon good to fine), 85s. cwt.; coffee (Costa Rica), 125s. cwt.; (East Indian), 125s. cwt; (Central American), 102s. 6d cwt.; (Jamaica), 72s. 6d. cwt.; (Mocha Longberry), 105s. cwt.; (Santos superior), 71s. cwt.; ginger (washed Cochin), 53s. 9d, cwt.; nutmegs (1[illegible]s to 80's), 11½d lb.; pepper (Singapore black) 4d. lb.; (Muntok white), 7½d. lb.; pimento 2 1-8d. lb.; raisins (Valencias), 55s cwt.; sultanas (Smyrna) 110s. cwt.; currants (Vostizza), 65s cwt.; (Amalias), 57s. 6d. cwt; sugar (Tate's cubes), 50s. cwt.; (Lyle's granulated), 50s. 4½d. cwt.; (Mauritius crystals), 47s. 6d. cwt.; (West Indian crystallised), 43s. 9d. cwt.; (centrifugal), 16s. 10½d. cwt.; tapioca (fair Singapore), 2d. lb.; rice (Rangoon No. 2), 14s. 3d. cwt.; (bran Rangoon), £6 10s. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 6½d. lb.; tea (Indian, common to good common), 1s. 0½d. lb.; (medium to good), 1s. 4d. lb.; (fine to finest), 2s. 7½d. lb.; Ceylon (common to good common), 1s. 2d. lb.; (medium to good), 1s. 6d. lb.; (fine to finest), 2s. 7½d, lb.; Java (common to good common), 10½d. lb.; wheat (English white), 53s. 6d. qr.; wheat (Australian), 55s. 3d. qr.; oats (English), 36s. 9d. qr.; oats (La Plata, ex-ship), 25s. 9d. qr.; maize (La Plata), 36s. 9d. qr.; flour, 42s. 3d. sack.

Chemicals.—Acids: Boric 61s. cwt.; oxalic, 8¼d. lb.; citric, 2s 7d. lb; tartaric, 1s. 6d. lb.; ammonia (sulphate) £1 6115. 6d. ton; arsenic, (white powdered), £42 ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £12 10s. ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 115s. 6d. cwt.; Potassium: Bichromate, 6¾d. lb.; chlorate, 4½d. lb.; caustic, £33 10s. ton; nitrate, £37 10s. ton; permanganate, 9¾d. lb.; prussiate yellow, 1s. 3½d. lb.; sulphate (90 per cent.), £15 5s. ton; Sodium: Crystals, 12os. ton; bi-carbonate, £11 5s. ton; bichromate, 3d lb.; alkali (58 per cent.), £9 1s 3d. ton; chlorate, 3½d lb.; caustic (70 per cent.), £23 ton; hyposulphite, £16 ton; prussiate, 9½d. lb.; nitrate, £15 3s. 3d. ton; glycerine (crude 80 per cent.), £60 ton; glycerine (industrial 1260 per cent), £87 10s. ton; lemon oil, 3s. 4½d. lb., quinine 2s. 3½d. oz.; red lead, £37 ton; white lead, £41 ton; white ground lead, £49 15s. ton; sulphate of copper, £26 17s. 6d. ton; sulphate of iron, 60s. ton.

Metals.—Aluminium, £102 10s. ton; antimony (English Regulus), £28 ton; bismuth, 9s. lb.; copper (standard) £61 18s. 9d. ton; copper (electro), £69 10s. 6d. ton; gold bars, 93s. 4d. oz.; iron (No. 3 Cleveland), 90s. ton; hematite (mixed number), 94s. ton; galvanized sheets (25 G), £16. ton; lead (soft foreign), £24 ton; manganese Poti, 1s. 1½d. unit; molybdemite, 30s. unit; nickel, £100 ton; platinum 360s. oz.; plumbago, £16 ton; quicksilver, £11 10s. bottle; spelter (G.O.B.), £27 11s. 3d. ton; tin (standard), £152 16s. 9d. ton; wolfram, 11s. 10½d. unit; zinc sheets, £36 ton; tin plates (20 by 14), 10s. 7½d. box; silver bars, 35⅝d. oz.

Hides and Skins.—Ox and Heifer (first), 90 lbs. and up, 9½d. lb.; 80 to 89 lbs., 9½d. lb.; 70 to 79 lbs., 9.3-8d. lb.; 60 to 69 lbs., 8.3-8d. lb.; 59 lbs. and under, 7d. lb.; (second), 90 lbs. and up, 8¼d. lb.; 80 to 89 lbs., 8¼d. lb.; 70 to 79 lbs., 7¾d. lb.; 60 to 69 lbs., 7d. lb.; 59 lbs. and under, 5.3-8d. lb.; Cows: (first), 60 lbs. and up, 7½d. lb.; 59 lbs. and under, 6¾d. lb.; (second), 60 lbs. and up. 5.3-8d. lb.; 59 lbs. and under, 4.5-8d. lb.; Bulls (first), 5d. lb.; (second), 3½d. lb.; Kips (first), 5½d. lb.; (second), 4½d. lb.; (third), 3¾d. lb. Calcutta Market. Prices in rupees per 20 lbs.:—Arsenic hides (cows): Agras, 7 to 13; Durbhangas, 6.8 to 8.8; Patnas, 5.8 to 6.8. Salted cows: 4.8 to 7.8. Arsenic hides (buffalo): 4 to 8. Skins: Calf, 8 to 10 per 20 lb.; goat, 180 to 240 per 100 pieces.

Miscellaneous:—Cotton (American), 13.72d. lb.; Egyptian (Sakel), 18.75d. lb.; jute (first grade c.i.f.), £36 5s. ton; jute (lightnings), £33 ton; Oilseeds: Linseed (La Plata), £19 12s. 6d. ton; palm kernals, £17 16s. 9d. ton; castor seed (Bombay), £18 1s. 3d. ton; sesame seed (China), £26 5s. ton; soya beans, £12 11s. 3d. ton; Oils: Linseed, £42 5s. ton; olive (Spanish) £77 ton; rape (crude), £43 5s. ton; soya, £39 5s. ton; petroleum, 1s. 4½d. gallon; petrol, 2s. 1d. gallon; fuel oil (ex-tank), 72s. 6d. ton; coconut (Ceylon), £38 5s. ton; cotton (crude), £42 5s. ton; ground nut, £45 15s. ton; Rubber: Plantation (No. 1 Crepe), 7¾d. lb.; smoked sheet, 7¾d. lb.; fine hard Para, 10½d. lb.

COAL OUTPUT IN CZECHO-SLOVAKIA.

According to the statistics published by the Ministry of Public Works, the output of pit coal in Czecho-Slovakia during the first quarter of 1922 amounted to 2,679,863 metric tons. The output of lignite for the same period was 4,710,723 tons. The individual output per workman was 6.35 metric quintals in the case of pit coal (an increase of 0.62 quintals as compared with the same period in 1921) and 15.78 quintals in the case of lignite (an increase of 1.66 quintals). Owing to the strike in February which lasted nearly a fortnight, the total output shows a decrease of 347,441 tons of coal and 696,183 tons of lignite.

During the first three months of the year Czecho-Slovakia exported 294,351 tons of coal and 916,532 tons of lignite, especially to Yugoslavia, France, Austria, Germany, Poland, Italy, Roumania, Switzerland, Denmark and Holland. During the same period Czecho-Slovakia imported 203,524 tons of coal and 37,584 tons of coke from Germany.

Reuter's Athens correspondent in a message dated June 26 states that the Government has introduced a Bill in the National Assembly increasing the Customs duties upon certain articles and prohibiting the importation for six months of a number of articles fo luxury. This prohibition is regarded as necessaryin order to counteract the rise in foreign exchanges.

Stock and Share Markets.

RATHER MORE ACTIVITY.

Roumanian Consolidated Strong.

(From Our Own Correspondent.)
London, Tuesday morning.

The past week has seen something approaching a revival of activity in certain markets, and Kaffirs and, *mirabile dictu*, Rubbers have been quite buoyant. In regard to the latter the movement would appear to have been transient ; at any rate transactions yesterday suggested that shares were again moving towards their previous levels.

In general outside the markets specified above a very firm tone has prevailed. Gilt-edged stocks have for the most part been good. This is, I imagine, to be attributed to some extent to the anticipation of a further reduction in the Bank rate which seems quite a probable contingency in the near future. Ireland, strangely enough, has ceased for the time being, at any rate, to have much effect on the markets.

Gilt-edged Firm.

Turning to prices, Gilt-edged generally shew an improvement on the week. Consols at 57.5-8 are ¾ up, the Conversion Loan is 77.1-16, a rise of 1½, while War Loan Fives are 100.3-16, a gain of ¼. Indian stocks have tended to harden. The Seven per cent. loan is ¾ up at 113¾, the 3½ per cent. loan shows a gain of 1¾ at 66½, while the 3 per cent. loan is ½ up at 56½.

In foreign issues, Turkish Unified have been a feature, closing at 36½, somewhat below the best prices touched. Generally a steady tone has prevailed, French stocks being specially firm. War Loan Fives gained ¾ at 42, while the 4 per cents. are 1¼ up at 34. German 3 per cents. have been affected by the exchange, and are 3-16 down at 2. Czecho-Slovak 8 per cents. have been harder, and close 2¼ up at 95. Russians have been neglected, but the rates are practically unchanged. In South American issues Mexican bonds have been a firm spot, while Brazilians were harder. Chinese issues have improved, the 5 per cent. 1912 loan being 75½, while the 1913 loan is 76½.

Industrials Quiet.

The market has again had a quiet week with the exception of a few descriptions, and it is evident that Industrials are not likely at the moment to interest investors to any great extent.

There has been little change in Textiles. Coats are 9d. down at 61s. 3d., while Courtaulds are 1s. 10½d. up at 51s. 6d. In Tobaccos Bats are 3s. up at 77s. 9d., while Imperial Tobaccos are 63s. 3d., a gain of 1s. 9d. There has been rather more activity in Dunlops which are 7½d. up at 9s. 3d. Iron and Steel shares have hardened. Vickers are 2s. 3d. up at 14s., Guest Keens are unchanged at 35s., while Armstrongs are the same at 18s. In Indian railways Bengal and North Western are 2¼d. up at 130¼. Bengal Nagpur have gained ¾ at 98, and Madras and Southern Mahratta are 1½ up at 104.

Oils Generally Inactive.

Apart from the Roumanian group a rather inactive tendency has prevailed in the Oil market, and conditions generally have tended to be rather unsettled.

Anglo-Persian Ord are again fractionally higher on the week, closing at 5, a gain of 1-32, while Burmahs are 1-16 lower at 5¼. There has been some Continental selling of Mexican Eagles which at 3.5-32 are 15-32 lower. Trinidad issues are about the same. Apex are unchanged at 2.1-16, Centrals are 2.1-8, a decline of 5-32, while Leaseholds are unchanged at 1.3-16.

Among Egyptians Anglo-Egyptian B. are 1½ x.d., while Oilfields of Egypt are unchanged at 5s. In the Roumanian group Phoenix are firmer, and close 1s. up at 28s. Dacia Romanos are unchanged at 1, while Steaua Romanas are 2s. up at 12s. 6d. Roumanian Consolidated have been the feature of the group, a sharp rise taking place as the result of favourable reports from the company's properties. The shares close at 19s. 3d. a gain of 2s. 3d. They will go considerably higher as will Phoenix , and I may perhaps be allowed at this juncture to recall the fact that I have throughout suggested the possibilities of those two shares.

Banks Variable.

A rather variable tone has ruled in banking descriptions. Chartered of India are unchanged at 18¼, National of India are 1¼ down at 44½, P. and O. Banks are 3-8 lower at 13.5-8, while Bank of British West Africas are 5.1-8.

Egyptian securities have been steady. Aboukirs are 3d. down at 21s. Beheras are unchanged at 8, Egyptian Markets are the same at 21s. 6d., while Gharbieh Land are 1-16 down at 1¼.

COMPANY NOTES AND REPORTS.

DELHI UMBALLA KALKA RAILWAY.

The Delhi Umballa Kalka Railway Company's share of net earnings during the year ended March 31, 1922, was £160,493, compared with £176,809 for the previous year. Adding actual gain in remittance £1,604 and making minor adjustments the net earnings are £161,108, as against £254,454. After bringing forward £17,545, providing for corporation and income taxes, interest on Debenture and Preference stocks, interim dividend and bonus, interest on capital advances, and making other adjustments, the amount to be dealt with is £63,969. The directors recommend a final dividend of £6 per cent., together with a bonus of 1 per cent., on Ordinary stock, subject to tax, carrying £17,769 forward. The dividend with bonus recommended for the year is at the rate of 14 per cent. per annum.

The capital expenditure amounted to £10,357 on open line, principally on stations and buildings. The total capital expenditure to March 31, 1922, was £1,516,956, of which £119,782 is chargeable to Jind State. Jind-Panipat contract was duly signed for and on behalf of the Secretay of State for India and the company on October 6 last. Meeting, Gresham House, E C., July 11, 11.30 a.m.

BURMA RUBY.

The accounts of the Burma Ruby Mines for the year ended February 28, 1922, show, after making usual provision for depreciation, a deficiency of £2,639 plus a debit balance of £1,570 brought in, making a net deficiency of £4,209. 748,242 truck loads of ruby earth were washed, as against 771,406 last year, and sluices ran for 7,710 hours, producing rubies valued at £6,180. The total value of stones mined amounted to £49,372, compared with £43,010. The Kathé mine did very well, although no important stones were found. The new mine at Kyaungdwin is beginning to produce both rubies and sapphires. The sales of rubies amounted to £46,372, compared with £33,507. Meeting, Cannon Street Hotel E.C., July 10, 12.30 p.m.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau," "The Near East," 1 Devonshire Square, London, E.C.2." It must be understood that "The Near East" accepts no responsibility in connection with such replies.

125. A firm of British Merchants and Commission Agents in Liverpool desire to extend their connections in the Near East for General Merchandise.

126. Confectionery. British firm of manufacturers extending their export trade in best quality confectionery suitable for sub-tropical climates will supply details to enquiries from oversea buyers.

127. A Firm exporting all kinds of Metals and other merchandise to Egypt and India would like to get in touch with Importers in the Near East of similar goods.

128. General Commission Agent and Merchant in Cairo, Egypt, open to represent British manufacturers and merchants on commission. Can also export all kinds of Egyptian products.

129 Principal of old established textile manufacturing and Import Firm in Aleppo (Syria) now in Switzerland, wishes to get in touch with cotton and woollen yarn manufacturers or exporters in Lancashire and Yorkshire.

Company Meetings

EGYPTIAN HOTELS.

A Satisfactory Year.

The twenty-fifth annual general meeting of the Egyptian Hotels, Ltd., was held on June 30 at the offices of the company, 11, Ironmonger Lane, E.C., Sir William B. Peat, C.V.O., presiding in the absence, through indisposition, of Lord Claud Hamilton (the chairman of the company).

The notice convening the meeting and the report of the auditors having been read, the chairman read the speech prepared by Lord Claud Hamilton, which was as follows :—" I assume that you will take as read the directors' report and accounts, which have been circulated. Your directors are once more able to report a satisfactory year's working. The profit earned by the hotels for the year is £52,852 12s., which is £3,800 less than the corresponding figure of last year, a result which your board considers satisfactory in view of conditions in Egypt, which adversely affected the early part of the winter season.

" If you refer to the debit side of the profit and loss account, you will see that we have charged corporation profits tax for the period from the 1st January, 1920 (from which date this tax was instituted), to the 30th April, 1921, and, in addition, have provided for Corporation profits tax for the year now ended. Thus a charge of over £6,000 has been made against the profits of the current year, of which some £3,500 properly appertains to past periods. The reason for this is that last year your Board were not satisfied that the company was legally liable to be assessed to corporation profits tax, and, in view of the allocations to special reserve, they decided that no charge need be made against last year's profit and loss account to provide for any possible liability under this heading. The directors are now advised that the company is liable to be assessed to this tax, and have charged the whole amount up to the 30th April last against the profits of the current year.

" Our balance sheet shows a strong financial position. Our investments have increased during the current year, chiefly by the purchase of a further £15,000 Egyptian Four per Cent. Unified Debt. It is satisfactory to note that our Egyptian Government securities which stand in the balance sheet at cost price are worth more, on to-day's quotations, than we gave for them by about £2,000. Cash at bankers and in hand, at £98,809 8s. 3d., is nearly £2,000 higher than the corresponding figure of last year.

" In addressing you last year I made reference to our investment in the Société Suisse Egyptienne des Hotels, which company, as you are aware, owns the Semiramis Hotel. I then mentioned that the hotel had only been opened to visitors since December, 1920, and that the results for the few months which had elapsed since its re-opening encouraged the local board to hope for fair results in the future. I am glad to be able to report that the Semiramis Hotel has had a successful year—the most successful in its history. As formerly, the profits shown in our accounts do not include any profits from our interest in that hotel. If it is able to maintain the satisfactory results disclosed by the past year's accounts, then our interest in the Société Suisse Egyptienne des Hotels, which stands in the balance sheet at £29,169 16s. 5d., should prove to be a remunerative one.

" Our special reserve account, with the allocation made last year, stands at £30,000, and the transfer of a further £5,000 is proposed, beinging this reserve up to £35,000.

" The managing director reports that the capital expenditure which was decided upon last year by way of extension of bathrooms, and the provision of private bathrooms, has proved remunerative, and, in view of this and the increasing demand for bedrooms with private bathrooms adjoining, the local board have authorised an expenditure of a further £E.10,000 to provide increased accommodation of this nature, and the installation of running hot and cold water in bedrooms. The managing director expresses the opinion that this expenditure will justify itself.

" In conclusion, your board consider that the shareholders have reason to congratulate themselves on the result of the year's operations, for which the company is indebted to the managing director, Mr. Baehler ; the other directors in Egypt, and to Mr. Flood, the manager at Shepheards, and his staff. Provided favourable conditions in Egypt can be maintained, your directors feel that they can look with every confidence to satisfactory results for the coming year." The chairman concluded by moving : " That the directors' report and accounts for the year to 30th April, 1922, as submitted to the shareholders, be received and adopted."

Mr. Charles Baehler seconded the resolution, which was carried unanimously.

The chairman next moved : " That a dividend of 5 per cent. on the Preference shares for the year ended 30th April, 1922, be and the same is hereby declared payable on and after 15th July, 1922." This was seconded by Mr. Snow, and was carried unanimously.

The chairman then proposed : " That a dividend of 25 per cent. on the Ordinary shares for the year ended 30th April, 1922, be and the same is hereby declared payable on and after 15th July, 1922." This was also seconded by Mr. Snow, and was carried unanimously.

The retiring director, Mr. H. M. Snow, M.V.O., was re-elected, and Messrs. Turquand Youngs & Co. were re-appointed auditors, and a vote of thanks to Lord Claud Hamilton for the great assistance he had rendered in the interests of the company, brought the meeting to a conclusion.

GHARBIEH LAND.

The report of the Gharbieh Land Company, read at the ordinary general meeting held at Cairo on May 30, states :—

We regret that the position does not yet permit us to propose the distribution of a dividend. Not only have the adveise conditions which we pointed out to you in our last report not disappeared, but they have been aggravated to a certain extent by the general commercial stagnation which has developed in the country as the result of world economic complications. The prices of cotton have improved since March 1, 1921 ; they have even at one time reached a very high level, but the rise did not last, and as it occurred at the time of the harvest the cultivators derived hardly any advantage from it. The present rates remain very low compared with the expenses of cultivation in 1921, and in addition the quantity of the crop has been much reduced this year.

The revenues of the year derived from the company's operations and profits on sales have been sufficient to cover expenses and the debenture charges. Land transactions have been almost lacking, and we have only been able to dispose of about 9¼ feddans during the year with a profit of £E.695.145. Now, transactions of this kind form usually an essential element of the profits of a land company like ours, whose principal object is to improve lands and to resell them and which generally speaking only cultivates the least productive lands, that is to say, those that are not yet sufficiently developed to be resold. So it is not surprising that the complete cessation of land transactions in 1921 has placed this company once again this year in the position of being unable to distribute a dividend.

But there is reason to believe that the situation will markedly improve in the near future, for our lands have developed in a satisfactory manner as a result of the works that we have carried out, notably last year. To that must be added the fact that for a considerable time there has been a marked decrease in the cost of labour, fuel, etc.—a decrease from which cultivators and landowners in Egypt will certainly profit if the prices of cotton are maintained in the neighbourhood of their present basis. It may then be hoped that our tenants and purchasers will derive a more appreciable profit from their lands in the future which will naturally have an effect upon the company.

The gross revenues from cultivation amount to £E.25,026.924 as compared with £E.29,763.970 for the previous year. But that decrease is only apparent, for the proportion of arrears in 1920-21 was greater, and we had decided to increase by £E.5,000 the reserve for doubtful or irrecoverable debts. From the amount of £E.59,259.679 which represents the arrears at February 28, 1922, there has to be deducted the net value of the cotton of 1920 and 1921 which has been consigned to us—a value which, according to the official prices of the Bourse, was at that date £E.32,842.791. That amount is included in that of £E.39,785.751 which figures provisionally in the liabilities under the heading " Tenants and purchasers (estimated value of cotton received)," pending the final settlement of the accounts. Up to the present we have only fixed the prices for a thousand kantars, the remainder, at the desire of those interested, being carried over to the end of July, 1922. The world's cotton position appears to justify higher prices than those that obtain at present, and all the official announcements agree so far in regarding an approaching improvement in prices as a probable eventuality.

The revenues and gross profits of the year amount to £E.43,424.684 and the expenses to £E.42,098.905 as follows :—Receipts :—Land cultivation (rent, crops, etc.) £E.25,026.924, profits on sales of lands £E.695.143, interest collected or due £E.13,542.617, profit of investments (bill case) £E.4,160—£E.43,424.684. Expenses : — Cost of land cultivation £E.19,571.563, debenture service £E.13,110.774, interest paid or due £E.1,265.090, directors' fees for 1920-21 £E.1,000, general expenses £E.4,909.493, loss on investments £E.2,187.500, various payments £E.54.485—£E.42,098.905 ; balance £E.1,325.779 ; balance carried forward from the year 1920-21 £E.3,968.117, total £E.5,293.896 which we propose to carry forward.

The general meeting unanimously approved the balance sheet and accounts for the company's sixteenth year ended February 28, 1922, decided to carry forward the credit balance of the profit and loss account of £E.5,293.896, re-elected as director M.N. Shakour Pacha and appointed M. Guido Levi in the place of the second retiring director, appointed as auditors for the year Mr. L. H. Russell and Mr. J. C. Sidley (of Messrs. Russell and Co., chartered accountants), and fixed the remuneration of the auditors for 1923 at £E.200.

The meeting of the Imperial Ottoman Bank will be held on July 26 at Winchester House, E.C., at 1 p.m.

Information concerning the cereal crop in Algeria shows that the situation is not so serious as was believed.

The City office of Messrs. Cox and Co., bankers, has been transferred from 38, Lombard Street, E.C.3, to 80, Gracechurch Street, E.C.3.

The Czecho-Slovak Elbe Shipping Company has resumed its cargo service between Prague and Hamburg with 62 steamers and 245 freighters.

Cotton & Cotton Goods.

MANCHESTER MARKET.

Somewhat Improved Conditions.

From Our Own Correspondent.

Manchester, Saturday.

The general conditions in the cotton spinning and manufacturing trade of Lancashire have continued comparativly healthy during the past week. Actual business has been somewhat irregular, and on certain occasions buyers have held off when makers have put up their prices. Recent statistics with regard to unemployment show that there are less people out of work than at any time since the beginning of last year. Rather better advices have been received from Egypt, but shippers to that outlet have acted very cautiously and no large lines of piece goods have been mentioned. It is stated that there are still some heavy stocks of dear cloths out there, but traders generally are optimistic with regard to future developments, but at the same time it is expected that progress towards better times will be slow. In the yarn section quotations for Egyptian counts have been well maintained, but only scattered transactions have been reported for home use, and then not of any weight. The bulk of the piece goods enquiry has again been for India,and some large speculative buying has taken place in light cloths by prominent shippers. Not much has been done in shirtings. Buyers for China are waiting for the Shanghai rate of exchange to improve. Fancies have been sold in moderate quantities for the Continent and South America. American yarns have fluctuated in sympathy with the ups and downs in raw cotton rates. Some good buying has taken place in numbers suitable for light cloth manufacturing purposes.

LIVERPOOL REPORT.

A Quiet Week.

Messrs. Reynolds & Gibson report as follows for the week ended June 28 :—

Business in this department has been comparatively quiet after last week's spurt. The decline in values on the American side over last week-end came at a most unfortunate moment, and had the effect of temporarily scaring would-be buyers from the market. Nevertheless, considerable resistance was experienced when prices were tested, and for the first few days quite a good business was recorded. This was not maintained, however, and sales for the last two days averaged only 250 bales *per diem*. The slump in futures appears to have been arrested more or less to-day, and there seemed to be quite a good undercurrent present, which leads one to believe that the recent spurt of buying is not yet finished, and that spinners are merely " sitting on the fence " and waiting for the markets to become steady again. The enquiry here narrowed down considerably during the week, and on only one day could it be described as " brisk." What there was, again showed a tendency to broaden out, and Extra Fine Sakellaridis was again asked for on more than one occasion. The bulk of the business still consists of Sakellaridis ranging from 17-20d. Uppers, after lying dormant for a long time, are being asked for rather more frequently, but no fancy prices are being paid.

C.i.f. business officially continues to rule quiet, although we are inclined to think that rather more takes place week by week than appears on the surface. Manchester reports all speak of the cautious attitude adopted there on the recent break in the price of American cotton, but looked at broadly, they are rather optimistic than otherwise. For example, one hears of spinners who are commencing to spin stock again, and there is no doubt that they are holding on to a part at least of the advance which preceded the recent decline. The tone then was firm and the enquiries from abroad are still on an extensive scale. China appears to be moving again, though only in a small way so far, and the more stable conditions now ruling in that country are bound to prove an incentive to the trade, which was so unfortunately interrupted by the recent civil war. On the whole, we continue to regard the future with optimism. Estimated sales, 3,000 bales (includes 900 Sudan). Quotations are reduced 25 points. Fully Good Sakellaridis 19.75d.

THE EGYPTIAN MARKET.

Steady Tone Prevails.

The Commercial Co. of Egypt in their report for the week ended June 23, state :—

During the past week the market has been steady with but small fluctuations ; the undertone has been decidedly firm. We should probably have seen somewhat higher prices but for the large arrivals which have been rather puzzling to the market. The general opinion for some time past has been towards a heavy falling off in arrivals instead of which they continue to be very large. It is very evident that the quantity carried over in the Interior at the end of last season was largely underestimated, and in view of the total of 5.100.000 kantars received since September 1, 1921, it would appear that the present crop has also yielded considerably more than was estimated by the Government or the Alexandria General Produce Association. There seems little doubt that with present prices we are going to receive every possible kantar and that no old crop cotton will remain up country at the end of the season ; there is no tendency amongst growers to hold cotton up country, and they seem satisfied to secure the prices ruling at present for their produce. Exports are fairly good and with the present demand are likely to be maintained somewhere near the average figure of recent weeks. It is early to discuss the probable carryover at the end of this season but it will, to all appearance, be quite manageable. Sales and exports to America are restricted owing to the uncertainty regarding the proposed heavy import duty.

Spot.—Total sales amount this week to about 9,000 bales, of which we estimate 7,000 bales Sakellaridis; 1,500 bales Uppers, 200 bales Brown, 150 bales White, and 150 bales Pilion.

Crop.—There is nothing of importance to remark again this week—all reports are uniform in speaking of satisfactory progress and good condition. The question of the summer water supply does not shew any improvement, but it is gratifying to see that the natives have taken some notice of the Government warning, and are putting their water lifting plants in order. Temperature has been fairly high but not abnormally so.

MANCHESTER COTTON REVIEW.

Substantial Enquiry from Abroad.

The cotton trade review of the Imperial Ottoman Bank for the week ended July 1 states :—

General.—This market has not been so active during the past week as recently, but there is no substantial change in general conditions. Spinners and weavers are both in a much stronger position than they were two or three months ago, and are firmly resisting the efforts of buyers to obtain reduced prices. Employment throughout the trade is much more general. Enquiry from most outlets abroad continues to be of a substantial character, but much of it, unfortunately, is unworkable at present ; it tends to show, however, that Lancashire goods are wanted and it is probable that, if prices would remain stable, a really good business on reasonably profitable lines to producers might be done.

Yarn.—This section has been stronger during the past week than cloth. Enquiry has been well maintained and, in small lots actual business may be described as fairly good. Prices are practically unchanged on the week.

Cloth.—Some irregularity has characterised dealings in cloth. On some days a moderately good business has been done, whilst others have been very quiet. Enquiry remains on an encouraging scale. India is still the mainstay of the market ; Egypt and the Near East generally are said to have made more offers than recently, but at very poor prices.

Raw Cotton.—Quotations have fluctuated somewhat in the raw material. On Monday last prices were reduced by 59 points, but since then the tone has been stronger. Prices on the week are lower, although " spot " sales have been substantial. The first official statement of the American Cotton Bureau will be issued on Monday next, and for the moment interest is centred on it. Closing prices are as follows :—American Fully Middling 13.23 ; Egyptian Fully Good Fair, 19.75.

TRADE OF IRAQ IN 1921.

A Difficult Period.

The June issue of the monthly circular of the Imperial Ottoman Bank contains a report on the commerce of Iraq (Mesopotamia) in 1921, from which the following particulars are taken :—

The stagnancy of trade in all parts of the world has affected the Iraquian markets, where business is at present slack and unprofitable. However, judging by the experience of other countries in the present adverse conditions, Iraq can be congratulated upon the manner in which trade difficulties have been surmounted, and although the worst is not over, there are general signs of a return to a normal basis. The date crop was not satisfactory last season, but it is thought that the next export of this important item of local produce will show considerable improvement and that a favourable agricultural year is likely to resuscitate the pre-war export of grains.

Re-export of foreign importations—mostly merchandise in transit to and from Persia—showed improvement to an extent of Rs.70 lakhs, but owing to an exceedingly poor date export during 1921, only 990,382 cases of dates, weighing 32,532 tons, or considerably less than half the quantity of dates of the previous years, left the country, with a resultant decrease of Rs.82 lakhs in the export value of country produce.

The value of imports into Iraq was Rs.108,594,904 through Busreh, and Rs.97,044,331 through Baghdad, giving a total of Rs.205,639,235 as compared with Rs.232,750,215 for 1920, a decrease of Rs.27,110,980

The exports through Busreh amounted in value to Rs.28,469,950 and through Baghdad to Rs.69,877,952, giving a total of Rs.98,347,912 as compared with Rs.103,807,157 for 1920, there being thus a decrease of Rs.5,459,245.

The principal importations from overseas of textiles, sugar, hardware, wearing apparel, tea and oils are largely in transit into Persia, while carpets, dried guts, gums and resins, hides and skins, wool and spices, pass through this country for export overseas. Iraq's main exports consist of dates, grains, hides and skins, animals, wool, liquorice and galls.

Busreh.—Seasonable rains during the second half of March have assured the realisation of a heavy grain crop in the country. There will be a large surplus available for export, estimated at 200,000 tons.

Mosul.—Agricultural Situation.—April. Climatic conditions were favourable to cultivation, and this year's crops would have exceeded the estimated output had not locusts made a sudden appearance in certain localities. Farmers were compelled to begin the harvesting of barley prematurely.

Cotton sowing was started in the middle of April, and "The Mossoul Farms, Ltd.," the only company in the district which makes use of modern agricultural implements and machinery, has begun cotton growing on an extensive scale.

Commercial Situation. — Animal-drawn reaping machines of British manufacture were in great demand during April, and stocks were disposed of entirely.

VI. ROUMANIA.

(*Concluded*).

The Export Trade.

Detailed Roumanian statistics of imports and exports for the year 1921 have not yet been issued, but it can safely be assumed that, as in 1919 and 1920, the exports were nothing like sufficient in amount to pay for the imports. This question of the trade balance against Roumania is a very serious one, and it is interesting to note the principal factors in operation which limit exports.

The first and the greatest is the lack of transport. The second factor which prejudices the free flow of products from Roumania to other markets is the restriction imposed by the Government upon exports.

As regards petroleum, the limited capacity of the single pipe line existing to-day between Baicoi and Constantza (500 tons a day when it is working) is one of the great causes of the limitation of petroleum exports. Refined products cannot be transported to the shipping port because of the shortage of locomotives to draw the tank wagons, and also because of the lack of tank wagons. A large number of the wagons of the pre-war park have become irreparable since 1916, whilst of those actually in operation many are held and operated by the State, or by its organ *Distributia*, for the purpose of distributing petroleum products in Roumania itself.

Undoubtedly, and in spite of the shortage in production in all lines of endeavour in Roumania at the present time, exports would materially increase if the difficulties of working under changing conditions regarding both imports and exports could be removed.

Roumania's ability to absorb manufactured goods from Western Europe depends essentially upon her being able to bring down to the ports of shipment a large surplus of grain. This is the primary requisite. The amount of foreign exchange brought into the market in consequence of petroleum and timber exports is not to be compared with it. Minor exports, such as cattle to the Levant and eggs to Western Europe need hardly be considered in this relation.

Imports.

In general it may be said that the question of the number of lei exchangeable for a sovereign would have no influence upon actual trade were the number fairly constant. It has, however, an extremely grave influence at the present time in the sense that the Roumanian importer of goods in the years 1919 and 1920 was able to command credit in the United Kingdom. He did not pay for those goods; he took delivery of them and sold them upon a basis of prices in lei less than the present rate of exchange. He is now asked to pay pounds in England, and these pounds cost him in most cases more than he realised for the goods. It is obviously very difficult for an importer in any country whose currency has depreciated to such an extent to pay the British exporter for goods purchased under these conditions, but there is no reason why the importers should not purchase British goods, in more limited quantities, and pay cash for them, once both the limitations of the market and these facts have been perceived and the price level in the importing country has achieved more or less stability.

The Roumanian importer sees a certain lack of demand due to the low international quotation of the Roumanian currency, and until monetary conditions in Roumania become more stable it is quite probable that this argument will continue to be used. It is of course impossible for some few classes in Roumania to continue to subsist at anything like their pre-war living conditions upon their post-war incomes, but at the same time there is a large new class of peasant proprietors who are in the position of holding large quantities of currency which they have realised in exchange for their agricultural products. These people are now demanding imported goods in ever-increasing quantities, and, although the peasant class in any country is not remarkable for extravagance in living, yet a gradual increase in their demand for a higher class of article, both wearing apparel and food, is already perceptible. The growth of this new class will probably outweigh any lack of demand coming from the pre-war propertied classes.

The principal imports from the United Kingdom consist of textiles, being cotton and cotton goods and woollen goods. The demand for cotton yarns during 1921 seems to have fallen off considerably from the previous year of large shipments from the United Kingdom which still lie on the quays waiting sale to the interior. In this connection again the argument is brought into play that the yarns cannot be sold upon the basis of the current rate of exchange as the peasant will not pay the high prices contingent thereon for his bundles of yarn. The truth seems to lie rather in the fact that in 1920 the amount of yarn imported was not absorbed into consumption, and this has prevented the free flow of the 1921 imports. The peasant is paying very much higher prices for every other article which he purchases not excluding those articles of food which he does not produce himself, and if shipments of yarn had not been made in such quantities as to swamp the market in 1920 it seems probable that he would have paid an equitable price for yarns during 1921.

Trade in the New Territories.

The large importing houses have been slow to open up channels of trade into the new territories and this must be attributed in great measure to the transport situation. With the passage of time and the gradual amelioration of transport and financial conditions in the country the import trade may centre more and more in Bucharest and the Danube ports of Galatz and Braila, whence distribution all over Roumania will be made. Braila and Galatz are best situated geographically for imports going not only into Wallachia by rail but also by river to the Banat. With the building of new railroad lines to link up Transylvania with the Old Kingdom, they will be the best available import centres for Transylvania. Galatz is in this position at the present time as regards Moldavia and Bessarabia, the latter of which has no real port of its own. Persons interested have suggested that the port of Akerman (Cetatea Alba) could be dredged and with the provision of proper accommodation should become the proper means of ingress and egress for Bessarabia, but the physical difficulties in the way of accomplishing this work, not to speak of the financial problem involved, seem to be so great that if embarked upon its completion will be a matter of many years.

Secondary distributing centres for imported goods brought to Galatz are Jassy for Moldavia, where many importers are already established, and Cernauti for the Bucovina, where there are in existence merchant houses which formerly purchased goods wholesale, principally from Vienna. Chisinau is a town which has always been of great commercial importance, and it provides at the present time, as in the past, the financial and commercial basis for most of the business done in Northern Bessarabia.

Goods imported into Galatz and Braila for distribution in the Banat will find their secondary distributing centre in Temesvar. Other secondary centres supplied by these ports in conjunction with Bucharest are Craiova for the Craiova district and Brasov for Eastern Transylvania, whilst Cluj, Arad and Oradea Mare are gradually attempting to turn their outlook towards these ports as sources of supply for foreign merchandise.

The general trend of affairs will certainly be to focus the importing trade as to its greater part on Galatz and Braila, and British firms wishing to establish a distributing centre in this country should consider closely the relative advantages of these places as well as those of the capital city.

Unsatisfactory Transport Position.

The railways in Roumania are still unable to deal with the potential exports of the country, and it looks as though several years must elapse before they will reach this state of efficiency. At the same time their present working is much superior to that of 1919. Congestion at the various ports is at an end. This is due not only to the steadier organisation of the existing means of transport and gradual resumption of something approaching pre-war discipline and administration on the railroads, but also to the fact that imports fell off very considerably during 1921. There is no longer a glut of goods arriving such as that which overwhelmed the railroad officials in 1919 and 1920. The change in the state of affairs is traceable in some degree to the arrival in the country of a number of the locomotives ordered from abroad.

It would seem that in order to give an impetus to export trade the purchase of several hundreds of locomotives for early delivery would ensure that the agriculturists of the country would not be impeded by a continuation of their present inability to secure transport sufficient for their export needs. This, however, would be a very difficult matter, as the financial resources of the Government are not at the moment capable of standing the strain of any further purchases from abroad unless loans could

Digitized by Google

be made for the payment of the locomotives and transport material purchased.

During the year under review no steps have been taken to carry out any extensive works in connection with the railroads, with the exception of the completion of the Borcea-Cernavoda bridge. The pre-war programme for the doubling of the main lines in Old Roumania still remains in abeyance, whilst no attempt has been made to solve the workshops problem for Greater Roumania. The reasons why none of this work can be carried out are financial and need not be repeated here. The permanent way and installation are in bad condition. Practically all the railway lines and bridges are in need of repairs and renewals, as well as signalling apparatus, etc.

A Railway Problem.

One of the really great problems before the railroad engineers at the present time is that of linking up Transylvania with the Old Kingdom. Before the war Transylvania formed part of the Kingdom of Hungary, and the railroad system of that country had been built up with Budapest as its central point. When the Roumanian frontier was adjusted under the Treaty of Peace it cut the railroads in Transylvania away from their previous base. In order to focus them on to the railroads of Old Roumania and the Danube ports it will be necessary to build new lines between the large towns as well as further routes between Bucovina and, Transylvania and Moldavia and Transylvania, in order the more efficiently to link up the producing districts of the new territories with the Danube ports, to which they now turn as their natural outlet for export trade. One of the consequences of existing deficiencies in railway routing has been that merchants in Transylvania still look to their previous markets—Vienna and Budapest—instead of Bucharest and the Danube ports, for supplies of manufactured goods. Thus in an economic sense the New Roumania is not yet, and cannot for many years become, an entirely homogeneous whole. With the gradual carrying out of existing railroad construction programmes and their future development for linking up Transylvania and Old Roumania, importers in Transylvania will see the advantages of overseas transport which land bulky goods at the Danube ports where in normal times and with normal efficiency in railroad administration they would be within a few hours of their warehouses.

The facts above mentioned have naturally militated against transport efficiency, but, given proper financial facilities for carrying out the necessary repairs and extensions of the system and the securing of locomotives and material, there is no reason to doubt the ability of Roumanian engineers (who now have the assistance of their *confreres* in Transylvania and the Bucovina) to put the railways into good working order and to administer them efficiently.

River Navigation.

During the last year there has been a slight increase in the number of lighters in the river owing to a few having returned from Constantinople, but the increase is not sufficient to handle available traffic. The insufficiency of both lighters and tugs would have been evidenced much more clearly during 1921 had it not been that the water in the River Danube was at so low a level that navigation was carried out under peculiarly difficult conditions. The low level of the water due to the drought in Central Europe prevented a good deal of cargo being carried down the river to Braila for shipment, and thus this natural cause worked in company with the mediocre harvest and the Government restrictions against any substantial increase in grain exports.

The Czecho-Slovak Explosives Factory has increased its capital and has acquired a site near Paradubice, where, in co-operation with an English company, a powder factory and an electric motor works will be started.

H. M. Agent and Consul-General at Tangier states that a Bill has been read in the Spanish Parliament by the Minister of Finance, which authorises a supplementary credit of about 60,000,000 pesetas for public works in the Spanish Zone of Morocco. Of this sum it is proposed to allocate 25,500,000 pesetas to the Tetuan-Alcazar Railway.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.
(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade. 35 Old Queen Street. S.W.)

Egypt.

Cement.—The General Manager, Egyptian State Railways, Telegraphs and Telephones, Cairo Station, invites tenders for the supply of 800 metric tons cement. Copy of the conditions (price 200 millièmes) may be obtained at the Office of the Administration's Inspecting Engineer in London. July 25.

Lift-Bridge.—The Inspector of Irrigation, First Circle, Savoy House, Cairo, invites tenders for the construction of lift-bridge on screw piles, Bahr el Baqar Drain, Kilom. 26.1. Approximate cost: L.E. 1,050. July 25.

Stationery.—The Administration of the Egyptian State Railways, Telegraphs and Telephones, Cairo, invites tenders for the supply of stationery, including writing ink; duplication and stamping ink; stamp-pads; carbon paper; pencils; pen-nibs; penholders and pencil holders; erasers; envelopes; filing materials; duplicating machines, etc., materials; inkwells and miscellaneous office requisites. Tenderers must be represented in Egypt. July 27.

Pumps.—Tenders are invited by the Director-General, State Domains Administration (Commercial Service), for the supply of two centrifugal pumps of 14in. and 16in. July 25.

Pumps.—Tenders are invited by the Director-General, State Domains Administration (Commercial Service), for the supply of four hand fire pumps. July 20.

Lathes, etc.—Tenders are invited by the Superintendent, Government Press, Bulaq, Cairo, for the supply of a lathe and of a paper cutting machine. August 1.

India.

Screw spikes, web, cable, etc.—The High Commissioner for India invites tenders for the supply of:—1. Steel Screw spikes for rails; 2. Mild steel hoop; 3. Web, hemp, straining web, worsted, grey; 4. Varnishes of various descriptions; 5. Cable, underwater, unarmoured, single wire, brass taped, C.P.; 6. Cable five wire, V.I.R., insulated and lead sheathed; 7. Braided wire for crossings over power circuits; 8. Steel strip for chargers. Tenders close on July 7 for Nos. 1 and 2, on July 14 for Nos. 3 to 7, and on July 21 for No. 8.

Railway requirements.—The East Indian Railway Company invite tenders for the supply and delivery of steel material, wrought iron, galvanised steel work July 5.

Bridgework, deck spans, telephone apparatus, portland cement, and linen machine thread.—The High Commissioner for India invites tenders for the supply of:—1. Bridgework, deck spans:—30 feet spans, 44; 60 feet spans 8. 2. Automatic telephone sets desk 230; Wall 100. 3. Cords for telephone switchboards, etc. 12,500. 4. Cells of various descriptions for accumulators 1,180. 5. Portland cement 2,585 casks. 6. Thread, linen, machine 20,080 caps and 80,000 reels. Forms of tender may obtained from the Director-General, India Store Department Belvedere Road, Lambeth, S.E.1, and tenders are to be delivered at that office not later than 2 o'clock p.m. on Tuesday, July 18, 1922, for No. 1, and on Friday July 21, 1922, for Nos. 2 to 6.

Bulgaria.

Brake Blocks.—A despatch has been received from the British Vice Consul at Sofia transmitting a copy of the specification, general conditions, etc., governing a call for tenders for cast-iron brake blocks. The estimated cost is 1,690,504.50 leva, including delivery to frontier railway or interior railway or c.i.f. Black Sea or Danube Port. A deposit of 5 per cent. must accompany tenders. July 10. (D.O.T.)

Grinding Wheels.—The Directorate of Bulgarian Railways and Ports invites tenders for the supply of grinding or abrasive wheels. Delivery is required in 3½ months. Quotations are required frontier or interior station, or c.i.f. Bulgarian Black Sea or Danubian Port. The import duties will be paid by the Directorate of Bulgarian Railways. A deposit of 5 per cent. is to be made with the tender. The usual terms of payment for Bulgarian contracts are:—One-half against shipping documents (the contractor undertaking to give a bank guarantee against this sum which will be freed on arrival of the material in Bulgaria) and the remainder after arrival and acceptance of the material in Bulgaria. The special conditions include the following—(1) The wheels must be made of the hardest material, bound together by means of special cement; (2) The hard material must be of the nature of Canadian Corundum, Carborundum, or a similar hard substance. The wheels must be either "natural," *i.e.*, such as Corundum, or artificially produced in electric furnaces, such as Carbonite; (3) They must be suitable for use either dry or wet; (4) Tenderers must furnish a certificate from some railway administration to whom they have already supplied similar stocks. Representation by an agent in Bulgaria is desirable. July 14. (D.O.T.)

The Prague City Loan recently issued in New York to the amount of 7 million dollars was fully subscribed in less than one hour from the opening of the subscription list.

NOTES OF THE WEEK.

The Near Eastern Settlement.

The Italian Foreign Minister has brought his fortnight's visit to England to a conclusion, and is responsible for the statement that no definite decisions have been reached in his interviews with the Prime Minister and the Earl of Balfour. As far as the Near East is concerned, it is difficult to decide whether we should welcome or regret the negative result. The point of view depends entirely on the purpose of the visit. An Allied conference regarding the Near East is due to take place towards the end of the present month, and it was feared in some quarters that the main object of Signor Schanzer's visit was to enable Great Britain and Italy to offer a united front to the Conference. Inasmuch as Italy's attitude on the subject of the Near Eastern settlement more nearly approaches France's than that of Great Britain, her support for the British policy could only be obtained at a price. It was the possible price that caused anxiety, and, as things are, we are left in uncertainty as to whether the price was too high for the British Government, or whether the Italian Foreign Minister rejected the overtures. In the meantime any possible settlement of the Turkish question stands postponed until the next Allied Conference.

Balkan Development.

It is necessary to insist in season and out of season that by itself no country in the Balkans can hope to do itself full justice. The development of each is bound up with the prosperity of the Peninsula as a whole; and for this reason we urge continually in these pages the wisdom of burying the hatchet and the cause of a political understanding and an economic union between the various Balkan States. The main obstacle is Bulgaria, or rather the suspicion, for the most part baseless, that her neighbours entertain of Bulgaria. It will, no doubt, pass in time; but there are evidently a number of people who consider it to be their duty to do all that they can to prevent the suspicion from dying out. The Bulgarian Prime Minister has again given a spirited denial to the various charges brought against Bulgaria. "Every three months, according to the season," he states, "we are sent to Moscow or to Angora . . . I declare categorically that we are no more the Allies of the Bolsheviks than of the Shah of Persia."

Bulgaria and her Neighbours.

M. Stambolisky denied also that his Government was making common cause with the Communists of its own country. If Bulgaria were guilty of the charges brought against her, she would deserve to forfeit the good will of the Allies for all time. But if, as there is every reason to believe, she is trying to make good according to her lights, it must be particularly exasperating to have false charges repeatedly brought against her. It is true that all is not well in Bulgaria; but her troubles are of a domestic order, and the present Government needs to be more receptive of advice both from foreigners and from Bulgarians. The path of reform within, however, can only be hampered by the spreading of tendencious reports abroad, which must make the Bulgarian Government inclined to argue that, if it is never going to be trusted, there is little advantage to be gained from running straight. So long as the false charges are confined to the Balkan Press not much harm would be done; the British Press for the most part ignores them, but their reproduction in one daily paper as authoritative statements gives them a fictitious value.

Bolshevism in Belgrade.

The Belgrade Police have on several occasions shown much ingenuity in unearthing plots of a communistic or Bolshevist character, and their efforts have been well supported by the stern way in which the authorities have dealt with the plotters who have been brought to justice. It is now announced that the Police have made an arrest which seems to indicate that they are on the track of some of the chief agents in Belgrade of the Bolshevists. A short time ago a Bolshevist agent in Vienna sent to a grocer of the Topchider district a cheque for 300,000 dinars, and the recipient, who was arrested as soon as he cashed it, has failed to give a satisfactory explanation of the transaction. It may be that he will be able to do so later on, for he is detained for further examination; but it is a good sign that the Police are keeping so close a watch on the channels through which Bolshevist gold finds its way to Belgrade; and it is to be wished that in similar cases in other countries similar action would be taken as promptly.

Egypt's Western Frontier.

The Western boundary of Egypt has never been clearly fixed, chiefly, no doubt, because it runs through a desert land where only the Bedawi would find it possible to support existence. After the Italo-Turkish war, however, the question assumed some importance, chiefly by reason of the value of Sollum, and negotiations between Italy and Great Britain, acting on behalf of Egypt, took place, Now it has cropped up once again, and Egypt is shortly to enter into negotiations with Italy on the subject. Great Britain is doubtless less closely interested in the question than she was before

Digitized by Google

she granted Egypt her independence; but she is not likely to have lost all interest in it, and will certainly watch the negotiations closely, even if she takes no active part in them.

The Mesopotamian Mandate.

The Egypt Parliamentary Committee has made itself responsible for a letter addressed to the Prime Minister on the subject of the detention of Zaghloul Pasha in the Seychelles Islands. The signatories are not identical with the Committee, and it may be inferred that on the subject of the letter the members were not unanimous. What is of interest is that the signatories, by implication, side with the Egyptian extremists against the present Egyptian Ministry, of which, quite unjustifiably, the letter states that it was "in effect selected and is now controlled by the British authorities." In other words, the professed anxiety for the health of Zaghloul Pasha is prompted by the desire to put a spoke in the Egyptian Government's wheel, and to see the country once again plunged into unrest, entailing a further charge on Great Britain for the restoration of order. If any of the signatories to the letter, or Mr. Lawson, who put a question in the House of Commons on the same subject to the Colonial Office, had had recent personal knowledge of the situation in Egypt, they would be aware that only a small body of extremists is seriously exercised over the absence of Zaghloul Pasha. It would be unfair to the Government to allow him to return at this stage. As for the terrible warnings in regard to what will happen if he should unfortunately die in the Seychelles, we seem to remember hearing similar forebodings in connection with the death of a certain Irish Mayor in an English prison, none of which were realised.

The Future of the Sudan.

An important statement in regard to the future of the Sudan was made by the Earl of Balfour on July 5 to a deputation representing the Empire Cotton Growing Corporation and others interested in the textile industries of Great Britain. The acting Foreign Secretary informed his visitors that the temporary difficulties of the Sudan Government which had necessitated a momentary suspension of the work on the Blue Nile dam had now been surmounted, and that work would be resumed this autumn as soon as the fall in the flood made active operations possible. Lord Balfour also indicated that the work would be resumed under conditions more satisfactory than those under which it had been begun. The difficulties that caused the suspension of the construction of the Blue Nile dam were, briefly, that the Treasury refused to guarantee a further loan for the purpose, and that the Sudan Government was unable to raise the necessary money itself owing to the uncertainty regarding the future status of the Sudan. Accordingly the implication in Lord Balfour's statement is either that the Treasury is now prepared to guarantee a further loan, or that the status of the Sudan is about to be settled in the only satisfactory way. But, as the Treasury would not be likely to guarantee a further loan, unless the Sudan were going to remain wholly within the British Empire, the Sudan can await a more explicit announcement with composure. Tenders have been invited from five or six firms for the resumption of the work of construction, which has hitherto been in the hands of a local contractor.

Egypt and Zaghloul Pasha.

In reply to a question in the House of Commons, Mr. Winston Churchill has stated that Great Britain had no chance whatever of securing freedom from the Iraq Mandate, and that she was bound in all her dealings with the King of Iraq to take her stand upon that international foundation. It would be interesting to know by what method of reasoning the Britlsh Government arrives at this verdict. The Mandate system is based on the Covenant of the League of Nations, Article 22 of which lays down as a principal consideration that the wishes of the community should be consulted in regard to a choice of a Mandatory. The people of Iraq can hardly be said to have been consulted in this matter, if they can show that they do not approve of the Mandate idea at all. But, as a matter of fact, the Covenant leaves the territories to be subject to the Mandate system vague; they are termed "certain communities formerly belonging to the Turkish Empire," and were certainly intended originally to include Armenia, which is now left out of the picture, because no Power would take up the Armenian Mandate. Further, as the Treaty of Sèvres has not yet been ratified, there is nothing to prevent the Powers from modifying it, as indeed they intend to do. In regard to Iraq, there is nothing sacrosanct about the idea of Mandate, and if we can reach the goal we have in view by means of a Treaty which will keep the country at peace, whereas enforcement of the Mandate may mean permanent unrest, in the name of common sense let this be done.

Persia and Advisers.

We mentioned a few weeks ago that Persia had applied to the United States Government for a Financial Adviser. According to a correspondent of the *Morning Post*, it is now reported on good authority that the request has been granted, and an Adviser is to be appointed. It is to be hoped that the report is a true one, for Persian finances are in a very bad way indeed, and it is safe to say that they will only continue to go from bad to worse until they are taken in hand by somebody unaffected by the evil traditions of the past, and looking on the problem from a genuinely disinterested standpoint. Even so, the Adviser, whoever he be and whencesoever he comes, will have before him a task to tax the powers and patience of any man. Mr. Morgan Shuster tried, and failed; and though some of the difficulties that confronted him have been removed, fresh ones have arisen to take their place. If he is to succeed, the new Adviser will have to possess not only financial talent of no mean order, but a real genius for reading character and handling men. It would be difficult to say whether he is likely to find his greatest difficulties with the Democrats, who want the Millenium to dawn at once on Persia—and apparently have their own ideas as to what should constitute the Millenium—or with the Aristocrats, who have been accustomed so long to having their own way—even in matters financial.

A Period of Expectation.

As often happens at this season, nearly every interest in India seems to be watching anxiously for indications of what the autumn shall bring forth. The Revolutionaries are quite obviously nonplussed, and have postponed their new declaration of policy until the sky is clearer. Constitutional politicians are talking about beginning to educate the electorate when the rain goes over, but they also appear to be rather hazy as to the proper course of study for their pupils. The central administration is waiting for Lord Inchcape, and some of the provinces, but by no means all, are sharpening little hatchets of their own, a process which at least gives a respite from the pressure of new schemes. Merchants

Digitized by Google

and peasants are looking mainly to the latter end of a monsoon which has made a modest beginning ; and even the most hostile critics of the cable-service must admit that its present dulness is an accurate reflection of the surface of Indian life. We hope that the respite is being devoted to hard thinking, unfashionable as that occupation has become, and that the autumn yield of ideas and inspirations may prove to be more serviceable than the crops which India has gathered in some recent seasons.

Forecasting the Monsoon.

The text of the Memorandum on monsoon rainfall proves to be rather more encouraging than the summaries which appeared in this country. The North West is led to expect about the usual quantity of rain, though perhaps somewhat late in the season, the bulk of the Peninsula is likely to be thoroughly wet, and there are no definite grounds for forecasting a serious deficiency elsewhere. The remarkable feature of the memorandum is not to be found in its predictions, but rather in the methods by which they have been reached. We can look back to the time when the monsoon was treated mainly as a local phenomenon, but now each region of India must keep its eyes fixed on places where formerly no connection was suspected. The Peninsula for instance is directly interested in the last year's weather of Java and Iceland, as well as Siberia; the North-West looks mainly to Chile and the Cape, while Upper Burma is intimately related to the Seychelles. Optimists may well be tempted to think that the observers are at last on the track of the great annual secret which has brought life, and also death, to India from the beginning; but it is better for the present to be contented with the fact that almost every year shows an advance in predicting the effects of causes which still remain essentially obscure.

Retirements in the Indian Service.

Lord Peel's statement on the terms of retirement of officers whose conditions of service have been changed by the constitutional reforms comes rather late in the day;but we trust it may have a useful effect in mitigating the exceedingly unpleasant feeling which his predecessor's methods aroused in India. Nobody questioned either the justice or the wisdom of allowing officers to withdraw from duties they had never undertaken to perform, and the terms originally offered were not inequitable in themselves, but the manner of their presentation, and the pettifogging restrictions they contained, were altogether unworthy of the occasion. The changes announced by Lord Peel are not individually great, but taken collectively they mark a considerable approach to the ideal of an offer by gentlemen to gentlemen, which was in the first instance ignored. The initial mistake produced both disgust and distrust, and we fear that it induced some officers, who could ill be spared, to send in their papers at once, lest something worse should be in store. Lord Peel may, or may not, be justified in hoping that some of these applications may now be withdrawn, but, whatever the result, his attitude should receive cordial recognition.

THE WEEK AT HOME.

Monday Evening.

The Irish War.

So far as Dublin is concerned, the war is over. The rebels have capitulated, the Four Courts of Justice were destroyed, most of the hotels in Sackville Street were burnt out, and other damage was done. About sixty people were killed, and several hundreds were injured, mostly spectators ; the rebels suffered very little loss, either walking out of the back door when the field of battle—*alias* hotel—got too hot or surrendering when they could not get away. One rebel leader, Cathal Brugha, was killed—he will probably be regarded as a martyr by the Republicans. Mr. de Valera escaped.

But with Dublin safe, the rest of Ireland has to be pacified. The most conflicting reports are being received, and some sinister rumours are in the air ; these, however, may be partly caused by the censorship which the Provisional Government has instituted. Things have been happening at Cork and elsewhere, but nobody knows exactly what things.

The Provisional Government has evidently at last made up its mind to govern, and it clearly recognises the menace of the situation, for it has issued a national call to arms. It is not known how this is being responded to. But now that the Republicans have taken to the hills, Ireland seems to be in for a long and trying period of guerilla warfare, which will still further delay its economic recovery. After the events of the last fortnight, there can hardly be any question of a reconciliation between the Collins-Griffith Administrationand the de Valera-ites.

Tariff and Other Troubles.

There has been a crisis—a very little one—at Westminster, on the obscure question of fabric gloves, that is to say, cotton gloves. It is the old question of Tariff Reform and Free Trade, and has brought to the front the fiscal differences between Coalition Liberals, who are Free Traders, and Conservatives, who are mostly Tariff Reformers. However, in this case objection to the duty was taken by the Lancashire Conservatives, who are Free Traders. A deputation headed by Lord Derby was received in Downing Street, and Mr. Lloyd George was able to promise that the obnoxious duty would be " reconsidered."

The Independent Liberals are making a great deal of the conflict of interests, as is only right and proper from their point of view. But no such thing as a Coalition split is in sight, and the Government is not particularly perturbed, as nobody wants to force an election, and least of all the Wee Frees, who so furiously rage in print.

Rents, Landlords and Tenants.

A question of much more general interest, and one of very great difficulty, is the Rent Act which expires next June. Under that act the landlords cannot raise rents beyond a certain figure, which they complain (I believe justly) is unremunerative ; the tenant has something like a perpetual lease of the premises until he dies, as he cannot get accommodation elsewhere, building not having caught up the demand for houses by a very long way. If the Act expires, tenants are afraid they will be subjected to extortionate increases of rents, and they in turn will be helpless ; if it continues as it stands, landlords will dispose of unremunerative property, the present system of selling houses instead of letting them will be perpetuated, although it is a nuisance to everybody, and building will be still further restricted. Faced with this difficulty, the Government cannot make up its mind, and has referred the whole matter to a Committee of Inquiry.

A Wet Summer.

Only a few weeks ago the weather prophets were shaking their heads over the drought, and predicting disaster. Our climate seems to have taken the hint, for it has done sittle but rain since then, and blow hard, and generally make an exhibition of bad temper and bad manners. The Water Boards are naturally happy, and the farmers do not mind very much, for the rain has been soft, and has not beaten down the crops, while it has helped the roots ; but sport has been ruined. The Wimbledon tennis tournament, in spite of the crowds, was spoilt, and Henley, according to the brave spirits who ventured there, was ghastly. A punt is paradise on a fine day, but when it rains all the time the most beautiful place on the river is horribly uncomfortable.

Digitized by Google

The failure of the summer to appear will rather reconcile us to the docking of summer time, which is to be curtailed by some days in September, and not to start next year until the middle of April instead of late March, as was the case this year. Farmers and other foolish people who make a habit of getting up early in the morning are understood to object to summer time, but it is a great convenience to the townsman, and the agitation to abolish it altogether is not likely to be successful. But it is true that one can have too much even of a good thing, and summer time in March is really rather ridiculous. The compromise promises to work well.

St. Paul's in Danger.

St. Paul's Cathedral is appealing for a hundred thousand pounds for immediate repairs. The pillars and other masonry supporting the great dome are in a serious condition, and the dome itself is endangered. Repairs are already being carried out in another part of the building, but these are to be suspended while the more urgent work is attended to, as soon as sufficient money is in hand. It is hoped that the daily services, which are so beautifully rendered that they attract a large congregation every morning and afternoon, will not be suspended. The actual endowment of the Church is very small, and quite inadequate to present purposes.

But at this present moment it is difficult to raise money for church repairs. The Westminster Abbey appeal two years ago was heartily responded to, but then the Abbey is unique. But Lincoln, which asked for £50,000, has only received £15,000, and other appeals have failed altogether. It is being suggested in some quarters, therefore, that the Government should make a grant from national funds to St. Paul's, as it is in effect a national possession.

Constitutional Labour.

Labour has been holding its conference at Edinburgh, and the proceedings, although less lively than usual, have been interesting and not uninstructive. The plea for a capital levy was rejected. The argument in favour of a reduction of interest on the war loans was voted down. Most significant of all, the demand of the Communists for affiliation was refused by an overwhelming majority. The extremists were very vocal, but they got short shrift. In votes they were hopelessly outclassed, and so far as one could judge from the rather jejune reports of the speeches, they had very much the worst of the debate as well. Communism was never strong in this country, but it is evidently a steadily declining force.

The Trade Revival.

A number of new industrial issues are about to be launched, which is an indication that, in the opinion of the City, the investor will now sit up and take notice of this kind of stock. The utter stagnation of trade has killed the industrial market during the last eighteen months, and values have shrunk steadily; now we may hope that they will begin to rise again. Several industries are showing signs of revival, and engineering in particular is looking up, large contracts having been secured against keen American and German competition. This is particularly satisfactory, as although the depression on the American exchange slightly helps our export quotations, the German exchange gives our continental competitors an enormous advantage. On the whole, the prospects for the coming winter are considerably better than the last.

Publishing and printing, too, are looking up, as the result of an agreement having been reached to reduce costs; fortunately by arbitration, instead of the cruder method of a strike. There has been much unemployment of late in these businesses, in consequence of the excessively high cost of producing books, which has made the publishers cut down their lists as much as possible. Young authors will soon be able to submit their manuscripts, however, with some prospects of success. There must be a vast number of unpublished novels, every one of them masterpieces in the opinion of their compilers, on the market, and these will soon be going the rounds again.

Spirit Revelations.

Psychic research has received a bad shock. The more credulous spiritualists have relied a great deal on alleged spirit photographs of the dead, which were produced with an air of mystery and were said—by the believers—to be convincing proofs of the truth of their doctrine; but the Society for Psychic Research has now demonstrated, by an ingenious trap, that the artist substituted his own plates for those which were provided by the Kodak Company, and it therefore seems quite clear that the "spirits" were photographed before the sitting at which their presence was requested. At the actual sittings a hymn was sung, and prayers were said; it is to be hoped that this blasphemous deception will now cease.

The Week's Books.

"The Diary of a Journalist: Later Entries." (John Murray) by Sir Henry Lucy makes several curious additions to our knowledge of Victorian and Edwardian history. There is the story, for instance, of Mr. Asquith dining with the Lucys in 1890; he was "at that time a private member with no visible prospect of promotion even to a Lordship of the Treasury"—the Salisbury Government was still in office—but the young lawyer startled his host and Lord Randolph Churchill, another guest at the table, by remarking, "I mean some day to be Prime Minister." In eighteen years the prediction was fulfilled.

Another story that one likes even better is that of Lord Rosebery after his defeat in 1895. "Now Gladstone is gone," said a friend, "you are, in spite of the peerage, our only leader." "Leader!" echoed Lord Rosebery scornfully, "What the Liberal Party wants is not a leader, but a football."

A curiously interesting work is "The Memoirs of an Ambassador" (Allen & Unwin) by Freiherr von Schoen, the German Ambassador at Paris at the outbreak of war. Naturally he takes the German point of view—M. Poincaré is the villain of the piece—but the invasion of Belgium was too much even for him. It was "both wrong and dishonourable; it exposed us to the contempt of the world, and furnished our enemies with weapons with which they fought us no less effectively than by force of arms. Crushing a weak country, protected by sacred treaties, is a crime against which the world's conscience revolts, and for which it demands reparation."

"The Life of the Spirit and the Life of To-day" (Methuen) is another volume of mystical interpretation by Miss Evelyn Underhill, whose earlier books on the subject are well known. A quotation best conveys its quality: "It is a life of which the fundamentals are given by the simplest kinds of traditional piety, and have been exhibited over and over again by the simplest souls. An unconditional self-surrender to the Divine Will, under whatever symbols it may be thought of; for we know that the very crudest of symbols is often strong enough to be a bridge between the heart and the eternal, and so be a vehicle of the Spirit of Life."

THE NEAR AND MIDDLE EAST.

From Our Own Correspondents.

EGYPT.

Cairo, June 30.

Assassins' Victims.

A memorial service was held on Sunday last at the Garrison Church, Mustapha Pasha, Alexandria, in memory of the late Field Marshal Sir Henry Wilson, which was attended by the High Commissioner and his staff, and on Sunday next a similar service will be held at All Saints' Church, Cairo. The holding of these services has raised the question why similar services were not held at the Parish Church of the community in memory of the Englishmen who were recently murdered by unknown assassins in broad daylight.

The Cairo City Police.

Under ordinary conditions the transfer of the seat of Government to Alexandria might be expected to create a respite in the activities of those responsible for public security in the capital. As a matter of fact, however, beyond removing the necessity for providing protection for the King and his Ministers, the transfer really means very little difference in the work or in the anxiety it entails. Indeed, few people realise what a tremendous strain has been put during the past three years on the Cairo City Police, and particularly on its officers, headed by Russell Pasha.

Most men in official positions have their busy and their slack time of the year, but in the case of the Police the busy, *i.e.*, the anxious time, like the poor, has been constantly with them. The duties of Police Commandant have become multifarious during the past three years. Not only has Cairo increased enormously in area, but as far as public security is concerned an acute situation has constantly existed. When it has not been a case of looking after demonstrations or strikes, the Police have been called upon to take special precautions for the safety of the general community and to watch over the various political organisations which are known to exist and to be actively working against orderly Government; and when to these there is added the fact that practically the whole of the machinery through which the senior police officers have to work is Egyptian, one begins to appreciate something of the stupendous task with which Russell Pasha and his officers have to cope and the grit and endurance that they have displayed.

The Foreign Officials' Compensation.

Important developments took place this week in connection with the question of compensation to foreign officials. There are a certain number of officials whose position has become urgent and who cannot fairly be allowed to suffer further prejudice by waiting until an Egyptian Parliament meets. Since Sarwat Pasha has offered to deal in a generous manner with cases of any officials who have been prejudiced that arise in the near future, the High Commissioner, in order to assist these urgent cases, has arranged to receive applications to retire from such officials, and after deciding whether their claims are justified, he will take the matter up with the Egyptian Government. The Association of British Officials which communicated this announcement to its members, informed them that while it did not wish to stand in the way of any individual officials, nevertheless, as a body, it could not accept this temporary arrangement, since it still considered that in the interest of the general body of officials it must adhere to its original demand, *viz.*, a scheme embodying the right to go and establishing a scale on which compensation should be paid.

The main criticisms of the latest proposals are that no basic scale is to be adopted, and that officials will have to prove what prejudice they have suffered. The absence of a scale naturally makes it impossible for an Association which represents the body of officials to depart from its position in that respect; while the admitted prejudice which the introduction of the new régime and the Egyptian Government's latest policy have caused to the future of every foreign official in the service in itself entails the admission of the right to go, and, provided the interests of the Egyptian Government in regard to a too rapid departure are safeguarded, the officials should not be called upon in each case to show the particular damage they have suffered.

The position of the non-pensionable officials has suddenly become acute. Many of these men have been many years on contract, some of them as many as thirty years. Their claim for consideration for special indemnity in the event of dismissal was considered by the British Government and the Official Delegation when in London last year, and both sides put forward schemes which provided for such indemnification. During the past fortnight, however, the Egyptian Government has suddenly served notice of dismissal on a number of these non-pensionable officials, including several with long service; and has not only not awarded them any special compensation but has cancelled what remained of their contracts, giving them short notice varying from one to three months. Some of these officials are actually on leave at the present moment, so that their dismissal will take place before they are due to return to the country. This action has aroused no little indignation, particularly amongst the non-British colonies, who are most seriously affected; and the French, Italian and Greek Committees have appealed to their Diplomatic representatives for protection.

The Sudan Again.

A stupid agitation has been raised in Egypt with regard to the case of an officer (a Sudanese) of the Egyptian Army who has been brought before a Court Martial in Khartoum and condemned to imprisonment for having published, or made public, statements of a political nature affecting the question of the Sudan. The vernacular press has been quick to take up the question as another proof of the perfidious attitude of the British authorities in the Sudan, while the Egyptian Bar has been loud in its protest at the refusal of the Sudan Government to allow Egyptian barristers to go to Khartoum to defend this officer in his appeal against his sentence. While the championship of this officer's case reflects a glaring ignorance of the strict discipline necessary in all military organisations, which permits a member thereof to hold whatever political views he likes but forbids him to give public expression to them, there is every reason to believe that the underlying motive for this campaign is neither love for the Sudanese, nor thirst for justice, but merely the desire to find another stick with which to beat the Cabinet.

IRAQ (Mesopotamia).

Baghdad, June 22.

Lord Apsley's Visit.

A visit of Lord Apsley to Baghdad on behalf of the *Morning Post* has given rise to interesting events and excited discussions of late. On account of the anti-Jewish tone of many of that paper's articles and of the support which the paper has given to Arab claims in Palestine against those of the Zionists, there were many who appeared to assume the role of champion of the Arabs in Baghdad although there is no Zionist menace

SCHOOL OF ORIENTAL STUDIES.

Digitized by Google

here. A garden party was organised for him at Kadhimain where he met a large number of the politically minded; but he refused to be drawn on the subject of Iraq, though he let them see plainly that he had formed very definite ideas regarding the Arabs' ability to rule their own country without assistance. His speech was reported in full in the vernacular papers, and answers to it have appeared since his departure. His somewhat plain speaking has, however, on the whole made a good impression.

Political Rumours.

Politics have not been greatly to the fore of late. Rumours of the impending publication of the Treaty are prevalent, and a very strong report got abroad a day or two ago that King Faisal had actually signed the Treaty. There appears to be no truth in the rumour, though there is reason to suppose that he will sign very soon. It was also noised abroad that the British Government had consented to give the Iraq Government a big loan, but this, too, appears to be unfounded, and the rumour has died away.

In this connection it may be mentioned that there is a very big discrepancy betweeen the receipts and expenditure in this year's budget estimates, and though a committee is now sitting to endeavour so to cut down expenditure as to make the budget balance, it is considered very doubtful whether it will be able to do so. Should it be successful, the chances of the Government's obtaining a loan for reproductive capital expenditure would be greatly improved.

The Views of Mr. Gordon Harris.

Mr. Gordon Harris who, as was reported a short time ago, has been in this country on a short visit from Egypt to consider irrigation questions and to make suggestions regarding future policy, has left Baghdad on his way back to Cairo, though he is staying for a day or two at Amarah on the way. Interviewed by a representative of one of the Baghdad vernacular papers he is said to have declared that the future of this country lay in an extension of irrigation and the development of cotton cultivation; while as to irrigation he is said to have urged the extreme importance of completing the Habbaniyah Escape as soon as possible. He will write his report on his return to Egypt, and its publication will be awaited with interest.

Two Officers Murdered.

News was received a day or two ago of the murder of two British officers near Bazian in the Sulaimania division. They were Capt. S. S. Bond, M.C., Assistant Political officer, Chamchamal, and Capt. R. K. Makant, M.C., Commandant of the Sulaimania Levy. It appears that these two officers were proceeding to a conference with Kerim Fattah Khan, the chief of the Hamawand tribe, and on arriving within a short distance of the meeting place were shot in the back at close range. The loss of these two officers is a very heavy blow, and it will not be easy to fill their places. Both had served in the Sulaimania division for some time and knew the country and the language thoroughly, while their ability and industry had earned for them the esteem of all who came into contact with them. A large reward has been offered for the arrest of the murderers, but, judging from past experience in such matters, it is very doubtful whether they will be given up.

Tribal Unrest.

Tribal unrest is again reported from the Hillah and Muntafiq divisions, and in the latter division inter-tribal fighting appears to be the order of the day. It has been suggested that these quarrels are the outcome of the efforts of the effendis to set tribe against tribe in order to break up, if possible, the tribal party which has of late made itself felt in politics. Whether this is actually the case is not yet known, but it is doubtful whether these quarrels are anything more than a mere settling of scores which all tribes indulge in more or less periodically.

Sunday Concerts.

The King and the High Commissioner were present at the usual Sunday afternoon band concert at the Race Club on Sunday last. The full band of the East Yorkshire Regiment performed at the Race Club for the first time, and made a very good impression. These Sunday afternoon concerts have become a feature of Baghdad social life and are much appreciated.

New Railway Line.

The new branch railway line from Khan Haswa to Musseiyib and Hindiyah Barrage is now under construction, and it is expected that it will be completed as far as Musseiyib by the end of this month and to the Barrage by the middle of July. It is hoped in the near future to carry the line across the Barrage and on to Kerbela.

ROUMANIA.

Bucharest, June 23.

Extraordinary Parliamentary Session.

On Monday, June 19, Parliament was convened for an extraordinary session—to last for three days only—for the following purposes: first, to ratify the engagements taken abroad by M. Vintila Bratianu, Minister of Finance, in connection with the conversion of Roumania's floating debt abroad; and secondly, for M. Ion Bratianu, the Prime Minister, to expound the activity of the Roumanian Delegation at the Genoa Conference.

In keeping with their recalcitrant attitude, the Opposition, with the exception of the representatives of the Minorities, failed to attend the sittings.

The King's Message, read by the Premier, touched only on the financial question, saying that the "ordinary budget was balanced by the vote given at the end of the last session"; while in order to improve the financial situation "the necessary revenues for the payment of the coupons of the External Public Debt have to be ensured" and therefore the Government must in the first place think of the consolidation of the floating debt, for which it is asking Parliament's authorization. [A summary of M. Vintila Bratianu's speech will be found in our Commercial and Financial Section.—Ed.]

Digitized by Google

Roumania's Foreign Policy.

M. Bratianu's speech on Roumania's foreign policy at Genoa, dealt chiefly with the following two questions :

(1) That Roumania was opposed to the bringing into discussion of the Minorities question following on Hungary's demand ; Roumania having declared that the raising of this question by whomsoever would be looked upon by her as an unfriendly intervention. Discussion of it was in consequence prohibited.

(2) As to the policy towards Russia at Genoa he defended Roumania's three vital interests. These were : (1) Not to admit any political relations with the Soviet Government, until Roumania's frontier on the Dniester was secured against aggression. (2) The restitution of Roumanian treasure, which Roumania confided to Russia at a moment of distress for the common cause ; at which time the Roumanian Army by its resistance prevented the enemy from invading and devastating Southern Russia. The return of this Treasure constituted therefore not only a State obligation, but also a moral one. (3) Interdiction of foreign interference in Roumania's home affairs, in keeping with the traditional attitude observed by her at all times towards other countries. Therefore no propaganda nor aggression from across the Dniester would be tolerated. Roumania was prepared to sign an indefinite and not a seven months' pact of non-aggression, having no interest whatever to disturb the peace, but on the contrary would do her utmost to maintain it.

The Hague Conference.

M. Diamandi, Roumania's representative at the Hague Conference has been instructed *inter alia* not to admit in any circumstances the resumption of the discussion of Roumania's rights over Bessarabia, which question was definitely settled at Genoa. He has furthermore been instructed to insist that the Soviet Government should formally bind itself to return all the valuables deposited for safety in Moscow during the 1917 retreat of the Roumanian Army. Concerning the other questions which will form the subject of the discussions at The Hague, M. Diamandi will strive to be in perfect accord with the British and French representatives. The delegates of the other Little Entente States have apparently received similar instructions.

M. Take Jonescu's Death.

The announcement from Rome of M. Take Jonescu's death was received with general consternation, as he had previously been reported as having recovered from typhoid fever, and was expected to return here soon to resume his political career. His disappearance from the political arena is deeply regretted, by friends and his former adversaries alike, and the gap will not easily be filled. His vast experience in home and foreign politics will be greatly missed, especially in these troubled times. It will be remembered that he was an ardent advocate from the beginning of Roumania's entry into the War on the side of the Allies, and his endeavours bore fruit in the long run. Also quite recently, the creation of the Little Entente, which has now proved to be an important factor for the preservation of peace in this part of Europe, was to a very large extent due to him. His remains are expected to arrive soon, and he will lie in state at the "Athenaeum." He will be buried at Sinaia, close to the Monastery Chapel there, in accordance with his wish, expressed a few days before his death.

Komitaji Incursions.

Following on the meeting held in Belgrade, on the occasion of the Royal Wedding, by representatives of Serbia, Roumania and Greece, it was decided to send a collective note to the Bulgarian Government, calling on it to put a stop to the incursions on the three countries' territory by Bulgarian bands, and holding the Bulgarian Government responsible for any future violation of territory. The Roumanian Government was entrusted with taking the necessary action in the matter. The Bulgarian Government has replied affirming its good will to safeguard peace and friendship with the neighbouring States, attributing its inability to cope fully with the *komitaji* to inadequate forces imposed by the complete disarmament in accordance with the Peace Treaty, and inviting an international investigation. This reply is not considered satisfactory by the Governments concerned, who contemplate taking action.

YUGOSLAVIA.

Zagreb, June 29.

Uncertain Politics.

There is at present an obscure temper pervading Parliament, and nobody could give a forecast likely to hold good even for a fortnight. Undoubtedly the present situation is weighed down by petty quarrels, small scandals, resignations, political blackmailings, and so on. There is talk of an election, but for the moment neither Radicals nor Democrats are willing to go to the polls, for fear of losing a few or more seats in the next House. Yet feverish preparations and canvassing have already begun, and the Skupshtina is sometimes half empty.

The Loan Bill is also proving to be a greater obstacle than was anticipated by the Government, for even among their own parties there are a good many against the Loan and its harsh conditions. However, there are already indications that the strong hand of M. Pashitch will crush down the opposition, and that the Bill will soon become law.

The portfolio of the Ministry of Interior is still vacant, and all the efforts of M. Pashitch to induce the ex-Minister, M. Marinkovitch, to withdraw his resignation have so far proved vain.

General News.

The carriage conveying the coffin of M. Take Jonescu, the late Premier of Roumania, was met at the Liubliana station by the King and Queen, who laid a wreath on the Roumanian flag with which the coffin was covered.

Owing to the constant raids and disturbances along the Yugoslav-Bulgarian frontier, the Government have decided to proclaim martial law in the eastern part of South Serbia and Macedonia.

CYPRUS.

Nicosia, June 20.

An Important Land Case.

An interesting and important case has just been decided in the District Court of Kyrenia, before Mr. Dickinson, the President, and Dervish Effendi, acting Ottoman Judge. The Government took action to confiscate two blocks of land belonging to Mr. G. L. Houstoun (Laird of Johnston Castle, near Glasgow), who over forty years ago bought land in Cyprus, and has long resided in the picturesque northern district of Kyrenia, where the property is situate. One block consists of about 162 *donums*, or Cypriot acres (about fifty-four English acres), and the other about twenty *donums*. The old Turkish Law provides that arable land, if left uncultivated for three years is liable to confiscation. Under British rule the term was extended to ten years, by a law of 1885. The King's Advocate, Mr. Russell, for the Government, proved that the land had not been cultivated for forty years. The Greek Advocate of Mr. Houstoun, M. S. Christes, on the other hand, showed that trees both wild and cultivated, as well as useful shrubs, grew on the larger plot of land, and he produced a proclamation published some years ago in the *Official Gazette*, stating that lands bearing trees as aforesaid could not be regarded as uncultivated or, in consequence, liable to confiscation. As regards the smaller plot, evidence showed that it had long been used as a playground and for athletic sports, and that latterly Mr. Houstoun had allowed it to be used as a pasture for grazing the flocks of the Town Hospital, without charging any rent. The Court gave judgment in favour of Mr. Houstoun, with costs against the Government.

The matter is being widely discussed, as the Government has been taking proceedings for confiscation in

Digitized by Google

various other places, and their action may be affected by this judgment. Moreover, in all parts where a survey has not been carried out many difficulties arise. The vague title deeds issued under the old Turkish system frequently include far more land (often bearing trees) than the area stated in documents and the books of the Land Registry, and this leads to many complications. Whether the Government will appeal is not yet known.

A Munificent Gift.

Another family of Nicosia, that of M. K. S. Loizides has followed the example of M. Vergopoulos, who recently provided funds for the reconstruction of the Greek Gymnasium which was destroyed by fire. M. Loizides and his wife desired to devote money in memory of their late daughter Helene, whose death was greatly lamented in Nicosia. They are building a large Girls' School in a handsome style, which will be a very worthy memorial. The foundation stone has just been laid in the presence of the Greek Archbishop, Bishops, Abbots, the Hellenic Consul, and the leading citizens of Nicosia.

BAGHDAD MUNICIPAL FINANCE.

We learn from the Imperial Ottoman Bank that the announcement made in Baghdad (and reported by our Correspondent in that city in his letter of March 31) that the Baghdad Municipality had succeeded in raising a loan for the paving of New Street, has not been justified by events. The Municipality has not found it possible to obtain a loan for the paving of New Street or even for the new water scheme.

EGYPT AND COLOUR.

In the course of a lecture delivered (on May 29) before the Royal Institute of British Architects at No. 9, Conduit Street, London, W., Mr. William Harvey described the impression he had received from Egyptian scenery. He said that the pure primary colours of the ancient architecture were absolutely in harmony with the landscape, where strong effects are the rule. The sky stretched up and away for miles, like a wall of blue masonry smeared with a plaster of white light. The scene at sunset, when the Fellaheen marched home with their beasts along the sunbeam paths drenched in golden dust, was a quaint sight. The conventional attitudes in which human beings were portrayed in ancient Egyptian sculptures and paintings, and which seemed so quaint and unreal to an Englishman, had been explained by reference to some religious convention which kept the artist to a certain beaten track. There might be a great deal of truth in this religious explanation, but, in fact, the attitudes drawn in the sculptures hardly needed much comment when seen in their own land. The nature of the country explained them automatically, and the sculptures which had appeared so stiff, forced and unnatural when seen in a European museum became recognisable as intensely naturalistic when viewed in the light of their own surroundings. Egypt was a mud flat intersected with artificially raised lines of embankment for paths and irrigation channels. Consequently, everyone walking along a path was seen in outline silhouetted against a sky of solid blue, and, with the exception of some details of costume, the present inhabitants looked singularly like the sculptures. The resemblance was closest in the case of naked slaves working the shadoof and tilling the fields. Another peculiarity of natural conditions in Egypt which affected artistry and the design of buildings in relation to structure and colour was that the dry air made distant objects seem near. Blue-grey mists would not serve there as here for a common formula for the background colour of the picture, for the colour in the far distance might be bright cream or pink. Aerial perspective, as we understand it in Europe, was either entirely absent or even reversed; the sun-dazzle sometimes making the foreground indistinct and leaving the background comparatively clear. Every object told as a flat plaque of colour inlaid against the colours of neighbouring objects or against the sky, which although a light blue, looked just as solid as anything else in the landscape. These were the climatic conditions which had encouraged certain forms of structure and colour in Saracenic architecture, where the shapes of domes and minarets and of crested parapets had been designed to weave the colour of the sky into the architectural composition.

The Zubair correspondent of the *Times of Mesopotamia* denies that there is any truth in a rumour current in Baghdad, to the effect that members of the Akhwan have been selling in the Zubair bazaars articles looted from 'Iraq tribes.

CORRESPONDENCE.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper

ITALY AND THE DODECANESE.

To the Editor of "The Near East."

Sir,—The powerful oration of the British Prime Minister at Wigmore Hall on the life work of Mazzini interested me much. It was indeed most pleasing to see that the Premier could congratulate Europe on the fact that all the subject peoples desiring emancipation have been liberated within these last years, and that the national unity attained by Italy gives the right of the next nation to be likewise free.

I was also very glad to read that the Italian Foreign Minister, Signor Schanzer, strongly supported the views of Mr. Lloyd George in regard to the noble doctrines of Mazzini.

Naturally, as a Greek and as a representative of the Dodecanese, I have much sympathy with the leanings of Signor Schanzer towards Mazzini, and this encourages me to hope that he will apply the maxims of the great Italian patriot when dealing with the Near East and the subject peoples still yearning for emancipation there.

Such a policy would further the national unity of the Hellenes, would liberate Greece that is still unredeemed, and would restore the twelve Aegean Islands to the Motherland, Greece, a consummation they have so long and ardently desired.

I am, etc.,

MICHAEL D. VOLONAKIS.

London, 6th July, 1922.

"REVOLUTIONARY" TRIBUNALS.

To the Editor of "The Near East.

Sir,—I have so much regard for your excellent paper, that I would like to point out a small error in your Constantinople Correspondent s letter, on page 762 of your issue of June 8.

The "Courts" to which your Correspondent refers should not be translated as "Revolutionary," but as "Independent" Tribunals. The mistake is frequently made, as the Turkish words, *Istikhlal* (-Revolution) and *Istiqlal* (Independence) are very similar.

These Courts are independent military tribunals which function at the principal centres in Anatolia; they may be described as Courts Martial which have power to award the death-sentence on any person, soldier or civilian, of whatever nationality, without the right of appeal to any superior or revising authority. They deal with persons accused of espionage, rebellion, treason, desertion, etc., and their procedure follows the Turkish military code. Numbers of innocent individuals have already been condemned as British secret agents and executed by order of these Courts. The existence of such a system is sufficient answer to those who still maintain that the Turk is anything but a barbarous savage.

Of course the above-mentioned slip in no way invalidates the remainder of your Correspondent's article, which is well-informed and accurate.

I am, etc.,

A READER.

Constantinople, June 20.

In the House of Commons on July 3, Sir W. Davison asked whether the Under-Secretary for Foreign Affairs had seen the statement in the Press that thirteen British citizens had recently been murdered in Egypt, and that no one had been brought to justice. Mr. Harmsworth replied that he had not seen that statement.

THE CARAVANSERAI.

Think, in this batter'd Caravanserai
Whose Doorways are alternate Night and Day,
How Sultan after Sultan with his pomp
Abode his Hour or two and went his way.
—OMAR KHAYYAM—

Travellers recently returned from the Caucasus tell some strange stories of life under Bolshi rule. The way in which the precious *commissars* themselves will run down the present régime whenever they feel that they can safely do so is illuminating, and the methods by which they eke out a living at the expense of the unofficial population are enough to turn any decent person's stomach. The lady of one of these gentry informed a foreign visitor that everything he saw on her tea table had been "presented" to her *commissar*-lord in return for favour shown. And the foreigner, so far from doubting it, felt tempted to ask whether the table itself had not found its way into the house by the same method.

These things may, or may not, make us smile when we hear of them; though we certainly should not smile if we had to bribe a *commissar* with our cherished jam or cakes, or tea, in order to keep on the right side of a prison-door. But an item of news that really did make me smile was that the Bolshies are—or were—running a train de luxe between Batoum and Tiflis. That, for a communist society, strikes me as "not so dusty." Of course, the "de luxe" part of the train proves too great a temptation for brigands, and the result is a hold-up at one end or other of the line—sometimes at both—on nearly every trip made by the train.

The state of Ireland might, I understand, be more satisfactory. The reason for the restrained form of this statement will become apparent in one minute. Well, it seems that a certain London weekly journal which circulates largely in the Near and Middle East, published, not long ago, a note which indicated that all was not quite as it might be in the Emerald Isle, and that it was no health resort. Promptly came a letter from an Irish gentleman, whose name is very familiar in a particular country of the Near East, saying that the ——'s comments on his country were so unfair that he would request the Manager to cease sending him the paper. The Manager thereupon gave instructions that the correspondent's account should be looked up. It transpired that it had not been paid for close on four years! Which strikes me as "Irish, quite Irish, you know." And the story is true; though nothing would induce me to give you the name of the journal in question.

I see that Sir Percy Cox and Lady Cox have secured the First Prize in a weekly "Happy Couple Competition" organised by one of the London Sunday newspapers, and have thereby qualified as competitors for the "grand final prize" of £100. Their photograph appears in the paper referred to—on the same page as that of Thomas Allaway, the Bournemouth murderer—and as they are shown wreathed with flowers, I conclude it was taken in India. The dazzling honour of it all is a little bewildering to a plain person like myself. But then some men have all the luck. The High Commissionership of Iraq, and now this prize! What *can* Sir Percy Cox have left to wish for?

The high prices fetched at the sale of the MacGregor collection indicate that Egyptian antiquities are finding ever more favour in the eyes of collectors; and even leaving out of account any question of age, the beauty of the workmanship seems to me to justify the favour. Egyptian work was, of course, extremely conventional, only too often extremely stiff in design; but this was due, I think, not to the artists' lack of ability to work on freer lines, but rather to a deliberate following of the beaten track. At any rate, in a tomb-chamber filled with low relief carvings of the stiffest and most formal character I have come across delightful little outline sketches evidently "dashed off" by the sculptor in an idle moment and full of movement; and the wonderful work done in the days of Akhenhaten, at Amarna and elsewhere, proves that the real artistic spirit was alive in Egypt, though hidden under a mountain of conventionality. And in any case the craftsmanship was always remarkable. Now, with the payment of £10,000 by Mr. A. S. Harris for an obsidian head of a Twelfth Dynasty King—a fragment under five inches long—we may expect a "boom" in Egyptian *antikas*.

Corsair

INDIAN SCUPTURE.

Speaking before the India Society (which has been founded for the study of the art of India) on July 4, Prof. William Rothenstein lamented that there was a very imperfect understanding of the importance and significance of Indian sculpture. Yet it was the genius of Indian invention both of form and subject matter which fertilised the whole of Chinese and Japanese religious art. The invention of the Buddha figure was one of the greatest inspirations which had entered the mind of the artist. But it was not in repose only that the Indian genius for sculpture had shown itself. Perhaps no civilisation had invented a greater variety of artistic conceptions than the Indian races.

Unfortunately two misconceptions have biased the minds of European scholars against Indian sculpture. The first is that the Qandara sculpture is the most important which India has produced. It must be remembered that one of the greatest periods of Indian sculpture came when Buddhism in India was dying, and the great Brahmanistic revival brought a new and impelling enthusiasm into men's minds. There was the further misconception that Indian sculpture was necessarily complicated. Yet the temples which, isolated from their natural surroundings in photographs, look so complex, are in reality like the delicate embroidery on a simple robe.

Sir Francis Younghusband, who took the Chair, emphasised the importance of the work the India Society was doing in stimulating interest in Indian art.

A Greek official *communiqué* states that according to information obtained from Turkish eye-witnesses numbers of Greeks were burned alive in buildings by Nationalist bands in Pontus, on the Black Sea. Those who tried to escape from the buildings are said to have been shot.

PRESS ON THE NEAR EAST.

In consequence of inquiries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

Syria.

The *Manchester Guardian* of June 29 contains an article, which comes " From a Palestine Correspondent," on " French Troubles in Syria." It begins :—

> The unrest in Syria is not yet over, but to talk of a revolt is to use exaggerated language. The situation is anxious, for it indicates that the French have not been so happy in their handling of Syria as they would have liked the world to believe.

It goes on to describe the two immediate causes of unrest as being the promulgation of the Lebanon Constitution, and the appearance in April of Mr. Crane. And it concludes :—

> It is clear that in Syria, where there is no Zionist stalking-horse and where Arab sentiment has no mask of that kind to assume, the politicians are active against the mandatory Power. Unfriendly critics say that not only by blunders in Syria itself but also by cultivating extreme Arab nationalism in the neighbouring countries under other States the French have prepared a rod for their own backs. In this part of the world, and particularly in Syria, the French have a really complicated task. The basis of their activities in Syria is as the representatives of the Christians. At the same time they like to pose as the chosen friend of Islam. At the same time they confess, in the rhetoric of the French Revolution, to a passion for liberty and national independence. In Syria these various horses cannot be ridden together, and it is fairly plain that the fabric erected by this mixture of desires is not of the solidest character. It would be easy to exaggerate the gravity of recent incidents, but they do amount to enough to set the French questioning themselves as to the wisdom of some of their activities in Syria and some of those they have encouraged in the countries bordering on Syria.

The Rutenberg Concession.

The *Westminster Gazette* of July 5, in an article entitled " Jew, Arab, and Gentile," states that though the policy of the Coalition Government can be criticised on many counts, with its policy in regard to Palestine it is in agreement. And it proceeds interestingly with an examination of the opposition to the Palestine policy of the Government :—

> Although there are solid political grounds on which it can be criticised, much of the most vociferous opposition is based on no genuine love for the Arabs, and still less on any genuine belief in the right of local self-determination, but only on the most blatant anti-Semitic prejudice. In the same way, while the Rutenberg concession may, for all we know, be open to objection on purely business grounds, the campaign against it, which was carried another stage in the House of Commons last night, arises in the main from the fact that Mr. Rutenberg is a Jew, a Jew who has been connected with Russia, and a man who has a justifiable prejudice in favour of buying what he needs in the cheapest market. Allies who proceed on these lines will do the Arab case, which is by no means without strength, no good ; for the ordinary sober individual, however great his sympathy with Arab aspirations and fears, will not be persuaded to rally to Mecca, if that place is to be used merely as one of the many bases for a general assault on Zion.
>
> The critics of the Rutenberg concession have from the outset given their case away with both hands. It is obviously desirable that the water power of Palestine should be exploited, and it is just this sort of development that the Arabs are unlikely to undertake, and that the advent of Jewish immigrants will make possible, to the general benefit of all inhabitants of the country, the Arabs included. To argue that it should have been given to an Englishman, or that Mr. Rutenberg should have been obliged to place his orders in England, is to tilt straight against the spirit of the mandatory system. If that system means anything at all, it means that the interests of the protected and not of the protecting country shall be given first consideration when any question of such a concession arises. Since Jews are to be permanent and prominent citizens of Palestine, it is natural that a Jew should receive the concession, and it cannot be said to be in the interests of Palestine that the material for its development should be bought in England, if it can only be bought there at an additional and unnecessary cost. Most of the Government's critics in this matter are still wandering in the bad old past, when the Great Powers scrambled for territory out of which they could make commercial profits, the which profits multiplied many times over they proceeded to squander in the wars to which the scramble gave rise.
>
> Against the Rutenberg concession, therefore, there is not, in our opinion, any valid political case to be made. If Mr. Rutenberg is a solid man, who can do what he says he can do, there is no case at all to be made. As for the Government's more general policy in Palestine, that is admittedly a mine of difficult problems. We have somehow to square our pledge to create in Palestine a " national home for the Jews " with the fact that the Arabs are already in a large majority in the country and see no sort of reason why the balance should be artificially tilted against them. There is no doubt that a great deal of harm has been done by the excessive zeal of some of the Zionists, and that a very real uneasiness now exists among the Arabs. It is essential that the Government should hold the scales evenly, as we give them the credit of believing they intend to do. The Arabs, as we have already remarked, stand to benefit from the development of their country, but it will take time before they begin to realise that fact and to appreciate the value of the benefits. In the meantime, it must not be forgotten that the Arabs do in fact possess a veto over the whole plan. Against their determined opposition it could not hope to succeed. The Balfour scheme of a reincorporated Israel was a splendid and a noble one, but the British taxpayer, in his present hard-pressed condition, will not press on with it for ever if it involves the prolonged maintenance of large forces in Palestine and the expenditure of large sums of public money. We need, and the Jews need, to make haste slowly, reconciling the Arabs to every step taken, giving them the benefit of every doubt, and infringing none of the rights which as an established majority they undoubtedly possess. The problem is not insoluble, and is thoroughly worth solving, but it can only be solved by the exercise of statesmanship and restraint, and that at home as well as in Palestine.

The Adriatic Problem.

In the *Fortnightly Review* of June, Mr. Jack Donghi writes (from Dalmatia, November, 1921) on " The Adriatic and its Problem." Generally speaking, his article is anti-Balkanic, especially anti-Serb, in tendency. He dreads the inroad by disorderly peoples upon a civilisation centuries old, and incidentally he describes some of the disruptive elements in the Kingdom of the Serbs, Croats, and Slovenes :—

> Yugoslavia is an agricultural nation, its industrial development having hitherto been neglected : in Serbia for the very excellent reason that no industry is possible, and in Croatia and Slovenia because Austria purposely kept it so as a market for Styrian and Bosnian industrial over-production, Croatia and Slovenia furnishing these provinces at

Digitized by Google

the same time with *materia prima* for manufacturers.

Now, having acquired from prisoners returned from Russia some rudiments of Communism, the peasants occupying the lands refuse to pay rent to the owners or taxes to the Government; but, having no capital and scarcely any education, they do not know how to make the land produce, and the crops are falling steadily in importance year after year. The movement began in Dalmatia, where the landowners were mostly Italians, and therefore found no protection from the authorities who wished to weaken their power; but it has since extended gradually to Croatia and Slovenia. Since Serbia considers that the latter provinces, as heirs of Austria-Hungary, are to pay the damages of the war, and has, so far, refused to increase taxes to any great extent on its own people, the finances of the State are rather precarious and are likely to vanish altogether. Serbia does not care. It is a Balkan country and Serbians need little. They breed pigs, and while the prohibitive duties imposed upon all livestock by the Austro-Hungarian Empire prevented them from selling their produce west of the Drina, forcing them to search for an outlet amongst such meagre consumers as the Bulgars or Turks, they now find that, while the little money lasts, Croatians make excellent buyers and pigs fetch a pleasantly high price. If the worst came to the worst, the Serbians would return to one meal of porridge a day, as in the times of Turkish domination, without troubling much about it. This, as a matter of fact, is one of the reasons why, whenever any European country tries to deal commercially with Yugoslavia in the hope of obtaining some benefit by offering benefits in exchange, it finds that Serbia does not need or want anything, and that therefore business is impossible. But the pampered Croatians—poor people, if they knew how little they really are pampered!—do want things and a certain amount of comfort that to Serbians seem the most decadent of luxuries, and complain bitterly that Serbia, by this policy, prevents them from obtaining it. Therefore, because of the occupation of land by the Communistic experimentalists, Croatia starves, and Serbia's selfishness prevents other countries from feeding it. It is that old trouble which always arises between a people with a low and another with a higher standard of living.

Some Croats to attract the benevolence of the Serbian Government and to persuade it to help them in some way are trying to be more royalist than the King and more Serbian then the Serb.

The *corpus vile* on which to practise was there, all ready trussed for vivisection: the Italian of the coast. Because the Croatians had no foreign Power on which to lean, while the Italians centred their aspirations towards liberty on the firmly constituted nation across the water, the Austro-Hungarian Empire had begun the process of denationalisation in Dalmatia by importing into the province Croatians from the interior and using them as tools for that object, encouraging and helping them in every way.

The article concludes with an interesting generalisation:—

> It is all very well to have a uniform idea of the application of justice all over the world, but if one is to reconcile this with the equally moral "pursuit of happiness" one finds all sorts of difficulties. The United States found out something on these lines when she tried to apply the spirit of '76 to Mexico and Europe—Her Almightiness the Supreme Council of the Powers—is finding it out now when she tries to establish order amongst the centrifugal remnants of the Austro-Hungarian and Turkish Empires.
>
> The high and mighty of the world are meeting now in Washington, and will, everybody hopes, put an end to armaments and the grinding of knives in the more civilised countries. Moreover, after the horrors of the late war, it is to be hoped that a spirit of peace will pervade foreign politics in all the Powers. Even far-off Japan seems to agree. The civilised world wants peace, and for the first time in history does not deem it cowardice to say so. Well and good. We also firmly believe that the bickerings of the smaller folk, not quite out of the Middle Ages in their conception of politics, cannot prevent goodwill between mature nations. The power of civilisation, even unarmed civilisation, will always be sufficient to prevent any attack directed against itself on the part of Balkanism. But an unarmed civilisation must give up all idea of influence over nations who respect only force. If Yugoslavia and Albania are left alone to fight out this question, they will perhaps find their salvation, and may arrive at a saner conception of life. All that the West can do is to send them teachers and booksellers and architects and masons to build their schools. But let the West beware of pointing an empty pistol in the direction of the Near East's solar plexus. The Near East, in its infinite resource and sagacity, would soon find it out, and all its pistols are carefully primed and loaded, even if they be of an old-fashioned pattern.
>
> Austria-Hungary, the late lamented, was not free from Balkanism, and she was used as a tool by Germany to unchain the devils of war. She had only to look round for a moment to find an excuse for attack, and found it in little Serbia's more or less avowed friendship for the murderers of the Archduke Francis Ferdinand. Germany's and Austria's ultimate end would have been unattainable if the West had not risen to the fly like a fat trout, and had refused to interfere. Big Serbia—the S.H.S.—is all Balkan, and already occupies in the peninsula a more important place than the Hapsburg Empire, since its interests are not diverted towards Western Europe. Another Armageddon would be all to its advantage and all within its traditions. Let the West be careful lest interference in Albania should give Yugoslavia a good excuse for invading the precincts of civilisation.
>
> And, since the influence of the unarmed West is to be in the future entirely a matter of culture and education, let it beware lest it lose the only quality it needs for that work—its dignity. For the S.H.S. has already defied the order given by the Powers to stop hostilities in Albania. A second order with the same result would be ludicrous, and what people of the united West would be ready to declare war now in order to enforce obedience? Do not let us pit our unloaded machine-guns and repeating-rifles against their well-charged blunderbusses. If policing work is to be done, let it be developed further north in the Adriatic, where Balkanism is trying to encroach on civilisation with centuries of culture behind it, and where it is attempting to stifle all the energies and potentialities of a commercial and intellectual future.

NEAR EAST BOOKSHELF.

REMINISCENCES OF A GURKHA OFFICER.

"UNDER TEN VICEROYS." By Major-General Nigel Woodyatt, C.B., C.I.E., Colonel of the 7th Gurkhas. (London: Herbert Jenkins, Ltd. 16s. net.)

The expiring generation is greatly addicted to the difficult art of autobiography. Men and women who have played a more or less conspicuous part in the drama of life are no longer content with the prospect of posthumous fame; they must needs rush into print with a necessarily biased version of their career. Very few of us are capable of viewing our thought and action from a purely objective standpoint, and those who possess the gift should take warning from J. J. Rousseau, whose too candid "Confessions" inflicted an indelible stain on his memory. General Woodyatt's self-restraint makes his reminiscences of soldiering and sport in India peculiarly attractive. He was bred in one of those mid-Victorian parsonages which have given the Empire a constant supply of soldiers, sailors and administrators. After a couple of years of hopeless drudgery in a Liverpool merchant's office, he obtained a commission through the Militia backdoor, and joined the 2nd Cheshires at Peshawar. But life in a British line regiment proved irksome to a keen soldier and sportsman. Young Woodyatt soon passed into the Staff Corps, from which the cadre of every Indian regiment was recruited; and was lucky enough to attract the notice of Lord Kitchener who authorised him to raise a Gurkha Corps. For twenty years he served with the gallant little Highlanders, who are destined to be a pillar of our much-tried Empire, and he gives us much valuable information regarding their idiosyncrasies. He afterwards ran the gamut of Staff appointments, commanded a brigade in the Mohmand expedition, and a division during the third Afghan War; retiring in 1920 after a career of exceptional distinction.

The title selected for his book gives but a faint idea of its varied contents: for his acquaintance with Indian Viceroys was somewhat superficial. Lords Lansdowne, Minto and Reading are mentioned only once: and the Marquis of Ripon, who may be fairly dubbed the Father of Indian Unrest, figures as "a stout little man with beard and eyeglass." Lord Dufferin shines in these pages as a devoted admirer of the fair sex, who enjoined his staff to devote all their energies to elderly ladies; adding, "You need not trouble about the young and pretty ones: I will look after them myself!" Lord Curzon receives a due meed of praise for the genius he displayed in stage-managing the great Delhi Durbar of 1903; but seems to have had an extremely high appreciation of his position as Viceroy. General Woodyatt came into closer contact with Lord Hardinge, of whom he writes —:

> The recollection of his handsome presence, courteous manners and dauntless courage in carrying on in most difficult times can never be effaced.

Lastly, he was privileged to give Lord Chelmsford a very realistic simulacrum of frontier warfare; and thus describes the penultimate Viceroy's bonhomie :—

> Meanwhile I was dying for a smoke, but didn't see how I could get it in such exalted company until, a delay occurring with a motor breakdown, General Campbell took Lady Chelmsford off to look at a pet subterranean cook-house of mine, while the Viceroy, seating himself on a boulder, pulled out an old black pipe and began to fill it. This enabled me to follow suit.

General Woodyatt's relations with two greater men than these were far more intimate. Of F.M. Earl Roberts he writes :—

> He had in a most marked degree the attribute of *sympathy* which, coupled with a wonderful magnetic personality, endeared him to all ranks. This was the case in the Indian army to quite an extraordinary extent. The majority of [British] Indian officers are very fine fellows, possessed of acumen, perception and sound common sense far above their fellows, or they would not be where they are.

Personality counts for more in India than elsewhere; it is pleasant to learn that the mantle of Lord Roberts has fallen on General Sir William Birdwood. Earl Kitchener is another of General Woodyatt's heroes. He proves that the legends which gathered round that great administrator's name had no foundation in fact: competent judges agree that the then Secretary of State for India was ill-advised in refusing to gratify Lord Kitchener's ambition to succeed Lord Minto in 1910. Our author's high position on the Staff enables him to tell the true story of the quarrel between Lord Curzon and his Commander-in-Chief. Both were far too masterful to "row in the same boat"; but friction between them was not the cause of the Viceroy's resignation.

This book deserves a wide circulation on other grounds. General Woodyatt has given the world the first connected account of Indian unrest in its very latest phrase. He is by no means pessimistic as to the ultimate result of the Montagu-Chelmsford reforms. But the future of India would now be brighter had the statesmen who took so tremendous a "leap in the dark" assimilated a note of warning given thirty years ago by one who had a greater experience of India's myriad problems. Sir Auckland Colvin, in the biography of his father, wrote :—

> The art of British government in India has hitherto been not to destroy but to correct Eastern methods of administration by applying to them the discipline of the Western mind. Now it is that undisciplined Eastern mind which is to introduce into India Western methods of administration. The experiment will prove of interest, and it is to be hoped of value. But the lesson of 1857 must not be forgotten. Whatever may be hazarded with the educated minority, the real India is to be found only in the mass of her ignorant millions. To govern this real India, authority and justice should be in full view; but in reserve must be held ample force. These are the only methods which, under their own rulers, the masses of the country have ever respected; nor even at the desire of the British Government will they adopt any other.

F. H. S.

A NEW REVIEW.

"THE SLAVONIC REVIEW: A Survey of the Slavonic Peoples their History, Economics, Philology and Literature." (London School of Slavonic Studies. 5s.)

This new Review, which will appear thrice yearly, in June, November and February, is published by the School of Slavonic Studies in the University of London, King's College. A publication edited by Messrs. Bernard Pares, R. W. Seton-Watson, and Harold Williams could hardly fail to be of more than ordinary merit, and the first number of the *Slavonic Review* amply justifies the expectations formed of it. If it can keep clear of the partisanship which marred *The New Europe*, it should have a longer history. As a result of the War the Slav nations have been liberated, and in the normal course of events Pan-Slavism might be thought to have acquired a notable accession of strength. The temporary embarrassment of Russia, however, deprives the Slavs of their natural leadership, and before Russia is ready to resume her role, other forces may have been at work to militate against united political action among the Slav peoples. Be that as it may, there can be no doubt

ARABIC (SYRIAN) SELF-TAUGHT
(In Arabic and Roman Characters.)
Revised and enlarged by REV. N. ODEH.
Containing Travel Talk, Conversation and Classified Vocabularies for Travelling, Useful and Necessary Expressions: Professions and Trades, Religious Terms with English Phonetic Pronunciation arranged for use "At a Glance:" also Elementary Grammar, Illustration of Turkish Government Coinage used in Syria, Money with English and American Values, etc, etc.

Sold by all BOOKSELLERS. Write for Prospectus and Catalogue No. 25.
London: E. MARLBOROUGH & CO., 51, Old Bailey, E.C.4.

Digitized by Google

as to the importance of the Slav States in the post-War world, and every attempt to promote mutual knowledge and understanding as between British and Slav peoples is to be welcomed. Eighteen universities in Germany, we learn from an interesting article by President Masaryk entitled "The Slavs after the War," have announced for the coming summer session, lectures on all branches of Slavonic literature, history, ethnography, philology, etc. Great Britain will do well to pay some attention also to this subject. We regret that considerations of space prevent a more extended reference to the contents of the first number of *The Slavonic Review*, but some idea of its scope may be gathered from an enumeration of others of its more important articles. M. Gavrilovitch, Yugoslav Minister in London, writes on "The Early Diplomatic Relations of Great Britain and Serbia," Professor Jagitch gives "A Survey of Slavistic Studies," Professor Nevill Forbes "Earlier Russian Chronicles"; M. Daniel writes on "The Agrarian Problem in Hungary." Dr. Seton-Watson contributes "Chronicle Notes," and an illuminating review on a biography of Prince Alexander of Bulgaria by E. C. Corti.

SHALL THE TWAIN MEET?

"THE HAWK OF EGYPT." By Joan Conquest. (London: Werner Laurie. 7s. 6d. net.)

This book, like Reginald Bunthorne, is "fleshly," extremely so; and those who like their meats strongly seasoned will probably find it stimulating. It is cleverly written, more's the pity! and one is inclined to regret occasionally that the author should waste herself on such a plot and such very highly-spiced incidents. The theme is one that has been used far too often of late: the "falling in love" of a White girl with a Brown man. It is a nasty subject, and in this story it is not rendered any the more acceptable—to one reader, at any rate—by being handled with a good deal of ingenuity and sprinkled with reflections on the dangers and disasters that may be expected to follow on mixed marriages of the kind. Moreover, the trouble is actually aggravated by the fact that the motive is used twice over: one White girl marries one Brown man (and never regrets it!—"What never?" "Well, hardly ever!") and later, another White girl "falls in love" with the son of the first one and her Arab sheikh. Number two, it is true, does not fall very far, and seems always to have a sneaking liking for the strong, stupid Englishman on whom she finally bestows her "love" and herself; but a great many unpleasant things happen before she does so, and we are not quite sure that we envy the S.S.E. his prize. That opinion may not be shared by the modern young person who is likely to read the book, which she will probably approve. Perhaps our own failure to enjoy the story is due to our having met the Arab very often and our difficulty in believing that he is ever as he is depicted in "The Hawk of Egypt." We like him very, very much, and we love his Desert, too; but we decline to accept the picture of him put before us here. As depicted in Joan Conquest's pages we find him as unconvincing as most of the zoological specimens which she provides us with so liberally. There is a Lord-Lyttonesque flavour here and there in the book, which is not without piquancy; but—. However, as has been said above, those who like this kind of thing will probably like "The Hawk of Egypt" very much.

MUSICAL NOTES.

ON GRAMOPHONE RECORDS.

The artistic quality of a monthly issue of records is bound to vary, according to the different interests that have to be served, but it so happens in the July batch of "His Master's Voice" Company that there is scarcely one which is not of high standard, either in interest or in achievement. In fact, I do not remember a list so interesting and arresting. The instrumental records are exceptionally good, but this week we will take the vocal reproductions, which are more numerous.

As I have often said before, Chaliapine is at his invincible best only in Russian song; he has certain tricks or peculiarities which, permissible and, in fact, desirable in interpretations of Slav music, do not become the singing, say, of German songs. This month he is heard in Beethoven's "In questa tomba oscura," and though the magnificent voice comes through as conqueringly as ever, though his dramatic intensity and cresting impulse are here in abundance, it is impossible to call his a perfectly pure artistic rendering. (This is quite apart from the fact that the orchestral accompaniment is unhappy in its intonation). He gives to the song an excessive tragic thrill and a slight uneveness of rhythm that certainly add to its poignancy but detract from its profound dignity. However, this is a record that one assuredly should not miss.

I have never heard all through Tchaikovski's "Queen of Spades," but if I could hear Destinn in it I would go far to listen. Her singing of "Es geht auf Mitternacht" (Arie der Lisa) is simply wonderful; though one might conceivably tire of the music—and I don't think there is much of Tchaikovski that doesn't show its shreds after some time—one can never tire of her singing. I know of no dramatic soprano who is her equal: the beauty of her phrasing—marvellously reproduced—is here utterly ravishing.

I think the choice by Caruso of Handel's "Ombra mai fu" was unwise, or else the record that I have is a particularly poor one. In any case some approximation to correct intonation might have been made in the famous "Largo" by the orchestra.

Vocal duets on the gramaphone are not often very inspiring things: wither individuality or tonal balance is so easily lost. It is all the more pleasing, therefore, to note that Frieda Hempel and Pasquale Amato have made of "Figlia! mio padre!" from Verdi's "Rigoletto," a perfect work of art. Their distinctive characteristics are admirably preserved, and, too, a most beautiful *ensemble* is achieved, for the accompaniment is unusually excellent.

I need not remind readers in this country or in Central Europe of what the English Singers have done both in the revival of our old madrigals and in making known our finest modern part-songs. Their reputation is firmly and deservedly established: in Czecho-Slovakia, indeed, it seems that they are held in even higher esteem than here. The singing of madrigals is an extremely difficult art—as also is the recording of them—and none but those who are musicians through and through can adequately perform them. But anyone can learn how they should be sung by getting the record that bears Thomas Bateson's "Cupid in a Bed of Roses" and J. Wilbye's "Stay, Corydon, thou Swain." The balance of tone is not quite perfect, but apart from that the records are delightfully made. To listen to them is at once a pleasure and an education.

PERSONAL AND GENERAL.

To-day.
July 13 (New Style).
June 30 (Old Style).
Julkada 18, 1340 A.H. of the Moslem Calendar.
Tamuz 17, 5682 of the Jewish Calendar.

Commander Jean Bouboulis, Greek Naval Attaché, has returned to London from Paris.

The Egyptian Army dinner was held at Claridge's on Tuesday.

The regimental dinner of the Central India Horse is fixed for to-morrow, at the Hotel Cecil.

General Sir Charles Townshend is on a visit to Palestine.

The Afghan Minister has returned to town from Berlin.

The Shah of Persia arrived at Lausanne last week from Paris for a prolonged stay.

Viscountess Allenby has returned from Egypt, and is staying at 9, Upper Cheyne Row, Chelsea, S.W.

Sir Herbert Samuel, High Commissioner for Palestine, had an audience of the King of Italy in Rome on July 6.

Mlle. Feodora Stancioff and Mlle. Helen Stancioff, daughters of the Bulgarian Minister, left London last week for The Hague.

Princess Helen of Greece, with Princess Olga, Princess Elisabeth, and Princess Marian, have arrived in Paris, and will shortly visit London.

The engagement is announced of Mary Joyce May, daughter of Mr. and Mrs. H. G. May, The Shipyard and Old Ferry House, Lymington, to Mr. James Norrington, of the Sudan Government Service.

Admiral Sir John de Robeck, G.C.B., G.C.M.G., Bt., son of the fourth Baron de Robeck, was married on July 3 to Lady Lockhart, widow of Sir Simon Macdonald Lockhart, Bt.

M. Michel D. Frangopoulos, Commercial Attaché to the Greek Legation, left London last week for Athens, on account of the death of his son, who was killed while flying.

Mr. C. Leonard Woolley, on Monday afternoon, delivered a lecture at the Society of Antiquaries, Burlington House, on the recent excavations of the Egypt Exploration Society at Tell el-Amarna.

The municipality of Limassol, Cyprus, has named four streets after Messrs. T. P. O'Connor, Pember Reeves, the late Dr. Ronald Burrows, and Sir Arthur Crosfield, in recognition of their services to the cause of the union of Cyprus and Greece.

The engagement is announced between John Henry Thorpe, M.P., of the Inner Temple, barrister-at-law, eldest son of the Ven. the Archdeacon of Macclesfield, and Ursula, elder daughter of Sir John Norton-Griffiths, Bt., M.P., of Wohnam Manor, Betchworth, Surrey.

Amongst those introduced by the Secretary of State for the Home Department into His Majesty's presence at Buckingham Palace on July 8, when the King conferred upon them the honour of Knighthood, were Sir Robert Gardiner and Sir Stanley Fisher.

Viscountess Erleigh gave an "At Home" on Tuesday afternoon, at 65, Rutland Gate, to meet the Indian Women's Education Association. The Maharajah of Kapurthala and Maharaj-Rana of Jhalawar were to be present, and the speakers included Lady (Dhunjibhoy) Bomanji.

A marriage has been arranged, and will take place in the autumn, between Major W. C. N. Lee, 17-37th Cavalry, Indian Army, eldest son of the Rev. J. T. N. and Mrs. Lee, late of Hatfield Regis, Essex, and Dorothy Winifred, youngest daughter of Lieut.-Col. and Mrs. Swanson, of Liverpool.

The engagement is announced between Flight Lieutenant Arthur Rowan, eldest son of the late William Robert Rowan and Mrs. Rowan, of St. Albans, and Colleen Mary, only daughter of Colin MacHutchin, Deputy Director Surveys, Madras (retired), and Mrs. MacHutchin, Totland Bay, Isle of Wight.

On July 8 M. Piazzani had the honour of entertaining Princess Andrée of Greece at dinner at his residence in Half Moon Street. The following were invited to meet the Princess: Albertha Marchioness of Blandford, Lord and Lady Maitland, Mrs. Glasgow, Sir Amando Molar, and Colonel Bury.

Two lakhs of rupees are needed for the institution of a Soldiers' Residential Club at Murree, to enable private soldiers to enjoy their leave in the hills at a cost within their means. Major-General Sir Herbert Uniacke makes an appeal for funds for this purpose. The Hon. Treasurer is Colonel A. H. Bridges, Rawalpindi District Headquarters, Murree, India.

A marriage has been arranged, and will take place in September, 1922, at Ahmednagar (Deccan), India, between Gladys, elder daughter of Mr. T. A. Deverell, of Sanderstead, Surrey, and Captain Henry Blakeman Graveston, Indian Army (104th Wellesley's Rifles), Cantonment Magistrate, Ahmednagar, eldest son of the late Henry Graveston, of St. Ignatius Square, Preston, England.

The Czecho-Slovakian Minister and Mme. Mastny gave a dinner party on July 8, when the guests included the French Ambassador and Countess de Saint-Aulaire, the Danish Minister and Countess Ahlefeldt Laurvig, Countess Dambski, Count Kai Ahlefeldt Laurvig, the Roumanian Minister and Mme. Titulesco, the Chargé d'Affaires for the Kingdom of the Serbs, Croats, and Slovenes, the Military Attaché to the Italian Embassy and Mme. Riggi, M. Pol Le Tellier, Secretary to the Belgian Embassy, and M. F. M. Taliani, Secretary to the Italian Embassy.

THE PERSIA SOCIETY.

President: Lord Lamington, G.G.M.G., G.C.I.E.

Founded in 1911 to study all questions of common interest to Great Britain and Persia.

Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1.

APPOINTMENTS.

It is announced that the King has approved the appointment of General Sir Havelock Hudson, K.C.B., K.C.I.E., to be Aide-de-Camp General to his Majesty, in the place of General Sir William R. Birdwood, G.C.M.G., K.C.B., K.C.S.I., C.I.E., D.S.O., vacated, on completion of extended tenure of appointment, June 21.

Digitized by Google

Colonel W. S. Leslie, D.S.O., Indian Army, has been appointed Aide-de-Camp to the King, Indian Establishment, with effect from March 31, *vice* Colonel C. L. Norman, D.S.O., Indian Army, retired.

OBITUARY

The death has occurred, at the age of sixty-four, of His Highness Sir Waghji Ravaji, G.C.I.E., the Thakore Sahib of the Kathiawar State of Morvi.

The death occurred last week of Major Sheldon W. K. Cradock. He served in the Egyptian campaign, 1882, when he received the medal with clasp and the Khedive Star. He also served in the South African War and in the Great War.

Major-General Sir Geoffrey Barton, Colonel of the Royal Fusiliers, died last week at Craigs, Dumfries, in his seventy-ninth year. He saw service in the Ashanti War in 1873-4, in both the South African campaigns of 1879 and 1899-1902, and in the Egyptian and Sudan Expeditions. Sir Geoffrey was created a K.C.V.O. in 1906, and was previously awarded the C.B. and the C.M.G.

The death has occurred of Sir John Sandys, Public Orator at Cambridge during the forty-four years prior to December, 1919, when he retired. Sir John wrote much on classical subjects. Soon after taking his degree he edited two speeches of Isocrates. He was afterwards responsible for editions of speeches of Demosthenes and for a beautiful rendering of the " Bacchae " of Euripides, illustrated from works of ancient art. The standard edition of Aristotle's Constitution of Athens, with an excellent commentary, was his work, and he also edited parts of Cicero. He was a contributor to the *Classical Review* since its foundation in 1887. He had previously published " An Easter Vacation in Greece," and he was appointed one of the managing committee of the British School at Athens and a Vice-President of the Hellenic Society.

At a meeting of the East India Association to be held next Monday afternoon at half-past three, at the Caxton Hall, Westminster, Mr. A. Sabonadière, I.C.S. (ret.), will read a paper entitled " The Tenancy Law of Oudh." Sir Denison Ross, C.I.E., will preside.

THE VATICAN AND PALESTINE.

Addressing a meeting at Bolton recently in connection with the jubilee of the Church of St. Peter and Paul, Cardinal Bourne referred to Palestine, expressing a fear that there might be some misrepresentation of the attitude of the Vatican. " I know," he said, " perhaps as well and better than anyone in this country what the attitude of the Holy See is on this question. The Holy See has no objection to the mandate for Palestine being given to the British Government, but welcomes such a mandate because the Holy See recognises the fairness and justness of Britain in dealing with such questions; but the Holy See objects to the proposals made in the draft mandate which would give to the Zionists, that is, the newly-imported Jewish population of the Holy Land, a privileged position over those who belong to other races and other religious beliefs. Is it consistent with the idea of a mandate not to give the government of a country to the population existing in that country, but to bring in a quantity of aliens from another country in order to take over the government? Surely the whole object of the mandate was that Britain should lift up the Syrian population, teach them to govern themselves, and not render them incapable of self-government for ever. This was a matter which concerned the whole of Christendom. It was absolutely certain that unless the mandate to be given to Great Britain next month for the Holy Land was wisely and prudently and justly conceived and applied there would be a terrible conflict in that country."

NEW GREEK DIOCESE.

The Ceremony of enthroning Archbishop Germanos as Metropolitan of a new See of Central and Western Europe in connection with the Greek Orthodox Church was performed on July 9, in the Greek Church, Moscow Road, Bayswater. Bishop Browne represented the Archbishop of Canterbury, and was accompanied by the Rev. G. K. A. Bell, chaplain to the Primate, the Rev. Norman Smith, Secretary to the Anglican and Eastern Churches Association, and other clergy of the Anglican Church. Sir Lucas and Lady Ralli, Sir John and Lady Stavridi, and Mr. Selwyn Oxley were among those present, and there was a large Hellenic congregation. The full service of the Greek Church was conducted by the Great Archimandrite (Dr. Pagonis), the Rev. Agathangalos Moschovakis and the Rev. A. Basdekas.

Archimandrite Basdekas read encyclical letters from the Ecumenical Patriarch creating the new See and appointing Archbishop Germanos as Metropolitan. Henceforth the centre of the Greek Church in London will have the dignity of a cathedral.

Archbishop Germanos, in the course of an address, said that the War had diminished the area subject to the patriarchate, but had increased the patriarchate's importance in relation to freedom from the tutelage of the Turkish Government. One of the main objects in appointing a special Metropolitan and Ex-Arch for Central and Western Europe, with a seat in London, was to promote closer relations between the Eastern and Anglican Church. One of his duties, moreover, would be to urge the liberation of the Christians from oppression in Asia Minor. He came with the full authority from the Patriarch to acknowledge the generous championship of the Archbishop of Canterbury for the martyrs in Asia Minor, and also to acknowledge the sympathy and help extended by the English Clergy.

THE PALESTINE COMPROMISE.

The statement of British policy in Palestine issued from the Colonial Office and published as a White Paper is to be welcomed, if only as the first definite step towards a settlement of one of the various problems of the Near and Middle East. For practically a year the Palestine Arab Delegation has been in London endeavouring to obtain from the British Government a repudiation of the Balfour Declaration. It has been met with a combination of patience and consideration wholly British and of procrastination thoroughly Oriental—tactics suited to the mood of a Cabinet that finds hand-to-mouth arrangements easier to evolve than long-visioned policies and that regards Ireland as a sufficient excuse for postponing decisions in other parts of the world. Delay in this instance may not have been attended with any serious results; in the hotel where the Arab Delegation has resided for so long the members have doubtless found a home from home, and they can have no complaint to make against the courteous hearing given to their representations by the permanent Staff of the Middle East Department. A more direct method of negotiating on their part might have shortened their stay in England; but in the end they have the satisfaction of knowing that the future administration of Palestine will certainly be more careful of Arab susceptibilities than if they had never left their country. The Arabs have not obtained from the British Government all that they asked for through their Delegation; but they will have known from the beginning that room has to be found in Palestine for both Jew and Arab, and if they are well advised, they will appreciate the value of the compromise that they have now obtained from the Mandatory Power. They were genuinely afraid that Zionist claims were going to be carried literally into effect, and they proposed to meet Zionist aggression by Arab intolerance. Great Britain must hold the balance even between the contending factions. We could have wished that the statement of British policy had betrayed in its wording a more sympathetic attitude towards the Arabs; but both Jews and Arabs now know where they are. The latter, it is hoped, will realize that the future is entirely theirs, if they can make their political capacity commensurate with their numerical strength. They will only reveal their political incompetence, if they cry out now; whereas they have a sure means of redress, if at any time they can point to a definite grievance. As for the Zionist Organisation, its wisest course will be to impose for the next few years a ban of silence, whether on platform or in print, on all its members.

The good intentions of the British Govrnment in regard to Palestine are beyond challenge; but the official statement of its policy is marred, apart from a lack of sympathy, by an attempt to prove too much. There was no need to pretend that hitherto immigration has fulfilled the conditions now laid down and that political undesirables have always been excluded from the country. Both statements are demonstrably incorrect, as applied to the past, although they may be true of the present conditions. Again the average reader will be left aghast at the British Government's geography, when he learns from the Colonial Secretary that, when in the pledges given to the Shereef of Mecca "the portions of Syria lying to the west of the district of Damascus" were excluded, "this reservation has always been regarded by His Majesty's Government as covering the vilayet of Beirut and the independent Sanjak of Jerusalem, The whole of Palestine west of the Jordan was thus excluded from Sir H. McMahon's pledge." The habit of circumlocution,as well as ignorance of geography, must have been strongly developed in the official who avoided the two words Syria and Palestine, which we are asked to believe were in the British Government's mind, and used the expression "portions of Syria lying to the west of the district of Damascus." It would have been more creditable to the British Government if the Colonial Secretary had stated that Palestine was never mentioned in the pledges given to the Shereef Hussein, because at that time it was not supporting the Hejaz cause, and Great Britain had no intention of allowing it to fall within the scope of those pledges, instead of asking the Arabs and the world as a whole to believe that by any stretch of the imagination Palestine can be regarded as a portion of Syria west of the district of Damascus. Apart from the palpable defects enumerated the statement offers a satisfactory charter for the future of Palestine. It specifically repudiates the preposterous claim of the Zionist Organisation that Palestine must become as Jewish as England is English—a claim first put forward by Dr. Weizmann, the head of the Organisation, in 1919 and repeated with pompous solemnity a few weeks ago by the *Jewish Chronicle*; it points out that the Balfour Declaration did not contemplate that Palestine as a whole should be converted into a Jewish National Home, but that such a Home should be founded *in Palestine*; and that the special position assigned to the Zionist Organisation in Article IV of the Draft Mandate for Palestine does not imply that the Organisation is to possess any share in the general administration of the country, but relates to the measures to be taken in Palestine affecting the Jewish population. On the other hand the Balfour Declaration is affirmed, because it is essential that the Jewish people should know that they are in Palestine "as of right and not on sufferance," and "that is the reason why it is necessary that the existence of a Jewish National Home in Palestine should be internationally guaranteed." Among the points gained by the Arab Delegation may be mentioned that in regard to the vexed subject of Jewish immigration, hitherto solely in the hands of the Zionist Organisation, a special committee, consisting entirely of members of the new Legislative Council elected by the people, is to be appointed to act in an advisory capacity to the Administration, and that it has been decided that the Legislative Council,shortly to be established,will consist of the High Commissioner as President and twelve elected and ten official members.

It is a matter for regret that advantage was not taken of the debate in the House of Commons on July 5 to clear the air yet further in regard to Palestine. The Government chose to regard the division on Sir William Joynson-Hick's motion as a vote of confidence, and Mr. Churchill was merely at pains to score debating points. The personal views of individual members on the Balfour Declaration in 1917 as compared with 1922 had nothing to do with the merits of that Declaration or with the problem in Palestine to-day. It was an unworthy gibe on the part of the Minister in charge of the Middle East Department—and typical of the lack of sympathy that the White Paper reveals—to declare that "not in a thousand years would the Arabs have taken effective steps for the irrigation and electrification of Palestine." If it is to be in that spirit that the present Cabinet approaches the administration of Palestine, a further blow will be given to British prestige by a Government that has shown itself peculiarly ill-informed in regard to the post-War Orient. The Arab Delegation may have proved somewhat exasperating; but, apart from its methods of urging its case, it has been justified in pressing the point of view of the overwhelming Arab population of Palestine. It would have been better if the British Government had admitted that its attitude towards Palestine in the past had been prompted more by good intentions than by knowledge, and had declared that its sole concern now was to be fair to both parties, It is on safe ground in contending that the country can only be adequately developed in the immediate future

Digitized by Google

by Jewish capital, and that every facility must, therefore, be given to Jewish enterprise. But, as the Mandatory Power exists to hold the balance even between Jews and Arabs, and to see that each party is given fair play, there is no need to single out either for special favours in the Mandate or Constitution. Thus the recognition of Hebrew as an official language—a retrograde step in any country and under any conditions—and the special mention of the Zionist Organisation are mistakes in tactics. If the use of Hebrew, or Chinese, facilitates the government of the country, it should be employed as a matter of course, without being given the status of an official language; in the same way the Administration may consult the Zionist Organisation, or the Jerusalem Chamber of Commerce, or a Sports Club, without making it an *imperium in imperio* in any sphere of public life.

THE SUDAN AT PLAY.

By "Abu Nakhla."

I. An Arab Gathering.

It is a far cry from the gorges of the Atbara river to the upper reaches of what were once, in a phrase which has become a local classic, described as the "turgid waters of the so-called White Nile," and which are in fact similar in hue to the liquid which is sold in railway stations as coffee. Still further west lie the Nuba Mountains, rising like islands from the forests of the plain. But railways, steamers and Mr. Henry Ford have combined to shorten distances, and the traveller may within a few short week witness contrasts of country and of peoples as remarkable, probably, as any to be found within any one territory.

The Atbara, a torrent in the rains but in the winter shrunk to a series of pools and shallow runs in a shingle bed between precipitous and broken banks, bounds on the east that great triangular prairie, known as the Butana, whose other confines are the Rahad river on the south and the Nile on the west. The Butana forms

Shukria Horsemen in Chain Mail.

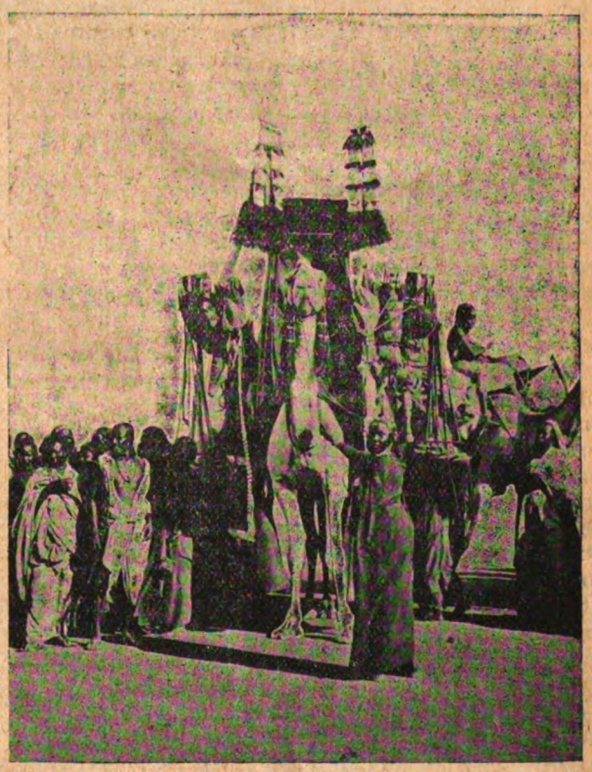
the great summer grazing area for the nomads of the eastern Sudan; then the rains provide good grass, and drinking water for man and beast is caught in tanks or *hafirs*, many of which date back to the splendours of the old Kingdom of Meroe.

Early in the dry season the *hafirs* fail, and the tribes must move outward to their respective grazing areas within reach of the banks of one of the rivers. Of these the Skukria and the Lahawiin drink from the Atbara, and the Government Post from which they are administered is situated at Khasjm el Girba—"the mouth of the water-skin," or as we should say "the bottle-neck." Here the Atbara flood forces its way through a narrow gorge and leaves in the dry season a deep and quiet pool which holds many a leviathan who has broken the fisherman's gut—and his heart therewith. Above the gorge on the west bank stands the Government Post, or Merkaz, pleasantly situated in an open country of grass and bush, and with a view away to the north and east of the great unclimbed peaks of Kassala hill and the highlands of Italian Eritrea.

Here once a year gather the clans of the Shukria and Lahiwiin; and the good Scot must crave some indulgence if he stretches analogy too hard and is reminded of other "Gatherings" where the sky is less blue, perhaps, but the grass is greener and the heather clothes the hills. And, in hard fact, the polity of the Arab tribes of to-day, from the Land of the Two Rivers westward to the Atlantic, bears many points of resemblance to that of the Scottish Clans of two centuries ago.

However, we did not come to Kassala Province to draw fanciful comparisons, or to risk the wrath and scorn of the exact historian, but to watch the Arab at play and to do, perhaps, a little administrative business.

Overnight our cars had swung into the Merkaz with the last of the gloaming, between lines of tribesmen with flaring torches and to the accompaniment of the shrill "lu-luing" of the women, to be received by Sheikh Awad el Kerim Abu Sin, Nazir of all the Shukria, and



Camel Utfa

his subordinate Sheikhs. "Abu Sin" means "The Father of a Tooth," and was the soubriquet, now proudly borne by all his descendants, of Ahmed Bey of that ilk, who brought himself and his tribe to the front place in the eastern Sudan under the old Egyptian Government in the middle decades of the last century, and who was the friend of Sir Samuel Baker. Now, as then, the Abu Sin are on the side of good government, and suffered hard times under the rule of the Khalifa in consequence; they are a clean-bred intelligent race of country gentlemen, who hold the affection and respect of their tribes and of the Government.

The morrow's programme was a long one and the March sun not to be trifled with, so we were up early and away to the place of gathering. As soon as the Governor had taken post at the saluting point the march past of all the assembled tribes began. Their Nazir led with his escort of horsemen in chain mail on ponies well-nigh hidden under their quilted trappings and brass head-pieces, gear long since disused in war but which brings down to us unchanged a tradition as old as the Crusades. Then, section by section of twenty to fifty—Shukria, Lahiwiin and a few Debania—the lines went

Digitized by Google

past, each under its own Sheikh and in perfect dressing—light wiry men on the heavy big-boned camels of the Butana, bred rather for carrying than for riding, but fine beasts of their type. Ranks of white robes and swarthy faces topped by the white "imma" or turban, except where some Shukri had adopted the "fuzzy" head dress of their Hadendoa and Bisharin neighbours to the north. The drill would have done credit to disciplined troops and, at the end of the march past, the parade of over fifteen hundred mounted men formed three sides of a great square to hear their Nazir's few words of greeting to the Governor of the Province, and his simply expressed hope that the wind of politics might leave things in the Sudan as they were.

Then a canter home to breakfast, the ponies of the British officers darkly suspicious of their attendant quilted fellows, who looked more like galloping ironmonger shops than horses. The orderly ranks broke as the parade dismissed, and the country side was covered with a mass of flying camel-riders racing lightheartedly for home, and showing off by twisting in and out among the bushes and making mimic attacks on each other. There were falls enough, but the Arab falls like a cat, and no bones were broken.

We need not follow the details of tribal affairs discussed at the meeting of Sheikhs which followed after breakfast. The real business of the day began in the afternoon, when the gathering ground was lined with spectators and competitors, mounted and on foot—a keenly critical and appreciative audience. In the sports every taste was catered for; there was a race for everything that could run, camels, ponies, donkeys, men and boys. The shortest course was one hundred yards for the boys, and the longest ten miles for the camels, who had a straight run home from a neighbouring village. Events followed each other with startling rapidity, but there was always somebody handy to fall upon those "placed" in any race, and to take their names and addresses, more as if they had earned imprisonment rather than a small cash prize at the end of the day.

The side-shows, as indispensable here as at Epsom, consisted of little bands of ladies who beat their tom-toms and sang interminable songs, and before whom the young bloods delighted to strut and do a little ostentatious sword-play. All the ceremonial *utfas* were out—the great camel litters decorated with leather work, ostrich feathers and shells, in which a lady of quality moves camp.

Later in the afternoon racing gave place to play-acting. The plot was simple enough, and one which made a direct appeal to all classes in the audience, whether Government officials or tribesmen. The gang of camel thieves send one of their number to engage the young camel herd in talk, while they lift his father's camels. The lad realises his loss too late, and runs to his father's tent with the news. The father, with a most realistic torrent of lamentations and curses, rouses the tribe, who arm and make off in pursuit. Following the tracks they meet an old man who is in league with the thieves, and who first plays the "village idiot" to perfection, and then sends the searchers off on a heel line. The critic may complain with truth that no good tracker would have been caught that way for an instant; but the pursuers soon realise their mistake and return to find that the village idiot has now become stone deaf—an admirable piece of farce. His ears are not opened nor his tongue loosed until he finds a cotton *tob* round his neck with a very angry man pulling on either end of it. Finally the pursuers make up on the pursued, and there is a running fight ending in the death or capture of all the thieves, their surrender to Government, and their release as an act of clemency. The *dénouement* was perhaps a departure from the probable even too wide for the drama, but latitude must be granted in the interests of a happy ending. The caste was excellent; there were neither wings nor curtain and, as the stage was some thousand yards square, not only was the dialogue not always audible, but a good pair of field glasses was almost essential to a proper appreciation of some of the action. But one may see worse acting very much nearer Piccadilly.

And so the sun sets, the prizes are given, and given by a British lady for the first time; we make our several ways home to thatched rest-house or hair tent and our evening drink in whatever form we take.

The day ends with the inevitable *diluka*—the ladies beat their drums, dance their so-called dances and sing their endless songs. The torches flare and a delighted audience crowds round each group till far into the night, while the stench and the noise rise to a protesting heaven.

(To be continued.)

TOPICS IN PARLIAMENT.

The subject headings are those given in the Official Report.

Peace Treaties: Turkey (British Claims).—Greece and Turkey.—Egypt: Murders of British Subjects; Firearms.—Anglo-Persian Oil Company (Payment of Calls) Bill.—(Monday, 3rd July.)

India: Civil Service; Burmese Associations (General Council Meeting).—Palestine (Concessions).—Ceylon (Reforms Committee).—Greece and Turkey.—(Tuesday, 4th July.)

Peace Treaties: Bulgaria.—Near East: Atrocities; British Contracts.—Persia.—Kurdistan (Murder of British Officers).—Indian Army (British Officers' Pay).—Egypt.—(Wednesday, 5th July.)

According to news received in Paris from Kabul, the Government of Afghanistan has decided to send a delegation to Japan to establish diplomatic relations between the two countries.

Sir George Fuller, Premier of New South Wales, has offered the Commonwealth Government three hundred farms in the Murrumbidgee area for retired Indian Army officers.

A committee has been appointed to inquire into the expenditure of Aligarh University. It includes Mr. Hydari, Financial Secretary of Hyderabad.

THE
EUPHRATES & TIGRIS
STEAM NAVIGATION CO., LTD.

Regular Service of Passenger and Cargo Steamers running at frequent intervals between BUSREH (Persian Gulf) and BAGHDAD on the River Tigris, and between MOHAMMERAH (Persian Gulf) and AHWAZ on the river Karun.

Cargo booked on a Through Bill of Lading to BAGHDAD and/or AHWAZ by the chief liners sailing from the U.K. Continent and India.

The engagement of land transport for Cargo to towns in the interior of Mesopotamia and Persia undertaken on behalf of Shippers of Through Cargo to BAGHDAD and AHWAZ.

NOTES AND NEWS.

Devonshire Square,
E.C. 2.

Burmah Oil.

The report of the Burmah Oil Company, which is now available, makes very interesting reading. The profit for the year amounted to £3,150,000 as compared with £4,891,500 for 1920 and £4,654,800 for 1919, the reduction in the trade results being due, as already mentioned, to the decline in the value of the rupee and the lower values for petroleum products. The fields expenditure, it is pointed out, was heavy, and must remain so with the considerable drilling, development, and exploratory programme ahead. It is satisfactory to note that drilling results in several directions have extended the productive area of the company's older fields in Burma, and that there is no reason for modifying the view that there is before them a long and steady life.

P. and O. Bank's Development.

The progress of the P. and O. Banking Corporation in its brief career has been very remarkable, especially when the unfavourable conditions of the period are taken into consideration. For the nine months ended March 31, 1921, the profits of the bank amounted to £99,000, while for the year ended March 31 they were £159,000 During the past year there was a substantial increase in the bank's current, deposit and other accounts which have more than doubled. At the recent general meeting Lord Inchcape said that it was the bank's endeavour to avoid any conflict with old-established institutions, to take no undue risks, to build up slowly on sound lines, to accumulate out of profits a good reserve, and to distribute a fair dividend. The three months of the current year have produced satisfactory results and Lord Inchcape expressed confidence that if, as he hoped, the trade of the Empire improved and labour difficulties were surmounted, the corporation would continue along the road of prosperity.

The Position in Roumania.

I have just had an opportunity of hearing the views of a correspondent in Roumania on the general position in that country. His summary was not entirely encouraging. It is scarcely necessary for me to point out that Roumania of all the Near Eastern countries engaged in the war is actually in the most favourable position for making a rapid recovery. No other country has anything to set against her agricultural resources and her oil industry. But so far the Roumanian exchange instead of, as might be expected, reflecting a gradual improvement, has tended to weaken, and at the present time makes a much worse showing than some other Near Eastern countries. This development was attributed by the correspondent in question to the unfavourable internal situation in the country. "There has been so far," he said, "only a half-hearted attempt to meet the problem of financial reconstruction, and until that has taken place it is hopeless to anticipate any improvement." But perhaps he was unduly severe.

Effect of Trade Restrictions.

Turning to the question of the country's resources, he said that the agricultural outlook was distinctly promising and that it was anticipated that there would be a good harvest. "The oil industry" he went on "is progressing, but it is not yet in a happy position, for while the transport problem is in process of being solved—there really has been a great improvement in this direction—there have been so many restrictions on trade that the country is not in a position to profit by its wealth. Without desiring to be in any way pessimistic I cannot see any justification at the moment for a rapid improvement in the leu, though it ought to be at par, and would be if matters had gone the right way since the Armistice."

The Cotton Outlook.

The Washington Agricultural Bureau report has naturally created widespread interest in cotton circles here. If it can be accepted at its face value then the position is better than was anticipated. It appears that the acreage is larger by 10 per cent. than last year, and that the plants are doing well on the whole. The condition report is 71.2, which is a distinct improvement on the corresponding figures for the last two years, while the estimated crop is 11,065,000 bales as compared with 8,433,000 bales. Reports are, of course, very conflicting, but even if the Bureau's report prove to be correct the position cannot be regarded as other than very unsatisfactory for Lancashire, for the world's consumption of cotton will greatly exceed the estimated crop total, so that given a revival of trade Lancashire may be very hard put to it to obtain supplies of the raw material. Lancashire has been face to face with this danger for years, and it is greatly to be regretted that more energetic steps were not taken years ago to promote cotton growing within the Empire. Thanks to the good work of the British Cotton Growing Association, great strides have been made of late in this direction, but what has been achieved so far is not nearly enough, and it is very likely indeed that before we have reached the safety line in Empire production, Lancashire will have felt the pinch.

Commentator.

Commerce and Industry.

REPORTS FROM OUR OWN CORRESPONDENTS,

ROUMANIA.

Bucharest, June 3.

Conversion of Treasury Bonds.

M. Vintila Bratianu, in introducing a Bill in Parliament for the conversion of Treasury Bonds in private hands, gave a survey of the financial situation, and described his negotiations in Paris and London. He emphasized the great pleasure he felt at the knowledge that financial circles abroad, official as well as private, were fully aware of Roumania's potentialities and resources and thus of her capacity of meeting her obligations in full. He went on to say that the Treasury Bonds in private hands issued in various currencies, estimated at the present rates of exchange, totalled about £32,000,000. The proposed operation, he said, consisted in the conversion of bonds into a consolidated fund bearing 4 per cent. per annum, redeemable in 40 years. At the same time a loan of 2½ million sterling was to be concluded for the purpose of ensuring the payment of the first year's coupons and to cover other expenses in connection with the consolidation service. The Minister of Finance laid stress on the fact that these loans did not entail any concessions on any portion of the nation's resources. The coupons and annuities for the first few years would be guaranteed by the revenue derived from the export taxes which would be levied in gold or bills of exchange in high foreign currency; afterwards when these taxes had been removed or reduced according to the financial circumstances prevailing in the country the liabilities for such loans would be incorporated in the general budget. The National Bank of Roumania, with whom the Government had come to a special agreement, had undertaken to guarantee the payment of the sums required for the interest and redemption of the above loans.

Parliament has ratified the measures proposed by the Minister of Finance.

Mr. Laurance Jones, representing Messrs. Helbert, Wagg & Co., and Colonel Drake, representing the British Overseas Bank, have already arrived in Bucharest in order to carry out the formalities connected with the loans.

British Chamber of Commerce.

On June 10 the British Chamber of Commerce held its annual banquet at the Hotel Boulevard. Mr. A. A. Adams, Commercial Secretary to the British Legation, was among those present, and proposed the toast of the King. Sir Herbert Dering then proposed the toast of the British Chamber of Commerce, in which he was joined by M. Hagi Tudorache, President of the Roumanian Chamber of Commerce. Mr. A. Saltmarsh, one of the directors of the Bank of Roumania, replying to these toasts, reminded those present of the last pleasant occasion when they met for a similar festivity, and reminded them of the fact that they were now celebrating the Chamber's first birthday. He deplored the fact that, owing to the unsatisfactory economic conditions existing, the Chamber could not develop its activities more rapidly, but he looked forward to the future with confidence, expressing the hope of uninterrupted progress immediately times became more propitious.

YUGOSLAVIA.

Zagreb, June 29.

The Zagreb Sample Fair.

The Fair is an undoubted success, and will certainly have far reaching effects on the economic life of this country. The number of visitors during last week was well over 200,000 and the number of orders and enquiries are far greater than was anticipated by the greatest optimist. The Government have allotted a sum of 200,000 dinars, which will be used for the improvement and extension of the pavilions.

COMMERCIAL BREVITIES.

A new commercial aviation line has been opened from Algiers to Biskra (Algeria).

The half-yearly general meeting of the Smyrna-Aidin Railway will be held on September 26.

The gross crude production of the Steaua Romana, Bucharest, for the month of June was 18,370 tons.

Bulgaria is about to impose new taxes, the proceeds of which will be devoted to the payment of reparations.

The Czecho-Slovak Government are contemplating commercial treaties with Denmark, Portugal, Spain, and Greece.

The ordinary annual general meeting of the Bank of Roumania, Limited, will be held at Winchester House, Old Broad Street, London, E.C., on July 26.

Advice has been received from the Société Algerienne des Petroles de Tliouanet, in which the Algerian Oilfields is largely interested, that output for last two weeks in June was 34 tons and 30 tons respectively.

A drawback of 60 piastres per kilogram is allowed in Egypt on imported tobacco when it is exported in the form of cut tobacco, under the conditions prescribed by the resolution of the Minister of Finance of September 2, 1891, relative to drawback regulations on cigarettes.

The American-Slovak Bank will open a branch office at Prague in the course of the next few days. The bank has its headquarters at Bratislava, and possesses besides nine branches in various parts of Slovakia. It is the first Slovak bank to open offices at Prague.

The Clothing & Equipment Company of Egypt (S.A.)

The Royal Agricultural Show.

Notable Machinery Exhibits.

(From Our Own Correspondent.)

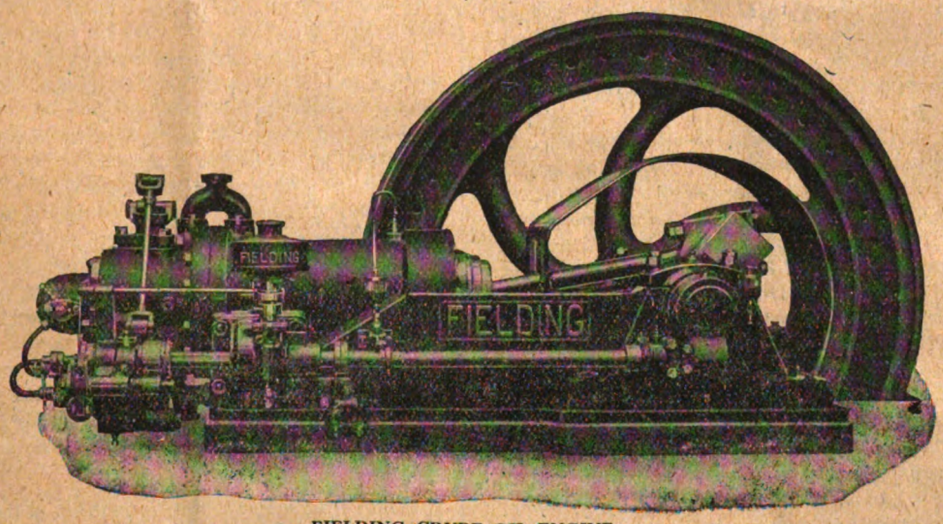
From many points of view last week's Royal Agricultural Show at Cambridge must be accounted a very notable event. It was by far the largest of these annual undertakings that has yet been held, and it was rendered specially noteworthy by the comprehensive range of agricultural machinery that was on view. I have been to most of the principal machinery exhibitions since the war, but not one of these could in any way compare with the Cambridge show as regards extent and diversity of exhibits. It was in my opinion as complete a collection of agricultural machinery and accessories as we are likely to see in one place, and very fairly represented British capabilities in this all important line.

There was everything there in the way of agricultural machinery that one could think of, from tractors to cream separators, from oil engines to harvesters, and of all there was a positively bewildering variety. Oil engines were on view at quite a dozen stands, practically a whole row of stands was devoted to tractors, while reapers, etc., were to be seen on every side. A particularly interesting feature was the number of new machines that were on view, machines designed to do several operations, and therefore calculated to make a special appeal to the small agriculturist in the Near East and similar regions.

A fair business was done in the machinery section, but nothing like what should have been the case. Foreign buyers were conspicuous by their absence, and this I am inclined to attribute more to the lack of knowledge of the show than to the prevailing economic conditions. It is much to be regretted that representatives of all the Near Eastern countries were not present. The Near East provides one of the greatest openings for agricultural machinery, and in some of the most important countries in that region the exchanges present no obstacle to trade, while where they do as in the case of Roumania the problem is in process of being solved by the negotiation of loans. It is necessary to point these facts out since I found in the course of my visit that the opinion seems to be generally held that at the present time it is impossible to do business with the Near East. That is a quite erroneous idea, and the sooner that is realised the better if our manufacturers are to take advantage of the possibilities in that field.

To attempt to review the stands in detail would be an impossible task in the space at my disposal. I must content myself, therefore, with indicating briefly some of the more important exhibits, and on a subsequent occasion some of them will be described more fully.

Oil engines, as I have already pointed out, formed no inconsiderable part of the exhibition. An interesting stand was that of Messrs. the Wolseley Sheep Shearing Machine Co., Ltd., showing some of their well-known vertical petrol machines. Messrs. Fielding and Platt, Ltd., exhibited their "Fielding" semi-Diesel crude oil engines, which among other advantages is stated to need no attention after starting beyond lubrication and fuel supply. The National Gas Engine Co., Ltd., had on view a number of their productions including a low compression oil engine and a cold starting oil engine. Messrs. Blackstone and Co., Ltd., had an interesting standshowing among other things examples of their well-known oil engines. This firm's products include the Blackstone Agricultural Tractor of a self-laying track type. Vertical petrol engines were also displayed by Messrs. Corbett, Williams and Son, Ltd., while Messrs. Worthington-Simpson, Ltd., showed a horizontal single plunger pattern motor pump, oil engines, etc. Other exhibits of special note were those of Messrs. Sir W. G. Armstrong, Whitworth & Co., Ltd., who showed engines for paraffin, petrol, or gas, Messrs. Petters, Ltd., who showed oil engines of various types, and Messrs.



FIELDING CRUDE OIL ENGINE

Wallace (Glasgow), Ltd., who exhibited their Glasgow single steam valve engine.

A stand worthy of particular note was that of Messrs. Boulton and Paul, Ltd., showing the "Boulton" water elevator. Ploughs were shown by Messrs. John Cooke and Sons, Messrs. E. and H. Roberts, Ltd., and several other firms. Messrs. Dennis Bros., Ltd., had on view some of their well-known products which include a turbine motor fire engine which ought to find a very good market throughout the Near East. Other exhibits of special interest were those of Messrs. W. N. Nicholson and Sons, Ltd., who showed ridgers, Messrs. W. Weeks and Son, Ltd., whose spraying machines ought to command a splendid market in the Near East, Messrs. Powell Brothers, Ltd., who showed farm engines, and Messrs. J. B. Edlington and Co., Ltd., whose exhibits included reapers, mowers, etc. A word must also be said regarding the exhibits of Messrs. H. L. Goodman and Son who showed woven wire fence, for which they have had extensive orders for India.

British Consular Reports.

VII. SYRIA.

The following extracts are taken from the report of Mr. H. E. Satow, O.B.E., H.M. Consul-General, Beyrout, on the trade, industry, and finance of Syria for 1921 .—

After a fall in value, gold began to rise again in June, and continued to do so until the end of the year. There has been a demand for the free export of gold, but this has not yet been allowed. No doubt a certain quantity drifts away through illicit channels.

The year 1921 ended without any catastrophes and Beyrout remained financially sound. This was partly due to profits earned in 1920 and partly to prudence. The banks helped to the best of their ability to keep things going, but the granting of credit was of course almost unknown.

As regards imports competition has become very keen, and it is practically impossible to insist on part payment with order. Prudence was and is imperative. It is essential to choose a good agent who has discretion to pick out only reliable customers. In a period of falling prices the temptation to refuse goods on the slightest pretext is irresistible to many. Vague offers of little-known goods have but a slight chance. Ex-enemy competition is even keener, and cheapness being the main desideratum in this market German imports have greatly increased. Invoice values not being taken into account, this competition has, however, not been as swamping as it would otherwise have been.

In Aleppo credit has disappeared for the moment, and exporters unless well satisfied as to the standing of clients would do well to continue to insist on cash against documents. Before the war 60 or even 90 days' credit after receipt of shipping documents was common and some German firms even allowed six months' credit. The Aleppo market is, however, in a very different state now from what it was then, and its future is still obscure.

At Damascus too, the banks are most reluctant to grant credits and insist on two guarantors. Most operations are on a cash basis, although a few exporters are granting limited credits of two or three months. Local transactions are carried on in local currencies, but these are highly involved. The British exporter should simply insist on payment in sterling. It is said that the Moratorium in the State of Damascus which still exists will shortly be abolished and that the few pre-war debts still outstanding will be made repayable on a gold (par) basis.

Imports and Exports.

The value of imports was £9,889,458 and of exports £553,843. The large adverse balance of trade is accounted for (1) by spending in the country of the French army and Haut Commissariat, estimated at between £2,000,000 and £3,000,000 ; (2) by money sent from Syrians abroad, about £200,000, and (3), and this is by far the greatest factor, by the expenditure of capital. Gold distributed among the Bedouin tribes is slowly filtering back into circulation, and as there is estimated to be a very considerable amount of gold still hidden in the interior, it is likely that purchases will continue to be comparatively high.

Cloth of all kinds is at present a glut on the market and must remain so until the heavy stocks held in Beyrout, Damascus and Aleppo can be liquidated. Building materials are much in request, especially cement for which there is a growing demand. Petroleum and motor spirit are absorbed in large quantities. The import of motor cars is certain to decline, as there are many more cars in the country than can be employed.

The steady increase of French imports is a natural outcome of the French occupation. The German manufacturer is steadily insinuating himself into this market, chiefly thanks to low prices; the German imports are 400 per cent. higher than before the war, this being of course partly due to increased values.

Exports are of little interest. Dried apricots and apricot paste come from Damascus and are exported to Turkey, Egypt and Greece. Pistachio nuts are exported from Aleppo to the United States. The export of olive oil is said to be declining, and one explanation is that the quality of the oil is affected by the careless way in which the olives are picked. In 1921, 235,000 sheep and lambs passed through Aleppo from Asia Minor and Deir-iz-zor ; and 11,000 head of cattle were dealt with during that year. These were mainly absorbed by southern Syria, but 90,000 sheep went to Palestine *via* Damascus. Other exports are wool from Aleppo and small quantities of skins and hides. Brass work and marqueterie ware are exported on a small scale from Damascus.

Local Industries.

The chief of these used to be the silk industry, but it is now suffering severely. Local capitalists prefer to invest their money abroad or in the purchase of goods for the interior and are not disposed to finance improved methods of silk production. Those in use are antiquated and render competition with Indian and Japanese manufacturers out of the question. At present the industry is almost entirely confined to the production of cocoons for export to France and Italy.

Soap.—About 4,000 tons was produced in 1921. The quality is not uniform, as the oil used is of varying purity. The present output is about half of the pre-war production, the decrease being chiefly due to the closing of the market in the interior.

Other lesser industries are the weaving of a coarse kind of cotton cloth, the production of brass ware for kitchen utensils and ornaments, and the making of marqueterie ware, unglazed pottery, embroideries, rugs and carpets of an inferior kind. An attempt made to revive the old Arab industry of glazed pottery has not been a success. Sausage casings are produced in Damascus. The yearly production is about 300,000 metres length.

Labour.

The Lebanon lost a large proportion of its population as the result of the war, and there is thus a permanent shortage of labour. The arrival of a few thousand Armenian refugees from Cilicia has not affected the position. Egyptian labourers, however, are less in evidence. Doubtless the reasons are a smaller programme of public works and the reduction in the military forces of occupation which at one time made considerable use of such labour. Wages, however, are still high if account is taken of the quality of work performed, and carpenters and masons obtain from about 21s. to 6s. per day according to skill.

At Aleppo there is no shortage of labour, thanks to a large influx of refugees. Wages, too, are lower there. Thus house painters receive 13s. 6d., carpenters 5s., masons 5s. 4d. to 6s. 8d. per day. Refugees receive considerably less than these wages.

(To be concluded)

Reuter's Cairo Correspondent in a message dated July 4 announces that an agreement has been reached between the shipping companies and shippers for cotton to be carried to the United Kingdom and the United States at 25s. and 35s. a ton respectively.

The death took place recently at St. Anne's on Sea of Mr. Benjamin Crapper, J.P., of Oldham, who was one of the founders of the British Cotton Growing Association, of whose Council he was still a member. Two years ago Mr. Crapper visited Mesopotamia and Egypt to report on cotton growing on behalf of the British Cotton Growing Association.

Engineering Topics.

By Our Engineering Representative.

A New Tool.

A one-piece valve lifter which can be used with one hand, and which is one of the simplest devices on the market, has just been introduced, and from inspection it appears to be accurately designed. It is certainly strongly constructed and should give years of service. It has a claw end which can be used when replacing the pin to lift the spring off the valve tappet guide when a quick upward thrust will leave the opening clear. The other end is wedge shaped, and can be used when the pin is to be removed.

An Innovation.

Messrs. C. A. Vandervell & Co., Ltd., announce that owing to the reduction of costs due to greatly increased production they are now able to reduce the price of the popular C.A.V. horns. In addition they will shortly have in production brackets that will greatly facilitate the fitting to the majority of cars by the user himself or by any agent. One of these brackets enables the horn to be installed under the bonnet of the "Austen" twenty, another is the "universal" type for other cars where there is room under the bonnet, a third is for fixing to the floorboard of any car.

Low Temperature Carbonising.

From the number of inquiries which have reached me from time to time, I know that many readers of the NEAR EAST are interested in low temperature carbonisation methods and the use of low grade fuels. The adoption of low temperature carbonising of low grade coals and coal refuse not only enables these materials to be turned into a high grade smokeless fuel suitable for domestic and industrial use, but it enables a large amount of valuable oil to be obtained, forming about 6 per cent. of the product. The method, on the average, yields about 75 per cent., by weight of the fuel used, in high grade coke, about 9 per cent. in gas of high calorific value, and the balance in oils, motor spirit, sulphate of ammonia and tar liquor.

The smokeless fuel is firm and hard, though not so hard as the cake obtained from high temperature carbonising, and it retains from 8 to 12 per cent. of the volatile matter of the coal. It consequently ignites readily and gives off a high degree of heat. I have personally used it under an ordinary water-tube boiler and found it to give remarkably good results. It is smokeless, gives comparatively little ash and slag, and has good steam-raising properties.

I understand that the plant has been considerably improved of late, but users must bear in mind that the smokeless fuel is produced at the cost not only of the low grade coal or refuse used, but also of a reduced production of gas as compared with the high temperature method, and from a business point of view it must be considered how this cost can be divided amongst the by-products so that it is duly borne without so raising the price of any as to make them unsaleable.

This point has been ably considered by the British Board of Fuel Research which has arrived at the conclusion that part of the cost in question should be borne by the coke consumed as a fuel in place of raw coal, though what extra price users would be prepared to pay for it naturally depends on local conditions. Further, the amount to be borne by the coke is not unconnected with the price that can be obtained, or the value and the use made of the gas which is driven off during the carbonising process. The gas has about double the calorific value of ordinary gasworks gas and so can be used to advantage in enriching water or other gas, or in raising the calorific value of low grade gas produced by the high temperature carbonisation process. As regards the oil also, the price obtained must depend on the price of mineral oils of similar quality obtainable in the vicinity and the same remark applies to the motor spirit given off during the process.

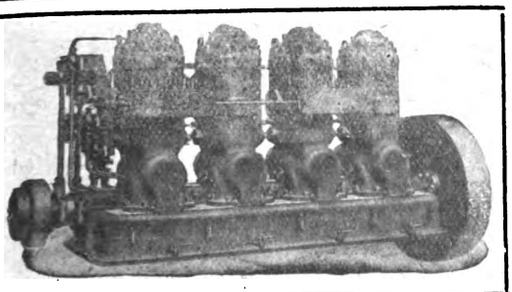
A Rudge Success.

The popularity of Rudge-Whitworth motor wheels on the Continent is well shewn by the results of the Grunewald races which I have just received from Charlottenburg. In Class 1 the first three cars were fitted with Rudge-Whitworth wheels, Class 2 was won on Rudge special wheels, the second and third cars being fitted with ordinary Rudge wheels, and in the next class the three first cars had Rudge-Whitworth wheels. The wheels, with the exception of the special type mentioned, were all of the wire spoke pattern. It is interesting to find that the sterling merit of these productions has apparently triumphed over exchange and other difficulties.

The Film as an Aid to Industry.

From time to time reference has been made in the Press to the important part played by cinematography in relation to commerce and industry, and it has been pointed out that, properly encouraged, the film might be made to become the most efficient commercial traveller in the world.

Among the firms who most quickly realised the value of the commercial film and adopted it as an essential part of their stock-in-trade was the great industrial organisation of Vickers Limited. The first film was made by the company in 1913, and since then no other firm has made such manifold use of the screen as a medium for bringing its manufactures to the notice of the public. The films shown by Messrs. Vickers Limited at the International Foundry Trades Exhibition at Bingley Hall are good examples of the firm's cinematographic work, and fully vindicate the value of the screen as an educational as well as a business-getting factor.



Power at Minimum Cost.
The extreme simplicity of the "Allen" Heavy Fuel Oil Engine renders it particularly suitable for placing in the hands of native or other unskilled attendants without any sacrifice of efficiency.

It is easy to start and runs unattended for long periods.

SHIPPING INTELLIGENCE.

CUNARD CRUISES.

Tours in the Near East.

Some of the finest vessels of the Cunard fleet are being converted into pleasure yachts for the use of the American tourist this autumn and winter. World cruises and trips to the Near East have been arranged, and even the Mauretania is to be pressed into this service. So successful did these trips prove last season that the Cunard line have decided, during the coming autumn and winter, when the American passenger traffic is slack, to extend the scope of these pleasure tours, and two of their steamers will make a round-the-world tour from New York, while the Mauretania will enter upon a 12,000 odd miles cruise to the Mediterranean.

The cruise to the Mediterranean has already been inaugurated by the Cameronia, which is now on a two months' voyage. In addition to the Mauretania, the Cunard Company will withdraw from the Atlantic service the Samaria, Scythia and Laconia. The Cameronia is visiting Funchal, Lisbon, Gibraltar, Malaga, Monaco, Genoa, Naples, Venice, Fiume, Phaleron Bay, Constantinople, Beyrout, Haifa, Jaffa, Alexandria, returning to New York *via* Naples and Gibraltar. A similar tour is to be undertaken by the new Cunard liner Scythia, but the details have not yet been definitely decided upon.

According to present arrangements, it is intended that the Mauretania shall enter upon her pleasure tour to the Mediterranean on February 10 of next year. Her itinerary includes a call at Funchal, *en route*, then visits to Gibraltar, Algiers, Monaco, Naples, Chanak, Kalessi, Constantinople, Phaleron Bay, Haifa and Alexandria. It is expected that the tour will occupy about fifty-four days, and the Mauretania will cover some 12,227 miles.

Mediterranean cruises have been a feature for some years, but the Cunard Line is going one better in the arrangements for round-the-world tours by their two new oil-burning liners Laconia and Samaria. During these tours opportunities will be afforded for visiting the principal cities of the leading countries of the world. The tours will be so drawn up that one of the vessels will continue her trip from New York round the world, by the Panama Canal, whilst the other will visit the same ports, but in a reverse direction *via* Gibraltar. The Laconia will sail from New York on November 25, and her itinerary will be Havana, Colon, then through the Panama Canal to San Francisco, Honolulu, Japan, China, Singapore, Rangoon, Calcutta, Colombo, Bombay, Port Sudan, and through the Suez Canal to Alexandria. Naples, Monaco, and Gibraltar. The Samaria on her world trip to the same ports as the Laconia will leave New York on February 1, crossing the Atlantic to Gibraltar, and will then work eastwards to China and Japan, from thence passing through the Panama Canal on her return to New York.

It is expected that these world tours will extend over four months, and the distance covered will be approximately 30,000 miles.

Anchor Line (Henderson Brothers), Ltd
16, Gracechurch Street, London, E.C.3.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis :—

Anchor Line.—S.s. Olympia for Bombay (Liverpool, July 15) ; s.s. Castalia for Bombay (Liverpool, August 3).

Anchor Brocklebank Line.—S.s. Mahronda for Calcutta (Birkenhead, July 15) ; s.s. Mahratta for Port Said, Colombo, Madras and Calcutta (London, July 18) ; s.s. Matheran for Calcutta (Birkenhead, July 29) ; s.s. Anchoria for Port Said, Colombo, Madras and Calcutta (London, August 5) ; s.s. Malakand for Calcutta (Birkenhead, August 21) ; s.s. Mahanada for Port Said, Colombo, Madras and Calcutta (London, August 26).

Bibby Line.—S.s. Gloucestershire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 2) ; s.s. Oxfordshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 15).

Clan Line.—S.s. Clan Murdoch for Bombay and Persian Gulf (Birkenhead, July 25) ; s.s. Clan MacKellar for Colombo, Madras and Calcutta (Birkenhead, July 27).

Cunard Line.—S.s. Pavia for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, etc. (Swansea, July 14).

Ellerman Line.—S.s. Fabian for Gibraltar, Malta and Alexandria (Liverpool, July 20) ; s.s. Andalusian for Genoa, Leghorn, Naples, etc. (Liverpool, July 20) ; s.s. Cressado for Gibraltar, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, July 29).

Ellerman's "City" Line.—S.s. City of Durban for Calcutta (Birkenhead, July 17) ; s.s. City of Calcutta for Bombay and Karachi (Birkenhead, July 20) ; s.s. Kabinga for Calcutta (Birkenhead, August 4) ; s.s. City of Canton for Calcutta (Birkenhead August 19).

Ellerman's Westcott and Laurance Line.—Regular sailings fortnightly for Malta, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

Glen Line.—S.s. Glenamoy for Port Said, Port Swettenham, Singapore, etc. (London, July 28) ; s.s. Glenogle for Port Said, Port Swettenham, Singapore, etc. (London, August 10).

Harrison Line.—S.s. Collegian for Calcutta (Liverpool, July 29).

Henderson Line.—S.s. Burma for Port Said and Rangoon (Birkenhead, July 26).

Holt Line.—S.s. Antilochus for Port Said, Port Swettenham, Singapore, etc. (Swansea, July 20) ; s.s. Agamemnon for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 12) ; s.s. Helenus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 12).

Johnston Line.—S.s. Peruviana for Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, July 22) ; s.s. Venice for Galatz and Braila (Liverpool, August 1); s.s. Dromore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, August 19).

P. and O. Line.—S.s. China for Bombay (London, July 14) ; s.s. Nellore for Colombo, Madras and Calcutta (London, July 14) ; s.s. Nankin for Colombo, Madras and Calcutta (London, July 28) ; s.s. Plassy for Bombay (London, July 28) ; s.s. Malwa for Bombay (London, August 11).

British India Line. — S.s. Mulbera for Bombay and Karachi (London, July 14) ; s.s. Merkara for Bombay and Karachi (London, July 28) ; s.s. Ethiopia for Colombo, Madras and Calcutta (London, July 29) ; s.s Mashobra for Colombo, Madras and Calcutta (London, August 18) ; s.s. Hatarana for Bombay and Karachi (London, August 19).

Prince Line.—S.s. Algerian Prince for Malta, Alexandria, Syrian Coast and Cyprus (London, July 19) ; s.s. Stuart Prince for Tunis, Malta and Alexandria (Manchester, July 24) ; s.s. Cyprian Prince for Tunis, Malta and Alexandria (Manchester, August 5).

Near East Markets.

LONDON PRODUCE REPORT.

Home Sugar Harder.

(*From Our Own Correspondent.*)

London, Monday Evening.

Sugar.—Home refined has been in fair demand at slightly higher rates. Tate's cubes and mineral water sugar are both higher with an advance of 6d. and 9d. at 57s. and 51s. 3d. respectively. London granulated and Lyle's have both gained 6d. at 50s. 9d. and 51s. respectively. Foreign descriptions have advanced a little. West Indian crystallised has been a steady feature at 43s. 6d. White Mauritius has risen 1s. to 48s., and white Java is 6d. up at 21s. Cane sugar quotations are :—July, 17s. 6d., August, 17s. 6d., and September, 17s. 6d. White sugar quotations are :—July, 22s. 9d. ; August, 22s. 7½d. ; September, 22s. 6d. ; October, 22s. 1½d. ; and October-December, 21s. 10½d.

Coffee.—All quotations are 2s. lower. East Indian is now 114s. Costa Rica is quoted at 108s., while Nairobi has come to business at 104s. The futures market is inactive. Quotations are :—July, 64s. 6d. ; September, 64s. ; December, 61s. 3d. ; and March, 61s. 3d.

Dessicated Coconut.—With some small arrivals, an active tone has been in evidence.

Rice.—There has been an all round improvement in the demand. Burma star rices are advancing in price.

Green Fruit.—Further shipments of South African oranges have reached England this week, and, as I mentioned last week, the quality is most excellent. The strawberry season has practically come to an end, when a large demand for oranges is anticipated. Stocks of lemons continue to accumulate and there is little hope of an improvement until better weather arrives. Good sound apples have been favoured this week in spite of the excessive prices demanded. Egyptian and Valencia onions have advanced in price while there has been a falling off in the request.

Oilseeds.—Unsteadiness prevails. Indian linseed at 21s. 9d. has gained 6d., while La Plata at 19s. 6d. has shed 6d. Rapeseed is lower with Toria 4½d. down at 18s. 7½d. Cotton seed is higher in all cases. Egyptian black has advanced 6d. at 12s. 4½d. Sakellaridis at 11s. 6d. and Indian at 9s. 6d. have both jumped 6d.

Oils.—A steady tone has been in evidence. Linseed oil has dropped 6d. at 43s. Rape oil is unchanged with crude at 45s. and refined at 48s. Cotton oil is unchanged with the exception of deodorized which has advanced 5s. to 53s. Egyptian crude is firm at 42s., technical is 41s. 6d., and refined is 48s.

Oilcakes.—There is no change in prices. Cottonseed cake is steady at 16os. ton, coconut cake is at 20os. ton, linseed cake is firm at 28os. ton, as also cottonmeal cake at 28os. ton.

ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud & Co., Smyrna, report as follows for the week ended June 24 :—

Sultanas.—The total estimated arrivals to date amount to 174,390 bags ; the total estimated sales are 172,890 bags, while the estimated stock unsold totals 1,500 bags.

Markets.—Sultanas.—Market unchanged. The few sales effected during the week are for Continental account. Stocks are steadily running out.

Figs.—No change to report in the general outlook. Atmospheric conditions continue favourable ; weather remains cool with occasional showers.

Exchanges.—Sterling has advanced to 735.

DRIED FRUIT REPORT.

Messrs. J. C. Houghton & Co., Liverpool, report as follows under date July 3 :—

Currants.—It is many years since so quiet a month has been experienced as that which has just closed, and under the circumstances we regard it as a matter for congratulation that so good a tone has been maintained. The depreciation of the drachma certainly had an unsettling influence on prices, which shew a decline of 5s. per cwt. Stocks are very light, and in no way comparable to those in existence at this period of last year, so that any improvement in the demand from the country will suffice to absorb them readily. Reports concerning the growing crop lead us to suppose that it will not be a large one ; in all probability it will fall considerably short of last season's yield. Some estimate it as low as 100,000 tons. The interval between the arrival of the " Brescia " and Whitsuntide was so short as to render it almost impossible to do any trade in her cargo before the holiday, and on the resumption of business a condition of absolute apathy prevailed, which we regret to say has continued until the present time. " Fabian " with about 700 tons for the market, is now discharging, but very few samples are as yet available. No other steamer is reported to be loading. Latest sales were :—Pyrgos 54s. ; Qr. cases cleaned 56s. to 58s. ; Vostizza 60s. to 65s. The aggregate of sales during the month is negligible, quotations ranging as follows :—Pyrgos 53s. ; Amalias 54s. ; Patras 56s., 58s. ; Zante 57s., 62s. ; Gulf 57s., 60s. ; Panariti 58s., 62s. ; Vostizza 58s., 65. Australian currants slightly easier at 70s. to 72s.

Valencia Raisins.—A few half boxes out of condition fruit, were sold at 28s., while good selected qr. boxes, lately arrived, realised 70s. to 80s.

Cape Raisins.—A little business is passing at 60s. c.i.f. and 75s. ex quay.

Sultanas.—No support being accorded to the article, prices have eased, and such business as was transacted decidedly favoured buyers. Prices range from 120s. to 130s. Fine bleached 140s. ; Australian 125s. to 130s. Cape varieties :—Sun Dried 100s. to 105s. ; Bleached 110s. to 125s. California soda and oil bleached are in good request at 113s. to 114s. landed terms, and after forward business had been put through at 96s. c.i.f., 101s. c.i.f. was paid for future shipment.

Figs.—Sales were dragging, a few genuine Naturals selling at 57s.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated July 3 :—

Season.—June 26—Monsoon vigorous in Burma, North-East India and on the West Coast. June 27—Active generally. June 28—Widespread rain in the Punjab. June 29—Weakened in North-East India and south of Peninsula. June 30—Monsoon extending up the Gangetic Plain. July 1—Active in Gangetic Plain and in central parts of India. July 2—Weakened in North-East India, but strengthened in central parts of India.

Condition of Crops.—June 30—Bengal.—Weather continues favourable. Bombay.—Immediate outlook much improved and now satisfactory almost everywhere. July 3—Assam.—Prospects of tea, jute and autumn rice fair.

Markets.—June 29—Bombay cotton market steady. Fine M.G. Oomras, Rs. 457-8 July, Rs. 472-8 September. Bombay cotton arrivals from September 1, 1921, to June 24, 1922, were 3,165,000 bales as compared with 2,466,000 bales during the same period of the last year. June 29.—Bombay imported piecegoods market continues hopeful and indicates some demands for white staples and styles from old stock, but very little demand for prints. Local goods moving steadily. June 29—Calcutta jute market very firm. Firsts, Rs. 86.8. Gunnies firm but quiet and rates unchanged. At tea sale on June 27 there was a keen demand for good liquoring tea and tea with tips at last prices. All other grades in less demand and sold at irregular decline of 1 anna. Bombay and Persian buyers much less active for pekoes, but other markets interested at lower basis of values. At this sale the average price fell to 11 annas 2 pies per lb. as compared with 11 annas 6 pies at the last week's sale. 41,086 packages sold to date. Shellac.—June 49—Market unchanged with enquiries weak. June 29—Rangoon rice market firm at the end of month with enquiries from Japan. Special Straits quality rice Rs. 495.

No change in bank rates.

CURRENT PRICES.

General Produce.—Bacon: (Continental), 141s. cwt.; (Canadian), 127s. 6d. cwt.; (American), 110s. cwt.; butter (Danish), 226s. cwt.; (Australian), 221s. cwt.; (New Zealand), 229s. cwt; cheese (Canadian), 98s. cwt; (New Zealand), 98s. cwt; lard 68s. 6d. cwt.; eggs (Danish), 18s. per 120; (Styrian), 11s 6d. per 120; chillies, 157s. 6d. cwt.; cloves (Zanzibar), 1s. 2d. lb.; cocoa (Ceylon good to fine), 82s. 6d cwt; coffee (Costa Rica), 121s. cwt.; (East Indian), 122s. 6d. cwt; (Central American), 97s. 6d. cwt.; (Jamaica), 72s. 6d. cwt.; (Mocha Longberry), 105s. cwt.; (Santos superior), 71s. cwt.; ginger (washed Cochin), 53s. 9d, cwt.; nutmegs (110's to 80's), 11½d lb.; pepper (Singapore black) 4d. lb.; (Muntok white), 7½d. lb.; pimento, 2.1-8d. lb.; raisins (Cape), 114s. cwt.; sultanas (Smyrna). 72s. 6d. cwt.; currants (Vostizza), 60s. cwt.; (Amalias), 53s, 6d. cwt; sugar (Tate's cubes), 56s. cwt.; (Lyle's granulated), 50s. 4½d. cwt.; (Mauritius crystals), 47s. 6d. cwt.; (West Indian crystallised), 44s. cwt.; (centrifugal), 16s. 10d. cwt.; tapioca (fair Singapore), 2d. lb.; rice (Rangoon No. 2), 14s. 7½d. cwt.: (bran Rangoon), £6 18s. 9d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 7½d. lb.; tea (Indian, common to good common), 1s. 0¾d. lb.; (medium to good), 1s. 4d. lb.; (fine to finest), 2s. 7½d. lb.; Ceylon (common to good common), 1s. 2d. lb.; (medium to good), 1s. 6d. lb.; (fine to finest), 2s. 7½d, lb.; Java (common to good common), 10½d. lb.; wheat (English white), 55s. 6d. qr.; wheat (Australian), 56s. 9d. qr.; oats (English), 37s. 3d. qr.; oats (La Plata, ex-ship), 26s. 10½d. qr.; maize (La Plata), 38s. qr.; flour, 42s. 3d. sack.

Chemicals—Acids: Boric 61s. cwt.; oxalic, 8½d. lb.; citric, 2s. 7d. lb; tartaric, 1s. 6d. lb.; ammonia (sulphate) £15 11s. 0d. ton; arsenic, (white powdered), £42 ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £12 10s. ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 115s. 6d. cwt.; Potassium: Bichromate, 6¾d. lb.; chlorate, 4½d. lb.; caustic, £33 10s. ton; nitrate, £37 10s. ton; permanganate, 9¾d. lb.; prussiate yellow, 1s. 3½d. lb.; sulphate (90 per cent.), £15 5s. ton; Sodium: Crystals, 120s. ton; bi-carbonate, £11 5s. ton; bichromate, 5¼d. lb.; alkali (58 per cent.), £9 1s 3d. ton; chlorate, 3½d lb; caustic (70 per cent.), £22 10s. ton; hyposulphite, £16 ton; prussiate, 9¼d. lb.; nitrate, £15 3s. 3d. ton; glycerine (crude 80 per cent.), £60 ton; glycerine (industrial 1260 per cent), £87 10s. ton; lemon oil, 3s. 4½d. lb., quinine, 2s. 3½d. oz.; red lead, £37 ton; white lead, £41 ton; white ground lead, £49 15s. ton; sulphate of copper, £26 17s. 6d. ton; sulphate of iron, 60s. ton.

Metals.—Aluminium, £102 10s. ton; antimony (English Regulus), £28 ton; bismuth, 9s. lb.; copper (standard) £61 18s. 9d. ton; copper (electro), £69 15s. ton; gold bars, 93s. 7d. oz.; iron (No. 3 Cleveland), 90s. ton; hematite (mixed number), 95s ton; galvanized sheets (25 G), £16. ton; lead (soft foreign), £24 10s. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 30s. unit; nickel, £160 ton; platinum. 365s. oz.; plumbago, £16 ton; quicksilver, £11 10s. bottle; spelter (G.O.B.), £27 17s. 6d. ton; tin (standard), £152 15s. ton; wolfram, 11s. 7½d. unit; zinc sheets, £36 ton; tin plates (20 by 14), 19s. 7½d. box; silver bars, 36⅜d. oz.

Hides and Skins.—Ox and Heifer (first), 90 lbs. and up, 9½d. lb.; 80 to 89 lbs., 9½d. lb.; 70 to 79 lbs., 9.3-8d. lb.; 60 to 69 lbs., 8.3-8d. lb.; 59 lbs. and under, 7d. lb.; (second), 90 lbs. and up, 8½d. lb.; 80 to 89 lbs., 8½d. lb.; 70 to 79 lbs., 7¾d. lb.; 60 to 69 lbs., 7d. lb.; 59 lbs. and under, 5.3-8d. lb.; Cows: (first), 60 lbs. and up, 7½d. lb.; 59 lbs. and under, 6¾d. lb.; (second), 60 lbs. and up. 5.3-8d. lb.; 59 lbs. and under, 4.5-8d. lb.; Bulls (first), 5d. lb.; (second), 3½d. lb.; Kips (first), 5½d. lb.; (second), 4½d. lb.; (third), 3¾d. lb. Calcutta Market. Prices in rupees per 20 lbs.: Arsenic hides (cows): Agras, 7.8 to 13 (7 to 13); Durbhangas, 7 to 8.8 (6 to 8.8); Patnas, 5.8 to 6.8 (5.8 to 6.8). Salted cows, 4.8 to 7.8 (4.8 to 7.8). Arsenic hides (buffalo): 4 to 7 (4 to 8). Skins: Calf, (8 to 10) per 20 lb.; goat, 180 to 240 (180 to 240) per 100 pieces.

Miscellaneous:—Cotton (American), 13.06d. lb.; Egyptian (Sakel), 18.75d. lb.; jute (first grade c.i.f.), £35 17s. 6d. ton; jute (lightnings), £32 17s. 6d. ton; Oilseeds: Linseed (La Plata), £20 1s. 3d. ton; palm kernals, £17 18s. 3d. ton; castor seed (Bombay), £18 18s. 9d. ton; sesame seed (China), £26 5s. ton; soya beans, £13 2s. 6d. ton; Oils: Linseed, £43 5s. ton; olive (Spanish), £77 ton; rape (crude), £44 10s. ton; soya, £40 5s. ton; petroleum, 1s. 4½d. gallon; petrol, 2s. 1d. gallon; fuel oil (ex-tank), 72s. 6d. ton; coconut (Ceylon), £38 5s. ton; cotton (crude), £42 5s. ton; ground nut, £45 15s. ton; Rubber: Plantation (No. 1 Crepe), 7¾d. lb.; smoked sheet, 7¾d. lb.; fine hard Para, 10½d. lb.

BOHEMIAN PORCELAIN INDUSTRY.

As reported from Prague, the Zettlitz Kaolin Works have taken over the interests which the International Commercial Bank, Vienna, held in the Bohemian porcelain industry. The Zettlitz Kaolin Works, which have at present 10 million crowns of paid-up capital, and constitute the largest kaolin works in Czecho-Slovakia, intend to enter into closer relations with the large porcelain factories in Germany which are regular consumers of Bohemian kaolin. The Zettlitz Works participated in the establishment of a new undertaking which has been founded in Carlsbad with 6½ million crowns of capital. It also stands in close connection with the well-known Epiag Porcelain Company, which is the biggest undertaking of its kind in Czecho-Slovakia, having 30 millions crowns of paid-up capital, and 5 factories employing over 3,500 workmen.

The traffic receipts of the Smyrna-Aidin Railway for the week ended July 1 amounted to £6,438.

The output of the Anglo-Egyptian Oilfields for the week ended June 10 amounted to:—Gemsah, 11 tons (previous week 11 tons); Hurghada, 2,428 tons (against 2,508 tons).

The tenth annual ordinary general meeting of the Oriental Carpet Manufacturers, Ltd., will be held at the head office of the Company in Smyrna, on Saturday, August 5, at 10.30 o'clock.

Stock and Share Markets.

DULL TONE PREVAILS.

Oils Weak.

(*From Our Own Correspondent.*)

London, Tuesday morning.

Taken all round it has been a very indifferent week for the markets. The fall of the mark has given rise to a distinct feeling of nervousness with the result that business has tended to contract further, and prices in many cases are lower on balance. It is to be assumed that market conditions will remain uncertain until the position in Europe is a good deal clearer than it is at present. Certainly it is not the least good to enter the more speculative markets now with the expectation of any rapid improvement.

Gilt-edged Decline.

The fluctuations in exchange have, of course, affected the Gilt-edged market, and stocks in some cases are lower than last week. Consols, exceptionally, are unchanged at 57.5-8, but the Conversion Loan is 9-16 down at 76½, while War Loan Fives at 99⅞ are 7-16 lower. Indian stocks on the other hand have tended to harden. The Seven per Cent. Loan is 2½ up at 116, the 3½ per cent. loan has gained ½ at 67, while the 3 per cent. loan is ¾ up at 57¼.

The foreign market has generally been weak, French stocks in particular suffering from the fluctuations of the mark. French War Loan Fives are 4 down at 38, while the 4 per cents. have shed a similar amount at 30. German 3 per cents. are unchanged at 2. Czecho-Slovak 8 per cents. have weakened, and close 2½ down at 92½. Russians remain about the same. Turkish Unified have eased off a trifle, and are 1½ down at 34½. Greeks have been dull with Monopolies down to 34½. Peruvian Government 5½ per cents. advanced sharply to 92, while Chinese 8 per cent. Treasury Bills were another bright spot at 72½. Mexicans were weak, most prices being lower on balance.

Industrials Dull.

The prevailing conditions have been felt by the Industrial group. Business has been on a most restricted scale, and prices have shown a downward tendency.

Tobaccos have been a dull spot. Bats are 1s. 6d. lower at 76s. 3d., while Imperial Tobaccos have shed 9d. at 62s. 6d. Textiles have inclined to weakness. Coats at 61s. 3d. are the same as before, but Courtaulds are 9d. down at 50s. 9d. Dunlops have shed 6d. at 8s. 9d. Iron and Steel shares remained practically unchanged. Vickers are 6d. down at 13s. 6d., Guest Keens are unchanged at 35s., while Armstrongs are 6d. lower at 17s. 6d. In Indian railways Bengal and North Western are ¼ up at 130½, Bengal Nagpur at 98¾ show a gain of ¾, Delhi Umballa are 178, while Madras and Southern Mahratta are unchanged at 104.

Oils Weak.

A very weak tone has ruled in the Oil market, and prices are lower practically all along the line. The mark has affected this group more than any other, and there has been a good deal of selling by the Continent particularly of Shells, Mexican Eagles, and Royal Dutch.

Anglo-Persian Ord at 4.15-16 are 1-16 down, while Burmahs are unchanged at 5¼. Mexican Eagles are down to 3.1-32, a drop of 1-8, and round about 3 even in present circumstances they look a rather inviting medium for capital appreciation. Trinidad issues have been dull. Apex are 1-8 down at 1.15-16, Centrals are 1.13-16 at which they are 5-16 lower, while Leaseholds at 1.3-32 show a decline of 3-32.

Among Egyptians Anglo-Egyptian B are 1.7-16 x.d., a decline of 1-16, while Oilfields of Egypt have shed 1s. at 4s. The Roumanian group has shared in the prevailing weakness. Phoenix are 1s. down at 27s., Dacia Romanos are unchanged at 1, while Steaua Romanas are 1s. 6d. down at 11s. Roumanian Consolidated are 18s., a decline of 1s. 3d. At present it would be an invidious task to attempt to prophesy the immediate future of the market. If the mark is not stabilised obviously lower prices will be seen all round, but assuming that the efforts of the Allies to find a solution of the problem are successful, the Oil group will very quickly assume a different aspect.

Banks Dull.

A rather dull tone has ruled in banking descriptions. Chartered of India at 17.15-16 are 5-16 down, National of India are ¼ lower at 44¼, P. and O. Banks are 1-8 down at 13½, while Bank of British West Africa are 4¾, a decline of 3-8.

Egyptian securities are about the same. Aboukirs are unchanged at 21s., Beheras remain at 8, Egyptian Markets are the same at 21s. 6d., while Gharbieh Lands are 1¼.

BARNAGORE JUTE FACTORY.

The report of the Barnagore Jute Factory Company for the year ended March 31 shows a profit, after providing for depreciation, of £31,623, plus £22,185 brought in. A final dividend is proposed of 5 per cent. on the Ordinary shares, making 10 per cent., writing off the cost of land purchased £10,558 and carrying forward £3,286.

ROUMANIAN CONSOLIDATED OILFIELDS.

A cable from Ploesti, dated July 4, states: — Moreni Well 104, (Stavropoleos) still flowing: Well No. 44 (Bana) under control; preparations for big flow will take some days. Chiciura, Well No. 10, finished casing, now drilling into oil.

According to information from well-informed quarters, says a Reuter message from Sofia, the crop of tobacco for the past year has been almost entirely sold as a result of the large demand from abroad. The annual crop of tobacco of good quality in Bulgaria is estimated approximately at 20,000,000 kilos, and yields approximately to Bulgaria the amount of two milliards of levas per annum.

A convention regulating traffic between Bulgaria and Roumania was recently signed by representatives of these countries, says Reuter's Sofia correspondent in a message dated July 8. The convention provides for the organisation between the two countries of a direct passenger and goods railway service.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau," "The Near East," 1, Devonshire Square, London, E.C.2." It must be understood that "The Near East" accepts no responsibility in connection with such replies.

121. Exporter of Greek Ores in Athens, especially of purest quality Magnesite and Chromite wishes to be connected with interested British Firms.

122. Merchant in Galatz, Roumania, wishes to enter into business relations with British firms willing to ship goods on consignment terms. Guarantees by Leading Banks given. Full details on application. Correspondence in French.

125. A firm of British Merchants and Commission Agents in Liverpool desire to extend their connections in the Near East for General Merchandise.

126. Confectionery. British firm of manufacturers extending their export trade in best quality confectionery suitable for sub-tropical climates will supply details to enquiries from oversea buyers.

127. A Firm exporting all kinds of Metals and other merchandise to Egypt and India would like to get in touch with Importers in the Near East of similar goods.

128. General Commission Agent and Merchant in Cairo, Egypt open to represent British manufacturers and merchants on commission. Can also export all kinds of Egyptian products.

129 Principal of old established textile manufacturing and Import Firm in Aleppo (Syria) now in Switzerland, wishes to get in touch with cotton and woollen yarn manufacturers or exporters in Lancashire and Yorkshire.

Cotton & Cotton Goods.

MANCHESTER MARKET.

Effect of Bureau Report.

(From Our Own Correspondent.)

Manchester, Saturday.

The most important event in the market during the past week has been the report of the Washington Bureau on the condition and acreage of the American cotton crop. The condition figure was bullish and raw cotton values immediately experienced a sharp rise. That was on Monday night. Since then a reaction has set in, and many Manchester traders are of the opinion that still lower values will prevail. The present figures point to a total crop of just over 11,000,000 bales, and as the total world's requirements will be in the neighbourhood of 12,000,000 to 13,000,000 bales, there is naturally some apprehension as to whether or not there will be enough American cotton to satisfy all needs, and the crop can be made or broken during July and August. There has been no increased activity displayed by shippers to Egypt and there is still some grumbling at the way stocks of dear goods are thrown out on the market out there. No sales of any weight have been recorded. Egyptian yarn prices have been raised roughly 1d. a lb., 2-40's being quoted at 36d. Scattered cloth transactions in light goods have taken place for India. No business worth mentioning has been done for China. American yarn prices have been raised but weak sellers are still to be found.

LIVERPOOL REPORT.

Business Restricted.

Messrs. Reynolds & Gibson report as follows for the week ended July 5 :—

Conditions have ruled quieter on the spot during the past week, which, indeed, can be divided into two distinct periods (1) Anticipation of the American Bureau report, and (2) The readjustment, which was rendered necessary by the rapid rise in values which followed the publication. These rapid ups and downs in the future markets of the world are all very well for the free-lance speculator, but to the spinner who is hard put to to keep his mill running without loss they are apt to be very disconcerting, and the chief result so far accruing from the recent sharp advance has been to engender a spirit of extreme cautiousness amongst buyers in all quarters. General opinion in trade circles inclines to the view that the advance cannot at present be held—at all events in full. Hence the sitters-on-the-fence have increased in number, and a waiting attitude is popular.

Enquiry in Liverpool has been on moderate lines only, the noticeable features being an improvement in the demand for Uppers (without much business resulting however) and the large amount of " averaging " which has taken place during the week of low and re-cleaned cotton, in the neighbourhood of 8d. and 9d. per lb. The amount of business passing, however, has not been large in this quarter either. The usual steady trade has taken place in Good Fair to Fully Good Fair Sakellaridis, and there appears to be a large quantity of sound staple cotton of this grade offering at from 25 points to 100 points on July contracts. Shipments booked for America months previously, and held up here probably in anticipation of a favourable modification of the Tariff on 1.3-8 inch cotton, are now being offered in blocks, and the owners seem anxious for bids. Sales of Sudan and Tokar Sakellaridis have fallen off somewhat. The fact is the selection has now narrowed down considerably, and of the latter there appears to be scarcely any lots which are at all comparable to the early shipments which found such marked favour earlier this season. Offers from Egypt, equal to what is vaguely described as Tokar Sakel 1, are frequent enough, but past experience has shown that it is unwise to buy Sudan cotton for forward delivery, particularly so late in the year. It has certainly been a wonderful crop this season, and has done more towards breaking down the prejudice which exists against Sudan cotton than anything which has so far been grown there. We can only hope that subsequent seasons will be as successful. C.i.f. business has been very slow this week.

Manchester reports are quite encouraging. Cautiousness is the keynote of the market there, but the tone remains firm, and granted a renewed period of steadiness in values, buying is likely to be resumed. Crop reports from Egypt are, on the whole, very favourable, and working on evidence produced to date we see no reason why a very useful crop should not be gathered. Receipts in Alexandria still continue to be comparatively heavy, and a large carry-over seems to be indicated. Judged on the merits of the Egyptian crop alone, we should be inclined to consider 20½d. for Fully Good Fair a somewhat tall price.

THE EGYPTIAN MARKET.

Decline in Trade Demand.

The Commercial Co. of Egypt, in their report for the week ended June 30, state :—

The market during the past week has been a series of small declines ; the undertone has been poor, in contrast to that ruling last week. The real cause of the weakness has been the dropping off in the trade demand, which has induced the liquidation of the purchases of speculative bulls who entered the market at higher prices in anticipation of that demand which they rather hoped would result from the well-advertised trade revival. That trade is better no one will attempt to deny, but it is an open question as to how far the trade revival in prospect depends on price. The consumers of the world want cotton and will probably take the bulk of actual and prospective supplies at reasonable prices, but demand is, as we have seen, very elastic and rising prices will naturally and surely restrict consumption. The recent rise is an example of this ; buyers have not had a good time during the past 12 months, and are nervous of opening out too rapidly. Another factor which has induced liquidation by local speculative bulls is the approaching publication of the American Bureau Report on the American crop and the anticipation that it will show a condition somewhere in the neighbourhood of 74.

Spot : Total sales amount this week to about 7,000 bales of which we estimate 5,400 bales Sakellaridis, 1,200 bales Uppers, 250 bales Brown, and 150 bales White.

Sakellaridis : There was a fair demand for all grades at the beginning of the week but towards the close business slackened off considerably, sellers being unwilling to follow the drop. As has been the case for the past few weeks the bulk of the sales put through were in the grades Fully Good Fair and below.

Uppers : As for Sakellaridis, less interest was shown towards the end of the week. All grades have been dealt in at about the same basis as last week.

Brown and White : There has been a small demand for these varieties. The basis remains unchanged.

Crop : Crop news is good and it is monotonous to repeat each week that the plant is progressing satisfactorily. A good many complaints are heard of leaf worm, but thanks to the energetic measures taken against this pest the resultant damage is small.

MANCHESTER COTTON REVIEW.

Buyers Holding Aloof.

The cotton trade review of the Imperial Ottoman Bank for the week ended July 1 states :—

General.—The report of the Washington Agricultural Bureau of this week, gave the average condition on the 25th June as 71.2 against 69.6 on the 25th May and 69.2 on the 25th June last year. The report estimates the new crop at 11,065,000 bales, which in many quarters is believed to be insufficient for the world's requirements at the present rate of consumption. On the publication of the figures the New York Market became excited and prices rapidly advanced ¾d. per lb., Liverpool adjustment accordingly. The effect of this on the Manchester market during the past week has been rather pronounced ; spinners and manufacturers raised their quotations at once but the result has been to cause buyers to stand off, presumably until it is seen whether the advance can be held. Whilst the rise is no doubt welcome to holders of stocks it is to be feared that the effect on turnover will for the time being be detrimental. Generally speaking buyers will not operate freely in an unsettled market and as we have said before what Manchester needs at the present moment more than anything else is stability of prices.

Digitized by Google

Yarn.—Prices are ½d. to ¾d. higher on balance, but as stated above there has been much less business offering and the tone on the later days of the week was weaker.

Cloth.—In this section also prices are higher but business has been restricted. India still supplies the greater number of orders; China has done virtually nothing and the Near East not much more.

Raw Cotton.—This has practically been dealt with above. Sales during the past week have been fairly good. The latest reports regarding the Egyptian crop are favourable.

Closing prices are as follows:—American Fully Middling 13.65, last week 13.23; Egyptian Fully Good Fair 20.00, last week 19.75.

ADVANCING COTTON PRICES.

During the past month cotton prices in Lancashire have displayed a distinct upward movement, and in his Cotton Trade Circular published recently Mr. Frederick W. Tattersall, of Manchester, gives the index number for the general average of current cotton values as 197, an advance of 13 points compared with a month ago, and bringing the figure to the level existing at the end of last year. Twelve months ago the index was 175.

The ruling price of each commodity at the outbreak of the late war represents the basis of 100 in each case. On the month Egyptian cotton has risen 20 points to 232, and Egyptian yarn 15 points to 181. American cotton at 194 registers an advance of 18 points, and a 10 point rise has occurred in American yarn, making the figure 205. In cloth prices the hardening tendency has not been quite so pronounced as the appreciation on the month is only 4 points—from 170 to 174.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(*Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade.* 35 *Old Queen Street. S.W.*)

Egypt.

Cement.—The General Manager, Egyptian State Railways, Telegraphs and Telephones, Cairo Station, invites tenders for the supply of 800 metric tons cement. Copy of the conditions (price 200 millièmes) may be obtained at the Office of the Administration's Inspecting Engineer in London. July 25.

Lift-Bridge.—The Inspector of Irrigation, First Circle, Savoy House, Cairo, invites tenders for the construction of lift-bridge on screw piles, Bahr el Baqar Drain, Kilom. 20.1. Approximate cost: L.E. 1,050. July 25.

Stationery.—The Administration of the Egyptian State Railways, Telegraphs and Telephones, Cairo, invites tenders for the supply of stationery, including writing ink; duplication and stamping ink; stamp-pads; carbon paper; pencils; pen-nibs; penholders and pencil holders; erasers; envelopes; filing materials; duplicating machines, etc., materials; inkwells and miscellaneous office requisites. Tenderers must be represented in Egypt. July 27.

Pumps.—Tenders are invited by the Director-General, State Domains Administration (Commercial Service), for the supply of two centrifugal pumps of 14in. and 16in. July 25.

Pumps.—Tenders are invited by the Director-General, State Domains Administration (Commercial Service), for the supply of four hand fire pumps. July 20.

Lathes, etc.—Tenders are invited by the Superintendent, Government Press, Bulaq, Cairo, for the supply of a lathe and of a paper cutting machine. August 1.

Caulking Timbers.—The Inspector of Irrigation, Second Circle Tanta, invites tenders for the supply of 28 pieces of caulking timbers of the following dimensions, total cubes of which amount to 13.945 cubic metres.

No. of Pieces.	*Cubic Metres.*	*Length.*	*Breadth.*	*Thickness.*
8	6.810	7.00 m.	0.38 m.	0.32 m.
8	2.432	4.00 ,,	0.38 ,,	0.20 ,,
4	2.675	5.50 ,,	0.38 ,,	0.32 ,,
4	0.660	5.50 ,,	0.30 ,,	0.10 ,,
4	1.368	4.50 ,,	0.38 ,,	0.20 ,,
28	13.945			

The caulking timbers are required for lock gates and should be in oak. July 15.

Stone Protection Work.—The Inspector of Irrigation, First Circle, Savoy House, Cairo, invites tenders for the construction of a Nile bank stone protection works, 1922-1923. Approximate value: L.E. 4,000. July 20.

School Materials.—The Sub-Director of Stores, Ministry of Education, Sharia Qasr el Aini, Cairo, invites tenders for the supply of school materials required during the school-year 1922-1923. July 15.

MOSUL MARKET INACTIVE.

Crops Damaged by Locusts.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Mosul, June 3.

There is no development to call for comment. The market is very quiet. The crop of cereals having been good this year the *vazné* (13 kilos) of barley sells at present at Rs. 0.12, while wheat fetches Rs. 2.40.

Mosul, June 10.

No business is passing in the market. The locusts, which appeared towards the end of spring and damaged the cereals, have done considerable harm to the cotton and other summer crops.

The report for May states :—

The barley harvest has been concluded under favourable conditions. The yield is good. The wheat harvest is now in progress. Some damage has been caused by locusts and blight. All the same the yield will be better than that of last year.

The market is in a state of stagnation. The butter and wool season is on the point of ending. The results are better than those of last year.

MAMOURET-UL-AZIZ.

A report received by the Imperial Ottoman Bank from Mamouret-ul-Aziz for the month of May states :—

Exports are nil. Imports are a little more active, principally as regards manu factures. But trade becomes more and more difficult, holders not having yet been able to dispose of their old stocks. It may be noted that business has been helped by a reduction in the cost of transport which affected particularly articles of ironmongery. Actually the cost, which in April was 5 piastres per kilo, has fallen to 2.50 to 3 piastres during the current month.

The drought mentioned in our previous report having continued during the first ten days of the month pessimism prevailed regarding the approaching harvest. Happily the drought has not lasted. The rains so impatiently awaited have fallen and have saved the greater part of the crops. Wheat, which had risen 3 piastres per kilo in a week. has returned to its former price.

CZECHO-SLOVAK SHIPPING ON THE ELBE.

Under the terms of the Versailles Peace Treaty, 48 steamers and 254 other craft on the Elbe were apportioned to the Czecho-Slovak Republic. These vessels were taken over by the Czecho-Slovak Elbe Navigation Co., who at the beginning of this month opened a freight service with them and with 14 other steamers plying between Prague and Hamburg. In this way Czecho-Slovakia enjoys direct communication with the ports of Hamburg and Stettin, where she possesses her own docks and wharves independent of all outside control. The Czecho-Slovak Elbe Shipping Company has its headquarters at Prague and agencies at Hamburg, Dresden and Magdeburg. The principal Czecho-Slovak Elbe ports are at Prague-Karlin, Usti (Aussig), Decin (Tetschen).

BANCO DI ROMA IN EGYPT.

Constitution of New Company.

Translation of Decree constituting a "Société Anonyme" (Joint Stock Company, Ltd.) under the name of "Banco di Roma per l'Egitto e il Levante."

We, King of Egypt,

After due examination of the Memorandum of Association drawn by private deed, on the 9th day of February 1921, in Alexandria, by :—

The Banco di Roma, Italian joint-stock Company Ltd., with Head Office in Rome, on behalf of whom are acting Messrs. Giuseppe Vicentini & Carlito Rosa, deputy-Director and Central co-manager respectively ;

The Societa Imprese e Gestioni, Italian joint-stock Company Limited, with Head Office in Rome, on behalf of whom is acting Mr. Ortensio Spigarelli, Barrister, Italian national, domiciled in Rome ;

Mr. Aldo Ambron, engineer, Italian national, domiciled in Alexandria ;

The Baron Felix de Menasce, Landowner, Hungarian, domiciled in Alexandria ;

Ismail Sirry Pasha, late Cabinet Minister of the Egyptian Government, Special Commissioner of the said Government with the "Compagnie Universelle du Canal Maritime de Suez," Egyptian subject, domiciled in Cairo ;

Mr. Grisante Vannucci, Bank Manager, Italian national domiciled in Alexandria ;

Mr. Roberto Emilio Lang, Bank Manager, Swiss national, domiciled in Rome ;

For the constitution of a joint-stock Company Limited, under the name of Banco di Roma per l'Egitto e il Levante ;

After due examination of the Statutes of the said joint stock Company Limited ;

According to article 46 of the Commercial Code ;

On the recommendation of Our Minister of Finance and with the approval of Our Cabinet Council ;

Hereby decree :

Art. 1. The Banco di Roma, the Societa Imprese e Gestioni, Mr. Aldo Ambron, the Baron Felix de Menasce, Ismail Sirry Pasha, Mr. Grisante Vannucci and Mr. Roberto Emilio Lang are authorised, at their risk and peril, without the responsibility of the Government being in any way involved in consequence of this authorisation, to form in Egypt a joint-stock Company limited under the name of Banco di Roma per l'Egitto e il Levante, conditional to their conforming to the law and customs of the land, and to the statutes, a copy of which, signed by them, is annexed to the present Decree .

Art. 2. The present authorisation granted to the said joint stock Company Limited does not involve any responsibility, or imply any monopoly or privilege on the part of or with respect to the State.

Art. 3. Our Minister of Finance is entrusted with the execution of the present Decree.

Palace of Abdine, the 25th day of April, 1922.

Fouad.

In the King's name :
The Prime Minister
A. Saroit.

The Minister of Finance
I. Sedky.

BANCO DI ROMA PER L'EGITTO E IL LEVANTE.

Memorandum of Association.

The Undersigned :

(1) The Banco di Roma, joint-stock Company Limited, with Head Office in Rome, for whom are acting Messrs. Giuseppe Vicentini, Grand Officer of the Order of the Crown of Italy, and Carlito Rosa, Knight of the Order of the Crown of Italy, Deputy-Director and Central Co-Manager respectively of the said Company.

(2) The Societa Imprese e Gestioni, joint-stock Company Limited, with Head Office in Rome, for whom is acting Mr Ortensio Spigarelli, Barrister, Commander of the Order of the Crown of Italy, Italian national, domiciled in Rome.

(3) Aldo Ambron, Engineer, Grand Officer of the Order of the Crown of Italy, Italian national, domiciled in Alexandria (Egypt).

(4) The Baron Felix de Menasce, landowner, Hungarian, domiciled in Alexandria (Egypt).

(5) Sir Ismail Sirry Pasha, late Cabinet Minister in the Egyptian Government, Special Commissioner of the Egyptian Government with the "Compagnie Universelle du Canal Maritime de Suez," Egyptian subject, domiciled in Cairo.

(6) Grisante Vannucci, Bank Manager, Officer of the Order of the Crown of Italy, Italian national, domiciled in Alexandria (Egypt).

(7) Roberto Emilio Lang, Bank Manager, Knight of the Order of the Crown of Italy, Swiss national, domiciled in Rome.

With the object of realising the initiation taken by the Banco di Roma for the creation in Egypt, with the help of local enterprise, of a Financial Institution, established in the land and placed under the protection of Egyptian law.

Whereas such an Institution may contribute to the welfare of Egypt and help to develop commercial connexions with foreign countries, the undersigned have decided to create in Alexandria the Banco di Roma per l'Egitto e il Levante.

To that effect they have agreed as follows :—

Art. 1. The above-named enter into a preliminary association with the object of creating a joint-stock Company limited to be called the Banco di Roma per l'Egitto e il Levante, with the authorisation of the King, and in compliance with the statutes signed by them and annexed to the present Act of which they form an integral part.

Art. 2. The objects for which the Company is established are :—

(1) To discount bills of exchange, promissory notes and other instruments of commerce and in general all documents or letters of credit payable in Egypt or elsewhere.

(2) To negotiate advances for the financing of sowing or agricultural operations necessary for the crops of the year, with or without security.

(3) To grant advances against the deposit of bills of exchange or promissory notes, as a guarantee.

(4) To grant credits in blank, whether in current accounts or otherwise, to individuals or to Companies, to whom the Board deem it desirable to grant such credits.

(5) To make advances against debentures of all descriptions, guaranteed by warrants or receipts for goods of all kinds, deposited either in the warehouses of the Company, or in public or private warehouses, by deposit of bullion or precious metals, by bills of lading or titles of credits, shares, bonds or securities of any kind accepted by the Board.

(6) To grant advances to contractors of works against the cession of the proceeds due on the execution of their contracts.

(7) To receive securities, shares, bonds, debentures, money, precious metals or objects on deposit for safe custody, and, generally, to receive all deposits in current account, or at fixed date and to open cheque accounts.

(8) To realise and hold all securities ; to pay all mandates or orders of payment, to transact all kinds of Savings Bank and banking operations ; to execute any commission for account of private individuals, Companies or public Institutions.

(9) To effect the collection of bills of exchange, promissory notes, dividends, interest, etc., for account of third parties.

(10) To issue any shares or other titles of credit, either for its own account, or on behalf of others ; to undertake the issue and collection of public subscriptions ; to purchase or sell for its own account or on behalf of others, securities and bonds of all kinds.

(11) To issue drafts, letters of credits, cheques, or orders of all kinds, payable in Egypt or elsewhere ; to buy, sell or otherwise deal in bills of exchange, drafts and orders of all kinds payable in Egypt or elsewhere.

(12) To receive money on deposit against the issue of savings books.

(13) To purchase or sell all real property and assets.

(14) And, generally, to undertake for its own account or for account of third parties, all or any commercial, financial, industrial business transactions, or to undertake similar operations

Digitized by Google

in landed or real property assets, either in Egypt or elsewhere, to take an interest or otherwise participate in any other company whose objects are similar to those of this Company, whether by purchase or by partnership.

Art. 3. The Head Office and the registered office are situate in Alexandria.

The Company, unless prematurely dissolved or prolonged, is formed for a duration of fifty years, to date from the Royal Decree authorising its constitution.

Art. 4. The share capital of the Company is fixed at one million pounds sterling (£1,000,000) divided into one hundred thousand (100,000) shares of ten pounds sterling (£10) each.

This capital is entirely subscribed in the following proportions: -

	Shares.	£
(1) Banco di Roma	460,000	600,000
(2) Societa Imprese e Gestioni ..	20,000	200,000
(3) Mr. Aldo Ambron	2,500	25,000
(4) Baron Felix de Menasce ..	2,500	25,000
(5) Sir Ismail Sirry Pasha ..	150	1,500
(6) Grisante Vannucci	150	1,500
(7) Roberto Emilio Lang	14,700	147,000
Total	100,000	1,000,000

A payment of two hundred and fifty thousand pounds sterling (£250,000) has been made to the Alexandria Branch of the Banco di Roma by the above-named, or a quarter of the capital subscribed proportionately to the amount of their total subscriptions.

Art. 5. The undersigned hereby take the engagement to proceed with the obtention of the Decree of authorisation and to discharge the formalities inherent to the proper constitution of the Company.

With this object they confer full powers on Maitre Ettore Pezzi, Barrister at Cairo, and on Maitre Aldo Luzzatto, Barrister at Alexandria, who may act jointly or separately, either in making announcements and regularisations prescribed by the law, or in making such modifications in the Statutes as may be required by the Egyptian Government.

Art. 6. The undersigned hereby declare their adhesion to the prescription of the deliberations of the Cabinet Council on the 17th April, 1899, and 2nd June, 1906, published in the " Journal Officiel " of the 6th May, 1899, No. 48, and 4th June, 1906, No. 61, which are considered as forming an integral part of the present document.

Made in eight copies, of which one to each of the contracting parties, and the eighth to be deposited with the Secretariat of the Cabinet Council as a request for authorisation.

Alexandria, the 9th day of February, 1921,

(Signatures duly legalised by the Mixed Tribunal of Alexandria on the 9th February, 1921)

CZECHO-SLOVAK DEPOSITS.

According to statistics published by the Union of Czecho-Slovak Savings Banks, the increase of deposits in the 364 Czecho-Slovak savings banks amounted in May to 391.6 million crowns, the withdrawals to 347.4 millions, the net increase being 44.2 million crowns. The total amount of money deposited with all the Czecho-Slovak savings banks is 7,952.7 million crowns, of which 4,240.4 millions were deposited with the 193 Czech banks, and 3,163.2 millions with the 169 German banks. In addition to this, the German banks have 68.7 millions of deposits in German marks. The two biggest savings banks in Czecho-Slovakia, viz. the Bohemian Savings Bank, Prague, and the First Moravian Savings Bank, Brno, had 548 millions of deposits towards the end of May.

The Czech Trading Company announces a net profit of 51 million crowns of which some 4 millions will be distributed in the form of a 20 per cent. dividend. The Company has 20 millions of paid-up capital, and during the last year the output of its mines was 1.8 million tons of lignite (86 per cent. of the pre-war output), or 11 per cent. of the total output of lignite, in Bohemia. The Bergnann Leather Factory, Novy Bydzov, announces a net profit amounting to 1.6 million crowns and is paying a 25 per cent, dividend. The company has 4 million crowns of paid-up capital.

COMPANY NOTES AND REPORTS.

Bank of British West Africa.

The report of the Bank of British West Africa for the year ended March 31 last states that the period was throughout affected by the results of the great fall in prices and by world-wide depression of trade, which were nowhere more severely felt than in countries in which the bank operates. The consequences to the bank have been that its earnings have been less, and that the necessary provision for bad and doubtful debts is much greater than usual. The directors consider the conditions under which the bank has operated for the past year to be quite abnormal, and have decided to appropriate £225,000 from the reserve for the purposes of this provision. After providing for current charges (including contribution to staff profit-sharing fund), rebate on bills and for all bad and doubtful debts, there remains £105,935, plus £50,180 brought forward, making £156,115. The directors recommend a final dividend of 3 per cent., making 6 per cent., less tax. The directors also recommend the transfer of £50,000 to contingency fund, leaving £34,115 to be carried forward. The investments stand in balance-sheet at less than their market value as on March 31. Meeting, Cannon Street Hotel, E.C., July 13, 12.15 p.m.

British Cotton-Seed Products.

The accounts to March 31 last show a loss for the period of £4,179. Sundry causes supervened in the summer and autumn of last year which delayed the completion of the first instalment of machines and the commencement of active trading operations until January, 1922. The difficulties encountered and delay experienced are very largely due to the general unrest and disturbed political and economic conditions throughout the world, which, contrary to expectations, have persisted during the period under review. In the directors' opinion there is no ground for anxiety as to the value of the company's property or prospects of remunerative development in the future.

The defibrating machines have proved themselves capable of working continuously and satisfactorily, and the plant, generally, has worked well. Experience gained under working conditions indicates the desirability, in interests of efficiency and economy, of the installation of further special accessory plant for dealing with certain varieties of seed shipped to this country, apart from the process of defibration. The erection of the second instalment of defibrating machines, which had been postponed pending the determination of character and disposition of this additional accessory plant, is now in hand. The cash resources of the company are ample for the erection of further machines and accessory plant, and for general purposes.

Owing to continued unrest in India, arrangements for the formation of an Indian company have been temporarily deferred.

Burmah Oil.

The annual report of the Burmah Oil Company shows that the profit for the year ended December last, after charging income-tax, contribution to employees' provident fund, and directors' fees, and after writing off £1,247,687 for depreciation and fields expenditure, is £1,902,790, to which is added £348,082, brought forward, making a total of £2,250,872. The sum of £20,000 is added to the insurance reserve, and £200,000 is added to the general reserve. The Preference dividends for the year, together with the interim distribution on the Ordinary shares, absorb £641,096, leaving £1,389,776 available. As already announced, the directors recommend a final dividend of 4s. per share, tax free, on the Ordinary capital, making 30 per cent. for the year, which will absorb £1,030,192. The balance it is proposed shall be carried forward subject to corporation tax amounting to £359,584. The directors state that the decline in the value of the rupee, together with lower market values for all petroleum products, account for the lower trading results for the year.

Assam Railways.

The Assam Railways and Trading Company has declared dividends on " A " stock at the rate of 8 per cent. per annum, payable June 22, for the half-year ended Dec. 31, on Pre-Preference " A " shares at the rate of 8 per cent. per annum, payable July 4 for the half-year ended June 30, and on the new Six per Cent. Preference shares at the rate of 6 per cent. per annum, payable July 4, for the half-year ended June 30.

NOTES OF THE WEEK.

The League of Nations Council.

Among the Near Eastern matters that are engaging the attention of the Council of the League of Nations in London this week are the Mandates for Palestine and Syria, and the question of *komitaji* raids in Macedonia. It is unfortunate that this meeting should coincide with a series of demonstrations both in Syria and Palestine against the Mandates. In Syria the opposition would seem to be against the election of France as Mandatory, and on this point the Syrians are, no doubt, basing their action on the clause in Article 22 of the Covenant of the League of Nations which provides that "the wishes of these communities must be a principal consideration in the selection of the Mandatory." The Arab population of Palestine have no objection to Great Britain being the Mandatory, but take exception to what they regard as the privileged position reserved for the Zionist Organisation in the terms of the Constitution under the Mandate. No reference, it will be noticed, appears on the agenda paper to the Iraq Mandate. In that country there is a great dislike for the principle, and Great Britain is being asked to substitute for the Mandate a treaty, as with an independent State, which will embody all the provisions applicable to a Mandate. To this request the British Government opposes the stilted red-tape view that it is bound by the League of Nations to enforce the Mandate however prejudicial it may prove to the real interests of Iraq. But Mandates both for Armenia and Albania have gone by the board, and there is no valid reason in international law or practical politics why Great Britain should not make things easier for Iraq and herself by allowing the treaty—the terms of which are agreed upon—formally to replace the Mandate.

The Komitaji Question.

The reference to the Council of the *Komitaji* question is of particular interest, as it enables the League to fulfil by far the most important part of its purpose, the enforcement of peace among the nations. By this time, if the League had not been in existence, there would have been war or something like it on the Serbo-Bulgarian frontier. The League's Council, it is to be hoped, will investigate thoroughly the question of these frontier bands. It should endeavour to find out not only on what territory they operate, but from what districts the members are drawn. There will be no peace in the Balkans until all *komitaji* bands are suppressed, but there can be no justification for holding the Yugoslav Government responsible for the lawless deeds of Serbs now domiciled in Greece or Bulgaria, or for penalising the Bulgarian Government for the acts of Bulgaria's irredentist population in neighbouring countries, unless direct instigation from Sofia can be proved. An adequate enquiry into the subject must inevitably reopen the question of the wisdom and justice of the Treaty of Neuilly, and if the Council of the League of Nations is well advised, it will not shrink from this, in the interest of peace in the Balkans and European peace as a whole.

The Pashitch Cabinet.

The differences of opinion in the Yugoslav Cabinet, which have been becoming more and more marked of late, came to a head last week, when the appointment of M. Petchitch as Minister of the Interior was vigorously opposed by the Radicals. So seriously did M. Pashitch view the reception of the appointment that he promptly telegraphed to King Alexander, tendering his resignation and that of the Government. Why he should so strongly have resented criticism in this instance, when he has so often been unaffected by it before, is not clear; but it is certainly a misfortune for Yugoslavia that personalities and personal considerations count for so much in its politics. In the present case the trouble has been surmounted, thanks, again, to King Alexander, who declined to accept the resignation of M. Pashitch. The Cabinet has, therefore, patched up its differences once more, in order to pass the Bill authorising the American Loan and the Budget. But the Ministry of the Interior remains without a tenant, and a General Election in the autumn is now regarded as a practical certainty.

The Angora Cabinet.

The Angora Cabinet has resigned as the result of the Assembly's rejecting a Bill which provided that new Ministers (or "Commissars") should be co-opted by Mustapha Kemal and the existing Commissars; and, in opposition to the wishes of Mustapha Kemal, the National Assembly has elected new Commissars. Some of the former Ministers remain in the Cabinet, where Yussuf Kemal Bey still retains the portfolio of Foreign Affairs; but half-a-dozen new names appear, and five of them belong to members of the C.U.P. The new Prime Minister (or "Chief Commissar") is Raouf Bey, who distinguished himself in the Balkan War as Captain of the 'Hamidieh', and who now has an opportunity to distinguish himself again under scarcely less difficult conditions. The supporters of Mustapha Kemal are reported to be perturbed by the unexpected success of

Digitized by Google

the C.U.P.; and the Assembly's assertion of its independence in electing the Ministers will certainly curb the 'Dictator's' power, but it does not necessarily follow that any considerable change in the Angora policy will come about at once. Europe may not regard with favour the achievements of the Angora Government, but we have to recognise that the Nationalist Turks take a very different view of the matter. They undoubtedly believe that Mustapha Kemal and his lieutenants have saved the country from practical annihilation, to say nothing of having administered several snubs to the Allies; and though personal jealousies may now be at work in Angora, as elsewhere, it is probable that the Turks have no serious desire to swap horses until they are safely over the stream.

Kemalists and Bolshevists.

Unfortunately the bonds between the Kemalists and the Bolshevists are becoming closer, instead of looser, as time goes on. We believe now, as we have believed all along, that the partnership cannot survive long, as such: the gulf betwween Islam and Bolshevism is far too wide and too deep for that. The Nationalist leader may go Bolshevist, but the majority of their followers will surely insist sooner or later on a break with the unclean thing. For the moment, however, the prospects of such a break look very remote. At a banquet given lately in Angora by Araloff, the Bolshevist representative there, in honour of Momtez ed-Dowleh, the first Persian Minister to 'Kemalistan,' speeches were made which were worth notice. Araloff himself, Mustapha Kemal, and Yussuf Kemal Bey, the Angora 'Foreign Minister,' all emphasised the growing solidarity of the peoples of the middle Orient, the economic interests that should bind them together, and the service rendered to them all by Bolshevist Russia. Moreover, we learn, the Afghan Ambassador at Angora is showing great activity in propagating the same ideas. Moscow, it has to be acknowledged, has achieved remarkable success in the Near Eastern field, and the fact that much of it is undoubtedly due to the Allies' folly in the same region makes the reflection no easier to bear.

Great Britain and Egypt.

Speaking at the Union Club, Alexandria, where he was entertained last week, Lord Allenby took a hopeful view of the prospect in Egypt. England and Egypt, he said, were bound by ties of a friendship founded on co-operation in the interests of the country; and he stated that all the difficulties of the transitional stage were being successfully surmounted owing to active support on the part of the British. As it was undoubtedly Lord Allenby's advice and his insistence on his point of view that led the British Government finally to follow the line now being pursued, and as he is in the best possible position to estimate the situation aright, it is satisfactory—not to say reassuring—to have this expression of optimistic feeling on his part. At the same time it is impossible to avoid expressing a hope that signs of more friendly co-operation on the part of the Egyptian people—or that vocal part of it which appears to be the only one that counts in these days—will soon be observable. Great Britain is ready to lend active support, and she may not expect much gratitude in return; but she would be glad to see the end of the campaign of assassination of British subjects which has been so much in evidence of late. The attack on Colonel Piggott, of the Army Pay Department, in the heart of Cairo last Saturday morning brings the total of these outrages in a few months up to fourteen.

Government Authority Mocked.

The fact appears to be that the agitation in connection with the "independence" movement has thoroughly unsettled Egypt. The Cairo correspondent of *The Times*, who has shown himself a very good friend to the Egyptians, reports that "the state of public security in the provinces has for some time been steadily growing worse," and gives a truly gloomy picture of things, even going so far as to declare categorically: "Certain districts, particularly in upper Egypt, are entirely in the hands of brigands." He attributes this state of affairs to the absorption of the *mudirs* in politics and to the infection of their subordinates with the same complaint; and there is no good reason to call his explanation in question. Whatever the cause, he declares roundly that "There is, indeed, no blinking the fact that the authority of 'Al Hukuma' (the Government) is to-day non-existent in the provinces." But he adds that the seriousness of the situation is now realized, and that there has been quite recently a visible tightening up of control from headquarters. It would be well if the effects of that tightening up could be seen also in the capital. Neither the Europeans in Egypt nor the British Government will tolerate an indefinite number of 'political' assassinations; and with every desire to make all fair allowances for the difficulties of the Sarwat Cabinet, the British Government cannot, in its desire to lend "active support" to Egypt, ignore the claims upon it of its own subjects.

Anxious Minorities.

It is probable that the state of affairs described by *The Times* correspondent (and others) is largely responsible for the anxiety regarding the representation of minorities which is now manifesting itself among the people concerned. Our Cairo Correspondent reports, in his letter published on another page, that the Copts, the Jews and the Catholics, both Greek and Armenian, are expressing their views on this important subject at last, after keeping silence when Moslem feeling was running high; and it will be very surprising if, in view of all the present-day expressions about protecting the rights of minorities, they do not eventually secure guaranteed representation in the new Egyptian Parliament. That it would be greatly to the advantage of Egypt that they should do so is hardly to be questioned. The Sarwat Cabinet would probably be willing enough to accord them such representation were it not for fear that by so doing they would provide the extremists with yet another stick with which to belabour them

Reaction in Persia?

According to a report published in a Bolshevist journal of Moscow, a military dictatorship has been proclaimed at Teheran, and the Minister of War has been appointed Dictator. Readers of these Notes would never be surprised if such a state of things did actually come about; but having regard to its origin, we must receive the Moscow report with suspicion, and it seems, in fact, to be intended to account for a certain falling off of Soviet interest at Teheran of late. According to the same journal the "reactionary" element is in the ascendant in Persia to-day, and as a result the country is —of course—beset by every ill imaginable; brigandage is worse than ever, the Treasury is empty, even the official Bolshevist correspondence is opened by the

Digitized by Google

Persian authorities, and, worst of all, British influence is increasing once more. In point of fact, it might be no bad thing for Persia, as we have hinted before, if a military dictatorship were declared. The Democrats would squeal, of course, but it would be interesting to see whether a man of character, such as Colonel Riza Khan, the Sardar Sipah, could not do better for the country than the Mejliss has been able to do since it came into being.

THE WEEK AT HOME.

Monday Evening.

The German Mark.

The fall of the German mark to something rather cheaper than the average wall-paper has given an atmosphere of gloom to everybody this last few days. Even those who clamoured for Germany to be let off the cost of reparations have not been too happy; while others have gone about assuring everybody that civilisation was top-heavy, and about to collapse, that Europe is finished, and bankruptcy awaits the whole world. The situation is serious enough without indulging in these wild laments, and the ordinary man, who does not understand the foreign exchanges, is confident that the experts have pulled too long a face. Even the failure of the Hague Conference has not made much difference; little was expected from it at the start, and nothing has come of it. It merely showed, as did Genoa, that while the Bolshevists are in their present mood, nobody can do business with them.

The friends of Russia, who banked rather heavily, if not on a change of heart, at any rate on Moscow "assuming a virtue if they had it not," are rather dashed by this evidence of intransigence; but there is no disposition to blame the British Government. After all, it only assumed that the Soviet authorities, who were understood to be hard pressed for money, would be reasonable in their proposals for obtaining it. As they are not, there is really very little more to be said.

Reparations and the Moratorium.

A great deal has been written during the past few days as to the German moratorium, but the economists as usual have been rather confused, and there is a very perceptible under-current of feeling that the Germans have brought their misfortunes on themselves, and have played anything but a straight game. Roughly the argument goes that, if France was able to pay up an indemnity in 1872, there is no reason why Germany should not do the same, and that in any event she ought to pay for the destruction of French property, much of it calculated and wantonly done. It is admitted that France put her bill too high, but that was because she did not get the security she expected against another attack by Germany; but in spite of a rather elaborate propaganda in favour of Germany, one does not see the slightest reaction towards the poor Berliner over here. He may get out of paying for the war which he provoked, but we shall not think the more of him on that account.

Tariffs and the Exchanges.

Bound up with this question of reparations and the exchanges is the eternal tax controversy. The fabric glove business is still being discussed rather languidly, but that is only a pretext for the debate on the larger problem.

The points at issue are simple. The exchanges have disorganised all foreign trade, and what is left is being hit by tariffs. The post-war world is most emphatically a tariff world; even the United States, which wants Europe to pay her bills for war loans, has raised her tariff so that it is impossible to trade with her, and consequently to pay her. All this reacts on shipping, and in fact on every industry which lives by export. The protagonists of Germany assure us that if all war debts and reparations are cancelled, the lion will lie down with the lamb, and trade will flourish again; but they do not seem too certain of their own diagnosis, for there are still the tariffs to surmount.

Back to the Land?

If the export trade is to be permanently reduced between all countries, things will become difficult in the big manufacturing cities, and some of us will have to go "back to the land"—which sounds more attractive than it is. As things are, our chief export at the moment is human beings, but emigration is not really on a large enough scale to make any appreciable difference. The unemployment figures gradually drop, but they are still very heavy, and they tell their own tale week by week.

Trade and the Bank Rate.

The fall in the Bank Rate—it came down to 3 per cent. last week—is good or bad, according to one's disposition or necessities. The Stock Exchange likes it, because it forces money out of deposit accounts into stocks and shares. Companies making new issues—and there are several just now—like it, because it helps them. It assists to finance business generally; but then, says the pessimist, that is only because there is no business about to be financed, and money is only cheap because it cannot be remuneratively employed.

Unluckily there is a great deal of truth in that contention, which comes back to the decay of the export trade, the increase of tariffs everywhere, and political and other uncertainties. Sir Robert Horne, the cautious Chancellor of the Exchequer, was able to claim on Friday that things are slowly improving, but it is the slowness rather than the improvement that one hears most about where City merchants congregate.

One man whom I have always looked upon as a very prosperous person told me the other day that his profit last year was not enough to pay his office rent, and everybody in his particular street—which I forbear to name—was in the same boat. Apparently a number of manufacturers as well as merchants are not much happier. They see daylight ahead, but it is a long time coming; meanwhile they carry on. When the heavy establishment charges are met, there is little enough for the principals.

Quiet Westminster.

Parliament was quiet last week, and so far as one can foresee, the session is likely to remain peaceful to the end. The Budget is through—its easy passage owed something to the tactful piloting of Sir Robert Horne, but there was little real opposition. The Liberals put up a show of objections for form's sake, but it was only a sham fight; and Labour merely growled and talked nonsense—which it knew was nonsense—about a rich man's budget, and acquiesced.

A more controversial matter was touched on in the introduction last week of certain resolutions as to the reform of the House of Lords. This is supposed to be peculiarly the province of the Die-Hards, who have no belief in reform *per se*, but merely want the repeal of the Parliament Act, in order to use the House of Lords in

the future as a bulwark against a possible Labour Government, with which the *Morning Post* threatens us, like "the coming revolution," to make our flesh creep.

The Liberals, of course, admit the case for reform in theory—they can hardly help themselves, in view of Mr. Asquith's "debt of honour that brooks no delay"—but they have no definite ideas how reform is to be carried out. Theoretically they believe in a more or less elective House of Lords, with certain nominated members—for example, the President of the Free Churches as well as the Archbishop of Canterbury, and a certain number of *ex-officio* representatives of intellect—say the Astronomer Royal and the President of the Royal Society. But in practice the Liberals are afraid that a reform of this kind, which would turn the House of Lords into a sort of Senate, would tend to weaken the Commons, and they are rather nervous over the whole business.

The country as a whole appears to take little interest in the topic; and this last week the only Lords it has cared twopence about has been the far more attractive institution at Marylebone, where Cambridge beat Oxford by an innings and a hundred runs. The weather was not too good, and it rather favoured the winner, but Cambridge was easily the better side.

Sunday Games.

The London County Council last week, after a long controversy, decided by a large majority to open the parks to Sunday games. It is rather astonishing that it was not done before. A great deal has been said about the "Puritan Sunday," and the "Continental Sunday" by the protagonists of rival sides, but both these views strike me as rather wide of the mark. Anybody who has been in London on a Sunday realises that the majority of young people do not go to church, and however regrettable the fact may be, they have no intention of going to church. But then they have nothing else to do, and it is a most depressing spectacle to see them roaming about aimlessly, utterly bored with the dulness of life.

Those who have bicycles or motor-bicycles ride out into the country, where they have tea on some distant common with their "young lady," who rides pillion; one wishes at a pinch, they did not ride so fast, but it seems a point of honour to do thirty or forty miles an hour, and to make as much noise as possible. Personally I think there is something to be said in favour of the peace of the Sabbath—but except in some village remote from main roads, I do not know where to find it; if only some beneficent inventor could construct a silencer for human beings as well as motor-cars, what a happy world it would be! Sunday games will at least keep people out of mischief.

The L.C.C. Hall.

Mention of the London County Council reminds me that the new County Hall was opened by the King this afternoon. It is a magnificent building, in a style which many people prefer to that of the Houses of Parliament, which it almost faces on the south side of Westminster Bridge. I have fancied that not a few members of Parliament are rather jealous of these new glories of "a mere municipality"; but they have been rather chuckling over the statue that has been presented to the Council by an ardent admirer for use in its sessional chamber. The statue is of Eve—I do not know what relation she had to the L.C.C.—and candour compels me to record the embarrassing fact that it is in pre-fig-leaf costume. The Council, however, do not appear to think as highly of the statue as does its donor, and would appear to have relegated it to obscurity.

Ireland.

There has been little news from Ireland this last week, and a strict censorship has been maintained by the Provisional Government as to happenings in the provinces. It is admitted that heavy fighting has occurred at Limerick, where it is claimed that the Republicans had the worst of it; but the real danger-zone appears to be Cork, and in that district the Republicans are admittedly supreme. They have commandeered stores, houses, and newspapers—the latter of which they naturally fill with their own propaganda—and so far the Government have not attempted to handle this hornet's nest. Curiously enough, Mr. Michael Collins is one of the members for Cork, which has thus repudiated or been made to repudiate, its own leader; but this tolerance of the rebels in the South obviously cannot be maintained for long.

More Spiritualistic Trickery.

Spiritualism has just received another blow in the discrediting of the "Goligher circle" experiments, which were carried out in Belfast between 1914 and 1920, and which impressed a great number of people. Dr. Crawford, the originator of the experiments, committed suicide, but at his request these were carried on for some time under stricter conditions.

A little book has now been published which shows that as soon as the possibility of trickery was eliminated the phenomena ceased. The medium was seen to levitate a stool with her foot—which is not precisely what is understood by levitation. The "raps" made by the medium disappeared when the medium's ankles and feet were securely tied with stout thread, the knots of which could not be undone; and ectoplasm when shadowgraphed bore strong resemblance to chiffon or ninon, and when invited to final tests, the medium declined the proposal.

Altogether this book on "The Goligher Circle" (John M. Watkins) is an illuminating document. But I suppose some people with continue to believe, for all that, and I understand that Sir Conan Doyale has recently published another book which indicates that his faith is unshaken.

OCELLUS.

TOPICS IN PARLIAMENT

The subject headings are those given in the Official Report.

Anglo-Persian Oil Company (Payment of Calls) Bill.—(Continuation of Official Report for Wednesday, July 5, but published in O.R. for Thursday, July 6.)

Egypt: Murder of British Subjects.—Near East.—Natal (Indian Subjects).—Egypt: Deportees; Crockery (Zaghloul Pasha's Portrait).—Sudan.—Asia Minor.—(Thursday, 6th July.)

Soudan (Nile Water Supply).—Egypt (British Officials, Compensation).—Indian Railways (Material Orders).—Greece and Turkey.—Tariffs, Greece.—Anglo-Persian Oil Company.—(Monday, 10th July.)

India: Civil Service (Pensions); Trans-Indus North-West Province.—Iraq (British Treaty).—Palestine: Pledges to Arabs; Concessions.—Greece and Turkey.—Egypt (Zaghloul Pasha).—Iraq.—Service Officers, India (Promotion).—Kantara-Rafa Railway.—(Tuesday, 11th July.)

Samsoun (Bombardment).—Peace Treaties: Cilicia (Hadji Adil).—London to India Air Service.—India: War Decorations; Army Reserve.—Greece and Turkey.—Greece and Turkey.—Reparation (Bulgaria).—(Wednesday, 12th July.)

Mesopotamia (Mandated Territory).—Asia Minor.—Indian Affairs.—(Thursday, 13th July).

General Gouraud, High Commissioner of Syria, has ordered a series of sixteen postage stamps for the forthcoming Lebanese issue. Local scenes will form the main feature in the designs.

THE NEAR AND MIDDLE EAST.

From Our Own Correspondents.

EGYPT.

Life at Alexandria. *Cairo, July 6.*

With the transfer of the seat of Government to Alexandria, or more strictly speaking to Ramleh, life in Cairo has become more or less uneventful. All social and political activities are now concentrated in the sister-city by the sea, where all who can get away, have sought—and found in its at present delightful climate,—relief from the over-powering heat that descended on the capital ten days ago. The season may now be considered to have begun. The bathing-beaches are full from early morning; racing attracts large crowds every Saturday and Sunday at the Sporting Club; and the hotels, particularly San Stefano Casino, with its flower filled gardens, are already doing excellent business. For those whose circumstances or responsibilities prevent them from going to Europe, Ramleh constitutes a delightful summer resort, while to the members of the Sudan Civil Service who are able to take a few weeks' leave but cannot get home, it offers a respite from the rigours of the Sudan climate, which is a veritable god-send.

The Representation of Minorities.

The question of the representation of minorities in the new Parliament is coming to the fore again. In this country it is only the latest incident or event that absorbs public attention, and consequently this question, which aroused a veritable tempest in the vernacular press at the time the Dustour Sub-Committee dealt with it, has latterly suffered eclipse from the other burning questions which succeeded it, such as the status of the Sudan, the compensation to foreign officials, the renting of a building for the new Parliament, the Foreign Office Note, the indemnity bill and the reduction of the war bonus.

CAIRO STATION.

The leading members of the various communities, who kept a discreet silence while the tempest raged in the Moslem press, have apparently now found their courage; and during the past week or so the heads and leading members of the Jewish, the Orthodox Coptic, the Greek Catholic and the Armenian Catholic communities have freely expressed their views on the question. One and all profess that they desire to see the national union perpetrated, but one and all declare that it is in the interest of that unity that the right of the minorities to guaranteed representation in the new Parliament should be recognised. In view of the rising feeling in the minority communities it would appear that the Dustour Commission, which has declared that it will take into account all expressions of opinion, will be compelled to revise the decision of its Sub-Committee in this connection.

Mention of the Dustour reminds me that a new party called the Conservative Party is in course of formation by Mohamed Sherei Pasha, a wealthy landowner of Middle Egypt, who sat in the Legislative Assembly and, while an ardent Nationalist, has done much in order to bring about a reconciliation between the English and the Egyptians. Sherei Pasha tells me that he is very anxious with regard to the future, as a result of the proposal of the Dustour Commission that any Egyptian shall be permitted to sit in the new Parliament, provided he is twenty-five years of age and has not lost his civic rights or been guilty of a crime.

He, and the Party which he is forming, consider that this lays the country open to the danger of having in the new House a large and growing proportion of members possessing no stake in the country. In their opinion candidature for Parliament should be restricted to Egyptians paying an annual tax of say L.E. 100, possessing higher certificates granted them at least five years before they stand for Parliament, or in possession of an income of L.E. 1,000 per annum. It was as a matter of fact on these lines that the Dustour Sub-Committee first drafted its proposal; but it subsequently decided to remove such restrictions, in order that the new Constitution should be made as liberal and free as possible.

There is a good deal to be said for Sherei Pasha's proposal. In any case a perusal of the report of the Dustour Sub-Committee gives the impression that, in its desire to place Egyption a level with other civilized countries, which have gained their present measure of political freedom as the result of hard experience, the Dustour Committee is taking the country the whole length of the road towards self-government and universal suffrage, regardless of the fact that the people are as yet politically uneducated. Should the danger, which many Egyptians in addition to Sherei Pasha foresee, arise, it would be extremely difficult to introduce limitations, whereas if at the outset restrictions are imposed, certainly no harm will be done and, as experience is gained and the country develops its political sense, they can gradually be removed until the much desired freedom is secured.

SUDAN.

Khartoum, June 29.

The Political Situation.

Recent expressions of opinion in these columns appear to have provoked a storm of comment in the Egyptian Press, and if the verbosity and virulence of the various writers may be taken as a criterion, the articles must either be of absorbing interest or else the Egyptian papers have written themselves out and are really hard up for copy.

The tortuosity of the Oriental mind is fully evidenced by the malicious mis-interpretation of my letter of May 20 last. It must be apparent to the weakest in-

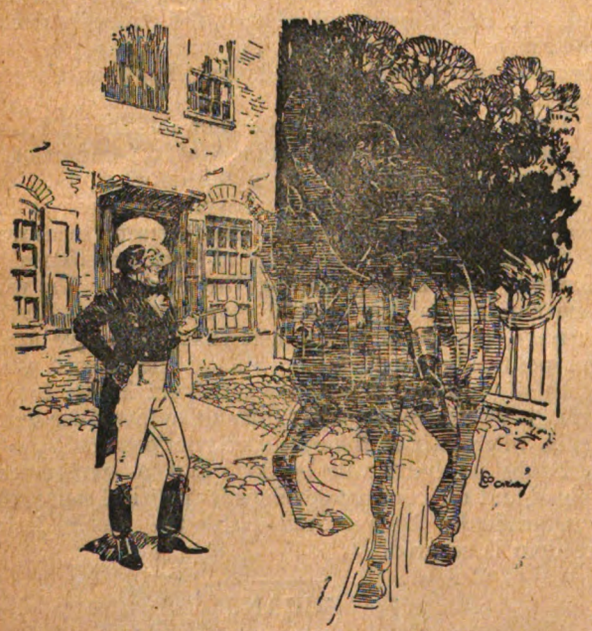
Digitized by Google

tellect that the Sudan Government cannot and do not countenance any attempt at anti-Egyptian propaganda, and in the same way are equally bound to put a stop to anti-British vapourings, so long as Great Britain and Egypt remain jointly responsible for the Sudan. We hear a good deal from Egypt as to the thousands of Egyptian lives and millions of pounds sacrificed by that country in keeping the Sudan, but very little about the numerous British graves that dot the line of advance from Wadi Halfa to Omdurman, and not a word about the free gift of money from the British Government that made the re-occupation of the Sudan a possibility. El Miralai Mahmud Bey Hilmi Ismail in his article in the *Akhbar* of the May 12 last is somewhat unfortunate in laying stress on the number of Egyptian lives sacrificed in holding the Sudan, as this statement would appear at variance with the supposition that the inhabitants of the Sudan are one with the Egyptians in religion, racial characteristics and political ideas. He further refers to the unusual wording of the telegram from the Acting Governor-General to the King of Egypt, ignoring the fact that a stereotyped form of telegram is despatched for the Big and Little Bairam, the form of which has not varied for many years, and which rumour states was framed in the first instance by a senior Egyptian Officer.

The Editor of the *Ahram* is especially firm on the point that inhabitants of this country are prevented from free speech. It is evident that he is not a subscriber to the *Hajaret el Sudan* recent issues of which should be of interest to Egyptian journalists.

A considerable amount of importance has been given to the trial of Mulażim Awal Abd-el-Latif, who has been put on a pedestal as a hero by the Egyptian press. He appears to have very few sympathisers in this part of the world, and the crowd of " over 3,000 persons " who are alleged to have awaited the results of the trial were conspicuous by their complete absence. It is a rule in most armies that no commissioned officer whilst still serving may hold or attempt to hold political meetings, and a year's imprisonment is not a severe punishment for flagrant and continuous disregard of military orders.

Born 1820———Still going Strong!



HISTORICAL SPIRIT SERIES NO. 3.

DICK TURPIN: The "Spaniards," Hampstead Heath. Built in 1630—a favourite haunt of the picturesque highwayman, Dick Turpin.

Shade of Dick Turpin: "Ah, 'JOHNNIE WALKER'—if only I had been alive to rob you of a bottle or two."

JOHN WALKER & SONS, LTD., SCOTCH WHISKY DISTILLERS, KILMARNOCK, SCOTLAND.

It is only a race that is degenerate enough to allow its mobs to be led by school-boys hardly out of their teens that would pay serious attention to the flatulence of such small-fry as the individual in question.

Useful Legislation.

A very important step towards the self-autonomy of the Sudan is the " Powers of Nomad Sheikhs Ordinance 1922 " granting powers to Sheikhs of nomad tribes subject to their administrative jurisdiction to punish offences committed by and to settle disputes among members of their own tribes who are under their authority. This would appear to be a sound economic step, apart from other considerations, as it will eventually tend to do away with many minor administrative posts, with a consequent saving in expenditure.

Mr. What's-'is-name.

A rather unfair attack has latterly been made in the Egyptian Press on Mr. What's-'is-name—the British Non-Commissioned Officer attached to the Egyptian Army, for which he has done so much, since the bad days of Arabi. Now, however, that British drill instructors are no longer considered necessary, his past services are forgotten, and he is accused of keeping commissioned Egyptian officers out of comfortable office jobs. Any office-work in the Sudan may be considered as a mild form of purgatory and, if the facts were known, it is highly probable that the suggestion that the British N.C.O. should surrender his chair to a native officer would be readily welcomed by those parties immediately concerned. A large amount of reconstruction in the Sudan after the re-occupation is due to the untiring efforts and self-sacrifice of Rudyard Kipling's Mr. What's-'is-name, and to those who know him and have worked with him, it cannot be otherwise than a matter of regret that he should be the object of ungrateful criticism by journalists who have never been fortunate enough to come in contact with him.

Fire-Prevention.

The destruction of the Beit-el-Amana and one or two other serious fires that have recently taken place have resulted in the appointment of a Committee to inquire into existing methods of fire-fighting. The inadequacy of appliances at the disposal of the municipal authorities has caused a certain amount of anxiety in some quarters and much activity is noticed in the fire-bucket and hose markets. Both the Police and the Military have their own system of fire-alarms, but it has come as rather a shock to the community that neither body had any idea of the other's methods, or fire-calls. However, there is no doubt that the matter is now receiving adequate attention, and we may hope to see the latest type of motor fire-engine complete with bell traversing our rugous streets in the near future.

PALESTINE.

Expectant Days. *Jerusalem, July 9.*

Two months ago in these columns an attempt was made to describe the end-of-the-age kind of atmosphere which seemed to be brooding over the country. At the present moment this feeling is approaching its limit of tension. A few days will see the status of the country formally fixed by the League of Nations, and the problem which is worrying the Administration is whether the ratification of the Mandate and the Balfour declaration is going to be the harbinger of a peaceful submission by the discontented Palestinian factions to a *fait accompli*, or whether it will be the prelude to really serious trouble. At the moment a certain show is being made of the armed forces which lie at the Administration's disposal—Indian troops, the native and British gendarmeries and armoured cars—in readiness for the expected crisis, due in about a week's time.

Moslem-Christian Association Meeting.

In Arab political circles there has been very considerable stir during the past ten days or so. The House of Lords' resolution infused a certain amount of hope that the Mandate might not, after all, be ratified at the forthcoming session of the League of Nations. A special meeting was summoned of the Executive Council of the Moslem-Christian Association. It passed a large number

Digitized by Google

of resolutions, including votes of thanks to the House of Lords, and appointment of Delegations to the Hejaz and the Vatican. The outstanding items of the meeting were however, the resignation of its President, Aref Pasha, Dejani, and the proposals to recall the Palestinian Arab Delegation at once if the Mandate were ratified; and to mark the days July 13 and 14 as days of protest against the British Government's Palestinian policy, by stopping work and arranging peaceful demonstrations.

The reason for Aref Pasha's resignation was his disagreement with the policy of the Association. At this meeting he read letters from members of the Delegation in England which acknowledged the futility of their work, and confirmed his own opposition to the despatch of the additional delegations. Omar Effendi Bitar, President of the Jaffa branch of the Association, was elected in his place. As is the way in this country, the cause of Aref Pasha's resignation or dismissal is being traced back to deeper roots—that the older established Huseini family clique engineered his downfall from family jealousy; that Aref Pasha had long been under French influence, which demanded that he countermand the Hejaz Delegation project; since this lifted the Christian Moslem Association's activity beyond the limits of an internal Palestinian problem, and linked it on the whole Pan-Islamic movement from which France, by her heavier commitments in Syria, stood to be the chief sufferer. Be that as it may, Aref Pasha resigned, and, last Tuesday, the Hejaz Delegation went on its way and, according to the latest news, is at the moment busy in Egypt, lavishing money generously on telegrams to all the Oriental kings and princes, sultans and emirs, seeking their help.

Reception of the White Paper.

In the meantime, there has been additional fuel to the excitement. Seven days ago a brief *résumé* of the contents of the official White Paper from the Colonial Office was published locally, outlining what Great Britain considered its correct line of policy in carrying out its mandatory issues in Palestine. The effect of this document in certain Jewish circles was curious. The new Jewish element of the country saw no good in it, but only a further whittling down of the Balfour promise. *Ha-Aretz* (Russo-Jewish and existing Zionist Administration point of view), for example, talked long and bitterly about how every new official interpretation of the "Jewish National Home" idea, as envisaged by the British Government, left it more and more anaemic; how Mr. Churchill, fifteen months ago, saw in it nothing but an "experiment" which might or might not justify British support; how the High Commissioner a little later, by all but blocking up the channel of immigration, emasculated the Balfour Declaration, leaving Palestine even less of a Jewish National Home than was, *e.g.*, Canada or Australia; and now this last official pronouncement seemed to knock out the last stick of the scaffolding of the Jewish Palestine, by constituting a Legislative Council and an Immigration Advisory Board, both, from the outset, to comprise an anti-Jewish majority.

But this view is an extreme one, even among this part of the Jews; and the article in question failed to meet with the entire approval of the rest of the staff of this particular paper. It is noteworthy that since that outburst the subject has been left altogether alone by the paper.

The complete text of the White Paper was published in the Hebrew Press a day or two later. It was recognized at once as a document of supreme importance. Curiously enough it seemed to please the bulk of members of every party. It is the highest possible tribute to the high diplomatic quality of the official statement, that the pro-Arab thought it was the most favourable statement so far issued on behalf of Arab interests in Palestine; while the pro-Jew was equally pleased, and the non-party foreign element in the country looked on it as a fair and balanced statement of the rightful claims of both sides.

The Commons' Debate.

Far and away the greatest event of all was, of course, the news which reached us at mid-day on Wednesday last, of the result of the debate in the House of Commons the previous night. The news was awaited with feverish interest, for everyone alike was inclined to attach the utmost importance to the outcome of the attack in the Lower House. The House of Lords' resolution had rather shaken the Jewish nerves and made the Arabs unduly hopeful; so the result in the Commons came as a shock, pleasurable or the reverse, to all concerned. Jewish faith in Great Britain—which had become excessively shaky in recent months on account of the defection of the Northcliffe Press and the healthy crops of anti-Semitism which had appeared even in Parliament—became wholly and rhapsodically revived; and the Christian-Moslem Association's Executive Council summoned a special gathering.

This meeting may turn out to be of unusual importance. It was held the day before yesterday, at the house of Musa Kiazim Pasha el-Huseini (Head of the Arab Delegation in London) and was attended by representatives from Jerusalem, Jaffa, Nablus, Haifa, Gaza, Hebron, Akka, Bethlehem, Bet-Jala, Ramallah, and the sheikhs of certain Arab tribes, such as the Beni-Hasan, Beni Zaid, and Beni Malek. Sheikh Muhammad Murad, the Mufti of Haifa, led the proceedings. He called for strenuous action to meet the present serious emergency, and warned his hearers of the danger that lay in a despairing acquiescence in their apparent failure.

The meeting confirmed the resolutions of the previous week—that the Delegation return at once from London, after informing the British Government and the League of Nations that it opposed the British Mandate over Palestine; and that all villages and towns in Palestine cease from work on July 13 and 14, as a protest against the present policy. A further suggestion was put before the Meeting that from henceforth the Arabs should refuse to pay taxes to the Government "which prepares for the nation fetters of iron wrought out of the nation's own money." This suggestion was not accepted.

But side by side with all this excitement there is no concealing the fact that the commercial element in the country, the small capitalists and tradesmen, are completely indifferent to these higher politics, and often startlingly ignorant of them. The ordinary representative of this class is, perhaps, the truer type of Palestinian who, for well nigh two thousand years, has resignedly submitted to all the furies and changing policies which have passed over him and his country. He has never before been consulted as to how he would like to be governed; his highest ideal has ever been to adjust himself as well and as quickly as he could to each new phase in his environment. One wonders how far this may not, even now, be the true frame of mind of the native of Palestine! It is hard to believe that the brief dose of the heady doctrine dubbed "self-determination" can have driven out altogether the effects of the trained adaptability of twenty centuries.

ROUMANIA.

Bucharest, July 4.

Constitutional Reforms.

A sitting took place this week under the presidency of the Prime Minister, attended by Cabinet Ministers and a Parliamentary Commission for the purposes of deliberating on the newly proposed Constitution. The Commission, which is composed of eminent legal authorities, submitted, for discussion by the Council, certain questions, of which the most important were contained in Art. 7 referring to individual naturalisation, capital punishment and nationalisation of the subsoil. Everything was discussed in principle only, the actual decision being left to Parliament.

In regard to capital punishment, the authorized civil and military representatives of Transylvania suggested that in view of the state of mind of criminals in that province, the old law of capital punishment ruling there before the War should be allowed to continue. Capital

Digitized by Google

punishment in the Old Kingdom has so far been unknown.

Passing to the question of nationalization of the land, M. V. Bratianu, Minister of Finance, proposed that the whole of the land of the country should be nationalized. M. I. Bratianu, the Premier, asked experts in the matter to give full details and to show how this question was solved in other countries. Further discussion was postponed until the next sitting.

Communist Trial.

The Communist trial, which lasted more than four months, has at last come to an end. The major portion of the accused (about 200) benefiting by the recent Royal amnesty for political offenders, were set free. The remainder, the perpetrators of the Senate bomb outrage and other outrages in Bessarabia, were convicted and condemned to various terms of imprisonment. The chief culprit, Max Goldstein, the instigator of the Senate outrage, was condemned to penal servitude for life. Similar sentences were passed on nineteen other accused persons, in their absence, whilst the remainder of the accused escaped with sentences varying between one month's imprisonment and five year's penal servitude.

The Funeral of M. Take Jonescu.

The special train bringing M. Také Jonescu's body to Bucharest, was stopped at every important Roumanian town on the way and wherever large crowds had gathered to pay their last homage to the illustrious dead. At Bucharest, where an immense crowd assembled, the body was solemnly received by the high ecclesiastical, civilian and military dignitaries. The body was conveyed to the Athenaeum, where it lay in state until Friday, when the State funeral took place and numerous speeches of eulogy by distinguished personages were made. The journey from Bucharest to Sinaia, where the body was interred in the local Monastery, was also marked by public manifestations of homage and sympathy.

Various News.

The Infanta Beatrice of Spain and the Duchess Kira, daughter of the Grand Duke Cyril, have left Bucharest.

The famous American financier, Mr. Frank Vanderlip, has paid a flying visit to Bucharest. He interviewed the Prime Minister, M. I. Bratiano, and other political and financial notabilities.

YUGOSLAVIA.

Liubliana, July 7.

The Women's Congress.

As reported on another page, the Yugoslav manufacturers have been holding their second congress at Bled; and the Yugoslav Women's Union have also foregathered in Liubliana, from July 5 to 7, to discuss the many social and ethical problems bound up with the Women's Movement in every country. It was the third Women's Congress here. The first took place in Belgrade, the second last year in Zagreb, the next will be in Serajevo. The gathering was large—about 400 delegates attended the meetings—and thoroughly representative. Important delegations had come from Belgrade, Zagreb, and Serajevo; and almost every other town of note had sent a delegate or two. It was interesting to recognise in the Zagreb delegates the very ladies who had presided over the stalls full of beautiful Croatian peasant embroideries at the Zagreb Exhibition a couple of days before. Here and there the monotony of modern dress was relieved by the quaint magnificence of national costumes. The President of the Congress was Mme. Tavcar, whose husband was Mayor of Liubliana during the dark and trying years before the Liberation, when none worked harder than these two to keep alive the national spirit among the Slovenes of Liubliana.

The sittings were devoted to the reading of reports and the discussion of education, child welfare, State aid for mothers and children, and kindred subjects. The level of the speeches was high. Veterans of the movement, venerable ladies with forty and fifty years' experience as teachers, spoke as clearly and eloquently as the youngest of their colleagues. It was a noteworthy fact that when there was a sharp divergence of opinion (over a very knotty question!) on one occasion, the women spoke and voted according to conviction, and without any local political party feeling.

On the evening of the 6th, the Glasbena Matica, the famous Liubliana Conservatoire choir, gave a concert in honour of the women delegates, and on the 7th the Congress was brought to a close with a reception given by the Liubliana Women's Union in the Casino ballroom, on which occasion several leading men—General Djukitch, Dr. Skaberné and others—were noticeable among the guests. National unity was the *leit-motif* of all the speeches. Bearing in mind that by far the greater number of those present, including the speakers, were wives and mothers, or teachers of the young, one came away from the congress with a feeling that whatever local differences may divide the men of the present generation, the next will be brought up to look upon these said differences as shadows of the past—remote as the days of partition of which they are the evil legacy.

The arrangements of the various functions in connection with both Congresses reflect the greatest credit on the organising abilities of the Slovene hosts and hostesses. The next opportunity for Liubliana to show itself equal to providing for and entertaining large numbers of guests will occur next month, when many thousands of visitors are expected here, as participants or spectators, on the occasion of the All-Yugoslav Sokol (Athletic) Gathering, August 12-15.

Liubliana has much to recommend it as a resort for congresses at this time of year. The climate is temperate, the surroundings are beautiful, and life by no means uncomfortable.

ALBANIA.

Tirana, July 1.

Arrival of Italy's Representative.

The Tirana Government has more than once let it be very clearly understood that Albania could not on any account agree to a capitulatory régime, and that in treating with her it would be necessary to regard her as a State enjoying all the rights of full sovereignty. Italy, however, seemed rather slow in recognising the truth of this state of affairs, and as a result it has not been possible for the two countries to arrive at an understanding. The policy of the Consulta has been well served by the consular agents whom it has employed up to the present, and relations between Italy and Albania have become more and more embittered and strained. However, since Signor Facta and Signor Schanzer have been in office there has been an improvement, Signor Castoldi—the *soi-disant* Italian Minister at Durazzo, who had not presented any credentials—has been relieved of his duties since the end of April last, and it was said that the Marchese di Durazzo would be appointed to represent Italy officially.

The Marchese di Durazzo actually arrived in Albania on June 22. He remained two days at Durazzo in order to make himself acquainted with all the details of the post office incident which I reported in my previous letter. During the five days that he has been in Tirana the Marchese has already had several conversations with M. Jafer Ypi, the Prime Minister and Acting Foreign Minister. Nothing is known yet as to the results of their meetings or the outcome of their consultations, but it is generally anticipated that they will be good and satisfactory to both countries.

The League of Nations' Delegate.

M. Sederholm, Director of the Institute of Geology of Finland, accompanied by Count Frederic de Moltke, a Dane, who is acting as Secretary, arrived at Tirana on June 21 as Delegate of the League of Nations. His mission is to supervise the evacuation of the Albanian territory which the Greeks still occupy, and which lies east of Kortcha.

The international commission in connection with the Albanian frontiers, which is just now working in the north, will proceed with its work as far as Kiafa Prushit, south-west of the town of Diakova. Then it will temporarily suspend the work, in order to go south and proceed with the demarcation of the Albano-Greek

Digitized by Google

frontier, that is to say with the erection of the boundary pillars.

Albanian Minister in Belgrade.

General Ali Riza Kolonya, who was sent to Belgrade on a special mission in connection with the marriage of King Alexander, has just been appointed Albanian Minister in Yugoslavia. At the present moment he is serving on the international commission for the Albanian frontiers; but he will leave in a few days, to take up the duties of his new post.

Miscellaneous News.

Albania has appointed her Minister in London, M. Mehmed Konitza, to represent her at the Hague Conference.

Among the many signs of moral and intellectual activity which may be observed in Tirana these days may be noted the formation of an Albanian league in connection with the League of Nations, composed of many Members of Parliament, professors and men of letters. The League will lose no time in entering into relations with similar bodies in other lands, and in propagating the ideas for which it stands.

Another society just founded, also by influential people, is a branch of the "Ligue francaise pour les droits de l'homme."

BULGARIA.

Sofia, July 5.

The Question of Reparations.

On June 27 the Sobranye closed its extraordinary session, and it will not re-assemble until the end of July. The date on which the Convention imposed by the Inter-Allied Commission is due to come into force is July 20; and it is not quite clear how the Government propose to accede to the Commission's demands. It is true that the law dealing with the fiduciary circulation has been passed, and that a law which provides for the lists of revenues being shown to the Commission has also been passed. This latter law has, however, not been drafted in the form demanded by the Commission. It contains many objectionable taxes and no solid guarantees. Nevertheless the Commission appear disposed to enter into negotiations with the Government on lines more moderate than those contained in the old Convention. They expect in return to obtain substantial guarantees, such as the Customs. It now remains to be seen whether the Government will negotiate on these lines.

The first Convention laid down specific money payments for 1922 and 1923, namely ten million and 30 million gold francs respectively. The guarantees demanded for the payment of these sums were both numerous and complicated. In fact, the first Convention was singularly unattractive from the Bulgarian point of view; and it was therefore no easy matter to put it into execution.

No news is yet available as to what sums the Commission will now ask from Bulgaria, nor is it known whether a total moratorium for several years will be granted. In any case the putting into force of sanctions against Bulgaria in the event of the Government's not meeting the Commission's demands seems, fortunately, to be an idea of the past. It would appear that the Great Powers are gradually realising Bulgaria's difficult economic and financial position, and that they are prepared to accord her more favourable terms. Their new policy cannot do harm.

The Position of M. Tourlakoff.

For many weeks, and even months, the Opposition papers have been writing about the divergence of view existing between the Prime Minister and M. Tourlakoff, the Minister of Finance. Before the Genoa Conference, relations between the two Ministers were very strained, and at Genoa very little collaboration took place. Now M. Tourlakoff seems inclined to attack the Prime Minister. In a speech delivered a few days ago he spoke against M. Stambolisky, and even hinted at the possibility of a coalition between Agrarians, Radicals and Socialists. By Agrarians he referred to a certain section of the party only, as the followers of M. Stambolisky will never consent to a coalition.

The words of M. Tourlakoff put a different complexion on an ever-changing political situation. If a rupture took place between M. Stambolisky and M. Tourlakoff, it is probable that both the Cabinet and the party would be pretty equally divided. M. Tourlakoff's group would, however, have the support of the Radicals and Socialists and certain members of other parties. This would give him a majority, and would lead to the establishment of a coalition. There are, however, at least two factors capable of preventing this coalition. First, it is quite probable that the split between M. Stambolisky and M. Tourlakoff may never take place; and even if it does the attitude taken up by the Bourgeois block, that is to say, the Democrats and Nationalists, may stop a coalition between Agrarians on one side and Radicals and Socialists on the other. With the harvest now in full swing, developments are not likely to occur, but the jealousy between M. Stambolisky and M. Tourlakoff is a factor that is always capable of producing interesting events.

A Serbian Frontier Raid.

It is reported from Belogradchik that on June 23 a band of Serbian brigands appeared in the neighbourhood of the town. They carried off a quantity of cattle, at the same time kidnapping an old man of 60, an inhabitant of the village of Rayanovtzi. The following day the corpse of the old man was discovered in a wood near by. This frontier raid is one of many. Bands of robbers, both Serbian and Bulgarian, are constantly at work along the frontier. Their activities are increasing, and it behoves the Belgrade and Sofia Governments to take the strongest possible measures.

TURKEY.

Constantinople, July 5.

The Military Situation.

The bombardment of Samsun, which was believed at the time to be the prelude to systematic operations in the Black Sea on the part of the Greeks, has not been followed by further naval activity of any importance. As a matter of fact, it is doubtful whether the Greeks possess enough small craft to undertake effective operations of the nature necessitated by the circumstances. On the other hand, the recent general inspection of the front by the new Greek Commander-in-Chief, General Hajianestis, has given rise to a belief that proposals for the opening of a further offensive will be laid before the Athens Government by the General, who is now in Athens. It is at least very improbable that the Athens Government will listen to such proposals, from whatever quarter they may emanate, but in Greek official circles in Constantinople there is a growing conviction that the present military situation must be modified in the near future. It is worthy of remembrance in this connection that the Allied forces at the Dardanelles consist of a few battalions only, and if the Greek army were withdrawn, say, to the Sèvres Treaty line, a rather awkward situation might arise in view of the thoroughly uncompromising attitude of the Angora Government. It is unlikely that the Greek Government will order a withdrawal without giving the Allied Governments some warning, and in any case the removal of stores from the base at Eskishehir could not be kept secret. The Kemalists would, therefore, also receive timely warning, and it is in consequence very improbable that any such operation will be undertaken before the weather conditions change, in order that pursuit may be hampered as much as possible.

The Kemalists, on their part, seem to have acknowledged that there is very little hope of their being able to "drive the invaders into the sea at the point of the bayonet." There are no signs of preparations for an offensive on the part of the Kemalist army, and, as a matter of fact, Mustapha Kemal recently stated in the course of a speech at Ismidt that time is the strongest ally of those who are on the right path.

The Peace Question.

The announcement of another meeting of Allied Foreign Ministers at the end of July to discuss the question of concluding peace once again, has not awaken-

ed feelings of optimism in any quarters. It is now generally realised that the Angora Government are determined to accept no terms which will not secure "independence" as construed by themselves, and it is also generally realised that the Angora leaders' construction of that term is incompatible with the vital interests of the Allies. The very obvious and serious disagreement amongst the Allies themselves, which still persists in spite of announcements containing the threadbare assurances of "complete unanimity," has convinced both the Kemalists and their enemies that there is no immediate hope of the Allies' taking any steps to enforce their decisions, even in the event of their achieving some degree of unanimity. Hence the *Aksham* in a recent leading article openly foreshadowed a rejection of the Allied terms once again, if the forthcoming conference should result in fresh proposals being made. So far as territorial matters are concerned, although, as pointed out in previous letters, the territorial aspect of the problem is no longer the only vital issue, the fate of Thrace seems to be an insurmountable obstacle to peace. Nothing but the return to Turkey of Thrace with Adrianople, without any conditions, will satisfy the Kemalists, whilst the Greeks consider the question as definitely closed by the proclamation of the annexation of the territory in question, and decline to discuss the mattter.

The Repopulation of Anatolia.

The idea of reviving the corpse of the Turkish nation by the transfusion of blood from the physically sounder Moslem peoples of Caucasia and Trans-Caspia, played a considerable part in the development of Pan-Turanian doctrines under the guidance of the Committee of Union and Progress. The Angora Government appears to have been inspired by the same idea, for an agreement has been recently concluded between Yussuf Kemal Bey, and the Angora representative of the Crimean "Republic," Sabri Bey Aivazoff, by which it has been arranged that 150,000 Moslem Tatars are to be permitted to settle in the five provinces of Eastern Anatolia. It is no secret that the depopulation of Anatolia has reached the most alarming proportions in recent years, and it is estimated that in three generations the total population has been reduced by three-quarters. In addition to the drain upon the population by incessant wars, and the periodic massacre of considerable numbers of the most prolific and industrious elements, disease has been an even more important factor not only in producing a high death rate, but also in rendering general a high infant mortality and sterility. The evil is now so deep-rooted that it is doubtful whether the measures contemplated, even if carried out upon a much more extensive scale, would be sufficient to save the Ottoman Turkish nation from virtual extinction in the course of time.

The Departure of Claude Farrere.

M. Claude Farrère, the author of "L'Homme Qui Assassina," left Constantinople on June 25, for Paris, after having been the guest of the "Turkish nation" for a fortnight. Claude Farrère shares with Pierre Loti the distinction of being one of the most passionately devoted friends of the Turks, and his visit was made the occasion of enthusiastic demonstrations in acknowledgement of his championship of the national cause. As souvenirs of his visit, M. Farrère took back to France a number of valuable Persian rugs and—a silver-mounted whip presented by Mustapha Kemal.

The Return of Javid Bey.

Javid Bey, who, it will be remembered, fled from Constantinople after the Armistice, recently returned to the Turkish capital in order to fulfil his duties as Ottoman Delegate on the Council of the Public Debt. In the course of an interview given to representatives of the local press, he expressed considerable optimism in regard to European public opinion towards Turkey, and also with regard to the result of the struggle in progress in Anatolia. "We all desire," he said, "the conclusion of a peace ensuring the *independence* of our country." Javid Bey's use of the term "independence," italicised by the writer, lends added force to his expressions of approval of the Nationalist policy.

PRESS ON THE NEAR EAST.

In consequence of inquiries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

Some Problems of Palestine.

The *Spectator* of July 8 contains an article, entitled "A Study in Ineptitude," which begins with a condemnation of the Coalition Government, particularly in regard to the Zionist problem, for their "recklessness, callousness, and levity." Later it comes specifically to the questions of the High Commissionership of Palestine and the Rutenberg concession:—

> How can it be said that the objections made to Sir Herbert Samuel's tenure of power are prejudiced and unfair in face of the newest revelations of the Zionist policy? He is piling his own ineptitude upon the original ineptitude of the Government in appointing him. He is piling Pelion upon Ossa. One would have thought Sir Herbert Samuel would have argued: "I am very naturally in a suspected position. Therefore I must be extra careful in giving concessions or special privileges to Jews. It will not do for me merely to pick out the best man to whom to grant some big commercial privileges. I must go with extraordinary care. During my time of office not the Jews but the Arabs must be the most favoured race." Instead, we find that not long after Sir Herbert Samuel had taken up his post in the Palestine Government he actually had the amazing folly to give one of the most watertight monopoly concessions ever drafted to Mr. Rutenberg, a Jew, we believe, of Central European origin, for the exploitation of practically all the water-power worth having in Palestine. So far as we can see the brook Kedron, "that ancient river," seems to be almost the only exception. The Jordan and the Lake of Tiberias and all the running and perennial water of the Holy Land are placed in the hollow of Mr. Rutenberg's hand. Unless the concession is revoked, he will be able to have a monopoly not only of electric power and electric light, but more important still, of irrigation. It is with water, and water alone that the wilderness of Judea and Galilee may be made to blossom like the rose. We have not a word to say against Mr. Rutenberg himself, nor do we want to imply that he has any sinister motives or any desire to be cruel or merciless in the use of his concession. We take it that, like so many of his race, what he wants to do is to make a big profit for himself and for those connected with

him. Also, we shall not be the least surprised to hear that he is a sincere and patriotic Jew and, further, wants to do the best thing not only for thousands and tens of thousands of his countrymen, whom he means to bring out from their houses of misery and oppression in Europe, but also for the indigenous inhabitants of the country.

If he saw a big profit sticking up out of the ground and saw an opportunity of taking it, one can hardly blame him. The people to blame are the Government who created the opportunity for the folly and appointed to the Government of Palestine a High Commissioner so entirely without political judgment as to grant such a concession. And here we must say that we are not the least assuming that it was not wise or possibly necessary to give a concession for water-power and irrigation. Conceivably that was a better plan than raising a loan and certainly better than putting the burden of making a national home for the Jews upon the unfortunate British taxpayer. All we do assert is that in granting a concession Sir Herbert Samuel ought to have said, and it is inexplicable to us that he did not say, in effect, "Whoever is to have this concession it must not be a Jew. It would frighten the Arabs beyond measure and it would be sure to be used as a proof that we meant to exploit the Arabs. Generally it would do the greatest possible harm to Zionism and impede us in our essential task of quieting Arab susceptibility. At any rate, I am not the man to pass such a concession. During my tenure of office it is impossible." Instead of that, Sir Herbert Samuel appears not only to have passed the concession but to have apparently passed it in silence. It is only recently that the world has come to hear of it. If Sir Herbert Samuel has been so obsessed with the zeal of Zionism as not to see what he was doing, one would have supposed that the British Government at least might have said to themselves: "Well, this Mr. Rutenberg may be the best man in the world, but surely he is not the man to whom to hand over the commercial future of the country in a way which will disturb the mind of every Arab. Samuel must have lost his head in granting such a concession and we must give him a severe rebuke." The Colonial Office, however, appears to have considered it a very wise and natural thing to give a monopoly of this kind to the Jewish zealot in question; to give, as it were, a kind of endorsement of the formula that Palestine must be as Jewish as England is English. We are, of course, aware that in face of the protests that the formula has called forth the Zionist organization has now put it on record that it does not represent the policy or intention of Zionism. Still, the Arabs may well be pardoned if they say: "Hang your intentions! What we have got to think of is your acts!"

Can it be denied that we have proved our case as to the colossal ineptitude of the Government in their Palestinian policy? But though it is easy, it is by no means enough to prove such things. What we have got to do is not merely to point out this fact to the nation, but to ask it to insist that the Government shall clear up the mess they have made. The Rutenberg concession must be revoked and the whole of the problem must be reconsidered. Surely that is not too much to ask.

Persia.

In the *Times of India* of April 19 and June 12, two articles are devoted to a consideration of Persia, in both of which stress is laid on the same point—the non-existence of any real British interests in Persia. The following is the conclusion of the first article:—

> Our own conviction is that the only chance for Persia is to leave it severely alone. As long as a rotten administration is propped up by foreign arms and foreign subsidies so long will Persia rot. The people must be taught by experience; either they will throw up a decent government or they will perish. The chances of the emergence of a decent Government are somewhat remote. At any rate it is no concern of ours. The Bolsheviks are active in Teheran. Those who know them best assert that the Bolsheviks will be just as tenacious as the emissaries of the Tsar in the prosecution of the Russian policy in North Persia. The Americans are trying to elbow their way into the oil zone in the five Northern provinces, though the rights have been bought by the Anglo-Persian Oil Company. Well, if the Persians coquette with the Bolsheviks they will learn soon that the little finger of M. Chicherin is thicker than Lord Curzon's thigh. Any Mexican could tell them what is likely to be the upshot of dealings with the American oil group. Still, that is no affair of ours. However much we may deplore the causes, we can rejoice that Great Britain is out of this discreditable and humiliating imbroglio.

The second article outlines the present (or recently past) situation in Persia, and then suggests the needs of the country:—

> The establishment of order in Persia demands two essentials. One is the creation of a strong and reliable military force, which will be loyal to the Government. Since the disappearance of the Cossack Brigade and the South Persian Rifles there has been no such force; its evolution is mainly a matter of funds, and we cannot see where they will be found within the country. The other is the improvement of communications. A railway line from Baghdad to Teheran, with extensions to Tabriz and Isfahan would do more than anything else, by rendering such troops as are available more mobile, to re-establish and maintain order. But Persia cannot find these from her own resources and having turned her back on Britain none will provide the necessary funds and directing power from outside. We can see nothing before the country but a long period of disorder, with the figment of a government in Teheran. Outside help will be necessary before there is an improvement, and unless Persia can enlist the aid of the United States where is it to come from? It cannot come from Great Britain or India, for with all our sympathy for that unhappy country we have learnt by bitter experience. Having vehemently insisted on her right to stand alone, she must make good herself, and in no circumstances should either Great Britain or India embroil herself in the affairs of this distracted land.

ARTICLES TO NOTE.

"Cities of Transcaucasia," by H. C. Luke; and "The Outlook in India," by Sir Valentine Chirol in the *Quarterly Review* (July).

M. Doreff has been appointed Bulgarian Consul-General in Egypt on the reconstitution of that post.

NEAR EAST BOOKSHELF.

INDIA AND THE CALIPHATE.

"INDIA IN THE BALANCE." By Khwaja Kamal-ud-Din, B.A., LL.D. ("The Islamic Review," The Mosque, Woking. 1922. 3s. 6d. net.)

Islam has entered upon a revolutionary stage, and the Caliphate problem is the centre of a political storm-cloud which daily gathers force. Its solution in a sense favourable to the aspirations of the 70,000,000 Indian Moslems would cause the disappearance of all the grievances that rankle in their breasts. What, then, is the Caliphate, and in whom does it rest? It is admitted on all sides that the dying Prophet bequeathed religious and temporal authority in Islam to a line of Successors—*Khalifs*—belonging by birth to the Quraish tribe. The Caliphate founded by Mohammed followed the course taken by all Asiatic dynasties—traversing eras of valour, grandeur, discord, degeneration and decay. In 1538 it passed by conquest to Sultan Sulayman the Magnificent, whose successors on the throne of Turkey were *ipso facto* custodians of the Holy Places in Arabia and Palestine until 1915. Their claim to the Caliphate was disputed by Moslem jurists, and for 350 years it received scant recognition in non-Turkish Islam. A change came with the accession of Sultan Abdul Hamid II. (1876-1908). That astute ruler was far ahead of his time in realising the value of propaganda. His emissaries succeeded in persuading Indian Moslems that their master was veritably *Khalifah Rasul Illah*—successor of God's Apostle; and prayers on his behalf are daily offered up in Indian Mosques.

The reviewer happened to be in Constantinople during the last phases of the Revolution of 1908-9; and saw with deep regret that Great Britain was losing a unique opportunity of re-establishing her prestige in the Near East. The "Young Turks" who had hurled Abdul Hamid from the throne, were eager to accept the guidance of their ancient ally. But our representative and his entire staff were ignorant of the Turkish language, and their Gallio-like attitude was shared by Mr. Asquith's Government. Finding no response from the British Ambassador, the Young Turks turned in despair to Kaiser William II, whose aim it was to make Constantinople a stepping-stone to world-dominion; and the gold which he lavished upon their leaders gave a new orientation to Turkish policy. It is beyond all question that Turkey would have remained faithful to her alliance with Great Britain, if the latter had been represented by a statesman of Lord Stratford de Redcliffe's calibre in 1914. To use legal parlance, "contributory negligence" on the part of our Foreign Office was a factor in the catastrophic decision which led Turkey to throw in her lot with the Central Powers. It follows that there is more than a grain of truth in Khwaja Kamal-ud-Din's contention that after receiving due punishment, Turkey should have been received back into the fold, chastened and penitent.

Moslem law and tradition enjoin obedience to an alien Ruler who maintains strict impartiality in religious matters. Until recent years Indian Mohammedans had no grievances on this score, and their loyalty was above suspicion. They sided with Government in the agitation excited by the Partition of Bengal, and when war broke out many thousands took up arms against the Caliph. Their allegiance was sorely tried when it leaked out that Great Britain was in alliance with Russia, and had promised Constantinople to Turkey's deadly foe. British policy has gone to greater lengths since the Armistice in alienating the sympathy of Indian Moslems. They have seen Turkey reduced to a mere shadow by the Treaty of Sèvres; the Holy Places of Arabia handed over to King Hussein, whose forbears had always been the Sultan's lieutenants; Palestine placed under Jewish control; and the Greeks unduly favoured in their attempt to appropriate integral portions of the Turkish Empire.

Such is the burden of Khwaja Kamal-ud-Din's complaint, and he attributes the discontent which prevails among his Indian co-religionists to a wide-spread belief that Great Britain has abandoned her time-honoured policy of non-interference in matters of religion.

The case which he presents for a revision of the Treaty of Sèvres is weakened by his silence regarding certain phases of the Pan-Islamic movement which must postpone, and may preclude, any concessions to Mohammedan sentiment. He ignores the mischievous activity of the 'Ali brothers, who travelled through the country, preaching hatred of British rule; he makes no reference to the terrible Moplah rebellion which was fomented by Moslem extremists, nor to the ruin that befell many thousands of poor creatures whom they persuaded to seek shelter from infidel oppression in Afghanistan. Moreover, he approves of the unholy alliance between Mohammedans and "Mahatma" Gandhi, who cared not one jot for their aspirations and used the Caliphate controversy as a pawn in his insane non-co-operation game.

F.H.S.

GYPSY TALES.

"GYPSY BLOOD." By Konrad Bercovici. (London: Nash and Grayson. 7s. 6d. net.)

Of all popular studies that of the Gypsy is perhaps one of the most intriguing; but the amount of good literature written of him is surprisingly small. The genius, the picturesqueness, and the primitiveness of the Gypsy are a constant mystery, but there is only one aspect of his life or activities the superlative qualities of which are undoubted and universally appealing, and that is, his music. It would seem that this people persists because of its unique way of living, and not, as with most peoples, because of what it gives to or takes from, other races.

Mr. Bercovici's collection of stories concerns the gypsies of the Dobruja. They are told not without a certain artless attractiveness—to read of such primitive loyalties, elemental infidelities, and so on, cannot fail to be at least interesting—but to say that they move or even charm would be an exaggeration. The high colour of the gypsies' life, their passions, contrasted moods, and the rest, are all set out in these stories, of which, however, there is scarcely one that deserves to be called great. We like well enough to read of a gypsy hero (Ghitza) wrestling successfully with a Tatar of incredible strength, of a very soulful musician (Tinka) who, having attracted a Boyar's son by the beauty of her fiddling, unhappily banked on the constancy of his love, of the self-prostrated pride of a typical woman (Yahde), or of the clever deposition by a son of his father from captaincy of a tribe (Vlad's son); but such pictures are given rather as if by the mechanical process of photography than by the interpretative process of artistry. In a word, it appears to us that Mr. Bercovici, though assuredly a master of his particular subject, is not yet a master of his craft.

ARNOLD J. TOYNBEE
Professor of Modern Greek Language, Literature & History at London University.
THE WESTERN QUESTION
IN GREECE AND TURKEY.
A Study in the Contact of Civilisations.
Professor Toynbee has not attempted a redrafting of the Treaty of Sevres; he has not written a political pamphlet; he has set out to place recent events in their correct historical setting and to examine the influence of modern Western social idealism on that of the East. "The Western Question" is an essential text book for students of modern politics.

PERSONAL AND GENERAL.

To-day.
July 20 (New Style).
July 7 (Old Style).
Julkada 25, 1340 A.H. of the Moslem Calendar.
Tamuz 24, 5682 of the Jewish Calendar.

Prince Cantacuzene left London last week for Paris on a special mission.

Sir John and Lady Norton-Griffiths have arrived in town from the country.

M. Yaroslav Cesar, specially attached at the Czecho-Slovak Legation, has left town for Prague.

Captain A. V. Seferovitch, Yugoslav Consul-General in Montreal, has arrived in London from Belgrade, on his way back to his post.

M. K. Theodoroff, Bulgarian Minister in Belgrade, and M. Neykoff, Consul in the same city, have arrived in London.

The Afghan Minister will give an "At Home" from 4.30 till 6 p.m. to-day at the Afghan Legation, 25, Knightsbridge.

At the annual general meeting of the British Academy held on July 12, Mr. Charles M. Doughty was elected an Honorary Fellow.

M. Constantine A. Constantinesco, formerly Secretary at the Roumanian Legation here, is now "Chef du Cabinet" of the Roumanian Foreign Ministry.

Sir Gerald Strickland, who leads the Opposition in the Malta Parliament, has arrived in England to rejoin his family at Sizergh Castle, Westmorland.

The engagement is announced between Captain Cecil T. Tirebuck, late 4th Gurkha Rifles, I.A., and Gwendolen, only daughter of Mr. and Mrs. H. G. Ivens, Tregaron, Kidderminster.

M. A. Rizo Rangabe, Greek Chargé d'Affaires, has been appointed by the Royal Hellenic Government to represent Greece at the forthcoming session of the League of Nations in London.

The engagement is announced in Paris of Captain Paul Louis Weiller, son of Senator and Mme. Lazare Weiller, and Officer of the Legion of Honour, and Princess Alexandra Ghika, daughter of Prince and Princess Jean Ghika.

A marriage has been arranged, and will shortly take place, between Mr. Charles Rowlatt Watkins, C.I.E., Indian Imperial Customs Service, and Phyllis Rose, daughter of Mr. and Mrs. Mence, Forthampton House, Tewkesbury, Glos.

The engagement is announced between Mr. C. P. Johnstone, of Calcutta, only son of Mr. and Mrs. William Y. Johnstone, of Cotton House, Westgate, Kent, and Kitty, younger daughter of Mr. and Mrs. C. Herbert Birchall of Inveresk, Wallasey, Cheshire.

THE PERSIA SOCIETY.

President: *Lord Lamington, G.G.M.G., G.C.I.E.*

Founded in 1911 to study all questions of common interest to Great Britain and Persia.

Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1.

The engagement is announced in India of Lieutenant Ernest William Herbert, M.C., R.F.A., Jhansi, younger son of Mr. and Mrs. Herbert, of West Ham, Essex, and Dorothy May, second daughter of Mr. Oakden (Commissioner of Fyzabad) and Mrs. Oakden.

The marriage of Mr. Hugh Arbuthnot Inglis, Indian Police, son of Mr. and Mrs. W. Inglis, late of Kingsmills, Inverness, and Miss Sylvia Stewart Blane, daughter of Mr. and Mrs. Blane, of Alltan Donn, Nairn, and Foliejon Park, Windsor, will take place in London on October 31.

The *Sudan Times* of June 28 reports that Dr. Footner, who has been in charge of the hospital ship 'Lady Baker,' has been mauled by a lion. He arrived in Khartoum from the South on June 24, and was admitted into hospital, but his injuries are described as slight, and not likely to cause much trouble.

A marriage has been arranged, and will take place at Singapore in October, between Wilfrid R. M. Fowler, only son of the late Wilfrid A. Fowler, I.C.S., and of Mrs. Fowler, and Doris Maud Aitken, younger daughter of the late W. R. T. Aitken and Mrs. Aitken, of 16, Cromwell Crescent, S.W.

A marriage has been arranged, and will take place at Belgaum, India, in August, between Sheila Lisle, only daughter of the late Major D. Simpson, I.M.S., and Mrs. Hay, and Captain Noel Maurice Anderson, Indian Army, younger son of Lieutenant-General Sir Charles and Lady Anderson, of Ballinacarriga, Kilworth, County Cork, Ireland.

The engagement is announced of Captain A. D. F. Thomason, 12th Cavalry, Indian Army, son of Colonel A.F.Thomason and Mrs.Thomason, and Erica Fortescue, youngest daughter of Walter Halliday Moresby, C.B.E., M.A., barrister-at-law, of the Inner Temple, and Mrs. Moresby, and granddaughter of Admiral John Moresby, of Fareham.

Lieut.-Colonel Armine Dew (Agent to the Governor-General and Chief Commissioner in Baluchistan) had the honour of being received by His Majesty on June 15, when the King conferred upon him the honour of Knighthood and invested him with the Insignia of a Knight Commander of the Most Eminent Order of the Indian Empire.

The marriage of Mr. Geoffrey Perry, only son of Mr. and Mrs. James Perry, of 125, Victoria Street, Westminster, and Mrs. Gerald Maude, widow of Captain Gerald Maude, the Green Howards, and only daughter of the late Lieutenant-Colonel A. P. Thornton, C.S.I., and Mrs. Thornton, of 18, Pembroke Crescent, Hove, will take place at Christ Church, Westminster, on August 2.

The marriage arranged between Mr. J. M. D. Mackenzie, Imperial Forest Service, Burma, only surviving son of Mr. and Mrs. A. L. Mackenzie, 6, The Circus, Bath, and Majorie Alison Hutchison, youngest daughter of Brigadier-General W. C. Douglas, C.B., D.S.O., and the late Mrs. Douglas, of Brighton, Forfarshire, will take place in St. John's Episcopal Church, Forfar, on July 27.

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

Prince Michel Lotfallah, president of the Syria-Palestine Congress, has arrived at the Hotel Cecil. He has come to London with the object of attending the conference of the League of Nations Council, when he will head a delegation consisting of Ameer Shakib Arisan, Lhsan Bey Eljabiri, Soliman Bey Kannan, and the under-secterary of the congress, Dewfik Yazigi.

Sir John and Lady Stavridi entertained at dinner on July 12, at 33, Lennox Gardens, the Archbishop Germanos, Metropolitan of Thyatori and Central and Western Europe. After dinner Lady Stavridi held a reception, which was attended by, among others, the Roumanian Minister and Madame Titulesco, the Serbian Minister and Madame Gavrilovitch, the Great Archimandrite, Dr. Pagonis, the Bishop of Gibraltar, Sir Willoughby Dickson, Sir Edward and Lady Boyle, the Dowager Lady Boyle, Sir Arthur and Lady Crosfield, Mr. Harold Spender, and many prominent members of the Greek community in London.

APPOINTMENTS AND PROMOTIONS.

Mademoiselle Nadejda Stancioff, eldest daughter of Dr. Stancioff, Bulgarian Minister in London, has been appointed First Secretary to the Bulgarian Legation in Washington. Mademoiselle Stancioff, who has had considerable diplomatic experience both in Dr. Stancioff's posts and as confidential secretary to M. Stambolisky, Bulgaria's Prime Minister, for various periods since the War, will take up her duties in Washington next September.

The King, on the recommendation of the Home Secretary, has appointed the Rev. Douglas Falkland Carey, Principal Chaplain, Egyptian Expeditionary Force, to the rectory of St. Peter Port, Guernsey, and to be Dean of the Island and Bailiwick of Guernsey, with its Dependencies, in place of the late Very Rev. J. B. V. Penfold. Mr. Carey is a son of the late Mr. Arthur Carey, a coffee planter in Ceylon.

OBITUARY.

Major-General Frederick Faulkner Minchin, late of the Royal Artillery, has died at Annagh, his home at Borrisokane, Co. Tipperary. General Minchin saw service with the Burma Expedition in 1889, for which he had the medal with clasp.

Colonel John M. Tabor died last week at 95, Warwick Road, Kensington, in his seventy-ninth year. He was formerly in the Royal Artillery, and in 1882 took part in the Egyptian Expedition, in which he fought at Tel-el-Kebir.

PROTESTS FROM PALESTINE.

We have received the following telegrams of protest against the Mandate for Palestine :—

Jerusalem, July 14.—Cessation of work all over Palestine and Transjordania was held on thirteenth and fourteenth instant as protest against Mandate about to be ratified by League of Nations. Indignant population, having repeatedly forwarded protest after protest without avail, are losing hope in peaceful measures so far adopted in defending their natural rights. Ratification of Mandate entails disasters that lead Holy Land to complete ruin.—President, Executive Committee, Palestine Arab Congress, Bitar.

Jerusalem, July 15.—Supreme Moslem Council, officially representing Palestine Moslems, draws attention of Members of League and British Government just before ratification of Palestine Mandate to disastrous situation created in Palestine and Transjordania by Zionist programme. Declaration made recently by British Government concerning policy to be pursued in Palestine was not regarded by people as solution of the problem. Cessation of work in Palestine and Transjordania on thirteenth and fourteenth instant shows consequences that may follow ratification of Mandate.—President, Supreme Moslem Council, Amin.

NEWS IN BRIEF.

Cases of plague have been notified at Jaffa.

The Yugoslav Government have formally recognised the republic of Finland.

A Yellow Book was published by the French Government last week devoted to Balkan affairs, from the Treaty of Bucharest to the beginning of the Great War.

Riza Nuri Bey, the Angora Education Minister, has arrived at Moscow. He brought Lenin an autographed letter from Mustapha Kemal Pasha.

The increase of deposits in the 364 Czecho-Slovak savings banks amounted in May to 391.6 million crowns, the withdrawals to 347.4 millions, the net increase being 44.2 million crowns, says *The Times*. The total amount of money deposited with all the Czecho-Slovak savings banks id 7,952,7 million crowns.

PEACE WITH TURKEY.

On the following page we publish an article by Captain John Bennett, who puts forward a proposal with regard to Thrace as a feasible solution of the Turkish question. The chief, if not the only, outstanding obstacle to-day to a settlement of the Near East is the fate of Thrace. Greece is prepared to acquiesce in the evacuation of Asia Minor, but will not allow anyone to suggest similar action in regard to Thrace. Although the Kemalist Government declares that it will accept nothing less than the terms of the Nationalist Pact as a basis of peace, it is generally understood that an agreement might be reached without much difficulty on every point except the stipulation made by the Allies that Thrace must remain Greek. So long as Angora is bargaining it will require to have something in hand; accordingly until a satisfactory solution of the Thracian problem can be found, it will continue to bluster about the Straits and the details of any proposed settlement. Captain Bennett, who has had the advantage of studying the question on the spot, holds that the establishment of an autonomous Eastern Thrace administered by a Commission appointed and, in the last resort, controlled by the League of Nations, under a French President, would meet all the needs of the case. For the Turks it would have the advantage of ensuring the safety of Constantinople, by placing a neutral zone still under Turkish suzerainty, eighty miles wide, between Turkish territory and Greece or Bulgaria. The Bulgarians would have access to the Aegean Sea through territory that was not Greek, and at the same time the Bulgarian minority in Thrace wuld be guaranteed full political rights. For the Greeks the solution would involve an immediate sacrifice of territory; but the Greek element in Thrace, being the only one with defined political sentiments, would gain the upper hand on the Elective Council. Captain Bennett elaborates the reasons that lead him to believe that the scheme is workable and would prove successful. Thrace and Smyrna, he points out, have been costly experiments. The latter has been more in the limelight, but he considers that Thrace has in it all the making of a Pandora's gift. The administration is a heavy drain on the resources of the Greek Government, and, after the Army, is, perhaps, the chief cause of its financial difficulties. During the last nine months the Greek authorities have intensified their efforts to secure their hold over Eastern Thrace; Turks and Bulgarians have been treated in such a way that emigration alone remained to them. The future, Captain Bennett holds, will see a movement of Turks and Bulgarians for the recovery of Eastern Thrace, in the face of which Greece would experience considerable difficulty in protecting the territory.

No settlement of the Near Eastern Question is going to be free from objections. The test to apply to any proposal is whether it offers a reasonable chance of peace in the immediate future and of being accepted by all the parties concerned at least for some years to come. It is obvious that the Allied proposal to leave Thrace in Greek hands does not answer the required conditions; there are no signs of its being accepted by the Turks, and the territory will be held only by force of arms and in the teeth of a growing irredentist movement. Before the War part of Thrace belonged to Bulgaria with the approval of Roumania, Serbia and Greece, who confirmed her in possession of it, by the Treaty of Bucharest, after the Bulgarian defeat in the Second Balkan War. There is naturally a strong desire in Bulgaria to possess this territory again, with the direct access to the Aegean Sea that it ensures, and no one with any personal knowledge of the Balkans is likely to lose sight of the possibility, if not probability, of Thrace once more becoming Bulgarian. It might be urged, therefore, that the only solution which promised to have any degree of permanency in it would be to give Thrace to Bulgaria; but as the Powers are incapable of looking so far ahead, they will doubtless content themselves with the reflection that any settlement of the Thracian question has to be accepted by Bulgaria for the time being, and will avoid the odium attaching to what might be regarded as showing favour to the Bulgarians. On the other hand, Captain Bennett's proposed scheme does satisfy the requirements of the case, provided that the consent of the Greeks can be obtained. It will not be given readily; that would be too much to expect. Greece has been badly used by the Allies, and it calls for a measure of dispassionate statesmanship, to which all the Balkan peoples are strangers, for the Greeks to appreciate that their true interests can only be furthered by an additional surrender of territory which had formally been made over to them by the Allied Powers. What, however, is the real position of Greece? She cannot affect to be satisfied with the security of her northern frontier; for she is well aware that Salonika is coveted by the Serbians quite as strongly as Dedeagatch is by the Bulgarians. If she ignores the facts of the situation, she may be riding for a fall. Would it not be better to make terms with her neighbours, while there is an opportunity? The Greeks as the traders of the Orient have more to gain than any other nation from peace over a stated period; in the same length of time they will necessarily forge ahead in material prosperity more rapidly than their rivals, and must be relatively in a stronger position than they are now. With Salonika a free port, Macedonia autonomous and a neutral Thrace, the real interests of Greece along the northern littoral of the Aegean Sea would be secured.

It is now agreed that the Allies, Greeks and Turks are to meet in conference at Beikos, to discuss once more a settlement of the Near Eastern Question. They have met before for the same purpose, and the forthcoming conference will be as fruitless as its London predecessor, if the Allies content themselves by standing on one side and urging the Greeks and the Turks to come to an agreement. It is essential that the representatives of the Allied Governments should previously decide upon a scheme that they can submit to the belligerents with the conviction that it provides a workable settlement, and offers the Turks a reasonable fulfilment of the British Prime Minister's pledge. Accordingly an understanding ought to be reached between Great Britain, France and Italy before the Beikos conference takes place. So far the three Governments have failed to see eye to eye in regard to the Turkish settlement. In view of the fact that nearly four years have elapsed since the Armistice, the time has surely come, if they cannot reach an agreement now, for a clear statement of the points of difference, in order that the respective peoples may judge of the manner in which their interests in the Near East are being handled. All that they know at present is that the Treaty of Sèvres has been proved to be unjust and unworkable. The British Government has sought to enforce it, with disastrous results; France has resolutely refused to ratify it. Although this is *a priori* evidence in favour of France's point of view, it does not necessarily follow that the French Government does not now wish to see the pendulum swing too far in the other direction. In his campaign against the Sultan as Khalif Mustapha Kemal would seem to have done irreparable damage to his own cause. If the Allies do anything at this stage which tends to strengthen Angora at the expense of Constantinople, they put themselves wrong with Islam and help to perpetuate the cleavage in Turkey. On the other hand by giving practical support to the Sultan, while satisfying the justifiable demands of Turkey, they will leave Angora to be dealt with by the Turks, with some prospect of ultimate peace in Asia Minor. It may be that in this proposal lies the common ground on which Great Britain, France and Italy can come together.

THE FUTURE OF THRACE.

By Captain John G. Bennett.

While much still remains to be done in reconciling Allied policy, and in awakening commonsense in the attitudes of Greece and Turkey, events have left the future of Eastern Thrace the most serious obstacle to peace with Turkey. The negotiations of March, 1921, left a settlement within reach, but for the irreconcilable claims of Greeks and Turks to the ownership of Eastern Thrace. The Bulgars also lost no opportunity of reminding us of our pledge to give them an open port on the Aegean. In the proposals made by the conference of Allied Foreign Ministers sitting in Paris in March of this year, a partition of Eastern Thrace was proposed which could give no satisfaction either to Greece or Turkey. No provision was made for the security of Constantinople, and the racially Turkish portion of Eastern Thrace, Adrianople and the Maritza Valley, was left to Greece, whereas Rodosto and the South East, which have a Greek majority, were offered back to Turkey. The population is so mixed that an ethnological solution must be dismissed as impossible. The only considerations which can weigh with us are the situation as it has come into being and the need for a Balkan equilibrium which will promote peace and better feeling.

Since the defeat of Turkey in 1912 by the Balkan Alliance, the surrender by Turkey in favour of one of her Western neighbours of Adrianople and Eastern Thrace has become one of the major Balkan questions. The Bulgars in their advance on Constantinople prepared the ground by a wholesale expulsion of Turkish peasants. The projected Bulgar colonisation was, however, never carried out, with the result that there are to-day but isolated Bulgar elements south of the Lule Burgas. The Greek population dominates at Dedeagatch, Enos, Rodosto and other towns of the Aegean, Marmora and Black Sea coasts. In the interior of Thrace personal observations have shown that not more than one village in four is Greek.

The Turkish element in Thrace up to 1919 consisted exclusively of absentee landed proprietors, officials and peasants. The two former classes have been eliminated by the Greek occupation. The Turks in Thrace to-day, together with the refugees whose origin can clearly be proved, probably form a numerical majority over the Greeks similarly calculated.

Under the Treaty of Sèvres, Eastern Thrace is joined to Western Thrace, and placed under Greek sovereignty. During the last nine months when the Greek position in Asia Minor has been seriously menaced, the Greek authorities have intensified their efforts to secure their hold over Eastern Thrace. This has been done by undeniable oppression of the Turkish and Bulgar elements, which have emigrated in large numbers. Extensive personal investigation both among the refugees and in Eastern Thrace has led me to the conviction that this emigration is largely the result of a Greek policy which was instituted only in September, 1921, to reduce the Turkish and Bulgar element in Thrace. The systematic persecution of Turkish peasants and small farmers, while not by any means amounting to atrocities, as the Turks allege, has certainly made it almost impossible for the Turks to live in Eastern Thrace, and wherever possible they have left for Constantinople or Asia Minor. The result of this policy has been to increase beyond measure the irredentist sentiment of the Turks as regards Eastern Thrace. There have also been numerous conversations between Turks and Bulgars with a view to ultimate co-operation for the recovery of Eastern and Western Thrace from Greece. Geographical considerations alone will be sufficient to show the great difficulty for Greece to protect Thrace against such a menace, which will hardly fail of realisation if the weakening of Allied control goes much further than to-day. Again, one of the most dangerous factors in the Balkans is the desire of Yugoslavia to possess Salonika. To avert the danger of a war with Serbia, Greece must show herself strong enough to protect Salonika. It is known that these dangers were never far from the mind of M. Venizelos, who hoped to meet them by a comprehensive Balkan Alliance into which Bulgaria should enter and receive as a sop valuable privileges in the Aegean ports. Unfortunately, Greece has no statesmen to-day capable of bringing such a policy to success. It must, moreover, be remembered that the administration of Eastern Thrace is a heavy drain on the resources of the Greek Government, and after the army, the chief cause, perhaps, of its financial difficulties.

Personal investigation in Thrace has suggested the following solution as the most likely to ensure peace and such prosperity as is possible in the Eastern Balkans. A neutral Eastern Thrace should be constituted having its western frontier a N.-S. line starting from the Aegean fifteen kilometres west of Dedeagatch and meeting the present Greek-Bulgar frontier where it bends northwards west of Dimotika, its northern frontier the present Greek-Bulgar frontier, its southern frontier the Aegean—boundary of the Dardanelles neutral zone—the Sea of Marmora and such a line as the Turks could be persuaded to agree to, but in any case, giving the Turks more than the Chatalja lines and less than the March offer; its Eastern frontier the Black Sea. There would thus be no Turkish-Bulgarian or Turkish-Greek frontier, and a neutral strip of at least 80 miles would close up any of the possible avenues of attack between Constantinople and the Balkans. Eastern Thrace should be administered by a Commission appointed and, in the last resort, controlled by the League of Nations. This Commission should have a French President. The necessity for economy, felt as much by France as by Great Britain, makes it impossible that Allied troops will be left to guard the Straits. A Naval Commission, which will inevitably be established, will be predominantly British. It is but just that a balance should be struck admitting French predominance in Thrace. General Charpy's splendid administration of Thrace in 1919 and 1920 has not been forgotten by the inhabitants. Such a concession would be greatly appreciated by France and would facilitate agreement in other matters. The Commission should be assisted by an Elective Council with free proportions of Greek, Bulgar and Turkish delegates. It should be the policy of the League of Nations Commission gradually to devolve upon this Council the duties of administration and government. Thracian administration should have control of customs, railway dues, Port of Dedeagatch and other harbour dues, mining rights and all ordinary taxes. Personal enquiry among Greek, Bulgar and Turkish elements in Thrace has shown that such a solution, and especially the prospect of an Allied control of the Administration, would be welcomed by all three elements.

There is reason to know that the Turks, both of Angora and Constantinople, would be prepared to accept such a solution, especially if they realised that the Entente were determined to see it accepted. The only valid argument in favour of the Turkish demand for an increase of European territory, is the insecurity of Constantinople, while Eastern Thrace is in the hands of a possibly hostile Power. Europe feels too strongly

that the Turks must not re-enter Balkan politics, for an extension of Turkish territory to be permissible. The present proposal gives ample assurance for the safety of Constantinople.

A digression into the factors dominant in Turkey will serve to elucidate the probable Turkish attitude towards the present proposals. The Turkish Cabinet which rules in Constantinople was chosen by the Grand Vizier Tewfik Pasha, and the Sultan Mehmed VI, with a view to bolstering up the prestige of the latter. Its members are all well known Turkish politicians and have considerable personal influence in the country. The fact has saved Constantinople from losing all influence in Asia Minor. It is, nevertheless, Angora that leads in all matters of foreign policy; Constantinople has, in general, only a pacifying and moderating influence.

Power in Asia Minor is in the hands of the military clique in Angora. This military clique has not, however, *undisputed* control in the country, and in financial questions, to some extent, gives way to the civilian element as represented in the Great National Assembly. The Turkish Nationalists of Asia Minor are divided into three parties, the Military Party, the Agrarian Party and the Bolshevists. There can be no hope of satisfying the the demands of the Military Party, which only widen with realisation. The Agrarian Party is prepared to be conciliatory in order to obtain peace, and our object should be to raise its prestige and influence in the councils of Angora. It is prepared to be in touch with the Constantinople Government, and although the person of the present Sultan is unpopular, there can be no doubt of the Party's loyalty to the Throne.

The Agrarian Party would be satisfied with a peace treaty on the lines of the offer made this March to Greece and to Turkey. It could not, however, carry this offer through the Great National Assembly, unless some provision were made for the safety of Constantinople from a possible attack on the part of the Greeks.

As for Bulgaria, the solution now proposed should be acceptable to her, as it complies with the undertaking to give her access to the Aegean through territory not Greek, and gives full political rights to the Bulgarian minority in Thrace.

For the Greeks, it would involve an immediate sacrifice of territory; but the Greek element in Thrace being the only one with defined political sentiments, would gain preponderance on the Elective Council.

Our investigations have further shown that the Greeks in Thrace nourish a strong separatist feeling, the result partly of their loyalty to Venizelos, and partly of the imposition of administrators from old Greece, who have failed to win the sympathy of the "Roum" population in Thrace. For Greece it should be more satisfactory to have this small friendly State beyond the Maritza without the responsibility for its protection, than to be obliged to protect the turbulent Greek population from the consequences of its inevitable indiscretions against the Bulgars and the Turks. Thrace and Smyrna have been costly experiments, flattering for a while to Greek national sentiment, but leaving deep scars of debt, humiliation and defeat.

If Greece is able to build up a sound administration in the territories she holds, and to acquire the economic supremacy of the Aegean which is her right, she need not fear the consequences of any subsequent re-distribution of power under which Eastern Thrace might elect to join one of the Balkan States. The Greeks, naturally, feel that they have been saddled by the Allies with great commitments, and from these commitments have arisen war, and an intolerable burden of debt. The Athens Government, in considering any proposals for peace, thinks first of Athenian public opinion and dares not advocate what seems a peace of humiliation. Events have, unfortunately, only too well established the weakness of the Greeks as administrators. Their genius is for trade and not for government. Greece must learn that security and freedom for her commerce, economic domination of the Aegean, the protection of her scattered population through the ports of the Mediterranean and the Black Sea, should be her true ambition.

The future of Eastern Thrace should be left as vague as possible. The Supreme Council should propose to the League of Nations the appointment of the Commission and the League of Nations should have the ultimate decision regarding the future of the territory. If this autonomous *régime* proved workable, it might be found possible later on, when Greek nationalism will have subsided, to give Western Thrace and Macedonia, including Salonika, a similar status. Opposition to the present proposals will no doubt come from Athens, and it may be necessary, in order to gain them acceptance, to agree that Eastern Thrace should retain Greek sovereignty with complete administrative autonomy and its foreign relations temporarily in the hands of the League of Nations. It might even be possible to give effect to a perfectly similar scheme with regard to Smyrna, which might be left under Turkish sovereignty but administered temporarily by an Elective Council assisted by a League of Nations' Commission with a British President.

Wherever one travels in the Balkans, one meets unrest and discontent. Greeks, Serbs and Roumanians are dissatisfied with the meagre results of their victory, and look to further expansion to find the economic independence that they require. The inevitably bad administration of these inexperienced States has created the greatest bitterness among the Turkish, Bulgar, Albanian, Hungarian, Croat and other races whose lands have gone to the conquerers. In the conquered countries all are waiting for that breakdown of the equilibrium of the Balkans which seems inevitable, to recover their losses.

Allied policy in the Balkans can hardly hope to be directed towards finding a permanent solution for any of the questions—racial, religious and economic—which are the cause of its periodical eruptions. Our object must be rather to withstand the shocks of the next few years, and allow exuberant nationalism to give way to a desire for co-operation on a very different basis from anything conceivable to-day.

THE
EUPHRATES & TIGRIS
STEAM NAVIGATION CO., LTD.

Regular Service of Passenger and Cargo Steamers running at frequent intervals between BUSREH (Persian Gulf) and BAGHDAD on the River Tigris, and between MOHAMMERAH (Persian Gulf) and AHWAZ on the river Karun.

Cargo booked on a Through Bill of Lading to BAGHDAD and/or AHWAZ by the chief liners sailing from the U.K. Continent and India.

NOTES AND NEWS.

Devonshire Square
E.C. 2

Burmah Oil Company.

With another dividend of 30 per cent. and an assurance from the Chair that the results for the current year should be very similar to those of 1921, the Directors and shareholders of the Burmah Oil Company have every reason to be well satisfied with themselves. Sir John Cargill reminded his hearers that he had presided over the annual meeting for eighteen years; in view of the fact that during the last eleven of these the dividend has only once been as low as 20 per cent, he was justified in speaking of the continued wonderful prosperity and progress that he had been able to report on each occasion. In the circumstances the company can view with equanimity any lack of success that it is still experiencing in its outside fields in Burma and Assam. The important thing both for shareholders and the world in general to know is that a company in such a favourable position is using its resources for a steady policy of expansion, taking every reasonable step and risk to add to its oil reserves.

Taxation and Development.

It is upon companies which have to spend heavily on a development policy that the burden of high taxation falls so heavily. The Burmah Oil Company has found oil-producing lucrative; but even more money could have been distributed in dividends, if it had not been necessary to carry on research and exploration work. In the same way more testing of outside areas could be undertaken, if such large amounts had not to be paid in taxation. Government, as Sir John Cargill admitted, cannot, of course, be carried on without taxation; but it is possible to tax to an extent that must inevitably cripple commerce and industry. For income-tax, Corporation Profits tax, royalties and excise duties, the Burmah Oil Company was called upon to pay £1,350,000. The Chairman will, therefore, be regarded as being well within his rights in suggesting that, instead of Governments cutting their coats according to their cloth, it is commerce and industry which are to a very great extent compelled to cut their coats of expansion and development according to the cloth with which they are left by the Governments.

British Claims against Bulgaria.

Although the fullest sympathy is felt with British firms to whom money was owing from Bulgaria in 1915, I have always considered it a grave tactical mistake in business on the part of Great Britain to enforce, alone among the Allied Great Powers, the terms of the Treaty of Neuilly in regard to the sequestration of Bulgarian money in this country and to appoint an administrator of Bulgarian property instead of allowing individual firms to make their own arrangements with their Bulgarian debtors. The saving clause in this matter, however, has been the knowledge and tact displayed by Mr. Egerton Grey, the administrator, in handling a difficult task. He has worked hard to prevent extreme measures being taken against Bulgarian firms whose *bona fides* in admitting liability while declaring their inability to pay in the present state of the Bulgarian exchange he has consistently endorsed. The scheme for liquidating these debts that is now likely to be adopted is that all British creditors should accept a first dividend of ten shillings in the £, with the possibility of a further dividend later, on the awards of the Administrator, on the understanding that the debtors are not to be forced into bankruptcy for the balance, although their liability will remain.

Exchange Quotations.

No chronicle of the week's events in the business world would be complete without a reference to the drop in the German exchange to 2,400 marks to the £, and of the Austrian to 160,000 kronen to the £. In the past there has seemed to be a close relationship between Near Eastern exchanges, in particular that of Roumania, and the German. One would, therefore, be tempted to interpret it as a favourable sign that there has been this time less response to the fall in the value of the mark, Bulgaria alone excepted, if it were not for the fact that the Near East exchanges are probably themselves so low that they have not had the vitality to reflect the German fluctuations. As for Austria, it is particularly pathetic to recall the hopes formed only a month ago when the Government introduced its currency reform and a new Austrian Bank of issue was formed. On June 12 the kronen rate was in the neighbourhood of 105,000; by the 21st. it had improved to about 60,000. The moral to be drawn would seem to be that artificial manipulation avails nothing; nothing fundamental in the economic structure of the impossible Austria, as it was left as a result of the Peace Settlement, has been changed, and accordingly the exchange rate gallops down hill. It is to be hoped that independent Egypt, which has not yet properly appreciated the value of its steady exchange as a result of the par system introduced by Great Britain, will take due note of the dangers of any deviation from this path.

Commentator.

The import trade of Turkey during the first four months of this year amounted to £T.25,596,000 as against £T.64,386,000 for the corresponding period of last year. Great Britain supplied goods to the value of £T.4,140,000; U.S.A. £T.3,802,000; Italy, £T.2,284,000, and France, £T.2,200,000. Exports from Turkey amounted to £7,510,000 which shows an increase of £3,825,000 as compared with the corresponding period of last year.

Commerce and Industry.

REPORTS FROM OUR OWN CORRESPONDENTS.

BULGARIA.

Sofia, July 5.

Government Contracts.

There is a good deal of dissatisfaction on the part of British traders concerning the methods employed in regard to the adjudication of Government contracts. Tenders are called for by a certain date, but it is rare that the first adjudication is final. The adjudications may be postponed or may be declared null and void. The reasons for this are that sometimes no tenders are received, at other times there are not sufficient tenders, but most frequently of all technical reasons are advanced as the cause of postponement. This is irritating to competing firms, and is often injurious to Government interests. Firms are forced to keep stocks of goods on hand for long periods, whilst their representatives waste their time at Sofia. The Government loses money if the leva falls in value, as the tendered prices have to be increased. Many well-known English, French, and Italian firms are growing tired of tendering for Government contracts. The responsible authorities are reported to be trying to remedy the present state of affairs. Until they do, the situation of a foreign firm tendering for the Government will remain difficult in the extreme.

EGYPT.

Cairo, July 6.

An Industrial Association.

An interesting step has just been taken by a group of the more important industrial companies in Egypt. They have formed themselves into an Association called the " Association des Industries de l'Egypte " for the purpose of working together for the common end and studying and putting into execution the means for developing those industries and affording them whatever protection they may need. The Association at present consists of thirty-five companies and has elected as its President, Monsieur Henri Naus Bey, Director General of the Société Générale des Sucreries et de la Raffinerie d'Egypte. It has already taken up various questions interesting local industries with the Ministry of Finance, which has expressed itself as sympathetically inclined towards it.

ROUMANIA.

Bucharest, July 4.

Resumption of Railway Traffic with Bulgaria.

Negotiations for the conclusion of a railway convention between Roumania and Bulgaria have just been terminated. The convention provides that the goods traffic between the two countries shall be regulated in accordance with the Conventions of Berne and Strezza with slight modifications; while the passenger traffic will be dealt with on the basis of the agreement reached in 1921 at Berne. Goods may be sent between the two States upon payment of the transport rates either at the loading station or at destination. The rent on the wagons will be in accordance with the regulations of Strezza less 50 per cent. It is further stipulated that one of the trains running between Medgidia, Bazargic, and Oborishti should carry through cars for Varna daily. The wagons required will be supplied in equal numbers by both railway administrations. The Customs and police formalities will be carried out at Botieva and Oborishti stations.

Railway Communication with Yugoslavia.

In the course of a conference recently held at Timisoara between Roumanian and Yugoslav railway representatives, the question of running a direct train between Timisoara and Szabadka was discussed. This new railway connection with Yugoslavia, which is very important from an economic point of view for the Banat, will be made through Baziash and Panciova.

New Import Regulations.

In order to remove the inconvenience to which jute carpet importers were subject the Customs authorities, in agreement with the Ministry of Finance, have decided that jute carpets may be imported without payment of the gold luxury tax, but on payment only of the duty according to the Customs tariff.

It has been decided to allow the free import as from July 1 of all furs of low grade quality.

Railway Credits.

The Director General of Railways informed a press representative at a recent interview that the Ministry of Finance had granted the Railway Administration a credit of 250 million lei, which is to be employed as follows:—100 million to be paid on account to industrial firms to whom large sums are owing for repairs of locomotives and wagons, and 150 millions to be utilised for immediate repairs of trucks required for the transport of cereals in view of the impending large increase of traffic in connection with the export of the new crop. It is estimated that from 250,000 to 300,000 wagons of cereals will have to be transported, half of them by rail and half by water.

YUGOSLAVIA.

Liubliana, July 7.

Industrial Congress at Bled.

For their second Congress since the Liberation, the Yugoslav manufacturers assembled on July 6 in Bled, the well-known Slovene mountain resort, where the King and Queen are at present enjoying their honeymoon in the Royal villa by the side of the Lake. The Congress was attended by some 150 manufacturers from all over the Kingdom; Government monopolies—tobacco, salt, munitions—were likewise represented. The Union of Manufacturers in Slovenia were the hosts of the occasion. Dr. Laza Markovitch, Minister of Justice, represented the Government in place of the Minister of Commerce, who was unable to attend. The Provincial (Slovene) Government was represented by the Viceroy, Dr. Hribar. The Chambers of Commerce of Belgrade, Osijek, Serajevo, and other places, and the Union of Wholesale Manufacturers in Split had all sent delegates. From Croatia only the representatives of the Government industries actually attended the meeting; but congratulatory messages arrived from Zagreb, and various corporations sent delegates, so that it cannot be said that the Croats boycotted the Congress.

The meeting was inaugurated by an address from Dr. Windischer, the able President of the Liubliana Manufacturers' Union, who spoke in praise of the united front shown by the trades and industries of the young State. The net outcome of the Congress was the formation of a Federation of All Industries in Yugoslavia, with its headquarters in Belgrade. Furthermore, two resolutions were passed to the effect that the Government should be urged (1) to unify the laws of the land with the least possible delay on the principle of one law for all; and (2) that the drafts of the said laws should be first submitted to the various economic corporations. When the results of this Congress are set beside the success of the Zagreb Trades and Industries Exhibition—which was also an all-Yugoslav and no mere local affair—it must be admitted that Dr. Markovitch was fully justified in claiming in his speech that trade and industry had already realised the union, whereas politics were still lagging behind.

The Congress wound up with a reception given in the rooms of the Hotel Toplice by the Liubliana Manufacturers' Union. The King was present, and evidently found both interest and pleasure in talking to the various guests, some of them blunt, self-made men from the industrial districts of Slovenia—a type not unlike that of the men to whom British industrial regions owe their supreme value and importance.

Engineering Topics.

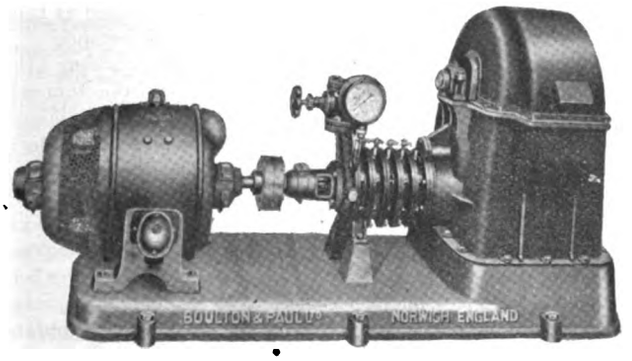
By Our Engineering Representative.

" Boulton " Turbo Elevator.

Among the stands that I found of special interest at the Royal Agricultural Show at Cambridge was that of Messrs. Boulton and Paul who showed the " Boulton " Turbo Elevator.

The Elevator exhibited was one of a duplicate order for the Bombay Baroda Railway Company, to be used for locomotive feed tank supply. The apparatus consists of a water elevator, and high lift centrifugal pump, the former to lift water from the well to surface level, and the latter to boost it up to the tank height. The interesting and novel part of the apparatus is the Elevator, which comprises an endless band about six inches wide, having mounted upon it a series of metal undulations, or to use the makers' description, scientifically shaped metallic cells.

This endless band is carried on a pulley in the Elevator, while the bottom end hangs down the well, immersed in about three feet or so of water, and carrying in the loop a weighted pulley to keep it taut. As the pulley at the top of the Elevator is revolved, the band travels round picking up water in the cells, where it is entrapped until thrown out by change of direction and centrifugal force,



A Centrifugal Pump.

which takes place while passing over the top pulley. A sump is provided in the Elevator from which the centrifugal pump takes its supply.

The centrifugal pump is so placed and arranged that it is self-priming and will automatically balance with the water raised by the Elevator. The principal advantages claimed for the apparatus are—that they are particularly suitable for wells where there is a wide variation in the water levels, as is the case in India, as the belt may, if necessary, be submerged up to thirty or forty feet. Everything is accessible from above ground, and the well does not need to be entered for installing. Further they are very appropriate for working in old unlined wells, which are so frequently found in the East, as there is no vibration to disturb the walls of the well. The apparatus has a high efficiency which does not decrease by age as is the case with most types of pumping machinery. Finally, there are no valves, plungers, or pump rods to give trouble.

The illustration given is of a similar apparatus to that exhibited, but is motor driven instead of belt driven.

A Pumping Set.

At the same exhibition Sir W. G. Armstrong Whitworth were showing a pumping set, a description of which will, I think, prove of considerable interest to readers of THE NEAR EAST. The pump is of the positive rotary type, consisting of a casing, two covers, shafts, and two rotors. The rotors are flat discs bored to fit loosely on opposed eccentrics on the shaft. The casing has inlet and outlet ports at the top and the rotors are rolled round the inside of the casing by the rotation of the shaft and its eccentrics. As the rotors are smaller in diameter than the casing the pumping action is caused by their rolling motion, a small valve being fitted between the inlet and outlet ports to prevent any passage of liquid from the delivery to the suction side of the pump. Pumps used for pumping water have rotors which are covered with vulcanised indiarubber, and the use of this material prevents wear of metal parts and guarantees a good suction lift.

The capacities of the pumps range from 300—11,000 gallons per hour, and they will work against total heads of 75 ft. and 100 ft. respectively. The motive power is provided by the well-known " A.W." vertical 4-stroke totally enclosed engine. These engines range from 3 to 16 b.h.p., and are made for running on paraffin or petrol. They have the advantage of very robust construction combined with a fool-proof and compact design.

A Fuel Oil Engine.

I noticed with especial interest the stand of Messrs. W. H. Allen, Sons and Co., whose products are well-known throughout the Near East. They were showing heavy fuel oil engines, centrifugal pumps, and a lighting set. The heavy fuel oil engines, which were the feature of the stand, possess some special advantages which render them particularly suitable for service in regions like the Near and Middle East. For one thing they enable the production of power at the lowest possible cost, while they are so extremely simple to run that they can be left for long periods without skilled attention.

River Bank Protection.

A subject always of interest to both engineers and the general public is the protection of river banks in deltaic areas, and whilst many methods designed to that end have been carried out, not all have been as successful as could be wished. An example of this is in the use of mattresses which has been uniformly successful on the banks of the Mississipi and Missouri, but which has rarely been of use in India. Banks have been lined with all kinds of materials and spurs of various construction have been tried, but judging from results, one of the most successful methods has been that of the river bank protection work carried out in connection with a large railway system. The safety of the track was threatened by erosion taking place along a stretch of river bank 2,500 feet in length. Two layers of super-imposed brushwood mattresses were placed in a normal position parallel to the stream. Over these a layer of stout wire mesh was placed, with coarse rock protection on top, above which was placed another layer of wire mesh. Strong galvanised iron wire was used to lace this protection together, and the brushwood mattresses were also stitched together with wire. The protective work was attached to the bank by means of cables placed at 14 feet intervals, and fastened to bollards driven into the firm ground. To receive the mattresses the bank, which is 15 feet high from the bottom, was sloped back 3 to one, the upper portion being covered in places with a willow mat, or paved, and a small " apron " was provided at the bottom. At certain places the rush of water was such that the work could not be carried out *in situ*, and there the whole of the protection was built up on the firm ground and allowed to sink into position as the soil was washed away from under it. A very high measure of success seems to have been reached by these means, and very little further attention, and that only of a minor character, has been required.

D. A. Film.

A good deal of interest centres, in engineering circles, round the film which Messrs. Allen-Liversedge, Ltd., have had taken to illustrate the preparation of acetylene from calcium carbide, and its compression into the form of dissolved acetylene. There were a number of technical difficulties to be overcome in the preparation of the film, not the least of which was photographing flame at a temperature of over 4,500 degs. Fahr., and the photography of white hot metal. The success of the film makers in this connection should induce some of our acetylene welding and steel making firms to prepare in their turn films illustrative of their work as, exhibited on the Continent and in overseas markets, such films should possess marked propaganda value.

British Consular Reports.

VII. SYRIA.

(Concluded).

Public Works.

The Beyrout press is still loud in complaint of the public utility undertakings. The Tramway Company's service may be said to have slightly improved. The Gas Company which supplies no gas but furnishes electric lighting of a sort both to the town and to private consumers gives complete dissatisfaction. There has been talk of its re-construction or amalgamation with the Tramway Company. Possibly this may be the final solution. It has recently been announced that this latter Company is to provide for the lighting of the streets through which its cars travel. This may result in an improvement as, except on moonlight nights or in parts where there are well-lit shops, the lighting of the streets is of the poorest description. In favour of the Water Company it may be said that it provides good water. But it fails to provide it in sufficient quantity and in the summer it is of common occurrence for certain parts of the town to be without water for days at a time. Whether the phenomenon is due to worn-out plant, misplaced economy or faulty planning is immaterial. The Company is now protesting loudly that it is on the point of taking real steps to ensure an adequate supply of water to all parts of the town.

Damascus is well provided with water from the Barada river. The fall at Tekieh on this river also provides the power for the tramway and electric lighting of the city. The installation is Belgian and there are at present 4 dynamos of 250 h.p. each. The tariff is 9 Pst. Syr. per kilowatt for light and 5 Pst. Syr. for power. The subscribers in both categories number 15,000 and owing to shortage of power no new subscribers of the second category are at present accepted. There is talk of increasing the power by the using of a second fall. The tramway system consists of a double track line from the Salhieh to the Meidan quarters. An attempt to increase the fares resulted in a boycott and the attempt was abandoned. Materials are imported from Germany, Belgium, Czecho-Slovakia and France. Wiring and insulators come from Belgium.

Both in Beyrout and Damascus the small existing telephone systems are run by the military. They have not yet reached the highest pitch of efficiency and the use of the telephone usually requires the expenditure of considerable patience. Eventually the services in both places will be placed in the hands of private companies.

Agriculture.

Syria possessing no industries and no coal or oil, the mainstay should (at any rate until steps have been taken to develop the water power and perhaps even after) be agriculture. This is at present quite undeveloped and methods are primitive. In the whole of Syria and the Lebanon the estimated extent of cultivable land is only 25 per cent. In the Lebanon, with an area of half a million hectares, only 17,500 hectares, or 3.5 per cent., was under cultivation in 1919. Of course, the district is a mountainous and rocky one, and it lost heavily in population during the war. In the whole Vilayet of Beyrout, with an area of 3,050,000 hectares, only 4.7 per cent. was cultivated, and in the Hauran, where grain is chiefly grown, only 10 per cent. of the total surface was under cultivation at the same date. In the Aleppo region, out of rather more than 8½ million hectares, rather less than half a million were cultivated.

Even what is cultivated does not produce the amount it should. Methods are largely antiquated, and there is a need of, and opening for, motor culture, but the danger is that motors will fall into unskilled hands, become damaged and find no one to repair them. The existence of repair stations is an essential to the success of motor culture. Properties are often very large, landlords are absentee and peasants little better than serfs. They have little to gain by increased production and tend to produce what they need for themselves. The system of land registration and the land laws, an inheritance from the Turkish Administration, are defective, and the tithe should, and will no doubt, eventually, be replaced by a land tax. No cadastral survey has yet been held, but a beginning is now being made, as a survey of a portion (two villages) of the Bekaa plain (between Lebanon and Anti-Lebanon) is to be made to serve as a model to show the importance of this reform. This survey is to be made under the auspices of the French High Commissioner with the assistance of the military aviators, who still produce the necessary air photographs.

During the year an experimental cotton culture station was founded at Akkar. Attempts are being made to improve the breeds of horses, stud farms on a small scale having been established at various points in Syria.

It will be seen from the foregoing that much remains to be done if agriculture is to reach that point of development which is essential for the prosperity of the country. The road system is relatively well developed, but roads alone are not sufficient, and other points which are doubtless receiving, or will receive, consideration are the creation of further agricultural stations, the development of irrigation and some system of agricultural banks.

Minerals.

There is an extensive detrital deposit of alluvial gold near Antioch. Tests by panning were made in 1913 and the results are said to have yielded an average of about 1.5 dwt. of gold per cubic yard.

Copper in large nodules is found from time to time near Beilan between Alexandretta and Aleppo, while iron deposits exist in the mountains northwards from Alexandretta. The type of ore hitherto found contains however too much sulphur to be of use for steel-making.

Manganese deposits in Northern Syria are described as being very silicious and therefore of no commercial importance.

Chromite is described as abundant, and exists among other places between Suedia and Alexandretta, where the numerous outcrops bear witness to the existence of the ore in large quantities. Some ore has been extracted by rather primitive galleries driven into several of the deposits. In the same serpentine formations in which the chromite is found is also found chrysolite but in what quantity cannot be said. Gypsum is said to exist in large quantities at Suedia. Such lignite as has been exposed has been proved to be valueless, while no petroleum has yet been proved in Syria. Asphalte occurs at many points in the country, and notably at El Becheri on the right bank of the Euphrates where there is reputed to be a bed of abnormal thickness and extent. The French Authorities reserve to themselves the right to take over on behalf of the State all promising oil occurrences located in Syria in future. With the improvement in public security in the north, prospecting should now become easier.

Social Questions.

The housing shortage continues both in Beyrout and elsewhere and there has been no appreciable fall in rents. New building is costly and the finding of accommodation is still often a matter of months. In these circumstances rents of both dwellings and offices must remain abnormally high. The reconstruction of the buildings destroyed by the Turks when they drove two broad streets through the most crowded part of the town has not yet been begun.

MANCHESTER MARKET.

Falling off in Demand.

(*From Our Own Correspondent.*)

Manchester, Saturday.

The trading in the market during the past week has been the quietest we have experienced for many months back and producers of both yarn and cloth have had a very dull time. There has been a distinct falling off in the demand and the turnover has been on a most disappointing scale. Of course, July is invariably a quiet month, but if the present demand does not improve within the next week or so, then there will be every reason for a pessimistic feeling. As it is, many makers of certain fabrics are getting desperate for orders. The general opinion on 'Change however is that a revival of activity will soon set in, and that the present paucity of inquiry will only prove temporary. With regard to the outlets of the Near East, no important sales in piece goods have been recorded for Egypt. Of course, day by day buying keeps being done, but most of the offers have proved impracticable. Minor sales have been reported for the Levant and Constantinople. With regard to yarns, quotations for Egyptian spinnings on the week are practically unchanged, but when users have had actual business to place, spinners have generally lost a little ground. Scattered cloth transactions have been recorded for India, more particularly in light bleaching descriptions. It has been a dull week with regard to China, but a recent advice received from that outlet reads rather encouragingly. Some steady buying in a small way has been done for the Continent in fancies. The home trade have wanted goods from stock or for quick delivery. There is very little change in prices for American yarns.

LIVERPOOL REPORT.

Steady Decline in the Market.

Messrs. Reynolds & Gibson report as follows for the week ended July 12 :—

A slightly improved business has taken place in this department during the past week, and that in face of a steadily declining market and adverse influences working from the outside. Under the circumstances, the daily average of 640 bales sold can be considered a fairly satisfactory total. The enquiry has been chiefly for Sakellaridis, Sudan and Uppers, taken in the above order. A little more business has been transacted in Uppers this week, and interest in the finer Sakellaridis cotton still continues to grow, though very very slowly. Brown and white Delta cottons have been at a discount. Sudan and Tokar have again found buyers ; in fact a steady market seems assured for these growths, particularly now that the Blue Nile irrigation scheme is to be continued. As we pointed out last week the selection of Sudan and Tokar has lately become much more limited in extent, and amongst the old crop brown varieties there are signs of a hardening in the basis. Practically no Tokar Sakellaridis No. 1 (as exemplified in early shipments) now exists in this market. Either this cotton has fallen off very quickly in appearance and staple, or else outside cottons are masquerading under an assumed name. We should advise holders of inferior lots of Tokar Sakel to " get out " as quickly as possible, particularly if they have profits.

Manchester reports have been somewhat lifeless. Many mills have been closed owing to the annual holidays, which occur at this time of the year. Prices have been on the decline all round ; and the probability of a most serious financial crisis in Germany has for the moment taken all life out of the export trade. India has stopped buying and China has disappointed all her friends by not commencing to buy. Only oddments seem to be going through for the lesser outlets. C.i.f. business continues on quietly restricted lines. Crop reports on the whole appear very satisfactory, although one correspondent does write us to the effect that an entirely new pest has been discovered, which is causing serious damage in certain areas, the extent of which have not yet been defined. The large stock in Liverpool shows a slight decrease, but receipts in Alexandria continue to be heavy. For the immediate future we look rather for a succession of quiet, featureless markets than for any spectacular rise or fall in prices. Total sales 3,200 (includes 1,400 Sudans). Quotations are reduced ½d. per lb. Fully Good Fair Sakel 19.75d.

THE EGYPTIAN MARKET.

Business Restricted.

The Commercial Co. of Egypt, in their report for the week ended July 7, state :—

The market during the past week has been heavy and only a restricted business has been done. The heaviness of the market must be attributed to the slackening of the demand from the consuming centres. The big advance in prices in New York on Monday last, after the publication there of the Bureau Report, induced a rise of about a dollar in our market, but this advance has since practically all been lost. Consumption is the controlling factor and although other factors may from time to time exercise some influence, such influence can only be of a temporary nature. Cotton continues to arrive from the interior so that the stock remains fairly heavy—about 1,800,000 cantars.

Spot.—Total sales amount this week to about 6,700 bales of which we estimate 5,500 bales Sakellaridis, 1,100 bales Uppers and 100 bales Brown.

Sakellaridis.—There has been a fairly steady demand during the week for the grades Fair to Fully Good Fair. The basis remains about the same as last week with the exception of Fully Good Fair which has stiffened slightly.

Uppers.—Practically all the sales put through have been in Good Fair to Fully Good Fair and Fully Good Fair. A small business has been done in Good and Fully Good at fairly cheap prices. The basis in general remains unchanged.

Brown.—A few odd lots have changed hands at about last week's prices.

Crop.—Reports from the interior continue to be encouraging. The plants are progressing well and are in a healthy condition to meet the critical period upon which we are about to enter, when shortage of water will be a more serious factor than has been the case up to the present. Temperatures have been favourable.

THE AMERICAN ACREAGE.

An Indifferent Outlook.

Professor J. A. Todd contributes an article to the *Manchester Guardian Commercial* on the meaning of the American acreage and condition figures just published. " The season," says Professor Todd, " has begun badly. It may still pick up wonderfully, but at the best we shall get a crop no more than sufficient for the probable requirements of next season. At the worst—well, we shall have to cut our coat according to our cloth, but at least it would demonstrate once and for all the folly of being dependent on one source of supply for so large a proportion of raw material. As for the course of prices in the near future, it is safe to say that the market has never been rendered so susceptible to weather and boll weevil scares. Spasmodic movements will be rapid, and one day's heavy downpour of rain in the Belt may bring about a rise of as much as 1d. per pound. The added danger of excessive speculation is another factor to be contemplated, and if developments coincide with present gloomy indications a remarkable and unprecedented season lies before us."

The export duties on coal and oil fuel from Gibraltar have been removed as from June 30 last.

It is announced that several Italian Chambers of Commerce and other associations have organized a commercial mission to the Eastern Meditteranean with the object of enabling Italian exporters to study the markets there. Each member of the party will be allowed to carry with him 100 lb. of samples free of freight charges.

Stock and Share Markets.

BANK RATE LOWER.

Brighter Tone Generally.

(From Our Own Correspondent.)

London, Monday Evening.

A much better tone has been in evidence on 'Change during the past week, and in some directions quite a cheerful tone has developed. A steadier tendency has been created by the reduction in the Bank Rate to 3 per cent., the possibility of which I indicated a few weeks ago. There has not been sufficient time up to the present for this reduction to have any pronounced effect on the markets, but one is justified in anticipating a healthier tone.

Gilt-edged Advance.

The advance made in the gilt-edged market during the week is likely to continue. The Bank Rate reduction and the rally in exchanges have resulted in an increase in all stocks. Consuls are 1¼ up at 58 7-8, while the Conversion Loan has gained ¾ at 77½. War Loan fives at 100 3-16 are 7-16 higher. Indian stocks are higher in all cases. The seven per cent. Loan is 1½ up at 117½, the 3½ per cent. loan has gained ¼ at 67¼, while the 3 per cent. loan has reached 58½, and increase of 1¼. The foreign market has shown signs of improvement; Turkish Unified in particular have shown a buoyant tone. French War Loan Fives are ¼ down at 37¾, while the 4 per cents have shed a like amount at 29¾. German 3 per cents. are stronger at 2 3-8, a gain of 3-8. Czecho-Slovak 8 per cents have improved with a gain of 1 point at 93. Russians remain unchanged. Turkish Unified are 2 points stronger at 36½, while Greeks are better at 36, an advance of 1½. Peruvian Governments 5½ per cents are 1 up at 93. Mexican Government Bonds have been brilliant with 5 per cents and 6 per cents both up at 66.

Industrials.

The condition of the Industrial Group shows a decided improvement on last week's report. Tobaccos have been steadier. Bats at 78s. are 1s. 9d. harder, while Imperial tobaccos have jumped eighteen-pence at 64s. Weakness has prevailed in Textiles. Coats are 3d. lower at 61s., while Courtaulds are a similar amount up at 51s. Dunlops at 8s. 9d. show no change. Iron and Steel shares are unsteady. Vickers are unaltered at 13s. 6d., while Guest Keens have shed 6d. at 34s. 6d. and Armstrongs are 6d. lower at 17s. In Indian Railways Bengal and North Westerns are 1 down at 129½, Bengal Nagpur at 97½ shows a decrease of 1¼, while Madras and Southern Mahratta have shed ½ at 103½.

Oils Steadier.

A better tone has been in evidence in the Oil market, while prices as a whole have shown a tendency to rise. Anglo-Persian Ord. at 5 has gained 1-16 while Burmahs are 1-8 up at 5 3-8. Mexican Eagles have advanced 5-32 to 3 3-16. Trinidad issues have hardened. Apex are 1-16 up at 2; Centrals are 1-8 higher at 1 15-16, while Leaseholds are 1-32 stronger at 1 1-8.

Among Egyptians Anglo-Egyptian B are 1½ x.d., an increase of 1-16, while Oilfields of Egypt remain unchanged at 4s. The Roumanian group have recovered slightly from their weakness of the last few weeks. Phoenix are 3d. harder at 27s. 3d., Dacia Romanos are 1-8 up at 1 1-8, while Steaua Romanas are firm at 11s. Roumanian Consolidated have risen 3d. at 18s. 3d. In the event of an improvement generally, Roumanian Consolidated and Phoenix should prove a safe speculation.

Banks Unsteady.

A variable tendency has prevailed in banking descriptions. Chartered of India have shed 3-16 at 17 ¾ while National of India are ½ up at 44¾. P and O. Banks have dropped ½ at 13, while Bank of British West Africa are unchanged at 4¾.

Egyptian securities have remained firm all along the line. Aboukirs are unchanged at 21s., Beheras show no change at 8. Egyptian Markets are steady at 21s. 6d., while Gharbieh Lands are 1½.

In shipping securities P. and O. Deferred are 303; Cunards are at 19s. 6d., and Furness Withys are 31s.

Increases of Greek customs dues on the following luxury articles have taken effect from June 24 last:—silks, spirits, pianos, motor cars, imitation jewellery, carpets and sports articles. It is understood that the duty on alcohol and spirits, women's ready-made dresses, carpets, silk and sports articles, has been increased five times, and for bicycles and straw hats, it has been doubled.

A Ministerial Order which took effect on July 1 lays down a new scale of monopoly duties to be levied on explosives, cartridges, rifles and revolvers (other than for military purposes), etc., imported into or sold in Yugoslavia. The duties are fixed on a gold basis, but are actually payable in silver (paper) with an "adagio" of 100 per cent.

LONDON PRODUCE REPORT.

Decline in Oilseeds.

(*From Our Own Correspondent.*)

London, Monday Evening.

Sugar.—Home refined has been a steady feature. Tate's cubes and mineral water sugar are unchanged at 57s. and 51s. 3d. respectively, while London granulated and Lyle's granulated are firm at 50s. 9d. and 51s. respectively. Steadiness prevails in export descriptions. West Indian crystallised shows no change at 43s. 6d. as also white Mauritius at 48s. White Java has shed 1½d. at 20s. 10½d. Cane sugar quotations are :—July, 17s. 9d ; August 18s. and September 17s. 9d. White sugar quotations are :—July, 23s. 0d. ; August, 22s. 5½d. ; September, 22s. 4½d. ; October, 21s. 7½d. ; and October-December, 21s. 4½d.

Coffee.—Prices are again lower. East Indian has dropped 2s. at 112s., as also Costa Rica at 106s., while Nairobi at 100s. is 4s. down. The futures market is weak. Quotations are :—July, 61s. 6d. ; September, 63s. ; December, 61s. and March, 60s. 9d.

Dessicated Coconut.—The position is unchanged, with a steady business passing. Many mills are closing down owing to the poor demand and high cost of production.

Rice.—A continued firmness has been in evidence throughout the week. A further rise is to be noted for Burma " two star " rices.

Green Fruit.—Heavy shipments continue to arrive of South African oranges, while the demand has been equal to clear the market. Prospects of favourable weather have had the tendency to ease the lemon market this week, while prices have advanced slightly. Apples are still high in price, while there has been a normal demand for best fruit. Further advances are to be noted for Egyptian and Valencia onions, while shipments of the former are light.

Oilseeds.—Lower quotations generally. Indian linseed is 1½d. down at 21s. 7½d., but La Plata has gained 6d. at 20s. Rapeseed has declined with Toria at 18s. 6d., a loss of 1½d. Cottonseed is down in all cases. Egyptian black at 12s. and Sakellaridis at 11s. 3d. have shed 4½d. and 3d. respectively. Indian is 3d. lower at 9s.

Oils.—A firm tone has prevailed. Linseed oil is 1s. up at 44s. Rape oil is unaltered with crude at 45s. and refined at 48s. No change is to be noted in cotton oil. Deodorized is 53s., Egyptian crude is 42s., refined is the same at 48s., while technical has come to business at 41s. 6d.

Oilcakes.—There has been no change in prices. Cottonseed cake is at 160s. ton, coconut cake is the same at 200s. ton, while linseed cake and cottonmeal cake are firm at 280s. ton.

AGRICULTURAL CONDITIONS IN IRAQ.

Crops Affected by Weather.

The following extracts are taken from the Agricultural Bulletin of Iraq for the month ended May 15 :—

During April the mean maximum and mean minimum monthly temperatures in Baghdad were 84.9 degrees F. and 60.1 degrees F. as compared with 83.30 degrees F. and 58.2 degrees F. respectively for the previous 33 years. The relative humidity was 49 deg. per cent. as compared with a recorded average of 60 per cent. The rainfall recorded in Baghdad was 0.10 inches as compared with an average of 0.90 inches, whereas the total rainfall for the current rainy season up to the end of April was 9.15 inches as compared with a recorded average of 6.69 inches. The prevalence of East winds combined with the daily increase in temperature has hastened ripening of cereal crops to an unusual extent. Early ripening has also been furthered by lack of rain. This applies equally to irrigated areas as well as to those areas dependent on rainfall.

Late Sowings Poor.

The monthly report of the Director of Irrigation has not been received to date. According to other reports, however, there has been sufficient water to meet all demands.

The whole of the barley crop of Lower Iraq has now been harvested. The harvesting of rain sown and irrigated wheat continues. The areas under winter cereals have been so large this year, that considerable difficulty is being experienced in harvesting owing to lack of labour. Rain sown crops in Lower Iraq have suffered from want of late rains ; those in Upper Iraq are in splendid condition. Late sowings have given poor results, the crops being thin and light. Generally speaking, however, there is a large proportion of good to middling wheat and barley. The bulk of the irrigated crops are in excellent condition and good yields are anticipated.

Further Rinderpest Outbreaks.

Lack of spring rains has led to the early drying up of desert grasses. Good grazing is to be had on the stubble and aftermath of harvested fields. The Director of Civil Veterinary Department reports outbreaks of rinderpest at Baquba, Khaniqin and Shahraban. Otherwise, all stock appear to be in good condition.

Mulberry Cultivation.

Harvesting of experimental plots and pure lines of wheat and barley have been completed. Final cuttings of bersim experiments have been taken. All flax has been pulled and dried preliminary to storage. Machinery for dealing with the crop is expected shortly and arrangements for its erection are in hand. Three exotic and six local varieties of mulberry seed have been sown in the interests of sericulture.

The propagation of varieties suited to silk worm rearing is a matter which has to be anticipated before any considerable expansion in the silk industry can take place. Bearing this in mind, the Department of Agriculture is endeavouring to extend the cultivation of the most suitable varieties of mulberries. It is anticipated that there will be a large number of seedlings available for distribution early next year.

Sericulture.

The following varieties of silk worms have been reared and cocoons formed :—French ; Bulgarian ; Japanese ; Chinese, and Italian.

It is as yet impossible to say which of these varieties is most suited to conditions obtaining in the Baquba area. The silk assistant is reeling a certain quantity of each variety prior to its being sent abroad for valuation. Valuation reports will not likely be received in time to allow orders being placed for next year, but in the meantime one of the varieties will be selected and orders placed for sufficient eggs for next year's demands. On receipt of valuations from home, the price obtained by each variety multiplied by the yield should give a good indication of which will eventually be the most profitable variety to rear.

The bulk of the cotton has now been sown, and although the season is well advanced, there are still odd demands for seed from belated cultivators. Reports on germination vary according to whether cultivators have adopted the Egyptian system of cultivation on ridges which is recommended, or their own system of broadcasting the seed, ploughing it and then irrigating. Where the former system has been followed, germination has been good in every case. Good germination has also been observed where cotton has been sown between vegetables.

An all-steel threshing machine is shortly expected to arrive in this country. Its performance will be watched with interest

by many, as the chief difficulty experienced with threshing machinery in this country is the warping of woodwork due to the very trying conditions under which such machinery has to work.

THE ROUMANIAN HARVEST.

Regulations Governing Grain Trade.

(*From Our Own Correspondent.*)

Bucharest, July 4.

The harvest season is beginning. Barley and oats are now being cut, and the yield is very promising both as regards quantity and quality. The wheat harvest will start in a week's time. At last week's Ministers' Council the following regulations were decided upon with regard to dealings in the grain :—(1) complete freedom of trade to obtain within the country ; (2) barley, oats, haricot beans, peas, millet, to be free for export, upon payment of the required export taxes ; (3) a quota of maize for home requirements will remain in force until September, when the result of the new crop will be known ; (4) the export of wheat, rye and their derivatives to be prohibited ; (5) the export tax is fixed at 20,000 lei per wagon of 10,000 kg., payable in foreign currency, the rate of exchange of sterling serving as a basis for calculation ; (6) a bonus of 5,000 lei above the home price will be granted to growers of wheat for every wagon load sold in the country for home consumption. A further bonus of 200 lei will be granted for each hectar sown under wheat, either in the autumn or spring. These bonuses are intended to compensate growers for the prohibition of wheat exports, as well as to stimulate wheat sowings.

OPIUM MARKET.

Market Active.

Messrs. Barker Brothers, Smyrna, report as follows under date June 30 :—

We have to report a very active month on our opium market with sales amounting in all to 40,000 lbs. Prices started on an average of 12s. 6d. per lb. c.i.f., advanced to 13s. 6d. during the middle of the month, and again declined this week to 12s. This oscillation or rather this week's drop is owing partly to material fluctuations of the exchange, and partly to the disposition of holders to reduce the piastre price in order that their constituents in the growing districts may restock at lower figures. The future, however, augurs a strong market, and should the recent active demand both here and in Constantinople continue, we are certain to see again 13s. to 13s. 6d. for a basis of 12 per cent. Morphine. Our exchange is now Ps. 728 per pound sterling for cheque on London and 0.60¼ dollars for one Turkish paper pound. The arrivals to date, commencing early this month are 183 cases new crop against 110 at same date last year. Our stock of old and new opium on our market, in first and second hands, is now 850 cases of 160 lbs. per case.

EGYPTIAN TOBACCO CULTIVATION.

Probable Re-introduction.

(*From Our Own Correspondent.*)

Cairo, July 6.

Many articles have appeared in the local press recently, regarding the question of tobacco cultivation which is about to be re-introduced. The Egyptian Government has for a long time been pressed by various interested persons to permit the cultivation of tobacco which has been prohibited since 1890, and during the past two or three years experiments have been carried on for the purpose of ascertaining to what extent tobacco should nowadays be grown as a commercial success.

It is true that the crop produced prior to 1890 was absorbed in the country, but the general standard of the tobacco consumed has changed very much during the past thirty years, and it remains to be seen whether the quality which can be produced will find a remunerative market. There is also the fiscal aspect of the question to be considered. The tobacco duty at present brings about £E.6.000.000 into the State coffers. Obviously the Government could not consent to a measure which would, seriously affect its revenue and although a special excise could be placed on tobacco land, etc. it is quite possible that in order to compensate for the loss in Customs duty, the tax that would have to be imposed would make tobacco production unprofitable. The tobacco tax formerly rose to as much as L.E. 30 per feddan plus the ordinary land tax, and the difficulty of collecting this tax, and the damaging effect which illicit cultivation was having on the revenues, were the main reasons for introducing the prohibition.

CURRENT PRICES.

General Produce.—Bacon : (Continental), 140s. cwt. ; (Canadian), 127s. 6d. cwt. ; (American), 110s. cwt. ; butter (Danish), 226s. cwt ; (Australian), 221s. cwt. ; (New Zealand), 229s. cwt ; cheese (Canadian), 98s. cwt ; (New Zealand), 97s. cwt ; lard 67s. 6d. cwt. ; eggs (Danish), 18s. per 120 ; (Styrian), 11s 6d. per 120 ; chillies, 157s. 6d. cwt. ; cloves (Zanzibar), 1s. 2½ lb. ; cocoa (Ceylon good to fine), 81s. cwt ; coffee (Costa Rica), 121s. cwt. ; (East Indian), 122s. 0d. cwt ; (Central American), 97s. 6d. cwt.; (Jamaica), 72s. 6d. cwt.; (Mocha Longberry), 105s. cwt. ; (Santos superior), 71s. cwt. ; ginger (washed Cochin) 53s. 9d. cwt. ; nutmegs (110's to 80's), 11½d lb. ; pepper (Singapore black), 4d. lb. ; (Muntok white), 7½d. lb. ; pimento, 2.1-8d. lb. ; raisins (Cape), 70s. cwt. ; sultanas (Smyrna). 72s. 6d. cwt. ; currants (Vostizza), 60s. cwt ; (Amalias), 53s. 6d. cwt ; sugar (Tate's cubes), 56s. 6d. cwt. ; (Lyle's granulated), 50s. 9d. cwt. ; (Mauritius crystals), 47s. 9d. cwt. ; (West Indian crystallised), 43s. 9d. cwt. ; (centrifugal), 17s. 10d. cwt. ; tapioca (fair Singapore), 2d. lb. ; rice (Rangoon No. 2), 14s. 10½d. cwt. ; (bran Rangoon), £6 19s. 10d. ton ; cinnamon (firsts), 10½d. lb. ; mace (fair Singapore), 1s. 7½d. lb. ; tea (Indian, common to good common), 1s. 0½d. lb. ; (medium to good), 1s. 4d. lb. ; (fine to finest), 2s. 7½d. lb. ; Ceylon (common to good common), 1s. 2d. lb. ; (medium to good), 1s. 6d. lb. ; (fine to finest), 2s. 7½d, lb. ; Java (common to good common), 10½d. lb. ; wheat (English white), 56s. qr. ; wheat (Australian), 57s. 3d. qr. ; oats (English), 37s. 3d. qr. ; oats (La Plata, ex-ship), 26s. 10½d. qr. ; maize (La Plata), 38s. 10½d. qr. ; flour, 43s. 3d sack.

Chemicals.—Acids : Boric 61s. cwt. ; oxalic, 8½d. lb. ; citric, 2s. 7d. lb ; tartaric, 1s. 6d. lb. ; ammonia (sulphate) £15 11s. 9d. ton ; arsenic, (white powdered), £42 ton ; benzole (standard), 2s. 5½d. gallon ; bleaching powder (35 per cent.), £12 10s. ton ; borax crystals, 29s. 6d. cwt. ; cream of tartar, 115s. 6d. cwt. ; Potassium : Bichromate, 6¾d. lb. ; chlorate, 4½d. lb. ; caustic, £33 10s. ton ; nitrate, £37 10s. ton ; permanganate, 9¾d. lb. ; prussiate yellow, 1s. 3½d. lb. ; sulphate (90 per cent.), £15 5s. ton ; Sodium :—Crystals, 120s. ton ; bi-carbonate, £11 2s. 6d. ton ; bichromate, 5¼d. lb. ; alkali (58 per cent.), £9 1s 3d. ton ; chlorate, 3½d. lb ; caustic (70 per cent.), £21. ton ; hyposulphite, £16 ton ; prussiate, 9½d. lb. ; nitrate, £14 12s. 3d. ton ; glycerine (crude 80 per cent.), £60 ton ; glycerine (industrial 1260 per cent), £87 10s. ton ; lemon oil, 3s. 4½d. lb., quinine 2s. 3½d. oz. ; red lead, £37 ton ; white lead, £41 ton ; white ground lead, £49 15s. ton ; sulphate of copper, £26 17s. 6d. ton ; sulphate of iron, 60s. ton.

Metals.—Aluminium, £100 ton ; antimony (English Regulus), £28 ton ; bismuth, 9s. lb. ; copper (standard) £63 ton ; copper (electro), £70 15s. ton ; gold bars, 93s. oz. ; iron (No. 3 Cleveland), 90s. ton ; hematite (mixed number), 94s. 5d. ton ; galvanized sheets (25 G), £16. ton ; lead (soft foreign), £24 10s. ton ; manganese Poti, 1s. 1½d. unit ; molybdenite, 32s. 6d. unit ; nickel, £160 ton ; platinum, 365s. oz. ; plumbago, £16 ton ; quicksilver, £11 10s. bottle ; spelter (G.O.B.), £28 ton ; tin (standard), £154 6s. 3d. ton ; wolfram, 11s. 7½d. unit ; zinc sheets, £36 ton ; tin plates (20 by 14), 19s. 10½d. box ; silver bars, 36d. oz.

Hides and Skins.—Ox and Heifer (first), 90 lbs. and up, 9.7-8d. lb. ; 80 to 89 lbs., 9.7-8d. lb. ; 70 to 79 lbs., 9½d. lb. ; 60 to 69 lbs., 8.5-8d. lb. ; 59 lbs. and under, 6.7-8d. lb. ; (second), 90 lbs. and up, 8¾d. lb. ; 80 to 89 lbs., 8¼d. lb. ; 70 to 79 lbs., 8¼d. lb. ; 60 to 69 lbs., 8⅛d. lb. ; 59 lbs. and under, 5¼d. lb. ; Cows : (first), 60 lbs. and up, 7¼d. lb. ; 59 lbs. and under, 6⅝d. lb. ; (second), 60 lbs. and up, 5.3-8d. lb. ; 59 lbs. and under, 4.5-8d. lb. ; Bulls (first), 5d. lb. ; (second), 3½d. lb. ; Kips (first), 5½d. lb. ; (second), 4½d. lb. ; (third), 3½d. lb. Calcutta Market. Prices in rupees per 20 lbs. : Arsenic hides (cows) : Agras, 7.8 to 13 (7 to 13) ; Durbhangas, 7 to 8.8 (6 to 8.8) ; Patnas, 5.8 to 6.8 (5.8 to 6.8). Salted cows, 4.8 to 7.8 (4.8 to 7.8). Arsenic hides (buffalo) : 4 to 7 (4 to 8). Skins : Calf, (8 to 10) per 20 lb. ; goat, 180 to 240 (180 to 240) per 100 pieces.

Miscellaneous :—Cotton (American), 13.60d. lb. ; Egyptian (Sakel), 18.85d. lb. ; jute (first grade c.i.f.), £38 7s. 6d. ton ; jute, (lightnings), £34 5s. 0d. ton ; Oilseeds : Linseed (La Plata), £19 7s. 6d. ton ; palm kernels, £17 15s. 0d. ton ; castor seed (Bombay), £19 2s. 6d. ton ; sesame seed (China), £26 5s. ton ; soya beans, £13 2s. 6d. ton ; Oils : Linseed, £42 15s. ton ; olive (Spanish) £77 ton ; rape (crude), £44 10s. ton ; soya, £41 15s. ton ; petroleum, 1s. 4½d. gallon ; petrol, 2s. 1d. gallon ; fuel oil (ex-tank) 72s. 6d. ton ; coconut (Ceylon), £38 5s. ton ; cotton (crude), £42 5s. ton ; ground nut, £44 10s. ton ; Rubber : Plantation (No. 1 Crepe), 7¾d. lb. ; smoked sheet, 7¾d. lb. ; fine hard Para, 10½d. lb.

The Cunard Steamship Co., Ltd., announce that the transfer register in respect of 7½ mortgage debenture stock will be closed until July 31, for the purpose of preparing the half-yearly interest warrants.

SHIPPING INTELLIGENCE.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis :—

Anchor Line.—S.s. Castalia for Bombay (Liverpool, August 11).

Anchor Brocklebank Line.—S.s. Matheran for Calcutta (Birkenhead, July 29) ; s.s. Anchoria for Port Said, Colombo, Madras and Calcutta (London, August 5) ; s.s. Stockwell for Calcutta (Birkenhead, August 9) ; s.s. Malakand for Calcutta (Birkenhead, August 21) ; s.s Mahanada for Port Said, Colombo, Madras and Calcutta (London, August 26).

Bibby Line.—S.s. Gloucestershire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, August 2) ; s.s. Rialto for Rangoon (Middlesbrough, August 12) ; s.s. Oxfordshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 16).

British India Line.—S.s. Merkara for Bombay and Karachi (London, July 28) ; s.s. Ethiopia for Colombo, Madras and Calcutta (London, July 28) ; s.s. Manela for Colombo, Madras and Calcutta (London, August 18) ; s.s. Trelevan for Bombay and Karachi (London, August 19) ; s.s. Howra for Colombo, Madras and Calcutta (London, September 2).

Clan Line.—S.s. Clan Murdoch for Bombay and Persian Gulf (Birkenhead, July 25) ; s.s. Clan MacKellar for Colombo, Madras and Calcutta (Birkenhead, July 27).

Cunard Line.—S.s. Anthea for Gibraltar, Malta, Piraeus, Smyrna and Constantinople (London, July 22) ; s.s. Sea Victory for Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Liverpool, August 3) ; s.s. Tyria for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk, Poti and Batoum (Glasgow, August 17).

Ellerman Line.—S.s. Fabian for Gibraltar, Malta and Alexandria (Liverpool, July 20) ; s.s. Andalusian for Genoa, Leghorn, Naples, etc. (Liverpool, July 20) ; s.s. Cressado for Gibraltar, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, July 29).

Ellerman's "City" Line.—S.s. City of Calcutta for Bombay and Karachi (Birkenhead, July 20) ; s.s. Kabinga for Calcutta (Birkenhead, August 4) ; s.s. City of Christiania for Calcutta (Birkenhead, August 19).

Ellerman's "Hall" Line.—S.s. City of Hankow for Bombay, Karachi, the Punjab and Malabar Coast ports (Liverpool, August 22).

Ellerman's Westcott and Laurance Line.—Regular sailings fortnightly for Malta, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

Moss Line.—S.s. Amasis for Gibraltar, Algiers, Malta and Alexandria (through transhipment to Cyprus and Syrian Coast ports) (Liverpool, July 28) ; s.s. Hatasu for Gibraltar, Malta, Syra, Piraeus, Smyrna, Salonika, Constantinople, Bourgas, Varna and Constantza (Liverpool, August 5).

Papayanni Line.—S.s. Maronian for Algiers, Malta, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, August 12).

Glen Line.—S.s. Glenamoy for Port Said, Port Swettenham, Singapore, etc. (London, July 27) ; s.s. Glenogle for Port Said, Port Swettenham, Singapore, etc. (London, August 10).

ANCHOR LINE

First-Class Passengers only.

LIVERPOOL TO BOMBAY.

KARACHI via Bombay calling at Gibraltar & Egypt.

LARGE STEAMSHIPS. UPPER DECK CABINS.
FITTED WITH ELECTRIC FANS.
RECOGNISED BY INDIAN GOVERNMENT.

PASSENGER SAILING DATES—

CASTALIA, AUG. 11.
SCINDIA, AUG. 22
MASSALIA, SEPT. 8.
ELYSIA, SEPT. 20.
CIRCASSIA, OCT. 20.
OLYMPIA, NOV. 7.
CASTALIA, NOV. 21

Anchor Line (Henderson Brothers), Ltd
16, Gracechurch Street, London, E.C.3.

Harrison Line.—S.s. Collegian for Calcutta (Liverpool, July 29) ; s.s. Author for Calcutta (Liverpool, August 17).

Henderson Line.—S.s. Burma for Port Said and Rangoon (Birkenhead, July 26).

Holt Line.—S.s. Antilochus for Port Said, Port Swettenham, Singapore, etc. (Swansea, July 20) ; s.s. Orestes for Port Said, Port Swettenham, Singapore, etc. (Swansea, August 3) ; s.s. Agamemnon for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 12) ; s.s. Helenus for Port Said, Port Swettenham Singapore, etc. (Glasgow, August 12).

Johnston Line.—s.s. Venice for Galatz and Braila (Liverpool, August 1) ; s.s. Dromore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, August 19).

P. and O. Line.—S.s. Plassy for Bombay (London, July 28) ; s.s. Lahore for Colombo, Madras and Calcutta (London, August 5) ; s.s. Malwa for Bombay (London, August 11).

Prince Line.—S.s. Stuart Prince for Tunis, Malta, and Alexandria (Manchester, July 24) ; s.s. Cyprian Prince for Tunis, Malta, and Alexandria (Manchester, August 5).

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.
(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade. 35 Old Queen Street, S.W.)

Egypt.

Cement.—The General Manager, Egyptian State Railways, Telegraphs and Telephones, Cairo Station, invites tenders for the supply of 800 metric tons cement. Copy of the conditions (price 200 millièmes) may be obtained at the Office of the Administration's Inspecting Engineer in London. July 25.

Lift-Bridge.—The Inspector of Irrigation, First Circle, Savoy House, Cairo, invites tenders for the construction of lift-bridge on screw piles, Bahr el Baqar Drain, Kilom. 26.1. Approximate cost : L.E. 1,050. July 25.

Stationery.—The Administration of the Egyptian State Railways, Telegraphs and Telephones, Cairo, invites tenders for the supply of stationery, including writing ink ; duplication and stamping ink ; stamp-pads ; carbon paper ; pencils ; pen-nibs penholders and pencil holders ; erasers ; envelopes ; filing materials ; duplicating machines, etc., materials ; inkwells and miscellaneous office requisites. Tenderers must be represented in Egypt. July 27.

Pumps.—Tenders are invited by the Director-General, State Domains Administration (Commercial Service), for the supply of two centrifugal pumps of 14in. and 16in. July 25.

Lathe and Paper Slitting and Cutting Machines.—The Government Press, Cairo, invites tenders for the supply of one self-acting sliding, surfacing and screw-cutting lathe, minimum length between centres 2 metres (6 feet 7 inches), centre height 20 centimetres (7.7-8 inches), with all accessories and for one paper slitting and cutting machine to cut transversely from reels 86 centimetres to 126 centimetres wide, in sheets of any required length from 34 centimetres to 90 centimetres. The latter machine must be provided with an automatic sheet counter and automatic jogger and the necessary motor and starter for a continuous current of 110 volts must be provided August 1. (D.O.T.)

Benzine.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of 7,600 gallons of benzine. Tenderers should specify the brand and quote two prices : one for the supply of benzine in bulk in returnable tins or cans and another for benzine in non-returnable 4-gallon tins, and should also send one litre sample not later than July 15, 1922, for testing by the Laboratory. Conditions of tender and specifications are obtainable from Stores Department, Arsenal, Alexandria. August 9.

Sleepers.—The General Manager, Egyptian State Railways, Telegraphs and Telephones, Cairo Station, invites tenders for the supply of wooden sleepers. September 7.

Telegraph Poles.—The Superintendent of Stores, Egyptian State Railways, Telegraphs and Telephones, Cairo, invites tenders for the supply of telegraph poles. August 10.

Money Safes.—The Central Stores, Ministry of Finance, Cairo, invites tenders for the supply of iron money safes. August 19.

Wheat.—The Inspector-General, Prisons Department, No. 43, Sharia El Bustan, Cairo, invites tenders for the supply of 18,175 ardebs commercial "baladi" wheat. July 25.

Towing Tugs.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of two towing tugs. August 15.

India.

Tins, Thread and Sail Canvas.—The High Commissioner for India tenders for the supply of :—baking tins, 2 lb., mark II., for baking loaves, No. 20,000 ; flax thread, undyed, coarse, 18,000 lbs. ; sail canvas, 58,270 yards. August 4.

Wheels and Axles.—The South Indian Railway Company, Limited, invites tenders for the supply of wheels and axles for rolling stock. July 28.

Bogie Rail and Timber Trucks, etc.—The Assam-Bengal Railway Company, Limited, invites tenders for the supply of 25 bogie rail and timber trucks ; 100 pairs of wheels and axles. July 28.

JAFFA ORANGE EXPORTS.

The following extract is taken from a recent report received by the Imperial Ottoman Bank :—

Jaffa, June 24.

The estimated number of cases of oranges for export during the coming season is 1,300,000. The freight to the United Kingdom has been raised by 6d. to 3s.

MANCHESTER COTTON REVIEW.

Little Business Passing.

The cotton trade review of the Imperial Ottoman Bank for the week ended July 5 states :—

Saturday, July 15.

General.—The slow state of the market noted in our last report has continued during the past week, which, generally speaking, has been the quietest for some time back. The tone remains fairly firm, although there are still weak spots amongst sellers. A good deal of negotiation is going on between producers on this side, who naturally desire to maintain their somewhat improved position, and buyers abroad, who are showing little disposition to operate at the higher prices now ruling. It is probable that, if raw cotton prices keep steady, buyers will begin to operate cautiously and gradually accustom themselves to the higher level of values now ruling as compared with a short time ago.

The violent fluctuations which have taken place recently in exchange rates between this country and France and Germany have been an unfavourable factor, but, on the other hand, the reduction in the Bank Rate was welcome and the Board of Trade returns for the month of June show once more how very much better the trade is than it was 12 months ago.

Yarn.—If anything prices in this section are a shade lower than they were a week ago. Sales of lines of importance have been very few. Shipments of lines of importance have been very few. Shipments of yarn amounted last month to 15,744,000 lbs. against 20,767,000 lbs. in May and 8,737,000 lbs. in June 1921. India and the Continent account mainly for the large increase as compared with a year ago.

Cloth.—Both actual business and enquiry have been on a very moderate scale. Offers from abroad are impracticable, and the Home Trade is only buying from hand to mouth. Shipments last month were 311,907,000 sq. yds. as against 341,424,000 sq. yds. in May, and 152,639,000 sq. yds. in June last year. As in the case of yarn the large increase as compared with last year is chiefly due to India and the Continent.

Cotton.—Variations in the price of raw cotton have been on a smaller scale, and on balance there is little change. Advices of one kind and another regarding the new American crop are numerous, and the day to day weather reports are followed with considerable interest. It is probable that, as usual, there will be many fluctuations in price before the amount and quality of the crop are finally settled. Closing prices are as follows : — American fully middling, 13.80, last week 13.65 · Egyptian fully good fair, 19-75, last week 20.00.

Company Meetings

BURMAH OIL COMPANY.

30 Per Cent. Dividend.

Favourable Prospects.

The Annual General Meeting of the Burmah Oil Company, Limited, was held on July 13, at Glasgow.

Sir John T. Cargill, Bt. (chairman of the company), presided.

The Secretary (Mr. F. G. Holdsworth, F.C.I.S.) read the notice convening the meeting and the auditors' report.

The Chairman said :—Ladies and gentlemen, when I had the pleasure of addressing you a year ago, in referring to the future prospects of the company, I adopted what I called a tone of reasoned and reasonable optimism, and even ventured to express my belief that the results of 1921 trading would be of a thoroughly satisfactory nature—a belief which I am bold enough to think the report and accounts I am now submitting to you prove to have been well founded. I was also careful to point out to you in connexion with the large benefit that looked likely to accrue to the company through the termination of the excess profits duty that against that apparent saving had to be put the severe drop in the Indian exchange, the heavy fall in the prices of petrol, paraffin wax, and candles, and higher working costs due principally to increased wages granted to our Indian labour, and I said that it was quite impossible for me to then forecast how far the one would go against the other. Unfortunately there was a further drop in exchange and in the price of paraffin wax and candles, and the final result is that while for 1920 we paid £1,660,537 in excess profits duty, our trading results for 1921 are down £1,612,055 11s. 9d. as compared with the previous year, so that the actual saving is a comparatively small one.

Satisfactory Results.

Leaving, then, excess profits duty out of account, the position, as any of you who have cared to compare the 1920 accounts with those now before you will have seen, is that your directors had a very similar amount of gross profit to deal with and that, as shown by the accounts, after charging income-tax, contribution to Employees' Provident Fund, directors' fees, etc., and writing off £1,247,687 11s. 3d. for depreciation and fields expenditure, and £50,045 18s. 5d.—say one-third of the cost of the issue of the £3,000,000 8 per cent. preference shares—and paying the full year's dividends on the two classes of 6 per cent. preference shares and the half-year's dividend due on the 8 per cent. preference shares and the interim dividend of 2s. per share, free of tax, on the ordinary shares, and placing £200,000 to general reserve and £20,000 to insurance reserve, there remains a balance of £1,389,776 2s. 7d., out of which the directors recommend the payment of a final dividend on the ordinary shares of 4s. per share, free of tax, payable July 21, absorbing £1,030,192 8s., leaving a balance of £359,583 14s. 7d. to be carried forward, subject to corporation profits tax estimated at £130,000. The full year's dividend of 30 per cent., free of tax, on the ordinary shares is, as you are all no doubt aware, the same as for the previous year, and that in the face of the severe fall in exchange, the very heavy fall in prices of all petroleum products, and largely increased working costs, we have been able to maintain the dividend and, at the same time, to write off fields expenditure and provide for all depreciations on the usual ample scale, and place fully as much to reserve as in 1920, is, I think, a result of which we may well be proud and which, I am sure, will give our shareholders the greatest satisfaction.

Turning to the accounts, there are one or two items on which I would like to make a few special comments. Income-tax, you will see, appears in the profit and loss account for £470,733 3s. 10d., but this is less Colonial income-tax relief, and, in addition to that amount, we paid £301,461 8s. 9d. for Indian income and super tax, taking the rupee at 1s. 4d. Corporation profits tax, I have already mentioned, we estimate will cost us round about £130,000 for last year. In addition to these taxes, we pay the Government of India a royalty on every barrel of crude oil we raise, and for 1921 that amounted to fully £150,000, taking the rupee at 1s. 4d., while the excise tax of six annas a gallon we paid on all the petrol we sold in India and Burma in 1921 amounted to practically £300,000, also taking the rupee at 1s. 4d. So you will see what an important source of revenue we are both to the Imperial and the Indian Governments. And in the last Indian budget an excise duty of one anna a gallon was imposed on all indigenous kerosene—an additional anna a gallon also being imposed on all imported foreign kerosene—and on a full year our contribution under this head should be over £400,000.

Effect of High Taxation.

Although the excess profits duty is gone and a shilling has been taken off income-tax in the Budget just passed, a 5s. income-tax, *plus* the corporation profits tax—and in our case additional heavy taxes in India—still leaves business enterprise too heavily handicapped if that development of trade of which the Empire and the whole world stand so seriously in need is to be secured within a reasonable time. Government cannot, of course, be carried on without taxation, but only commerce and industry can provide the bulk of this, and if the bare minimum of taxation required is to be forthcoming this can be done only by Governments cutting their coats according to their cloth, whereas to-day it is commerce and industry which are to a very great extent compelled to cut their coats of expansion and development according to the cloth Government leaves them with, and the inevitable result is that expansion is restricted, if not stopped, and more and more difficulty is being experienced by Governments in their attempts to balance their budgets. All this is so elementary that ordinarily it does not require to be said, but, in spite of economies recently effected, our Government is still costing far more than our commerce and industry can bear, and it is the duty of every citizen, and particularly the duty of those like myself who can see the day-to-day stagnating effect of high taxation on development, to let no occasion pass without emphasizing the simple economies of the position.

In 1920 we wrote £972,924 12s. off fields account, and for 1921 you will see from the accounts that we have written off £1,077,392 5s. 2d. I have made such a special point in my recent annual speeches of the effects on fields expenditure of a war-time accumulation of necessary works, of the higher costs of labour and materials, and of the increased cost of the much deeper drilling we have now to do to maintain and to reach new production in our oilfields, that I can add nothing useful here beyond these figures themselves, and my assurance that no stone has been, or is being, left unturned by your managers to keep drilling and producing costs clear of all extravangances and to confine expenditure merely to what is absolutely essential to maintain, and, as far as possible, increase the volume and efficiency of your business. And while our costs of labour per man and of materials are unlikely to come back to pre-war levels, costs of materials are on average certainly now on a lower level, and in due course these reductions should be reflected in our accounts—dependent, of course, on the extent of the new drilling necessary to enable us to produce our requirements of oil from time to time.

You will observe that £118,406 1s. 5d. is added to the amount at which fields account stood in last year's balance sheet. This represents purely capital expenditure on new buildings, etc., and as we have again written off the whole of the expenditure incurred by us in the fields in drilling, cleaning out and deepening wells, etc., we do not consider that any further special depreciation of this account is necessary.

As I have already said, the depreciations provided for refineries, pipe-lines, tankers, and installations are on the usual ample scale, especially looking to the values at which these assets now stand in the balance-sheet.

Insurance reserve is increased by the usual £20,000, bringing this account up to £380,000, and the fire and marine insurance account has been increased by no less than £69,773 16s.—being the amount of the premia on the risks carried by the company itself—to £436,762 9s. 8d.

The reduction of £37,362 8s. 10d. on interest account is principally due to realizations of Government stocks to meet business and taxation requirements.

The provident and pension fund receives £108,781 3s. 5d., as compared with £141,847 18s. 9d. shown in the profit and loss account for the previous year. As the dividend for 1914 is the same as for 1920, the bonus paid to all our employees who are members of this fund is at the same rate for both years, and the materially reduced sterling amount shown in our this year's accounts is due to the severe drop in exchange, the great majority of our employees being paid in rupees on the other side, and their bonuses being, of course, credited in rupees there.

Operations in Burma.

I have in recent years—and more particularly last year, in view of my visit to our properties in India and Burma—dealt so very fully with the extent and value of our assets and the nature and scope of our activities generally, that it is unnecessary that I should to-day make more than a general reference to them.

Our drilling and producing operations in Burma have secured the full requirements of our refineries, and in several directions in our older fields the drill has proved considerable extensions of our reserves. But every day in these older fields the necessity for deeper and consequently more expensive drilling is forced upon us, and while generally in our Burma properties we are not faced with the great and costly depths to which drilling in the competitive area of the Twingone and Beme Reserves has to be resorted, we are enormously the preponderating producer in these reserves and must and intend seeing that we continue to get our full share of the oil there.

From our outside fields in Burma I regret that there is still no reward for the heavy sums of money and great expenditure of time and care made on them. But we test only after the most careful geological examination and recommendation, and we cannot possibly risk the consequences of neglecting to put our geologists' reasonable and reasoned views to the test of the drill. If we stand aside, and whether or not, ladies and gentlemen, the lure of oil is so great nowadays that others are ready to at once take our place, and it is merely common prudence in such a business as ours, and a form of insurance of the capital we have put into it, that we should continue so far as our resources reasonably permit and circumstances require, to take up and test every area considered by our geological advisers as offering favourable conditions for the collection and concentration of oil on a commercial basis. If we sat down to develop merely what we have, and have proved, it might be that for a time we could distribute larger dividends to you, but such a policy would exhaust your assets without any effort at their replacement, and beyond this might even endanger those assets through the discovery by others in India of still unknown productive areas, thereby undermining the predominant position occupied by your company as a marketer as well as a producer

in India. Even as it is, we cannot hope to avoid misses or to miss hits. These, however, are excusable deficiencies in every human organization; there would be no sort of excuse for those responsible for the management of your business if their policy ever became a passive one confined to working proved ground instead of—as it has always been—a policy which, while fully developing what it has, takes every reasonable step and risk to add to your oil reserves—the very life blood of your business. We can only hope that our pioneer and continuous efforts, and our great expenditure in pursuance of this policy, will yet bring the success they at least deserve although they cannot command.

Operations in Lower Assam.

Our operations in Lower Assam have not materially added to the potentialities in oil of the small field we have at Badarpur, and the oil continues to be of little more than fuel-oil value. While we have never anticipated anything big here, we are still hopeful of a moderate field capable at least of paying its way. Water is a great trouble and expense in its development and operation, however, and until we can get down to and test the possibilities of deeper horizons, we cannot speak with any marked confidence either as to life or value.

Elsewhere in Lower Assam, and also in the Punjaub, we have continued and added to the test wells being drilled by us. At one point we have reached without result the depth beyond which geological advice held out no hope, and the test and this particular area have been abandoned. The other test wells are still drilling—with varying difficulties constantly being met and overcome—and further tests are on the point of being started up. I need scarcely tell you, ladies and gentlemen, that operations of these kinds are being carried on in remote, difficult, uncongenial, and even unhealthy places, where there are neither reasonable comforts nor even in some cases the most modest amenities of life. Communication is difficult and slow and expensive, and drilling is frequently unavoidably interrupted. Even the best informed of us on occasions sometimes forget these factors in our impatience for results, but we must never forget the great loyalty, endurance, and perseverance of our staff working day in and day out in such uncomfortable and discouraging conditions. Britons, Americans, Burmese, and Indians all deserve our appreciation and thanks.

Our investment in the Assam Oil Company, Limited, has brought us the commercial and technical management of that company, and the old staff, fortified by our wider experience in every branch of their business, and assisted by our fields and refining technicians, are already improving the general position of the company's properties and business in Assam. As chairman of the company I hope to preside at the annual meeting, which will be held early next month, and I shall not to-day anticipate in any way what I shall then say as to the present position and future possibilities of the company.

Electrification Scheme.

Our Burma Oil Fields Electrification Scheme commenced to turn turbines on June 29. Power should thus be available within another month, and application to the drilling and pumping wells of ourselves and the co-operating companies will thereafter be rapidly made and in due course become general. When the scheme is completed and in full operation we should be able to entirely cut out the consumption of crude oil as fuel in the Yenangyoung field and thereby effect a very important saving in that direction alone, and at the same time find a remunerative outlet for our natural gas production—after compression—as fuel for the power station. In this act of compressing the natural gas we shall produce natural gas gasoline, which will be mixed with our crude oil and conveyed by the pipe-line to Rangoon, where in due course in the process of distillation it will be recovered in the form of petrol.

During the year our main pipe-line—of increased capacity consequent on the additional two pumping stations to which I referred last year—performed steady and satisfactory service. £95,095 6s. 1d., the cost of relaying during the year a considerable portion of the line in the districts where the alkaline nature of the soil makes corrosion specially severe, has been, you will see, charged to depreciation account. In this connexion I may mention that the whole main pipe-line is now in course of being coated with a special bitumastic solution which will protect it much more adequately against corrosion, and thereby greatly lengthen the life of the line.

The Refineries.

Operations at our refineries continued throughout the year uninterruptedly and with satisfactory results in yields and qualities of products on lower fuel consumption, and the Allan Atmospherics—a fractionating system developed by our works manager, after whom it is called—have given excellent results in increasing the yield of the lighter and more valuable products of our crude, at the expense of the volume of the less remunerative.

At the refineries, as in the fields, our officials and staff generally have done excellent service, carrying on their day-to-day duties simultaneously with the preparation and development of new capital works. In this connexion the works manager and his staff are now progressing with our scheme of refinery concentration and reconstruction. As during the whole of these operations it is our intention to steadily maintain our present throughput, although reconstructing the refinery on the site of the present works at Syriam, and utilising a very large quantity of the present plant, it will be evident to you that these operations will be spread over a considerable period. One undoubted advantage of this, however, will be that as each new unit comes into operation valuable information is certain to be gained from the actual working of the new plant which will undoubtedly prove of great advantage in the designing and erection of the further units.

Our tanker fleet has run steadily and without serious accident throughout the year. Unfortunately, almost on the point of completion, delivery of our new 10,000-ton tanker, the s.s. Badarpur—which was launched in the autumn—was delayed fully three months by the trouble in the engineering trade, and she is only running her trial trip to-morrow, after which she will go at once into commission. She will undoubtedly be a most valuable addition to our fleet.

Bombay Area.

I have in previous years touched on our efforts and the difficulties met by us in attempting to provide facilities for the importation of petrol in bulk into the Bombay area, and it is a relief to us that these have now been overcome and that the first bulk petrol cargo was discharged safely and satisfactorily at Bombay in May last. As a result of this we have been able to make a considerable reduction on the price of our petrol in the Bombay sphere.

The Tinplate Company of India, Limited, in which we are very largely interested, has made good progress with its works, and the manufacture of tinplates in India is expected to commence on a preliminary scale towards the latter part of the year. It is hoped that this new enterprise, created by the Tatas and ourselves, will prove in time to be a valuable factor in the industrial development of India, which no company more than ourselves should do everything reasonably possible to foster and encourage.

During the year, despite greatly increased political unrest throughout India—happily now much less active—accompanied by labour troubles in many parts and industries of the country, the relations between us and our Indian and Burmese labour were on the whole quite satisfactory, and we continue to do everything possible and reasonable for the comfort, health, and happiness of our large body of employees. As I have already indicated we have again been well served in every branch of our business by a capable, loyal, and enthusiastic body of administrators and technicians, and I would ask you to be permitted to convey to all of them your and my appreciation of work so well done.

New Taxation.

The necessity for further revenue has caused the Indian Government to resort to increased taxation in their current Revenue Act—mainly in the direction of greatly increased import duties on manufactured and semi-manufactured articles, many of which are essential to the conduct of our business. These must add at least relatively to our producing costs, and I would be failing in my duty did I not make it quite clear to all concerned that there must be a point at which these increased burdens on the one side may make it economically and commercially difficult—if not impossible—on the other, to maintain our maximum price policy for Kerosene in India, which still remains in force. Another feature of new taxation has—as I have already mentioned—been the imposition of an Excise Duty on indigenous Kerosene. It is true that this has been accompanied by an equivalent increase in the import duty on foreign Kerosene, and to-day both duties have been passed on to the consumer. One must not forget, however, that circumstances may at any time arise with regard to supplies of and markets for foreign Kerosenes which may lead to the Indian market once again, as has happened in the past, being used as a dumping ground for surplus foreign production irrespective of import duties, and I can say with confidence that however we ourselves might be able to stand up against such competition while saddled with this Excise Duty on Kerosene, there are other small indigenous producers in India to whom it would sound the death knell, and Government and the indigenous industry generally will require to watch this position closely.

Interests in Trinidad.

Our interests in Trinidad, through the United British Oilfields of Trinidad, Limited, have unfortunately not even yet developed into a condition in which production on a satisfactory scale and of reasonable stability has been forthcoming, but geological opinion continues not unfavourable to eventual success in both these directions, and certainly, if expert and thoroughly qualified technical control can secure these results, we have every right yet to expect them.

Our friends, the Anglo-Persian Oil Company, Limited, continue their wonderful expansion, both in production and in refining and marketing, but I say no more than this, since this is a field which my friend, their worthy chairman, Sir Charles Greenway, has made peculiarly his own, and which he deals with exhaustively every year at the company's annual meeting. In this connexion it has been our custom for a number of years to post to every one of our shareholders a copy of Sir Charles speech, but in view of the wide publicity now given to that speech in the Press, and the very heavy expense involved in posting a copy of it to our over 25,000 shareholders, we have decided to discontinue the practice—a decision in which you will, I am sure, under the circumstances, quite concur.

Towards the end of last year, Mr. John Gillespie, head of our engineering and stores department on this side, took a trip to India and Burma, in the course of which he visited all our principal installations in India, including Chittagong; the tinplate works in course of erection at Jamshedpur; the Assam Oil Company's properties; the Badarpur Field; and spent three weeks at our fields in Burma and a month at our refineries at Syriam, and there is no doubt the company should derive most beneficial results in many directions from Mr. Gillespie's extended tour.

Future Prospects.

As regards prospects for the current year, I am glad to be able to tell you that in the meantime these are, taken all over,

Digitized by Google

favourable. While there has been a further weakening in prices of wax and candles—the market conditions for which are still somewhat obscure—and a drop in the price of lubricating oils and jute batching oil in India, we have, as from April last, contracted to sell on a greatly improved basis our production of petrol in excess of what our own organisation can dispose of. We have also somewhat augmented our throughput of crude oil, and the benefits we will receive in these two directions will be a considerable set-off against any lower prices ruling for the products mentioned. Exchange is, of course, still a very uncertain factor, but unless there is a severe drop in it or some unfavourable developments at present unforeseen arise in some other directions, the results for the current year should, I anticipate, be very similar to those to which I have just had the pleasure of referring.

The Chairman, concluding, said :—I now beg to propose that the report of the directors and audited statement of accounts, including the balance-sheet and profit and loss account to December 31, 1921, presented to the meeting, be received, approved, and adopted, and I shall call upon Sir Campbell K. Finlay to second the motion. After the motion has been seconded an opportunity will be given to the shareholders to ask any questions they may care to.

Sir Campbell K. Finlay.—I beg to second the motion.

The Chairman.—Are there any questions, ladies and gentlemen ?

The Chairman :—There being no questions, I now beg formally to put to the meeting the resolution which I have just proposed.

The resolution was carried unanimously.

The Chairman :—I have now pleasure in moving " That the dividend on the Ordinary shares recommended by the directors of 4 per cent. per share, free of tax, making, with the interim dividend paid in November last, 30 per cent. for the year, be adopted and that the same be hereby authorized to be paid on July 21, and that the balance of £359,583 14s. 7d., subject to corporation profits tax, estimated at £130,000, be carried forward," and I would ask Mr. Jas. A. Macarthur to second the motion.

Mr. Jas. A. Macarthur :—I beg to second the motion.

The Chairman :—Well, I am sure, ladies and gentlemen, you are all unanimous in this.

The Chairman :—The next business is the re-election of directors, and I have very great pleasure in moving that Sir Campbell K. Finlay be re-elected a director of the company.

Mr. Thos. S. Findlay :—I beg to second the re-election of Sir Campbell Finlay.

The Chairman :—I now beg to move that Mr. D. W. T. Cargill be re-elected a director of the company.

Mr. Thos. Gibson :—I beg to second the re-election of Mr. Cargill.

The Chairman :—I beg to move that Mr. Leonard Gow be re-elected a director of the company.

Mr. Robt. Clark :—I have much pleasure in seconding the re-election of Mr. L. Gow.

The motions were adopted unanimously.

Colonel R. D. McEwan :—I beg to propose the reappointment of Mr. Jas. Herbert Wilson, C.A., as auditor for the current year at a remuneration of 500 guineas.

Mr. W. J. Hill :—I beg to second the appointment of Mr. J. H. Wilson, C.A., as auditor.

The motion was adopted unanimously.

The Chairman :—That, ladies and gentlemen, is all the business, and I thank you for your attendance here to-day.

Vote of Thanks to Chairman.

Mr. T. F. Donald :—Ladies and Gentlemen, I think that before we leave this hall it is only right and proper that we should award a vote of thanks to our chairman. The Burmah Oil Company is one of the most successful undertakings that has ever been formed, or carried on business in Glasgow, and I think I am not guilty of any exaggeration when I say that a very great measure of that success is due to the fact that we have had, I am happy to say, that we still have, as chairman, Sir John Cargill. We have to-day had the privilege of listening to one of those lucid and informing statements upon the position and prospects of the company which he is good enough to deliver every year, and I think we must agree that what he has said, though not, perhaps, without a word of warning here and there, is, on the whole, eminently satisfactory. Sir John, like every eminent man, is no doubt exposed at times to criticism, but I am not aware that he has ever been accused of being unduly optimistic, and I think, coupling that fact with what he has said, we may look forward with confidence to continued prosperity. Of course, in such undertakings there must be fluctuations, and I will not undertake to forecast the future ; but one thing is certain. So long as the conduct of affairs is in the hands of our present chairman and board, we may be sure that the affairs of the company will be administered with the same sound finance, judicious foresight, and such business abilities that have always characterized the management of the Burmah Oil Company. I will ask you again to give a special vote of thanks to Sir John for his conduct in the chair, and also a very hearty vote of thanks to himself and his colleagues for the admirable way in which they continue to manage the affairs of the company.

Tribute to Staff.

The Chairman:—Mr. Donald, Ladies and Gentlemen, I feel that it will be rather difficult for me suitably to acknowledge what Mr. Donald has so very kindly said, and also the very hearty way in which you have seconded, without seeming to exaggerate ; and exaggeration, I think, always tends to make one feel that one is not just quite sincere. I do assure you, though, that I appreciate most highly the very kind and very flattering remarks that Mr. Donald has been good enough to make. There are few chairmen of any company that have had the good fortune that I have had during the last eighteen years to preside every year over meetings where I was able to tell my shareholders of the continued wonderful prosperity and progress of the company. There is one thing I am absolutely confident of, and that is that there is no other chairman of any company who has received such whole-hearted, such consistent, and such loyal support from every one in the company, from the highest to the lowest, and to that I attribute far more than anything I may have done myself the great and continued success of the Burmah Oil Company. The Burmah Oil Company is founded on sand, and carried on sand—I mean oil-sand—but at the same time, below that sand there is the foundation of rock, on which my predecessors in the early days built up the company in the shrewd, the careful, and the honest manner in which they did. My endeavour has been to carry out the precepts that I was taught by my predecessors, and in the edifice which you see to-day—which I say is founded on rock, but lives upon sand—I feel that you have an edifice which will stand against any reasonable competition, or anything that I can foresee, short of a collapse in the whole industry. I thank you most heartily for the very kind way you have received me to-day, and for the very hearty vote of thanks you have given me.

The proceedings then terminated.

BANK OF BRITISH WEST AFRICA, LIMITED.

Effect of World-wide Depression.

Steady Improvement.

The Twenty-eighth Annual General Meeting of the Bank of British West Africa, Limited, was held on July 13 at Cannon Street Hotel, E.C. The Rt. Hon. the Earl of Selborne, K.G., G.C.M.G., chairman of the company, presided.

The Chairman, in the course of his speech, said : The world has been passing through what is probably the most severe commercial and industrial crisis which has ever oppressed it. That the British Empire has escaped with no greater financial crisis than it has experienced is at least very largely due to the soundness of our banking system. The banks have tried to keep things going and they have succeeded. This bank has played its part in this effort, but it has not done so, it could not have done so, without losses. I do not say that no mistakes have been made. I have yet to learn that any bank has made no mistakes, but I am prepared to assert that the greater number of our bad and doubtful debts is due to the results of the sudden and violent fall in prices in 1920 and the consequent world-wide depression in trade, and, of course, when trade is so acutely depressed, no bank can make the same profits as in normal times.

Inner and Outer Reserves.

It has always been the practice of the directors of this bank each year to make scrupulous provision for all bad and doubtful debts, and this year we have done the same. In cases of doubt we have decided always for the greater and not for the least provision, but the circumstances of the past year have been abnormal, and for that reason the directors recommend to you the policy of making provision in respect of the bad and doubtful debts in an unusual manner. All the world knows that a bank has inner reserves as well as outer reserves ; we desire to conserve the inner strength of your bank, and for this year to take £225,000 out of the published or outer reserve, which, after this has been done, will stand at £400,000. In addition, we propose to transfer £50,000 from profits to a contingency fund, and we are satisfied, after careful examination, that all realized and anticipated bad debts have been amply provided for. I hope that this policy will commend itself to you, and that you will also approve of the declaration, under the conditions of the time, of the reduced dividend for the year of 6 per cent.

I cannot tell you that the depression of trade has passed away. I have the advantage of addressing gentlemen many of whom know intimately the condition of things in the sphere of the bank's operations and in the world of business in general. You know that the utmost which can be said is that things are moving very slowly, but that such movement as there is is in the right direction. When trade is to revive in West Africa, or in Morocco, or in Egypt, depends on a great variety of considerations ; in no case does it depend only on local considerations. It depends very largely upon the exercise of rigid economy by His Majesty's Government in Great Britain and in the Colonies, and on the sanity and reasonableness of employer and employed. It depends also upon the restoration to Europe of some measure of financial and political stability and on the preservation of a complete understanding between the British Empire and France and the United States of America.

Our paid-up capital remains at £1,200,000 out of three millions subscribed. Our liabilities to the public on current, deposit, and other accounts are £7,602,000, which shows a reduction of £416,000. Bills for collection at £1,814,000 are lower than a year ago by £400,000, which indicates the falling off in our customers' trade. Our liability for acceptance is less by £50,000. On the assets side our cash holding, at £2,602,000, represents over one-third of our liabilities on current and deposit accounts.

Lord Selborne's Tour.

Since I last had the honour to address you I have visited every branch of this bank in Nigeria, and every branch but one on

Digitized by Google

the Gold Coast. I was absent from home for four months and I did not confine myself to visits to those places only where we have branches. I was anxious to make the personal acquaintance of the members of the staff of this bank, to know the conditions under which they work year in and year out, and to satisfy myself that the bank premises are worthy and suitable for the business to be done and that the quarters where the staff live are healthy and reasonably comfortable, as you would wish them to be. I was also anxious to see something for myself of that great country which is called Nigeria, and of the ancient colony of the Gold Coast. In Nigeria and along its coast I travelled over 4,000 miles, and on the Gold Coast I got as far north as Coomassie. I visited many places where as yet there is no branch of the bank, but where branches will spring up in course of time. I am proud to report to you that you are served by an efficient and loyal staff, and that the large amount of money spent in recent years on bank buildings and quarters for the staff has been well spent. There are still some new buildings to be erected and some improvements to be made in existing buildings, but nothing more than can be properly undertaken from year to year when the conditions of business begin to improve.

I should not like to close my remarks without mentioning the definite impression left in my mind of the great future prospects of business on the West Coast of Africa owing to the natural resources of the country and in certain places to the comparative density and trading characteristics of the population. At the present moment both Government and individuals are passing through a period of stress calling for rigid economy in all respects. I am convinced that no greater service can be done to trade than at the earliest possible moment some reduction of the duties which at present are hampering alike exports and imports.

The motion for the adoption of the report and accounts was seconded by Mr. R. Hugh Tennant (deputy-chairman), and carried unanimously. The dividend of 6 per cent. was approved.

COMPANY NOTES AND REPORTS.

Imperial Bank of India.

Cabled advice received on July 12 from the central office states that the net profits of the Imperial Bank of India for the half-year ended June 30 were Rs.63,52,300, making with Rs.12,74,500 brought in Rs.76,26,800. The governors have declared a dividend of 16 per cent. per annum, free of tax, absorbing Rs.44,98,300, transferred to reserve Rs.10,000,00, transferred to pension fund Rs.5,00,000, and carried forward Rs.16,28,500.

Abyssinian Corporation.

The directors of the Abyssinian Corporation, in presenting the accounts for the period to June 30, 1921, remind shareholders that they took office three weeks after that date. The accounts show a loss of £261,469, which, added to the debit balance of £149,916 brought forward, makes a total debit balance of £411,386 to be carried forward. It is stated that stocks have been written down to market value, or prices realized in the case of those since sold. The causes of the loss have already been reported upon by the committee of investigation at the meeting on July 1 last, since when there has been no appreciable improvement.

The official inquiry into the loss of the P. and O. liner Egypt, off Ushant on May 20, is fixed for hearing at the Law Courts, London, on Monday, June 24.

STEAUA ROMANA.

Joint Stock Company for the Petroleum Industry, Bucharest.

NOTES OF THE WEEK.

The "A" Mandates.

The Council of the League of Nations has sanctioned the Mandates for Palestine and Syria. There was some possibility of a hitch up to the last moment, as Italy was making the most of the necessity of a unanimous vote to clear up a number of matters in which she was interested in Syria and Palestine. In the case of the British Mandate the provisions of Article XIV. dealing with the Commission that is to have charge of the Holy Places were not to the liking of the Italians, and there was a desire on their part to obtain a more definite understanding with regard to the open door for Italy in Syria. The Palestine Mandate has received the approval of the League's Council on the strength of Article XIV. having been redrafted so as to leave more latitude in the composition of the Mixed Commission for the Holy Places. Discussions between the French and Italian Governments were not concluded in time to enable their results to be embodied in the terms of the Syrian Mandate, but in this case too the Mandate was approved, to come into force as soon as agreement has been reached on the points at issue between France and Italy.. We should have preferred a healthier atmosphere for the inauguration of the Mandates; but in the circumstances we may hope that their application will bring some measure of relief to an unsettled situation and will allay unrest and agitation in both countries. The Arabs have much to gain and nothing to lose by waiting to see how the new order works.

Great Britain and Palestine.

Elsewhere in this issue we publish the letter sent by the Palestine Arab Delegation to Mr. Winston Churchill in reply to the statement of British policy in Palestine, recently issued as a White Paper, and to Mr. Churchill's statement in the House of Commons on the pledges given to the Shereef of Mecca in 1915. The arguments of the Delegation, which in the main have already been used in these pages, are incontrovertible. Unfortunately, however, it is typical of the ignorance and indifference with which Eastern affairs are now being handled by the Government that an official statement of British policy should include what are demonstrably "terminological inexactitudes." An almost inevitable result will be to stiffen Arab resistance to a policy which can be defended on honest and straightforward grounds. A distinction has to be made between Palestine and other Arab countries, and if vague promises given seven years ago led to misunderstandings, the only course consonant with the prestige and honour of Great Britain is to face the facts in conference with those concerned. Instead of adopting this course, Mr. Churchill tries to quibble over the meaning of words and in so doing spoils his case and does injury to the good name of Britain.

Bulgaria and the League.

The Council of the League of Nations, it is to be feared, is not keen to face the Balkan issue. Bulgaria was reported to have been threatened by the Roumanian, Yugoslav and Greek Governments with reprisals, if she did not at once put a stop to the activities of *Komitaji* bands in the Balkans. The Bulgarian Government replied to the effect that it was in no way responsible for the bands and that the military force at its disposal was inadequate to maintain order on all the frontiers. At the same time it appealed to the League of Nations to institute an inquiry into the whole subject of unrest in the Balkans with a view to substantiating the Bulgarian point of view. The League, after hearing the statements of the four countries, invited their representatives to confer together under the presidency of the Japanese member of the Council. As a result of this meeting Viscount Ishii reported to the Council that the collective communication to Bulgaria was not intended to be of a threatening nature, and he hoped that the negotiations now in progress between the three Governments and Bulgaria regarding measures for dealing with the bands would lead to satisfactory results and would obviate action on the part of the League. The Council agreed to await the issue of the negotiations, on the understanding that recourse to the League was to be regarded as being always open. It will be a most excellent development, it the four countries can arrive at a working agreement on the subject; but a good many people will regret that the League has not availed itself of the opportunity of conducting an independent inquiry into the actual conditions in the Balkans arising from the Allied attempt at a settlement.

Greece and Smyrna.

The letter from Constantinople that will be found on another page reports that rumours are current in Constantinople to the effect that the Greek Government intends to proclaim the autonomy of Smyrna and district under a Greek Prince, probably Prince Andrew. Made very much earlier, such a move would have been a clever one of the part on the Greeks, and might conceivably have been crowned with success, but to-day it would be belated, and the prospects of its proving a

Digitized by Google

practical success would be slight. The Greeks appear to be convinced that the Kemalists' fighting strength is at its lowest ebb, and it is possible, even probable, that they are right; while General Hajianestis has reported most favourably upon the state of the Greek Army in Anatolia. But even so, it does not follow that Greece would be able to carry through the arrangement which she is reported to have in view, or that she would be wise in doing so, if she could. If Smyrna is to have autonomy, it would be better that it should be imposed by the Great Powers, and that the Governor should be chosen by, and responsible to, them. Such an arrangement would have a chance of acceptance by the Turks, whereas the presence of a Greek Governor-General in Smyrna and its administration by Greeks would inevitably lead to constant friction.

The Ex-Khedive Abbas Hilmy.

Report has been busy with the ex-Khedive Abbas Hilmy, and it has been suggested that a throne may be found for him in Syria. The *ballon d'essai* is not an uninteresting one, from whichever quarter it comes. No step in this direction is likely to be taken by the French Government without consultation with Great Britain, and the latter will have to decide whether Abbas Hilmy is more dangerous as a pretender to the Egyptian throne, roaming the Continent, or as a ruler of Palestine's northern neighbour established at Damascus. The answer is likely to depend on the ex-Khedive's own attitude, for the British Government could hardly give its consent to the Syrian appointment, unless he undertook to abstain from all attempt at intrigue. In the meantime a Royal Decree issued by Egypt has regularized all the steps taken by the British military authorities in connexion with the ex-Khedive's property; he is forbidden to return to Egypt, and his estate there, which has been administered by the Public Custodian, is to be wound up. It may be not inopportune to remember that there will always be a certain number of Egyptians anxious to fish in troubled waters, who will hope to find in a pretender a rallying point against the new order in Egypt.

"Compensations" in Egypt.

The question of the foreign officials in Egypt and the compensation to be awarded to them, if and when the Egyptian Government dismisses them, continues to attract much attention; while Lord Allenby is reported to be actively engaged in endeavouring to secure just compensation for the dependents of the victims of recent outrages. Sarwat Pasha, in an interview accorded to the *Journal du Caire*, has done his best to reassure those foreign officials who have already been dismissed, and has announced that a statement by the Minister of Public Works will be published very shortly. He stated also that the question of the retirement of foreign officials has been postponed; and assured the latter that the Cabinet will not prejudice their interests. The officials, on their part, find it difficult to reconcile this statement with replies given on the subject in the House of Commons, and their uneasiness is not entirely allayed. As to compensation in regard to the cases of outrages on foreigners, no further statement has been made from any quarter. It is satisfactory to note that the native journals are united in condemning the attack on Colonel Piggott. If public opinion will make it clear that such outrages are generally disapproved, no matter what motives may prompt them, an important step in the right direction will have been taken. Still more useful will be the reorganisation of the Egyptian system of criminal investigation. The methods adopted in the past have clearly proved wholly ineffective, and in view of the stern, but in the circumstances not too stern, communication from the British Government, the Egyptian Cabinet can hardly postpone a radical overhauling of the Departments concerned.

Enver and Moscow.

Reports regarding Enver Pasha and his relations with Moscow are very conflicting. It seems to be clear, however, that Enver, angered by the way in which he was first picked up and then thrown down by the Soviet Government last autumn, has now cut himself quite clear of Bolshevism and all its ways, and is making his campaign a Pan-Islamic one. It is pleasant to be told that this fact is causing perturbation in Bolshevist circles, and in as far as the fight is one between Islam and Bolshevism the sympathies not only of Englishmen, but of all decent people will go out to Enver. But, unfortunately for his hopes of success, he is reported to have been driven out of his headquarters at Baisun (south of Samarkand) and to be retreating eastwards. In the meantime the murder of his former colleague, Jemal Pasha, at Tiflis comes to him as a fresh writing on the wall.

Better News from Persia.

News from Persia is better than it has been for a considerable time. The Sardar Sipah has been asserting himself to some purpose, and the brigands and rebels who had been infesting the principal roads and looting pretty well as they pleased have been roughly handled. The rebel leader who raided Suj Bulak and the Sultanabad district in June has been forced to seek refuge in flight, and his band has been dispersed; while the Lur tribesmen in the Burujird area, who joined in the trouble, have now been defeated by the Government force, and have made their submission. The Governor-General of Azerbaijan has resigned, and the Province has been placed under martial law, with Colonel Ismail Khan as Governor. Unless we are mistaken, it was the new Governor who, when Colonel Lahouty Khan captured Tabriz, last February, recovered that city for the Government and was then appointed its Military Governor; so that he is probably a strong man, such as Azerbaijan requires at all times.

The Situation in India.

The most recent news from India may be read as indicating some approach to clarity in the political situation. It is true that the revolutionary party is still seeking for effective methods, but there is now no immediate prospect of a change of object on the part of the organisation as a whole, though it may not improbably lose the support of some more or less prominent individuals. The thinking-power of the machine is increasing with the return from prison of some of its keenest brains, and it is scarcely to be expected that the futilities of the last few months will be permitted to continue. In one respect at least the revolutionaries must be accounted fortunate. In the India of old they would have died sudden and most horrible deaths: in many modern democracies some of them would have been shot or hanged; but in this period of transition sentences for treasonable activities are little more than nominal, and in some provinces the convicts have enjoyed that curious "benefit of clergy," under which the severity of punishment varies inversely as the literary attainments of the criminal. There are as yet few signs that

Digitized by Google

Indians in the mass appreciate this lenient treatment, and it looks as if more prosecutions will be needed by-and-by.

The Strength of the Government.

Such being the general situation, it is obvious that the near future depends on the steadiness of the Central Government more than on any other single factor, and we fear it must be admitted that in this respect the Viceroy's Council has something to live down. Speaking for ourselves, we have not recently come across anyone willing to credit the members collectively with the power of seeing the situation steadily as a whole. One hears of improvisations, sometimes, but not always, brilliant, and occasionally of definite administrative successes, but these are individual achievements, and the Council as a body seems to command little more of the public confidence than in the days when it was reduced almost to a nullity. It is satisfactory to learn that Dr. Sapru, whose immediate retirement was reported, will remain on the Council till next March, for he has given ample proof that he possesses the statesmanlike qualities which are now required; but he will have to be replaced by-and-by, and looking over the list of "possibilities," we confess we are unable to point to anyone whom we could recommend with confidence as his successor.

The Need of Men.

In the old days the Indian seat on the Council was held by an eminent man of affairs, but under present conditions we suppose the choice is practically confined to the legislature, and while it contains several promising politicians, not one of them appears to us to be sufficiently mature for high office. They will doubtless ripen in the course of time, perhaps rapidly, but they are still in the stage when words are the things that matter, and what they need most is individual experience of the process of heckling, as the term is understood in its original home, as thorough combing with sharp teeth, till all the woolliness and fluffiness are removed, and a straight and strong fibre remains, equal to withstanding any probable strain. Debates will do something, as the art develops, but in this matter the constituent is much the most efficient practitioner, and it will be some time yet before Indian voters acquire the art; meanwhile the choice of men to fill high office must be something of a lottery, and we hope that India will have rather better luck than she has been experiencing of late.

THE WEEK AT HOME.

London, Monday evening.

Nothing Doing.

Politics are in the doldrums, and Westminster is bored. A debate on the Honours List fizzled out with the promise of a Royal Commission to inquire into the future, not the past—it sounds like an attempt at prophecy, but nobody was really in earnest except Mr. R. McNeill, who flung wild charges about, the bulk of which were readily disproved.

There was also a debate on the reform of the House of Lords, which was even more unreal. I gathered that Lord Selborne was perturbed at the prospect of a Labour majority passing Bills to abolish anything and everything under the Parliament Act; but at the moment the prospect of a Labour Government strikes one as excessively remote, and the contingency that it will do anything when it gets into power seems even more unlikely, to judge from the calibre of the average Labour member. Another Peer pointed out that Labour would be in a difficulty, because it had no Peers of its own, and this was really a novel point that had occurred to very few peole. But even this new train of thought did not dispel the somnolent atmosphere.

The fact is that Parliament has nothing to do, and nobody wants it to do anything. Never since the last days of the Balfour Administration eighteen years ago has there been such a lotus-eating time, and there is really no reason except convention why the House of Commons should not rise at once.

Somebody has suggested that Mr. Lloyd George has been reading the history of his ancestors in office, and has discovered that Sir Robert Walpole was Prime Minister for twenty years without doing anything at all. The present head of the firm likes to take things easier than he did ten years ago, and he has well earned the slacker time he is having, but one does not see him in love with twenty years of Lethe.

Sea versus Air.

A vigorous controversy has again sprung up between those who favour the building of more capital ships and the advocates of increased air defence. It seems likely to last some considerable time, and in fact it is beginning to spread to the general question of Sea *v.* Air.

What may be called the Admiralty view is that the Navy won the war, and that England must still depend on her Navy as the first line of defence in the future. Most sailors would probably agree with this; but not all sailors agree with the further Admiralty contention that the Navy depends ultimately on the capital ship. A great many people hold the view that the capital ship did very little in the late war, and will do still less in the next; they pin their faith to the destroyer or submarine.

On the other hand, the airman points out that England is no longer an island; and although he recognises the enormous services rendered by the Navy in the past, he suggests that the Navy must be regarded as more or less of a back number, or at best a secondary area; some few extremists even go so far as to say that the real value of the Fleet is so much scrap iron. That, of course, is an absurd exaggeration; but there seems sense in the contention that England of all countries cannot afford to neglect air defences, and that the real meaning of the Washington Agreement to limit battleships was that the nations concerned agreed that the day of the battleship is over.

The two capital ships whose construction is now being discussed would cost eight millions. That sum spent on aircraft, it is said, would secure our supremacy in the air for a long time, and the experience gained in the building of military or naval aircraft would be useful in civil and commercial flight.

On these various matters an astonishing range of opinions is being put forward, and the public, which realises that the question is, or may become, one of vital importance, is reading the different contributions with interest. To the ordinary Englishman the very suggestion that the day of the Navy is over is an abominable heresy, but one is bound to admit that the protagonists of aircraft have an uncomfortably large number of arguments on their side.

The Navy, of course, regards the Air Force as an unwelcome baby that is growing up much too fast; it would like to keep it as an auxiliary, but it rather resents the idea that what it used to regard as a toy may some day be its master. And it seems particularly to object to the argument that the Navy could not prevent the bombing of London, whereas the Air Force would do that, and more also, if efficiently equipped. Obviously we shall hear a great deal more about this matter.

Ireland.

There has been rather more news from Ireland these last few days. The Government troops succeeded in taking Limerick; heavy fighting was reported, but the loss of life was inconsiderable; on the other hand, grave damage was done to property by the Republicans. Bacon and other food factories and shops were looted, and a number of underclothing shops—it is suggested that the rebels are feeding themselves and clothing their wives and daughters on the proceeds of the new sack of Limerick.

Digitized by Google

Later in the week operations were begun against the rebels in Waterford, and here they were dislodged with rather less difficulty. So far no attempt has been made to turn them out of Cork, which city is absolutely under their control; but it seems clear that the military policy of the Provisional Government is to draw a line across the South of Ireland, and to concentrate on the rebel headquarters at Cork last of all. Most reports from Dublin make no attempt to underrate the difficulty of the task, but the Government seems in earnest. Nothing has been heard of Mr. de Valera.

Population and Eugenics.

Some time ago Mr. G. K. Chesterton attacked Dean Inge for his views on Eugenics. The Dean, in an article on the subject in the current *Edinburgh Review*, calmly declines to argue with "an irrationalist," but he does in fact argue rather effectively that a believer in birth-control and better breeding can be a Christian—to which I suppose Mr. Chesterton will retort—what sort of Christian?

It is an amusing little controversy, which plays around the fringe of a great subject. So long as it enables Mr. Chesterton to give off his epigrams, his admirers are quite happy, but his views hardly count in more serious quarters, and I doubt whether his following is large. On the other hand, the Dean is handicapped by his honest admission that not very much is known about Eugenics or nature's methods of breeding. But more people are interested in the subject than was the case a few years back.

Holidays and Harpies.

The holiday season is upon us, but I gather that all is not well in the Land of Letting Lodgings. The fact is that Pharaoh's dream has come true for landladies: the seven fat years of war and post-war are over, and the seven lean years are at hand. People are now looking twice at their money, and taking shorter holidays or less expensive rooms; and the harpies who used to insist on "three guineas a week a room, and no cats, dogs, or children"—this was the exact answer given to a lady whom I know at Clacton some time ago—are having to come down in their terms. Moreover, those people who have any money find it easy enough to get abroad for a change, where the game of "living on the exchanges" is both exciting and interesting. The landladies have had a royal time since 1914, but nemesis is at hand with the necessity of cheaper holidays.

The Week's Books.

"Mystics and Heretics in Italy" (Allen & Unwin) by Emile Gebhart, is a sympathetic study of such diverse persons as St. Francis of Assisi, Dante, and the great Frederic II., who was denounced as an atheist because he was a rationalist and who scandalised the whole Catholic world by making a treaty with the Mohammedans. It was considered nothing to the point that his treaty obtained without fighting at least as much as any of the Crusades obtained with a vast expenditure of life; its real crime, no doubt, was that it indirectly diminished the authority of the Papacy. The volume also contains a very interesting account of the scholastics of the mediaeval university of Paris.

"Philosophy and the New Physics" (Routledge) by Louis Rougier, is one more essay on the relativity problem and the theory of quanta. Unlike some of its predecessors in this line. it does not altogether eschew mathematics.

"Letters to Somebody" (Cassell) by Sir Guy Fleetwood Wilson, is in effect an autobiography by a distinguished Civil Servant. One quotation will show its quality. The author met Mr. Gladstone in Florence. He "was cordiality itself, and said 'I anticipate a treat; after lunch you shall talk Italian to me and I shall listen to you with genuine satisfaction.' The prospect ruined my luncheon, and when that, for me, miserable meal was ended, he said 'Sit in that chair, and now for Italian.' This must have been about half-past two. When Mr. Gladstone left it was just five. As soon as I sat down he began to walk round and round the room, quoting the Italian classics, and discussing (occasionally in Italian, correct but somewhat Dantesque) every conceivable subject, from olive groves to the Pope. He waved his arms, his tie got under his ear, his feet kicked footstools out of the way, his hands pushed aside the furniture, and round and round the great man strode, his torrential discourse never ceasing, and his enthusiasm never abating. I was given no chance of uttering one single word from first to last."

There was a time, some years ago, when Mr. Philip Guedalla was one of the brightest and best of undergraduates. When he came down from Oxford, a recognised wit and with some little reputation as a writer, he became transmogrified into a lawyer—presumably, like the mad dog in Goldsmith, "to serve his private ends"; and occasionally he "wrote for the papers," but he showed no signs of growing up. However, he has now developed into a serious literary person; and I am bound to admit that "The Second Empire" (Constable) does make clear to me that amazing experiment of Napoleon III. which Germany brought to an end in 1871. It is disconcerting to have to admit it, but Mr. Guedalla has established his claim to be considered a historian—not of the dry-as-dust school which gives two lines of text to a dozen pages of documents; but of the real historical tradition that reproduces the atmosphere of the past with understanding.

"Human Behaviour" (Allen & Unwin) by Stewart Paton, M.D., the lecturer on Neuro-Biology at Princeton University, contains chapters on personality, attention, the formation of habits, and the intelligent direction of activities. It is a work for the general reader rather than the specialist.

"The War in the Air" (Oxford University Press) has a pathetic interest of its own, for its author, Sir Walter Raleigh, died while the book was being printed. The volume outlines the time before the war, when private enterprise was just beginning to build machines, and the Government was still dubious and sceptical as to the future of aircraft, and it records the early history of the air-war. Like all Raleigh's work, it is written in a style as vigorous as it is beautiful.

OCELLUS.

PALESTINE EXPLORATION FUND.

The current *Quarterly Statement* of the Palestine Exploration Fund contains "The Excavations at Askalon," by Prof J. Garstang, and "Notes on Ancient Weights and Measures," by Major-General Sir Charles Warren, in addition to the report of the Annual General Meeting of the Fund, and the customary "Notes and News."

As already reported in THE NEAR EAST, the numerous calls upon his time in Oxford having compelled the resignation of Dr. Hogarth from the chairmanship of the Executive Committee, Dr. H. R. Hall, of the British Museum, has succeeded him, and we hope the Fund will continue to prosper with its new chairman. The interest and the importance of the work at Askalon are made clear in Prof. Garstang's article, and it is regrettable to think that there is any prospect of its being hampered in future by a shortage of funds.

THE NEAR AND MIDDLE EAST.

From Our Own Correspondents.

EGYPT.

Cairo, July 13.

The Mecca Pilgrimage.

The ceremonies in connection with the departure of the Holy Carpet for Mecca started last Friday evening, and Sarwat Pasha, accompanied by the Ministers, came up specially from Alexandria on Saturday in order to preside over the transfer of the hangings for the sacred shrines at Mecca; which compose what is known as the Holy Carpet. It was rumoured some little time ago that King Fuad would perform the pilgrimage this year, but there is as little truth in that statement as there has been in the persistent rumour that His Majesty would make a journey to Europe this summer. It may be remembered that the one and only sovereign of Egypt to make the pilgrimage to Mecca since the present dynasty was founded has been the ex-Khedive, Abbas Hilmy Pasha, who visited the Holy Places in 1909. Mention of Abbas Hilmy Pasha reminds me that he is at the present moment carrying on active propaganda against the Government of Egypt from Rome. The liberty accorded to him in this respect by the Italian authorities would scarcely seem to be consistent with the attitude of a friendly Power like Italy.

A Sudan Frost.

During the past few days a sudden calm has succeeded the storm which a fortnight ago raged in the vernacular press on the subject of the Sudan. The explanation of this sudden cessation is somewhat amusing. The cause of the campaign was the arrest of a Sudanese officer of the Egyptian Army, who according to the Egyptian press had been sentenced to a year's imprisonment by a Civil Court at Khartoum, because he had protested against the present régime in the Sudan and had demanded union with Egypt under the King of Egypt. Here was another proof of the perfidy of Albion, and the officer in question was hailed by the Egyptians as a brother and a patriot who had flaunted military discipline in order to voice the heart's desire of his compatriots. Unfortunately for the Egyptians who led this almost hysterical campaign the facts of the case have turned out to be very different from what they were represented to be. The officer in question, far from standing for closer union with Egypt, had attacked the Sudan Administration, because he wanted to have nothing to do with either Egypt or Great Britain, but a free and independent Sudan under a Sudanese head of its own. I would hazard that it will be some little time before the Egyptians in question again champion the cause of any Sudanese, certainly not before they have obtained official corroboration of the facts of the case.

Amateur Theatrical Venture.

Considerations of space prevented me from mentioning the production of Hornung's "Raffles," which was given by an amateur company at the beginning of the month. It was a most excellent performance in every respect, and reflected great credit not only on the performers but also on the producer, Mr. Louis Cowan, who, it may be remembered, was also responsible for the recent amateur production of the "Mikado." The success of "Raffles" is exceedingly gratifying, since this is the first venture of the recently formed "Cairo Amateur Dramatic and Musical Society" which, on the strength of the talent now shown, should fill the great gap that has been manifest of late years in the social organisation of the British community.

The Round-the-World Flight.

After much delay Major Blake and his two plucky companions, Capt. Malins and Capt. McMillan, have at last reached Egypt on their round-the-world flight. They landed at Sollum on the evening of the 6th, having taken the remarkably short time of four hours to cross the Mediterranean from Athens. Aboukir they made their headquarters, and there overhauled for the cross-desert trip to Baghdad. From there they pushed on again on the 10th, arriving the same evening at Ziza, where they picked up the escort which, as they carry no wireless, will accompany them to Baghdad. It is noteworthy that no mechanics are being carried on this trip, the three members being prepared to do themselves what emergency work is necessary.

It has been recognised for some time that owing to her geographical position Egypt will develop into an important aerial junction when commercial flying becomes more developed. Two years ago an aviation expert was appointed to the Ministry of Communications, and the Government has for some time been considering the elaboration of regulations for control of aircraft arriving in and departing from Egypt. The peculiar circumstances, political and geographical, in which Egypt finds herself will necessitate the introduction of special regulations, which very probably will be embodied in a form of convention similar to the one in force in Europe.

The Press Bureau.

This week a great event is taking place in the Press Bureau. Its head, Yusef Khlat Bey, is going on leave for the first time in twelve years. No man in the service of the Egyptian Government ever more richly earned his holiday, for no more thankless or arduous post can be conceived than that of the Director of the Press Bureau, who has the unenviable task of following the local press in all its vagaries and of keeping it along the path of reason and moderation in matters political. Khlat Bey has however always risen to the occasion, no matter how difficult or disagreeable it might be, and the proof of the ability and tact with which he has carried out his duties, particularly during the past trying decade, is afforded by the fact that while he has enjoyed the complete confidence of successive Prime Ministers and Ministers of the Interior, he still commands to-day the great esteem and respect of the directors of the local press—even those against whom he has from time to time had to take strong action. It is stated that on the expiration of his leave, Khlat Bey will retire from the service, and to the chorus of regrets which this news has evoked your correspondent would like to add his own, for he owes much to the friendly advice and ever-willing assistance which together with his colleagues he has always received from Khlat Bey, whose retirement will be in every respect a great loss, but whose forty-two years of faithful service will entitle him to a rest which everyone hopes he will long enjoy.

Port Said, July 17.

July 14.

The great French fete of July 14 passed off very successfully this year. There were the usual official and consular receptions, and in the afternoon there were all sorts of distractions on the beach for the extraction of the elusive piastre from the pockets of the promenaders. The races in the harbour were quite exciting, and there were some very good finishes. In the evening the fir-e work display was one of the best we have had, and the moon, rising in the middle of it, added to the picturesqueness of the scene.

American Destroyers.

To-day some thirteen United States destroyers, accompanied by a depot ship, came in to the harbour at

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

Digitized by Google

daylight and proceeded at once through the Canal. Such a convoy reminded one of wartime, when numbers of ships were secretly gathered here.

A Popular Wedding.

Last week we had one of the most popular weddings we have had for a long time. Miss Eleanor Broadbent, second daughter of Mr. Broadbent, late American Consular representative, was married to Surgeon, Lieutenant D'Arcy, of H.M.S. Ceres. After the reception at the house of Mr. and Mrs. Newbould, the sister and brother-in-law of the bride, the happy couple left *via* Brindisi and Palermo, for Malta, where the bridegroom will rejoin his ship.

PALESTINE.

Jerusalem, July 16.

The Arab "Strike."

The Arab section of the population of Palestine had its "strike," according to plan, last Thursday and Friday, when, quaintly enough, with the consent of the Administration, permission was given to organize two days of solemn protest against the policy of the Administration. It was widely advertised beforehand, with the result that the authorities took the most meticulous precautionary measures and worked themselves up to the extreme limit of nervousness. The greatest possible show of force was made, and at times one could not help getting the impression that a "stage army"—with all the available "supers" all dressed up—marched across the stage, behind the scenes and back to the stage again. But in spite of this a very unusual atmosphere of quietness pervaded the whole city, and, in Jerusalem at least, there was never the faintest attempt at disorder on the part of anybody. And virtually the same can be said of the country as a whole. The only exceptions were at Ekron, an old Jewish colony, where neighbouring Arabs did some mischief in trying to burn up the contents of the village threshing-floor; and at Haifa, where one Arab was maltreated by some others for opening his shop and selling provisions to a Jew. At Hebron permission was asked from the Governor to organise a Protest Demonstration. Leave was forthcoming, provided that the leaders of the demonstration deposited a surety of a thousand pounds in cash against any breach of the public peace. But since the cash was not forthcoming, the demonstration did not materialise.

Practically all Arab shops and business premises throughout the country were closed, and—but with many exceptions, including Government employees—Arab workmen refrained from work. This proved rather awkward in certain crowded Jewish suburbs where the scavangers failed, for two whole days, to remove the accumulations of garbage and filth. They who know their Jerusalem will understand what this implies.

It is difficult to suppose that this little peaceful demonstration will help immediately to secure the demands of the Palestinian-Arab politicians—revocation of the British mandate and the Balfour Declaration, "complete freedom" and union with Syria; but the net result is certainly far more to their credit than if, in place of the organised peace, there had occurred organised rows. It is distinctly good for them that the Arab leaders have learned so much. But one still has a lurking doubt whether the excessive tranquillity is rightly attributable to careful and successful organisation by the Arab leaders (which for the sake of the Arabs' future we should like to believe), or to the Government's heavy exhibition of precautionary measures (which is more probable), or to the fundamental indifference of the Arab population (a likelihood which it would be wrong to regard as quite impossible).

Even now the possibility of trouble is by no means over. Next week we expect the news of the final ratification of the Mandate, and shortly afterwards the Arab Delegation is expected back after its year's work in England. The first will, most likely, create nothing but an outburst of Arab Press indignation; but the second may, if a public reception is allowed by the Government, lead to trouble.

Sir Herbert Samuel, the High Commissioner for Palestine, would seem to have hastened his return by a few days, arriving last Tuesday instead of at the end of the week as was previously arranged, in order to be at hand in case of unpleasant emergencies.

Economies in the Administration.

The Palestine Administration is still persevering in its pursuit of economies. A "Geddes Axe" commission is about to come into action, and Government clerks have all been officially circularized and warned as to their insecurity of tenure. Also the various departments are submitting to economies in the use of stationery which surpass even the ingenious devices of the war years.

Jewish Immigration.

Jewish immigration is being continued at a steady average rate of some 800 a month, though half of these are dependents of earlier comers. Unemployment is not now so marked as formerly. The Government Labour Department gives the number as approximately fifteen hundred out of work, while the Zionist Administration gives the figure as only half this number. It is a curious fact that despite the consistent additions to the Jewish population of ten thousand a year, and a total of twenty-five thousand since the Civil Administration began, the statistics from Arab sources would make the Jews a gradually decreasing percentage of the total population. Even the Government's figures are hotly contested by the Jews. A rough census was recently taken and the totals were officially announced as: Moslems 585,271; Christians 88,049; Jews 81,263; other religions 7,213. The Moslem population is said to be showing a very rapid increase owing to improved health conditions; but some ill-minded people question the accuracy of some of the returns since, in reply to Government inquiries as to recent births, certain of the more primitive centres in southern Palestine were found to have included in their totals all their young cattle, goats and camels!

Zionist Commemorative Days.

Yesterday and to-day count as two important commemorative days in Zionism. To-day is the eighteenth anniversary of the death of Theodore Herzl, who was the first to urge the necessity of adopting high diplomatic methods for securing political recognition of the Jews as Jews, and the necessity for giving them a Jewish territorial home, if they were ever to have political recognition as a nation. The veneration in which Herzl has come to be held among Jews is indeed profound. The non-Jew, if he has ever heard the name, is not likely to see in Herzl more than a temporary leader of a movement which all but faded away with his death. To the Jew, however, he is the saviour of the race.

Yesterday's anniversary is, in its way, far more important. It commemorates the "Bilu" (a word concocted from the initials of the Hebrew original of "O House of Jacob, come, and let us go!") who, as a party of young Russian Jewish idealists, of moderate wealth, came to Palestine in 1882, and were the real pioneers of the present-day Jewish colonisation movement in the country. After the Russian pogroms of the early 'eighties they despaired of a free normal life in the country of their exile, and faced the almost incredible hardships of life in Palestine. Everything was against them: the Turkish Government, the neighbouring Arabs, malarious swamps, and especially the feeling of their fellow Jews. The society was originally 525 in number. Only thirty-seven reached this country, and of these more than a half, overcome by the hardships of their task, went back. Those, however, who remained, set the example of dogged perseverance in the face of disappointment and the cruellest hard labour which have, without exception, fallen to the lot of the new Jewish peasantry of Palestine; and it is they who are primarily to be thanked for the present openings for Jewish life here. In the recent "White Paper" issued by the Colonial Office it is the work of these men and their successors in the same labours, which is evoked as the main justification for British encouragement of similar work for the future. Certain Jews here are adopting the plan of dating their documents from "The Year of the Balfour Declaration," which in their estimation serves as the *annus urbis conditae*. It would be more just, if they will insist on having an era all to themselves, to go back forty years to the coming of these "Bilu," the real Pilgrim Fathers of their movement.

ROUMANIA.

Bucharest, July 13.

Cholera.

An undesirable guest in the form of Asiatic cholera has made its appearance in Bucharest. So far it has claimed five victims, all members of the same family living in a small village outside Bucharest. The disease appears to have been imported from the Ukraine, as the first victim was a soldier serving on the Dniester who came on a visit to his family. The authorities concerned have taken the most stringent measures to stamp out the budding plague, and the infested locality as well as its inhabitants are isolated. It is gratifying to remark that no fresh case has occurred.

Komitajis.

The Bulgarian Government having replied to the Roumanian Government's Note, that owing to the reduced size of their army they were unable to cope with the *komitajis*, the Roumanian Government is sending troops to the infested localities where these Bulgarian marauders attack the population and even local pickets. It is the Roumanian Government's intention not to rest until every one of the bandits has been dealt with and the Dobruja and other districts have been completely freed from these raids on the Roumanian frontiers.

BULGARIA.

Sofia, July 12.

League of Nations Inquiry.

The Bulgarian Delegation left Sofia yesterday for London, to present their case before the Council of the League of Nations. It will be remembered that Bulgaria asked that an impartial inquiry might be held into the question of frontier bands. Serbia, Greece, and Roumania accuse Bulgaria of aiding and abetting these bands.

The Bulgarian Delegation is headed by M. Kosta Theodoroff, Bulgarian Minister at Belgrade, whilst M. Radeff, Minister at Vienna, and Colonel Noykoff, Dr. Neykoff, and Professor Mileff have also proceeded to London. The inclusion of Professor Mileff in the Delegation is a very happy choice, as he is possessed of a wide k owledge of frontier questions. He is foreign editor of the Opposition newspaper *Slovo*, and it is thus doubly satisfactory that he has been prevailed upon to sink party differences.

It is understood that the Bulgarian Delegation will also endeavour to bring up the question of protection of Minorities whilst in London. They argue that it is time some steps were taken in this matter.

A Fresh Outburst of Crimes.

There has been another series of murders in and around Sofia. On Saturday, the 8th, M. Chouklieff, a former Chief of Police, and a well-known Democrat, was shot dead outside his house. His unknown assailants, three in number, have not yet been heard of. It is believed that this murder is connected with that of M. Grecoff, M. Chouklieff having been very active in his attempts to track down Grecoff's murderers.

On the same day a high official in the Sofia Prison was also killed. The most shocking crime of all, however, took place at Pleven. A parcel, which was marked as containing sardines, was sent to a Socialist advocate, residing at Pleven. The latter happened to be in Sofia at the time, and his secretary opened the parcel. The "sardines" turned out to be an infernal machine; and the unfortunate secretary was blown to pieces, whilst his wife and child were seriously wounded. The motives that actuated this horrible crime are unknown, but the Socialist Party maintains that they are political.

On the same day as the Pleven murder, a miniature battle between bandits and peasants took place at the King's Palace at Varna. The bandits are reported to have come from Sofia with the intention of entering the Palace. On their way they stole some property belonging to peasants who live near the Palace. The latter thereupon attacked them and succeeded in winning the day. One of the bandits was practically beaten to death. This is the first time bandits have operated so near Sofia, and the incident is a good indication of a state of lawlessness that is daily growing worse and worse.

Party Politics.

In Bulgaria, as in practically all Balkan States, during harvest time there is a distinct lull in political activity. The peasants have only one object in view, the gathering in of the crops. This year is no exception to the rule; but the various party organisations at Sofia are preparing for a strenuous autumn campaign. The newly-constituted Bourgeois *bloc*, that is to say, the Democrats, Narodniaks and Radicals, are especially active in this connection. Their intention is to hold a series of mass meetings in the provinces, to protest against the methods followed by the present Government. There is no doubt that the Bourgeois *bloc* have a considerable influence in the country, but it is difficult to see how the majority of the peasants can be brought round to the Bourgeois point of view. Put quite simply, the present Government's policy is to tax the townspeople and leave the peasants alone. The Bourgeois policy will doubtless include taxes on townspeople, but must also include very much heavier taxing of the peasants. The peasants may be dissatisfied with the present Government; but it is not likely that they will view with favour the entry into power of a Government that is bound to impose a greater burden on them. No Government in Bulgaria has ever successfully taxed the peasants. The latter are seventy-five per cent. of the total population, and naturally exercise an enormous influence in the elections.

M. Stambolisky with his Diplomatists.

It is reported that the day before the Bulgarian Delegation left Sofia to attend the League of Nations Conference at London, a meeting was held at M. Stambolisky's private house. There were present General Fitcheff,

Digitized by Google

Minister at Bucharest, M. Kosta Theodoroff, Minister at Belgrade, and M. Kuneff, Chargé d'Affaires at Athens. The Prime Minister discussed with the three Diplomatists Bulgaria's situation *vis-à-vis* her neighbours.

Brevities.

King Boris, accompanied by the two Princesses, has left Sofia for the Palace of Euxinograd, Varna, where he will spend a few weeks.

M. Daskaloff, Minister of the Interior, will leave for Germany this week.

Colonel d'Amarzit, Chief of the Military Organ of Liquidation, has left Sofia for Paris, to attend a meeting of the Allied Council at Versailles.

M. Omarchevsky, Minister of Education, will represent Bulgaria at the Brazilian International Exhibition this autumn. He will also go to America to take part in the Christopher Colombus celebrations.

TURKEY.

(*From an Occasional Correspondent.*)

Constantinople, July 14.

A Smyrna Rumour.

There appears to be a lull in events Anatolian, while all sorts of rumours are rife on new and secret plans on the part of Greece. It is said that the Greek army will retire from the Eskashehir line to a shorter one not indicated, thus considerably reducing the cost of upkeep; that Greece will grant autonomy to the reduced area of occupation, appointing Prince Nicholas of Greece as Governor; that a National Army will replace the present Hellenic one, and that elections will immediately be held in the new State, to be followed by applications for recognition by the Great Powers and for inclusion in the League of Nations.

If this should prove a correct forecast of their intentions, it is an astute move on the part of the Athens Government. They will thus be taking advantage of the apparent impotency of the Kemalist Army, and of the delay on the part of the Entente Powers in arriving at a solution likely to be acceptable by the two parties.

What might be the ultimate influence on the chances of a permanent peace in the Near East, if this scheme should, by default, be allowed to go through can only be conjectured. Greece would be more securely and legally entrenched in her possession of the Smyrna district, and the Entente Powers placed in a still more embarrassing and ambiguous position than they have occupied in the past over the unfortunate Near East question.

The Angora Government.

In the meantime what the Angora Government cannot accomplish by force of arms, it is endeavouring to do by oratory in after dinner speeches, propaganda, and determined efforts to intrigue with neighbouring nations at the expense of the Allies. The whole thing is so obvious. All her playing up to France in the past has not brought her any further. Wordy treaties with the Soviet, and her missions to Moscow, have so far achieved for her but little if any tangible assistance. Now she has discovered in Persia a long-lost brother, and over what was doubtless a strictly national Turkish repast in honour of the newly appointed Ambassador to his unrecognised Government. Kemal pours forth sweet and oily remarks, with the intention of annoying the Entente Powers and driving them into according a recognition of the Angora Government as a power to be reckoned with if only by reason of its powers for mischief.

Local Press Views.

There is seldom anything interesting in our local Nationalist newspapers. Whether it be that their cause is a bad one, their task a hard one, or that their writers lack journalistic ability, does not alter the fact. They show an extraordinary determination in their articles day in and day out to indulge in the merest platitudes, and suspiciously to avoid facts or figures. Here is a typical extract from the *Tevhid Efkiar* :—

> "Our enemies do not understand that love of independence is innate in the heart of the Turkish people. They supposed that the Turks, crushed under the weight of poverty and privation, would have preferred slavery to independence. However, three years' experience has proved the absurdity of this supposition . . . What we follow in the days of our misfortune is not the Star of Peace, but the Star of Independence, and it is that Star alone which will be our Salvation."

There is, however, a boldly independent anti-Kemalist organ in the *Peyam Sabah*. Its unflinching attacks on everything and everybody emanating from Angora provide a healthy contrast. Here is an example from one of its leading articles :—

> "As long as the accursed gang at Angora go on in their impossible politics, the Great Powers may hold Conferences, and take decisions about the Orient, but we are simply doing our best to make these decisions hostile to us. . . . As for our history and our past, it is of no account. The Angora Gang will wipe it out with one stroke of the pen. They believe that Turkey could live as a Bolshevist dependency, excluded from the civilized world, and Europe and America, and even from the Moslem world. No madness is comparable with that."

French National Fete Day.

The French National Fete Day is being celebrated to-day with full *éclat*. The great cosmopolitan city of Constantinople becomes a French town on this occasion, and our streets are bedecked with the tricolour of France.

The celebrations for the National Day even commenced last night, when a military torch-light procession paraded the town, starting from the Taxim Square at 8.30 p.m. A gay show, French troops and Senegalese, mounted and on foot, carrying banners, Chinese lanterns and other illuminated designs, and accompanied by decorated and illuminated cars, coloured fire and brass bands, surged through the crowded main streets, among an admiring crowd of all the nationalities of which this wonderful city is composed.

To-day, the actual day, opened with a military review on the Taxim Parade Ground in the early morning, by General Charpy, followed by the reception of the French Colony by General Pellé, the French High Commissioner. At 1 o'clock a subscription banquet was provided for the French Colony at their Club House, "L'Union Française."

The French undoubtedly would appear to go in more for flag-wagging than we do. If it is not the National Fete Day it is Monsieur Farrère, Joan of Arc, or somebody else. But our national pride is equally gratified by the sight of the soldiers and sailors of Britain, whose exemplary conduct and fine physique as they swarm the main streets provide a better tonic to the Briton and a greater influence on the foreigner than all the flag-wagging in the world. We have the sailors of the 'Iron Duke,' the 'Centurion,' the 'Pembroke' and other ships, in their white suits and white helmets, ever cheery and human, the men of the Irish Guards, the Sherwood Foresters, the Buffs and other units, in their summer khaki, also out on pass, always merry and

bright, but always British in their behaviour and an example to their profession.

Racing at Makrikeuy.

A British enterprise has recently commenced operations here in the Makrikeuy Racing Syndicate. After long and laborious work in the preparation of the Race Course at Makrikeuy, the Syndicate is to be congratulated on the four successful and well managed meetings that have been held to date. Every bait is laid to lure the sporting public to the races.

Makrikeuy is situated on the Sea of Marmora some forty minutes by train from Serkedji or Stamboul station. One can go to the races and return by sea or land on special boats or special trains chartered by the Syndicate. There is also the road to Makrikeuy; but though this means is much used, in view of its condition, perhaps the less said about it the better.

The two names most prominently associated with this sporting venture are those of General Sir Loftus Bates, the directing head, and Major G. H. Barker, the local manager, to whom the thanks of the community are undoubtedly due for providing us with this new and much welcomed recreation.

CYPRUS.

Nicosia, July 4.

Tribute to a Greek Judge.

M. D. G. Demetriades, late Judge in the District Court of Larnaca, who has retired on pension, during a long service in that town earned both the respect of the Government and the confidence of the whole community of Larnaca. He is proceeding to Vienna for reasons of health, and the Judges and Bar of Larnaca in a recent letter expressed the feelings of high esteem and affection in which they hold him, and their hopes for his complete restoration to health. M. Demetriades, writing from Smyrna, has expressed his grateful acknowledgement of this token of goodwill and appreciation.

Persistence of the "National Council."

Readers may well be weary of the pertinacity of the Greek agitators for "union." The so-called Council having sent yet another "resolution" on the subject, the Archbishop, who is its president, has now received a reply, in which the Secretary of State for the Colonies, after stating that the memorial of the "self-styled" Council has received consideration, warns the Prelate that "no good purpose can be served by submitting any further memorial of this nature, in view of the fact that you have already been informed that the Government of His Majesty cannot hold out any hope that union with Greece can be sanctioned." The usual comments are being made in the Press to the effect that it is impossible to silence the voice of the people in their claim for "justice."

General News.

The Bishop of Papho, who is the senior Metropolitan of Cyprus, and has frequently acted for the Archbishop during his long absences, has written to the Press to contradict rumours that he is seeking an appointment out of the island. Last year rumour stated that he was seeking to be appointed to a newly created see at Tanta in Egypt by the Patriarch of Alexandria. A recent rumour alleged that he was proposing to the Patriarch of Constantinople that a new see should be established in the island of Patmos, and that he should occupy that position.

The Bishop of Kition is offering to leave the Bishop's residence at Limassol with a view to helping to pay off a debt of over £12,000 with which the see is burdened. There are already several applicants, including the proprietor of a large hotel, and the Committee of a Greek Club.

A volume on the history and folk-lore of Cyprus is being published by M. Pharmakides. It contains various essays which have obtained prizes given by the "Folk-lore Society" of Athens.

The High Commissioner, Mr. M. Stevenson, has left for England on leave. Mr. Fenn, Chief Secretary, will act during his absence.

CORRESPONDENCE.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper

THE EGYPT PARLIAMENTARY COMMITTEE.

To the Editor of "The Near East."

Sir,—In your issue of July 18 you refer to a letter on the subject of the detention of Zaghloul Pasha sent to the Prime Minister and signed by upwards of forty persons You inferred from the fact that these signatures did not include all of those on our note-headings that the members of the Committee were not unanimous. You will no doubt allow me to correct this inference. The Executive of the Committee invited certain persons to sign the latter irrespective of their membership. A more correct inference would be that every member of the Committee would without a shadow of doubt have signed the letter. That would have meant three or four times the number of names on the note-heading, to which would then have had to be added a number of names of those desirous of signing but not actually on the Committee. By this time the letter would have begun to assume the dimensions of a petition. That is why a selection of names known to the Prime Minister was made and that was the only reason.

I am, etc.,
B. N. LANGDON-DAVIES,
Hon. Secretary.

"REVOLUTIONARY" TRIBUNALS.

To the Editor of "The Near East."

Sir,—Referring to "A Reader's" letter in your issue of the 13th instant, I do not propose to discuss the political matters therein mentioned, as I am not a politician. But I happen to know my own language, and I must inform "A Reader" that "Revolution" is not "*Istiklal*," as he says, but "*Ikhtiklal*." "Independence" *is* "*Istiklal*" (or as he prefers to write it "*Istiqlal*").

Is it possible that the rest of his letter is as accurate as his Turkish?

I am, etc.,
EMINE SAFVET TULLY.

THE PALESTINE ARAB DELEGATION AND MR. CHURCHILL.

We have received from the Secretary to the Palestine Arab Delegation, Mr. Shibly Jamal, the following copy of a letter sent by the Delegation on July 17 to Mr. Winston Churchill :—

July 15, 1922.

The Right Honourable Winston Churchill, M.P.,
Secretary of State for the Colonies.

Sir,—With reference to the statement of British policy in Palestine contained in White Paper, Cmd. 1700 and to your Excellency's statements in the House of Commons regarding the pledges given to King Hussein in 1915, I have the honour to put on record the following facts :—

(1) The Arab world is bewildered to see for the first time an official declaration by the British Government that Palestine was intended to be excluded from the Arab independent State which His British Majesty's Government pledged itself to recognise and support. The only reservation made by the British Government was the portions of Syria lying to the west of the districts of Damascus, Homs, Hama and Aleppo, and a glance at the map shows that by this was meant the Syrian littoral, Palestine which lies far to the south clearly not coming within this reservation. The conclusion that this reservation covers the whole of the Vilayet of Beyrut and the independent sanjak of Jerusalem is one that astonishes every Arab.

(2) By the word " district " His British Majesty's Government allege that the word " vilayet " is meant. But there were never any " vilayets " of Homs and Hama, and from this alone it is clear that the word " district " was never intended to mean " vilayet."

(3) If " vilayet " was intended, we should like to know where is the territory to the west of the vilayet of Aleppo. There is nothing as far as can be seen on the map except the Mediterranean, This is another proof that by district the town and not the " vilayet " of Aleppo was meant.

(4) If, as above shown, that by the districts of Homs, Hama and Aleppo was meant the towns and not the " vilayets," it is an irrefutable conclusion that the same thing applies to the vilayet of Damascus.

(5) From a perusal of the various letters exchanged between His Majesty King Hussein and Sir Henry McMahon, it is clear that the British Government never made allusion to Palestine, but only to the coastal districts (coasts) where it was said the interests of France were involved, and in the letter of King Hussein dated January 1st, 1916, His Majesty referred to Beyrut and its coasts from which he said " we avert our eyes," adding that it was impossible " to allow any derogation which gives France or any other Power a span of land in those regions."

(6) The Foreign Office made it clear in a letter to King Faisal (then Amir) dated October 9, 1919, which was published in the Arabic papers, that the towns and not the " vilayets " of Damascus, Homs, Hama and Aleppo were meant. Thus Marquis Curzon writes—" From this correspondence two things are clear. First that the British Government are bound by their undertaking to King Hussein to recognise the establishment of an independent Arab State comprising within its borders the four towns of Damascus, Homs, Hama and Aleppo, and second that His British Majesty's Government made it absolutely clear to your illustrious father before the entry of the Arabs into the War that they regarded France as having special rights in the area west of the four *towns* " (italics not in the original).

(7) Again, as regards the Sykes-Picot Agreement, this, as your Excellency knows, was a secret arrangement of which the Arabs had cognisance during the War only through Jemal Pasha, who had it from the Bolsheviks. King Hussein at once vehemently protested, and the following answer was then received from the British Government :—

> " Bolsheviks found in Petrograd Foreign Office records of conversations and provisional understandings (not formal treaty) between Britain, France and Russia made early in the war to prevent difficulties between the Powers in prosecuting the war with Turkey. Jemal either from ignorance or malice has distorted its original purpose, has omitted its stipulations regarding consent of the native populations and safeguarding their interest and has ignored fact that subsequent outbreak and success of Arab revolt and withdrawal of Russia had for a long time past created a wholly different situation."

This is an argument in our favour and cannot be reconciled with Your Excellency's statements in the House of Commons on July 11 last. If Palestine was excluded, why did the British Government return the above answer when they might have said quite simply that the agreement only concerned districts which were excluded from the purview of the Arabs ?

(8) With regard to the Amir Faisal's statement, which Your Excellency brought forward in the House of Commons on the same date, again this redounds in favour of the Arab case. When the Amir Faisal came to London in 1921 and heard for the first time that His British Majesty's Government did not intend to include Palestine in the regions marked out for the Arab State, he said that, while he naturally accepted the British Government's affirmation of intention, nevertheless he wished to emphasise strongly that neither His Majesty King Hussein nor any Arab had ever interpreted the pledges to exclude Palestine, and furthermore that they could never be so read.

(9) Thus I hope it is clear to Your Excellency that the answer you have made in the House of Commons on July 11, as regards the *bona fides* of King Hussein and his advisers does an injustice to His Majesty and to the whole Arab people.—I have, etc.

PRESS ON THE NEAR EAST.

In consequence of inquiries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

The New Egypt.

The *Glasgow Herald* of July 19, in an article upon " The New Egypt," remarks that the present condition of Egypt is none too pleasant :—

> It is very evident that the transitional stage through which Egypt is passing is, as stages of transition commonly are, rather uncomfortable ; and recent despatches go to show that the discomfort is by no means strictly confined to either foreign residents or the Egyptian population. A few weeks ago the burning question at Cairo was the situation which had developed in consequence of the Egyptian Government's abrupt dismissal of nineteen foreign officials from the Irrigation Department. Negotiations for the regulation of the position of British officials in the Egyptian services had been proceeding, and Sarwat Pasha, while postponing the ratification of a compensation scheme till the assembly of the Egyptian Parliament, had promised that no foreign officials should be dismissed. Notwithstanding this, the above-mentioned clearance was made from the Irrigation Department, and in spite of the fact that most of the dismissed officials held contracts for further extended service no compensation was to be forthcoming. Feeling on the subject naturally ran high among the British, French, Italian, Swiss, Greek, and other communities represented among the aggrieved parties, and under diplomatic pressure the dismissals were withdrawn. But the incident created an unpleasant impression of the Egyptian Government's idea of justice, and will certainly not smooth the path of those who will later have to discuss the abolition of that singular charter of foreign rights in Egypt, the Capitulations.

The writer of the article proceeds to state that " a still more solid obstacle to the withdrawal of the Capitulations is the prevalent tendency of lawlessness, not only in Cairo and Alexandria, but also in the provinces," and his inference is that "nothing practical is likely to be accomplished until the provincial administration is reorganised on a non-political basis." He concludes :—

> It is perhaps natural that the educated classes of a nation which has so recently been given the chance of governing itself, and which is panting for still more complete independence, should regard politics as a primary consideration. This may account for the fact that, while such a large part of Egypt is in a terribly lawless state, the Capital is deeply preoccupied with such political problems as, for instance, the vexed question whether the Egyptian minorities—Copts, native Christians, and so forth—should be guaranteed proportional representation in the Egyptian Parliament, a proposition to which the Mohammedan majority of the Constitution Commission is said to be strongly opposed. Important as such questions may be—although in this case a decision might well be deferred until the British and Egyptian Governments can discuss it next year in connection with the whole reserved question of the status of minorities in Egypt—it is obviously a little futile to allow serious controversies on political subjects to obscure the fact that what the great bulk of the Egyptian people needs far more than political privileges is better security from terrorism, coupled with improved opportunities for acquiring some sort of education. Amid all the noisy talk about Egypt's political present and future, the unsettled condition of the provinces is in danger of being overlooked, while the miserably low standard of literacy—according to the 1917 census less than eight per cent. for any country area and hardly five per cent. for the most advanced district, foreigners included—is consistently ignored.

Italy and the Mediterranean.

In the *Spectator* of July 8 is an article upon "The Delicate Problems of the Mediterranean." It refers in puzzled terms to the reticent way in which Italian interests in the Mediterranean were recently discussed in London, and continues :—

> As Italy is a great Mediterranean Power there is no Mediterranean question which does not concern her. But the same thing is true of France. It is also true of Spain. And as for ourselves, we are as much interested as anybody else, because we hold the gates of the Mediterranean and our ships trade from end to end of that great "middle sea." The last thing we want to do is to make accusations without justification. A warning in time, however, may prevent the possibility of there being any ground for accusations in the future. It is desirable, therefore, continually to bear in mind that there are many parties to the Mediterranean problem, and that we ourselves are one of those most directly interested. Such prolonged negotiations as have been going on with Signor Schanzer suggest that bargains are being made. We can only guess at their nature. Leaving the Turkish question aside for the moment—a question in which France is as much interested as Italy and perhaps more—we may say that the only real British interest in the Mediterranean is our right to trade freely by sea. That right can hardly be brought into question. It is immemorial, and our holding of Gibraltar and Malta and the Canal has long been the outward and visible sign of the importance we attach to its full maintenance. There is no manner of dispute that we know of between ourselves and Italy which could justify us in tying our hands commercially as the price of a settlement. There is no concession that Italy could make, either material or moral, which would balance a surrender by Great Britain of rights of commerce.
>
> We are conscious of having stated the case in the plainest and hardest terms of business, but it is not, of course, in such a spirit that we should wish to deal with Italy. We have, however, a very good reason for writing thus. Every educated British man and woman is the friend and the admirer of Italy. Italy has struggled courageously through very dark and trying times and every Englishman would feel a sense of personal pain and loss, if the light of Italy were to shine dimmer because her friends were not willing to help her to tend her lamp. We must help her now and always. We write then, with the profoundest desire to be friendly to Italy when we say that it would be doing her a very bad turn indeed if the British Government came to any arrangement with her which would provoke the resentment or even the mistrust of other countries. It would be doing her the worst turn of all, if those British traders who now delight to pay their tribute of esteem and regard for Italy were driven to a change of attitude.
>
> It is well known that Italy has helped the Turks with materials of war and that she has made a secret arrangement with them, involving transactions in Anatolia of which we do not yet know the details. All that is no more in accordance with the spirit in which the Allies ought to settle the Near Eastern question than was the secret treaty between France and the Kemalist Turks. Italy has acted in this way, of course, not so much because she likes the Turks as because she dislikes the Greeks. Then again, there is a strong movement in Italy to gain control of one of the Holy Places in Palestine—the Coenaculum or traditional site of the Last Supper. The strength of this movement is explained by the formidable size of the Clerical party in the Chamber. This party naturally co-operates with the Vatican, and the Vatican is anti-Jewish. We cannot, of course, object when the Vatican and the Clerical party display their antipathy to Zionism in Palestine—rather, we sympathise with them—but none the less, the fact that a great and energetic political party in Italy, backed up by the Vatican, is annoyed by the Palestinian policy of Great Britain is one of those unnecessary complications in which we have become involved. The Arabs in Tripoli are an intermittent source of great anxiety to Italy, and it is conceivable that Signor Schanzer has represented that the British scheme of settlement in the Near East makes the relations of Italy with her Moslems very difficult, if not impossible. The answer of the British Government may have been to attempt to soothe Italy and secure her consent by making her a present of advantages which have no strict relation to the political problems of the Near East. As we have said, we are only guessing and trying to account for a certain misgiving which has already come to the surface in this country. A French statesman said of Macedonia: "*La question de la Macedoine, c'est une macedoine de questions.*" If that was true of Macedonia it is a hundred times more true of all the countries which cluster round the Mediterranean, with their amazing variety of problems racial, religious and commercial.
>
> It would be intolerable if the nation found itself hampered and harassed by commitments made in its name almost before it was aware that the cloud had been forming on this doubtful horizon. We hope that the Government may feel able to make some statement, not necessarily about the details of the conversations with Signor Schanzer, but about the general issues. Above all, we should like to suggest that there should be a comprehensive discussion of Mediterranean affairs. Nobody wants another of the long series of great conferences. But France and Spain must not be given even a plausible pretext for saying that the case has gone against them in their absence, and we must never forget that the mercantile community of Great Britain is vitally concerned in all Mediterranean bargains.

KNOSSOS EXCAVATIONS.

At the annual general meeting of the British Academy, held recently, it was resolved, on the motion of Lord Balfour, to send a message of cordial congratulation to the Asiatic Society of Paris, which was celebrating not only its own centenary, but also the centenary of Champollion, the discoverer of the key to the Egyptian hieroglyphs. By a happy coincidence his lordship welcomed Sir Arthur Evans, who had just returned from four months' renewed excavation at the palace site of Knossos, Crete, and asked him to give a brief statement of his most recent discoveries.

Sir Arthur Evans illustrated his results by plans, photographs, and drawings. Amongst the new features brought to light was part of a grand staircase in the west wing of the building, fresh arrangements connected with the State entrance, and a great bastion on the north. The most surprising developments, however, occurred within and about the south-east angle, connected with a great earthquake to be dated about 1600 B.C. Early houses near the palace walls had been overwhelmed by these huge blocks and afterwards filled in, after an expiatory sacrifice of bulls, of which traces remained. A mass of interesting relics was found in the filling and beneath, including some of the finest polychrome vases yet brought to light, and a terracotta figurine of a youth of great artistic value. Beneath the palace angle itself, which had fallen in owing to the catastrophe, appeared an earlier rock-cut vault, and leading from it an artificial cave, with a kind of lair as if of some great beast. It was impossible, remarked Sir Arthur, not to recall the story of the Minotaur, which has haunted this site through all succeeding ages.

The number of persons incarcerated in India for political offences, exclusive of Moplah convicts, is 3,815.

Two men were killed on July 22 by an explosion in a munition barge on the Danube belonging to the Roumanian Naval Department, and an explosion in a motor launch opposite Braila killed one person.

According to reports from Italian sources, a number of Montenegrins, assembled on Mount Lovchen between Cattaro and Cettigne, have revolted against Yugoslav administration.

A new edition of "The Combined Civil List for India" has been issued by the *Pioneer*, Allahabad. This valuable work contains a complete list of persons employed in the Civil Services and higher European services under the Government of India, and includes a full and useful index. The price of the book in England is 0s.

THE REAL 'UMAR KHAYYAM.

"UMAR KHAYYAM." By Masud Ali Varesi. (London: Kegan Paul, Trench, Trubner & Co. 1922. 10s. 6d. net.)

Poetry and the exact sciences stand at opposite poles; the one appealing to man's emotions, the other solely to his intellect. It seems inconceivable that genius in both spheres should co-exist in one individual. Such, however, was the case with that sweet singer of old Irán who is widely known as 'Umar Khayyam. He was a profound mathematician, versed in astronomy, astrology, literature and law. In fact he assimilated all the learning of his age, and yet retained a spark of poetic fire which has given him immortality. He saw the light in 1019 A.D., at Nishapur, in the beautiful province of Kharasán, the son of a tent-maker—Khayyámi—named 'Uthman, from whose avocation he took his *nom de plume*. The first twenty-three years of his long life are a blank for his biographers, but we know that he began to study law and science in 1042 A.D., under a famous Imám of Nishapur. Two fellow disciples afterwards achieved renown in very different spheres; Hasan Bin Saba becoming a thorn in the Crusaders' side as the "Old Man of the Mountain," while Khwaja Nizam-Ul-Mulk rose to high political rank as Prime Minister under the Khalif Alp Arslan of Baghdad. The latter remained a steady friend until his noble life was cut short by Hasan Bin Saba's dagger. He settled a generous income on 'Umar Khayyam, which enabled him to pour forth a stream of scientific works. Amongst them were treatises on Algebra, the Postulates of Euclid, advanced Arithmetic, Astrology and Physics. Their author enjoyed the friendship of princes and the veneration of countless followers during a life which ended in 1123 A.D.

'Umar Khayyam's enormous scientific output has long been out of date, and his fame rests solely on a few *Rubayyat*, or quatrains, which he composed as a relief from the labour of research. They were known to only by a few current quotations until 1857, when a version, printed in Paris, attracted the notice of Edward Fitzgerald, who had saturated his mind with Persian poetry. Two years later appeared his rhymed translation of the Rubayyat, which is anything but literal, while it retains the aroma of the original verses to an amazing degree. Their agnosticism, which had excited the bitter hatred of Orthodox Muslims during the poet's lifetime, and their unabashed hedonism were quite to the taste of a generation which had lost its illusions. Fitzgerald's *tour de force* has gone into countless editions, and the name of his imitators is legion.

'Umar Khayyam has a sympathetic translator in Mr. Masud Ali Varesi, whose literal rendering of the famous quatrains is prefaced by a scholarly Introduction. For the first time English readers are given a glimpse of the real Umar Khayyam. But Mr. Varesi's commentary throughout is strongly tinged with the Sufi doctrines; he reads symbolism into poetic outpourings which bear a less cryptic meaning. The poet's partiality for wine, he writes:—

> has led many to believe that he did enjoy the bitter but delightful draught. The majority of thinkers, however, conversant with Persian poets and their manners of thought, confine his poetical writings to divine approaches only. The pleasure drawn from, and the advantages of wine are undeniable, but its mischief is far greater. Applying it to the Divine Love it is all virtue.

This interpretation is not borne out by the following quatrains which summarize 'Umar Khayyam's amiable philosophy:—

> The pious man says that Paradise is worth enjoying with lovely Houris; I say that wine is more entertaining. Take this cash (*i.e.* the present available pleasure) and let that credit go; it is better to hear the sound of the drum from a distance.
>
> They say that drunkards are doomed to Hell; this is a statement untrue and not to be relied on. For if the lover and the drunkard go to Hell, to-morrow you will see Paradise empty, like the hollow of a hand.

'Umar Khayyam stands self-revealed as one who "warmed both hands at the fire of Life," and detested the soul-destroying speculation which too often darken its close.

JOHN MURRAY, ALBEMARLE ST., LONDON, W.1.

POEMS OF THE EAST AND OF HOME.

"VIA TRIUMPHALIS." By Edward J. Thompson. (Oxford University Press. 6s. net.)

The last book of Mr. Thompson's verses that we reviewed, "Vae Victis," was one of high promise. We saw there a poet sensitive at once to the outward imagery of the East and to its inner meaning, a poet whose war experiences in Mesopotamia, Syria, Palestine and elsewhere had definitely helped to mould and had become incorporated in his aesthetic outlook. There was never anything in the charge against him that his verses were purely occasional, the product of fortuitous incident rather than the spontaneous reaction of a sensitive imagination—for that his pictures were drawn with too much keenness and finish in feeling and in craftsmanship. Now in this, his latest book, we see that same sincere imagination at work, now certainly, now adventurously, but generally with equal success.

With an enlarging of the field of his subjects, Mr. Thompson has finely developed his technique. In this volume there are verses of Mesopotamia, of Palestine, of India, and of England; and technically also there is a considerable advance. He has an unusual sense of form, a delicate ear, particularly for remote harmonies, and a decided gift in the use of high and strong language. He was always skilful in employing weighty, considerable words, but they were sometimes inspired by direct indignation rather than the natural eloquence arising out of recollected emotion. He has, for instance, a poem called "The Walker on the Lilies," in which, after showing how Death came from the Mesopotamian sand, with which He fitly consorted, to the flower-studded

Digitized by Google

Jebel Hamrin and to Palestine, he intertwines a sketch of men dying with the names of flowers :—

Nay, but in Palestine,
When tulips were most fine,
When cistus flowered, and iris, when a rush
Of lilies stormed the naked rocks, why, then,
Men must walk on, nor heed the bullet's whine ;
Though a sleeve would flush
With bursting veins beneath, and one would stop ;
And another drop,
With sobbing throat, and blood spurt out and stain
An earth already rich with brightest grain,
All colours, and, poppies' sanguine glow,
And tulips, staring windflowers, red enow.

It is a beautiful poem, from which we should like to quote more. But instead, let us give a very pleasing example, both of his coloured fancy and of technical achievement : it is called " June in Judaea " :—

Now, in this summer's heat
Our hills are withered ; cliff and rocky fell
Shed their brief crowns ; only, beside our feet,
The way's still proud with golden asphodel.

The fairy halberds, thrust
I' the storied turf where Spring encamped so late,
Tarnish, their steel-bright edges burn to rust—
Iris is down, the ridge is void of state.

With golden asphodel
The way's still proud ; but tulip's tongue is dust ;
Red windflower's gone ; and poppy's flames abate ;
On the swaying roads a white dust dances fleet.

Mr. Thompson is extremely responsive to the charms of Nature, and we infinitely prefer his descriptive pictures to his philosophical impressions, which would seem to be as yet immature. There are few men with his extensive knowledge of flowers, of trees, and so on, who can so prettily and unostentatiously incorporate it in their writing ; and we feel certain that his greater gifts lie in the short lyric. How completely satisfying he can be in the miniature will be seen from this, " Damascus Orchards " :—

Lovely with almond blosson and flooded water,
With wind-flushed sheen of swaying orchard-meadows ;
With azure starred of infrequent grape-hyacinth ;
Misted blue with the fig-groves' wintry haze ;
Ruddy with budded apricot ; snowy with apple—
Damascus, now into April glory awakening.

We have no space in which to quote the English and the Indian poems, and so must content ourselves with remarking the delicious freshness and genuineness of the first and the somewhat unexpected presence of a sense of humour in the second.

MUSICAL NOTES.

ON GRAMOPHONE RECORDS.

In the instrumental records there is but one thing lacking, namely, chamber music. Otherwise it is a well diversified list.

Eugene Goossens is heard with the Royal Albert Hall Orchestra in Rimsky-Korsakoff's " Dubinushka " and in Scriabin's " Reverie." The first is a very brilliant affair, full of characteristically masterly scoring, and based on the most intoxicating folk-rhythm. Its dynamic possibilities are very great, and are, of course, never overlooked by Goossens, who in this kind of stuff has no equal among English conductors. Scriabin's " Reverie " is his first orchestral composition, and is not really distinguished. It depicts well enough the dreamy languour of a summer day, intertwining cleverly snatches of wood-wind (excellently reproduced) with the strings ; but its interest is mainly technical, the fondness for the fragmentary phrase which the later Scriabin too much indulged being evident here.

More Russian music is afforded by Albert Coates in Liadoff's " Kikimora." This piece is uncommonly well played, with spirit and mastery. Liadoff is chiefly esteemed as a miniaturist, and here indeed is the very perfection of detail. " Kikimora " is an unmistakably Russian piece of music. For the orchestrated version of Debussy's " Golliwog's Cake-Walk," which is on the reverse side of the Liadoff and is also played by Albert Coates, I do not greatly care, though I am always ready to hear " The Children's Corner " in its original form. In the orchestral transcription it undoubtedly loses in piquancy, and here in addition it lacks deftness and subtlety. Moreover, the complex scoring of Debussy is difficult of reproduction, and there is a certain amount of haziness, and sometimes of obscurity, in this record.

The number of people who like Massanet's " Manon " is still considerable. These should appreciate the selections that De Groot has made with his Piccadilly Orchestra from it.

There are two exceptionally fine violin records in this issue. The first is made by Thibaud from Vieuxtemps' " Serénité." Here the tone of the fiddle is amazingly lovely : the purity and chastity which inform this Frenchman's playing are reproduced in essence. The piece itself has no pretensions to greatness, but the curve of the melody is so classically preserved and poured out with such unaffected beauty that the record is bound to be popular. The second record is made by Isolde Menges and consists of Achron's " Hebrew Lullaby " and Tod Boyd's " Valse Capricieuse." The first piece (which is arranged by Auer) interested me much when first I heard Dushkin play it, and I am glad indeed to have it in permanent form. It is a genuinely Oriental melody, coming, I rather think, from the Yemen, and will at first sound unpleasant to ears unaccustomed to Eastern scales. But the melody grows on one, for Miss Menges, whose accuracy in these Oriental intervals is such as few violinists could rival, plays it very appealingly indeed. The other composition, which is by her husband, is just effective fiddling stuff, with all the ordinary " capricious " tricks, double-stopping, syncopation, and so on. It is played with all point, and, of course, complete mastery.

The one pianoforte record is made by Irene Scharrer, and consists of Sinding's " Rustle of Spring " and some Purcell. Of the Sinding one can say little : it is the show-piece of every youthful school-girl, and its reproduction is chiefly interesting because of the two distinct *timbres* of the pianoforte. But the playing of the Purcell pieces is extremely entertaining. There are three of them, all transcribed, and that with careful and most laudable reverence, by A. M. Henderson :—a Toccata Prelude (from a Suite for Harpsichord), a Sarabande (from the Second Suite for Harpsichord), and a Minuet (made up from the First and Eighth Suites for Harpsichord). It is a most notable piece of work, both in the playing and in the recording. The *timbre* of the instrument is exceptionally well caught : one can now hear vibrations that a year ago were non-existent in pianoforte records. And the playing is full of insight, the various differences of treatment being as interesting as the delightful neatnesses of Miss Scharrer's technique. Without doubt this is a record to obtain, study, and enjoy.

Splendidly clear playing marks the Coldstream Guard's playing of Leutner's " Fest " Overture, but in Weber's " Preciosa " Overture the bad reproduction of the brass mars the effect. Bad brass is the most damning of all curses.

PERSONAL AND GENERAL.

To-day.
July 27 (New Style).
July 14 (Old Style).
Julhijja 2, 1340, A.H. of the Moslem Calendar.
Ab 2, 5682 of the Jewish Calendar.

Lady Marling has arrived from the British Legation at The Hague, and is staying at 8, Lowndes Street.

Prince Nicolas of Roumania ends his studies at Eton this term, and will then return to Bucharest.

General Sir Charles and Lady Monro have arrived at 105, Eaton Place.

Lord Lamington has returned to Lamington from Norway.

Air Vice-Marshal Sir Geoffrey and Lady Salmond have taken 11, Sussex Place, Regent's Park, which will now be their address. (Padd. 2888.)

M. Bratianu, Roumanian Prime Minister, has injured his knee in a carriage accident and has had to go to bed for several days.

The Bulgarian Minister returned to London last week from The Hague, and has resumed his duties at the Bulgarian Legation, 51, Queen's Gate, S.W.7.

M. Constantin Fotitch, First Secretary to the Legation of the Kingdom of the Serbs, Croats, and Slovenes, has returned to London from Belgrade.

Reshad Pasha, the representative of the Turkish Government, gave a small dinner party on July 20 at the Embassy, Portland Place.

The marriage arranged between Sir Arnold Wilson and Mrs. Robin Carver will take place at St. Mary's, Ellesmere, on Saturday, July 29, at 11 o'clock.

Major-General B. H. Deare, I.M.S., and Colonel H. A. Smith, I.M.S., have been appointed Hon. Surgeons to the King.

The King received at Buckingham Palace on July 21 Major W. G. Strover (Officer in Charge) and The King's Indian Orderly Officers and took leave of them upon their return to India.

The marriage of Thomas Grainger Stewart, M.D., F.R.C.P., with Lady Playfair, widow of Sir Patrick Playfair, C.I.E., was solemnized at St. Margaret's, Westminster, on July 20.

Among the guests whom the Duchess of Albany received at Kensington Palace on July 18 were the Roumanian Minister and Mme. Titulesco, and the Afghan and Albanian Ministers.

The engagement is announced between F. Howard Lewis, only son of the late A. H. Lewis, of Lexham Gardens, W., and Mrs. Lewis, of Sidcup, and Mary (Mollie), only daughter of the late T. W. Mellis, of Madras and Mrs. Alex. Lawrie, 33, Bark Place, W.2.

THE PERSIA SOCIETY.

President: Lord Lamington, G.G.M.G., G.C.I.E.

Founded in 1911 to study all questions of common interest to Great Britain and Persia.

Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1.

The engagement is announced between Arthur Geoffrey Wyatt, R.E., son of the late Mr. G. A. Wyatt, of Ceylon, and Mrs. Wyatt, of Bath, and Melville Florence, youngest daughter of Mr. and Mrs. A. L. Plumbridge, of Glenelg, Eltham, S.E.

The King has granted to Mr. Eric Titterton, private chemist to the King of Egypt, licence and authority to wear the insignia of the Fourth Class of the Order of the Nile, conferred upon him by King Fuad in recognition of valuable services rendered by him.

The marriage between James Eliot, younger son of David Norton, I.C.S., C.S.I., and Mrs. Norton, 30, Grassington Road, Eastbourne, and Mona Isabel, younger daughter of Professor and Mrs. Macdonell, Oxford, will take place on September 14, at the Church of St. Philip and St. James, Oxford.

Mademoiselle Nadejda Stancioff, recently appointed First Secretary to the Bulgarian Legation in Washington.

The Afghan Minister held a reception at the Legation on July 20, when those present included the Persian Minister, the Hungarian Minister, representatives of the Palestine Delegation, Lord Headly, Lord Clifford of Chudleigh, Sir Thomas Horner, Sir Denison Ross, and the personnel of the Legation.

On Friday, August 4, the Feast of Eid-ul-Azha Qurban Bairam (in which is commemorated the proffered Sacrifice of the Patriarch Abraham), the second great Festival of the Muslim year, will be kept at the Mosque, Woking. Among those expected to attend, are :— H.E. Reshid Pasha, the Turkish Chargé d'Affaires; H.E. the Persian Minister; H.E. Sardar Abdul Hadi Khan, the Afghan Minister; the Princes of Mangrol; Members of the Riff Delegation; Representatives of the Kings of Iraq and the Hejaz; and Muslims from all the countries of the world.

The engagement is announced between Maung Maung Gyi, his Highness the Maha Min Hla Thugyaw, son of Maung Maung U and Khin Khin, their Highnesses the

Digitized by Google

Maha Min Hla Thugaung of Mandalay, the great grandson of his Majesty the late King Mindon of Burma' and Miss Sylvia Charlotte Helen Forde, daughter of the late Mr. Harry Bligh Forde, A.M.I.C.E., A.M.I.E.E., late of St. Brendon's, Wimbledon, and Mrs. H. B. Forde, of 57, Merton Hall Road, Wimbledon, and granddaughter of the late Mr. and Mrs. Henry Charles Forde and Baron and Baroness von Dieskau. The marriage will take place shortly in London.

A Constantinople Correspondent, writing on July 14, says :—

His Excellency the High Commissioner is away on a private visit to London, but Lady Rumbold and her daughter are at the Embassy's country residence at Yenekeuy, while the Staff of the High Commission are housed on the water's edge a few hundreds yard away.

Our British Consul-General, Mr. A. T. Waugh, C.M.G., is away on leave in England, and during his absence his duties are being performed by Mr. W. D. Matthews, the Consul.

Amongst other absentees is Mrs. W. D. Matthews, who is in Scotland, and who has recently presented her husband, the acting Consul General, with a second son.

The Grand Duchess George of Russia, Princess Andrew of Greece, Princess Nina, Princess Marguerite Princess Theodore, and Prince Chavehavadze dined with the Greek Chargé d'Affaires and Mme. Rizo-Rangabé at Claridge's on July 23. The guests included Admiral and Mrs. Kerr, M. and Mme. Poklewski-Koziell, Viscount Ikerron, Colonel Mayes, Captain A. C. Rewad, and Count Mercati (Marshal of the Court of Greece). The dinner was followed by a small dance, which was attended by the personnel of the Legation. M. and Mme. Ragabé the previous evening gave a dinner party at the Legation, 51, Upper Brook Street. The guests were the Minister of the Kingdom of Serbs, Croats, and Slovenes, Mme. Gavrilovitch, the Roumanian Minister and Mme. Titulesco, Sir Edmund and Lady Wyldbore Smith, Colonel and Mrs. Pretyman-Newman, Count Mercati, M. and Mme. Bikelas, M. Boskovitch, and M. Nicolas Mishu.

Mrs. Woods and Mr. H. Charles Woods were at home to a large party of friends at 171, Victoria Street, on the afternoon of July 20. Among the numerous guests present were :—The Bulgarian Minister and Mrs. and Miss Stancioff, the Georgian Minister, the Albanian Minister, General Haddad (Representative of the King of Iraq), Viscount and Viscountess Falkland, Lady Swaythling, Lady Strachie, Lady Hemphill, Sir Albert Seymour, Mr. Percy White, Lady Grogan, Lady Scott-Moncrieff, Mr. Justice J. E. Marshall (Cairo), Mrs. Archibald Little, Mrs. Costello, Mr. Alex Devine, Captain H. Lyon-Thomson, Mr. G. P. Gooch, Miss Marian Bower, Mr. G. de Wesselitsky, Mr. and Mrs. Leland Buxton, Mr. Roland Bryce, and M. Theodoroff (Bulgarian Minister in Belgrade) accompanied by the Members of the Bulgarian Delegation to the Council of the League of Nations.

OBITUARY.

The death has occurred of Sir George Knox, for many years *doyen* of India's High Court judges. Sir George was Judge of the High Court on the North-West Provinces of India for thirty-two years. He entered the Indian Civil Service in 1864 and became Legal Remembrancer twenty-three years later. He was the author of books on the Criminal Law of the Bengal Presidency, on Civil Procedure, on the Indian Stamp Law, and on the Legal Remembrancer. His Knighthood was conferred in 1906. He held the Indian Service Order, was an LL.D. of Allahabad and a Knight of Grace of St. John of Jerusalem. He married in 1868 Katherine Anne Louise, daughter of Major W. Loch, of the 1st Bombay Lancers.

PRESENTATION TO SIR F. YOUNGHUSBAND.

The American Ambassador (Mr. George Harvey) presented the Charles P. Daly Gold Medal of the American Geographical Society to Sir Francis Younghusband, President of the Royal Geographical Society, in the Chancery of the Embassy on July 18, in the presence of a distinguished company. The medal bore the following inscription : "Lieutenant-Colonel Sir Francis Younghusband, for exploration in Northern India and Thibet, and for geographical publications on Asiatic and African borders of the Empire."

Mr. Harvey, in making the presentation, said that the medal was founded by Mr. Daly, who was President of the Society from 1864 to 1899. It has been awarded on twelve occasions.

Sir Francis Younghusband, replying, said no honour could be greater to an English explorer than to receive the appreciation of his services by the American people. He took this medal as being the embodiment in gold of the warm appreciation that he everywhere received on a visit paid to the United States immediately before the War. Among those present were : Earl Winterton (representing the Secretary of State for India), Lady Younghusband and Miss Younghusband, Sir Maurice de Bunsen, Colonel Sir Charles Close, Colonel Sir Walter Coote Hedley, Sir Frederick Kenyon, Sir Cecil Harcourt Smith, Sir Sidney Harmer, Sir Francis Ogilvie, Sir Sidney Burrard, Rear-Admiral F. C. Learmouth, Lieut.-Colonel E. M. Jack, Mr. Yates Thompson, and Professor C. S. Sherrington.

THE INDIAN LABOUR PROBLEM.

In the world of Indian labour the wind of unrest is again rising after a lull which, short as it was, encouraged some observers to hope that calm had definitely been re-established. We fear that all such hopes must be regarded as illusory. The recent period of storm is no temporary phenomenon, frequent gusts, if not frequent gales, must be expected for an indefinite time to come, and the economic future of India will depend very largely on the action which is now taken by the men who are in a position to exert some influence in the potential centres of disturbance. India has derived many benefits from the fact that organised industries were late in coming: in works-design, in processes, in finance, she has been able to draw freely on the accumulated experience for which Western pioneers had paid so dearly: but in the organisation of factory-labour the experience of the West has not been applicable, and she has had to attack the problem with very little assistance from outside. In England the change which it is the fashion to call the Industrial Revolution came gradually. Production was already to a great extent localised and specialised when the steam-engine became a practical proposition, and in the mining and textile industries employers and workers alike were able to adapt themselves by degrees to the new conditions. In India, on the other hand, the steam-engine found the industrial population widely diffused, and the location of factories was not determined to any great extent by the presence or absence of skilled workers. The initiative came from Englishmen, who naturally started textile and other factories in or near the Presidency towns, while when they were compelled by circumstances to go up country to the mining districts, they found scanty populations, disinclined for work of any description; they had thus, almost from the outset, to depend on labour imported from a distance, and this fact dominates the industrial position even at the present day.

The distinctive characteristic of mine and factory labour in India has so far been its migratory nature. The surplus agricultural workers, who were attracted to new forms of employment, did not come to stay; they worked for a few months under novel and, to them, unpleasant conditions, and when they had made a little money, they returned to their homes, sometimes to spend their savings, sometimes to invest them in the land. The factory is not yet generally recognised as a source of permanent livelihood, but is regarded in the villages rather as a temporary refuge from calamity, and the experienced works manager has learned to forecast the quantity of labour from the seasonal conditions of distant agricultural tracts. For a fluctuating labour-supply of this sort there is absolutely nothing to be said. It means the continued prevalence of low standards of life, work, and moral. The labour may be low paid, but it is never cheap. The individual has no incentive to rise. Increased wages mean only diminished work. Shortened hours bring at the best idleness, but more often dissipation. Workers in the mass can be easily moved to disorder by agitators of the type recently so active, but they have no power of genuine combination among themselves, they can hardly produce a leader of any value, and constructive work among them is rendered practically useless by the constant changes in *personnel*. The pessimists of the West, who preach the danger of Indian cheap labour, could learn the absurdity of their doctrine by a very few hours' stay among the men they fear, and if India had to depend for all time on fluctuating supplies of migratory labour, the industrial future would be very dark indeed. In point of fact, however, this evil system is giving way. In many industrial areas, nuclei of a settled population are already established, children are following their fathers into the factory, and looking to it as a permanent means of livelihood, workers are here and there beginning to try to think, and there is little risk in the prophecy that this change will continue, and probably accelerate, until the conditions in India become comparable with those familiar in this country. The future depends, therefore, less on the amorphous mass of migrants than on these relatively stable nuclei. With the former, effort is almost entirely wasted, but any useful lead which can be given to permanent workers is likely to produce a marked and cumulative effect. The time calls then for concentration in this direction on the part of all who are actively concerned, whether philanthropists, officials, or the welfare-workers now being employed in increasing numbers by the most enlightened industrialists. Their main object should be to establish higher, and steadily rising, standards of work and conduct among the permanent elements of the population, standards which will insensibly influence the newcomers, and will become ingrained in the new generation as it comes forward.

In this undertaking the real difficulty is to make a start. Experience gained in other countries shows that the mountain to be scaled is steepest at the base, and each step forward is easier than that which has just been surmounted, but the initial stage calls for the highest effort of which the leaders are capable. Indians naturally expect the work to be done by the paternal administration on which they have become accustomed to rely; but at this stage Acts and Regulations can do comparatively little, and the recently reported strike against some of the rules initiated at Geneva for the benefit of the workers may well serve as a warning against excessive reliance on the action of the State. It may be possible to lead the workers upwards, but it would be futile to attempt to drive them, and the pace of the leaders must be adapted to the capacities of their followers. It is impossible to withhold sympathy from the enthusiasts who aim at a great and sudden uplift of labour in the mass, but the hard facts of human nature are against them; the start must be more modest, and, so far as we can see, the ultimate object is most likely to be attained by concentrating at the outset on the two ideas of wise spending at the moment, and provision for the needs of the future. At present the worker does not know how to spend, or how to save; he has to learn both, and, as things now stand, spending comes first. Habitable houses are now being provided: the inmates must learn how to enjoy and profit by the new accommodation. Schools are being opened for the workers' children: the parents have to learn how they can be used to the best advantage, so that the children may start where the fathers leave off. What the industrial population most need at the moment is better food, especially for the children, more durable and serviceable clothes, healthy and enjoyable means of spending the leisure now increased by the curtailment of working hours. These are definite lines along which leadership can be exerted, and the result of following them should be that a gradually increasing number of workers will be willing to work rather better, during rather shorter hours, and will spend rather higher earnings in ways which will contribute to increased efficiency. In other words, a solution of the central problem of Indian labour will then be in sight, for the new forces brought into play will be cumulative in their action, and India will have fairly taken the road which has led to such astonishing results in this country and elsewhere. A century or less has seen the Children of Gibeon transformed in political and social worth until they have secured equal rights in the commonwealth they may shortly rule: that is no ignoble ideal to set before the India of to-day.

IN PALESTINE AND SYRIA.

We are indebted to a correspondent for permission to publish the following letter, written from Palestine and describing a journey made, and some impressions gathered, last month. The views expressed are, of course, the writer's, and are not to be regarded as necessarily endorsed by THE NEAR EAST.

Toward the end of May in every year, no matter what country I'm living in, I get a fit of restlessness and I remember that the May Fly is on the water in Shropshire. And as there is no home leave for me this year, I'm taking advantage of the Moslem Feast of Bairam that succeeds the month's fast of Ramadan to go to Palestine and Syria again. There is no part of the Near East that is so instinct with memories of Shropshire as the Crusaders' Country, nor any of the Wars of History save this last one that came quite so home to us as the Crusades.

As I passed through Palestine on the way to Haifa the crops were being reaped, the barley cut and the bearded wheat. One could see Ruth and Naomi in every field, cutting the corn with the sickle and gleaning afterwards as they did in the old Bible story, in the field of Boaz on the southern slopes of Bethlehem. This scene must have been painted a hundred times from the imagination of European artists, but they've never got it quite right. For the women of the East squat on their heels to reap, using the left hand to hold the sheaf and the right to use the sickle. In pictures Ruth is always shown as gracefully bending, but no Arab ever bends. In the East no man ever walks where he can ride, or stands where he may sit, or sits where he can lie down. This is the land of true repose.

But the Palestinian farming would not please any Rector of his parish who is anxious about tithes. For the Arab plan is to have three great blocks of arable land, and to cultivate them, one every third year, leaving the other two great fields lying fallow. And it is the same primitive cultivation as of old; a camel yoked with a donkey to pull the wooden plough. Nor would the crop please you, or pay the rent of arable land in a parish. I judge that for each blade of corn, there are three thistles, five stones and a weed of sorts. In the stone country it is clear that the sickle is the only possible instrument of husbandry. Even the horny Arab hand would flinch at the idea of grasping such a giant thistle as that of Palestine. One wonders that with all these centuries of wasteful farming there is any other crop but thistles. But Nature has settled just how many thistles the land will carry, as if there were too many, they would foul their own ground and die out. The Arab makes no attempt to cut a thistle; he cuts his bearded wheat all round it, and leaves it standing. Now I quite understand the frequent references to thistles in the Bible; as also to the shade of the fig tree. For as all Palestine sleeps from 11.30 to 2 in the heat of the day, it is essential that there shall be one there at least to give the sleeper shade. And the olive tree and the vines give only a poor shelter from the sun.

This is a lovely time of year in Syria and Palestine—in reality one. Only the artificial division to suit the ideas of French and British Mandates makes these countries two. The people are the same; but the jealous claims of Government have actually cut through tribes and even water supplies, and not only robbed the land of its water, but market towns of their markets. Aleppo, for example, by the stupid French agreement with Mustapha Kemal of Angora, is now deprived of all its hinterland and all its trade, and it must either die or be returned to the Turk again.

The glorious spring flowers are now over, and summer's blossoms are here. The fields are thick with "wild carrot" or Queen Ann's Lace and blue Lupins, white Dog Roses in every hedge and all the Cactus in yellow flower.

Jerusalem is beautiful just now, cool and fresh, and the air so clear that one can almost see the Mount of Olives from the Hill of Samaria, nearly forty miles away; and the Mountains of Moab across the Dead Sea are so clear that one can see the scrubby vegetation on their slopes. It was the Feast of Pentecost, and all the Rabbis and the Spanish Jews were wearing their fur-edged hats and coloured robes.

The roadway by the Jaffa Gate, upon which, by the way, the Turkish Crescent and Star are still displayed, was a perfect kaleidoscope of colour. Jews with greasy side curls and brightly coloured robes, not yet accustomed to their new found liberty, still slinking with down cast eye and deprecating air along the pavement; young bold self-assertive Zionist Jews in white shirts open at the throat; Russians in white blouses; bold contemptuous Arabs, with their flowing white head-dresses; Moslem women shrouded in black veils, and passing them the modern young women of Jerusalem in cheap silk stockings and high heeled shoes. Up and down the street the picturesque Palestine Gendarmerie ride upon their grey Arab ponies, or talk to the town police, in khaki and black astrakhan fez. It would be hard to find such a strange mixture of races anywhere, or one so picturesque. The sober khaki of British Infantry or Garrison Artillery, smart and very well set up, takes the evening air along the Jaffa road to see the pretty girls go by. As usual Tommy Atkins is quite inconspicuous, and you would hardly dream that he alone allows all these warring races and creeds to meet and pass in peace. He keeps the peace in all the Near East now; and were it not for him every Jew would have his throat cut in Palestine in half a day, and many a Christian too.

I'm not of the great majority of our people, pro-Arab and anti-Zionist; not that I've got any sympathy to spare for the pushful, arrogant Zionist Jew who now behaves as if he fought and won the battles which freed Palestine and filled the graveyards of Gaza and Beersheba and the Mount of Olives with British dead. We must have a sense of proportion in the matter of who fought and who paid the price. Look at any of the 5,000 graves of Beersheba or Gaza, or the 2,000 in the western slope of the Mount of Olives. Count the Jewish triangles among the crosses on the graves, and you can almost number them on your fingers. The Christian and the British soldier has redeemed the Holy Land and no one else; bear this in mind always, especially when you hear of the Jewish Legion. The Arab Forces of Prince Faisal were mostly brigands and cut-throats, never dependable, always prone to leave the battle, and ever demanding to be paid in gold for the alleged value of their doubtful services. When there was no gold in England in 1916 and 1917, newly minted sovereigns by the million had to be poured into the needy coffers of King Hussein of the Hejaz, before one Arab thief would fight. The Arab demands that Palestine shall be and remain as it was under the Turk; that he shall be free to own this fine fertile land, free to waste it by his spend-thrift and careless farming, privileged to rob, rifle and plunder anyone he likes. That is the Arab point of view; and in spite of the general truth of what I've written, most of our people are pro-Arab. For the Arab can be just as pleasant and charming a gentleman as he is a bloodthirsty brute; and I must confess that, in spite of generations of tolerance to Jews, I find myself sharing the antipathy of the Arab at times.

The point of view of the Jew is that times have changed and there is no rhyme or reason in the Arab's claim to squander all this lovely country. The Jew says, and I'm with him, that Palestine is the inheritance of any man who'll come and work there, and that a backward race can no longer monopolise the earth. If the Jew were more conciliatory and less arrogant and domineering now that his throat is safe behind the British soldiers there'd be no trouble. But the Zionist Commission here is political and no longer religious. Many of the Zionists do not go to the Synagogue any longer; and they are hated by the Orthodox religious Jew, the Sephardim, who lived here before the war under the half contemptuous tolerance of the Turk. The Arab would sell his land to a Jewish Colony to-morrow; he is just as avaricious as every Oriental, but he hates the political Jew like death.

Well, to leave politics and to go on with my journey through Samaria, where I inspected the excavations of the American Archaeologists, and the ruined Temples of

Digitized by Google

the great Herod, one of the greatest of the world's Kings, and on to Nazareth. On the Hill of Samaria under the olive trees upon the terraces the poor Turkish soldier threw away his ammunition as he fled for Beisan and the Jordan, panic stricken, before Allenby's mounted troops in 1918. The roads are wonderful, all newly-built since the War, and as good as the Shrewsbury and Hereford road; though the limestone of the Mountains of Samaria would not bear the heavy traffic that the Clee Hill Dhu stone carries.

At Nazareth we left the road to the Sea of Galilee upon our right and swung left-handed across the Plain of Esdraelon to Mount Carmel and Haifa by the sea. I never quite realised what a sportsman Elijah must have been to run before the chariot of Ahab all the way from Mount Carmel to Jezreel across the plain; at least twenty-five miles I should say. No wonder he ran before the rain clouds burst; for when I was last here in October the cloud no bigger than a man's hand had come over Mount Carmel from the sea and turned the roads of the Plain of Esdraelon into a sea of mud. King Ahab had to be quick or his chariot wheels would have stuck and he'd never have got to Jezebel that day.

As we passed Megiddo and the Pass through which all the conquering armies have come down from the Plain of Sharon across the foot of Carmel into the Plain of Esdraelon, we realised how the Turk had lost the War here because he'd forgotten history. Had Jemal Pasha and Liman von Sanders remembered the road that Sennacherib and Esarhaddon and Nebuchadnezzar and the great Alexander and even Napoleon, only yesterday, had taken, they would have garrisoned the hill top that commands the Pass of Megiddo and kept Allenby's mounted men from getting behind the Turkish Army. As it was, the German Commander just escaped in his pyjamas to the huge delight of all the Turks, who had learnt after four years of war exactly how to hate their German Allies.

From Haifa we took the coast road along the sands of the Bay of Acre, passed the mouth of the Brook Kishon, which is known to all nowadays by the quicksands which have engulfed many a motor car since motors took to this road along the edge of the sea to get to Acre.

In Acre, I think, all the high hopes and all the glory and all the futility and all the quarrels of the Crusaders are epitomised. The Citadel stands to-day almost as Saladin stormed it in the days of our King Richard. In the vaults to-day are stacked great mountains of Napoleon's cannon balls and grape shot as this great adventurer left them when Acre was besieged and taken by our land and sea forces in the days of Abercrombie, when I believe the Gloucester Regiment got its "fore and aft" badge.

From Acre the coast road to Tyre over the rich Phoenician plain runs alongside the old Roman road on which Pompey and Anthony led their armies of old.

(To be continued)

GREEK BRONZES.

A noteworthy bronze statuette, Alexander the Great in the Aegis, has been given to the British Museum by the National Art-Collections Fund. It was bought at the sale of the Fouquet collection which took place at Paris at the beginning of last month. The late Dr. Fouquet was a French doctor, who, says *The Times*, practised at Cairo from 1882 onwards. There he used his good judgment and opportunities to form a collection, of which the Greek bronzes were an important part.

The Alexander was one of the outstanding pieces in the sale-room. It is about a foot high, and represents Alexander erect, with right hand raised. There can be no doubt as to the portrait, with its lion-like mane of hair rising from the middle of the forehead and falling to each side. The king wears what in shape is an ample Greek cloak, supposed to be a Macedonian chlamys. In its fabric, however, it is the divine aegis, the terror-striking attribute of Zeus and Athena. As it is fringed with serpents' heads, it is covereed with feather-like scales, and on the left breast, like the badge on a Garter mantle, is the Gorgon's head, with wings on the temples and knotted snakes under the chin. The type is not unknown, as there is a fragment of a similar bronze in the Berlin Museum, and there are various replicas in limestone at Alexandria and in the Louvre; the pattern would seem to be that commonly current in Lower Egypt. The Macedonian chlamys was used by the Greek rulers of Egypt to indicate their northern origin, and the aegis of Zeus suggested the reputed parentage of Alexander. The subject will be found discussed at length by M. Perdrizet in the "Monuments Piot" of 1913.

Besides this gift from the National Art-Collections Fund, the Museum also acquired several interesting bronzes. The remainder of the group are Hellenistic or Graeco-Roman. A large vase-handle, with a half-length figure of a Maenad emerging from it, offers a striking contrast between the free treatment of the figure and the decorative severity of the volutes and acanthus foliage which connected it with the body of the vase. Another vase handle consists of a head of Oceanus. He has great crab's-claw horns, about which dolphins are twined. These claws meet above, holding a cuttlefish (of which the tentacles alone survive) so as to complete the handle. A third vase handle has in its centre a half-length bust of a nude Egyptian wrestler. A lamp has the unusual subject of the head of a war elephant. The spout, now missing, issued from under the trunk, and the lid took the form of a Greek soldier acting as mahout. A second lamp takes the form of a rat, which must be supposed to be in pursuit of the olive oil at its spout. Finally, mention must be made of a very beautiful design of sprays of vine and ivy issuing from a vase, to form the decoration of a flat handle from the rim of a bowl or dish. The subject is of bronze, but traces remain to show that each cluster of grapes was plated with silver.

IRAQ MILITARY ARABIC.

The Government of Iraq, in the process of forming its own Army, has been confronted with the necessity of creating an Arabic military vocabulary to take the place of Turkish and other foreign terms, and in addition to issuing all manner of military text-books translated into Arabic in which only correctly-formed Arabic words are used to the exclusion of those of Turkish, Persian, or European origin, has adopted Arabic military titles for the various ranks in the Army. According to the *Baghdad Times* these are:—*Al Amid* for General; *Al Fariq al Awwal*, Lieutenant-General; *Al Fariq*, Major-General; *Al Zaim*, *Colonel*; *Al Aqid*, Lieutenant-Colonel; *Al Muqaddam*, Major; *Al Rais al Awal*, Lieutenant; *Al Mulazim al Thani*, Second Lieutenant; *Arif*, Sergeant; *Nqib Arif*, Corporal; and *Jundi*, Private. A regiment is termed *Katibat*, and a battalion *Fauj*.

Trade Revival.

Optimism regarding a revival of trade has been preached for so many months now, that our business community might almost be suspected of having adopted M. Coué's doctrine and of hoping by constant repetition of the statement "Things are getting better" to witness an improvement, while for their own part sitting still with folded arms. But in view of the fact that the bottom has been so completely knocked out of the international exchange of goods, is it to be wondered at that a recovery is proving terribly slow before the share of any one country can assume appreciable proportions? The right policy is, undoubtedly, to regard the interests of all the countries of the world as identical in this particular, and not to imagine that satisfactory results can be achieved by devoting attention to a few countries, while ignoring the rest. By all means let trade within the Empire be pushed for all it is worth; but it would be foolish—and there is not the least need—to lose sight of the time when British manufacturers and merchants will want as much of the trade as they can secure of the potentially greater markets of Europe and other parts of the world.

A Supreme Economic Council.

It is all to the good, therefore, when we hear of a continued and noteworthy increase in the physical volume of production in the United States during June, and of encouraging harvests in the Balkans. Here in Great Britain trade must respond more immediately to conditions in America than to improvements in South-Eastern Europe; but in trade matters to-day *esprit de corps* has to be inculcated in the small countries as well as in the large, because it is only by each one pulling its full weight in the boat that real progress will be made. The greatest misfortune that could have befallen Europe after the War was the discredit that the Supreme Council brought upon itself in the political world. If it had lived up to its proper standard, there might be now in existence an international body capable of commanding respect in the economic world, to which the various countries could turn for guidance and support.

Great Britain's Stability.

No one can seriously challenge the verdict of the British Chancellor of the Exchequer regarding the present position of Great Britain. Possibly if the facts are more widely appreciated, the lesson that they teach will be taken to heart by other nations. Sir Robert Horne considers that the stability and steadiness of this country are unequalled in any other part of the world, while financially we are in a far sounder position to-day than we were three years ago. Great Britain has done more to meet her obligations out of the revenue of the year than any other country of the world, and it is for that reason that our credit stands so high. Probably, if Britain's moral influence over other countries had not been weakened, she would have met with a more general imitation of her financial policy.

Roumanian Finance.

One of the first steps to be taken in any serious attempt to straighten out Roumania's finances was the consolidation of Roumanian Treasury Bonds in foreign hands. The amount involved was in the neighbourhood of £30,000,000, of which more than a third is understood to be held in England. After prolonged negotiations in Paris, London and Bucharest, arrangements have now been concluded for the consolidation of the Bonds on the basis of a £35,000,000 loan at four per cent. interest, redeemable in forty years, with a supplementary loan of £2,500,000 at four per cent. interest redeemable in twenty years. The purpose of the second loan is to cover expenses and to insure the payment of interest for two years. The interest on the Consolidated Loan is to be raised primarily on receipts from export dues, which must be paid in gold. By an arrangement with the National Bank these receipts will be paid into that Bank to accumulate as a special fund exclusively devoted to the service of this interest. Some difficulty is being experienced in France over the matter, as our Bucharest Correspondent explains in a letter published on the next page, but this will not interfere with the loan. It is to be hoped that the export duties on a gold basis will not unduly hamper Roumanian trade.

Indian Tea.

The Chairman of the Indian Tea Association, Mr. Gerald Kingsley, had some interesting remarks to make at the forty-second annual general meeting of the Association. As a result of deliberations with kindred bodies, he was able to state that, although no agreement was reached with a view to restricting crops on a definite basis, it was not anticipated that coarse-plucking would be resorted to in any of the tea-producing countries Consequently abnormal crops, which at one time had been looked for during 1922, need not be expected, and the year's production promises to be less than the average crops for 1915-1919 inclusive. If this forecast is borne out, Mr. Kingsley added, the new season twelve months hence should start with a very much smaller stock of tea than that which is now held. The ordinary tea-drinker will be grateful to Mr. Kingsley for the assurance that the Association did not aim at creating a shortage of tea with a view to forcing up the price beyond a sound economic level. No doubt opinions will differ as to that precise level.

Commerce and Industry.

REPORTS FROM OUR OWN CORRESPONDENTS.

ALBANIA.

Tirana, July 1.

Bitumen Springs at Selenitsa.

The bitumen springs of Selenitsa (twenty kilometres from Valona) have been known and exploited from the time of the Romans. Under the Turkish régime a concession in asphalt was secured by a French company, which during the War made over its rights to an Italian company formed for the purpose of carrying on in the circumstances that had arisen. The Albanian Government refused to recognise its transfer, carried through without its knowledge, and the new Company has been prevented from exploiting the mines and from exploiting the minerals Last week, however the manager of the Italian company visited Tirana and smoothed out the situation by a direct agreement with the Minister competent to deal with the matter Exploitation will, therefore, proceed without interruption.

ROUMANIA.

Bucharest, July 4.

Traders' Debts Abroad.

The Bucharest Chamber of Commerce has finished the compilation of statistics relating to the sums owing abroad in foreign currency by traders and industrialists for imported goods and materials. The aggregate amount reaches about five milliard lei—estimated at the present rate of exchange. The Chamber of Commerce has sent a copy of these statistics to both the Minister of Finance and the Governor of the National Bank.

Bucharest, July 13.

Consolidation of Treasury Bonds.

The formalities connected with the consolidation of Treasury Bonds, as well as the loan of £2,500,000 sterling having been concluded, the representatives of the British financial group left Bucharest for London, where the Banks participating in these operations will give effect to them. It is probable that the new securities will be issued before the end of the month.

The group of French bankers who hold a large portion of these Treasury Bonds are not altogether satisfied that these financial transactions are taking place in London and in £ sterling. They are, therefore, claiming the payment of the bonds in their possession, refusing to present them for conversion into new securities at 4 per cent. redeemable within forty years. They specially object to the rate of the £ sterling being fixed at 50 francs, so that they lose half of the amount owing to them. They claim that for their holdings the new securities should either be issued in French francs, or they should in compensation receive double the amount of the new rente. It would appear that this view is being advocated by Mr. Klotz, formerly Minister of Finance in M. Clemenceau's Government, who happens to be the lawyer of both the French Banque " Le Credit Francais," the chief holders of these bonds, and of Sir Basil Zaharoff of London, the prime mover in this conversion. Mr. Klotz is seeking a ground of conciliation between the two points of view. It is not thought likely, however, that the Roumanian Government will agree to the proposal as propounded by the French interests, as this means increasing Roumania's already heavy burden in this connection.

The local Parliamentary Opposition does not conceal its dissatisfaction with a conversion operation that they consider as onerous, reproaching the Minister of Finance for having shown an excess of pride by offering new securities at par for bonds which were being dealt in at 15-20 per cent. of their nominal value at Western Exchange centres. The adversaries of the Minister of Finance state that it would not have been below Roumania's dignity, if he had imitated the example set by his French colleague, who, when he redeemed the War Treasury bonds, simply bought up successively on the open market at the then current price, which was 40 per cent. below the nominal value, and this without France's credit and prestige suffering in the least.

French financiers have not been long in venting their anger, for they hammered the leu on the Paris Bourse this week until they brought it down to 6.50. Competent circles here, though unpleasantly surprised, are not, however, alarmed at these manoeuvres. They declare that the further depreciation of the leu at the present moment cannot be a true mirror of the economic condition of the country, in view of the fact that the country now enjoys a balanced budget providing for all expenditure including the payment of coupons of debts abroad. Furthermore the collection of revenue exceeds expenditure and Roumania is successfully consolidating her foreign floating debt; last but not least, an abundant crop is being harvested and there is an appreciable improvement in the railway facilities for coping with the crop.

These potent factors, it is argued, cannot be eliminated by gambling on the exchange, and are bound to have a beneficial effect on the rate of the leu, despite any malicious tampering with the natural course of the rate of exchange in Paris.

New Bank Note Issue.

The National Bank has decided to replace by a new issue bank notes of 500, 100 and 20 lei now in circulation, as the present ones are too easily forged. This change will take place gradually, beginning on September 1 and being concluded within three months. By this means the double purpose will be served of freeing the public of spurious notes in circulation and of ascertaining in whose hands are the milliards of bank notes that should be in circulation. The Government is convinced that only a relatively small amount of lei notes are in foreign hands; if this should be so, it will help to prove to the Entente Governments that it is not the superabundance of lei notes abroad that is the cause of the depreciated state of the Roumanian currency, but the unbridled speculation which causes large amounts to be offered by those who do not actually possess them, thereby seriously hampering regular trade between countries. The Roumanian Government hopes on the strength of this evidence to be able to invite the Governments concerned to deal severely with these dangerous and irresponsible elements.

The National Bank has proposed to the Government to mint coins of 1, 2 and 5 lei to the extent of 500 million lei, to replace the respective banknotes in circulation which have deteriorated.

Settlement of Traders' Debts Abroad.

The National Bank has drafted a convention that it is proposed to conclude between the Ministry of Finance and the group of Roumanian banks who will be guaranteeing traders' debts abroad. The conditions on which the guarantee may be given and the category of debtors to benefit by this guarantee, as well as the commission of the banks and their eventual risks and losses are set out. A period of seven years is foreseen for the payment of the debts, the payments varying from 5 to 25 per cent. per annum, so that within these seven years the whole capital as well as the accruing interest will be paid. The debtors benefitting will have to present adequate guarantees of their solvency. The settlement of these debts will be made by means of debtors' acceptances endorsed by the group of bankers and guaranteed by the Ministry of Finance. All these operations will be effected under the aegis and supervision of the National Bank, who will draw up an agreement with the Ministry of Finance assuming the same obligation as taken in connection with the consolidation of Treasury bonds.

The second convention to be drawn up is that between the Ministry of Finance, the Roumanian bankers' group and the foreign bankers' group. This convention will have to be accepted by at least three-fourths of the for-

Digitized by Google

eign creditors. If this majority is not obtained the Roumanian Government will reserve to itself the right to take such measures as it may deem necessary for the protection of its Nationals in face of the monetary financial situation which may arise.

By this arrangement the Roumanian Government purports to obtain for the Roumanian debtor the prolongation of the date of payment of his debt. Only debtors who incurred liabilities before October 1, 1921, will benefit by this convention.

It is reported that these draft conventions have been submitted to the Manchester Chamber of Commerce who approved them in principle, objecting only to a few points of detail. In order to negotiate with the foreign creditors, two representatives of the Bucharest Chamber of Commerce and one from the National Bank will leave Bucharest in the course of this month for Paris, London and Berne, to try to obtain the acceptance of the proposed arrangement.

Sundry News.

The well-known Swiss Chocolate Making Company, "Suchard," has launched a sister concern here with Roumanian and Swiss capital, with the object of erecting plant for the manufacture of all kinds of chocolate wares similar to whose manufactured at headquarter works in Switzerland. The whole of the machinery and skilled labour will be brought from Switzerland. The new Company will enjoy all privileges extended to the national industry of the country, such as reduced rail tariff within the borders of the country, etc. The success of such an undertaking is assured, as its products, which are protected by customs tariff as well, will keep at bay with ease any similar foreign chocolates.

BULGARIA.

Sofia, July 12.

A Further Fall in the Lev.

Once more the lev has begun to fall, and the rate on London, which a few weeks ago was round about 580 to the pound, is now over 700. It is thought that the main reasons for this fall are the cessation of the buying of leva on account of tobacco, and in addition the somewhat unfavourable political situation.

Another Adjudication Postponed.

Reference was made in last week's letter to the frequent postponement of Government adjudications. At the end of June, the Ministry of Railways called for tenders for 500 tons of crude oil. The adjudication was duly held, but a decision has been postponed. One reason advanced is that advices have been received from Germany stating that more favourable prices will shortly be available. This is as may be, but meanwhile the lev is falling and when the adjudication is held again at the end of July, the Government will probably have to pay a higher price than they would otherwise have done.

CZECHO-SLOVAKIA'S IMPROVING TRADE.

The trade returns of Czecho-Slovakia for 1921 show an increase of Kr.692,000,000 in the trade balance in favour of that country as compared with 1920. In 1920 imports were Kr.23,384,000,000 and exports Kr.27,569,000,000—excess of exports, Kr.4,185,000,000. In 1921 imports were Kr.22,435,000,000 and exports Kr.27,312,000,000—excess of expoits, Kr.4,877,000,000.

The increase of deposits in the 364 Czecho-Slovak savings banks amounted to 391.0 million crowns in May

Algeria's crop of cereals for this season is estimated to be quite sufficient for the needs of the population.

Reuter's Budapest correspondent in a message dated July 13 states that a British syndicate is negotiating for the purchase of 25 vessels belonging to the Hungarian Inland Shipping Co., the price mentioned being £75,000.

The one hundred and twenty-ninth half yearly ordinary general meeting of the shareholders of the Ottoman Railway from Smyrna to Aidin, will be held at Winchester House, Old Broad Street, E.C.2. on Tuesday, September 26.

THE ECONOMIC SITUATION IN GREECE.

(We are indebted to the Imperial Ottoman Bank for the following summary of the present economic conditions in Greece.)

The Balance of Trade.

To form an accurate opinion of present trade conditions in Greece it would be necessary to have statistics of imports and exports for the current year; but in the absence of these it is instructive to examine the trend of trade during the last few years. The figures are as follows, in millions of drachmae :—

Year.	*Imports.*	*Exports.*	*Excess of Imports.*	*Remittances from Greeks abroad.*
1918	434	297	137	—
1919	1,608	727	881	250
1920	2,135	683	1,452	900
1921	1,673	817	856	900.

It is obvious that there has been a heavy adverse balance of trade. But it must not be overlooked that the years under review have been years of war for Greece. Owing to mobilisation, production has been considerably reduced and recourse has had to be made to imported cereals. But even in these conditions what has corrected the adverse balance is the invisible exports, and above all the sums of money sent home by Greek emigrants—sums amounting for the years 1920 and 1921 to almost two milliards of drachmae, equivalent to about 78 per cent of the excess of imports for those two years. The sums gained by the merchant marine in normal times must also be taken into consideration; but here again the crisis that has affected the whole merchant service of the world has not spared the Greek.

Other points of interest in the above table are (*a*) the reduction during 1921 by about 41 per cent. of the adverse trade balance, which dropped from 1,452 millions in 1920 to 856 millions in 1921; (*b*) the increase in the exports for 1921, which from 683 millions in 1920 rose to 817 millions in 1921.

This increase is due mainly to the rate of exchange. In spite of this rate it is satisfactory to note a reduction of about 22 per cent. in the imports. This reduction is due: (1) to the weakening in the consuming capacity of the people in 1921 when an increased number of military classes were called to the colours; (2) to restrictions arising from the establishment of control on exchange through the medium of the Consortium of Banks. It is true that this control is far from having been what it ought to have been, but it has not failed, such as it was, to exercise a certain influence.

The Consortium of Banks.

The Consortium of Banks was constituted on May 24, 1921. The contributions made by the twenty-five participating banks amounted to £1,636,519, of which a million sterling was contributed by the National Bank of Greece. From June 1 to December 31, 1921, there were purchased £8,271,620; dollars, 27,327,293; francs, 98,139,239; lire, 63,028,178; equivalent in all to £17,283,811, and making with the amounts contributed by the banks, £18,920,330. During the same period sales were made to the following amount :—

	£
Foodstuffs (cereals)	2,176,264
Service of Foreign Loans	918,063
Various other needs of the State ..	3,394,868
Commerce	10,452,905
	£16,942,100

The amount thus left at the disposal of the Consortium on January 1, 1922, was £1,978,230.

If we turn to what has happened since then, we find that funds were exhausted before the month of June. The banks found themselves unable to sell to trade the exchange asked for to meet the bills of lading that they themselves were holding. A large quantity of goods could not be withdrawn from the Customs and had to be burdened with demurrage, although through no fault of the merchants. A free market for exchange, however, did not cease to operate. As always happens, it was ready to supply the exchange required, but

Digitized by Google

naturally at rates appreciably higher than those fixed by the Consortium. But the Consortium was not in operation during the second half of June.

Towards the end of the month it was reconstituted, with the following contributions :—

	£
National Bank of Greece	200,000
Bank of Athens	60,000
Commercial Bank of Greece	20,000
Ionian Bank	15,000
Popular Bank and General Bank ..	10,000
Other Banks	30,000
	£335,000

To this amount has to be added £1,000,000, representing the Government's contribution. The contributions were smaller than on the first occasion; but, as an offset, the control over imports will be much stricter. Draft laws have been laid before the Chamber entailing a considerable increase in existing import duties, and above all on articles of luxury such as: scented soaps, silks, hats (men's and women's), pianos, preserved foods, caviar, cocoa, benzine, wines and spirits, carpets, embroideries, silk goods, safes, motor-cars, toys, fire-arms, precious stones. A few examples will suffice to show the hxtent of some of the increases: thus the duty on caviar eas been raised from 17.50 drs. to 188.60; on silk-Soods from 231 drs. to 1,155; on toys from 31.30 drs. to 346.50; on hats from 5 drs. to 40. It is also proposed in the draft laws that the importation of the following articles should be entirely prohibited for six months :— woollen goods, cambrics, ready-made dresses in cloth or silk, christening robes, ladies' decorated hats, artificial flowers, ornamental feathers, china lamps, glassware, jewels and sweets.

The tax on petrol in the new territories has been raised and made equal to the tax in Old Greece.

What is to be regretted is that once again, in spite of past experience, the Consortium has fixed the rate of exchange instead of allowing it to be regulated by supply and demand.

Production.

The chief articles of export are tobacco, currants and olive oil. The quantity of tobacco grown in 1921 was 24,000,000 okes (oke—$2\frac{3}{4}$ lb.). This year it is expected that there will be 27,000,000 okes, of which ten million will be consumed in the country. The principal markets for Greek tobacco are the United States, which import the best quality, and Germany for the inferior grades. The price last year ranged from 12 to 80 drachmae according to quality. This year the prices will probably be higher, in view of the fact that last year's harvest has been disposed of entirely. But it is impossible to say even approximately to what extent exchange will benefit by sales abroad.

In the case of currants the value of the exchange obtained between September, 1921, and June, 1922, from the sales amounted to £5,000,000. It is still too early to say what kind of harvest there will be this year. It is estimated, however, that it will be 15 per cent. lower than that of last year.

Although cereals do not add to exports, the fact that, whenever the harvest is deficient, recourse has to be had to imports suggests the influence that the harvest may have on the course of exchange. It is too early for exact figures. It is estimated, however, that this year's harvest will be only 40 or 50 per cent. of last year's. To meet the deficiency late sowings were made in May. If they are favoured by the weather and if the maize crop, which is being cultivated on an intensive system, is good, there is some hope of a considerable reduction of the deficiency in question.

Financial Situation.

Up to December, 1920, the monetary circulation of Greece was regulated by a law of 1910, which apart from 49 millions of drachmae circulation on State account and 763 millions on that of the National Bank of Greece, imposed on the latter the obligation of making the issue of bank notes subject to the provision of cover in exchange or in gold. Between May, 1917, and November, 1920, the National Bank increased, under this law, its total circulation from 640 millions drachmae to 1,479 millions. The Allied Treasuries had, in effect, opened in favour of Greece the following credits, which the Government handed over to the National Bank according to its requirements :—

	Credits Opened.	*Balance unpaid November, 1920*
Great Britain ..	£12,000,000	£5,000,000
United States ..	Dol. 48,000,000	Dol. 33,000,000
France	Frs. 300,000,000	Frs. 300,000,000

The London Conference of December, 1920, having agreed upon an economic blockade of Greece, the latter could not avail itself of the unpaid balances. The consequence has been that the cover for the National Bank's circulation was all at once considerably reduced. The law of 1910 had ceased to operate. On the eve of the Forced Loan in April last the note circulation amounted to drs. 3,200,000,000.

The economic blockade and the prolongation of the war have resulted in the ruin of Greek exchange, as the following table will indicate :—

	At date 20.11.20	*At date* 30.6.22.	
Currency.		*Consortium Rate.*	*Open Rate*
Dollars	11.15 ..	31.78	39.50
Sterling ..	39 ..	140	180
Francs	68 ..	266¼	340

Owing to the absence of official information it is not easy to give exact figures regarding Greek finances. According to M. Diomedes, a former Minister of Finance and an ex-Joint-Governor of the National Bank, Greece's public debt stood on January 31, 1922, as follows :—

	Drs.
(*a*) Foreign Loans, £80,000,000 at 97 drs. to the £ ..	7,760,000,000
(*b*) Loans Consolidated or otherwise	1,546,000,000
(*c*) Floating Debt	527,000,000
(*d*) Circulation at forced rates ..	2,038,000,000
	Drs. 11,871,000,000

This sum at the rate of 140 drachmae to the pound sterling at June 30, 1922, would give a total of drs. 15,311,000,000.

M. Diomedes admits that he is not able to guarantee the exact accuracy of his figures and adds that they are probably under-estimated. An outstanding feature of the above table is the importance of the foreign debt, more than half of this is due to the late war and has not yet begun to bear interest. On the day when it does begin to bear interest the repercussion on Greek finances will be great.

We may add here the Budget (in millions of drachmae) for the year 1921-22 as compared with that of the previous year.

	Revenue.		*Expenditure.*	
	1921-22	1920-21	1921-22	1920-21
Ordinary	713	515	1400	881
Extraordinary	88)	654	1997	1572
Loans	918)			
	1719	1169		
Deficit	1678	1284		
	3397	2453	3397	2453

Comment is needless. It was the state of affairs that decided the Government to increase taxes. Draft legislation to this end, over and above what has already been mentioned, has been submitted to the Chamber. As the floating debt was owed for the most part to the National Bank, whose available funds were thus immobilised, the Government proceeded to make a forced Loan of 1,600,000,000 drachmae by cutting in two the Bank Notes in circulation, of which one-half represents money in circulation to the value of one-half of the whole Note, and the other half a provisional voucher of the Forced Loan. Foreigners were exempt from this loan. The financial stringency which resulted and a certain lack of confidence have had the effect of depreciating the provisional vouchers of the Forced Loan to an extent of something like 40 per cent.

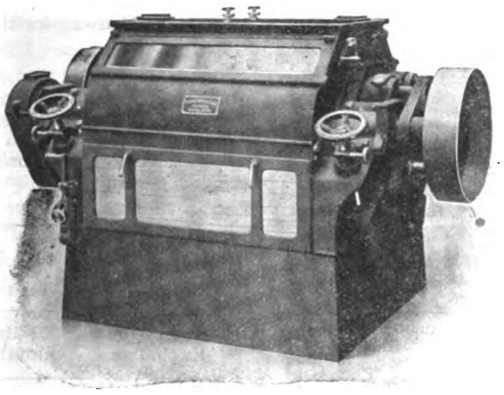
Engineering Topics.

By Our Engineering Representative.

Flour Milling Machinery.

Messrs. F. Robinson & Son, Ltd., of Rochdale, exhibited at the Royal Agricultural Show at Cambridge a standard range of modern flour milling machinery, which combines efficiency with excellent workmanship. One of the most interesting exhibits was their famous Koh-i-noor purifier type (GPm), and the high efficiency which is obtained with these machines for the purification of middlings has given them a very wide reputation amongst millers, the present type combining all the most approved ideas for good purification. An entirely new type of deflector was introduced which can be raised in less than half a minute whilst the machine is in motion, and also a new method of tightening the continuous silk cover in such a way as to avoid puckering. The eccentric shafts are also mounted on double row self-aligning ball bearings.

Their latest type (GEm) double diagonal roller mill also attracted my attention, and I am able to give an illustration of it. As a machine for accuracy, true grinding, solidity and high-class finish, it has, I think, no equal. Its patent combined micrometer adjustment renders the accurate setting of the roll an easy matter, and the patent automatic feed mechanism ensures an



A Robinson Double Diagonal Roller Mill. (Type GEm.)

even feed from end to end of the roll. This machine should prove indispensable in the Near and Middle East.

Stone Separating Machines.

Another excellent machine on view was the auto-balance free-swinging plansifter (GSm) two outstanding features of which are its absolute freedom from vibration, and its perfect mechanical construction resulting in smooth running. An interesting and very efficient device for propelling the stock is fixed just above the surface of the silk, making it impossible for the machine to become choked up. The sieves are most reliable and durable, being so arranged that they can be easily removed when necessary. The "Mersey" vat stoner type (GJm) is a new machine used for separating the stones and fine sand from wheat by means of gravity, assisted by the action of water. This machine was effectively combined with a washer and rinser type (GNm) and is designed to treat every class of wheat. In the stoning operation a good feature is the thorough immersion of the wheat in water. The whole combination is exceedingly simple and easy to handle. Messrs. Robinson are rapidly becoming famous for their cyclo-pneumatic process, and the C.P. separator type (Om) for grain cleaning. This machine has a powerful aspirator and dust collector combined. There is absolutely no escape of dust and by its use all dust collectors, and large, unsightly air trunks are dispensed with. The machine is fitted with self-lubricating bearings, and is finished throughout in a most durable manner.

An important fact to every miller is the sending of a well conditioned feed to the first break roll, and Messrs. Robinson have designed their (GCm) radiator conditioner with this end in view. This machine rapidly conditions and renders uniform almost any mixture of grain which has been previously washed or damped. Efficient deflectors are arranged so that every grain is brought into contact with the radiators, and an even temperature is maintained throughout. Another good point in favour of this conditioner is that it is remarkably easy and economical to erect.

The "Glasgow" Farm Tractor.

A tractor which has already found its way into the Near and Middle East, but which might be made better known there with advantage, is the "Glasgow" tractor made by Messrs. Wallace (Glasgow), Limited. One of the advantages claimed for it is its peculiar adaptability to, and wide range of usefulness in, the many general power requirements encountered in and about the average farm. One man can operate a 25 h.p. tractor which has the pulling capacity of eight or more horses. It is also comparatively simple in design; all working parts are enclosed and fully protected from dust, and there are only five grease cups requiring attention.

Pneumatic Tools.

The production of tools working on the compressed air system has lately been receiving considerable attention on the part of British engineering firms and in a measure, the efficiency of these tools has been brought home to Londoners by the extensive use which has been made of them in the recent street repairing operations.

Certain features, from an engineering point of view, are particularly desirable in pneumatic drill construction, chief amongst which are a large exhaust port area and a low air consumption in regard to the work done. It is also advisable to have as large bearing surfaces as possible for all working parts, and all these together with the valve gear should be effectively lubricated. The appliance must give out sufficient power and at the same time its weight must be reduced to a minimum commensurate with enabling the operator to maintain a stable speed during the maximum penetration suitable for the twist or the other type of drill used. In tools of this type naturally air leakage has to be guarded against carefully, and provision must be made for adjustment without frequent renewal of parts. In some types the machine is provided with a control valve of the taper plug variety, the outer sleeve of which is made of gun-metal operating on a stainless steel taper spindle and held in proper contact by a spiral spring which automatically adjusts any wear. There should be a large future for pneumatic tools as they are not only reasonable in cost, but are highly efficient, and can be used anywhere where a suitable air compressing plant can be laid down.

Stock and Share Markets.

TOBACCOS BUOYANT.

Oils Weak.

(From Our Own Correspondent.)

London, Monday Evening.

A good tone has been maintained throughout the past week, except in the case of the Oil market, which has been badly affected by the reduction in the price of American crude oil. The outstanding feature has been the demand for investment business, which owing to the withdrawal of money from deposits, has advanced rapidly. There is a tendency to believe that the reparations question will eventually be arranged for the best, and Continental exchanges have in consequence been less jumpy, apart from the Italian.

Gilt-edged Strong.

With the exception of a slight reaction which occurred at the close of this week, the gilt-edged market has remained strong. Consols show a gain of 5-8 at 59½, but the Conversion Loan has lost 3-16 at 77.1-16. War Loan Fives have moved up ½ at 100.11-16. Indian stocks have again shown an upward tendency. The seven per cent. loan shows a rise of 2½ points at 120; the 3½ per cent. loan has gained 1¼ at 68½, while the 3 per cent. loan is 1 up at 59½. Further advances are to be noted in foreign stocks. French War Loan Fives show an improvement of 2 points at 39¾, while the 4 per cents. are 1¾ stronger at 31½. German 3 per cents. have shed ¼ at 2.1-8, while Czecho-Slovak 8 per cents. have dropped 1½ at 91½. Russians have advanced a little. Turkish Unified have been weak, and have shed 2½ at 34, while Greeks also show a decline at 35; a loss of 1 point. Peruvian Governments 5½ per cents. show no change at 93. Mexican Government Bonds have been steady the 5 per cents. being 1 down at 65 and the 6 per cents. unchanged at 66.

Industrials Buoyant.

The Industrial Group have been active, buoyancy being especially noticeable for Tobaccos. Bats have gained 6s. 6d. at 84s. 6d., while Imperial Tobaccos have risen 2s. 9d. at 66s. 9d. Textiles are harder. Coats are 3s. up at 64s.; Courtaulds are 9d. firmer at 51s. 9d. Dunlops have remained steady at 8s. 9d. Iron and Steel shares are irregular. Vickers are unchanged at 13s. 6d., while Guest Keens are 3s. harder at 34s. 9d., but Armstrongs show no change at 17s. In Indian Railways Bengal and North Western are 5½ up at 134½, Bengal Nagpur at 98½ shows a rise of 1 point, while Madras and Southern Mahratta are unchanged at 103½.

Oils Dull.

A dull tone has spread over the Oil market this week, owing to the various rumours from America concerning the Mexican oil position. Anglo-Persian Ord. show no change at 5, as also Burmahs at 5.3-8. Mexican Eagles have dropped 1-16 at 3.1-8. Trinidad issues have been variable. Apex are 1-8 up at 2.1-8, Centrals are 5-16 down at 1.5-8, while Leaseholds are unchanged at 1.1-8. Among Egyptians Anglo-Egyptian B are 1-8 down at 1.3-8, while Oilfields of Egypt are 1s. lower at 3s. The Roumanian group have declined all along the line. Phoenix are 9d. down at 26s. 6d.; Dacia Romanos have shed 1-8 at 1; Steaua Romanas at 10s. 6d. have cast 6d. Roumanian Consolidated have declined 1s. 3d. at 17s.

Banks Variable.

Unsteadiness has prevailed throughout. Chartered of India shows a rise of ¼ at 18, while National of India have lost 1 at 43¾. P. & O. Banks are 3-16 higher at 13.3-16, while Bank of British West Africa are unaltered at 4¾.

Egyptian securities continue to remain firm all along the line. Aboukirs are steady at 21s., Beheras at 8, Egyptian Markets at 21s. 6d., and Gharbieh Lands are firm at 1¼.

In shipping securities P. & O. Deferred have gained 1 at 304; Cunards are steady at 19s. 6d., as also Furness Withys at 31s.

The traffic receipts of the Smyrna-Aidin Railway for the week ended July 15 amounted to £5,920.

Holders of Madras and Southern Mahratta Railway Co., Ltd. debenture bonds to bearer falling due on August 1 next are informed that the directors are prepared to renew such debentures at £97 17s. 6d. per cent. for a further period of four years, with interest at the rate of 4½ per cent. per annum.

COMPANY NOTES AND REPORTS.

East Indian Coal.

The Profit of the East Indian Coal Company for the half-year ended April, 30 1922, after making the usual allowance for depreciation of buildings, plant and machinery, was £7,447, plus £2,529 brought forward, making £9,976. The directors recommend a dividend of 5 per cent. for the half-year, less tax, carrying forward £3,976. The output was 304,554 tons, compared with 257,415 tons in the corresponding period of the previous year. The total output for the year ended April 30 last was 579,853 tons. Stocks of coal are exceedingly heavy, owing to the railway strike, which lasted for two months, demoralising all traffic and practically stopping the loading of coal. Coal cutting machines have been working throughout and are largely contributing to increased raisings, sufficiently so to justify these machines having been installed at both Bulliari and Jealgora. The prospects for the current half-year are promising better.

East Indian Railway.

The report of the East Indian Railway Company for the year ended March 31 shows that the capital expenditure was Rs. 2,65,50,765. The gross receipts were Rs. 13,77,61,804, and the net earnings were Rs. 5,12,34,164, a decrease of Rs. 1,74,74,922. After providing for all annuity interest and other charges, the net revenue showed a surplus of Rs. 1,06,31,212. The surplus profits are, however, calculated on the working of the railway for each half-year, and inasmuch as the surplus profits for the half-year ended Sept. 30, 1921, exceeded the above amount for the whole year by Rs.16,19,522,there is no surplus in respect of the half-year ended March 31, 1922. In this circumstance the directors recommend a payment from the balance in the surplus profits account of a dividend of 10s. per cent. This, with the guaranteed interest of £2 per cent. for the half-year and 5s. per cent. received in respect of income-tax, makes a total distribution of £2 15s. per cent. for the half-year. This makes a total of £1 15s. per cent. for the year, and with guaranteed interest gives a return of £5 15s. per cent. to Deferred Annuity Holders, and holders of Annuity Class D.

Hobbs, Hart.

The report of Messrs. Hobbs, Hart & Co., Ltd., for the year ended March 31, states that the balance brought forward, after paying the Preference and Ordinary and interim dividends for the year ending March 31, 1921, was £7,785 0s. 8d. The profit this year is £5,820 8s. 7d., after charging £500 for buildings and leases redemption and making reserves for depreciation of machinery, plant, patterns, tools, etc. This added to the amount brought forward from last year, £7,785 0s. 8d., shows a total of £13,605 9s. 3d., out of which the board recommends the payment of the preference share dividend of 5 per cent. for the year, and a dividend on the ordinary shares at the rate of 8 per cent. per annum, leaving a sum of £7,905 9s. 3d. to be carried forward.

COMMERCIAL BREVITIES.

According to information from well-informed quarters, says Reuter's Sofia correspondent, in a recent message, the crop of tobacco for the past year has been almost entirely sold as a result of the large demand from abroad. The annual crop of tobacco of good quality in Bulgaria is estimated approximately at 20,000,000 kilos. and yields approximately to Bulgaria the amount of two milliards of levas per annum.

Reuter's Vienna correspondent in a message dated July 18 states that the Indian Government is about to purchase a large quantity of material for the construction of a new telephone system in India. Tenders have been invited from the great electrical firms, and among those who have sent in tenders are Austrian factories. A British technical expert has been despatched to Austria to make investigations, and to ascertain whether these factories are in a position to carry out any eventual contracts satisfactorily.

Algeria's imports show a decrease of 92,708,000 francs for the first quarter of this year as compared with the corresponding period of 1921. Vegetable and mineral products account for this decrease, the imports of manufactured articles having actually increased by over 50,000,000 francs. As regards exports, there is a total increase in the period of 110,606,000 francs, due to the increase in the export of vegetable products from 172,235,000 francs for the first quarter of 1921 to 290,137,000 francs for the same period this year.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.
(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade. 35 Old Queen Street. S.W.)

Egypt.

Sleepers.—The General Manager, Egyptian State Railways, Telegraphs and Telephones, Cairo Station, invites tenders for the supply of wooden sleepers. September 7.

Telegraph Poles.—The Superintendent of Stores, Egyptian State Railways, Telegraphs and Telephones, Cairo, invites tenders for the supply of telegraph poles. August 10.

Money Safes.—The Central Stores, Ministry of Finance, Cairo, invites tenders for the supply of iron money safes. August 19.

Towing Tugs. — The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of two towing tugs. August 15.

Pneumatic Installation.—The Director-General, Mechanical Department, P.W.M., Cairo, invites tenders for the supply of pneumatic installation for the Government workshops, Bulaq, Cairo. August 16.

Bulgaria.

Drilling Machines.—The Bulgarian State Railways invites tenders for the supply of electric hand drilling machines and spare parts. Tenders should be addressed to the Direction Générale des Chemins de Fer Bulgars, Sofia, Bulgaria, and a Deposit of 5 per cent. of the value of the offer is to accompany the tender. Prices given are to be c.i.f. Black Sea or Danube Port on the Bulgarian State Railways. August 5. (D.O.T.)

The output of the Bulgarian State collieries and private mines during the first half of 1921 amounted to 397,496 tons.

Cotton & Cotton Goods.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, Saturday.

We have again experienced a quiet and featureless week in the market and there has been hardly any improvement in the turnover. Towards the latter end of the week, however, rather more interest was taken by buyers in prices and on Friday more business was done than on any day in the week. A favourable feature is the tendency for stability displayed in raw cotton circles, and if values keep steady then it is probable that more business will be forced out. The general opinion amongst traders is that it should not be very long before a real buying movement commences and when it does come it will not be before its time. Good reports have been received from the weaving centres of Preston and Blackburn but many producers in Burnley are getting short of orders. With regard to cloth no increased activity has been displayed by buyers for Egypt, the Levant, or Constantinople, and only sorting up sales have been recorded Egyptian yarn quotations have been rather firmer but no important sales for home use have taken place. Scattered piece-good transactions have been recorded for India and monsoon news has continued very favourable. China has remained slow. The home market has wanted goods either from stock or quick delivery. American yarn quotations have been irregular and when users have had actual business to place spinners have generally given way.

LIVERPOOL REPORT.

Business Dull.

Messrs. Reynolds & Gibson report as follows for the week ending July 19 :—

The past week has been quiet and almost featureless, as far as this department is concerned. Spinners have generally avoided this market and the enquiry has mostly resulted in "averaging." A considerable falling off in the sales is noticeable and prices have been distinctly easier. Rather more attention has been paid to the better qualities of Sakellaridis, and there appears to be plenty of raw material to meet any enquiry that is likely to crop up between now and the end of the season for these qualities. Large stocks are held both here and in Alexandria,and what would appear to be some very reasonable offers are made from time to time. Uppers also are creeping steadily back to favour, and this rather coincides with the gradual disappearance of the cheaper lines of old crop Tokar cotton, which for some time past have been bought as a substitute owing to their relative cheapness. For some time now it has been difficult to find any Upper cotton grading round about Good Fair, and we understand that in Egypt this cotton is practically non-existent. Now, however, various lots are beginning to emerge from the obscurity of the warehouse, and during the week they found eager buyers at from 14.50d. to 15.00d. per lb. The enquiry for Sakellaridis between Good Fair and Strictly Fully Good Fair has not been quite so marked as has recently been the case, but, per contra, quite a revival has occurred in the demand for low cottons at anything from 3.00d. to 7.00d. per lb. In most cases, however, buyers seem to want the sevenpenny cotton at the threepenny price, or thereabouts, and business is difficult to arrange. Prices in this market show considerable variations for these qualities. A limited trade has resulted in Tokar, Sakellaridis, and Sudan. Very few first-class lots of the former are now available, and the lower qualities show a tendency to stick! C.i.f. business continues on the slow, steady basis to which we have become accustomed, and it is some time now since anything in the nature of a "line" has been booked.

Manchester reports have been quiet and uneventful. India and China are buying practically nothing at the moment. Yarns are inclined to drag, and both spinners and manufacturers appear to be losing ground. The stock in Liverpool is slowly decreasing, but so also are the weekly takings by spinners! Receipts in Alexandria continue on a fairly generous scale; crop reports are favourable; and an increased acreage, which should result in an addition of approximately 25,000 bales, has been officially reported. The one point which has appeared this week to favour the market passed almost without comment. We refer to the amendment to the American Tariff Bill, which has at last been defeated in the Senate. This means that the tariff of 7 cents. per lb. on 1.3-16 inch staple cotton imported into America remains as it was. Barring possible crop scares, we see no reason why, for the immediate future, prices should not remain at much about to-day's level, *i.e.*, Fully Good Fair Sakellaridis 19.75d. Quotations are unchanged on the week, with the exception of Fine and Extra Fine Sakellaridis, which are reduced ¼d. per lb.

THE EGYPTIAN COTTON CROP.

Ravages by Cotton-worm.

(From Our Own Correspondent.)

Cairo, July 13.

The cotton crop stands at a critical point, for cotton-worm has suddenly appeared and has been making considerable ravages. The intensity of the attack is due to the unusually late watering of bersim, consequent on earlier water-shortage which favoured propagation of the moth at the most vulnerable period in the growth of the cotton plants. Steps were at once taken to circumscribe the attacks by picking the affected leaves, but in a great many cases these efforts were stultified by the stupidity of the villagers, who cast the leaves into the canals, which thus carried infection to estates so far immune from attack. These are early days as yet to be able to tell what the net result of such attacks will be on the cotton crop, but they are bound to affect the yield very considerably. It is a thousand pities that this has happened, as the water shortage trouble had been overcome, thanks to the skill of the irrigation authorities, without any damage to the cotton plants, and there was distinct promise of a crop above the level of the past years.

MANCHESTER COTTON REVIEW.

Tone Generally Weak.

Saturday, July 22, 1922.

The cotton trade review of the Imperial Ottoman Bank for the week ended July 22 states :—

General.—This market has experienced another quiet week and there is no special feature of interest to record. Such business as has been done has been in small lots and no lines of importance have been mentioned. It is possible that more business is being done than appears on the surface, but the general tone at the close is weaker, and buyers can obtain greater concessions than they could a short time ago. Generally speaking prices in the consuming centres abroad seem to be lower than those prevailing here and, whilst this is the case, it

Digitized by Google

is useless, of course, to expect any considerable activity in the way of placing fresh orders.

Yarn.—Spinners have had a very disappointing week, and are not now in so strong a position as they were, the consequence being that there is some irregularity in prices and for definite orders reduced quotations can generally be obtained.

Cloth.—The turnover in this section has been small: offers continue to be made at low prices and a great many are necessarily declined, except in the case of weak sellers. Indian demand has fallen off considerably, there is nothing doing for China and virtually the same for the Near Eastern markets. The Continent, which has been the source of a large amount of business recently, is also quieter.

Raw Cotton.—Although sales of "spot" have not been large values have been fairly steady. Dealings in "futures" have also been on a restricted scale and, generally, the week has been an uninteresting one. Reports from the United States have been rather better. Closing prices are as follows:—American Fully Middling 13.80, last week 13.80; Egyptian Fully Good Fair 19.75, last week 19.75.

THE EGYPTIAN MARKET.

Market Featureless.

The Commercial Co. of Egypt, in their report for the week ended July 14, state:—

The market during the past week has been more or less featureless and the undertone has been heavy. The demand from the consuming centres has shown no improvement and to this fact must be attributed the continued heaviness. The July position has been at times exceptionally weak from fear of tenders. The local stock contains a fairly large quantity of tenderable cotton and with the demand so poor buyers of the near position are not anxious to receive dockers. Arrivals continue to be large for this time of the year; they amount this week to 38,575 kantars, and private advices point to there being over 150,000 kantars of old cotton still up-country. Exports on the other hand, are only moderate—86,098 kantars this week—and unless shipments increase considerably during the next few weeks, of which there is at present no indication, it seems probable that the carry over at the end of August will be over 1,300,000 kantars—a larger figure than one would have cared to estimate a couple of months back. The discussions in the American Parliament relative to the imposition of a protective tariff against Egyptian cotton seem to be drawing to a close. Private advices just received report that the Senate has confirmed the existing duty of 7 cents on cotton measuring 1.3-8 inches or over but has refused to increase same.

Spot.—Total sales this week amount to about 8,000 bales of which we estimate 5,700 bales Sakellaridis 1,900 bales Uppers, 250 bales Brown, 100 bales White, and 50 bales Pilion.

Sakellaridis.—A renewed demand has sprung up for low cotton and a fair business has been done during the week in Middling Fair to Fair. The Medium grades continue to be much sought after. A few lots of Extra have changed hands fairly high prices.

Uppers.—All grades have been dealt with and more interest has been shown in Good to Fully Good. The basis remains unchanged.

Brown.—Some sales have been put through on a slightly dearer basis in the grades Fully Good Fair and below.

White.—There has been a small demand for Good Fair and Fully Good Fair and business has been done at fairly reasonable prices.

Pilion.—A few lots of Good to Fully Good have changed hands but little of this variety remains for sale.

Crop.—Crop news continues good. Flowering and bolling are general. Boll worm is reported from most districts but not, as yet, to any serious extent. Temperatures have been above normal all the week and this fact is giving a somewhat graver aspect to the water shortage.

DEARER RAW COTTON.

(*From Our Own Correspondent.*)

Manchester, Saturday.

The outstanding feature of the Liverpool cotton market during the quarter ended June 30 has been the appreciation of values. Fully Middling and Fully Good Fair Sakellaridis, which are the recognised standards of American and Egyptian respectively, have increased in price 2½d. per lb. for the former, and 2d. per lb. for the latter. On April 3 the American quotation was 10.81d., and the Egyptian 17.75d., but by June 30 the figures had reached 13.23d. and 19.75d. respectively, the daily average for the quarter being 11.75d. for American and 18.53d. for Egyptian, compared with 10.58d. and 18.09d. for the three months ended March 31. For the first half of this year the average is American 11.16d. and Egyptian 18.31d. against 11.35d. and 20.65d. respectively for the last six months of 1921. It is of interest to note that the comparative figures for the first half of 1914 were 17.47d. for American, and 10.96d. for Egyptian. The highest quotation for American during the past quarter was 13.81d. on June 21, and the lowest 10.26d. on April 21 and 25. A rise of 63 points on May 9 was the largest daily advance, and the biggest decline occurred on June 26 when values lost .59 points.

In Egyptian the highest point was reached on the June 21, 22 and 23, when 20.00d. was posted. 17.25d. quoted on April 21 was the lowest for the three months. Price movements in this class of cotton have not been of frequent occurrence, changes having occurred on only 18 of the 61 days on thich the market was open for business Advances of 50 points occurred on April 23, May 9 and 16, and June 12, and on seven occasions the rate declined 25 points.

COTTON PIECE-GOODS IMPORTED INTO EGYPT.

Folding and Marking.

According to a recent issue of the Egyptian *Journal Officiel* a Decree is to come into force one year after its promulgation, relating to the folding and marking of cotton piece-goods imported into Egypt. The Decree provides that all cotton piece-goods, whether unbleached, white, bleached or dyed, or woven from dyed yarns, printed, satined, figured or brilliants, as well as tulles and gauzes for mosquito nets, for the making up of clothing or for windows, etc., shall only be withdrawn from the Customs Houses if they are folded and marked in the following manner:—(*a*) Folded from one end to the other of the piece at a uniform length of one metre or one yard (0.914399 metre) as the case may be, or at regular fractions of these lengths, *i.e.*, one-half, one third, one-quarter of a metre or yard, as the case may be; (*b*) Marked visibly on the outside of each piece with an indication of the exact number of metres or yards or fractions of these measures contained therein, the figures indicating the number of metres, yards, or fractions of a metre or yard being followed by the words "metres" or "yards" or "half, third or quarter of a metre or yard," as the case may be.

The Decree further provides that imported goods not marked or folded in the above-mentioned manner shall be re-exported, as early as possible, without the payment of import duties.

EMPIRE COTTON GROWING,

Standardized Levy.

Lieut.-Colonel Hurst in the House of Commons recently asked leave under the ten minutes' rule to introduce a Bill to provide for the collection of a contribution by spinners in the United Kingdom towards the Empire Cotton-growing Corporation. He said that over 90 per cent. of the owners of spindles in this country were anxious to pay a regular and standardized levy for the purpose of augmenting the funds at the disposal of the Empire Cotton-growing Corporation. It was the desire of all associations whether of employers or employed connected with the Liverpool and Manchester Cotton Association, and of the trade unions identified with the cotton trade that this obligation, which had been accepted voluntarily by the spinners should receive Parliamentary sanction and should be enforced by Act of Parliament. The Bill provided that for every purchase of cotton by a spinner the sum of 6d. for every 500 lbs. gross weight of cotton should be contributed by the spinner towards the funds of the corporation. It also made provision for the levy to be collected through the agency of the Liverpool and Manchester Cotton Associations. The object of the Bill, he said, was to safeguard the cotton supplies of the United Kingdom by developing new sources of supply within the Empire. Leave was given to introduce the Bill.

Near East Markets.

LONDON PRODUCE REPORT.

Shortage of South African Oranges

(From Our Own Correspondent.)

London, Monday Evening.

Sugar.—Home refined has advanced. Tate's cubes at 58s. 6d. and mineral water sugar at 51s. 6d. show an advance of eighteenpence and 3d. respectively. London granulated is firm at 50s. 9d. as also Lyle's granulated at 51s. A steady tone has prevailed for export descriptions. West Indian crystallized is unchanged at 43s. 6d., while white Mauritius at 48s. is firm. White Java is 6d. up at 21s. 4½d. Cane sugar quotations are: July, 17s. 6d.; August, 18s. od.; and September, 17s. 6d. White sugar quotations are: July, 23s. 3d.; August, 23s. 1½d.; September, 23s. od.; October, 22s. od.; and October-December, 22s. od.

Coffee.—Prices have remained unchanged. East Indian is the same at 112s., while Costa Rica has come to business at 106s. Nairobi is firm at 100s. The futures market has been dull. Quotations are:—July, 62s.; September, 63s.; December, 60s., and March, 60s.

Dessicated Coconut.—The position is slightly easier, one or two large sales having taken place during the week.

Rice.—Large sales have been taking place for American Java rices, while the market remains firm. Further increases in the price of Burma "Two Star" rices are expected to take effect shortly.

Green Fruit.—Shipments of South African oranges have been small, with the usual upward tendency of the market as a result. Further advances in price are likely in the near future owing to the small quantities afloat and the large demand at home for this fruit. The market for lemons has again reversed, with supplies commencing to accumulate. Only good quality fruit is in favour at the moment. Stocks of apples are depreciating, and higher prices are expected shortly. The Egyptian onion season has now terminated, while lower prices are expected with further arrivals of Valencia onions.

Oilseeds.—Quotations are higher. Indian linseed has gained 1½d. at 21s. 9d., while La Plata is 4½d. up at 20s. 4½d. Rapeseed is higher with Toria 3d. up at 18s. 9d. Cottonseed is lower. Egyptian black has shed 1½d. at 11s. 10½d., and Sakellaridis is 4½d. down at 10s. 10½d. Indian is 4d. harder at 9s. 4d.

Oils.—A steady tone has prevailed. Linseed oil has advanced 6d. at 41s. 6d. Rape oil is unaltered with crude at 45s. and refined at 48s. Cotton oil is unchanged with the exception of Egyptian crude which has gained 6d. at 42s. 6d. Deodorized is 53s., refined is 48s., and technical is 41s. 6d.

Oilcakes.—Prices have risen. Cottonseed cake has advanced 20s. at 180s. ton; coconut cake at 210s. ton is 10s. up, and cottonmeal cake is 20s. higher at 300s. ton. Linseed cake has remained unchanged at 280s. ton.

EGYPTIAN CROPS.

Wheat Crop Below Average.

The following particulars of the crop conditions in Egypt are given in the Bulletin of the Egyptian Ministry of Agriculture for the month of June:—

Cotton.—The weather was, on the whole, favourable, though early in the month it was somewhat changeable in Lower Egypt. In certain limited areas, particularly in Gharbîya and Daqahlîya, wind and hail caused serious damage to the crop. Water supply was somewhat scarce, especially at the tail ends of canals. In Lower Egypt egg deposits of cotton worm have been general, but no appreciable damage has been done to the crop, except in small areas, where the proprietors have not taken the necessary measures. In Middle Egypt, the attacks of cotton worm have been slight. Aphis has been reported from a few localities, but has caused no serious damage. Wilt has also been reported from certain localities and is responsible for more damage than last year. Flowering is general and boll formation is taking place. On the whole the condition of the crop is satisfactory and the measures taken to deal with pests have, in general, so far been successful.

Wheat.—The hail and rain which fell last month in northern districts caused very slight damage to the crop. The yield is a little below the average.

Barley.—Harvesting has now been completed. The yield is a little above the average.

Bersim.—Harvesting of bersîm for seed has begun in some provinces in Middle Egypt, while it is coming to an end in Upper Egypt. Owing to severe cotton worm attack in some localities, the yield may be expected to be below the average.

Sugar Cane.—Weather was, on the whole, favourable and water supply was ample, except in Giza and Beni Suef. The crop is growing well.

Millet.—(Séfi) Hoeing, thinning and watering are in progress.

CONSTANTINOPLE'S LIQUOR TRADE.

High Prices of British Products.

Captain C. H. Courthope-Munroe, H.M. Commercial Secretary at Constantinople, issues the following report on the wine and spirit market of Constantinople:—

The total value of wines, spirits and beer imported into Constantinople during 1921 amounted to £T.2,300,000 as against approximately £T.3,500,000 during 1920. France has of course by far the greatest share in the champagne and sparkling wine trade, about 90 per cent. of this wine being of French origin. The consumption of expensive wines has, however, decreased continually since the Armistice owing to the fact that general trade stagnation has reduced expenditure on luxuries. It should be noted that foreign wines and spirits are not popular with the Turkish element of Constantinople which prefers douzico—a preparation of alcohol and aniseed.

Wines.

The import duty on champagne and sparkling wines, until the specific tariff, was 17 piastres per kilo, weight of bottle or container included; this represented a tax of 34 piastres per bottle, which was undoubtedly high. The reduction of prices in France, the substitution of the 11 per cent. *ad valorem* tax and the suppression of the Miri tax have not, however, had the effect of increasing the sale of French wine in Turkey and the importation in 1921 is approximately only half of that in 1920. This is due to the general shortage of money and to the fact that the fall in the value of the Turkish pound since 1920 has kept local prices as high as those of 1920. In order to facilitate trade, most of the wines were imported in casks and the result of this has been that with the exception of some few old-established merchants selling real clarets bottled in France, the greater part of the wines sold are adulterated.

Crimean wines have had a good sale, as these wines are of good quality and considerably cheaper than French. Greek wines are cheap and have a fair sale, but their quality is inferior. Port wines of English marks have a limited sale, about 800 cases being sold in 1921. Ports imported direct, of inferior quality but at half the price, have had a fairly good sale. There has been a sharp fall in the sale of liqueurs since 1920 and the demand has been confined to the cheaper brands.

Spirits.

The importation of brandies has suffered owing to the fact that the market was largely overstocked and local merchants have been obliged to reduce their stocks at a loss. The sale of wines has fallen from 1,500 cases in 1920 to 400 in 1921. The only branch of this trade which has not shown a decrease is in whisky, the turnover being as high as in 1920, but the demand has been all for the well known brands. The suppression of the Miri tax, which was very high for whiskies, has encouraged sales, which amounted to about 5,000 cases during 1921. It is mainly, however, due to the European element in the city that the sale of whisky has been maintained, as it is not popular with the native community. The trade in gin has been good, amounting to about 2,000 cases. The total value of British alcoholic drinks imported during 1921 does not exceed £22,000.

Beer.

British beer and stout are very popular but the price is prohibitive except to a very limited circle. Locally made beer, Bomonti, has by far the greatest sale, at 22½ piastres per bottle of approximately one pint. Dutch beer and stout "Amstel" has also a good sale in the better class restaurants.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated July 17 :—

Season.—July 10 and 11—Heavy rain in South-east United Provinces. July 12—Increase of rain in Gangetic Plain and Bombay monsoon strengthening. July 13—Active outside North-west India and South Deccan July 14 and 15—Generally active. July 16—Bay monsoon weakened in North-east India and strengthened in Upper Burma. Bombay monsoon extending to North-east India. General rain in Burma, Orissa, central parts of India and West Central Provinces. Condition of Crops. July 14—Weather seasonable but breaks required in some parts. In Bombay, Kharif sowing (*i.e.*, crops sown during the south-west monsoon) completed almost everywhere and prospects are favourable, except that more rain is urgently required in Eastern Bombay, Deccan and Karnatak. In United Provinces (Eastern Circle) prospects of sugar cane are good to excellent, cotton normal, rice good. In Western Circle of the United Provinces sugar cane is good and cotton normal. July 17—In Assam outturn of autumn rice, jute, tea, and prospects of winter rice and sugar cane normal.

Markets.—July 13—Bombay cotton market quiet. Fine M.G. Oomras, Rs. 470 July, Rs. 481 September. Bombay cotton arrivals from September 1, 1921, to July 8, 1922, were 3,251,000 bales as compared with 2,574,000 bales during the same period of the last year. Bombay imported piece-goods market firm. Good local retail enquiries continue a hopeful factor. Gujarat and other centres already buying small lots of prints, but Madras is without any demands, while local goods are in demand. July 15—Calcutta jute market very dull. In Hessians there is fair enquiry. Quotations—Ready Rs. 18 to Rs. 25. 8. Heavies quiet. Heavy C.'s Rs. 42. 12. B. Twills Rs. 44. 8. At tea sale on July 11 qualities offered were inferior, liquors lacking colour being many and Dooars very stalky. Market weak with general drop of half to one anna. Strong demand from Bombay for well-made pekoes and orange pekoes with little tips. Market for these fully firm to a shade dearer. Dust strong and inclined to be dearer. 72,768 packages were sold up to date at an average price of 10 annas 11 pies per lb. Crop figures for June show an increase of 7,000,000 pounds on the month, making a total increase of 13,000,000 pounds up to the end of June as compared with last year. July 15—Rangoon rice market very weak. Closing price for special Straits Quality rice after fluctuations was Rs. 480 July and Rs. 477.8 August. August to October quotations Rs. 475. July 14—Market quiet. T. N. Shellac Rs. 185.

No change in bank rates.

RED SEA DISTRICT REQUIREMENTS.

Market for Assorted Articles.

The greater part of the 15,000,000 people who occupy the 850,000 square miles of territory which make up the Red Sea district live a very primitive existence, says an American Consular Report. Their demands are not elaborate and are supplied almost entirely by petty traders and itinerant merchants. There are certain elementary articles which are required and which these merchants supply. At present these articles are bought in small lots separately, packed into boxes or bales suited for transport on camels, and thus hawked around the country. In the larger towns the same goods are retailed from small stalls. Aden merchants have conceived the idea of purchasing from Europe, America, or elsewhere, boxes already made up of assorted articles of the types finding a sale among the inhabitants. Among the articles which find a sale may be mentioned laundry soap, sewing needles, thread, twine, writing paper, pencils, penholders, pens, ink in powder form, ink pots, small slates for use in the schools, blank books, pocket notebooks, penknives, scissors, purses, mirrors, handerkerchiefs, socks, and toys.

Before the war Germany and Austria supplied the bulk of these articles, and since the war the Japanese have largely secured the market. In all these cases, however, the sales have always been to concerns which resold the articles in small lots to the traders. Boxes already made up would appeal strongly to the traders. The primary consideration on the local market is cheapness. The Japanese goods are, for the time being, dominant by virtue of this advantage, but their inferiority of quality is very much disliked. Connections established in Aden would open a steady market and would penetrate the entire district.

CURRENT PRICES.

General Produce.—Bacon : (Continental), 138s. cwt. ; (Canadian), 132s. 0d. cwt. ; (American), 100s. cwt. ; butter (Danish), 212s. cwt. ; (Australian) 200s. cwt. ; (New Zealand), 214s. cwt. ; cheese (Canadian), 92s. cwt. ; (New Zealand), 92s. cwt. ; lard 72s. 0d. cwt. ; eggs (Danish), 15s. 9d. per 120 ; (Styrian), 11s. 3d. per 120 ; chillies, 155s. cwt. ; cloves (Zanzibar), 1s. 1d. lb. ; cocoa (Ceylon good to fine), 82s. 6d. cwt. ; coffee (Costa Rica), 121s. cwt. ; (East Indian), 117s. 6d. cwt. ; (Central American), 97s. 6d. cwt. ; (Jamaica), 72s. 6d. cwt. ; (Mocha Longberry), 105s. cwt. ; (Santos superior), 71s. cwt. ; (Nairobi), 90s. cwt. ; ginger (washed Cochin), 53s. 9d. cwt. ; nutmegs (110's to 80's), 11½d. lb. ; pepper (Singapore black), 4d. lb. ; (Muntok white), 7½d. lb. ; pimento, 2.1-8d. lb. ; raisins (Cape), 72s. 6d. cwt. ; (Amalias), 53s. 0d. cwt. ; sugar (Tate's cubes), 57s. 6d. cwt. ; (Lyle's granulated), 50s. 9d. cwt. ; (Mauritius crystals), 47s. 9d. cwt. ; (West Indian crystallised), 43s. 3d. cwt. ; (centrifugal), 17s. 4½d. cwt. ; tapioca (fair Singapore), 2d. lb. ; rice (Rangoon No. 2), 15s. 4½d. cwt. ; (bran Rangoon), £6 15s. ton ; cinnamon (firsts), 10½d. lb. ; mace (fair Singapore), 1s. 7½d. lb. ; tea (Indian, common to good common), 1s. 0½d. lb. ; (medium to good), 1s. 4d. lb. ; (fine to finest), 2s. 7½d. lb. ; Ceylon (common to good common), 1s. 2d. lb. ; (medium to good), 1s. 6d. lb. ; (fine to finest), 2s. 7½d. lb. ; Java (common to good common), 10½d. lb. ; wheat (English white), 56s. 6d. qr. ; wheat (Australian), 57s. 3d. qr. ; oats (English), 37s. 3d. qr. ; oats (La Plata, ex ship), 26s. 7½d. qr. ; maize (La Plata), 39s. 6d. qr. ; flour, 43s. 3d. sack.

Chemicals.—Acids : Boric, 61s. cwt. ; oxalic, 8½d. lb. ; citric, 2s. 7d. lb. ; tartaric, 1s. 6d. lb. ; ammonia (sulphate), £15 11s. 9d. ton ; arsenic (white powdered), £42 ton ; benzole (standard), 2s. 5½d. gallon ; bleaching powder (35 per cent.), £12 10s. ton ; borax crystals, 29s. 6d. cwt. ; cream of tartar, 115s. 6d. cwt. ; Potassium : Bichromate, 6¾d. lb. ; chlorate, 4½d. lb. ; caustic, £33 10s. ton ; nitrate, £37 10s. ton ; permanganate, 9¾d. lb. ; prussiate yellow, 1s. 3½d. lb. ; sulphate (90 per cent.), £15 5s. ton ; Sodium :—Crystals, 120s. ton ; bi-carbonate, £11 2s. 6d. ton ; bichromate, 5¼d. lb. ; alkali (58 per cent.), £9 1s. 3d. ton ; chlorate, 3½d. lb. ; caustic (70 per cent.), £21 ton ; hyposulphite, £10 ton ; prussiate, 9¼d. lb. ; nitrate, £14 12s. 6d. ton ; glycerine (crude 80 per cent.), £60 ton; glycerine (industrial 1260 per cent.), £87 10s. ton ; lemon oil, 3s. 4½d. lb ; quinine, 2s. 3½d. oz. ; red lead, £37 ton ; white lead, £41 ton ; white ground lead, £49 15s. ton ; sulphate of copper, £26 17s. 6d. ton ; sulphate of iron, 60s. ton.

Metals.—Aluminium, £100 ton ; antimony (English Regulus), £28 ton ; bismuth, 9s. lb. ; copper (standard), £93 1s. 3d. ton ; copper (electro), £70 10s. ton ; gold bars, 92s. 9d. oz. ; iron (No. 3 Cleveland), 89s. ton ; hematite (mixed number), 92s. 9d. ton ; galvanized sheets (25 G), £16 ton ; lead (soft foreign), £24 2s. 6d. ton ; manganese Poti, 1s. 1½d. unit ; molybdenite, 32s. 6d. unit ; nickel, £100 ton ; platinum, 365s. oz. ; plumbago, £16 ton ; quicksilver, £11 10s. bottle ; spelter (G.O.B.), £28 13s. 9d. ton ; tin (standard), £154 6s. 3d. ton ; wolfram, 11s. 7½d. unit ; zinc sheets, £36 ton ; tinplates (20 by 14), 19s. 10½d. box ; silver bars, 36d. oz.

Hides and Skins.—Ox and Heifer (first), 90 lbs. and up, 9½d. lb. ; 80 to 89 lbs., 9½d. lb. ; 70 to 79 lbs., 9½d. lb. ; 60 to 69 lbs., 8½d. lb. ; 59 lbs. and under, 6¾d. lb. ; (second), 90 lbs. and up, 8¾d. lb. ; 80 to 89 lbs., 8¼d. lb. ; 70 to 79 lbs., 8.7-8d. lb. ; 60 to 69 lbs., 8.5-8 lb. ; 59 lbs. and under, 5¼d. lb. ; Cows : (first), 90 lbs. and up, 7¼d. lb. ; 59 lbs. and under, 6.5-8 lb. ; (second), 60 lbs. and up, 5.3-8d. lb. ; 59 lbs and under, 4.5-8d. lb. ; Bulls. (first), 5d. lb. ; (second), 3½d. lb. ; Kips (first), 5d. lb. ; (second), 4d. lb. ; (third), 3½d. lb. Calcutta Market. Prices in rupees per 20 lbs. :—Arsenic hides (cows) : Agras, 7.8 to 13 ; Durbhangas 7.8 to 8.8 ; Patnas, 5.8 to 7. Salted cows, 5 to 7.8. Arsenic hides (buffalo) : 4 to 6.8. Skins : Calf, 8 to 10 per 20 lb. ; goat, 190 to 250 per 100 pieces.

Miscellaneous.—Cotton (American), 13.75d. lb. ; Egyptian (Sakel), 18.00d. lb. ; jute (first grade c.i.f.), £37 10s. ton ; jute, (lightnings), £34 5s. 0d. ton ; Oilseeds : Linseed (La Plata), £75 10s. ton ; palm kernels, £17 12s. 6d. ton ; castor seed (Bombay), £19 7s. 6d. ton ; sesame seed (China), £26 5s. ton ; soya beans, £13 2s. 6d. ton ; Oils : Linseed, £44 5s. ton ; olive (Spanish) £75 10s. ton ; rape (crude), £44 10s. ton ; soya, £41 5s. ton ; petroleum, 1s. 4½d. gallon ; petrol, 2s. 1d. gallon ; fuel oil (ex-tank), 72s. 6d. ton ; coconut (Ceylon), £38 15s. ton ; cotton (crude), £42 5s. ton ; ground nut, £45 10s. ton ; Rubber : Plantation (No. 1 Crepe), 7¾d. lb. ; smoked sheet, 7¼d. lb. ; fine hard Para, 10½d. lb.

THE JAFFA MARKET.

The following extracts are taken from reports received by the Imperial Ottoman Bank regarding conditions in the Jaffa region of Palestine at the end of June:

There has been no demand for cereals, not even for Syria. Actual prices are: Wheat, 3½-3¾ Pst. per rotol; barley, 2¼ Pst.; beans, 2-2¼; vetch, 2½-3 Pst.

Although the harvests are medium, prices preserve their downward tendency owing to the absence of orders for export.

The yield of water-melons is lower than that of the previous year, and prices range from 200-250 Pst. per 100. Consignments for Egypt have begun, and so far the prices obtained have enabled a profit of from £20 to £30 per wagon to be made.

THE CONSTANTINOPLE MARKET.

Reports received by the Imperial Ottoman Bank from Constantinople for the week ending July 10 state that there has been no change in the flour market. Arrivals have been: from Bulgaria, 435 tons; from America, 2,263 tons. Prices per sack of 63 kilos are as follow: Nelson, 930 Pst.; Apollon, 775 Pst.; Durum, 800 Pst. The price of native flour has been 700 Pst. per sack of 72 kilos.

Of wheat there have been arrivals aggregating 460 tons from Bulgaria. Prices (in customs): Wheat (in bulk), 12 Pst per oke; rye (in bulk), 9 Pst. per oke; maize, 7½ Pst. per oke; barley, 9¼ Pst. per oke.

THE SALONIKA MARKET.

According to a report received by the Imperial Ottoman Bank from its Salonika Branch good hopes are entertained of the later sowings of cereals, on an intensive system. Given favourable weather and a satisfactory maize harvest the shortage on the winter sowings should be considerably reduced.

Prices ruling are:—Wheat, 2.15-2.20 drs; barley, 1.50-1.60 drs.; maize, 1.60-1.70 drs. Sugar, 8.60-8.70 drs. per oke. Rice, 5.80-6.10 drs. per oke. Coffee, 22.20-23 drs. per oke.

With regard to exports, the stocks of raw hides are insignificant, the price of kids being 34-36 drs. per pair, lambskins, 20-20 drs.

The yield of cocoons is said to be better than last year. There have been no arrivals so far. The price is expected to be about 140-150 drs.

CZECHO-SLOVAK TRADE WITH RUSSIA.

A Czecho-Slovak firm at Roudnice has received an order from the Russian Commercial Commission at Prague for the delivery of 8,000 agricultural machines, chiefly ploughs and harrows, to a value of 4½ million Czecho-Slovak crowns. The machines are to be sent to Siberia *via* the Kara Sea and the river Ob. They are to be delivered within a month and payment will be made partly in cash, partly in credit. Negotiations for further consignments of agricultural machinery to a value of 20 million crowns are taking place. A large transaction for the delivery of agricultural machinery and textile goods has also recently been concluded with the Soviet Republic of Georgia, the representatives of which are at present at Prague. This latter agreement has been concluded on a compensation basis, the Georgians exchanging tobacco for industrial products. The transactions hitherto concluded between Czecho-Slovakia and Georgia represent a value of 30 million Czecho-Slovak crowns.

SHIPPING INTELLIGENCE.

EXPORTS FROM BULGARIA.

Italy Foremost with Shipping.

H.M. Legation at Sofia issues a word of warning to British shipping interests in a recent report of the commercial situation in Bulgaria. The volume of trade to and from Bulgaria carried in British and Italian bottoms respectively shows a marked increase in the latter at the expense of the former. Italian steamship companies, including the Lloyd-Triestino, by patient work and some loss in the past, during the post-Armistice period, have secured the bulk of the Mediterranean-Black Sea and much of the North Europe-Black Sea trade. Italian ships have established regular sailings and cheaper freights, and have not hesitated to call for export cargoes from Bulgaria, even when little was forthcoming. The result is that now, when greater export from Bulgaria is taking place, they have secured a strong position.

NEW STEAMER FOR INDIAN TRADE.

Up-to-date Equipment Throughout.

A new steamer for the Indian trade—the "City of Evansville"—was launched on July 10 from the yard of Messrs. William Gray & Co. (1918), Ltd., Hartlepool, which they have built for the Ellerman Hall Line, Ltd., Liverpool. The vessel is handsomely modelled, having a cruiser stern, while her dimensions are: Length over all 451 ft., breadth extreme 57 ft., and depth moulded 32 ft. 10 ins. The steamer has two decks laid with a long poop and combined bridge and forecastle decks. The ship is fitted out to meet the owner's special requirements for the trade in which she is intended to run, and the double bottom is arranged for the carriage of oil fuel and fresh water.

The equipment embodies all the latest improvements which include fresh water distiller, steam windlass, steam steering gear, electric lighting and wireless installation. The cargo handling appliances are very complete, including 14 steam winches and 10 steel derricks, as well as a heel socket for a heavy derrick, and the foremast is specially strengthened to take a lift of 40 tons if required.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis :—

Anchor Line.—S.s. Castalia for Bombay (Liverpool, August 11); s.s. Scindia for Bombay (Liverpool, August 19).

Anchor Brocklebank Line.—S.s. Matheran for Calcutta (Birkenhead, July 29); s.s. Anchoria for Port Said, Colombo, Madras and Calcutta (London, August 5); s.s. Stockwell for Calcutta (Birkenhead, August 9); s.s. Malakand for Calcutta (Birkenhead, August 21); s.s. Mahanada for Port Said, Colombo, Madras and Calcutta (London, August 26).

Bibby Line.—S.s. Lancashire for Rangoon (London, July 29); s.s. Gloucestershire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 2); s.s. Rialto for Rangoon (Middlesbrough, August 12); s.s. Oxfordshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 16).

British India Line.—S.s. Merkara for Bombay and Karachi (London, July 28); s.s. Ethiopia for Colombo, Madras and Calcutta (London, July 28); s.s. Manela for Colombo, Madras and Calcutta (London, August 18); s.s. Trelevan for Bombay and Karachi (London, August 19); s.s. Howra for Colombo, Madras and Calcutta (London, September 2); s.s. Madura for Bombay and Karachi (London, September 8).

Byron Steamship Line.—S.s. Maid of Hydra for Patras, Piraeus, Constantinople, Constantza, Sulina, Galatz, Braila, Volo Salonika, Smyrna, Bourgas and Varna (Liverpool, August 15).

Clan Line.—S.s. Clan MacKellar for Colombo, Madras and Calcutta (Birkenhead, July 27).

Cunard Line.—S.s. Sea Victory for Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Liverpool, August 3); s.s. Tyria for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Şulina, Odessa, Novorossisk, Poti and Batoum (Glasgow, August 17).

Ellerman Line.—S.s. Cressado for Gibraltar, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, July 29).

Ellerman's "City" Line.—S.s. Kabinga for Calcutta (Birkenhead, August 4); s.s. Urbino for Bombay and Karachi (Manchester, August 14); s.s. City of Christiania for Calcutta (Birkenhead, August 19).

Ellerman's "Hall" Line.—S.s. City of Hankow for Bombay, Karachi, the Punjab and Malabar Coast ports (Liverpool, August 22); s.s. City of Simla for Bombay, Karachi and the Punjab (Liverpool, August 30).

Ellerman's Westcott and Laurance Line.—Regular sailings fortnightly for Malta, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

Glen Line.—S.s. Glenogle for Port Said, Port Swettenham, Singapore, etc. (London, August 10); s.s. Glenapp for Port Said, Port Swettenham, Singapore, etc. (London, August 24).

Harrison Line.—S.s. Collegian for Calcutta (Liverpool, July 29); s.s. Author for Calcutta (Liverpool, August 17).

Henderson Line.—S.s. Pegu for Port Said and Rangoon (Birkenhead, August 9).

Holt Line.—S.s. Tydeno for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, August 3); s.s. Orestes for Port Said, Port Swettenham, Singapore, etc. (Swansea, August 3); s.s. Agamemnon for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 10); s.s. Helenus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 10); s.s. Yangtsze for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 24).

Johnston Line.—S.s. Venice for Galatz and Braila (Liverpool, August 1); s.s. Dromore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, August 19).

Moss Line.—S.s. Amasis for Gibraltar, Oran, Algiers, Malta and Alexandria (through transhipment to Cyprus and Syrian Coast ports) (Liverpool, July 28); s.s. Hatasu for Gibraltar, Malta, Syra, Piraeus, Smyrna, Salonika, Constantinople, Bourgas, Varna and Constantza (Liverpool, August 5).

Papayanni Line.—S.s. Bavarian for Melilla, Malta and Alexandria (Liverpool, August 5); s.s. Maronian for Algiers, Malta, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, August 12).

P. & O. Line.—S.s. Plassy for Bombay (London, July 28); s.s. Lahore for Colombo, Madras and Calcutta (London, August 5); s.s. Malwa for Bombay (London, August 11); s.s. Kaisar-I-Hind for Bombay (London, August 25).

Prince Line.—S.s. Cyprian Prince for Tunis, Malta and Alexandria (Manchester, August 5).

The board of directors of the Banco di Roma have passed a resolution increasing by Lire 50,000,000 the capital of the bank, which stands at present at Lire 150,000,000 fully paid. This resolution will shortly be submitted to a general meeting of the shareholders for ratification.

OIL NOTES & NEWS.

Phoenix Oil and Transport.

The progress report of the Phoenix Oil and Transport Company and allied companies for June shows that the month's total crude oil production was 6,289 tons. The throughput of the refinery for the month was 5,070 tons. No. 5 well in the Moreni Stavropoleos district was re-opened on June 13, and from that date continues to flow. At well No. 1 in the Runcu district preparations are being made to re-open the well.

The position of the wells in drilling at the end of June was as follows:—Moreni Stavropoleos well No. 8: Depth 32 ft.; well No. 16: Preparing site. Tuicani well No. 2: Depth 878 ft. Baicoi well No. 5: Depth 1,601 ft.; extracting drill stem. Chiciura well No. 2: Depth 1,521 ft.; completed rigging up for rotary and ready to resume drilling; well No. 3; Depth 1,905 ft. Runcu well No. 2: Depth 1,618 ft.; well No. 3: Depth 456 ft.; well No. 4: Power installed; rigging up and ready to start drilling. Well No. 5: Preparing site. Bordeni well No. 15: (1,130 ft.) preparing to deepen; well No. 27; Depth 1,027 ft. Arbanasi well No. 10: Depth 1,597 ft.

Roumania's Oil Production.

According to the *Moniteur du Petrole Roumain* the production of crude oil for the six months ending June 30 this year has been 662,390 tons, as against 550,463 tons for the corresponding period last year. The production during the first six months of 1922 shows an increase of 112,000, or about 20 per cent. over that for the same period in 1921. It is pointed out that during the first six months of 1921 the supply of electric current had been considerably reduced, whereas during this year it has been practically normal, a fact which partly accounts for the increase in production this year. The output for the first fortnight of July has been rather low, owing to the fact that some of the rich spouting wells recently brought in have become much less active, whilst others have ceased to spout altogether. On most of the properties work is being energetically carried out with a view to increasing the production, and it is hoped that in a short time the output will show a considerable increase. The price of crude petrol continues to advance, and is now about 18,000 lei per wagon for best qualities. Exportation, however, is retarded owing to the difficulty in obtaining the necessary permits from the Government. The market, however, for such petroleum product exports as are possible, is very firm.

In the House of Commons on July 19 the Anglo-Persian Oil Co. (Payment of Calls) Bill was read a third time and passed.

The output of the Anglo-Egyptian Oilfields is as follows:—Gemsah (week ended July 7), 22 tons, (last week 11 tons). Hurghada (week ended July 7), 2,040 tons (last week 2,428 tons);

COMMERCIAL BREVITIES.

It is announced that the annual production of colophonium in Greece is about 4,000 tons, and of turpentine 1,000 tons. Present stocks in the country are approximately 500 tons of colophonium, and from 50 to 100 tons of turpentine.

The traffic receipts of the Egyptian Delta Light Railways for the week ended June 30 amounted to £E.7,327; total for the year, £E.70,065. For the corresponding period of last year receipts amounted to £E.8,115, total for the year, £E.80,140.

According to a Moscow report, the Soviet has given order that the making of a champagne-like wine formerly grown near Novorossisk, on the Black Sea coast of the Kuban, is to be restarted.

As from October 1, 1922, the exportation of sugar (article 19 of the Czecho-slovak Customs Tariff) will be entirely free, says the *Gazette de Prague*. Export licences and taxes will be abolished. The importation of sugar, on the other hand, will remain subject to licence.

A Teheran message to the *Pioneer* states that the present absorbing topic is whether the North Perisan oil concessions will be granted to the Standard Oil Company or the Sinclair Company, for this concession depends upon the raising of a substantial loan for the Persian Government, which is urgently needed to replenish the treasury.

BRITISH ROUMANIAN CHAMBER OF COMMERCE.

Great Britain's Trade with Roumania.

At the annual meeting of the British Roumanian Chamber of Commerce on July 20 Viscount Goschen, the Chairman, in presenting the annual report and accounts, said that considerable business had been transacted between this country and Roumania during the year under review, and he believed that a large proportion of this business had been done on a cash basis. This of course was due in great part to the fluctuating value of exchange, which rendered credit operations difficult. Another obstacle to business on credit terms was the fact that a number of debts were due to this country by Roumanian merchants, which at the present rates of exchange they were unable to meet without heavy sacrifice. If these debts could be settled on an equitable basis a further obstacle would be removed. The Roumanian merchant was fully aware of the disability from which he suffered; and his lordship stated that a movement had been started in Roumania which, it was hoped, would result in an arrangement being come to either with the Roumanian Government or with the principal credit institutions there, which would provide for the gradual liquidation of these debts under responsible guarantees. He understood that a delegation from the Chamber of Commerce in Bucharest was leaving for this country with a view to negotiating on these lines; and he had every reason to hope that some definite scheme satisfactory to the British creditors would be evolved. Owing to the general disorganised state of the exchanges on the Continent there were other countries more favourably placed than Great Britain for the export of goods to Roumania, but of course this state of affairs could not continue for ever. In spite of this there was at the present time a good market, even on a cash basis, for many lines of goods in this country. He further mentioned that in the new provinces of Roumania British goods were found which arrived there through intermediaries on the Continent; and he suggested that it might be possible for English houses to get into direct touch with these districts, some of which were not in close touch with Bucharest or Galatz.

The report and accounts as presented were adopted, and His Excellency the Roumanian Minister in London (M. Titulescu) was elected Hon. President of the Chamber, and Viscount Goschen and Sir Albert K. Rollit, K.B., LL.D., were re-elected Vice-Presidents. It was resolved to invite the representatives of the Bucharest Chamber of Commerce, on their arrival in England, to meet the members of the British Roumanian Chamber to discuss questions bearing upon the object of their visit, and to extend them some hospitality.

NEW COMPANIES.

Mediterranean Asbestos Quarries.

The Mediterranean Asbestos Quarries, Ltd., was registered on July 17, with a nominal capital of £200,000 in 175,000 ten per cent. Cumulative Participating Preferred Ordinary shares of £1 each and 500,000 Ordinary shares of 1s. each. Objects:—to search for and win asbestos deposits and minerals of all kinds in Corsica or elsewhere. The first directors are: C. J. Matthew, K.C., 10, Old Square, Lincoln's Inn, W.C.2., barrister; E. Lionel Fletcher, 26, Princes Gardens, S.W.7., director; N. Dudgeon, 1, Stratford Mansions, W.1., mining engineer; D. N. Dunlop 36, Kingsway, W.C.2., director; J. A Garside, Shawclough, Rochdale, asbestos manufacturer. Secretary, R. Graham Pole. The registered office is at 100, Victoria Street, S.W.1.

NOTES OF THE WEEK.

The Near Eastern Problem.

Elsewhere in this issue we discuss possible lines of settlement of the Turkish question. One obstacle in the way of securing consideration for any suggestions these days is the tendency to invest with special sanctity proposals put forward by the Allies, even when they have proved unworkable. For a long time the view was held that the terms of the Treaty of Sèvres were fixed and eternal and could not be modified in any circumstances. Now there is an inclination to claim the same attributes for the peace terms evolved by the allied Foreign Ministers last March, and France is being taken to task for displaying a readiness to scrap these terms. We have little sympathy for any attempt on the part of M. Poincaré to play into the hands of the Turkish Nationalists. The only possible value, however, of the March proposals must lie, not in themselves, for in their entirety they have not been accepted, and therefore remain unworkable, but in the help they afford the Allies in judging what provisions are workable and what are not.

The Value of a Conference.

Mustapha Kemal Pasha countered the March proposals of the Allies by suggesting peace discussions, free from all previous conditions, at some town in Nationalist territory, at which Nationalists and Greeks, as well as representatives of the Allies, would be present. His suggestion is supported by M. Poincaré, who has improved upon it by offering a French warship in the Gulf of Ismid, instead of the town, as the place of meeting—an arrangement which would have placed the chairmanship of the conference in French hands. The objection to French support of the Nationalist proposal is based on the fact that it virtually identifies France with the rejection of the March terms, whereas, it is urged, the Allies should cling to these, as indeed they clung stubbornly and so long to the egregious terms of the Treaty of Sèvres. It would be more to the point to consider whether a conference which requires agreement on the part of the Kemalists is more likely to be successful than similar meetings with the Bolshevists. Mustapha Kemal's desire for peace is undoubtedly growing daily, as his authority weakens at Angora; but the Allies need to be careful that they do nothing which strengthens Angora as against Constantinople. Such action would be an ill return to the Sultan and those who have tried to be loyal, according to their lights, to the Allies.

Greece's Dilemma.

It is impossible to withold sympathy from Greece in the dilemma in which she finds herself. On the one hand there is the unconscionable delay on the part of the Allies in arriving at any united decision with regard to Turkey; on the other hand, there is the growing embarrassment, financial and political, in Greece itself. The Greeks may be forgiven for feeling somewhat uncertain as to which way the Allied cat will jump, and the Government, finding itself in the necessity of doing something, is trying to prepare for all emergencies. It has been known for some weeks that movements of troops between Greece, Smyrna and Thrace were taking place; but these may have been occasioned by motives other than a desire to undertake an advance either against the Kemalists or against Constantinople. Now comes a request from the Greek Government to attack Angora through Constantinople. As the request is seriously made, it is satisfactory to know that the Greeks repudiate any intention of marching on the Turkish capital, except with the Allies' consent. The worst that could happen would be that some Greek d'Annunzio should imagine that he was doing a patriotic act in attempting a *coup* which, if successful, must be entirely to the mind of the Greek Government. There is some reason to suppose that King Constantine's influence would be entirely opposed to any such venture.

The Mischief of Delay.

Last week the Greek Government, probably with the best intentions, addressed a Note to the Allies to inform them that, in view of the failure of the plans for mediation Greece is obliged to resume her liberty of action in regard to the Near Eastern settlement. A second Note followed almost immediately suggesting the action against Constantinople. The first communication might be regarded as a correct diplomatic preliminary to the action that a Constantinople correspondent, writing on July 14, stated was to be regarded as a possible development in Smyrna. The Greek Government, according to a local report, would make a further withdrawal of its army in Asia Minor, and then in the reduced area of occupation would set up an autonomous régime under a Greek prince, and proceed at once to hold elections in the new State thus created. If any such course is taken by the Greeks, the Allies will again be to blame; but the second Note is apt to alienate sympathy from Greece. Earlier in the year the Greek Government and people were prepared, under suitable safeguards for the minorities, to withdraw from Smyrna. The Allies' delay

Digitized by Google

in taking definite action has given the Smyrna Defence Committee an opportunity similar to that of which Mustapha Kemal Pasha availed himself in Anatolia. The Committee undoubtedly means well ; but in allowing its hand to be forced it has forced the hand of the Greek Government,and the result may be further complications which can only retard the final settlement. Sooner or later an autonomous régime for Smyrna has to be established, but it will be better for the Greeks who will form the bulk of the population, that the new State should be formed under the aegis of the League of Nations.

General Townshend.

General Townshend has arrived at Angora, and it remains to be seen whether the visit does him or the Kemalists any good. On the score of any breach of undertaking he can probably be exculpated by the phrasing of the sentence in his letter to the British Government to the effect that the did not contemplate at the moment a journey to Angora. We should have liked to see a properly accredited and suitable representative of the British Government undertake a mission to Mustapha Kemal Pasha for the purpose of finding out whether the latter was still open to reason or was merely an Anatolian de Valera. General Townshend will find out nothing, and nobody will pay the least attention to him if he does. From a practical point of view therefore, his visit is of no value to his country, and it is a matter for regret that such a distinguished soldier with his unrivalled opportunities for playing a really useful part at this juncture should have failed through temperament. On the other hand his visit may do distinct harm, by strengthening Kemalist intransigence, to the grave prejudice of the true interests of Turkey.

Bulgarian Reparations.

The promise of a smooth and satisfactory solution of the points at issue between Bulgaria and the Allied Powers has not been realised. It became apparent at an early date to the Inter-Allied Reparations Committee at Sofia that there was good ground for the Bulgarian Government's contention that a payment this year of forty-five million gold francs under the treaty of Neuilly was out of the question. Accordingly last March the Commission agreed to accept ten million gold francs in 1922 and thirty million in 1923 under certain conditions, chief among which was that the partial supervision of the State coal mines at Pernik and of the Customs should be handed over to Inter-Allied control. Other guarantees were required, but these two conditions appear to have been the main stumbling-block from the Bulgarian point of view. The Sofia Government was placed in a real dilemma ; by agreeing to the Commission's terms,it would be committing political suicide; by rejecting them it exposed Bulgaria to the full pains and penalties of the Treaty of Neuilly. Every effort was made to turn the Reparations Commission from their resolve, but without effect. In the end the Bulgarian Government notified the Commission that it could not voluntarily accede to the Allied request. The reply has been swift and curt : the provisions of the Treaty of Neuilly come automatically into force, and the sums due, amounting to 112,500,000 gold francs, become immediately payable.

The Impasse.

It is, of course, obvious that if Bulgaria is not good for the payment of ten million gold francs without certain precautionary measures of Allied control, she cannot possibly pay 112,500,000 gold francs. Perhaps M. Stambolisky's Government has proved exasperating to the Commission, whiose nerves during a Bulgarian summer would be inclined to be overstrung, and it might be thought derogatory to the Inter-Allied prestige for the Commission, having launched a hasty ultimatum, to recede from its position. But from this point on we hope that the Allies will proceed warily and not be lacking in sympathy for the Bulgarians. There can be no doubt that the spirit of the country is in favour of " playing the game " by the Allies ; the Government has made its mistakes, and it may well prove a blessing in disguise if the Allies do take charge of Bulgarian finances. They will find that *force majeure* is appreciated: it leaves no handle for political opponents. The object of any measure of control, therefore, should be not to humiliate the country, but tactfully and wisely to help it to recover lost ground.

Arrest of the " Wafd."

On July 25 the Egyptian police arrested the principal leaders of the Zaghloulists, apparently as the result of their having issued manifestoes of an undoubtedly dangerous character. The step was probably an unavoidable one ; but, unless the arrested men are to be dealt with firmly and severely, it is a pity that it had to be taken. For it will only give Hamid el Bassel Pasha and his Coptic friends a fresh opportunity to pose as martyrs for the " cause." As it is, their deputies appear to have stepped into their empty places immediately, and to be courting similar " martyrdom " by repeating their chiefs' offence. The connection between the manifestoes and teachings of the extreme Zaghloulists and the murders of British subjects would no doubt be very hard to establish, but there are not a few people in Egypt who hold that such connection actually exists. Egypt, in fact, is suffering from a bad attack of political fever of a violent type, brought about by a plague of demagogues, and while it lasts the country is bound to continue in a deplorable condition.

Jemal Pasha.

Jemal Pasha was on his way from Berlin to Angora, when he was assassinated in the streets of Tiflis by unknown assailants. One of the two aides-de-camp who were with him shared his fate, while the other was severely wounded. and it is therefore unlikely that those responsible for the outrage will be identified and brought to justice, though numerous arrests have been made. Assassination is always to be condemned, and in the case of Jemal Pasha there was even less to be said in extenuation of it than in certain other cases which naturally spring to mind ; for the victim, while he had plenty of faults, had also several outstanding virtues. He is known to have protected Armenians from massacre, and during the War quite a number of British prisoners owed him their liberty, to say nothing of minor acts of kindness, shown at some risk to himself. That he was ambitious cannot be denied ; and against the kindness shown to the British during the War must be set many ruthless acts perpetrated in Syria, where it is to be feared the news of his death will have caused nothing but satisfaction.

The Indian Frontier.

The pessimists have had such a long innings in the discussion of Waziristan affairs that it was, at any rate, refreshing to be assured by *The Times* that the miserable region is now on the way to become another Baluchistan and that, not as a result of some superhuman interven-

Digitized by Google

tion, but owing to the steady pressure of Lord Rawlinson's policy, a policy which has for months been a target for the vituperation of both sides of India. It is perhaps too soon for confident acceptance of such a sanguine view, but there is no doubt that conditions have improved greatly in the course of the past year, and it seems possible to hope that the improvement may continue, and even accelerate. In that case the expenditure, which has certainly been heavy, will be amply justified, and meanwhile the financial burden is being lessened as the object of the operations is gradually attained. On one point at least the advocates of economy may be reassured, for there is scarcely a British officer, and assuredly there is no Indian, who wants to stay in Waziristan a day longer than is necessary; but when you have a hornet's nest to deal with, the job must be thoroughly done, or the effort will be merely wasted.

The Road to India.

The evidence taken at the inquiry into the circumstances attending the loss of the Egypt is being followed with anxious interest in the Anglo-Indian circles in this country. It is clear that after the disaster things happened which ought not to have happened, but the allocation of responsibility for these happenings must be left to the Commissioner who is conducting the inquiry, and no good purpose is served by the partisans who snatch at fragments of evidence to discredit one element or another of the ill-fated ship's crew. Interest in the possibility of an alternative route to India was revived last week by the publication of a statement that a definite proposal had been submitted for a service of airships, and that the only doubtful point was the willingness of the Government of India to bear its share of the inevitable subsidy. The statement was promptly contradicted by Lord Winterton in the House of Commons, but he admitted that a proposal of the sort was expected, so there is still a possibility that Lord Inchcape as wielder of the Imperial axe, may be called upon to say whether the Government should subsidise competitors for the traffic with which he is so intimately associated.

A Contrast.

The last Indian mail brought the news that the Government of Bihar has definitely decided to close the provincial college of agriculture as a luxury too great for its resources. Simultaneously we learned that the farmers of Manitoba, having gained control of their legislature, have decided that the Principal of their agricultural college is the best choice for the post of Prime Minister, and there is something piquant in the contrast between two regions which are so far alike that in each the great majority of the population depend on agriculture for their livelihood. We do not say that the Government of Bihar have made a mistake, for we have not seen the evidence on which they have acted, but their decision gives us a measure of the distance which India has to travel before the ideals of the new Constitution become actualities. It is quite conceivable that the peasants of an Indian province, when they grasp the power which is offered to them already, will do as Manitoba has now done. and choose a leader from their own occupation in preference to a lawyer or a political journalist, but it will be some time yet before these classes need fear their suspension, and, so long as they retain their predominance, the Constitution will remain a great experiment.

THE WEEK AT HOME.

London, Monday Evening.

Stocktaking at Westminster.

The session draws near its appointed end, and nothing startling need be looked for in home politics until the autumn. It has been a quiet year at Westminster so far, and one would say that the Government position is on the whole rather stronger than twelve months ago. These things are admittedly, as the illustrious Einstein has taught us, all questions of relativity; it is not that the Government is really so much stronger as that the Opposition seems perceptibly weaker. It has no kick in it, and what is worse, no faith in itself or its own ability to put the Government in the wrong.

The question of fabric gloves is to be decided to-day; but the Coalition Liberals, who are Free Traders, have been told plainly by Mr. Lloyd George that they must honour the Coalition bond in this, as the Tories have honoured it in matters of Liberal policy. There is not likely to be any real difficulty—to the sorrow of the Wee Frees—but a certain number of abstentions are probable.

House of Lords Reform.

The only other topic which now engages Parliament is House of Lords reform, which is more or less always with us, but which has given rise to two or three debates recently. The Government has introduced certain resolutions, admittedly vague and meaningless, and the Peers are talking about them—what proportion of Peers shall be hereditary, whether the remainder shall be nominated or indirectly elected, what to do with the Bishops, and whether to include the President of the Free Church Council, the President of the Royal Society, and the Astronomer Royal *ex officio*. But the reports have been cut down in the press, and the public has shown no interest whatever. No decision is likely this session.

Mr. Lloyd George on Armaments.

The Prime Minister made a speech on Thursday, in which he warned us that armaments are increasing on the Continent, and that unless care is taken, another war may break out if these things continue; he stated that he intended to devote the rest of his life to peace. The speech was delivered before a clerical audience—the Opposition are rude enough to say that it was an attempt to "tune the pulpits," and to put the Nonconformist conscience in the pocket of Downing Street—and it had just a touch of that crusading note that was more familiar in Mr. Lloyd George a few years ago than now. It appears to have had a good effect upon the audience.

I gather that some kind of united effort is being made to impress on the people of every country the evil of armaments, and yesterday was celebrated as a sort of Peace Sunday. The object is an entirely admirable one, but the idea that a war was ever stopped by a sermon requires rather more faith than I have in stock at the moment. The real guarantee of peace is that everybody is dead sick of war, and the best proof of that proposition is that the only country in which war is still popular is Ireland, which was exempt from what the Americans call the Big Noise.

Mr. Lloyd George's speech has been read carefully to see if it contained any allusion, direct or indirect, to the question of German reparations and the mark, on which nothing has been settled, and which France seems in no hurry to settle. But it appears that we must wait for the Prime Minister's version of that topic until the debate on the adjournment in the Commons on Wednesday or Thursday this week.

A Coalition Defeat.

The Government were unfortunate in losing a seat last week. A Coalition-Liberal Whip seeking re-election after his appointment found a Coalition majority of 3 175 at Pontypridd in 1918 turned into a Labour majority of 4 080. One swallow, however, does not make a summer, and Labour has not had many victories to boast about this last year.

The Cattle Embargo.

An animated debate with open voting in the House of Commons resulted in the decision to lift the embargo on Canadian cattle. The Government itself was divided on the question, not only as to the meaning of the pledge given in 1917 but as to the matter of policy; it was a battle between transport interests and Free Traders *versus* home agriculture, stock breeding and protectionists. The transport interests made a great deal of popular running with the cry of cheaper meat, but it seems rather doubtful whether the present very high prices of meat will be substantially affected.

Lower Railway Fares.

Apparently we are to have cheaper railway fares—but not yet. In the autumn there is some prospect of a farthing a mile coming off ordinary tickets, which is a smaller reduction than the additional twopence in the shilling put on to the extra fifty per cent. on all fares two years ago. The reduction is nothing like enough to restore the travel habit. On short journeys it will not enable the railways to compete with motor transport; on long journeys the fares will still be too high for all but compulsory travelling. As it is, many long-distance trains run half-empty, and with wages down, and the amounts paid by railways in local rates and taxes also down, one sees no reason why the reduction should not be more substantial. It only means that the agitation will break out again.

The Grand Trunk Decision.

The question of the value of the Grand Trunk stock has been settled at last. It will be remembered that two Canadian arbitrators declared that it was valueless, but that Mr. Taft, the Judge of the American Supreme Court, disagreed with them, and the case was thereupon taken to the Privy Council. The highest judicial authority in the Empire has now declared that the appeal fails, and some thirty odd millions of stock held in England will therefore be wiped out. (Some compassionate allowance is expected to be made by the Canadian Government to the unfortunate shareholders.) The reasons for the decision have not yet been published, but no doubt they will be cogent. At the same time, the whole business has left an unpleasant taste in the mouth of the British investor, and is likely to prejudice Canadian issues for some little time.

Why We Die.

There is a gruesome interest about the annual report of the Ministry of Health, for it tells us what we are most likely to die of. Of 1,000 deaths from all causes last year, 117 were from heart disease, 105 from diseases of the nervous system, 100 cancer, 76 pneumonia, 73 bronchitis, 73 consumption. At the same time Sir George Newman, the Medical Officer who makes the report, indicates that we are living longer than our parents, although the increased expectation of life is chiefly in the earlier years; after forty-five there is little difference between now and seventy years ago. That, no doubt, is because the population is loaded with a great number of second-class lives which in the old days would have flickered out quite young or in early manhood or womanhood. It appears that a baby born now has a chance of living twelve years longer than its grandfather.

The Bank of England.

One had always thought the Bank of England one of the few things that in the world never changed, and it gives rather a shock to see the announcement in the papers that it is to have another story added to the present squat structure—which looks exactly like a prison until you get inside, when you discover, of all unlikely things in the world, a flower-garden.

But it appears that the business of the Bank of England has increased enormously of late years, and can no longer be carried on in the present quarters, so it has to expand towards heaven—which I hope will pardon this intrusion of Mammon. The centre of the City will not look quite the same when the familiar building becomes a miniature sky-scraper, but there are some who say it will be an improvement. Certainly the illustrations of the proposed new Bank give an imposing effect.

The Week's Book.

"H. B. and Laurence Irving" (Grant Richards) by Austin Brereton, is a biography of the two sons of Sir Henry Irving, who were cut off, the one by shipwreck, the other by wasting disease, before they had fulfilled their promise of fame. They were worthy sons of a great father; and "Please God," said H. B. to Pinero after Laurence's death, "I will do my best to be worthy of a father and brother such as mine."

OCELLUS.

TOPICS IN PARLIAMENT.

The subject headings are those given in the Official Report.

India: Revolutionary Doctrines; Political Prisoners.—Greece and Turkey.—(Tuesday, 18th July).

THE NEAR AND MIDDLE EAST.

From Our Own Correspondents.

EGYPT.

Cairo, July 20.

Another Outrage on an Englishman.

As the cables will have informed you, another outrage was added last Saturday to the long list which have had to be recorded since the beginning of the year. This time the object of the assassins' attentions was Lieut.-Col. A. E. H. Pigott, of the Army Pay Department, who was shot at and wounded in four places as he was walking from his house to his office along the route which he followed regularly every day. The outrage was a particularly daring one, for it took place at 8.30 in the morning quite close to the British Consulate, and therefore in the centre of the European quarter. There is little doubt that his assailants had carefully noted Col. Pigott's habits, and awaited a favourable opportunity to shoot him, just as they did in the case of the late Mr. Aldred Brown and Bimbashi Cave.

Col. Pigott was taken off to the military hospital at Abbassia, where one of the bullets was immediately extracted, and where Sarwat Pasha, who had come up to preside over the Mahmal ceremony, visited him in order to convey his personal regrets at the outrage. He has been lying in a very dangerous condition, but another bullet has now been found, and the doctors have every hope of his recovery.

In this case, the sixteenth of the series, the motive was again purely political. Col. Pigott's official duties never brought him into contact with Egyptians and he was not of a temperament likely to come up against or offend native susceptibilities. The organisation behind the assassins merely chose him as possibly an easy victim. Once again the assassins got away scot-free, although there must have been in the immediate neighbourhood a score or so of Egyptians who were carrying out their usual occupations when the shots were fired. Two so-called eye-witnesses have given a description of the Effendi who fired and of the Egyptian in "galabea" who was with him, but such descriptions are obviously of very little use in tracking the culprits in a large city like Cairo, where, as is evident from the absence of any attempt to intercept the two assassins or give the alarm, the mass of the people is either disinclined or afraid to assist the authorities in cases where Europeans are victims.

Needless to say, this outrage has aroused the greatest indignation amongst the British and European communities, who feel that while a mistake has been made in not inflicting the full penalty on Egyptians convicted of infringement of the fire-arms and other proclamations, the time has certainly come for more drastic action than mere protests or pressure for more stringent supervision of public security. Instructed Egyptians as well as the vernacular press, have unreservedly expressed their abhorrence of these repeated outrages, which they admit merely conduce to widen the gulf between the British and the Egyptians. These expressions of regret are, all very well, but they neither console the victims nor reassure the foreign communities, and something far more practical is called for. It is indeed completely within the power of the Egyptians to put a stop to these outrages. To them the discovery of the identity of the assassins can present no difficulty whatsoever, and the surest way to re-establish relations of confidence with the British, which they say they want restored, and to prevent their own cause being further prejudiced is for them to organise amongst themselves to lay by the heels the organisation which is responsible for these murders.

The French National Fete.

July 14 was celebrated in traditional style in Alexandria and Cairo. In the capital the usual fete was given in the Ezbekia Gardens, to attend which the High Commissioner came up specially from Ramleh, a graceful act which was much appreciated by the French community, while in Alexandria a very successful fete was held at the San Stefano Casino. Somewhat of a gloom was, however, thrown over the festivities by the news of the bereavement suffered by the French Minister, and all communities united in expressing their deep sympathy with M. and Mme. Gaillard in their sad loss.

The British Community in Alexandria.

For many years the British Community in Alexandria was wont to complain bitterly at the neglect which it considered it suffered at the hands of the British authorities, and one had to admit that the community which constituted an important element of the British colony in Egypt had every ground for feeling a grievance. Of late years, however, successive British representatives have tried to remedy this state of affairs and have endeavoured to identify themselves more closely than did their pre-war predecessors with the development and life of the British community in Egypt's second capital.

Church Hall in Alexandria.

This last week Viscount Allenby laid the foundation stone of a new Church Hall which is to be constructed in connection with Saint Mark's Church in Alexandria. This Hall, which will fill a long felt want in Alexandria, owes its erection to the generosity of the Alexandria community, particularly Mr. and Mrs. K. P. Birley, who gave the ground, and of Col. E. T. Peel, who started the building scheme with a generous contribution. The High Commissioner was also the guest of the Union Club of Alexandria, of which he is the President, at a dinner given in his honour. It was a very enjoyable and informal affair, and in reply to the toast of his health Lord Allenby made some interesting remarks on the political situation. His Excellency reminded his audience that in granting independence to Egypt Great Britain was merely carrying out the avowed policy which she had inaugurated forty years before, but although she was now a sovereign State, Egypt was bound to England as England was to her by ties of friendship. He confidently hoped that the two countries would advance together in friendship and prosperity and that no one would suffer, but that everyone would benefit by the change made. There had been difficulties to surmount, but he had derived the greatest assistance from the knowledge that he, and the policy which he represented, had the active support and confidence of the English in Egypt.

ROUMANIA.

Bucharest, July 23.

The Conservative Democrats.

For lack of a more important topic during the present dead season, a section of the Press is speculating on the likely successor to the leadership of the Conservative Democratic party. It is argued that in ordinary circumstances M. Titulescu would have been proclaimed the undisputed leader, having at all times been looked upon as the political *alter ego* of M. Take Jonescu.

It is not overlooked that during the latter days of the Averescu Government, of which both were members, a dissension arose between them on account of the fiscal reform introduced by M. Titulescu, and this discord hastened the downfall of the said Cabinet. Neverthe-

SCHOOL OF ORIENTAL STUDIES.

less, the Conservative-Democrats would gladly hail M. Titulescu as their leader. It is, however, doubted whether he would be inclined to relinquish his present agreeable post as Roumania's representative in London for the more arduous task of reconstituting and conducting the party. As a second likely successor, the name of M. Cantacuzene, former Minister of Justice, has been brought forward. It is also suggested that this party may fuse with the National Democrats under the leadership of M. Jorga. Nothing definite has as yet been agreed upon, but pourparlers and meetings are in progress.

The friends of M. Take Jonescu have opened a public subscription for the erection in the centre of Bucharest of an imposing monument surmounted by a statue of the late statesman.

Roumanian State Funds at Moscow.

Conflicting versions are in circulation as to the fate of the Roumanian State Funds, which were taken to Moscow during the War. Some consider them as non-existent, others say the treasure is intact in the vaults of the Kremlin, where it was deposited by the Tzarist Administration. A recent report states that there is now in Moscow a deposit of 10,070,000 gold roubles originating from the Roumanian Treasury, and that this is scrupulously guarded.

On the other hand, Queen Marie's jewellery, which was also sent to Moscow, is reported no longer to exist in its original form, the Bolshevists having taken off the precious stones and sold them abroad and kept the gold and platinum settings. These gems, together with those of the late Czar's crown, are reported to have been taken to London and disposed of by Kameneff in 1920. Thus it is more than probable that the Queen of Roumania will never recover her jewellery, but may at best be compensated in cash.

Railway Catastrophe.

A very serious railway catastrophe occurred recently in the Prahova valley, involving many victims. The express train for Vienna, which at the present season is the favourite one of the Bucharest population to betake itself *en route* to the various summer resorts in the Carpathian Mountains, was crammed with holiday seekers who had left Bucharest as usual at 1 p.m. Three hours later, while speeding through the Carpathians the train reached a bridge which collapsed under its weight. One engine, the luggage van, and three passenger coaches fell into the river Prahova, the rear cars of the train becoming derailed and being fortunate to remain on *terra firma* thanks to the fact that the bridge was short and not very high. No immediate medical assistance was available owing to the distance away from any village or town at which the calamity ocurred.

According to official reports there were six dead and eighteen badly wounded, as well as a great number of minor casualties, mostly in the rear cars.

The disaster took place a few stations before Sinaia, the Royal family's summer residence, and on learning the distressing news, the King and Prince Carol immediately drove by motor car to the scene of disaster, and it was they who at first directed, as best they could, operations regarding assistance and salvage.

The cause of the disaster was due to the weak condition of the bridge, which had been put up by the Germans during their invasion of Roumania and was intended to serve a temporary purpose only. The press and public are indignant at this neglect on the part of the railway authorities and a rigorous inquiry is being held to establish responsibility. The engine drivers, too, are blamed for not reducing speed on a bridge which they knew to be of frail construction.

Cholera.

Thanks to the strict preventive measures taken by the medical authorities, no fresh cases of cholera have occurred. The precautionary measures taken will be kept in force for some time to prevent a possible recurrence.

In Bessarabia along the Dniester, however, a few isolated cases of cholera have been reported, and this is not to be wondered at, considering that on the other side of the river, in the Ukraine, the epidemic is raging with fury. Necessary steps are being taken to stamp this plague out in Bessarabia.

Court News.

The Queen, accompanied by Princess Ileana has gone to the Sovata Baths in Transylvania for a month to take the waters. Although this locality was until recently little known, the Queen has selected it on account of its excellent mineral waters for drinking and bathing. The New Provinces along the Carpathians abound in small spas hitherto very little known to visitors of the Old Kingdom. The curative waters of these spas, may easily rival similar more pretentious ones abroad. The example set by the Queen in patronizing a home spa, will have its effect on the well-to-do people of the Old Kingdom who have hitherto been going abroad to take the waters.

The Greek Crown Prince and Princess are expected at Sinaia at the begining of August, where they will spend August and September, leaving afterwards for the island of Corfu.

HISTORICAL SPIRIT SERIES NO. 5

The "ANGEL," Henley on-Thames. For several hundred years a familiar haunt of Thames boatmen and fishermen.

Shade of Izaak Walton: "Yes, JOHNNIE WALKER, what I said about fishing equally applies to you. 'After tedious study a rest to the mind, a cheerer of spirits, a diverter of sadness, a calmer of unquiet thoughts, a moderator of passions, a procurer of contentedness'."

JOHN WALKER & SONS, LTD., SCOTCH WHISKY DISTILLERS, KILMARNOCK, SCOTLAND.

GREECE.

Athens, July 15.

The "Republicans."

After a trial lasting several days the seven "Republicans" accused of issuing a manifesto against the present régime were condemned to three years' imprisonment, and have been put in jail at Athens. Their names are Papanastasiou, C. Melas, Carapanos, Filaris, Petmezas, Theodoropoulos, and Pazis. The Directors of the newspapers *Patris* and *Neologos* were acquitted. These "republicans" are all staunch Venizelists, and are a source of trouble to the Government through their increasing efforts to restore the Liberal Party to power. The Government no doubt feels stronger knowing that they are out of the way for the time being. The immediate result of the verdict was the signature of a similar manifesto by another body of Liberals. Eloquent speeches were made during the trial—speeches which covered not only the matter in hand but also the politics

Digitized by Google

of the Allies during and since the War. Some of the newspapers have suggested that the King should pardon the "Republicans"; it would be a clever move and put them in a very awkward position.

Blockade Running.

A ship flying the British flag endeavouring to run the blockade of the Asia Minor coast has been captured by the Greek Navy, and has been brought into Salamis Bay. A number of "Fiat" motor lorries are said to have been unloaded—this appears to be rather a peculiar coincidence when it is known what pressure has lately been brought to bear on the Greek authorities to purchase similar lorries. Britain recognises the right of search and capture by the Greek Navy; the Government will therefore not be called upon to give up the lorries and pay an indemnity, as was the case with Italian and other ships.

The Voule.

A Bill was proposed by M. Vocotopoulos by which all those who assisted in the Venizelos revolution would lose the right to vote and to be elected Members of the Voule. He proposed that all Venizelist Ministers should be deprived of these rights for life and all Members of Venizelist Parliaments for ten years.

The Athenian Press.

Newspapers may now be sold at 30 leptas each. As there are some forty papers published daily in Athens, one can imagine the difficulty of keeping oneself informed of all the shades of public opinion—practically every paper has a slightly different point of view. The news given is very often untrustworthy and is usually not even contradicted. For instance, in the morning papers of June 28 the arrival of a British General Officer with a Staff of Senior Officers on a special mission was reported. Excitement prevailed in Athens. Were the French Military Mission to be replaced? Did this mean that at last England had decided to assist the impoverished Ally? Many other exciting questions were asked. The truth was that Colonel Hoare Nairne, the British Military Attaché, had returned from Constantinople and Smyrna, where he had been on duty.

Verification of news is apparently never made, with the result that nothing can be taken as exact. Athens is very badly in need of a paper whose news, whatever the political views of its Editor may be, is reliable.

Miscellaneous News.

The bodies of the French Marines killed during the Allied landing in December, 1916, have been exhumed and transferred to Toulon for reburial.

A fire broke out in the Forest near Mandra on the road to Thebes and destroyed about 2,500 acres of trees. Soldiers managed after two days with the assistance of the neighbouring villagers to master it.

BULGARIA.

Sofia, July 16.

A Policy of "Laissez faire."

Only four days now remain until the day on which the Government should notify the Interallied Commission regarding their acceptance, or otherwise, of the Convention. MM. Stambolisky and Tourlakoff have been in the provinces for the last week, while M. Daskaloff is going to Germany to-day. The Sobranye will meet on the 24th, but the Commission ask for an answer about the 20th. From an impartial observer's point of view it would appear that neither the Government nor the Commission know what to do; they are both waiting for the other side to move, and the Government are trusting that something unexpected may turn up. Public interest in the matter has cooled down, as no one sees how the Commission can force the Government to sign the Convention. The Commission held a meeting yesterday to consider the situation, but the result of their deliberations is not yet known.

The Wrath of the Socialists.

At the beginning of last week there appeared in the Socialist newspaper *Narod* an "open letter" addressed to the Prime Minister. The following is a brief summary of this letter:—

"With reference to the political murders and outrages which have taken place since the present Government came into power, on May 28, M. Stambolisky, surrounded by his Ministers, made a speech from the balcony of the Foreign Office which contained the following passage: 'It is necessary to open a violent campaign against our political opponents.'

"The authors of the political murders and outrages which have been perpetrated during the last two-and-a-half years, have not been caught. In these circumstances we have the right to blame you, the Prime Minister, for these outrages. It is a result of the present Government's policy that these murders have taken place, and we solemnly declare that these methods will meet with our most determined opposition."

This "open letter" was dictated by the attempt made on the life of the Socialist Advocate at Pleven. It is, however, worthy of note that other political Parties do not consider that the Pleven outrage was due to political motives. They attribute it to a personal feud.

Bulgaria and the British Press.

Since the Armistice the tone of the British Press towards Bulgaria has been notoriously hostile. Many inexact statements concerning Bulgaria's internal situation have appeared, and a policy of chauvinism has constantly been imputed to her. Within the last few weeks a reaction appears to have set in, and articles which recently appeared in the *Daily Telegraph* and the *Observer* have been very favourably commented on here. The Sofia Press follows very closely what is written in England regarding the Near East, and although the newspapers are inclined to undue optimism, and see concessions which exist only in their own imaginations, there is no doubt that relations with England are considered to be on a better basis.

The fact that the League of Nations Conference, which has to deal with the question of frontier bands, is to be held in London has aroused much satisfaction. It is thought that Bulgaria stands a better chance of a favourable hearing in London than elsewhere.

Brevities.

The Bourgeois *Bloc* are holding a big Political Meeting in Sofia to-day.

On July 14, the French Minister held a reception at the Legation. In addition the "Institut Français" was formally opened.

ALBANIA.

Tirana, July 30.

The Dispute with Italy.

A way out of the differences with Italy has not yet been found. The Marquis of Durazzo, who went to Rome to confer with his Government, has just returned to Albania. As I said in my last letter, the Italian Minister would appear to be very conciliatory, but the fact must not be lost sight of that the Consulta is using the Albanian trouble as a safety-valve for the stormy atmosphere of home politics.

In this way both Signor Facta and Signor Schanzer—in spite of their liberalism—have sought to divert the crisis that they have provoked—which has now ended in the downfall of the Cabinet.

I am able to state positively that the Tirana Government will not allow itself to be intimidated. Albanians think that this country—though but small and inhabited by only a million people, has, from the point of view of international law, the same rights as those of any other State, were that a hundred times as large. Albania, consequently, will make no concession. She is possibly willing to give to Italy every moral satisfaction, on condition that Italy renounces all pretention to exercise political tutelage or to re-establish the régime of capitulations and privileges, so fatal to Turkey.

Montenegro and Albania.

A Note has been reproduced in all the European Press, according to which the Conference of Ambassadors at Paris, in ratifying the Serbo-Albanian frontier traced by the international commission of Albanian frontiers, at the same time sanctioned the union of Montenegro

with Serbia and by this act recognised the disappearance of the ancient kingdom of Montenegro.

Official and authorised representatives of Montenegro protested against this Note. Now undoubtedly Albania is not concerned in what goes on in Yugoslavia, either between Serbs and Montenegrins or between Serbs and Bulgarians. Nevertheless what does interest every Albanian is the ruling by this proclamation in regard to Montenegrin territory, seeing that this kingdom since 1912—that is to say, after the Turko-Balkan war—incorporated a vast Albanian region comprising Ipek, Yakova, Gussina, and Plava, with a population of 250,000, equal to the rest of the population of Montenegro.

However, the Serbo-Montenegrin union rests, say the Serbs, on the decision made by the assembly at Cettigne in 1919. But, in admitting this fact, it must be remarked that the Albanian element had never been consulted on the territorial question, and that, if it had been, it is very doubtful whether it would have chosen for the union with Serbia.

Relations with France.

For over a year two matters have remained unsettled between this country and France: first, the imprisonment of certain Albanians in Italy, and secondly the refunding of the sum due from the excess of the receipts over the expenses in the district of Koritsa, during the French occupation (1916-1920).

Thirty-five Albanians were arrested and sentenced by courts-martial of the Army of the Orient in Albania and Macedonia for political reasons. Two of these have already died in prison, and the others have been sent to Guyane. The Albanian Government claims—and justly, it would appear—that these men were condemned on unjust grounds, very often as a result of lies told by foreign agents in the intelligence departments of the armies during the War.

As for the sum of money due from the district of Koritsa, in spite of the definite ruling of the territorial statute in regard to this region and the decision taken by the Conference of Ambassadors to restore to Albania the amount in question, the matter has not, owing to necessary formalities, been finally settled. The amount is 2,000,000 francs.

Greece and Hungary.

The Greek Government has just announced that it officially recognises the Albanian Government, and that it is ready to enter into official relations with it, with the sole reservation of the question of the Southern frontier. The Albanian Government, while glad to be once more on terms with the neighbouring State, has replied that it will not admit the aforementioned reservation.

The Republic of Hungary has accredited Count Albert Nemes as its Minister Plenipotentiary at Rome and also in Albania. Count Nemes has formally presented his Letters of Credence.

TURKEY.

(From an Occasional Correspondent.)

Constantinople, July 20.

The Committee of Union and Progress.

A piquant situation would seem to have arisen in Anatolia with regard to the followers of the Committee of Union and Progress. The Kemalist Government has become concerned over their renewed activities, and recently took the step of requiring the ex-Malta prisoners, who were supposed to find in Angora a safe refuge from Armenian bullets, to leave the Nationalist capital and settle down in provincial towns. Trebizond, it so happens, was placed out of bounds, presumably because it has already a bad reputation for Enverist intrigue. Indeed, Fethi Bey, Minister of the Interior, who is now in Paris, went so far as to order the Union and Progress clubs of Trebizond to be closed; but the order was successfully challenged by the Angora Assembly, two-thirds of which is Unionist.

A City of Rumours.

Constantinople is full of rumours, and, since it is hardly possible that our unfortunate political situation—so long unfortunate that it has become almost second nature to us—could become more unfortunate, these rumours are, generally speaking, of an optimistic complexion. Someone has it that as a preliminary to a general Allied evacuation, the Irish Guards are shortly going home. Then one hears that the French, being in severe financial straits and incapable of maintaining any longer their expensive Army of Occupation, are endeavouring to persuade the British and Italians that all will be well if the troops of occupation are withdrawn.

On this last point civilian residents of the Allied nations might have something to say, if consulted.

Another rumour has it that the Greeks and Turks are negotiating peace terms amongst themselves. Be there foundation or no foundation for these reports, the Turkish lira jumped up 20 points to-day with a somewhat feverish disposition on the part of the speculator to buy more.

One also hears that Beikos, that humble little village on the Asiatic side of the Bosphorus has been selected for a Conference on the Near East Question; the same spot where two summers ago brigands descended, looted the Greek shops, scared the inhabitants, and even fired on H.M.S. Iron Duke, which was stationed near by, opposite the summer residence of the British Embassy.

There is another report, an old report revived, disconnected no doubt, from the rest, but which, in order to keep the pot of rumour boiling, has become more persistent; this is that Admiral Bristol, the popular American High Commissioner, is shortly leaving Constantinople. In this connection Dame Rumour says that he got into hot water in connexion with the report of the American Near East Relief Commissioners on the deportations and atrocities in Anatolia.

It is hardly necessary to point out that this is the silly season in old Byzantium. There is yet another report to be chronicled that has recently created considerable stir in our midst, and much "copy" in the local newspapers of all nationalities. A ferry boat laden with passengers reported as having passed between Pendek on the Asiatic Coast, and the island of Prinkipo, a sea monster of alarming proportions, with wings at the side of its head. So greatly is it said to have disturbed the smooth and placid waters of the Marmora, as it rose to the surface, that the ferry boat "tossed on the water like a toy ship." Now we are not used to anything in our waters bigger than the Espadon or Sword Fish, which we eat for dinner, and the old harmless and familiar porpoise. The presumption therefore was that the monster referred to (which only the more travelled amongst us dared to speculate as being a species of whale) must have taken the wrong turning somewhere out in the Atlantic. It was left to the Turkish paper *Terjuman* to reassure the public mind by a vivid account of the capture of the sea monster. After describing the combined measures taken by the local fishermen armed with shot-guns and hunting weapons to locate the animal a second time, the paper proceeds: "On Saturday one of the vessels again sighted the monster, which rose to the surface opposite Maltepe, a warship was at once informed, the fishermen of Maltepe, Cartal and Pendek formed a cordon round the space of water, leaving a passage for the warship. The warship approached to within 550 yards (*sic*) of the spot where the monster had appeared, and waited for it to rise again. Not long afterwards it rose, was immediately shelled and hit. The fishermen approached the wounded beast, and after several hours succeeded in towing the body ashore." A European paper is unkind enough to hazard the suggestion that the story is an effort of Oriental imagination.

It was somewhere in these Near East waters that the old historical whale swallowed Jonah. But that is nothing compared with what some of us are expected to swallow in the Silly Season of Constantinople.

CORRESPONDENCE.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper

"REVOLUTIONARY" TRIBUNALS.

To the Editor of "The Near East."

Sir,—I hope you will allow me to point out that in my letter of the 17th instant published in to-day's THE NEAR EAST you have wrongly spelt the very word on which I laid particular stress. The Turkish word for Revolution is represented by the English letters "IKHTILAL"—not "IKHTIKLAL" as you put it.

As my letter was a correction of "A Reader's" letter I am naturally desirous that what I wrote should be correctly reproduced, and I may say that I have the carbon copy of my previous letter before as I write.

Thanking you for your courtesy,

I am, etc.,

EMINE SAFVET TULLY.

London, July 27.

GREAT BRITAIN AND EGYPT.

Egyptian Press Comments.

The Zaghloulists.

Nationalists and members of the *Wafd* (Delegation) are chafing under the rule of silence which forbids any mention of Zaghloul or his partisans. A correspondent now writes to the papers not as a Nationalist but as an "honest opponent" (*Maarid Sherif*). One Mohammed Mahmoud, who is proprietor of the *Wafd* Library (*Méktebet et Wafd*) in the Rue el Féleki (Astronomer Street), in Cairo lately published in a volume speeches of Zaghloulists and an account of an interview with Madame Zaghloul. He was arrested and sent to prison, but released on bail, all copies of his book being confiscated.

The Egyptian Army.

The lawless state of the country in many parts is deplored. One writer in the *Ahram* asks why the Egyptian Army is not increased. Instead of 18,000 it should number one-and-half million. The military, he says, should help the police, which requires stiffening until complete order is restored.

The Sudan.

The Sudan occupies much space in the Press. The *Ahram*, in an outspoken article, says that although it was understood that the future of the Sudan was one of the "reservations," Britain treats the matter as already settled. Anything said in praise of British administration is accepted as welcome, as is everything in disparagement of Egyptian methods. The justice and impartiality of British rule are contrasted with the still backward state of Egypt. The British Press always either bluffs or threatens. The Egyptian Government is urged to show more courage in standing up for its rights, and to be more on its guard. The *Akhbar* publishes long lists showing the numbers of Egyptians who have been killed in fighting for the recovery of the Sudan from the time of Mohammed Ali, amounting to over 198,000. The *Mokattam*, on the other hand, publishes a letter from "a Sudanese" stating that the Sudanese Delegates who went to England, and who have no desire for Egyptian control were true representatives of the country, and included the best and most respected of the Sudanese people, *e.g.*, the Seyyid el-Morgháni. He would be glad to know who are the Egyptians and Sudanese who venture to assert the contrary. The paper comments favourably on this letter. The Seyyid Mohammed Ahmed of Sennaar, in an article "The Voice of Truth from the Sudan," urges the two countries to cultivate thoroughly friendly relations, and to avoid all misrepresentations and wrangling. He quotes a saying of the Prophet that "advice is a part of religious duty," and feels that this duty impels him thus to write.

Banks and Directors.

Adly Pasha has been appointed Director of the Bank *el Akhari*. A new Bank has been established by Italy, one director of which is Sirri Pasha, who was formerly Minister of Public Works. Many Egyptians hold shares. Long articles are published inviting wealthy Egyptians to buy shares, and deal with the Bank; stress being laid on the fact that "it has been established purely with a view to helping Egypt to become economically independent."

THE NEAR AND MIDDLE EAST ASSOCIATION.

At the Connaught Rooms, last week, the Near and Middle East Association, which has grown out of the defunct "Ottoman Society," gave an inaugural luncheon, presided over by Major-General Lord Edward Gleichen. Among those present were Lord Lamington, Mr. Gideon Murray, M.P., Colonel Sir Alec Sprot, M.P., Major Boyd Carpenter, M.P., Sir Charles Yate, Admiral Sir E. Fremantle, Sir E. Denison Ross, Sir Thomas Barclay, Dr. Shefek Bey and Dr. E. H. Griffin (hon. secretary of the Association). Captain E. N. Bennett read out a long list of names of prominent men unable to attend the gathering.

Lieutenant-Colonel the Hon. Aubrey Herbert, M.P., began his speech by describing the present Coalition Government as a prize example of how not to do things, in contra-distinction to past Governments, which, though they might have worked slowly and on broad lines, did get things done. The unsatisfactory Turkish situation of to-day was almost entirely due to the Prime Minister's crooked policy and his neglect of Foreign Office advice. His reliance on minorities in Asia Minor had brought disaster, and contempt upon the name of Great Britain. The recent Turkish massacres, for example, were in great part the result of our own Government's action; what had happened in Pontus followed inevitably what had happened in Smyrna; and it must be further remembered that there were two sides to this question of massacres. Where, for instance, were to-day the Moslems of Crete and of Macedonia? The pro-Greek policy was an inconsistent, incoherent, and unintelligent policy, and formed a poor contrast with, say, that of Beaconsfield, who, realizing that Great Britain's supreme and permanent interest was Peace, acted straightforwardly and intelligently. But this Government would not last for ever, and the Association would prove to be on the winning side. Colonel Herbert then went on to sketch some terms which the Allies should and could make to form the basis of an agreement with the Turks. These included:—(1) Real guarantees for Minorities; (2) Greek retirement from Asia Minor; (3) Prevention of a co-terminous frontier between Turkey and Greece, between whom a buffer State should be wedged; and (4) Incidentally, but essentially, Bulgarian access to the sea. In other words, the Treaty of Sèvres should be completely revised.

After this discussion of the Turkish problem from the political side, Major Ralph Glynn, M.P., proceeded to lay stress on the economic side. Our policy, he said, should be neither pro-Greek nor Pro-Turk, but pro-British. Looked at from this point of view, the aspect was serious indeed to Great Britain. Not only had Turkish merchants individually suffered considerable hard-

ships, but our national trade had declined as well. Whereas before the War 48 per cent. of Turkey's imports were British, in 1921, these had dwindled to 20 per cent., and the United States were already ahead of us. Major Glynn, whose personal experience in Near Eastern business is large, suggested that members of the Association should include in their counsels the opinions of business men who had spent their lives in daily contact with the Turks and with the Greeks, and should unceasingly urge upon Parliament the importance of the economic side of their cause. In conclusion, he put forward the ingenious suggestion that Constantinople might be made into a buffer State, and held by the League of Nations as the centre of its deliberations.

The Chairman reiterated Major Glynn's plea that the economic seriousness of the Turkish situation should be brought home to the Government. He added that to those Turkish merchants, scattered throughout the country, the Association might become a centre and a home, and that by becoming members they would be able to concentrate their energies and get something done.

MUSICAL NOTES.

ON SAINT-SAENS.*

Of all the second-rate minds in musical history that of Saint-Saëns was possibly the most efficient. The extent of his knowledge of music was enormous, and it is said that there is no form of music of which he has not left some finished type. His enthusiasm for music was inexhaustible and unceasing, but in his later days he developed into the completest and crassest *laudator temporis acti*, damning, from the safe and lofty throne of mediocrity, all the modern school as anarchists, with the result that, perhaps sooner than would otherwise have happened, his fame is dwindling rapidly. Few musicians of to-day would care to speculate on which, if any, of his works will survive.

His compositions, as I have hinted, betrayed the man; but, if these were not enough, here is a curious hotch-potch of essays which someone, with what one can only suppose to be playful reverence, has called "Outspoken Essays on Music." Some of the essays (certainly not the "outspoken" ones) are genuinely informative; it is interesting to read things like "The Manuscript Libretto of Faust," or "A Chopin MS.: The F-major Ballade in the Making." And in other essays there are little shafts of wisdom, born out of immense experience and unusual powers of observation, that are quite illuminating; but on the whole, the book is second-rate stuff.

Whatever is the subject of Saint-Saëns' writing, one always learns more about him than about that subject: he is a subjective writer indeed. Thus, in an essay upon "The Ideas of M. Vincent D'Indy," he scarcely discusses D'Indy's ideas, but is splendidly content with a mere denial of many of them. He refers to D'Indy's belief that in art are nothing but expression and passion, and then says, barrenly and finally: "To me art is form above all else." To reproach D'Indy, the arch disciple of César Franck, one of the supreme architects in music, in this childish way is surely a little excessive. And he is certainly well after the fair when he opposes D'Indy's placing of *measure* as an enemy to *rhythm*, because on this point the conservatives and radicals of to-day are at one. But in spite of such reactionary manifestations as these there is much very sound sense in this particular essay, for his scholarliness does in certain respects enable him to make points against D'Indy.

In a very readable essay upon "The False Masterpieces of Music," Saint-Saëns lets fall a sentence which to my mind links him up with another popular and second-rate mind of our generation, namely, that of Dean Inge, who, I believe, recently declared that trade was a stimulus to good literature, or something of the sort. Here is the nonsense as Saint-Saëns puts it from his own angle: "So true is it that 'the trade' is not without its uses! There are some who disdain it, and acknowledge nothing but inspiration. Inspiration is the priceless and indispensable material, the rough diamond, the virgin metal; 'the trade' is the art of the lapidary and the jeweller: it is equivalent to saying that it is Art itself. Those who despise 'the trade' will never be more than amateurs." And so this man, of whom Mr. Ernest Newman has rightly said that one amateur like Borodin is worth a hundred professionals like Saint-Saëns, to the end of his life confused Art with artifice. He would, one imagines, have been successful in anything he chose to take up, but a consumingly successful manufacturer!

I have dwelt perhaps overmuch on the things in this book that I do not like; there are plenty of good things, and those who like the music of Saint-Saëns will possibly find everything good. But at the moment this composer is remembered chiefly by his attitude towards the music of to-day and of to-morrow, and by those whose fate it is to live in these two periods he is harshly judged. He tried to argue against modern innovations, not, even after all his years, being content to adopt a Gamaliel-like attitude, which is the only attitude possible that is consistent with dignity and sense. He would persist in regarding modern music as a kind of diseased morality, the which it could not wholly be. And instead of attacking certain modern composers or certain modern compositions he attempted with vain gestures of omniscience to condemn them all. What the Elizabethan and Victorian ages are to Dean Inge, the Sixteenth, Seventeenth, Eighteenth, and Nineteenth Centuries were to Saint-Saëns. There was to be no to-morrow! Both, with unsympathetic pathos, talk of "the position in which we now find ourselves"; both wonder resignedly where it will all end; both are rather magnificently unaware of the precise value of a journeyman's opinion upon Art; in a word, both are wrong.

ANDANTE

* "OUTSPOKEN ESSAYS UPON MUSIC." By Camille Saint-Saens. (London: Kegan Paul, Trench, Trubner & Co. 4s. 6d. net)

BULGARIA AND THE LEAGUE OF NATIONS.

M. Theodoroff, head of the Bulgarian delegation to the Council of the League of Nations, before his departure from London on July 29 made the following statement regarding the decision taken by the Council:—

"We are satisfied with the result that has been obtained, because the Inquiry that we had asked for did not represent for us an aim, but means. Through our request to the League of Nations we only sought to secure the complete pacification of spirits, safety for our country and a general improvement of our relations with our neighbours. In this respect we have succeeded.

"Our three neighbours have publicly declared that they had no aggressive intentions against us. Therefore we shall follow the advice of the Council of the League of Nations: to continue direct negotiations with the neighbouring States in the same conciliatory and loyal spirit, of which we have given full proof till now. Moreover in the case of a failure, which on our part we shall do everything to avoid, the Council being still in control of the question, would always be able to intervene."

PRESS ON THE NEAR EAST.

In consequence of inquiries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

Syria and Palestine.

The Times of July 19 contained an article entitled "The League and the Mandates" which traced the different reactions which were produced by the various conceptions of the "Mandate." Particularising upon Syria and Palestine, it pleaded for a policy of deliberation and delay :—

> It is difficult for English readers to visualize the changes created by the mandates in this area. Formerly Syria and Palestine were one. The people are one; they speak the same language and cherish the same traditions. They moved and traded freely between Damascus and Jerusalem. Now the inhabitants of Jerusalem and Jaffa cannot go to Beirut and Aleppo unless they are provided with a passport visaed by another Administration. They belong to a separate and restricted territory called Palestine, where not only are they not their own masters, but where the mandatory Power whose duty it is to educate them towards independent government is burdened with the additional responsibility of creating in their territory a national home for the Jews. They would trust and obey the mandatory Power, but they are alarmed at the influence exerted on the Administration by the Zionist Jews, whom they regard as aliens. Their protest against the effects of the ambiguous British and Zionist Administration, to which they have hitherto been subjected, has just been registered in a general cessation of work corresponding to the Indian *hartal*. The protest has been echoed in telegrams sent from Mecca, where pilgrims are now assembled from all the corners of the world of Islam. It certainly seems advisable, in view of the doubt and uncertainty in this country and the obscurity of the prospect in Palestine, that the ratification of the Palestine mandate should be delayed, as a number of members of Parliament have suggested, until such time at least as the British Government, by thoroughly purging the Palestine Administration of obvious partisans, shall have freed itself from the suspicion of unduly favouring a minority among the peoples committed to its charge.

The "A" Mandates.

The *Manchester Guardian*, a staunch supporter of the League of Nations, in its issue for July 25 says that the Council of the League has "done with" the Mandates for Syria and Palestine, but it concludes a little critically :—

> It has formally sanctioned the mandates subject to conditions to be fulfilled outside its own deliberations. We wish we could think this a glorious or even a creditable illustration of the improvements introduced into statesmanship by the League of Nations. But as a matter of fact it looks very much as though diplomacy had merely rearranged its household economy. The pleasanter matters are agreeably arranged by polite statesmen in a decorative parlour. But what matters is left to diplomatists to settle somewhere on the backstairs. France will somehow placate Italian commercial interests by a formula which will not violate the equal commercial interests of all people, in which the United States is interested, and on this piece of diplomacy will depend the question whether the administration of Syria is to be formally recognised as within the responsibility of France and whether the historic land of Palestine is to be confined as a ward of the British people. Perhaps it is a good thing that there should be a front parlour where all these decisions are formally recognised and where certain general principles have to be observed, but one could wish that this polite exterior were a sincere and full expression of the whole spirit that animates the Governments represented in the Council of the League.

A Palestinian Nation ?

The *Saturday Review* of July 8 professes itself in general agreement with the policy recently laid down by Mr. Churchill in regard to Palestine, and thinks that the aim of Great Britain in this country is that "usual enough in the British Colonies—progressive political development terminating in self-government." It concludes :—

> Short of the abandonment of Palestine altogether by Britain, which is a thing that hardly anyone advocates, we do not see any other possible programme in the circumstances that has any chance of success. After the recent vote in the Lords, which practically was a pronouncement for the cancellation of the Balfour Declaration and its promises, the Arab Delegation, the Arabs in Palestine and perhaps in general, and all who believe in Pan-Arabism may have had some hopes of a great change in the policy of the Government in their favour, and naturally they will be grievously disappointed. The case of the Arabs turned not so much on any claim to self-determination—everyone admits that the great bulk of the people of Palestine are Arabs or have some Arab blood in their veins. They put forward the plea that the policy of the Government involves a breach of faith with them. They maintain that certain pledges were given during the war. We have never been very clear just what promises were made to the Arab leaders. In his dream of an Arab Empire King Feisal, when a simple Emir, undoubtedly included Palestine; indeed, he distinctly said that Palestine was an Arab province, and must be ruled as such. It seems to be the truth, however, that no pledge was ever given during the war to the Palestinian Arabs, and it is the case that these Arabs took no active part on the British side in the struggle. And there are those who think, ourselves among them, that whatever promises were made to the Arab leaders, whether to King Hussein of the Hejaz or to his sons, have been fulfilled not only handsomely but with some degree of rashness, as the future may very well show, both in Mesopotamia and in Arabia itself. We take it that the object of the Government is to build up a Palestinian nation, neither Jewish nor Arab. Jewish immigration into the country will have to be controlled and regulated by the capacity of the land to absorb it. The probability is that under the firm, impartial, and benevolent guidance of Britain, Arabs and Jews will, after a time, settle down and live in peace and amity together; and this will be realized all the more quickly if they are left alone by Zionist and Arab agitators.

The Arab Mind.

The July issue of the *Moslem World* contains several articles of strong interest. "The Arab Mind and the Gospel," by the Rev. Paul Harrison, of Bahrein, Arabia, is the first, and perhaps the most important; the Rev. Arthur Jeffery, of the School of Oriental Studies of the American University, Cairo, writes on "Eclecticism in Islam"; the Rev. S. Ralph Harlow contributes "Community Life and Ceremonies of the Peasant Turk"; the Rev. S. M. Zwemer, "The So-Called Hadith Qudsi"; Miss M. Cay, "Off the Beaten Track"; and the Rev. Percy Smith, "The Ibadhites."

The author of the first article mentioned gets to grips with his subject at once. "The Arab," he begins—

> has a religious mind, far more religious on the average than has the American. To him there are no secondary causes. It rains because God sends the rain, and when drought devastates the country, and animals die and men go hungry, it is because God withholds the rain. This conception of the omnipotence of God, including everything, directing everything, silent, inscrutable, and overwhelming,

Digitized by Google

is a magnificent thing. We of the West may well study it and learn from it.

Further, God is not simply omnipotent, He is immediately present. He sees what is done, and His hand shapes the circumstances of the day for good or for ill. It is His favour that gives a speedy journey, and His will that brings delays and annoyances. It is not a light profanity that puts the name of God into the mouth of the Arab continually. To have the name of God on his lips, and the thought of God in his heart, is to the Arab a very great virtue, and who is there who will call him mistaken ?

To believe that the Arab expects to purchase entrance to Heaven by means of good works is a mistake, says the writer, and refers to a sermonette by Bin Saoud to which he once listened :—

Quoting some ancient authority to the effect that the greater part of those entering Heaven enter it because of their bad deeds, and the greater part of those in hell suffer there because of their good deeds, he proceeded to explain. Good deeds are good things, but a man habitually performing them usually falls a victim to pride toward the end of his life, and on account of this pride he goes to hell, whereas the man who has done bad deeds all his life is likely toward its close to realize his wickedness, and repent, and humbly ask God for mercy, and because of his humility he goes to Heaven.

But, though the " Arab has a religious mind, and there are beautiful things in it," it would be a great mistake to conclude that he offers promising material to the missionary from the West.

An impenetrable wall of pride and self-satisfaction seems to surround him on every side. . . Half of the appeal of his religion lies in the pride and self-satisfaction it stimulates as he thinks of the wretched infidels that constitute the rest of the world, and rejoices in his infinite superiority over them. Their property is his, and even their lives, if he is strong enough to take them, and this spoilation is a righteous act of justice because of their hard-hearted persistence in mistaken beliefs. This cruelty and pride increase with the fervency of religious life, and the possibilities of such a development quite surpass the imagination of an ordinary humane and tolerant Westerner.

The teachings of Christianity as to the duties of one man to another the Arab " accepts only in his relations to fellow-believers " and unbelievers are to him legitimate prey. As to the relationship between men and women, he utterly repudiates the Christian view :—

In the landscape of the Arab's mind perhaps ninety per cent. of everything pleasurable lies in this territory. Monogamy with no divorce he regards as reducing life to a level where it is scarcely worth living.

The Arab turns away from the spoken and written Gospel, " partly in disgust, and partly in bewilderment, and partly in sharp resentment." But he does not turn away from it as incarnated in the lives of men and women, and he " responds very quickly and very deeply to simple unaffected democratic friendliness." The visits of the women missionaries in the Arab homes are especially welcomed.

But the Arab mind is changing rapidly. To-day there is scientific criticism here as elsewhere, for though the actual results of science and criticism may be but imperfectly understood, their spirit has made itself felt. " Hair-splitting arguments over some point of Moslem theology no longer interest the rising generation. Rather the question is whether there is a God, whether there is any Divine revelation." The article concludes with passages addressed particularly to mission workers.

The Palestine Mandate.

The Times of July 25 thinks that the formal confirmation by the Council of the League of Nations of the British Mandate for Palestine and the French Mandate for Syria is a gain, and that it may end the haziness and confusion that have hitherto characterised the government of Palestine :—

Now every excuse for laxity or confusion has been withdrawn. The British Government has laid down a policy which, though not entirely satisfactory, is at least definite. The Zionist Organization has pledged itself to abstain from interference in the administration, and this pledge is a check on that movement of political Zionism which had begun to constitute a serious danger. For the development of what may be called spiritual and cultural Zionism ample room is left. The mandate now given formally safeguards the interests of the Moslem and Christian inhabitants of the country, and provides for them a Court of Appeal, if ever they should find their rights or privileges infringed. That is to the good. It remains now to mould the British administration of the country in accordance with the task thus defined. The administration must be absolutely impartial, superior to all local conflicts. It must be completely purged of all Zionist and anti-Zionist elements. It must be distinctively British, carrying out its task simply and solely from the point of view of the interests of the British Empire. Our objection to the presence of Jews among the higher officials of the British Administration in Palestine is due not to any complaint against individuals, but to the fact that since in Palestine the Zionists regard Jewish origin not as a matter of religion, but as a matter of nationality, it is essential to British prestige that the question of the nationality of the British officials should be beyond any dispute on the part of the inhabitants. For the rest, it is incumbent upon all concerned in the experiment to which we are now definitely committed to make the best of it by co-operating and maintaining peace for the benefit of the country as a whole. We are not entirely hopeful, but the experiment has entered on a new stage under stricter conditions, and serious trouble may be avoided if the conditions are strictly observed.

THE RUSSIAN EXILES IN CONSTANTINOPLE.

It is stated by the American Relief Administration that seven League of Nations members have contributed the £30,000 necessary for the evacuation of 15,000 Russian refugees from Constantinople. Great Britain contributed £10,000, the other contributories being Belgium, Switzerland, Japan, Brazil, China, and Czecho-Slovakia. Nearly 10,000 people are at present being fed, though the work was only begun on July 9. The countries to which these refugees will be sent within the next four months include Hungary, Yugoslavia and Bulgaria, which have signified their willingness to absorb the exiles.

The Greek National Assembly has adjourned till the end of October ; it may be convened earlier if necessary.

PERSONAL AND GENERAL.

To-day.
August 3 (New Style).
July 21 (Old Style).
Julhijja 9, 1340 A.H. of the Moslem Calendar.
Ab 9, 5682 of the Jewish Calendar.

The Aga Khan has arrived at Aix-les-Bains.

The Shah of Persia has arrived at Evian-les-Bains.

Princess Nicholas of Greece has arrived in Paris.

The Maharaja of Kapurthala has left London for Cabourg.

Prince and Princess Christopher of Greece have arrived at Deauville.

Mr. Lindley, the British Minister at Athens, has left for London on leave.

Lieutenant-Colonel Sir Albert and Lady Stern have arrived in Paris.

Admiral Sir Ernest Troubridge has arrived in England from the Danube.

Prince Michael Lotfallah, President of the Syrian Delegation has left London for the Continent.

M. Slobodan Yovanovitch, Secretary at the Yugoslav Legation flew back to London from The Hague.

M. Dushan Tanaskovitch has arrived in town to act at Chancellor of the Yugoslav Legation.

The Czecho-Slovak Minister has left London on a special mission to the Argentine Government.

The Bulgarian Delegates to the Council of the League of Nations left London last Sunday (the 30th ult.) for Sofia, *via* Paris.

Viscount and Viscountess Erleigh left London last week by the P. and O. Bombay Express to join the s.s. Kalyan at Marseilles, for Bombay.

An engagement is announced between Denys Latham, Punjab Club, Lahore, and Joy Moore Stevens, only, daughter of Colonel and Mrs. Moore Stevens, Woodhayes, Whimple, Devon.

A missionary conference will be held at Lichfield from October 2 to 6. The subject will be "The East at the Crossways," and Lord Meston and Dr. Bardsley will be among the speakers on India.

A marriage has been arranged, and will take place at an early date, between Brigadier-General Claude Hawker, C.M.G., C.B.E., and Mary, widow of Colonel the Hon. Alfred N. Curzon, of 8, Eaton Place.

The engagement is announced between Eustace Frederick Robb, only son of Major-General Sir Frederick and Lady Robb, of 46, Rutland Gate, S.W., and Mary, younger daughter of Sir John and Lady Latta, of 1 Portman Square, W.

THE PERSIA SOCIETY.

President: *Lord Lamington, G.G.M.G., G.C.I.E.*

Founded in 1911 to study all questions of common interest to Great Britain and Persia.

Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1.

M. Boskovitch, head of the Serbian delegation at the League of Nations Council meeting, has returned to Paris. Of the other members M. Milutin Yovanovitch has left for Berne, where he is Minister, and the remainder have gone to Belgrade.

The engagement is announced between Major Edward Noel, C.I.E., D.S.O., eldest son of the late Lieutenant-Colonel the Hon. Edward Noel and Mrs. Noel, and Katherine, eldest daughter of the late Robert Lighton Ross and Mrs. Ross.

The engagement is announced between Duncan Gillard Churcher, M.D., F.R.C.S., Makwar, Sudan, elder son of Dr. and Mrs. Churcher, of Wandsworth Common, and Nancy Thursfield, eldest daughter of the late Mr. and Mrs. Lancaster, of Ealing.

The engagement is announced of Major Robert Jaffray MacBrayne, M.C., 15th Sikhs, only son of Mr. and Mrs. D. R. MacBrayne, of Alton Lodge, Troon, to Norah, only daughter of Mr. and Mrs. D. L. Murdoch, of Craigdoon, Doonfoot, **Ayr.**

A marriage has been arranged, and will shortly take place, between William Underwood Nicholas, of Karachi, and Banksfoot, Caversham, Oxon, and May Constance Deare, youngest daughter of the late Mr. and Mrs. Frederick Durant Deare, of Leinster Gardens, W.

Princess Andrew of Greece will shortly leave London to stay with the Marquess and Marchioness of Milford Haven at St. George, Southsea. Her Royal Highness will also visit the Earl and Countess of Leicester at Holkham before her departure for Athens about the middle of September.

Lady Glentanar has left London for Hamlet Lodge Cowes and will entertain a house-party for the Regatta, the members of which include Princess Margaret of Greece, the Marquess and Marchioness of Milford Haven, Lord Charles Hope, Count de Torby, the Hon. Ruby Hardinge, Miss Viola Meeking, and Mr. William Walrond.

A marriage has been arranged, and will take place on August 10, at St. Matthias, Warwick Road, Earl's Court, S.W., between Captain Myers Babington, M.C., late R.E., third son of Lieutenant-Colonel and Mrs. Babington, of Rothley Mere, Godalming, and Ellen Mary, daughter of the late Theodore Thomas, of Secundra Bagh, Lucknow, and the late Mrs. Thomas.

Ruling Indian Princes, temporarily resident in London, gave a dinner at Hyde Park Hotel on July 25 to meet the Right Hon. E. S. Montagu, ex-Secretary of State for India. The guests invited included several representatives of the department over which Mr. Montagu formerly ruled. The gathering was a purely private, friendly, and non-political affair.

Sir Walter Alexander Raleigh, M.A. D.Litt., of The Hangings, Ferry Hinksey, Berks, Professor of English Literature at Oxford, and before that Professor of English at Liverpool and at Glasgow, the official historian of the Royal Air Force, who died on May 13, aged 60, left estate of the gross value of £11,913, with net personality £10,081.

Brevet-Colonel Sir Arnold Talbot Wilson was married at Ellesmere Church, Shropshire, on Saturday to Mrs. Rose Caroline Carver, widow of Lieutenant Carver, R.N., who was killed on active service in 1918. The bride was given away by Lord Justice Bankes, her uncle, and Canon Wilson, of Worcester, father of the bridegroom performed the rite.

The engagement is announced, and the marriage will take place shortly, between Alexander Cockburn Allison Steven (late 7th Northumberland Fusiliers and Royal Engineers, France), son of Major Alexander Steven,

T.D., F.J.I., Stecarven, Berwick-upon-Tweed, and Margaret (Biddy) Crighton Christison, daughter of Mr. Alexander Christison, of Assam, India, and Horncliffe-on-Tweed.

A marriage has been arranged, and will take place in November next, at St. Thomas's Cathedral, Bombay, between Arnold Albert Musto, M.Inst. C.E., of the Public Works Department, India, younger son of the late Alderman J. J. Musto and of Mrs. Musto, of Bushwood, Wanstead, Essex, and Margaret, second daughter of Mr. and Mrs. W. J. McCausland, of The Square, Magherafelt, co. Derry, Ireland.

A marriage has been arranged, and will take place in London in September, between Kenneth Dowson, Coastguards and Fisheries Service, Egypt, eldest son of the late Herbert Dowson and Mrs. Dowson, of Esher, Surrey, and Dorothy Wynford, only child of Mr. Justice Marshall, Court of Appeal, Cairo, and Mrs. Marshall, of Ghezireh, Cairo, and niece of Lieutenant-General Sir William Marshall, G.O.C. in C., Southern Army, India.

The Bulgarian Minister and Mme. Stancioff gave a reception last week at the Legation in honour of the Bulgarian Delegates to the Council of the League of Nations. Amongst those present were :—Lord and Lady Newton and Miss Legh, Commander Kenworthy, M.P., the Hon. Aubrey Herbert, M.P., Colonel Josiah Wedgwood, M.P., Mr. Noel Buxton, Mr. Leland Buxton, Sir Edward and Lady Boyle, Constance Lady Boyle, Lady Grogan, Major and Mrs. Villiers-Stuart, Mr. H. Charles Woods, Mr. Roland Bryce, Mrs. Matterson, Mr. Walter Scott, Dr. and Mrs. Dillon, Mrs. Mocatta, Dr. Rost, Mrs. Garrett, Mrs. Hancock, Mr. Sidebotham, Mr. Mills, Mr. Gooch, Mr. Convill-Evans, Mr. Ronald Wilkins, Professor Kerridge, Mr. W. H. Nevinson, Colonel Napier, Major and Mrs. Cumberbatch, Mr. and Mrs. Christoff, Miss M. Samuel, Dr. and Mrs. Blagoff, Miss Stancioff and the staff of the Bulgarian Legation in London. The Delegates attending the reception were M. Theodoroff, M. Radeff, Professor Mileff, Professor Neykoff, Colonel Noykoff and Professor Mikoff.

A reception to bid farewell to the members of the Palestine Arab Delegation was held at the Hyde Park Hotel on July 27, under the auspices of the National Political League. The guests were received by Miss M. A. Broadbent, Hon. President. Among the hosts and hostesses and those who sent messages of goodwill were : Mary Duchess of Hamilton, the Duchess of Somerset, the Dowager Marchioness of Bute, the Countess of Shaftesbury, Viscount Curzon, M.P., Candida Marchioness of Tweeddale, Major-General Lord Edward Gleichen, Lord and Lady Queenborough, Lord and Lady Sydenham, Lord Lamington, Lord Leigh, Lord Boston, Lord Sheffield, Lord Parmoor, Lord Raglan, Lord Rotherham, Lady Magdalen Williams-Bulkeley, Sir William Joynson-Hicks, M.P., Sir Robert Clough, M.P., Colonel Sir Charles Yate, M.P., Major Sir Keith Fraser, M.P., Sir Martin Conway, M.P., Sir Michael and Lady O'Dwyer, Sir Arthur and Lady Sloggett, Major Sir Bartle and Lady Frere, Colonel John Gretton, M.P., Captain Charles Foxcroft, M.P., Captain Charles Aisnworth, M.P., and Lieutenant-Colonel Joseph Nall, M.P.

APPOINTMENTS.

Major G. F. W. Anson has been appointed H.B.M. Consul at Bushire, Persia, to date October 13, 1921.

Mr. H. L. Rabino, late Consul at Dar-el-Baida, has been appointed H.B.M. Consul in Cairo, to date May 25.

Mr. C. E. Heathcote-Smith, of the Levant Consular Service, late acting Consul at Durazzo, has been appointed H.B.M. Consul at Casablanca, in Morocco, to date May 25.

Rear-Admiral Sir Richard Webb, commanding the Fourth Battle Squadron, arrived at Smyrna last week in H.M.S. Benbow, and left on July 26 for Constantinople.

Rear-Admiral J. D. Kelly last week hoisted his flag in the battleship Benbow as Rear-Admiral of the Fourth Battle Squadron on the Mediterranean in succession to Rear-Admiral Sir Richard Webb.

The Rev. F. R. Gillespy, principal of the Bishop Cotton School at Simla, is returning from India to England for family reasons, and has been appointed headmaster of the King's School, Gloucester, by the Dean and Chapter of Gloucester.

Colonel Ismail Khan has been appointed Military Governor of Persian Azerbaijan, where martial law has been proclaimed.

Members of the editorial staff of the Communist newspaper *Rizopastis* were arrested in Athens on July 19 on a charge of high treason.

THE POSTPONED CONFERENCE.

Interminable delay clogs the path of the Near Eastern settlement. Now it is a Ministerial crisis in Italy which contributes to a further postponement of the next attempt to find a solution; and as the days and weeks pass the only result is to add fresh complications. There was no reason why the Turkish problem should be in any way linked with the question of German reparations; but at no time has it been considered exclusively on its own merits, and as an outcome of the latest developments it runs the risk of being side-tracked once more. The question of Inter-Allied indebtedness may conceivably have some connexion with the sums of money that the Allies look to recover from Germany, but neither should be used to affect the Turkish settlement, which is a matter entirely apart. The damage done to the Near East is none the less real because there has been as yet no outstanding catastrophe. As the different countries drift farther and farther away from normal conditions, the difficulty of retracing their steps increases in geometrical proportion. Directly or indirectly the whole of the Near East is involved in the prolongation of a state of war between Greece and Turkey. The neighbouring countries have gone so far down the hill of economic embarrassment that the closing of any avenue of trade may be a serious factor for them. No sudden impetus to industry and commerce might be given by the declaration of peace; but at least trade circulation would be restored at a useful point where it has been cut for a long time. Another risk of delay is that both Greeks and Turks are tempted to have recourse to drastic expedients which can only prejudice the cause of peace. The reports of a Greek movement on Constantinople are now proved to be not altogether without foundation. It was indeed hard to believe that King Constantine would sanction any step in deliberate antagonism to the Allies' wishes; but we can only hazard a guess at the difficulties of his position. The Greek Government would seem to have imagined that it was promoting the interests of all concerned by making military preparations for a march on Constantinople, although prepared to hold its hand until the Allies gave the necessary sanction. The situation thus created is essentially a dangerous one; but the Allies have only themselves to blame for it. Again, the Turks have been given time to make the most of their alliance with Moscow and to coquet with a Pan-Islamic union extending into Central Asia.

The last attempt to evolve a settlement of the Near Eastern question was made at the conference of the Foreign Ministers of Great Britain, France and Italy held in Paris in the latter half of March. It was then declared that the guiding principle of the Allied Governments was to re-establish peace between Turkey and Greece without imposing on either country conditions of defeat; to re-establish the Turkish nation and dominion in areas which may fairly be regarded as their own, with Constantinople as capital; to secure fair treatment for Moslems and maintain the secular and religious authority of the Sultan; to compensate the Greek nation for the great sacrifices they have made during the War in the cause of the Allies and to leave them free scope for their national and economic progress in the future; and to provide for the protection and security of the various minorities, whether Moslem or Christian. Passing to specific terms, the Allied Foreign Ministers proposed that the eastern half of Eastern Thrace should be under Turkish sovereignty, with the frontier beginning at Ganos, leaving Rodosto to Turkey and Adrianople to Greece; that Asia Minor should be evacuated by Greek troops and the whole region restored to Turkish sovereignty; that an Allied force should remain in occupation of the Gallipoli Peninsula to ensure that the Straits should not again be closed; that the financial proposals of the Treaty of Sèvres should be modified in favour of Turkey, and that in regard to the capitulations in judicial matters the Allied Powers should set up a Commission, on which Turkey would be represented, to prepare a scheme of judicial reform to replace the capitulary system. As is known, the Governments of Athens and Angora withheld complete acceptance of these proposals, and even the Constantinople Government stipulated that the whole of Eastern Thrace should be placed under Turkish sovereignty. A further conference on the Near Eastern question must face this awkward fact. The stumbling-block in the March terms of peace was the clause dealing with Thrace; the Turks will not consent to its being handed over to Greece; the Allies are anxious to consider Greek susceptibilities as much as possible. In so doing they fall into the error of leaving a common frontier between Greece and Turkey. It is most desirable that this should be avoided, and for this reason the best solution in regard to Thrace is one that interposes a buffer region between the two countries. It can be done, either by giving autonomy to Thrace or by allowing Bulgaria to have once more direct access, through territory of her own, to the Ægean Sea. A further objection to the March attempted settlement is that it makes no provision for a unified Turkey. The Allies are directly interested in a return to normal conditions in Turkey, and must take practical steps to achieve this end. As things are, the scales are weighted in favour of Mustapha Kemal Pasha, who has an organised army in being, while the Sultan and the Constantinople Government may be said to have none.

It is possible that, if more attention were devoted to this aspect of the situation, the Allies might find a solution of their present difficulties. The French have an agreement with Angora, the Italians with the Constantinople Government. From the fact that the Italian withdrawal in Asia Minor, which followed hard on this agreement, indicated some understanding with Angora as well, it may be inferred that Italy has taken out insurance policies for all emergencies. But the tendency on the part of both our Allies has been to regard Angora as the future, no less than the present, seat of power in Turkey. It is at least open to doubt whether the course of events will confirm this theory; already there are indications that Mustapha Kemal's star has passed its zenith, and certain it is that the perpetuation of Angora's authority means a Turkey divided against itself and in all probability civil war, which will postpone still further the day of economic reconstruction in the country. If the minorities in Turkey are ever to be safeguarded by paper promises, they are likely to fare better under the Sultan's Government than in the hands of Mustapha Kemal. From every point of view, therefore, it would seem to be to the interests of the Allies to strengthen the authority of the Constantinople Government and to give it an opportunity to prove whether the inhabitants of Anatolia, are not anxious, when once the Greek menace has been removed, to return ro the allegiance of the Sultan. Mustapha Kemal Pasha, after all, has made common cause not only with the hereditary enemies of the Turks, but also with a system wholly antagonistic to the Turkish spirit. He has placed many a weapon in the Allies' hands, if only they had the vision to use them against him. By so doing they would give a set-back to Bolshevism and inaugurate a new era in the Near and Middle East.

IN PALESTINE AND SYRIA.—II

We are indebted to a correspondent for permission to publish the following letter, written from Palestine and describing a journey made, and some impressions gathered, last month. The views expressed are, of course, the writer's, and are not to be regarded as necessarily endorsed by THE NEAR EAST. *The first portien of this article appeared in our issue of July 27.*

Before we reached Tyre we made the passage of the famous Ladders of Tyre, where no road had ever been until Allenby's engineers blasted the steps away and made a fine new road. Rather a pity to destroy these steps along the cliff edge where, since the dawn of history, the mule and donkey transport has walked up and down again with the baggage of all the great armies that have come down from Assyria and Babylonia through Palestine to Egypt! But then, you see, ours was the first army that had to drive motor cars along this road, and these limestone steps that were good enough for mules and donkeys and have seen all history, had to be blown away. In the old city of Tyre, noted as all the cities of Syria and Palestine are noted for the ruins of a castle of the Crusaders, and a Christian church converted into a Mosque, we met some very dangerously communicative Syrians, who enlarged to us upon the hardships of Syria under the French rule; for French mandated territory begins just south of Tyre. We were told how the taxes to-day are four times what they were in the Turkish days, and how people of the Lebanon have lost their ancient freedom and long for for days of the Turk once more. But we've heard this sort of thing before, and we feel that Frenchmen would hear much the same story about the English in Palestine or Egypt.

Just above Tyre the road crosses, by a fine stone bridge that might have been built by the masons who went from Bishops Castle or Plowden to the Crusades, the river Litany; (pronounced Lee-tah-nee). This river rises in the Lebanons below Baalbek and bursts through the great Lebanon Mountain to reach the sea. It is for all the world like the Teme at Leintwardine, with wonderful pools and riffles where the trout should be, but where there are only catfish and barbel. The banks are all fringed with pink oleanders in full blossom. This river has never known a rod or fly, though it was just made to be fished; only the seine net, and, since the War, a stick of dynamite or a hand grenade in the big pools. Now if the Litany had been in the British Palestine mandate, it would have been stocked with brown and rainbow trout, as has been the Jordan now, long before this. But the Treaty of Versailles cared nothing for the real things of life! A few miles up the Litany just where it bursts through the gorge of the Lebanon is just such another Ludlow Castle perched on the top of a frowning cliff in the centre of two great valleys. To this day it remains almost perfect, but only because marauders would find it too great a task to carry the heavy stones away. Saladin the great King came down from Damascus and stormed it and took the Crusaders prisoner—where do you think to?—why to Cairo! For Saladin was much too wise a Prince to kill the skilled craftsmen who formed so great a part of the Crusader Armies; so he took them down and set them to build another edition of Ludlow Castle in Egypt. This you can see in the Citadel of Cairo and in the old walls, the fine Norman Arches and the masonry that Shropshire masons built. The sagacity of Saladin and the treachery and worthlessness of Saracen prisoners probably accounted for the fact that there was more savage killing of Saracen prisoners at the hands of the Crusaders than there was of the slaughter of Crusader prisoners by Saladin, who was much too wise a Prince to kill a skilled mason or carpenter.

The road north to Beyrout hugs the sea along the Phoenician plain and passes through Sidon, a busy oriental town with a ruined harbour, as at Tyre. Strange how all the fine seafaring qualities of the old Phoenicians have vanished. No longer is there a local fleet, even of fishing boats, in this the very cradle of the navies of the world. I think I can see the old Phoenician blood and race all over Syria in the peculiar flat back to their heads that all the people of the Phoenician plain exhibit. The Arab has a long head, so has the Turk to the North and the Egyptian to the South. But over all the East you can tell a Syrian by the back of his head. But the Phoenician of to-day, though a great wanderer to all America and to all the cities of the Levant, yet goes to sea no more in his own ships.

The plain between Mount Lebanon and the sea is one great carpet of olive groves and vineyards and mulberry trees for silkworms, and corn fields. Here is a finer type of man and a better cultivator than in Palestine. Here is a better farming; and here are fine oil mills and oil presses and silk mills all over the country side. Before one reaches Beyrout one passes the old cemeteries of a once very famous sea-side resort when Phoenicia was a Roman colony. Here Cleopatra is said to have come to pay her fatal but enchanting visit to Anthony.

At Beyrout I stayed for a week with American missionaries, who find their way to the hearts of the people by their hospitals and their schools. You can hear all over the world a lot of loose talk of missionaries, of the futility of their work and proselytizing efforts. But whatever one may believe of the wisdom of substituting Christianity, especially denominational Christianity, for a form of religion which keeps up a perfectly good standard of morality and conduct among the simple people of the earth, there is no doubt whatever of the great and noble work that is done by the English and American Medical Missions in Turkey and the Near East. More has been done to care for and to help the sick and unhappy peoples in this country in fifty years by these medical missions than has been done by the whole Turkish Empire in a thousand years. All that you hear and read of Turkish atrocities towards the wretched Armenians and Greeks of Asia Minor and Cilicia, you can fully believe; and the world has not heard one-tenth of all the savagery. The massacres, and the now more modern system of driving Christian peoples, Armenians and Greeks, into the mountains and down again until they die of starvation or exhaustion are only too true. This refined method of torture by driving the people over the country is now the popular form of cruelty in Turkish Armenia and in Asia Minor. I have it from the missionaries who have just arrived in Syria from these scenes of horror. This new torture is on a par with the banishment of the dogs of Constantinople to one of the islands of the Bosphorus. It is, as you know, one of the tenets of the Moslem faith not to kill. If death occurs from any treatment short of bloodletting, it is the will of Allah: to put thousands of dogs upon a desert island without food is not to kill them: they may eat one another, but that is no affair of the Turk! So, to drive Armenians to death and exposure is not to break the laws of Islam.

And of the new Turkey, as cruel, as relentless and as inefficient as of old, Mustapha Kemal of Angora is the figure-head. He holds that all the Turkish Empire

Digitized by Google

should be purged of Christians and foreigners, that Turkey should be allowed to continue without roads and railways, that the Turk should be free to kill and rob and to harry the Christians and other Moslems, and to let his magnificent country remain in its present state of backwardness and waste. He holds that the Turk should be free to disregard all the rules of hygiene and sanitation, and kill a quarter of the population by epidemics of Typhus Fever. The modern Greeks and Armenians are often contemptible, usurious, clever, pitiless in business methods, devoid of manly qualities, hateful in many ways. They almost deserve, by the economic slavery their clever brains and money lending instincts have forced upon the simple and untutored Turkish peasant, the punishment that periodically falls upon them; but they must not endure in these days the horrors that are their lot just now.

What has the Turk done that he alone should inherit all the fine lands and countries of Asia Minor and keep all others out? He has made nothing and produced nothing, but he has destroyed everything. For the last thousand years the history of Turkey has been the history of decay and destruction of all the great civilizations that have spent so much energy and brain and effort in Asia Minor, Anatolia, Cilicia, and Syria. He has'nt even built his own mosques, but has taken and adapted Christian churches to his own ends. But the Turk has the sympathy of Europe; he is a charming blackguard; and it is difficult for Europeans to believe that one so polite and so delightful could be so savage a monster.

Now to turn to the new rulers of Syria, the French, and the almost universal dissatisfaction with their Administration. They pose as the Saviours of Syria, but it is well not to lose sight of proportion and to remember that it was the British soldier, the Australian, and the Indian, and they alone, who have saved Syria from the Turk. In 1920 after two years of our military administration perfect peace reigned throughout the land from the Taurus Mountains to the Red Sea. To the Turk, the Syrian, the Armenian and Palestinian, dying from hunger and from typhus, the coming of our Army spelt salvation indeed. For with Allenby came in food, hygiene and sanitation, and then typhus ruled no more. I am quoting the authority of the American missionaries who stayed throughout the War when I say that one million out of four died of starvation and disease. There was always food for the Turkish soldiers, but little or none for the civilian population. The policy of England was to support and help what Turkish administration was left, not to wound Turkish feelings by plastering the country with the Union Jack or by making a starving and a ruined country pay and feed victorious troops. So we were respected and loved; but when we handed over Cilicia and Syria to the French, a little prematurely perhaps, but in answer to the virulent French newspaper articles that described England as wanting to hold Syria in spite of our promises to France, there were hardly enough French soldiers, and certainly not of the right type—Colonial Infantry and Senegalese—to hold the country. The Cilicians rose, and the massacre of Urfa took place when 4,000 Frenchmen who had surrendered were butchered by the Turks and Kurds on their way back. Perhaps if we had stayed the country might have risen against us, but the French commandeered food and property and interfered with the women and flew the Tricolour from every building. Then Cilicia became untenable, and to withdraw from an impossible situation the French, advised very badly by Franklin-Bouillon, gave up not only Cilicia, but all the hinterland of Aleppo, Homs and Alexandretta, and the old Hittite capital of Carchemish. To-day it is said that France will resign all Syria except the Lebanon to Mustapha Kemal. Then with the passing of the French came the vengeance of the Turk upon the Christian Armenians of Cilicia, and to the million Armenians slaughtered in the War were added nearly all those that could not escape. The Turk who had lived beside the Armenian for twenty years in friendship rose in response to that spirit of Holy War and brigandage and loot that is always at the back of the Moslem mind when it is inflamed by religious fanaticism and lust for blood. It is not all fanaticism; for the Turk of one town will fight neighbouring Turks who flock to join in an Armenian massacre, crying that "these are our Armenians to kill and to loot!" The rule was, that all men, old women and children are killed, and only the young girls saved to fill the hareems of their oriental conquerors. Now in response to world-wide indignation, the Turk kills no more directly, but drives his victims to the mountains to die of hunger or of cold. The Turks say the Armenians joined the French; and the Armenians say the French disarmed them and then deserted them. It is hard after the experience of some Armenian refugees, notably those in Mesopotamia, to feel very much pity for them. They robbed us of all sympathy by refusing even to cook the rations we gave them, or erect the huts and tents and clean the camps provided for them, but demanded that British soldiers who had relieved them, should perform these offices.

(To be continued)

An attempt has been made to murder Khodchaieff, the President of the Council of People's Commissars of the Soviet Republic of Bokhara.

A service of motor-omnibuses is now working between Baghdad and Aleppo. The journey, by way of Mosul, takes five days, and the desert sheikhs have accepted a lump sum to restrain their tribes from raiding the omnibuses in transit.

The Times understands that funds have been supplied by Jewish organizations to enable some six hundred Jewish refugees from Russia to conform with the financial regulations laid down for immigrants into Palestine by the Jerusalem Government. They will, therefore, be evacuated to the Holy Land as soon as possible.

It is announced in Vienna that Austrian factories have sent in tenders for the supply of material which the Government of India proposes to purchase for the construction of a new telephone system in India, and that a British expert has been sent to Austria to make investigations.

The Rutenberg Concession.

From the statement regarding the Rutenberg Concession which appears on another page it will be inferred that the terms of the concession, although favourable enough on paper, are not in reality such as to cause big contracting firms to tumble over one another in anxiety to find themselves in Mr. Rutenberg's shoes. As things are at present, I gather, the most important section of the English Jewish business world considers that the proposed scheme calls for very careful investigation before any English money is invested in it. In the interests of Palestine, it is to be hoped that the enquiries will prove satisfactory, as I find it difficult to believe that the Palestine Government will allow the Palestinians to be victimised by the company. Indeed, the success of the scheme depends on the ability of the company to provide power at a sufficiently low rate to make the starting of industries feasible. Palestine has done without big industrial undertakings in the past, and will continue to do so, unless special attractions in the way of cheap power are held out to it.

The Imperial Ottoman Bank.

In spite of the fact that the Imperial Ottoman Bank finds itself in a position to resume for the first time since 1913 the payment of a dividend, Lord Goschen, the Chairman, speaking at the Annual General Meeting, refused to indulge in any optimistic forecasts. Political unrest, economic uncertainty and commercial stagnation had been the characteristics of the year under review, and it is obvious that they must be the keynote of the situation during the greater part, if not the whole, of the current year. The effect, however, on the Bank, it is satisfactory to note, has been less severe than might be expected. There had been a satisfactory movement in current operations and in exchange at the chief centres in Turkey, while the agencies in Paris, London, Manchester, Marseilles and Tunis, by increasing their activities, have played a useful part in contributing to the favourable results on the year's working. That the General Committee of the Bank does not allow itself to be depressed by the temporary period of stagnation in the Near East is proved by its policy of opening branches in Persia, Cyprus and Palestine, and in contemplating further extension in regions bordering on those where it has already a system of branches.

The Bank of Roumania.

It must also be set to the credit of the soundness of British banking that, in spite of the adverse conditions existing in the Near East, the Bank of Roumania can show a profit of over £25,000 for the year 1921, although a dividend had to be passed. In the case of Roumania Lord Goschen was not afraid of striking a more hopeful note than he did in referring to Turkish affairs. The considerable increase in taxation, he pointed out, and the efforts which the Government is making to stabilize the financial situation should have the effect of bringing about gradually the balancing of the budget. For another year there is a good prospect of a materially increased harvest; the output of unrefined petrol shows steady improvement, and there are considerable timber resources both in Old and in New Roumania awaiting exploitation to constitute one of the country's principal exports. In the meantime, however, the leu remains in the neighbourhood of seven hundred to the pound sterling—an obvious index of the amount of hard work in the way of production that has to be accomplished before the way of prosperity opens out clearly to the country.

Roumanian Finance.

The report coming from Roumania that arrangements for the consolidation of the Treasury Bonds had already been concluded, to which reference was made in these Notes last week, now appears to be premature. At one time, it would seem, the Roumanian Government had an opportunity of clinching the matter in Bucharest, but it delayed, and from both sides, on the part of the Roumanian public as well as from the bondholders, difficulties arose. A Bucharest message to Paris now states that the objections of the French bondholders have been successfully overcome, but it will be well to await further information before it is taken for granted that the funding process is complete.

Balkan Oil.

With its agreement with the Greek Government by which it obtains petroleum rights over Macedonia, as demarcated by the Peace Treaty, the Anglo-Persian Oil Company would seem to have rounded off the sphere of its activities. It is now responsible for exploration operations in Yugoslavia, Albania and Greece. Whether Bulgaria will also come under its aegis remains to be seen. Oil shale is known to exist there in extensive fields and work on a large concession west of Sofia where the prospects are regarded as being most favourable, will ultimately be begun. The existence of oil wells, commercially workable in any of these countries has yet to be proved. In Yugoslavia several tantalising disappointments, it is understood, have been experienced, but there is at least the assurance that at the hands of the Anglo-Persian Oil Company no effort will be spared to discover oil in paying quantities.

BANK OF ROUMANIA LIMITED
(FOUNDED 1866)

Exchange Fluctuations.

A striking example of the disadvantages attending an improvement in exchange, if it should be too rapid, was afforded by the fluctuations a month ago in the Czecho-Slovak krone, which has been the steadiest as well as the least depreciated of the Succession States' currencies. In the course of a week the London exchange rate at Prague declined from 230 to 185 kronen, as a result, it is supposed, of the publication of favourable trade returns, of the harvest prospects and of international speculation. A considerable portion of the business of the country was at once disorganised, particularly the sugar, textile and glass industries. The Czecho-Slovak Government felt constrained to set about buying foreign exchanges, and the value of the pound sterling at once improved from 185 to 218 kronen. Constantinople has also experienced marked fluctuations. After a continual rise in the number of piastres to the pound sterling, there was a sudden drop of 44 points, followed by a rise in one day of 21 points. In the absence of any other likely reason, these movements were attributed to speculation by local brokers. The Turkish Government was not in a position to intervene helpfully, but the Allied police raided the Exchange and arrested a number of brokers who were tried and sentenced to fines or terms of imprisonment.

Hostile Tariffs.

In the face of a depreciated currency which shows a tendency to sink lower and lower it is an inevitable temptation to most Governments to seek relief in increased custom duties and in some cases in fresh export taxes. They can hardly be blamed in the circumstances; but it is permissible to draw attention to the danger of allowing present difficulties to dictate a policy that may seriously retard a country's economic recovery. It is easier to impose a tax than to take it off, in spite of the overwhelming desire of a rival political party to gain popular favour at the expense of its predecessors in office. The subject of tariffs is of particular importance to the Near East, where increased production is so often bound up with the importation of machinery and implements, as well as to Great Britain, who does not wish to see markets uselessly closed to her products. There can be no golden rule in the matter; but in view of the fact that all the countries of the world are confronted with the same problem of economic depression, it would be well if every Government approached the question in a broad-minded spirit, taking counsel, if need be, where it can, rather than that it should act shortsightedly in the interests of the moment.

A Notable Success.

I am interested to learn that Messrs. W. H. Allen, Sons and Co., Ltd., of Bedford, have obtained an order from the Sudan Plantations Syndicate for a large pumping plant. The success of this well-known firm is the more gratifying as it was obtained in the face of strong foreign competition.

Commentator.

BANQUE FRANCO-SERBE

Capital - Frs. 20,000,000.

London Office:—

Current Accounts opened in Sterling, Francs, Dinars, etc.
Insurances effected through the Bank's Brokers.

Applications for Terms invited.

CZECHO-SLOVAK GLOVE INDUSTRY.

Competition with other Countries.

The glove industry is of considerable importance to Czecho-Slovakia, and at present the situation is rather unfavourable owing to the difficulty of competing with Germany and Italy for foreign markets. In Germany, the cost of labour is about 25 per cent. lower than in Czecho-Slovakia, and in Italy it is said to be even less. The trade is further embarrassed by a shortage of skilled workers. In certain sections of Bohemia the glove factories suffer from a lack of skilled labour to such an extent that hundreds of machines are no longer in operation, and the pre-war production of 2,800 to 3,000 dozen pairs of gloves a week has fallen to about 200 or 250 dozen pairs. According to the American Consul at Prague, the principal export districts for the glove industry in Czecho-Slovakia are Prague, embracing the cities of Tabor, Lysa, and Tuskov; Rudohori, embracing Kadan, Abertany, Berinky, Jachymov, Blatno, Hroznetin, and Wiesenthal; Brno and Losice in Moravia; and Fryvaldov in Silesia. These districts show many variations with respect to the manner of production, and the kinds and qualities of gloves produced. Washable gloves are principally manufactured at Kadan, and kid gloves, of which there is a considerable domestic consumption, in the mountain districts. In Prague, the production is varied, part of the output being finished at homes in Rudohori. Of the total exports of leather gloves during last year, amounting to 81,400 kilos. (179,445 lb.), 51,200 kilos. went to the United Kingdom, other countries purchasing over 3,500 kilos., being Austria, the Netherlands and United States.

ZINC PRODUCTION IN INDIA.

In the great tonnage of zinc ores now proved to exist at the Bawdwin mines of the Northern Shan States, India possesses reserves of zinc not only sufficient to supply her own needs, but a surplus which will make her the most important new post-war factor in the world's supply of ore, says the Chamber of Commerce *Journal*. The silver-lead and zinc ore deposits of the Bawdwin mines are remarkable for their size and richness. The ore channel is stated to be at least 8,000 feet long and 400 to 500 feet wide. Within this zone two important ore bodies have been opened up. The first of these probably contains, as far as it has been explored at present, some 4,230,000 tons of ore, averaging 27.6 per cent. lead, 19.0 per cent. zinc, 0.5 per cent. copper and 25.0 oz. of silver per ton of lead. This estimate does not include ore containing less than 20 per cent. combined lead and zinc, though very large quantities of such material are known to exist. The second ore body consists of a mixture of the sulphates of lead and zinc, with larger quantities of the sulphate of copper. A recent estimate of the proved and probable ore in this body places the total at 489,780 tons, averaging 15.9 per cent. lead, 11.5 per cent. zinc, 6.7 per cent. copper, and 20.5 oz. of silver per ton of lead. In addition to these two ore bodies several others are known, but up to the present time they have not been developed to any great extent. A distillation plant is now being erected at Jamshedpur, adjoining the steel works of the Tata Iron and Steel Co., Ltd., in which it is proposed to treat 25,000 tons of high-grade zinc concentrates per annum, and to recover sulphuric acid as a by-product at the same time. This plant is estimated to produce approximately 10,500 tons of spelter and 25,00 tons of suphuric acid per annum.

THE RUTENBERG CONCESSION.

With the overwhelming majority secured by the Government in the debate in the House of Commons on the Palestine Mandate and the Rutenberg Concession and with the sanction of the Mandate by the Council of the League of Nations, the ground has been cleared for the business side of the undertaking. As a result of Mr. Rutenberg's efforts in the United States there is reason to suppose that promises of the requisite amount of capital to enable the Jordan concession to be taken up have been secured. But, as has already been pointed out in THE NEAR EAST, the concession was never meant to be one man's perquisite, although it was somewhat inadvisedly given to a single concessionaire. The latter could hardly have carried out his elaborate investigations and have satisfied the British and Palestine Government, if it had not been known that he had behind him the important backing of such leading men in Jewry as Lord Rothschild and Sir Alfred Mond. The same credentials will have stood Mr. Rutenberg in good stead in the United States, and it is satisfactory to know that his supporters over there are keen to make the development of Palestine the common concern of British and American Jews. The only possibility of a hitch would seem to be in the desire of leading British Jews to subject the concession to a more exacting investigation than was considered necessary in America. Mr. Rutenberg, who is now in England, is naturally anxious to return as soon as possible to Palestine; but he rightly appreciates the advisability of being able to merge his personality in that of an Anglo-American company which would virtually represent the whole of Jewry. It remains to be seen, therefore, whether his American supporters have made their promises of contributions strictly conditional upon the co-operation of the British organisation that has to come be regarded as the prime mover in the non-political economic development of Palestine as distinct from the Zionist Organisation, which is so closely identified with the political side. If this American stipulation does exist, Mr. Rutenberg might have to defer his return to Palestine for some time; otherwise he can content himself with the measure of American support already obtained, and leave the Economic Board for Palestine to join the undertaking when its investigations of the scheme have been completed.

What is known as the Rutenberg Concession is really two concessions. The first is connected with the Auja basin and is a scheme for generating electric energy and utilising waters for the purpose of irrigation. The major concession is connected with the Jordan. This concession is for a period of seventy years, entailing the exclusive right to utilise the waters of the Jordan for purposes of generating electric energy and for supplying the energy so produced. In the case of both concessions provision is made for the Government to take over the undertaking at the end of the concession period on payment of the value as ascertained in a prescribed manner. In the event of the two concessions being taken up by one and the same Company, the Auja basin concession, which is for a period of 32 years, will be prolonged for the same period as the Jordan concession, and will be treated as part of the latter. The Jordan concession contemplates the formation of a company with a nominal capital of £1,000,000, of which £200,000 will be paid up. The price to be charged for the power supply is fixed, and, according to the terms of the concession, in any year in which, after writing off sums required for amortization or depreciation or reserve, the profits are sufficient to pay a dividend between 10 and 20 per cent. tax free, then half the net profits will be paid to the High Commissioner; if in any year such profits exceed 20 per cent. then the whole of the profits exceeding the amount required to pay a dividend of 15 per cent. will be paid to the High Commissioner. The amount thus placed in the hands of the latter will be applied to the reduction of rates and other purposes according to agreement.

If any tax is imposed in Palestine which would fall upon the profits of the Company, during the first ten years of its currency any part of the profits actually devoted to amortization, depreciation and reserve is to be regarded as expenses and not profits, so as to be free of tax; no tax is to be levied during the first ten years until the profits over and above expenses have been sufficient to pay cumulative dividends of not less than 6 per cent., tax free.

The Company holding the concession will be liable to pay customs and import duties, but payment of these amounts will be deferred, if the Company so wishes, until its profits enable a dividend of 8 per cent. to be paid. A further service rendered to the Company is that all pre-existing valid concessions that can in any way be regarded as clashing with the new concession are to be annulled by the High Commissioner on the payment of fair compensation by the Company.

Pre-supposing that a Company is formed to take over the Jordan concession granted to Mr. Rutenberg, we may reckon that two or three years will elapse before the power house has been erected and the scheme is in working order. It is understood that Mr. Rutenberg has gone thoroughly into all the details of his scheme, and in regard to expenditure there is no reason to suppose that his estimates cannot be accepted as safe. What yet remains to be seen is whether any data exist for an accurate estimate of the consumption per head of the population in Palestine of electric light and power. In regard to this point it is obvious that it is eminently desirable that the Arab population should welcome the scheme and appreciate the advantages offered to the country from it. It will no doubt prove of considerable advantage to the concessionaire company that the Palestine Government has undertaken to electrify the Jaffa-Jerusalem railway—an interesting experiment in the case of a line which at present runs barely half a dozen trains a day.

ADVERTISING PROPAGANDA IN EGYPT.

Popularity of Films.

Mr. E. H. Mulock, in his report on the Economic and Financial Situation in Egypt, states that film advertising is becoming more popular, as is also the complete film of the working of various factories in different countries, and also the views of interesting or beautiful European scenery. It is to be regretted that United Kingdom manufacturers have not extended this form of advertisement to Egypt, while views of characteristic parts of the country and seaside of Great Britain, and of every-day life in large cities in the United Kingdom, would be appreciated in Egypt by many European residents who take more than a passing interest in Great Britain and the British. Apart from film advertising, advertisement of every description is becoming every day more widespread in the cities of Egypt, but, with the exception of one or two trade associations, British commercial concerns are very much behind their competitors in this respect.

Owing to the cosmopolitan nature of the inhabitants of Egypt, the illiteracy of a large proportion of the native population, and the inaccessibility of large centres of population outside the chief towns, it is a matter for regret that advertising and commercial propaganda are not widespread in the Provinces, particularly when it is considered that Egypt is a country of quickly changing and uncertain fortunes as the result either of fluctuations in the price of cotton or of political unrest. Advertisement is the only way in which either new or old firms can hope to capture or maintain the Egyptian market, and it should be remembered that the more novel the advertisement the more likely it is to bring about the desired results. A prominent firm of cigarette manufacturers has by gradual stages elaborated a most comprehensive advertising campaign by the issue, with each box of their cigarettes, of coupons entitling the purchaser to rebates on cinema theatre tickets, on goods ordered at certain shops; as well as to free copies of certain newspapers.

Visitors to Palestine entering the country by land who fail to produce a proper *visa* on their passports have to pay a surtax of PT.50 (10s. 3d.) over and above the emergency *visa* supplied at the frontier, the fee for which varies from PT.230 (£2 7s. 2d.) in the case of United States subjects and Mexicans, to PT.45 (9s. 2d.) for most other people.

THE MINERAL WEALTH OF ASIA MINOR.

One of the many questions with which Germany was preoccupied at the outbreak of the European war was the exploitation of the mineral wealth of Asia Minor. Everyone is aware that the problem of obtaining the raw materials indispensable for the needs of her industry, and particularly those necessary for the manufacture of war material, was one which Germany had much difficulty in solving. Therefore, as soon as Turkey entered the war as an ally of the Central Powers, special missions, composed of geologists and mining engineers, were sent from Germany to Asia Minor with a view to exploiting the vast regions there and ascertaining whether the theory that these contained unlimited and, so far, unexploited mineral wealth, was correct. What was the result of these investigations? From statistics published later it transpires that although expectations were not fully realised, there is at least no doubt that Asia Minor possesses important mineral deposits and that conditions for the work of development are more or less favourable. As a matter of fact numerous mines were exploited during the war, while many others, which are lying at a considerable distance from the ports or the railway lines, could easily be exploited when internal communication is improved. The most interesting deposits, the working of which commenced some time ago, are those existing in the Broussa vilayet and the Smyrna region.

According to the *Journal de la Bourse* of Athens the following are the principal minerals which occur in western Asia Minor, now occupied by the Hellenic Army :—

Emery.

Emery deposits exist in the Mesozoic beds of the Aghadjah vilayet, near Hassan Tchaouchlar, on Mount Gumuch, and generally in the districts lying between the Meander and Caistre rivers. The emery of Asia Minor is considered of an inferior quality to that produced in the island of Naxos. The output in 1913 attained 40,000 tons, the average annual production amounting to 20-30,000 tons.

Chrome.

There are numerous chrome deposits in the Broussa vilayet, but their development has been handicapped by inadequate means of internal communication. The most important of these deposits occur at Tchardi, about 70 kilometres N.W. of Kutahia, where the probable reserves are put at 10 million tons with 50-56 per cent. Cr. 203. These deposits are considered the most important in the world, and the richest in percentage of chrome. Under the Ottoman Government their annual output attained 12-15,000 tons. Other important but smaller deposits exist at Coslountia and at Mirankeuy (6-7,000 tons annually), also at Ineghiol (1,500 tons per annum).

Iron.

Important iron ore deposits exist at Ayasmant at a distance of about 12 kilometres from the coast north of Smyrna. The ore contains 60-65 per cent. iron and is free from noxious elements. Although no estimates of the reserves at Ayasmant are available, these are believed to be very extensive. There is a very promising deposit of argillous iron near Vourla (about 35 kilometres from Smyrna). Iron ore occurs also near Torbali, at a distance of 3-4 kilometres from the Smyrna-Aidin railway line (about 45 kilos from Smyrna). The potential reserves in this district are estimated at 10 million tons, the percentage of iron being 60-65 per cent. with 30 per cent. manganese. Unfortunately the value of this iron is diminished owing to the presence of arsenic, of which there is a fairly large percentage.

Lead and Zinc.

The most important deposits of lead ores exist at the mines at Balia-Karaidin which are exploited by a Franco-Turkish company. The output during the four years preceding the war was as follows :—Ore, 1910, 124,764 tons ; 1911, 119,301 tons ; 1912, 130,345 tons ; 1913, 120,299 tons. Lead (98 per cent.), 12,749 tons ; 12,407 tons ; 12,535 tons ; 13,916 tons. Blende, 5,298 tons ; 6, 231 tons ; 5,258 tons (Zinc 42 per cent.). The total probable lead ore reserves at Balia-Karaidin are estimated at 350,000 tons.

Mercury.

Mercury is to be found at Kara Bournou, near the village of Monastir where the mine is worked by a British company, titled the " Karaburnu Mercury Syndicate." The output of this mine amounted to 108 tons of mercury in 1908 ; in 1911, however, only 46 tons were produced. In addition to that at Kara Bournou, there are a few more mercury mines of secondary importance. The total output of mercury in Turkey was 142 tons in 1918 and only 55 tons in 1919.

Antimony.

The most important deposits of antimony occur at Tsinlicaya, 20 kilometres N.E. of Odemiche. According to the figures compiled by the Ottoman Government the figures for the output from 1902 to 1911 are as follows :—1902, 152 tons ; 1903, 105 tons ; 1904, 238 tons ; 1905 493 tons ; 1906, 849 tons ; 1907, 397 tons ; 1908, 146 tons ; 1909, 62 tons ; 1910, 362 tons ; 1911, 697 tons. Deposits of a minor importance exist at Guenik, Guemetchifflik, Halikeuy, Kizil-Dag, Aivandjist, and Sekikeuy.

Manganese.

There are about 38 deposits in the Smyrna region. In 1900 the average annual output of the mines at Hassan Tchaouchlar, Yenidjekeuy, Cardia, and Aktché amounted to 1,000-1,500 metric tons.

Pandermite.

This occurs at Sultan-Tchair, 65 kilometres south of Panderma. The mine is worked by a British concern called the Borax Co., Ltd. The output in 1913 amounted to 18,000 tons, the price being 550 drachmae per ton F.O.B.

Lignite.

The principal deposits are those at Soma, N.E. of Smyrna. Their thickness is about 15 metres and the heating power of the lignite is 5,200 to 5,400 calories.

Cable Address: "Lobo, Dundee." **LOW & BONAR, Ltd., Dundee, Scotland.** *All Cable Codes used.*

Manufacturers of **JUTE SACKS and JUTE CLOTH for all purposes**
Also of WATERPROOF CANVAS and TARPAULINS, YARNS, TWINES, ROPES, etc.

Power House Economics.

With the cost of high grade fuel as high as it is at present any and every economy that can be effected in the power house is worth while. It is admitted that little is to be gained by using a fuel of inferior quality, unless some improved method of stoking or of burning the fuel is adopted. It will, of course, be a matter for consideration as to whether the method of obtaining power adopted is the most suitable; it may be that a cheaper method could be installed without trouble or undue expense. All such matters as plant substitution should neither be adopted nor dismissed without a very careful weighing of every point and item, and every subsidiary cost must be taken into full account.

An item which is becoming more and more appreciable is that of water. Provided that an efficient cooling system is used, an efficient steam plant should not use more than one gallon per brake horse-power hour, and under favourable conditions it may be taken that a producer gas plant and gas engine will use approximately double that amount under ordinary circumstances. With new plant and expert labour it is true that the water consumption of a gas plant would not be much higher than that of an average steam plant, but ideal conditions are rarely met with in power houses, and it may be taken that the water consumption will approximate to that mentioned.

It must, however, be remembered that the quantity of water to be cooled for condenser purposes in a steam plant will be double or treble that needed for cooling a gas engine. Further, the actual quality of the water available must be taken into account; hard water will have to be treated and softened before it can be used in a condenser other than one of the surface type, whereas in a gas or oil engine hardness of the cooling water is a matter of little moment.

The cost of water is, of course, only one of the items to be taken into account in comparing the running costs of various prime movers, otherwise there could be no question as to the superiority of the electric motor which requires no cooling water, so far as the ordinary types are concerned. Oil consumption per brake horse-power hour is a most important matter; the question as to whether any of the waste heat can be utilised is another, and the reliability, durability, depreciation cost, upkeep cost and cost of replacement for various types of plant are all matters that should be gone into as carefully as possible.

Research and Resources.

The opinion has been expressed frequently that we should make greater use of our resources, both in this country and throughout the Empire, in the shape of raw materials, but before we can do this some comprehensive plan for the training of research workers must be devised. The general view is that the cost of such training should be borne by the State as a whole; it is argued that as a whole the State will benefit, and that it is mere equity, therefore that the general public should bear the cost.

There is, however, another aspect from which the subject can be viewed; this is that as research work is to be carried out to enable industrial methods to develop, research will primarily be to the benefit of the trades concerned. Research in engineering is certainly to the benefit of the nation, but primarily it is the engineering trades who would enlarge their scope and reap the principal advantage, and it would seem, therefore, that the chief proportion of the cost as well as the chief labour should be borne by engineering firms. It certainly seems the duty of engineers to study this question, and a large number have already recognised the fact. Our great technical engineering centres of education such as that of Manchester and the City and Guilds of London Institute are paying considerable attention to new material truth, and it is clearly the duty of all to assist experimental work in the sciences. A larger measure of support should be given by manufacturers to these centres of technical education. Some little time ago it was suggested that possibly our industrial research laboratories, unaided, could supply the deficiency of scientific research and its teaching, but in no way do these seem adequate to meet the real need of the country. A further aspect of the situation is that it is impossible to train men in industrial application of scientific discoveries, brought about by research work, without an adequate supply of teachers. The day of the individual research worker would appear to have passed and large numbers of trained men are necessary to enable research work to be carried out in an organised manner. It would seem that in the engineering industry at any rate, and probably also in the fine chemical industry, the time is ripe for a conference between the representatives of manufacturing firms and of technical colleges and other educational centres, to discuss the subject in all its bearings, and to decide upon a course of action which shall be directly to the benefit of the industries concerned and, indirectly, to that of the country generally. In connection with this subject it will be remembered that Sir Henry Miers, F.R.S., one of our greatest authorities on technical education and research work generally, expressed the opinion that the calling of industrial specialists into the lecture room was most desirable, and he added that in his view too much attention was being given to the needs of the rank and file of the profession, and not sufficient to training men for the broadest and heaviest responsibilities.

Although much remains to be done, considerably greater steps have been taken in this direction than are known to the general public. British universities are getting more closely into touch with industrial organisations and are ascertaining their needs. Firms are introducing scholarships to train qualified young men for research, and a strong demand for non-vocational training is now being met by universities and technical institutes. Unfortunately there is a tendency amongst workers in engineering shops to view with suspicion any training which seems designed to improve and increase their productive capacity, but it should be by no means a difficult matter to make clear the fallacy which underlies that attitude.

It is announced that by a Decree of the Minister of Commerce Prague, the tax on the export of linen yarns has been abolished.

SHIPPING INTELLIGENCE.

SHIPPING AT THE PIRAEUS.

(*From Our Own Correspondent.*)

Athens, July 15.

During the month of June (o.s.) 477 steamers entered the Port of Piraeus, of which 388 were Greek, 31 Italian, 24 British, 7 French, 3 American, 3 German, 3 Dutch, 1 Danish, 1 Swedish and 1 Norwegian. Sailing vessels numbered 479 of which 470 were Greek.

The receipts of the Piraeus Customs House during the month of June (o.s.) were drs. 15,545,508.15 as compared with drs. 5,134,285.50 during June, 1921. The increase to a large extent on is due to the increased taxes and the rate of exchange.

AMERICAN FREIGHT RATES LOWER.

At a meeting of interested lines at New York recently, it was decided to reduce freight rates from United States ports to India, the cuts ranging from 2 to 5 dollars a ton on various commodities.

Some of the rates changed include :—to the Karachi, Bombay and Columbia section, general cargo cut from 21 dollars to 16 dollars; machinery from 20 dollars to 14 dollars; automobiles from 16 dollars to 14 dollars; cotton domestics from 16 dollars to 12 dollars. In the Madras-Rangoon district rates were named carrying a 2 dollars differential on the foregoing.

ITALIAN COMMERCIAL TOUR IN EASTERN MEDITERRANEAN.

The *Popolo Romano* announces the organisation by industrial and agricultural interests in Umbria and the Marches of a commercial voyage in the Eastern Mediterranean. The venture is supported by the Italian Government, of which several members are on the organising committee. The s.s. Milano, 3,400 tons, belonging to the Societa Italiana Servizi Marittimi of Venice, has been chartered, and is due to sail from Venice on August 12. After calling at Ancona, Bari, and Brindisi, it will proceed to Corfu, Patras, Salonika, Constantinople, Smyrna, Rhodes, Beyrout, Haifa, Jaffa, Port Said, Alexandria, and Candia, returning to Venice by September 15. Prices for the voyage are :—First class, 4,600 lire; second class, 3,800 lire; and third class, 2,500 lire. Passengers are allowed to take about 4 cwt. of samples free.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis :—

Anchor Line.—S.s. Castalia for Bombay (Liverpool, August 11); s.s. Scindia for Bombay (Liverpool, August 18).

Anchor Brocklebank Line.—S.s. Anchoria for Port Said, Colombo, Madras and Calcutta (London, August 5); s.s. Stockwell for Calcutta (Birkenhead, August 9); s.s. Malakand for Calcutta (Birkenhead, August 21); s.s. Mahanada for Port Said, Colombo, Madras and Calcutta (London, August 26).

Bibby Line.—S.s. Rialto for Rangoon (Middlesbrough, August 12); s.s. Oxfordshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 16).

British India Line.—S.s. Mangela for Colombo, Madras and Calcutta (London, August 18); s.s. Trelevan for Bombay and Karachi (London, August 19); s.s. Howra for Colombo, Madras and Calcutta (London, September 2); s.s. Madura for Bombay and Karachi (London, September 8).

Byron Steamship Line.—S.s. Maid of Hydra for Patras' Piraeus, Constantinople, Constantza, Sulina, Galatz, Braila, Volo, Salonika, Smyrna, Bourgas and Varna (Liverpool, August 15).

Clan Line.—S.s. Clan Urquhart for Bombay and Persian Gulf (Manchester, August 8); s.s. Clan Macbeth for Colombo, Madras and Calcutta (Birkenhead, August 10).

Cunard Line.—S.s. Sea Serpent for Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Liverpool, August 8); s.s. Tyria for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk, Poti and Batoum (Glasgow, August 18).

Ellerman Line.—S.s. Marovian for Gibraltar, Malta and Alexandria (Liverpool, August 12).

Ellerman's "City" Line.—S.s. Kabinga for Calcutta (Birkenhead, August 5); s.s. Urbino for Bombay and Karachi (Manchester, August 14); s.s. City of Christiania for Calcutta (Birkenhead, August 19); s.s. City of Poona for Calcutta (Birkenhead, August 30).

Ellerman's "Hall" Line.—S.s. City of Hankow for Bombay, Karachi, the Punjab and Malabar Coast ports (Liverpool, August 22); s.s. City of Simla for Bombay, Karachi and the Punjab (Liverpool, August 30).

Ellerman's Westcott and Laurance Line.—Regular sailings fortnightly for Malta, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

Glen Line.—S.s. Glenogle for Port Said, Port Swettenham, Singapore, etc. (London, August 10); s.s. Glenapp for Port Said, Port Swettenham, Singapore, etc. (London, August 24).

Harrison Line.—S.s. Author for Calcutta (Liverpool, August 16).

Henderson Line.—S.s. Pegu for Port Said and Rangoon (Birkenhead, August 9).

Holt Line.—S.s. Orestes for Port Said, Port Swettenham, Singapore, etc. (Swansea, August 10); s.s. Agamemnon for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 17); s.s. Helenus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 17); s.s. Knight Garter for Port Said, Port Swettenham, Singapore, etc. (Swansea, August 17); s.s. Polyphemus for Port Said, Port Swettenham, Singapore, etc. (Swansea, August 17); s.s. Yangtsze for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 25).

Johnston Line.—S.s. Dromore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, August 19).

Moss Line.—S.s. Hatasu for Gibraltar, Malta, Syra, Piraeus, Smyrna, Salonika, Constantinople, Bourgas, Varna and Constantza (Liverpool, August 5).

Papayanni Line.—S.s. Bavarian for Mellila, Malta and Alexandria (Liverpool, August 5); s.s. Cressado for Algiers, Malta, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, August 12).

P. & O. Line.—S.s. Lahore for Colombo, Madras and Calcutta (London, August 5); s.s. Malwa for Bombay (London, August 11); s.s. Kaisar-I-Hind for Bombay (London, August 25).

Prince Line.—S.s. Cyprian Prince for Tunis, Malta and Alexandria (Manchester, August 5).

ANCHOR LINE

Anchor Line (Henderson Brothers), Ltd
16, Gracechurch Street, London, E.C.3.

Sir George Buchanan, K.C.I.E., of the firm of Messrs. Meik & Buchanan, Civil Engineers, 16, Victoria Street, London, S.W.1., has been commissioned by the Government of the Union of South Africa to report upon and prepare a scheme for the construction of a harbour on the northern coast of Zululand. The new port will be situated at Kosi Bay, and will, says Reuters Trade Service, be especially designed and equipped for a large export coal trade. Sir George Buchanan leaves for South Africa almost immediately.

Stock and Share Markets.

MARKETS GENERALLY WEAK.

Foreign Stocks Lower.

(From Our Own Correspondent.)

London, Tuesday Morning.

Almost without exception a dull tone has permeated the markets this week, and in the majority of cases prices are lower on balance. For this condition the general political situation and the depreciation of the mark are responsible, the latter factor being a particularly potent influence. It is not so long ago that the mark stood at 900 for sterling: now the rate is about 3,000, and it seems only too probable that we have by no means seen the end of the decline. The fact is that Germany has been enjoying a purely fictitious prosperity, similar in character though not in degree to our own post-war-boom. I need hardly point out what has happened in our own case, and it would seem that Germany is now to experience the consequences of an unreal trade revival. What the consequences may be in her case it is difficult to foresee, but that they may be very serious is as certain as it is that the effects will not be confined to Germany. In the circumstances it is not surprising that the markets should be depressed.

Gilt-Edged Lower.

Gilt-edged descriptions have naturally been affected by the prevailing influences. Consols have remained fairly firm at 59¼ which is only ¼ lower than a week ago, but the Conversion Loan at 76½ shows a fall of 9-16, while War Loan Fives are 3-16 lower at 100½. Indian stocks have been fairly steady. The Seven per cent. Loan is ½ down at 119½, the 3½ per cent. Loan is ¼ lower at 68¼, while the 3 per cent. Loan is ½ down at 59.

The foreign group has, of course, been affected by the currency fluctuations. German 3 per cents. are down to 1⅜, a decline of 3-8. French stocks have weakened, War Loan Fives at 38 being a point down, while the 4 per cents. are 1¼ lower at 30¼. Czecho-Slovak 8 per cents. have sagged to 90, a drop of 1½. Russians have been dull and neglected, the 1906 Loan being 11, the 1909 Loan 8, and the 1889 Loan 7. Greek Monopolies are about the same at 33½. Turkish Unified, exceptionally, have hardened and are ⅜ up at 34⅜. In South American securities Brazils have been dull. Peru Corporations have reacted somewhat, the Ordinary being 4 and the Preference 26½.

Industrials Dull.

A very dull tone has characterized the Industrial group. There have, however, been a few bright spots, notably Watney Combe Deferred which rose to 63½ on the announcement of the increased dividend. Tobaccos have been fairly steady, with Bats at 84s. 3d., a decline of 3d., and Imperial Tobaccos at 66s. 9d., the same as before. Textiles have been somewhat dull, Courtaulds being 50s. 9d. x.d., while Coats are 64s. 6d. Dunlops are 3d. down at 8s. 6d. Iron and Steel shares have shown little change. Vickers are 12s. 6d. x.d., Armstrongs are 6d. down at 16s. 6d., but Guest Keens are 3d. up at 35s. In Indian railways Bengal and North Western are ⅜ up at 135¼, Bengal Nagpurs are a point up at 90½, Burmas are 101¼, while Madras and Southern Mahrattas are 104¾.

Oils Weak.

It has been a bad week in the Oil market which has been severely affected by the mark, a heavy tone prevailing, and prices generally being lower on balance. Anglo-Persian Ord are unchanged at 5, while Burmahs are 5-32 x.d. Mexican Eagles have sagged, and are down to 2.27-32. Trinidad issues have been comparatively steady, Apex being 2.1-16, a decline of 1-16, while Centrals are 1.5-8 as before, and Leaseholds are 1.1-8.

Among Egyptians Anglo-Egyptian B are 1.5-16, a drop of 1-16, while Oilfields of Egypt are 4s. 3d., at which they are 1s. 3d. up on the previous week. In the Roumanian group Phoenix are 3d. up at 26s. 9d., Dacia Romanos are 1-8 down at 7-8, Steaua Romanas are 9d. lower at 9s. 9d., while Roumanian Consolidated are 3d. down at 16s. 9d.

Banks Steady.

In Banking descriptions Chartered are unchanged at 18, while National of India are the same at 43¾. P. & O. Banks are 13-16 up at 11, while Bank of British West Africas remain at 4⅜.

Egyptian securities have been steady. Aboukirs are 3d. down at 20s. 9d., Beheras are unchanged at 8, Egyptian Markets are 21s. 6d., while Gharbieh Lands are 1-32 up at 1.5 32.

Cotton & Cotton Goods.

MANCHESTER COTTON REVIEW.

Desultory Business.

The cotton trade review of the Imperial Ottoman Bank for the week ended July 29 states :—

General.—Only a very desultory trade has again been done during the past week. For no market has there been a demand of any importance and there is, as a consequence, a good deal more weakness amongst producers. When actual business is negotiated sellers are willing to grant considerable concessions from their nominal quotations, but even so buyers have shown no disposition to operate, and it is evident that they believe that by waiting they will get in at still lower figures. The change in sentiment as compared with a few weeks ago is very pronounced, and if the present conditions continue for even a little time longer it is to be feared that much of the machinery which was then restarted will again become idle.

Yarn.—This section has been so quiet during the past week that there is renewed discussion as to organised short time in the mills. Stocks are being accumulated again, and many of the spinning companies are known to be in a somewhat precarious financial position. A certain amount of relief is being obtained by reason of the annual weekly holidays in several of the manufacturing centres, and the suggestion has been made that in Oldnam, which is by far the most important of those centres, the break should be extended to two weeks. Quotations generally are more irregular and reduced from ⅛d. to ¼d. as compared with last week end.

Cloth.—There is really nothing to report in this section; business has been lacking for all markets. News from India with regard to the monsoon continues to be quite favourable, and it is hoped that in due course this will have the effect of bringing more orders from that country.

Raw Cotton.—A certain amount of weakness has developed in the raw cotton market and it is probable that, to a small extent at any rate, this accounts for the pronounced dullness above referred to in the yarn and cloth sections. Advices from America with regard to the new crop have been ' bearish." The second report of the Washington Agricultural Bureau will be issued on Tuesday next and is expected to show an improved position as compared with a month ago. " Spot " sales in Liverpool have been small during the past week, and there has been little activity in " futures." Egyptian is considerably lower on the week. Closing prices are as follows :—American Fully Middling 13.34, last week 13.75; Egyptian Fully Good Fair, 18.00, last week 19.75.

LIVERPOOL REPORT.

Markets Depressed.

Messrs. Reynolds & Gibson report as follows for the week ended July 26 :—

A wave of depression has passed over our market since last we wrote. Pessimism is rife and prices have fallen away considerably from last week's level. As we pointed out, there has been little enough lately to support the market and it has only been the fear of further crop scares in America that enabled us to remain in the neighbourhood of 19.50d. for Fully Good Fair cotton for so long. However, the American crop seems to be doing very nicely at the moment, and the fears of a possible water shortage in Egypt have been alleviated by the issue of a more generous rotation from the Assuan Dam. We expressed doubt earlier in the season as to whether these water-shortage fears were sufficiently well founded. Added to the above is the lamentable fact that business at the Manchester end has undoubtedly become very slow. Foreign buyers are actually withdrawing bids previously made, and business passing is confined to small lots purchased to meet urgent requirements. Yarns are dull and easier.

Altogether the situation at the moment is not one likely to stimulate any bullish activity. Alexandria presented us with a somewhat alarming break in "futures " this morning, and this was followed by numerous cables lowering limits on spot cotton here, and urgent requests to obtain offers to cable out there. Needless to say offers obtainable were few and far between. The only hope is that the sudden drop may tempt those spinners who have recently adopted a waiting attitude to come in and fill up their requirements. A considerable amount of buying will be required, however, to push prices back again to anything aapproaching last week's figures.

The enquiry on the spot here has been of a poor description, the bulk of it indeed has been for low grade Sakellaridis at about 14.00d. to 16.00d. per lb., and recleaned, and very low cotton about 5.00d. to 7.00d. per lb. The usual quota of Tokar and Sudan has been placed and Uppers, in a small way, are still retaining the added amount of interest which they seem to have aroused recently. C.i.f. business has been very quiet. Sales 2,900 bales (includes 1,800 Sudan). Quotations are reduced 1½d. per lb. all round. Fully Good Fair Sakellaridis 18.25d.

LANCASHIRE COTTON DIVIDENDS.

Comparative Figures.

In his Cotton Trade circular published last week, Mr. Frederick W. Tattersall, of Manchester, publishes a list of cotton company stocktaking results declared at the end of June. Details are available for 103 mills engaged solely in the spinning of cotton yarn and which have a total paid-up ordinary share capital of £11,439,646. Forty-five concerns have made distributions varying from 5 per cent. per annum to 24 per cent. per annum, requiring £136,250, but fifty-eight have been quite unable to make a payment at all. The aggregate spindleage of these 103 firms is 9,131,969. The average dividend for the three months ended June of sixty-seven companies is 4.65 per cent. per annum, compared with 4.74 in March last, 5.35 in December, 1921, 5.59 in September, 1921, and 5.20 in June, 1921, for the same firms. Altogether 5,710,854 spindles are controlled and the total paid-up ordinary share capital amounts to £7,251,450.

Thirty-six mills owning 3,421,115 spindles and having a total paid-up ordinary share capital of £4,188,196 have made payments averaging 4.39 per cent. per annum for the June half-year, contrasted with 4.53 and 5,22, respectively, for the two previous half years ended December and June.

MANCHESTER MARKET.

Dull Tone Continues.

(From Our Own Correspondent.)

Manchester, Saturday.

It is not possible to record any change in the conditions prevailing in the market and the tone during the past week has continued dull. Buyers have displayed an utter lack of disposition to operate on freer lines and when sales have taken place they have usually been at lower rates. The demand for cloth has now been very slack for some weeks, but it can be said that optimistic views are held with regard to future developments and that a larger turnover is anticipated towards September, when the question of raw cotton supplies will be much clearer and when we shall know whether the monsoon rains in India have proved beneficial or otherwise. In the cloth section no sales of any weight have taken place for Egypt, the Levant or Constantinople. In the yarn section quotations for Egyptian counts are distinctly easier and buyers have matters all their own way. The offtake has been within narrow dimensions. Scattered piece goods transactions have been recorded for India in light goods. Shippers to China are very slow in raising rates. The majority of the offers have proved entirely impracticable. Minor transactions have been recorded for the remaining smaller outlets. American yarn quotations have weakened and sales for home use have been unimportant. The output is much larger than the demand.

During the first quarter of 1922 imports into French Morocco totalled 124,412 tons, against 128,107 in 1921, same period, whilst exports were 61,511 tons against 69,205. There is an opening in the Moorish market for leather in large quantities, saddlery, ironmongery, and shoemakers' sundries.

CZECHO-SLOVAK INDUSTRIAL EXHIBITION

Few British Visitors Present.

With a view to renewing the economic relations which were interrupted by the war, and to seeking fresh outlets abroad for her industries, Czecho-Slovakia has arranged three industrial fairs to be held periodically at Prague, Liberec (Reichenberg) and Bratislava (Pressburg) respectively. The Prague Fair is the most important and has a great future; Prague situated as it is in the middle of a rich industrial area, and being also an important railway centre in the heart of Europe, is destined to become the natural intermediary of economic relations between East and West. The Fair takes place twice a year, and it occupies all the space available on the Prague exhibition ground. It is divided into 18 groups, which represent every article manufactured in the Republic.

All the four Fairs already held at Prague have been a distinct success. Nearly 200,000 buyers visited the Fair every time it was held, and a considerable amount of business was transacted. The neighbouring countries sent a large number of customers, and the Little Entente countries and Poland organised special excursions for importers. At the Spring Fair a conference was held for the discussion of all questions relating to trade between Czecho-Slovakia and Yugoslavia. A similar conference will take place during the Autumn Fair (between September 3 and 10) for the purpose of dealing with Roumanian questions. In addition to this, special trains are announced from Germany and Austria, as well as an excursion consisting of 250 Greek buyers. Thus an opportunity will be provided for a great number of importers and exporters to meet not only from Czecho-Slovakia but also from the other Central European and Balkan States. At all the preceding fairs the number of French and Italian traders, who soon recognised the present importance of Prague as a commercial centre, was considerably greater than that of the English. Even the Americans were better represented. The third Reichenberg (Liberec) Fair will be held between August 12 and 20 on a much larger scale than the previous two. Liberec being the centre of the extensive textile industry of Northern Bohemia, the fair is especially important for prospective buyers of Czecho-Slovak textile goods. The glass industry and the so-called Gablonz industry (fancy goods, etc.) will also be well represented.

COMMERCIAL BREVITIES.

The traffic receipts of the Smyrna-Aidin railway for the week ended July 22 amounted to £5,363.

The output of the Anglo-Egyptian Oilfields for the week ended July 21 amounted to:—Gemsah, 28 tons (last week 24 tons). Hurghada: week ended July 21, 2,137 tons (last week 1,905 tons).

According to the Baghdad correspondent of *The Times* a service of motor-omnibuses is now working between Baghdad and Aleppo. The journey, by way of Mosul, takes five days, and the desert sheikhs have accepted a lump sum to restrain their tribes from raiding the omnibuses in transit.

The Imperial Bank of India's profit for the half-year, including 12¾ lakhs brought forward, totals 63½ lakhs. A dividend at the rate of 16 per cent. per annum, free of tax, has been declared and 10 lakhs have been transferred to the reserve fund, while five lakhs have been transferred to the pensions fund and 16¼ lakhs carried forward.

A Reuter message from Athens states that the Anglo-Persian Oil Company, represented by Mr. George Tacon, a New Zealander, has obtained from the Greek Government the petroleum rights over the whole of Macedonia. If the enterprise is successful the royalties to be received by Greece under the agreement will be a most important source of revenue.

The preliminary forecast of the jute acreage in India is as follows:—Bengal, including Cooch Behar, 1,220,548, a decrease of 108,642 acres; Bihar and Orissa, 144,598, an increase of 36,230 acres; Assam, 91,400, an increase of 10,600 acres. The total decrease is computed to be about 4.1 per cent. on last year's final figures.

Reuter learns that a Greek semi-official message received in London from Athens states that the Minister of Finance has brought in a Bill in Assembly for increasing the tax on tobacco and entertainments. The Government has also decided to grant free admission to building materials to be used for the reconstruction of the part of Salonika destroyed in the great fire.

In the House of Commons recently Lieut.-Colonel Sir Frederick Hall asked the Secretary of State for the Colonies whether negotiations were proceeding for a British loan of £2,000,000 to the Iraq Government for irrigation and agricultural purposes; and, if so, would he state what security was proposed for the repayment of this sum. Mr. Churchill replied: The answer to the first part of the question is in the negative. The second part therefore, does not arise.

LONDON PRODUCE REPORT.

Demand for Lemons Poor.

(*From Our Own Correspondent.*)

London, Monday Evening.

Sugar.—Home refined has been in moderate request at firm rates. Tate's cubes are unchanged at 58s. 6d., and mineral water sugar is firm at 51s. 6d. London granulated and Lyle's granulated are both firm features at 50s. 7d. and 51s. respectively. There has been a slight increase in export descriptions. West Indian crystallized shows no change at 43s. 6d., but white Mauritius has advanced 6d. at 48s. 6d. White Java shows a gain of 4½d. at 21s. 0d. Cane sugar quotations are :—July, 20s. 0d. ; August, 20s. 0d. ; and September, 20s. 0d. White sugar quotations are :—July, 24s. 0d. ; August, 23s. 10½d. ; September, 23s. 7½d. ; October, 22s. 7½d., and October—December, 22s. 7½d.

Coffee.—All quotations have been steady. East Indian is the same at 112s., and Costa Rica is steady at 106s. Nairobi is unchanged at 100s. The futures market has been barely steady. Quotations are :—September, 62s. 6d. ; December, 60s. 6d. ; and March, 60s. 6d.

Dessicated Coconut.—A steady tone has been maintained throughout the week. An excellent demand has been forthcoming from the country.

Rice.—Firmness has prevailed throughout the week.

Green Fruit.—A large quantity of South African oranges have arrived this week, while the demand has been good. Very little arrivals are expected for the next two weeks. There has been a very small demand for lemons, except for best Naples fruit which has been in favour. The demand for apples has been very poor while prices are harder. The first shipment of Valencia "Winter" onions has just arrived, which has eased the market considerably.

Oilseeds.—Steadiness prevails. Indian linseed has remained unaltered at 21s. 9d. as also La Plata at 20s. 4½d. Rapeseed has advanced with Toria 3d. up at 19s. Cottonseed has declined. Egyptian black has shed 1½d. at 11s. 9d., while Sakellaridis has shed a like amount at 10s. 9d. Indian is 1d. down at 9s. 3d.

Oils.—An unsteady tone has been in evidence. Linseed oil has gained 3s. at 44s. 6d. Rape oil has shed 2s. in both cases, with crude at 43s. and refined at 46s. Cotton oil is lower with Egyptian crude eighteenpence down at 41s. Deodorized and technical have both been firm at 53s. and 41s. 6d. respectively, while refined has come to business at 48s.

Oilcakes.—Prices have been firm all along the line. Cottonseed-cake is unaltered at 180s. ton ; coconut cake shows no change at 210s. ton, and cottonmeal cake at 300s. ton is firm. Linseed cake remains the same at 280s. ton.

ASIA MINOR FRUIT REVIEW.

Good Prospects for Next Season.

Messrs. C. J. Giraud & Co., Smyrna, report as follows for the period ended July 15 :—

The report we issued on March 31 fully covered the statistical position of exports of sultanas and figs during the past season. Of the stock of sultanas which we estimated in existence at that date at 1,600 tons, about 1,000 tons have since been shipped mainly to the U.K. Stocks now remaining of last season's yield amounts to about 500 tons, mostly in a deteriorated condition. Stocks of figs have been entirely cleared.

Crop Prospects.

In the reports which we respectively issued on September 1, 1920, and on August 1, 1921, we made the following forecasts about the likely result of the sultana and fig production : 1920—sultanas, 16,000 tons ; figs, 20,000 tons ; 1921—sultanas, 31,000 tons ; figs, 22,000 tons. The actual results of these two seasons have been : 1920—sultanas, 15,900 tons ; figs, 19,000 tons ; 1921—sultanas, 31,500 tons ; figs, 19,400 tons. These early forecasts could not have been more closely justified and we take credit for the fact that the information we gather in the early part of the season through various agents all over the country enabled us to arrive at the closest estimates possible of both yields. If we were slightly out in our fig forecasts, this was due to political considerations for which we had not made allowance ; the Meander Valley being at the time in the joint occupation of the Greeks and the Turks. So far as the present season goes, weather conditions on the whole during the past winter have been fairly normal, and the rains which fell during the month of May have contributed to the development of the fruit. The only unfavourable feature has been the prevalence during the past three weeks of very dry parching north winds, as a consequence of which reports have come in from both Meander and the Hermus valleys of some damage to the figs and grapes.

Our present views of the probable results of the yield in the coming season are as follows :—Sultanas, about 38,000 tons ; Figs, about 22,000 tons. Qualities of both fruits are likely to show good development and soundness, but the final result in this respect will mainly depend on atmospheric conditions during the months of August and September when the fruit is on the drying sheds. General conditions as regards labour and transport show no improvement on last season, and if anything, in consequence of the drain of men and draught animals through continual mobilisation and requisition, shippers have good cause for uneasiness in both respects. Owing to the conditions prevailing all over the world and the tendency for a lowering of prices in all fruit products, it is undoubted that prices of both sultanas and figs are likely to rule at a more moderate level than last season It must, however, be borne in mind that the reduction in the level of sterling or other foreign equivalents is at present due to the higher rates of exchange here, or in other words, to the depreciation of Turkish currency. Whereas sterling averaged twelve months ago during the month of August about 550 piastres, exchange to-day stands at about 720 piastres. Native dealers are, however, confident that they will have no difficulty in selling their produce at last year's level of prices in local currency. Consequently, if sterling and foreign exchange during the next two months decline on present level, it is not at all unlikely that prices for sultanas and figs may be proportionately affected and move up in foreign parities.

The whole position to-day is a very uncertain one, more especially in all matters appertaining to exchange. Last year, shippers were undoubtedly favoured in their operations by the steady advance in exchange rates and it remains to be seen in the present season whether conditions in this respect will prove as favourable or will militate against them. Buyers abroad so far are displaying no anxiety to operate, and it is certain that forward engagements are on a very limited scale. Quotations for Gaq sultanas for September shipment started being made to London at about 80s.—Cif, and have declined to as low as 65s.—and a few hundred tons are reported to have been sold in London and Liverpool at an average of between 68s. to 75s. for September shipment. Opening prices last year in the second half of August ranged between 100s. to 125s. according to quality, but with the rise in foreign exchange which set in in the month of September, coupled with heavy arrivals on the market, prices speedily declined about twenty per cent. It does not appear likely that opening prices this year will be anywhere as high as last season but at the same time it is difficult to conceive that early arrivals will sell much below 90s. to 105s. Sultanas will commence reaching market about a week or ten days earlier than last year. So far as figs go, the outlook continues favourable, especially in regard to quality. First arrivals will probably reach market between August 22 and 23. Foreign buyers are not showing much keenness to operate and the level of prices will undoubtedly be established at some 15 or 20 per cent. under last year.

THE EGYPTIAN TEA AND COCOA MARKET

Increase in Imports from Great Britain.

Mr. E. H. Mulock, H.M. Commercial Agent for Egypt, reports that agents for British tea companies suggest that a far greater sale could be found for this commodity if exporters would explore every possible means of slightly decreasing the prices quoted and at the same time deliver in greater bulk. For the four months ending April 68,207 kilogs. of tea were imported from the United Kingdom at a value of £6,965 as compared with only 9,294 kilogs. valued at £2,125 during the corresponding period of 1921.

Statistics of imports into Egypt from British India and other Far Eastern Possessions for the two periods before-mentioned, also from China are as follows :—

	Four Months ending			
British India ..	April 1922	Kilogs. 139,664	value	£9,756
	„ 1921	„ 111,173	„	£7,296
Other British ..	April 1922	„ 76,498	„	£7,754
Far Eastern ..	„ 1921	„ 161,913	„	£12,302
Possessions				
China	April 1922	„ 32,078	„	£2,879
	„ 1921	„ 18,295	„	£2,068

The very vast difference in price in proportion to the amount delivered this year compared with last year is, no doubt, partly responsible for the great increase of tea imported from the United Kingdom but a growing desire on the part of the lower orders of Egyptians to drink this beverage is also a very substantial reason, and it is with this lower market in view that Egyptian agents are perfectly agreeable to accept any form of teas so long as wide advertisement is given and low prices quoted. United Kingdom firms should be careful in the selection of agents as it is an unfortunate fact that, in the past, certain agents of United Kingdom firms have been known to accept competing agencies with the end in view of playing one variety against another.

Although United Kingdom supplies of cocoa to Egypt have increased very considerably during the present year in comparison with last year, Dutch supplies have also increased very considerably as the following figures demonstrate :—

	Four months ending			
United Kingdom	April 1921	Kilogs. 6,791	value	£1,463
	„ 1922	„ 20,967	„	£2,328
Holland ..	April 1921	„ 7,521	„	£1,550
	„ 1922	„ 25,165	„	£3,028

From the above figures it will be noticed that the difference in prices between Dutch and British suppliers is very little. Probably the reason for the success of the Dutch firms lies in the fact that they are prepared to facilitate shipment in bulk or on consignment. Both Dutch and British firms advertise widely. With the market in its present stagnant condition, agents or merchants who hold stocks of goods ready for immediate sale naturally hold a considerable advantage over importers who have to await delivery of an order. Now that stocks of goods sold by the Military Authorities are disposed of, greater opportunities for the supply of cocoa, tea and other groceries should arise.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated July 24 :—

Season.—July 17—Monsoon active in North-West India. July 18—strengthened in southern half of Peninsula and extended to Baluchistan. July 19—vigorous in North India and Peninsula. July 20 and 21—active in greater part of the country. July 22—active in Peninsula but weakened elsewhere. July 23—generally active. Condition of Crops.—July 21—in Bengal, weather conditions are favourable and prospects of autumn crops are fair. In Bombay, situation is excellent except in Eastern Bombay, Deccan, Karnatak and North Gujarat, where shortage of rain becoming serious and much replanting of cotton required in South Gujarat. In Central Provinces, germination of cotton excellent. Rice nurseries promising, but more rain required for transplantation in districts. In United Provinces, North East, rice much damaged by heavy rain and prospects poor. Assam unchanged.

Markets.—July 20—Bombay Cotton market steady. Fine M.G. Oomras Rs. 453 July, Rs. 462 September—December—January. Bombay cotton arrivals from September 1, 1921, to July 19, 1922, were 3,293,000 bales as compared with 2,621,000 bales during the same period of last year. July 20—Bombay imported piece-goods market improving and retail demand active. Rupee rate for grey prints and fancy steady. Prices of white little easier owing to few forced sales. Stocks now stand at 38,503 packages. July 21—Calcutta jute and gunny markets quiet and rates practically unchanged. At tea sale on July 18 selections better. Cachars, Sylhets and Dooars improved, though too much stalk in some cases. Stand-out tea obtained full prices. Common and leaf tea steady ; but other kinds lower. Medium broken and fannings further declined ; common fannings weak ; dusts strong. Buying rather more general though blenders quieter. 90,790 packages sold to date at an average price of 10 annas 9 pies per lb. July 18—Special Straits quality rice Rs. 477. 8. No buyers. Rates weakening. July 21—small mills quality sold at Rs. 525 to Rs. 527. Shellac.—July 21—market quiet. T.N. shellac Rs. 180. Bank rates unchanged.

CURRENT PRICES.

General Produce.—Bacon : (Continental), 141s. cwt. ; (Canadian), 130s. cwt. ; (American), 119s. cwt. ; butter (Danish), 210s. cwt. ; (Australian) 200s. cwt. ; (New Zealand), 214s. cwt. ; cheese (Canadian), 90s. cwt. ; (New Zealand), 89s. cwt. ; lard 72s. 6d. cwt. ; eggs (Danish), 15s. 6d. per 120 ; (Styrian), 11s. per 120 ; chillies, 151s. cwt. ; cloves (Zanzibar), 1s. 1d. lb. ; cocoa (Ceylon good to fine), 82s. 6d. cwt. ; coffee (Costa Rica), 120s. cwt. ; (East Indian), 117s. 6d. cwt. ; (Central American), 97s. 6d. cwt. ; (Jamaica), 72s. 6d. cwt. ; (Mocha Longberry), 105s. cwt. ; (Santos superior), 71s. cwt. ; (Nairobi), 90s. cwt. ; ginger (washed Cochin), 53s. 9d. cwt. ; nutmegs (110's to 80's), 11½d. lb. ; pepper (Singapore black), 4d. lb. ; (Muntok white), 7½d. lb. ; pimento, 2.1-8d. lb. ; raisins (Cape), 70s. cwt. ; (Amalias), 53s. cwt. ; sugar (Tate's cubes), 58s. cwt. ; (Lyle's granulated), 50s. 10½d. cwt. ; (Mauritius crystals), 48s. 3d. cwt. ; (West Indian crystallised), 43s. 3d. cwt. ; (centrifugal), 18s. 7½d. cwt. ; tapioca (fair Singapore), 2d. lb. ; rice (Rangoon No. 2), 15s. 4½d. cwt. ; (bran Rangoon), £6 15s. ton ; cinnamon (firsts), 10½d. lb. ; mace (fair Singapore), 2s. 1½d. lb. ; tea (Indian, common to good common), 1s. 0¼d. lb. ; (medium to good), 1s. 4d. lb. ; (fine to finest), 2s. 7½d. lb. ; Ceylon (common to good common), 1s. 2d. lb. ; (medium to good), 1s. 6d. lb. ; (fine to finest), 2s. 7½d. lb. ; Java (common to good common), 10½d. lb. ; wheat (English white), 56s. 0d. qr. ; wheat (Australian). 50s. 3d. qr. ; oats (English), 37s. 0d. qr. ; oats (La Plata, ex-ship), 26s. 4½d. qr. ; maize (La Plata), 39s. 3d. qr. ; flour, 43s. 3d. sack.

Chemicals.—Acids : Boric, 61s. cwt. ; oxalic, 8¼d. lb. ; citric, 2s. 7d. lb. ; tartaric, 1s. 0d. lb. ; ammonia (sulphate), £15 11s. 9d. ton ; arsenic (white powdered), £42 ton ; benzole (standard), 2s. 5½d. gallon ; bleaching powder (35 per cent.), £12 10s. ton ; borax crystals, 29s. 6d. cwt. ; cream of tartar, 115s. 6d. cwt. ; Potassium : Bichromate, 6¾d. lb. ; chlorate, 4½d. lb. ; caustic, £33 10s. ton ; nitrate, £37 10s. ton ; permanganate, 9¾d. lb. ; prussiate yellow, 1s. 3½d. lb. ; sulphate (90 per cent.), £15 5s. ton ; Sodium :—Crystals, 120s. ton ; bi-carbonate, £11 2s. 6d. ton ; bichromate, 5½d. lb. ; alkali (58 per cent.), £8 6s. 3d. ton ; chlorate, 3½d. lb. ; caustic (70 per cent.), £21 ton ; hyposulphite, £10 ton ; prussiate, 9¼d. lb. ; nitrate, £14 8s. 9d. ton ; glycerine (crude 80 per cent.), £60 ton; glycerine (industrial 1200 per cent.), £87 10s. ton ; lemon oil, 3s. 4½d. lb ; quinine, 2s. 3½d. oz. ; red lead, £37 ton ; white lead, £41 ton ; white ground lead, £49 15s. ton ; sulphate of copper, £26 17s. 6d. ton ; sulphate of iron, 60s. ton.

Metals.—Aluminium, £100 ton ; antimony (English Regulus), £28 ton ; bismuth, 9s. lb. ; copper (standard), £63 6s. 9d. ton ; copper (electro), £71 5s. ton ; gold bars, 92s. 6d. oz. ; iron No. 3 Cleveland), 88s. ton ; hematite (mixed number), 92s. 3d. ton ; galvanized sheets (25 G), £16 ton ; lead (soft foreign), £24 16s. 3d. ton ; manganese Poti, 1s. 1½d. unit ; molybdenite, 32s. 6d. unit ; nickel £100 ton ; platinum, 365s. oz. ; plumbago, £16 ton ; quicksilver, £11 7s. 6d. bottle ; spelter (G.O.B.), £29 8s. 9d. ton ; tin (standard), £157 6s. 9d. ton ; wolfram, 13s. unit ; zinc sheets, £30 ton ; tinplates (20 by 14), 19s. 7½d. box ; silver bars, 35d. oz.

Miscellaneous.—Cotton (American), 13.75d. lb. ; Egyptian (Sakel), 18.15d. lb. ; jute (first grade c.i.f.), £37 7s. 6d. ton ; jute (lightnings), £32 15s. ton ; Oilseeds : Linseed (La Plata), £20 10s. 3d. ton ; palm kernels, £17 3s. 9d. ton ; castor seed (Bombay), £19 7s. 6d. ton ; sesame seed (China), £26 5s. ton ; soya beans, £13 2s. 6d. ton ; Oils : Linseed, £44 5s. ton ; olive (Spanish) £75 10s. ton ; rape (crude), £44 10s. ton ; soya, £41 5s. ton ; petroleum, 1s. 4½d. gallon ; petrol, 2s. 1d. gallon ; fuel oil (ex-tank), 72s. 0d. ton; coconut (Ceylon), £38 17s. 6d. ton; cotton (crude), £41 10s. ton ; ground nut, £45 10s. ton.

MOSUL AND BAGHDAD MARKETS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Mosul, June 17.

The wool market has been very active during the week as a result of orders for London. Some packages of marten skins have been exported to New York and London. The price is at present Rs. 15 to Rs. 20 the piece according to quality.

Baghdad, June 24.

The market is very dull, but now shows signs of improvement on account of the report that the Treaty has been signed by the State, and awaits ratification by the General Assembly.

TRADE CONDITIONS AT CONSTANTINOPLE.

A report received by the Imperial Ottoman Bank from Constantinople dated July 22 states :—

Despite the depression which continues here, due to the slack season and the closing of the Anatolian market, the outlook for the future appears better since there is a prospect of a conference for peace in the East. Traders, encouraged by the outlook, have placed some orders in America and Europe. The financial situation is not so difficult, and settlements are made rather easily.

Sugar.—The market is very firm and the rise continues especially in America. Business here has been active as a result of orders for Roumania and the ports of the Black Sea. Quotations :—American sugar in transit, £25½ per ton, Dutch, in transit, £26-27 per ton ; in Customs, American £T.29 per 100 kilos, Dutch, £T.30 per 100 kilos.

Coffee.—The rates have been subject to marked fluctuations. After a recovery prices declined from two to three shillings. Quotations :—Rio No. 2, 61s. to 62s. per 50¾ kilos ; here, in transit, Ps. 55-60 per oke ; in Customs Ps. 75-80 per oke.

THE PALESTINE MARKET.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Haifa, July 1.

The market has been animated by some orders for cereals and building materials.

Jaffa, July 1.

Melons are now being exported to Egypt and Constantinople, while this year's crop is reported to be very good. The political situation is quiet.

Jaffa, July 8.

The price of cereals continues to be low as there is no demand for export. There has been a demand for 500 tons of small beans from Genoa. The political situation is quiet.

Owing to the rapid progress made this year with the building of dwelling-houses and public buildings, the supplies of cement and fireclay in Bulgaria have proved insufficient and the Government has therefore decided to permit the importation of these commodities free of customs duty.

Company Meetings

THE IMPERIAL OTTOMAN BANK.

The Political Situation in the Near East.

Lord Goschen's Review.

The Annual General Meeting of the shareholders of the Imperial Ottoman Bank was held on July 26 at Winchester House, Old Broad Street, E.C.

Viscount Goschen, C.B.E., presided.

The Secretary (Mr. Charles E. L. Corthorn) read the notice convening the meeting.

The Chairman, after pointing out that the political situation in the Near East had grown worse referred to the efforts at mediation between Turks and Greeks, which were followed by a renewal of hostilities, and continued :—

These military operations obliged us to close or to transfer several of our branches as a temporary measure. In the economic sphere—perturbed by the general world crisis to which I have referred—the persistence of a state of war, with its attendant troubles, produced grave results.

Constantinople, as you know, owes its importance to its geographical position. It has always been the distributing centre for the countries bordering on the Black Sea, from which trade routes penetrate far to the North, East, and South. During the war, with the closing of the Straits, stocks in the countries dependent on Constantinople, and stocks in Constantinople itself, were exhausted, and it was assumed that on the signing of the Treaty of Sèvres there would be an immense demand for goods of every description. This, indeed, followed, and a period of intense activity marked the year 1920. Important stocks were accumulated at Constantinople to be re-exported to Russia, the Caucasus, Roumania, Bulgaria, and Asia Minor. Then in a few months the movement collapsed. Countries in the Hinterland were cut off or their currencies depreciated, and one by one the doors closed. The markets of Anatolia and Thrace ceased to be available. Shipments to Roumania and Bulgaria became fewer and fewer as these peoples turned towards the commercial centres of the West. The ports of Southern Russia were held by Bolshevist armies and every transaction became precarious.

The Greek Military Occupation.

Finally, relations with the neighbourhood of the Marmora itself were rendered extremely difficult by the Greek military occupation. Already new falls in the price of the chief commodities had been produced by the general trade depreciation, and importers were reduced to a liquidation of their stocks at forced sale values. The importation of foodstuffs and articles of first necessity to Constantinople, dependent for these on foreign countries, was strictly limited by the difficulty of re-export, and, in addition, the closing of markets in the interior deprived Constantinople of what remained of its export trade, although, on the whole, harvests were fairly good and tobacco, mohair, opium and silk were in constant demand.

The history of this crisis is reflected in the figures for exports and imports during 1920 and 1921. The total of imports at Constantinople in 1921 was 121,329,000 Turkish pounds, against 169,396,000 Turkish pounds in the previous year. The total exports were 30,380,000 Turkish pounds in 1921, against 47,625,000 Turkish pounds in 1920. The deficit in the commercial balance was, indeed, reduced from 121,771,000 Turkish pounds in 1920 to 90,949,000 Turkish pounds in 1921, but the decrease is evidence, not so much of an improved situation as of a pronounced decline in business. It should be regarded as the result of a limitation of imports caused by the depreciation of the currency and by monetary stringency. To this commercial decline the general downward tendency of the Turkish exchange —and even more its instability— was a great contributing factor. In this connexion we may remark that Constantinople, owing to the isolation of Anatolia, has had to import from abroad the flour, cereals, and cattle necessary for its own subsistence.

The Ottoman Treasury, deprived of its revenues from Anatolia, found difficulty in meeting even the most urgent of its charges. In order to supplement the resources collected through the Provisional Financial Committee it was obliged to rely on advances from various institutions. Our own establishment lent assistance to the Treasury, and placed at the disposal of the Government the sum of 1,200,000 Turkish pounds as an advance on account of its share in the profits of the Ottoman Tobacco Régie. In the course of this year the advance has been repaid. The receipts of the Administration of the Ottoman Public Debt have similarly been affected by the continuance of a state of war in Anatolia and by the severance of the capital from its provinces in Asia Minor. The net receipts for 1920-21 amounted to 8,187,000 Turkish pounds, while for 1921-22 they are estimated at only 7,732,000 Turkish pounds.

Such was the situation, and such the conditions, during the past year—political unrest, economic uncertainty, and commercial stagnation. The effect on our establishment has been less severe than might be expected.

In Turkey the chief centres have had a satisfactory movement in current operations and in exchange. As a result of the general situation business in Mesopotamia, Palestine, Cyprus, Egypt, and Greece, has suffered a certain inevitable decline. In Paris and London, on the other hand, our agencies have been able to increase their activities. Together with our agencies in Manchester, Marseilles, and Tunis, they have steadily pursued their task of building up relations between East and West.

During the year we opened a branch at Hamadan (Persia), and offices at Troodos (Cyprus) and at Bethlehem and Ramallah (Palestine). We are now studying the possibilities of further extension in regions bordering on those where we already have a system of branches.

In conformity with the decision of our last general meeting our Syrian branches were transferred to the Banque de Syrie as from January 1, 1921. During the year the banking business of our subsidiary developed in a healthy fashion, and it is satisfactory to observe that the profits realized have enabled it to distribute a dividend of 6 per cent. on its capital.

The Balance Sheet.

In the establishment of our balance sheet, as will be seen from the report, assets and liabilities in foreign currencies have been converted into pounds sterling at the rate ruling on December 31, 1921. Francs have been converted at the rate of fifty-two to the pound sterling.

That part of our assets which, in the ordinary course of events, we are obliged to keep in francs for the normal purposes of our establishment must necessarily be subject to fluctuations in the exchange of the franc in its relation to the pound sterling, since our balance sheet is established in the latter currency.

Principally as a result of the appreciation in the balance sheet of the sterling value of the funds employed in francs, the balance of the difference on conversion, which figured in the last balance sheet at £702,569, has been reduced to a figure considerably lower, which is covered by the £511,461 devoted to this purpose at our last general meeting. Thus, at the rate of fifty-two, the deficiency of £191,108, referred to in the report last year, disappears. Consequently, on December 31 last, the balance of the profit and loss account of £268,000 remains available. We have, therefore, the satisfaction of being able to propose to you the distribution of a dividend at the rate of 10s. per share.

Recalling our brief survey of the conditions which prevailed generally and those which were peculiar to the Near East, you will appreciate as we do, the results which, in spite of adverse circumstances, have been obtained. These results justify hopes expressed at former meetings.

The Chairman then moved : "That the report and accounts now read be received and adopted ; that the dividend for the year ended December 31, 1921, be fixed at the rate of 10s. per share, and that this dividend be payable in Constantinople, London and Paris on August 1, 1922." And the resolution having been seconded was carried unanimously.

Votes of thanks brought the meeting to an end.

THE BANK OF ROUMANIA.

Effect of Exchanges.

Roumania's Industrial Position.

The Ordinary Annual General Meeting of the Bank of Roumania, Limited, was held on July 26 at Winchester House, Old Broad Street, E.C.

Viscount Goschen presided.

The Secretary (Mr. H. Locke) having read the notice convening the meeting and the report of the auditors, the Chairman said : Gentlemen,—In rising to move the adoption of the report and the accounts for the year ending December 31, 1921, I assume that you will take the report and balance sheet as read. As you will see from the report, the profit for the year, after making provision for bad and doubtful debts, income-tax, corporation tax, etc., and placing £2,000 to the pension fund, amounts to £25,384 15s. 2d. This amount has been transferred to the contingency account.

Exchange Depreciations.

Until now we have continued to follow our established custom of converting the accounts from Roumania in the balance sheet at the parity rate of 25 lei to the £ sterling. The difference between this rate of lei 25 to the £ and the current market rates was covered by the reserve accounts (including the contingency account). In view of the further heavy and continuous depreciation in exchange which has occurred since the last report was issued, the accounts from Bucharest are now converted into sterling in the balance sheet before you at the rate current on December 31 last (550 to the £). In order to increase the contingency account to an amount sufficient to cover the difference on conversion at this rate of 550 lei per £ in the bank's funds employed in Roumania the directors have transferred to that account from the old reserve a sum of £124,059 6s. 7d. This leaves the balance of the reserve accounts at £76,300 9s., which amount is more than ample to cover any further exchange depreciation in the funds actually employed in Roumania. The reduction in the sterling totals of the balance sheet is due to the conversion into sterling now being effected at 550 lei per £, as against 25 lei per £ in previous years, although the figures from Bucharest show a large expansion.

In view of the general conditions obtaining during the year under review, your board have continued to follow a conservative policy of liquidity and are sure that you will view with satisfaction the strong position which our balance sheet shows. As you will observe, the year's working has yielded a satisfactory profit, notwithstanding the fact that the unfavourable rate of exchange, of course, operates against us when converting currency profits into sterling.

Improvement in Oil Companies.

To turn from consideration of our own affairs to those of Roumania generally, I may say that the country, in the year 1921, has continued its work of economic and financial consolida-

Digitized by Google

tion. The considerable increase in taxation and the efforts which the Government is making to stabilize the financial situation by a careful examination of the expenses of the State should have the effect of bringing about gradually the balancing of the budget.

The harvest last year was larger than that of the previous year, and the export of cereals amounted to 1,472,760 tons, as against 917,730 tons in 1920. Hopes are entertained that the figures for this year will be even better, although it is still too early to speak definitely on the subject.

The total production of unrefined petrol also increased in 1921 to 1,160,885 tons, as against 1,030,086 tons in 1920, an increase of 129,799 tons; while the oil exported amounted to 362,340 tons, compared with 240,912 tons in 1920. The production has not yet reached the level attained before the war, owing to the insufficient means of transport, the lack of labour, and the difficulty of importing drilling materials. During the year, however, new oil companies have been formed and the position of existing ones has been improved, so that there is every ground for believing that the production will increase greatly in the future. I may add that there are large areas owned by the State and also by private individuals which only await more favourable conditions for exploitation.

Timber Resources.

Roumania is relatively one of the richest countries in Europe in forests. In the Old Kingdom, as well as in her new territories, the production of timber, etc., is not only sufficient for her own needs, but should constitute one of her principal exports. It is estimated that New Roumania alone could export annually about 100,000 wagons of timber. So far, however, the export has not been proportionate to the resources, owing principally to the lack of adequate transport to the ports on the Danube.

Last September Roumania organized an important Exhibition at Bucharest, which was very successful in demonstrating the possibilities of her industrial activity.

In conclusion, I should like, on behalf of the board, to thank the managers and staffs, both at home and abroad, for the valuable assistance they have rendered to us in the conduct of the bank's business.

I now move "That the report and balance sheet be received and adopted."

General the Hon. Sir H. A. Lawrence, K.C.B., seconded the resolution, which was unanimously adopted.

Mr. E. W. H. Barry proposed the re-elected of the retiring director, General the Hon. Sir H. A. Lawrence.

The Chairman seconded the motion, which was carried.

On the motion of Mr. J. W. Hoskins, the auditors (Messrs. Jackson, Pixley and Company) were re-elected.

Mr. J. Roselli proposed a vote of thanks to the chairman, directors, managers, and staff, and congratulated the board on the bold policy which they had adopted in taking the lei in the balance sheet at the rate of 550 to the £.

Mr. E. C. Baxter seconded the resolution, which was unanimously carried.

The proceedings then terminated.

AFRICAN AND EASTERN TRADE CORPORATION.

At an extraordinary general meeting of the African and Eastern Trade Corporation, Ltd., held in Liverpool on July 20, resolutions were carried for the conversion of 5,000,000 new 15 per cent. cumulative preferred ordinary shares of £1 each into shares of a character to be determined at the time or times of issue, and also for the adoption of new articles of association.

The Chairman, in submitting the resolutions, said the capital of the corporation, without taking into account the preference shares, consisted of 5,000,000 15 per cent. preferred ordinary shares, and 4,000,000 ordinary shares of which latter 3,560,368 have been issued. The 5,000,000 preferred ordinary shares, of which none had been issued, were created for a purpose which no longer existed, and, as he foreshadowed at the last annual general meeting, it was proposed to abolish the preferential rights attached to them.

It seemed obvious, in the interests of the ordinary shareholders that the preferential rights attached to the preferred ordinary shares should be done away with, but as there was no need of any increase of capital in the near future, it was difficult to say in the present unsettled conditions of the world's finances whether these shares should be converted into ordinary shares or preference shares, or if the latter, at what rate of dividend. The directors thought that the right course, and one which would be in the best interests of the shareholders, was to leave it to the future to decide in what form they should be issued, if at any time further capital was required. The resolution preserved for the shareholders entire control over the shares.

The second resolution was for the adoption of entirely new articles. The proposed new articles were to a large extent a modification of the existing articles, with the numerous modifications which had been introduced from time to time.

H.M. Representative at Sofia reports, by telegraph, that the surcharge levied when Bulgarian Customs duties are paid in paper currency has been increased to 1,400 per cent.

The Postmaster-General states that the air mail for Baghdad, which was dispatched from London on July 13, reached Baghdad on July 23. The air mail for London, which was dispatched from Baghdad on July 22, reached Cairo on July 24, and should arrive in London on or about August 1. The next air mail to Baghdad will leave London on Thursday August 10.

COMPANY NOTES & REPORTS.

Bank of Roumania.

The profit of the Bank of Roumania for 1921, after making provision for bad and doubtful debts, income-tax, corporation tax. etc., and placing £2,000 to pension fund, amounts to £25,384, which amount has been transferred to contingency account. Until now the Board has continued to follow the established custom of converting accounts from Roumania in the balance sheet at parity rate of 25 lei to £, the difference between this rate of 25 lei per £ and ruling rates being covered by reserve accounts (including contingency account). In view of further heavy and continuous depreciation in exchange which has occurred since our last report was issued the accounts from Bucharest are now converted into sterling at the rate current on December 31 last, (550 lei per £). In order to bring contingency account up to an amount sufficient to cover difference on conversion at this rate of 550 lei per £ in bank's funds employed in Roumania, the directors have transferred to that account from reserve account (old) £124,059. This leaves a balance of reserve accounts at £76,300, which amount is more than ample to cover any further exchange depreciation in funds actually employed in Roumania.

Accounts from Bucharest in lei show a large expansion for the past year, reduction in sterling total of balance sheet, compared with recent years, being due to conversion now being effected at 550 lei per £ as against 25 lei per £ previously.

Imperial Ottoman Bank.

The report of the Imperial Ottoman Bank for 1921 states that in the preparation of the balance sheet, assets and liabilities in foreign currency have been converted into sterling at the rates ruling at December 31, 1921, the franc at 52 to the £ sterling. Thus, principally owing to the appreciation in the balance sheet of the sterling value of the funds employed in francs, the balance of difference on conversion, figuring in the last balance sheet at £702,569 5s. 0d., comes out at a smaller figure on December 31, 1921. At the rate of 52, the amount of £511,461 1s. 0d. suffices—and the shortage of £191,108 4s. 0d., mentioned last year, disappears. The accounts made up to December 31, 1921, after providing for bad and doubtful debts out of revenue and provisions previously made, show an amount available of £268,553 3s. 7d., and of this the Committee recommend a distribution at the rate of 10s. per share, payable in Constantinople, London and Paris on August 1, 1922, leaving £18,553 3s. 7d. to be carried forward to the current year.

ORDERS FOR INDIAN STORES.

At the request of the Secretary of State for India and the Parliamentary Under-Secretary (Lord Winterton), the High Commissioner for India (Sir William Meyer, G.C.I.E., K.C.S.I.) met a number of Members of Parliament interested in the question of the placing of orders for Indian stores at the House of Commons on July 20. The resolutions on the subject passed by the Indian Legislature were read by the Secretary of State, and the instructions issued consequent upon them by the Government of India explained. Statistics as to the orders placed were given by Lord Winterton, and subsequently various questions put by the Meeting to the High Commissioner who either answered them at once or promised to supply the information required. At the conclusion of the proceedings, a hearty vote of thanks to Sir William Meyer, moved by the Hon. Alexander Shaw, M.P., and seconded by Col. the Rt. Hon. F. B. Mildmay, M.P., was carried unanimously.

Owing to the great number of vessels now using the buoys in the Merchant Vessels' Anchorage at Constantinople, no vessel is to be berthed there until she is ready to work her cargo, but is to anchor in the Outer Anchorage. Vessels found occupying berths and lying idle will be liable to a fine of L.T. 25 per day. This also applies to vessels remaining at their berths when ready for sea and only awaiting orders.

Reuter's Agency learns that the following message has been received in London from a Greek semi-official source. According to the newspapers, the Government has decided to renounce the system of State operation of the railways, and is disposed to entrust their operation to private companies. It is reported that schemes in this connexion have already been submitted by French capitalists. The Chamber has passed a Bill to enable the Peloponnesus Railway Company to take over again for a period of two years its railway, which up to the present has been requisitioned by the State.

NOTES OF THE WEEK.

Great Britain and Turkey.

It is to be hoped that the British Government will lose no time in considering the possible effect of the Prime Minister's speech in the House of Commons last Friday. To members of Parliament who heard him speak, Mr. Lloyd George may have seemed to be giving Commander Kenworthy a suitable Roland for his Oliver; but the outside world recks nothing of parliamentary polemics, even if it imagined that a Prime Minister would be capable of subordinating a question of grave international concern to a desire to score a debating point over an opponent. Abroad the speech will be regarded as a considered statement of the British attitude towards the Near Eastern settlement, and it is important to analyse it in the light of this view. The most noticeable features were the unrelieved tirade against Turkey and the glowing panegyric of the Greeks. There was no attempt to discriminate between Constantinople and Angora: both were bracketed as a one and indivisible Turkey, equally responsible for all that happened when Adbul Hamid battened on German intrigue and for all the acts of the Kemalists in their war with Greece.

Pique or Peace?

By this time—nearly four years after the Armistice, with a state of war still existing in Asia Minor—it was to be expected of the Prime Minister of Great Britain that he would avoid the facile course of denouncing the Turks and address himself to the difficult question of bringing about peace. Mr. Lloyd George's speech, however, might have been made by anyone actuated by strong prejudice in regard to Near Eastern affairs, who knew nothing of the desirability of reconciling differences of opinion among the Allied Powers, of reassuring Moslem opinion throughout the world and of removing war and unrest from the Near and Middle East. If denunciation could bring the Kemalists into line, the defences of Angora would have fallen long ago. To-day the Allies have the choice of giving in completely to Mustapha Kemal or of helping the Constantinople Government to recover its influence over Asia Minor on lines that will provide the necessary safeguards for minorities. Of this, the only practical issue, Mr. Lloyd George knows nothing; he fulminates against Angora, and at the same time insults the Sultan and moderate elements in Constantinople, who have at least been trying to play the game with the Allies. He deliberately rejects in advance all overtures for peace, and upholds the Greek sword as the only solution, even to the extent of pretending that Angora would be unable to continue the conflict, if Constantinople were in Greek hands instead of in the hands of the Allies.

Mad-dog Politics.

If Mr. Lloyd George's speech represents the only contribution that Great Britain is going to make to the next Near East conference, it is clear that what is known as mad-dog politics is not confned at the present moment to Angora, With the interminable delay in any serious attempt at a settlement, the position in the Near East inevitably becomes worse. There is a growing desire in each of the three Allied Countries to effect economies by withdrawing the troops from Constantinople. In view of such a possible development the Constantinople authorities are known to have been anxious to come to an arrangement with the Allied Powers which would offer a chance of reuniting Turkey under the Sultan. If the British Prime Minister has to be taken seriously, these overtures are to be brusquely rejected without consideration, and the general position becomes even more impossible than it was before. No one in England, however, would endorse this folly, which is even more reprehensible than the former policy attempted by France and Italy of favouring Angora at the expense of Constantinople. If therefore, the position in the Near East is not to go from bad to worse, there should be some clear statement of British policy which will remove the bad impression created by Mr. Lloyd George.

Bulgaria and Reparations.

It might prove a good thing both for Bulgaria and for the Allies if advantage were taken of the *impasse* now reached between the Reparations Commission and the Bulgarian Government to reconsider the position of the Commission. As at present constituted the Commission is unnecessarily large, and is too cumbersome to effect the maximum of good that such a body might perform. On the other hand there ought to be a higher authority to which the Bulgarian Government can turn for advice on financial and economic subjects. The present Reparations Commission, however, seems unable to carry out in the right way the work that it ought to do. For instance, there can be no doubt that it would be good for Bulgaria if some of the weaknesses of and anomalies of her Customs tariff were removed; as at present constituted it is clearly the rough and ready work of an amateur, both in the matter of duties and in methods of collection. Again, the State could only benefit, if European methods were brought to bear upon

Digitized by Google

the working and supervision of the Pernik coal mines. The Reparations Commission is anxious to help in both matters; but it drafted a Convention on the subject which no Government could voluntarily accept. There must be some way out of the difficulty, and it might be found if the Allies were to realize that the Commission as fixed by the Treaty of Neuilly is unwieldy and ineffective.

The Situation in Egypt.

Very little news has come from Egypt in the past week. The Government has shown some activity against the extremists. The houses of Zaghloul Pasha and of the arrested members of the Wafd were searched last week, and one of the leading Zaghloulist journals, *La Liberte*, was suppressed, for publishing false news likely to disturb the public. On the other side, a deputation of native lawyers has waited on the Sultan to protest against the arrests of the Committee; and it is announced, apparently on good authority, that the prisoners intend to take up a kind of passive-resistance attitude, maintaining that now that Egypt is an independent State, a military court has no authority to try them. But perhaps the most important item of news is that the law for the supervision of vagabonds and habitual criminals is nearly ready for promulgation, and that the authorities have already laid their plans to capture most of the bad characters in the provinces. Egypt badly requires some measure of the kind, firmly applied, and it is not at all surprising to be told that the news of the Government's intentions has already made an excellent impression.

Arabia and the Mandates.

Disapproval of the Mandate for Palestine appears to have produced something almost in the nature of a miracle: a marked improvement in the relations between Abd el-Aziz es Saud, Sultan of Nejd, and Hussein, King of the Hejaz. Such an improvement was undoubtedly to be wished in the interests of a united and friendly Arabia; and effected by other means, it would have been welcomed by Great Britain and the Allies. But as things are we cannot help wondering what other developments it may lead up to. The agitation of the Palestinian Arabs in other Arab lands is bearing fruit, and the mission to Mecca especially appears to have had important results. Arab dislike of political Zionism has been swiftly diverted into dislike of the Mandate; and we must expect it very quickly to take an anti-British turn because Great Britain is the Mandatory Power. All this was doubtless foreseen by the British Government and the Allies, and presumably plans are ready to cope with any emergency that may arise. For, having accepted the Mandate, we cannot neglect our duties to Palestine. There is apparently a disposition in some quarters to warn us that we may "lose" Iraq as a result of our Palestinian policy, by which we have offended King Hussein and united the Arabs against us. If this be meant as a threat, it should be addressed to Iraq. Opinion in this country may have been sharply divided over the question of the Palestininan Mandate; but in view of the accomplished fact, it is not likely to be affected by threats of such a character.

Politics in Iraq.

Although Iraq is still much exercised over the question of the Treaty, the Council of Ministers in Baghdad has found time to do some useful legislative work, as our Correspondent in that city reports. The Law of Associations, of which he gives some particulars, may not be perfect; there appears to be some risk of the Ministry of the Interior concentrating too much power in its own hands, if no revision of it takes place; but at least the new law gives the political clubs and societies a chance to organize themselves in readiness for the elections for the National Assembly. Another matter which has occupied the attention of the Council of Ministers is the working of the cinema halls and other entertainments, on which a tax of one anna on eight is to be levied. Like their fellows in this country, the cinema proprietors have raised a loud and bitter wail, and assert that they have been running their entertainments at a loss. We confess that we sympathise with them not at all. If they have been, or are, running their businesses at a loss, they would do well to close them down entirely. Baghdad would surely be the gainer.

Persian Finances.

It was last week announced that the Persian Mejliss has formally approved the appointment of an American, Mr. Mills Paul, as Director-General of Finance, and it is much to be hoped that the step will lead eventually to Persia's financial salvation. It is a hopeful feature of the arrangement that Mr. Mills Paul is to be Director-General, not merely Adviser, and that he is to be vested with very considerable executive powers. He is to draw up the Budget, to draft Bills for financial reforms, and to be consulted on all matters relating to finance and concessions; and the Persian Government binds itself not to enter into any financial engagements without written authority from him and the Minister of Finance. These are indeed thorough-going measures; but having regard to the state of Persia's finances, no half-measures would have been of any avail. Mr. Mills Paul and the seventeen assistants who will accompany him from America have a heavy responsibility on their shoulders, not only towards Persia but also towards other countries interested in Persia, and we venture to express a hope that they will at first move with great caution. The announcement that the Director-General undertakes not to interfere in political or religious questions seems to suggest that the lessons of the past have not been thrown away.

The Persian Army.

A good idea of some of the problems that confront the Persian Government to-day is given by the letter from our Teheran Correspondent which will be found on page 173. There we see the signs of jealousy amongst Ministers, intensified doubtless by the absence of the Shah, and can note to what lengths some of the rivals are prepared to go. But upon the whole the letter gives a not unencouraging picture of the state of affairs. The Sardar Sipah is showing himself a really strong man, and has evidently accomplished a remarkable feat in building up the Persian Army from the somewhat unpromising material that was all that he had to his hand. He has been successful in dealing with some of the brigands and rebels who had so long flouted the Government, and if he can now succeed in crushing Simko the Kurd, in the Urmia district, and the Jungalee bands who, backed, apparently, by the Bolshevists, are active again in Ghilan, Persia should enjoy a state of law and order to which it has long been a stranger.

Concessions in Persia.

Our Correspondent's letter gives also an account of the negotiations—not to use another word, perhaps more appropriate—in connection with oil concessions in

Digitized by Google

Northern Persia. That the Teheran Goverment should aim at making the best possible bargain for itself is perfectly natural, and as long as it does not seek to override or sweep aside concessions already granted, or arrangements already entered into, no exception can be taken to its conduct. Nevertheless, it would be well advised, if only for its own sake, to be quite sure of its ground in regard to claims likely to arise out of concessions granted, or said to have been granted, by its predecessors. For the rest, it is to be hoped that British interests, whether in the North or in the South of Persia, will be carefully watched by the British authorities. We wish to see Persia go ahead, but we cannot afford to neglect our own interests anywhere, for any reason.

The Prime Minister on India.

We feel some difficulty in appraising the Prime Minister's vigorous speech on Indian topics, but on the whole we are inclined to think that it may do good in the long run. At the moment it is not of much value, for the Services, which have definite grievances, were once again put off with good words, and some of their members will doubtless recall the profound observation of the hungry adjutant-crane, that "Flattery is worse than an empty tin-can in the belly"; while at the same time some of the phrases used will be a gosdend to extremist journalists, who will be able to misrepresent them as an expression of the old, exploitationist theory, that India exists for the benefit of a small number of Englishmen. On the other hand there is the reiteration of the fundamental doctrine that Parliament remains wholly responsible for the future of India as a whole, and is bound to watch anxiously the progress of the great experiment it has initiated. That doctrine is, of course, not new. It has been laid down with authority again and again, but Indian politicians are very slow to realise that it is a settled fact, and its enunciation by the Prime Minister may help to make them understand the limits within which their activities have to be confined.

Turkey and Gt. Britain.

Traveller after traveller home from Constantinople assures us that the Turks, in the capital at any rate, are still sincerely anxious for friendship with Great Britain. It may be that the travellers referred to naturally find themselves more closely in contact with Anglophil Turks than with Anglophobes; but even after making due allowance for such things, it is clear that a very large body of Turkish opinion is true to the old tradition, and holds that friendship between Turkey and Great Britain is both necessary and natural. The view finds eloquent expression in an interview accorded by the Turkish Crown Prince, Abdul Mejid Effendi, to a representative of the *Morning Post*. Much that His Royal Highness said had been said before, but he struck a new note when he complained that "for years now nothing had been left undone to wound the *amour propre* of our nation." Unfortunately he is not alone in feeling that, and, more unfortunate still, the situation has again and again been handled so badly that it is perfectly natural for Turks to have such thoughts, or feelings. The highly partisan speech of Mr. Lloyd George last Friday will inevitably intensify the feeling, and render still worse a situation already bad enough as a result of unguarded statement and ill-considered, or unconsidered, action.

THE WEEK AT HOME.

London, Friday Evening.

Away from Westminster.

Parliament rises to-day, and everybody will be glad to get away from fabric gloves to the seaside or the country. It has been an uneventful and in some ways an unsatisfactory session, full of uncompleted issues, threatened fights that never came off, and conferences that led to nothing. Mr. Lloyd George maintained his personal ascendancy in spite of being obviously tired, and in spite too of his long absence at Genoa. Mr. Churchill has increased his growing reputation as a statesman; Mr. Shortt has survived a series of storms. But the House of Commons is noticeably a poorer place now that "Mr. Balfour" has migrated to the House of Lords; and the fret and fume of the Die-Hards have not added to its intellectual distinction.

Of the Independent Liberals nothing need be said; they have cut no ice whatever. Labour has won one or two by-elections, but it remains ineffectual in the House of Commons, and it obviously wants to avoid a straight fight and has no stomach for a General Election this year. Like the Germans, it believes in a policy of attrition, but, as in the naval warfare, its own *moral* has suffered in the process. The House reassembles in October for the customary autumn session, but no legislative programme has been arranged, and at the moment nobody cares twopence whether it meets or not. Home politics are dead.

Debts and Reparations.

The issue of the Balfour Note has caused a flutter in diplomatic circles. The gist of the document is that if America presses us we shall have to press our Allies; we are quite ready to write off debts and reparations, but we cannot get landed in the position in which we are the only people in the world to pay. At present Germany is begging or cajoling her late enemy to let her off reparations, and France assumes that she need never pay her debt: but everybody expects that we shall pay to the uttermost farthing.

Apparently nobody had faced the true position; but the Balfour Note will act as a douche of cold water on all the impracticable schemes that are at present being outlined in every newspaper in the world. The immediate consequence of this return to reality is a further slump in the German mark, and a note of irritation both in France and America—the latter country in particular is very touchy over this question.

It is the fact that Britain backed the bill for her Allies, and is therefore in a delicate position. Nobody believes, either here or in America, that France or Italy either can or will pay the enormous load of debt, but we do want to get the thing on a proper footing, and it is generally expected that the whole problem will be explored afresh when M. Poincaré visits us. At the same time the fact must be emphasised that people here do not see why the Germans should be let off their reparations; and only those who want to believe really believe that they find it impossible to pay. The amount claimed by France was admittedly too large, but the figure originally suggested by the British Commission is well within Germany's capacity. The attempt of the few pro-Germans on the press to convince us that Germany is ill-used, meets with no response, but a great many people are increasingly perturbed over the progressive appearances of economic collapse. The case of Austria seems hopeless, and there is a possibility that Germany will follow on the slippery slope if procrastination continues. But the outcome of this, while it would cause suffering in this country, would infallibly stimulate the present tendency to cut loose as far as possible from European problems and to concentrate on the development of the British Empire.

How far that ideal is possible is a disputable point, and rumour credits Mr. Lloyd George with the desire to get away to Criccieth for a few quiet weeks while he thinks out the possibility of his own intervention in

Digitized by Google

Europe as a constructive statesman. It is known that he would like to restore stability to the fabric of European civilisation, but if he convinces himself that that is impossible, owing to divided counsels in Paris and Berlin, he may abandon the attempt, and concentrate his attention on home and Imperial affairs. For the time being, however, these things are on the knees of the gods, and we are all in a holiday mood.

A Danger in Downing Street.

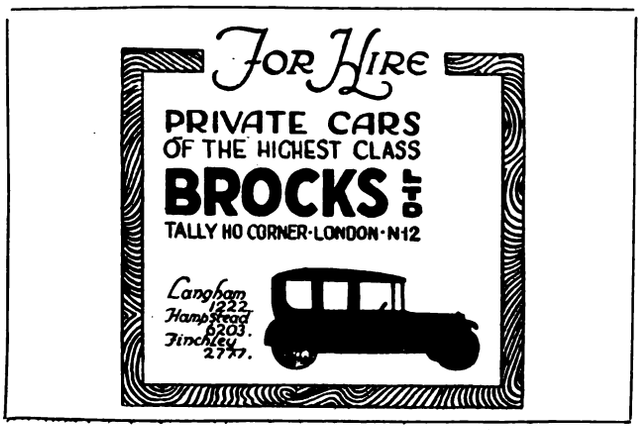
We read so often in the newspapers that the foundations of the Government are in danger that it gives one rather a sense of shock to find that, like the little girl who cried "Wolf," it has come true at last. It is not the moral or intellectual foundations that have gone wrong, but only the physical basis of 10 and 11, Downing Street, the official homes of Messrs. Lloyd George and Austen Chamberlain. Sand and brick form a large part of the foundations of the buildings; and whether it is due to the size of modern Cabinets or the weight of their decisions, the fact is that the whole block has to be underpinned. The front of the British Government is to be propped up during the recess, and it is to be concreted beneath. After that the Coalition will feel more secure.

Buckfast Abbey.

The opening last week of the first portion of the restored Abbey of Buckfast in Devonshire marks an interesting return to old times. Fifteen years ago the French Benedictines, expelled from their own country, settled at Buckfast, and they then and there determined to build their own Abbey. At that time only one of the monks was capable of handling a hammer and trowel, but little by little others learned to build, and the whole church, 220 feet long and with a nave 31 feet wide, has been built by this voluntary labour.

Nothing has been spent except on the materials, and the total cost of this magnificent structure has therefore been no more than £20,000 for materials—which is about the cost of an ordinary parish or suburban church at the present day. Perhaps some of the Anglican clergy, who are always appealing for funds for building a new church and notoriously failing to get them, will imitate this example and persuade their congregations to help to build them. By that means the cost would be halved, and the parish would have a personal interest in its own handiwork.

Another point about the Buckfast restoration is that it indicates a revival of the monastic spirit. The late eighteenth or early nineteenth century was the low-water mark of this way of life, but towards the end of last century, when the reaction against materialism and industrialism began, a quiet and silent recrudescence of monastic orders began. There are a few Anglican and Catholic monasteries now scattered up and down the country, and it is clear that the purely religious life of poverty and obedience still has its appeal. It seems unlikely, and it is certainly undesirable, that the system should ever regain the power it possessed in the Middle Ages, but it is perhaps not a bad thing that a few communities here and there should maintain the life remote from the world.



The "Old Vic."

For the past few months the "Old Vic," the playhouse in the Waterloo Road, has been in danger of demolition, and as it was the only theatre in London which plays Shakespeare entire, and other classical drama, the shutting-down of this popular but antiquated theatre would have been a disaster to the Drama. Its prices are cheap—only a few pence secure you a good seat—but its bill of fare makes it easily the best theatre in London, and I am told it has trained most of the leading actors and actresses on the West End Stage.

Fortunately the £30,000 required has now been subscribed by Mr. George Dance, a prominent member of the profession, and the theatre has been saved. Long may it continue to hold aloft the flag of legitimate drama in its obscure surroundings.

The Week's Books.

August is the slack time for books when publishers hope to sell rather than publish books. But a few books are still coming out, apart, that is, from the popular novelists, who never cease the issue of their gaudy wares.

"Women of the French Revolution" (Chapman & Hall) by Winifred Stephens, adds another book to an inexhaustible subject. It reminds me a little of M. Lenotre's well-known studies, but I for one found it no worse for that. Most of the ground has been already covered, but Miss Stephens finds some new characters to describe.

"The Genoa Conference" (Hutchinson) by J. Saxon Mills, is a full record of that extraordinary conference, and it contains a preface by Mr. Lloyd George. "The old world," says the Prime Minister, "is that of national blindness, national jealousy, national fear, national suspicion, national prejudice. The new world has a different faith and a different point of view. It believes in nationalism no less firmly than the old, for nationalism is the individual force, the genius, the salt in every varied impulse which makes up Western civilisation as a whole. But it also believes with its whole heart that in the matter of passion, and in the economic chaos to which the world has been reduced by war, the welfare of every nation depends on peace, co-operation, a helping hand from the strong to the weak, a regard for the welfare of all. The British Empire delegation stood for that faith at Genoa and had behind it, as I believe, the good will and the deep desire of a majority of all true democracies throughout the world. The campaign for peace is only beginning. We have won positions from which we must press forward again. We are bivouacked on the field. We must not rest till we have won."

Miss Ethel M. Dell is the most populat novelist of the day, and her readers run into millions all over the world. It is therefore necessary to mention her latest book, "Charles Rex" (Hutchinson) of which fifty thousand copies have been sold before publication. Those who liked the "Way of an Eagle" will probably like "Charles Rex."

On the other hand, "The Judge" by Rebecca West, is a really good novel. It issues from the same publishing house.

I mention "This Freedom" (Hodder & Stoughton) by A. S. M. Hutchinson, because it is the successor of last year's best seller, "If Winter Comes," which not only surprised the reviewers, but Mr. Hutchinson as well, by its extraordinary vogue. The present book has been rather harshly criticised for its verbosity and palpitating style, but I imagine that these emotional adjectives are likely to add to its popularlity. The theme is that of a woman who neglects her children in order to achieve a career, and Nemesis awaits both her and them; although Mr. Hutchinson does not, as in the earlier case of Job, restore them to life in the last chapter with tenfold blessings. The problem of the woman torn between her physical and unborn mental offspring has been taken up by the popular press, and Mr. Hutchinson's theme is likely to become a silly season topic—which, no doubt, will be good for the sales of the book.

THE NEAR AND MIDDLE EAST.

From Our Own Correspondents.

EGYPT.

Cairo, July 25.

The Attempt on Colonel Pigott.

As was only to be expected, the attempted murder of Col. Pigott has called forth another protest from the British Government. On Thursday last Lord Allenby addressed to Sarwat Pasha a letter in which he stated that His Majesty's Government viewed with increasing uneasiness the frequency and impunity of the outrages of which the last had been the attempt on Col. Pigott's life. He pointed out that it was the duty of the Egyptian Government to take severe measures for the discovery and punishment of the guilty parties and for the cessation of this campaign of political crimes, and declared that unless these measures were taken the matter would be regarded by His Majesty's Government as one of very great gravity. The Prime Minister in his reply reminded Lord Allenby that the Egyptian Government had taken special measures in this connection, notably an increase in the European element in the Police so as to permit of a more extensive control; and he declared that the Egyptian Government was the first to deplore that these measures had not succeeded in preventing these crimes or in discovering their authors. He assured the High Commissioner that the Egyptian Government, persevering in the policy which it had outlined in its reply to the previous protest in this connection, would not spare any effort to render as efficacious as possible the measures taken for the prevention of these crimes and the discovery of the authors, and informed the High Commissioner that the Government intended to create in the Ministry of the Interior an organisation which would concentrate in its hands the work of inquiry and the direction of investigation in cases of political attempts.

An Innovation in Criminal Procedure.

The latest decision to which Sarwat Pasha refers in his reply may certainly be regarded as an earnest of the Egyptian Government's desire to stop these outrages; for it represents a complete break with the old system of investigation and inquiry followed in Egypt for the past forty years. Hitherto, while the executive part of criminal investigation has vested in the Police, who are under the Public Security, the work of inquiry in all crimes has been in the hands of the Parquet of the Native Courts, which is directly controlled by the Ministry of Justice. For many years there has been considerable complaint with regard to the manner in which the work of these two separate organisations has been co-ordinated, and from time to time proposals have been made for the introduction of reforms which, if not actually producing an amalgamation, would conduce to closer and more efficient collaboration between the two branches which are so directly concerned with the prevention, detection and punishment of crime.

Into the merits of the case in regard to criminal investigation and inquiry generally I do not propose to go, but in regard to political crime in particular, which by its very nature demands for the success of the investigation absolute secrecy and prompt action, it is obvious that the system of dividing the work between two organisations, which depend from different administrations, cannot in the long run be productive of good results. The decision now come to entails the withdrawal from the hands of the Parquet of the work of inquiry into political crimes, and the institution, under the direction of the Public Security Department, which has always been responsible for crime investigation, of a special section composed of delegated experts, who will carry out all inquiries into political crimes and will receive under martial law the powers essential to their work, which existing Egyptian legislation fails to give. Thus, both inquiry and investigation in political crimes will be under the same control, and there should henceforth be less cause for complaint on the part of the executive; and in consequence of closer collaboration and of greater continuity there should be more hope of successful results. At the same time, while the executive is thus being reinforced and relieved of restrictions hitherto imposed on it by a system which in the matter of political crimes has not moved with the times, it must be admitted that com lete success can attend these efforts only if the public co-operates. As I have said in previous letters, one of the most unsatisfactory features of the situation is the glaring manner in which the general public has held aloof from any attempt to assist the authorities in apprehending the men responsible for the long series of outrages which has been recorded this year. That this failure to assist the police in these cases has not been the result of the inherent dislike of giving evidence in court which Egyptians are said to have, but that it is due either to sympathy with, or intimidation by, the clique that is responsible for these outrages, is clearly proved by the fact that a few days ago when a foreigner shot at another foreigner in Cairo and ran away the Egyptian onlookers chased him and handed him over to the Police.

Important Arrests.

Just as I close this comes news of the arrest of various members of Zaghloul Pasha's Wafd. The Egyptians arrested include Hamad Pasha El Bassal, who is an influential Bedouin chief and was deported with Zaghloul Pasha to Malta in March, 1919; Murad Bey El Sherei; Elwy Bey El Gazzar; and four Copts: Wassef Bey Ghali, son of the late Coptic Prime Minister, Butros Pasha Ghali, and Secretary of the Wafd; Morcos Bey Hanna, Batonnier of the Egyptian Bar; Wissa Bey Wassef, a former Batonnier of the Egyptian Bar; and George Bey Khayat. No official announcement has been made of the cause for their arrest, but it appears that they issued two days ago a manifesto which was written in very inflammatory terms and calculated to excite public feeling.

IRAQ.

Baghdad, July 7.

Treaty Rumours.

Events have followed one another in rapid succession since my last letter was written, but the Treaty has been the pivot on which they have all centred. It had been hinted that the Council of Ministers was rapidly approaching the end of its discussion of the Treaty and that the moment when they would be called upon to sign or refuse to sign was drawing very near. The anti-Treaty party decided therefore that the time was ripe for a demonstration which would deter the Ministers from signing, and a "hartal" was accordingly decreed, but proved almost a complete failure. Very few shops were closed, and most of these opened again as soon as their owners saw other people doing business while they remained idle. On the same day a deputation waited upon the Nakeeb and protested against the signing of the Treaty. The Nakeeb, however, did his best to remove any apprehensions they may have entertained that there was anything in the Treaty which would do harm to the interests of this country, and assured them he would watch Iraq's interests most jealously.

On the following day Jaafar Abu Timman, Minister of Commerce, resigned. He has sedulously spread the report that he did so because he disagreed with the other members of the Council regarding the Treaty. As a matter of fact rumour has it that there is some doubt whether this is the true reason of his resignation. It is said that it is intended to abolish the Ministry of Commerce and that the Minister, getting wind of this intention, decided to send in his resignation before the order abolishing the Ministry and him with it would be published. At the time excitement ran high in Baghdad, and the announcement that the Treaty had been signed or refused was expected daily. All that has been announced so far, however, is that the King, the Cabinet,

Digitized by Google

and the High Commissioner have reached complete agreement on the subject of the Treaty.

The resolution passed by the House of Lords regarding the Palestine mandate has brought a new factor into play, which is likely to delay matters still further. This resolution has been hailed in this country as a sign that the British Government, or at any rate the House of Lords, does not approve of mandates; and hopes have been raised that Great Britain will shortly renounce her mandates and confer on Iraq complete independence untrammelled by any foreign interference or control. As a result the Council of Ministers seems to be trying to fight a delaying action in the hope that the mandate will be removed before they have to make any decision regarding the Treaty.

General News.

Meanwhile preparations are being made for the holding of the general elections, and it is expected that arrangement will be completed in time to hold them in August or September. The Ministry of the Interior sent for all *mutasarrifs* last week to discuss witht hem the details of work remaining to be done in this connection.

Affairs in the districts have been quieter of late. In the Muntafik division Raouf al Kubaisi has been displaced as *mutasarrif* by Yassin Pasha al Hashimi, an officer of ability and experience who arrived in Baghdad from Syria a short time ago. This appointment has given universal satisfaction, and confidence is felt that he will prove himself able to grapple with the difficult problems of the Muntafik division and that a greater measure of order and security will now be obtained.

A big caravan arrived from Aleppo a few days ago having travelled *via* Meskene, Deir ez-Zor and Hit. It reported that it had met with but little trouble on the way, the least security being experienced in the sector from Abu Kemal to Hit. It is hoped that this route will soon be open for regular caravans. The Mosul-Aleppo route is now open and caravans leave Mosul every three or four days.

Baghdad, July 21.

New Laws.

The Council of Ministers has been busy of late and in the intervals between the discussions regarding the Treaty, which seem to be interminable, have passed several new laws. The most important of these is the Law of Associations, which regulates the foundation and administration of clubs and societies political and otherwise. There has for some time existed a very persistent demand for the publication of this law, as ever since it became known that elections to the National Assembly were to be held in the near future political parties have been anxious to develop their organisation and make preparations for an electoral campaign. In the absence of the Law, however, the meetings and associations necessary for such development would have been illegal. Applications for licences have to be made to the Ministry of the Interior, accompanied by very full details regarding the objects of the club or society, a copy of its draft rules and the names of its provisional committee. If the Ministry does not reply to the application within fifteen days, application may be made direct to the Council of Ministers. On receipt of a licence a general meeting of the club or society is to be held within a month, the rules passed and the permanent committee elected. Their names, together with any changes which may from time to time be made in the rules are to be reported to the Ministry of the Interior. The Ministry can close the club or society at any time for a breach of the law, but an appeal from the order lies to the Council of Ministers. Provision is made for the inspection of the club and its books and registers at any time by any person authorised by the Ministry. While saisfaction is felt that the law has at last been published, some uneasiness is evinced regarding the wide powers given to the Ministry of Interior, and political clubs are apprehensive lest these powers may not open a wide door to abuse by an unscrupulous minister.

Another new law levies an entertainment tax of one anna on every eight annas of the value of tickets sold for entry to theatres, cinemas, concerts and horse races. This has raised a storm of abuse from cinema owners, who declare that as a result of the existing heavy taxation they are already working at a loss and that this new tax will necessitate a rise in their charges and a consequent reduction in the number of people who attend. Under ordinary conditions there might be a tendency to sympathise with the cinema owners, but at the moment, seeing that there have for some time been three cinemas in Baghdad, while a fourth was opened a few days ago and a fifth is nearing completion and about to be opened, it is difficult to believe that all cinema owners are incurring heavy losses. At a time like the present, when it is most important that the people should avoid expenditure on unnecessary imported luxuries, and save their money for productive works inside the country, any measure which will in any way check the extravagant expenditure on cinemas and coffee shops which is so noticeable a feature of Baghdad to-day is to be welcomed.

Miscellanea.

What might have been a very serious fire broke out in the early hours of yesterday morning in New Street in the Bab ul Agha quarter. The city Telegraph office and several shops in its vicinity were burnt down, but the combined efforts of the City Fire Brigade and the Military Fire Brigade from Cantonments were successful in localising the damage, which is estimated at Rs. 300,000. Fortunately there was no wind at the time, or the results might have been very serious.

Major Blake passed through Iraq this week in his attempt to fly round the world. He did not stay long, but considerable interest was taken in his arrival. He informed press correspondents in Basrah that the trip from Baghdad to Basrah was the most uninteresting part of his trip so far. On his way he ran into a dust storm at 7,000 feet.

A British sergeant attached to the Iraq Levies, Sgt. Woods, was killed in Maude Avenue a few nights ago. It appears that he was coming back from Baghdad West Station in a motor lorry after dark and saw four or five men fighting. He stopped the lorry and got down to stop the fight, but was immediately shot. No trace of the perpetrators of this crime has yet been found. This section of road between Maude Bridge and Baghdad West Station is earning for itself an unenviable reputation.

The weather in Baghdad is remarkably cool this year. The north wind has blown steadily since the beginning of June, and until a day or two ago temperatures had as a rule remained well below 110 degrees. The last day or two, however, have been hotter, temperatures of 114 degrees having been recorded.

PALESTINE.

Jerusalem, July 23.

Statement by High Commissioner.

As early as possible after his return from Europe the High Commissioner brought together his Advisory Council. The nominal reason for the special session was the discussion of a draft Ordinance authorizing the Government to contract loans generally; but the chief

outcome was another formal statement by the High Commissioner on British Palestinian policy, together with a protest against the mad campaign of libellous untruth to which the "Moslem-Christian Association" in an unguarded moment seems to have committed itself, or allowed itself to be committed by some of its members. "I have returned to Palestine," the High Commissioner says, "to find that this event (the expected ratification of the Palestinian Mandate) is giving rise to a remarkable series of false rumours, which have been spread among the people. It has once more been asserted that the Moslem possession of the Mosque el-Aqsa and the Harem esh-Sherif is threatened, and representatives have been sent to Mecca to defend Moslem rights. It is not necessary to go to so much trouble to repel an attack which no one has made or will make. The Moslem possession of the Harem esh-Sherif is absolutely guaranteed, not only by the declarations of the British Government but by Article 13 of the Mandate itself. That Mandate, so far from threatening, is an additional protection, if such were needed, of the existing rights of each community to its Holy Places. . . . It is rumoured also that on the passage of the Mandate the British flags over the Governorates will be replaced by Zionist flags; the Government of the country will be transferred to the Zionist Organization, and thirty thousand Jews will immediately enter the country to occupy it. I am not so much surprised that mischief-makers should spread fantastic stories of this character as I am that any sane human being should believe them. Yet, I am assured that so credulous are sections of the population of this country that there are many individuals who really believe that events such as these will happen."

Coming to the matter of the Government Loan, Sir Herbert explained: "It is necessary that in this country, as in others, a certain amount of capital should be available for purposes of development beyond the sums that are provided by the annual taxes. It is intended, therefore, to issue a Government Loan to supply the financial requirements of the Government in respect of Railway development and rolling-stock, telephonic and other Post Office requirements, the building of roads, the assistance of agriculture, the draining of swamps as a preventive of malaria, the erection of some Government buildings and a variety of other purposes. This loan is not intended to be used to repay the British Government for the construction of railways, the provision of the Jerusalem water supply and other works carried out during the War, the repayment for which must wait until the financial position of the country is considerably improved above its present standard."

Press Comments.

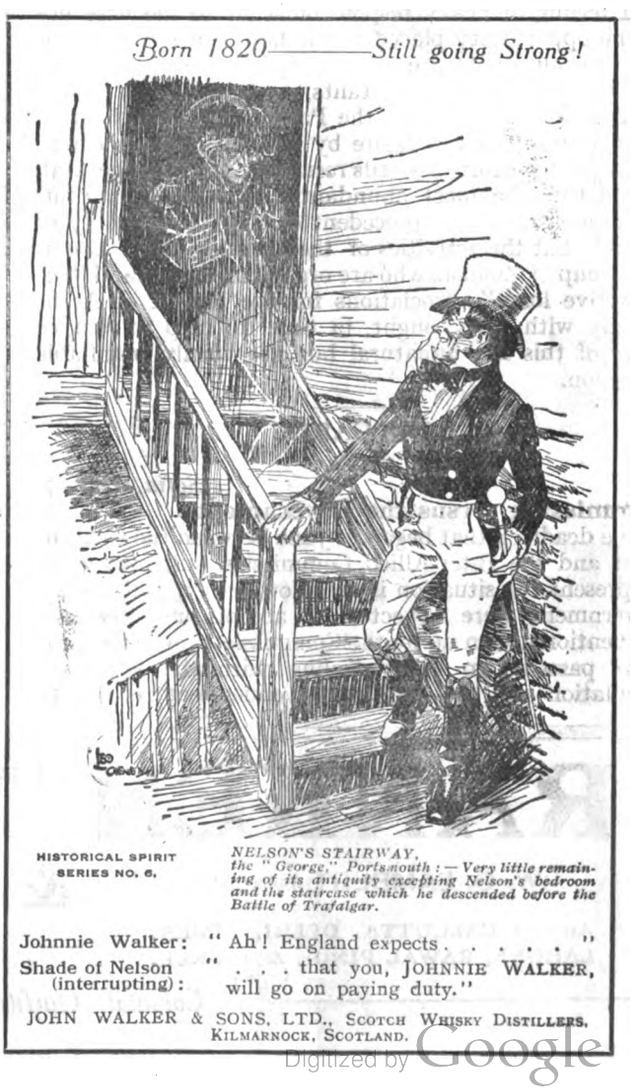
At any other time the High Commissioner's statement would doubtless have occasioned more remark, but at that moment all attention was centred on the imminent confirmation of the Mandate and its possible local consequences. None the less some sections of the Arab Press have already found opportunity of expressing their feelings in the matter of the Government loan. *Bet el-Makdes*, for example, in its last issue pours scorn in its leading article (entitled "A Sedative Policy") on this childish system of trying to distract public attention from the really grave essentials to such an irrelevancy as a loan, and talking to the people at such a grave time as this about the need of developing roads, telephones and railways. The same paper then goes on to say: "Sir Herbert Samuel announces that after the confirmation of the Mandate, the country will have something in the nature of a Parliamentary Government, in the Legislative Council, comprised of a majority of elected members; but in the self-same moment he belies the entire idea by seeking from the present non-elective Advisory Council the arrangement of loans—matters which pertain solely to the province and competency of the proposed Parliament, and even so, not *before* but *after* the confirmation of the Mandate."

The comments of *es-Sabah* are worth quoting at greater length: "Sir Herbert Samuel a few days ago invited the Advisory Council to assemble, and asked them to agree to the launching of a large Palestinian loan; but the Arab members of the Council would not agree since they know the vast evil which this loan will bring upon our homeland. None the less this lack of agreement will not prevent the High Commissioner from working his will and raising the loan in the name of Palestine. There can be no doubt that this loan will be covered by European Jewish financiers and be expended on the Jewish immigrants, and so count in the country's budget as a debt, of which the greater part will fall as a burden on the Arabs, just as they now bear the burden of the expenses of an Administration which is trying its utmost to drive them from their country and introduce their enemies in their stead."

The same paper then propagates some ideas which we do not remember to have heard before in Arab circles: "The intelligent ones among the Jews ought to realize that the handing over to them of Palestine by Great Britain does not mean that Palestine will be their property and actual possession. And even if the League of Nations should agree to confirm the treaty of the Mandate, the Arabs, the natives of the country, will by no means agree to it. . . . The clever Jew should also realize that the object which Great Britain hopes to reach from the policy which it is pursuing in Palestine is not to support and encourage the Jews, but to carry out a difficult experiment which aims at stifling the Arab nation and the Moslems. And in order to carry out its scheme Great Britain is trafficking with the money and blood of the Zionists till the experiment is carried out. If the experiment succeeds Great Britain gets all the profit; if it does not succeed, Great Britain stands to lose nothing whatever, but will then curry favour with the Arabs and turn down the Jews. And then—it will be no concern of Great Britain whether they kill the Jews and shed their blood or treat them with respect. The problem of the Armenians in the past and in the present is the most convincing proof possible of this."

News of the Mandate.

The news of the League of Nation's consent to Great Britain's Mandate over Palestine reached Jerusalem



Digitized by Google

early yesterday evening. It is difficult to describe the state of tension which had existed throughout the entire preceding week. The impression here was that the League of Nations was to meet on the 17th of this month with the sole purpose of dealing with the Palestine Mandate. Consequently Jewish expectations were all agog from six o'clock on the morning of Monday the 17th, waiting for the first intimation of the great news. To the onlooker the ultimate passing of the Mandate seemed quite inevitable and merely an informal matter. Here the feeling, both among Jews and Arabs, was very different. The Jews had suffered, or thought they had suffered, so much from delays, and the Arabs had gained, or thought they had gained and might still gain, so much from similar postponements, that there was no certainty among either as to the outcome. A very prompt supply of cabled news was available through the Hassolel News Agency (a very live concern organised by a group of young native-born Palestinian Jews, who have shown a glorious and healthy independence in their attitude to the official Zionist Organization and its personnel), and the proceedings of the League were known here within an hour or two.

With the delay, day after day, of the expected confirmation, the nervous tension grew more and more marked. To the older generation of Jewish workers in Palestine, who had laboured these past forty years for the Jewish national revival, the passing of the Mandate was the coping-stone of their work and hopes. Their state of mind by Wednesday and Thursday of the week is indescribable: they could neither sleep nor eat, nor stay in their own homes. It should be noted, however, that when the news actually arrived, there was nothing in the way of "mafficking"—that is hardly the Jewish way—and the Jews do not seem to have caused any offence by anything of the nature of provocative "gloating." There is a wiser spirit abroad, ably voiced by Dr. Stephen Wise in to-day's *Doar ha-Yom* (the organ of the older Palestinian Jewry, whose Zionist ideals have always assumed a more moderate and reasonable form of expression), that the occasion is not so much one of joy, as of gratitude to Great Britain and of a feeling of heavy responsibility as to the wise use of the opportunity placed in the hands of the Jews for shaping out a future which shall primarily benefit Palestine and all its inhabitants.

It is only natural that the Palestinian Arab, hearing such protestations of desire by the Jews for associated Arab-Jewish efforts towards results from which the Arab will derive the most abundant gain, should murmur something about the precedent of the "Young lady of Riga"; but the activities of the Brandeis-Mack American group of Zionists who are organizing banks and "co-operative loan" associations for the benefit of Arabs equally with Jews, ought, in time, to help to remove some of this not unnatural but not wholly justifiable suspicion.

BULGARIA.

Sofia, July 27.

Commission versus the Government.

The deadlock that began in June between the Government and the Inter-Allied Commission still continues. At present the situation is as follows:—On July 20 the Government were expected to accept or refuse the Convention drawn up by the Commission. The Government passed two Laws dealing with the Fiduciary Circulation and the Lists of Revenues, but refused to allow the Commission any control over the Customs or the Mines. The Commission offered to make considerable concessions regarding money payments by Bulgaria, but at the same time insisted that the Customs and Coal Mines should be under their control. On July 20 it became known that the Government had categorically refused to give way to the Commission on these two points. They stated that no Government could pledge away two of the most valuable sources of revenue that Bulgaria possessed. The Commission held a meeting on the 21st, and after having been told by M. Tourlakoff, Minister of Finance, that the Government's decision was irrevocable, the Commissioners wired to their respective Governments for instructions.

It is understood that the Commission have recommended that the Treaty be put into force. This implies big money payments during 1922. The Articles of the Treaty on which the Commission base themselves are Articles 121 and 122. Article 121 specifies that Bulgaria will begin her money payments on July 1, 1922. Article 122 reads as follows: "The Inter-Allied Commission shall from time to time consider the resources and capacity of Bulgaria, and, after giving her representatives a just opportunity to be heard, shall have discretion to recommend to the Reparation Commission either a reduction or a postponement of any particular payment due or a reduction of the total capital sum to be paid by Bulgaria." The Commission have tried to act according to Article 122 but they have now been forced to fall back on Article 121.

Meanwhile, the Sobranye re-opened its extraordinary session yesterday, and M. Tourlakoff informed the Deputies of what had happened. Government circles are awaiting with anxiety the next move of the Commission. Public opinion is beginning to be keenly interested in the situation. Amongst foreigners the consensus of opinion is that the Government has been ill-advised to act as they have. It is even said that the Allies may decide to use force, and that they will request Bulgaria's neighbours to provide the means therefor.

Frontier Bands.

Telegrams from London indicate that the Council of the League of Nations has not done very much toward settling the troubled question of frontier bands. It will be remembered that Bulgaria appealed to the League on account of accusations brought against her by her neighbours. She was accused of encouraging the bands that operate along the frontier. The Council heard in turn the Bulgarian, Serbian, Roumanian, and Greek Delegates, and M. Theodoroff on behalf of Bulgaria made a lengthy speech in which he recounted the measures taken by the Bulgarian Government for the suppression of frontier bands. The Council entrusted Baron Ishii, the Japanese Delegate, with the task of "Reporter." The latter recommended that Bulgaria should enter into direct relations with her neighbours and should try to come to a friendly understanding. He also suggested that the League of Nations should be kept informed of the negotiations, so that if necessary a further inquiry could be held.

Games of Chance.

After many years of patient waiting those who have endeavoured to introduce public gambling into Bulgaria have met with success. A law recently promulgated allows the erection of casinos and the carrying on of gambling in public places. It is said that a foreign syndicate is contemplating the construction of a casino on the outskirts of Sofia. The main reason which

prompted the Government to allow public gaming was that they reckon that by imposing a fairly heavy percentage tax on gambling institutions they will be able to secure a large revenue for the State.

GREECE.

Athens, July 22.

The Council and Asia Minor.

Many meetings of the Council of Ministers have been held, which the Greek High Commissioners at Smyrna and Constantinople attended. M. Streit also was present at some of them. Rumours of decisions are rife, but nothing definite is yet known, and matters appear to be drifting on from bad to worse. The blockade of the coast is stated to be felt by Mustapha Kemal, but how much truth there is in it is uncertain. A visitor to both fronts has informed me since his return that, whichever Army tries to advance, it will be defeated. He instanced the want of water for the troops as being a complete hindrance to any advance—both sides have to transport water by train; in some cases over one hundred miles.

The Political Situation.

The Greek people always desire quick results. In business they will generally seize a quick profit rather than wait for larger profits at some future date. It is the same in politics. When the people do not see any quick gain to the country or themselves from the party in power, they begin to look round for some other party to replace them. In the present case not only do the people feel that they are not gaining anything, but each one knows that he has actually to spend more to live while his business is almost at a standstill. To-day the people are grumbling against the Gounarist party and are looking round for another leader. In order to prevent any scenes or revolutions the anti-Venizelists are forming clubs to keep their followers together. If the present party does go out it is probable that a quite new party will be formed—and all are more or less agreed that none of the old leaders would be at the head of such a party. There is to my mind not the slightest chance of the Liberal party's regaining their past position so long as their main object is to bring back their old chief. The one man who stands out above all others as the leader is M. Streit, but he could not be induced to take up the task. It must not be forgotten that whoever holds the reins of Government has an extraordinarily difficult task.

The Gendarmerie.

A law has been passed placing the gendarmerie directly under the Minister of Interior, and doing away with the connection between the military and the police. This has caused the resignations of a few of the higher police officers, but will lead to more efficient service.

PERSIA.

Teheran, June 20.

The Political Situation.

The Cabinet crisis has just been settled after lasting more than a month, mainly owing to the time taken in keeping the Shah in Paris informed of events by telegraph and waiting for his reply. At the beginning of May Mushir ed-Dowleh, the Prime Minister, was asked by Sardar Sipah, the Minister of War and Commander-in-Chief, to suppress certain newspapers for writing against the Government, and, Mushir ed-Dowleh not seeing his way to doing this, Sardar Sipah (so Mushir ed-Dowleh's statement in the Press goes) threatened that he would give orders to prevent the Prime Minister's attending the Council. Thereupon Mushir ed-Dowleh immediately telegraphed his resignation and that of his Ministers to the Shah in Europe, who wired back requesting him to reconsider his decision, at the same time telegraphing the Mejliss to endeavour to patch up the difference between the two Ministers, and instructing Sardar Sipah to maintain order during the crisis—thereby placing him practically in sole charge of the country's affairs in the absence of a Government. As a result of the Parliament's intervention, the disagreement between the Minister of War and the Premier was bridged over, and the latter consented to re-form his Cabinet; but only to resign again definitely a few days later, for reasons that were not clear. After an unavoidable waste of time a further exchange of telegrams between the Mejliss and the Shah resulted in the nomination by the former of Khavam es-Saltaneh (who had held office last autumn before Mushir ed-Dowleh) as Prime Minister, and on the 18th instant he presented the following Cabinet to the Mejliss, departing from the precedent created by former Premiers of taking charge of Home Affairs, and choosing instead the portfolio of Foreign Affairs:—

Prime Minister and Minister for Foreign Affairs	Khavam es-Saltaneh.
Minister of War	Sardar Sipah.
,, Finance	Fahim ul-Mulk.
,, Posts & Telegraphs	Wahid ul-Mulk.
,, Justice	Moshar es-Saltaneh.
,, Public Instruction ..	Mohtashem es-Saltaneh
,, Public Works ..	Amid es-Saltaneh.

The Ministry of the Interior has not yet been allocated, and Mansour ul-Mulk is acting in the meantime. Most of the Ministers have held office before in previous Cabinets, and the new Minister of Finance was Treasurer-General from 1918 to 1920. This latter post was abolished under Seyed Zia ed-Din's régime last year.

In introducing his Cabinet to the Mejliss, Khavam es-Saltaneh stated his intention of continuing the policy of his immediate predecessor and of his own Ministry before that, and added that he would maintain the same friendly relations with all foreign Powers. The Government's first aim would be to restore order and ensure public safety throughout the country, by means of the military forces raised and organised so efficiently by the Minister of War. The Government's next object would be reform in the Government departments, especially in the Ministry of Finance; and in this connection a Bill would be submitted to Parliament as soon as possible dealing with the engagement of foreign advisers (presumably from America), of which the Mejliss had already approved just before the resignation of Mushir ed-Dowleh. The Government intended, he continued, to take steps with a view to balancing as far as possible the country's exports and imports, and thus improving the present economical situation. To this end, also, the Government intended to pay special attention to the question of the Northern Oil Concession, which they hoped soon to settle. If this were granted and work started on it in the near future, it would be the means of providing employment for many at present out of work, and would, besides, be a source of considerable and permanent revenue to the Government.

The above programme on paper is undoubtedly good, and if the Prime Minister can carry it out wholly, or even partly, during his tenure of office, he will have good cause to congratulate himself.

Simko the Kurd—and others.

The internal situation of the country during the protracted Cabinet crisis has been anything but good; robber bands and tribesmen have been taking advantage of the absence of a Central Government to loot and plunder, and many of the principal roads have been insecure In addition to these highway robberies the Kurdish rebel chief, Ismail Agha Simko, who has been on the warpath for the past two or three years and defied all the Government's efforts to subdue him, recently inflicted a severe defeat on a Government force sent against him from Tabriz, under Khaloo Ghorban, and drove them out of Sujbulak, which they had temporarily reoccupied. Khaloo Ghorban, who was killed in the fight, was one of the leaders of the Bolshevist rising in Ghilan in 1920-1921, under Kutchik Khan, the Jungalee chief, whose body was found on a mountain pass near Resht last winter, he having apparently perished in a blizzard, and whose head, in accordance with the old barbaric custom which still survives here, was cut off and sent to Teheran in proof of the actual death of a rebel of whom the Government was well pleased to be rid.

Digitized by Google

The Minister of War is preparing a fresh campaign against Simko, but the latter, who has been joined by a number of Turkish officers, deserters and adventurers, has so far been well able to hold his own and seems quite content to keep within his own ground to the west and south of Lake Urmia.

In Ghilan there has been a recrudescence of Jungalee activity under a certain Seyed Jalal, who with a force of 3-400 men has had one or two encounters around Masouleh and Kasma with Government troops, who are superior in numbers, and has come off second best. This movement, if not actually supported by Russian Bolshevists is being keenly watched by them, and it is therefore highly important for the Government to nip it in the bud before it spreads and assumes larger proportions. The Minister for War seems quite confident of being able to cope satisfactorily with it. He found it hard to deal with these disturbances single-handed before the formation of the Government, but now that he has the moral support of the Cabinet behind him he is taking energetic measures, and advices from the provinces report an improvement in the situation already and increasing safety on the roads.

The Sardar Sipah's Work.

The Sardar Sipah is indeed to be congratulated on the Army which he has raised. Though having undoubtedly benefited by the presence of the British force in Persia, and having learnt many lessons from them when he effected the dramatic *coup d'état* of February 21, 1921, he has now succeeded in throwing off all foreign influence, and has combined all the armed forces of the country into one. What were formerly the Cossack Division, the Gendarmerie, and other units, are now all united into one Army, of which the Minister of War is Commander-in-Chief; and all foreign appellations, which were in general use under the Russian and Swedish instructors and officers, have now been abolished, and replaced by purely Persian titles.

Northern Oil Concession.

Last November a stir was caused in political and diplomatic circles by the passing of a Bill in the Parliament authorising the latter to offer the grant of a fifty years' concession to exploit the oilfields in the North, *viz.*, the provinces of Azerbaijan, Ghilan, Astrabad, Mazanderan and Khorassan, to the Standard Oil Company of America. This led to protests from the Russian Legation on behalf of a certain Georgian, Khoshtaria, to whom this concession had been granted some years ago, and from the British Legation, on behalf of the Anglo-Persian Oil Company, to whom it appeared Khoshtaria had sold his concession. After long negotiations between the Standard Oil Company and the Anglo-Persian Oil Company an agreement was reached, and a joint advance of a million dollars was made to the Persian Government last March against future Oil Royalties. The Treasury being empty, the Persian Government, thinking this was an independent advance from the American company, accepted the money, which was disposed of in a day or two, the greater part going to pay the troops and other Government officials, whose salaries were already some months in arrears. When the Government learned that the advance, was practically conditional on granting the concession to the Standard Oil Company in conjunction with the Anglo-Persian Oil Company, it immediately attempted to put a stop to all payments out of the advance, which they wished to repay, but the money had already been dissipated, and the matter had to stand.

This agreement between the Standard and Anglo-Persian Oil Companies is most displeasing to the Persians. When they voted the offer of the concession to the Standard Oil Company they did it with a view to introducing another foreign influence into the country, to counteract as much as possible Russian and British influence, which the local Press is never tired of maligning. All classes of the people were very enthusiastic about the new concession and everyone hoped that with the American exploitation of the Northern oilfields there would come an era of prosperity for the country; and the Persian Government of course stood to gain a large sum each year in royalties, which were fixed at 16 per cent., in addition to the probability of being able to float a substantial loan through the Standard Oil Company, one of the wealthiest firms in the world. But the Standard Oil Company allied by an agreement to the Anglo-Persian Oil Company was quite another matter, and it came as no surprise, therefore, when quite recently an amendment to the original Bill of last November was presented by forty-two Deputies and passed by the Mejliss authorising it to negotiate with other independent American firms regarding the grant of the concession. Anticipating this, the American Sinclair Group sent out their representatives last winter, and they have been negotiating with the Government for some months past. The Persian Government is now fully alive to the great possibilities of the concession, and intends to derive far more pecuniary benefit from it in the way of Royalites than they obtain at present from the concessions already granted.

The Northern Oil Concession is the absorbing theme of discussion at present in the local Press, and as one paper wittily remarks, "Teheran these days smells of petroleum, in the Cabinet, Mejliss or any other society"!

General News.

A fortnight ago the Annual Polo Tournament, which was revived after a lapse of some years, was played, three teams taking place. The first day a team from The Imperial Bank of Persia was beaten by the British Legation team, captained by Sir Percy Loraine, H.M.'s Minister. The latter on the second day were defeated by a team from the Persian Army captained by Major Harvidson, the Swedish ex-officer of Gendarmerie, now in charge of the Army Stud. After the game the silver Challenge Cup was presented to the winning team by Sardar Sipah, the Minister of War, who was an interested spectator of the game, and who was naturally pleased to see a team from his Army beat two English teams.

The Valiahd (Crown Prince) returned to Teheran a fortnight ago, and seems to have benefited considerably from his year's stay in Europe.

TURKEY.

Constantinople, July 26.

Assassination of Jemal Pasha.

The news of the assassination of Jemal Pasha at Tiflis by two unknown individuals was received here yesterday by the Italian Embassy, and caused considerable consternation in Turkish circles. The motive for this crime is as yet unknown, but it is probable that his persecution of the Syrian Arabs had something to do with it. Most of the Turkish papers in their comments ascribe the murder to Armenian anarchists. Jemal Pasha was returning from Western Europe to Afghanistan where, it

will be remembered, he was lately appointed Military Adviser to the Afghan Government. During his visit to Europe he had placed large and important orders for munitions, and other war material for the equipment of the Afghan Army. The *Yeni Shark*, the first Turkish paper to announce this assassination, says that Jemal Pasha, like so many other Unionists, ended his life without having had an opportunity of redeeming the harm he had done to his country.

At the time of his assassination Jemal Pasha was accompanied by his two A.D.C.'s, Ismet and Nousret Beys, who it is reported, also shared his fate.

Mustapha Kemal's Powers Prolonged.

Contrary to expectations, Mustapha Kemal's influence in the Angora Assembly has been increased by the confirmation of his powers as Commander-in-Chief for the duration of hostilities. After thanking the Assembly, Mustapha Kemal stated that immediately on the conclusion of an honourable Peace he would make it a point of honour to resign the important functions which he reluctantly accepted during the critical period of the Greek Offensive on the Angora Front.

Economy in the Turkish Government.

The Sublime Porte is seriously considering the Note from the Allied High Commissioners regarding the reduction of Government servants. This has been brought about by the frequent requisition by the Allies of funds of the Imperial Treasury for the upkeep of the various Allied troops of occupation. In addition the Sublime Porte has decided to abolish the Legations and Consulates in various neutral countries. Orders have already gone out for the closing down of Legations and Consulates in Madrid, Berne, The Hague, and Stockholm. Government buildings will also be evacuated and let to private concerns. By these means the Treasury expects to cover the Ltqs. 500,000 deficit monthly due for wages to Government employees.

The scheme also provides for the reduction in salaries of schoolmasters and hospital nurses, and the abolition of superfluous Government offices.

It is anticipated that a further 5,000 Turkish Army officers will be placed ion the retired list.

A Beikos Conference?

Talk of the Beikos Conference is occupying general attention. Both the Sublime Porte and the Angora Government have indirectly given their replies to the Allied Proposals. The Sublime Porte, it is understood, considers that acceptance of the Allied Proposals will place the Central Government in an embarrassing position in view of the fact that the Angora Government will claim right of precedence; which the Sublime Porte can in no circumstances concede to them while the Conference is being held on territory under the Sultan's control.

On the other hand Angora has instructed its Constantinople representative, Hamid Bey, to inform the Allies unofficially that it cannot accede to the Allied suggestion of a Conference at Beikos, but expresses its willingness to meet the Allies at Ismidt in order to enable Mustapha Kemal to attend. Futhermore, the Nationalists are not hostile to the plan contained in the French Memorandum to the British Government suggesting that the conference should be held on board a French warship if the proposal regarding the Beikos Conference is rejected by both sides.

Enverist Movement in Turkestan.

Astounding reports continue to reach us with regard to the Enverist anti-Bolshevist Movement in Turkestan. According to a report published in the local press, Enver Pasha, in consequence of his recent successes against the Bolshevists was proclaimed Emir of Bokhara in defiance of the real Emir, who fled to Afghanistan during the Soviet Revolution, preferring exile to the ignominy of Soviet Rule.

Subsequently, Araloff at Angora has informed the Nationalist Government that Enver Pasha has been overwhelmingly defeated by an encounter with Soviet Forces. "What is Truth?"

Gurdit Singh, who was prominent in the riots in Calcutta on the return from the Far East in 1914 of Sikh emigrants, was sentenced at Amritsar to five years' transportation on a charge of sedition.

CORRESPONDENCE.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

THE PALESTINE COMPROMISE.

To the Editor of "The Near East."

Sir,—Will you allow me, appealing to your usual fairness, to correct the statement made in your leading article of July 13, under the above heading: that hitherto Jewish immigration has been solely in the hands of the Zionist Organization. This has never been the case. There is a Government Department for Immigration and Travel which has hitherto directed everything connected with immigration. Government Ordinances and regulations have been issued on the subject, which are very strictly adhered to.

The part of the Zionist Organization hitherto has been to submit lists every three or six months pointing out in their opinion the number of people for whom work was obtainable. The Government Department then accepted, rejected or modified the lists submitted, sending on their instructions to the British representatives concerned. The sole duty of the Zionist Organization was to guarantee to the Government that no immigrants for whom we are responsible should be a charge upon the Government for a period of twelve months after admission into Palestine; to take charge of the immigrants upon their arrival until they were able to distribute themselves in the country.

Any utterances made in your Review are regarded by us here in Palestine as having almost official sanction. I am well aware that there is room for difference of opinion based on facts, but I am sure that your desire is to state the facts correctly. I am etc.,

W. D. EDER,
Palestine Zionist Executive.

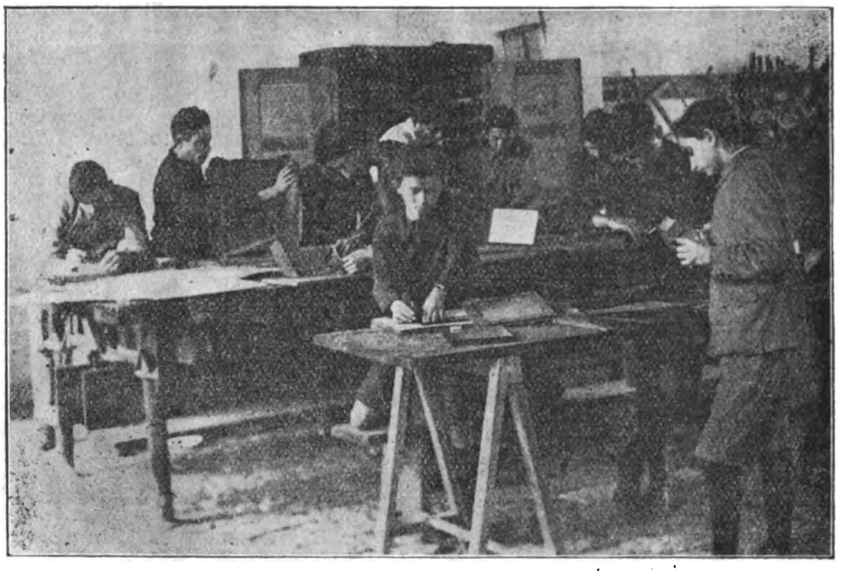
HAIFA SECONDARY SCHOOL.

The Bet Hasefer Hareali Haibri, the Hebrew Secondary School at Haifa, aims at becoming a centre for those who believe that side by side with constructive economic work there must go the constructive raising of a new Jewish generation, a generation of purposeful productive work, and it is the hope of those responsible for it that it will become the home of such an education. Here children are given manual training in workshops which is calculated to fit them to take full advantage of the educational facilities afforded by the allied Technical College. The school programme provides for ten lessons a week for manual work, including drawing, which is inseparably connected with the work in the workshops; and in all ways it is sought to develop the individuality and self-expression of the pupils. The school seeks to replace the mechanical imparting of ready-made knowledge by encouraging observation and experiment, and work with apparatus made by the pupils themselves. To quote from a pamphlet published by the Society of Friends of the Hebrew Secondary School at Haifa, "This school believes that at the present moment it has only one great task to fulfil, namely to rear the right Jewish man for this gigantic work of building up, the man without whom there can be no Jewish colonisation, the man who combines idealistic soaring with steadiness of action, high ambitions with reliability in his daily work, with faithfulness in small matters, with absolute punctuality in the carrying out of his duties, and with a happy fitting in into the whole community."

Again, we read: "In the workshops the pupils are the guardians of cleanliness and order. They learn to understand that no work can be successful if every individual does not consider the whole and does not make himself responsible for the creation of helpful conditions for work. In the use of materials and tools they are taught to be economical, to handle carefully that which is public property, and to care for the tools with affection and understanding.. Above all, their training is to develop in them absolute accuracy in every undertaking from the smallest bit of work to the greatest task. . . . Thus through work there will arise men firm of purpose and working with natural and voluntary exertion. Through group-work the social forms of work are to be produced which are important for the future work of colonisation."

Gymnastics and sports are regarded as especially important factors in the education of the pupils, and the School hopes to foster a good tradition in this direction; while frequent excursions and camping expeditions are arranged. Carpentering, bookbinding, gardening, cardboard work and so forth are already taught; while for the girls there are cooking, housekeeping, etc. The pupils are likely to leave the school well equipped to fight the battle of life, and fitted to make good citizens; and the school is bound in time to make its mark on the land—and a very good mark too!

Modelling during Natural Science Instruction.



In the Workshops: Bookbinding.

The Egyptian native Press alleges that France and Belgium have refused the Egyptian Government's invitation to attend a Geographical Congress in Egypt in 1925, as they do not wish to sit at the same table with Germans.

THE GEORGIAN MILITARY ROAD.

By Malcolm Burr.

From the Black Sea to the Caspian there extends a mighty curtain of mountain which shuts off Europe from Asia, the mysterious Caucasus, the Land of Fire, the Mountain of Languages, according to the fancy of the poet. The main range, the Caucasus proper, extends from the Gulf of Azov to the Caspian over a distance of about 950 miles. Its snow-clad peaks tower up to nearly 20,000 feet above the sea, and there are half a dozen or more that are loftier than Mt. Blanc.

The mountain mass is little visited, and travelling has never been easy, or indeed, very safe; for even in the days of the excellent Imperial administration, the Tsar's writ did not run very far from the main south, and few foreigners penetrated into the interior. The railway skirts the range, keeping to the steppes on the north, and the valleys of the Kura and Rion on the south. But clean through the middle there runs the Georgian Military Road, a splendid piece of engineering, over which the tourist may motor in comfort from Vladikavkaz on the north to Tiflis on the south in twelve hours, far more quickly than in the train which used to crawl away eastwards to Baku, and then, doubling back upon itself, westwards to Tiflis and then to Batoum.

The head of the road, Vladikavkaz, as its name implies, commands the pass. It is a well laid out modern Russian city, with wide rectangular streets, and boasts of some 80,000 inhabitants. It is situated at an altitude of some 220 feet above sea level, on the plains of the Ter and Kuban provinces, once the granary of Europe. South of the town the mountain rises abrupt and sheer, so that the traveller wonders where the road can enter the apparently impenetrable wall before him. But soon a narrow gulch reveals itself, and here, at 2754 feet, is Balta, the first *stantsia*, or military station on the road, and in a moment we are in the cleft. The calcareous rocks are tilted at an angle of 45 degrees into a razor-edge escarpment, but crumpled and contorted shales soon replace them, and at the *stantsia* of Lars we enter the gorge of Dariel itself, famous from the poems of Lermontoff, every stone washed by the blood of Russian soldiers. The pass is narrow, and the mighty cliffs rise sheer on each side, while the noisy Terek, so turbulent that even trout cannot live in it, busily boils and bubbles in the middle. The walls on each side have saw-like edges standing out boldly against the sky, while at places fluted columns of basalt adorn the sides. All life seems to cease. The rocks are naked and bare, without trees, without scrub, almost without grass. The effect is crushing, oppressive and overwhelming. Four times I have been through it, and each time it seemed more impressive than the last.

A little way in a conical rock stands boldly in the way: perched on top are the ruins of an old castle, called the Tower of Tamara, the great Empress of Georgia, after whom half the girls are named. The first fort was built here by the Emperor Vakhtang Gurgaslan (A.D. 446-499), and it was restored by David the Renewer six centuries later. To-day it is a grim ruin.

Then on we go, over Gvelevsky's Bridge, under the overhanging "God help us" rock, through the Devil's Gate, till we emerge, not without relief, into the wider valley at the *stantsia* Kazbek. Here it is customary to halt, to stretch one's legs, refresh the inner traveller at the comfortable inn, and drink in the view of the mountain. The peak of Kazbek rises, as Lermontoff says, like a diamond in the sky, in an isolated pure white cone, high above the surrounding mountains, to an altitude of 16,546 ft. There are two glaciers, Gerget and Devdorak, but they are not visible from the road. The first attempt to reach the summit was made by Dr. Parrot in 1811; he reached 13,863 feet, but was driven back by storms. In 1844 Dr. Kolenati succeeded in reaching 14,547, but the peak was not finally overcome until 1868, when three Englishmen, Messrs. Freshfield, Tucker and Moore, reached the virgin crown.

Beyond Kazbek the upper valley of the Terek is wider and the scenery tamer. Beyond the next *stantsia*, Kobi, it is a land of alpine pastures, with *narzans* or chalybeate springs, surrounded by jagged, saw-edged peaks, with old Georgian villages and watch-towers on projecting cones, by which was maintained a system of signalling away to the capital at Tiflis. Beyond Kobi the road is constantly threatened by avalanches, so the way is protected by strongly-built artificial tunnels, over which the masses of falling rock, stone and snow slide, and leave the road intact. At Kobi the Terek has shrunk to a tiny rivulet, and at 7,500 feet the road reaches its highest point, which is marked with a cross, and here we cross the watershed and pass into the valley of the White Aragva. This lofty plateau is a series of rolling, down-like alpine pastures, surrounded by high, snow-clad peaks, and the road runs easily down past Gudaur at 7,327 feet, and Mlety, where we see the deep cut valley of the Aragva as from an aeroplane, with villages dotted along the flat alluvial banks shut in by the precipitous walls. But the road down is a series of zigzags, mostly without a parapet, and the Russian drivers whirred round appalling corners at terrific speed, where the slightest side-slip would have meant a sheer drop of a thousand feet or more. At one, more fearful than the rest I gripped my seat, clenched my teeth, and shut my eyes, as the chauffeur, with an airy wave of the hand, pointed out where a car-load had gone right over a few days previously; a small boy, who was flung out at once, saved himself by clinging to a shrub, but the car with the rest of the travellers went crash down the abyss into the river far below.

But milder scenery is reached in the valley itself, and it is customary to stop for lunch at Bassanaur, at 3,621 feet, a picturesque village in a narrow valley thickly covered with pines. The ménu was the same on all my visits, namely a glass of vodka, bortch, or sour soup with cream, delicious trout, tasty *shashlyk* or kebab, the whole *arrosé* with good wine of Kakhety, and followed by a cup of coffee. The scenery here is fine, but not grand; the mountains have degenerated into hills, and are thickly wooded. At frequent intervals we had to ford torrents that cut the road, and pass caravans of wild looking gypsies, who threw stones and curses at us for frightening their horses. At 2,325 we pass Ananaur, a picturesque village or townlet, with a cathedral and an old castle, which was the scene of the great massacre in 1740, when the *eristav* of Ksan attacked the place, killed the *eristav* Bardsim, and exterminated his family.

On leaving Ananaur, the road takes a sudden bend and enters open, undulating, highly cultivated plain, where one might imagine oneself in England but for the sight of a team of sixteen oxen ploughing. At Dushet, at 2,325, the vodka must have been good, for the drivers always stopped there for a few minutes, with no other object apparent, and then a race down a long straight road brings us to the Kura. Mtskhet is a substantial town and was once the capital of Georgia, and there still stands the old cathedral built by the emperor Alexander in the XVth century, to replace the one destroyed by Timur the Tatar. From that road the road bends abruptly to the east and runs straight into Tiflis.

THE PALESTINE ARAB DELEGATION.

The Palestine Arab Delegation arrived in London on August 2, 1921, in order to demand justice and recognition of its rights. It left for home on Monday, July 31. The following is the farewell message from the Delegation:—

"We have done our duty and our best to enlighten the Government and the free British nation on the facts of our case. The general public has shown sympathy for and interest in our cause. We, therefore, would like to say, with overflowing hearts, how much we appreciate this sympathy and the strong ties of friendship—ancient and new—which have been woven between the two peoples. As it would be impossible to say good-bye to each and every one, we are conveying through the Press to each individual friend and supporter, and to the nation at large, this message of gratitude and farewell, which we trust will be considered as a personal message. We are fully confident that the sympathy, support, and friendship shown by every class of the nation will be continued until, finally, our rights are vindicated. Farewell!"

NEAR EAST BOOKSHELF.

THE PHILOSOPHY OF THE EAST.

"A HISTORY OF INDIAN PHILOSOPHY." By Surendranath Dasgupta. Vol. I. (Cambridge University Press. £2.)

From the day when Indian philosophy first began to attract the attention of the Western world it has been the subject of continued interest, intelligent and otherwise. It profoundly influenced the philosophy of Schopenhauer, who went so far as to believe that Sanskrit literature would penetrate the West not less deeply than that of the Greeks in the XVth century. What grand work has been achieved by Max Müller and many other devoted scholars needs no telling. Nor is it necessary to refer to the use that has been made of it by the exponents of theosophy and occultism. To a world whose profoundest speculative thought has a Greek ancestry, Indian speculation offers a rich field; and the peculiar relations between West and East clearly demand that the West should endeavour to understand, both sympathetically and critically, an ancient type of thought that has had more meaning for the East than ever the more modern Greek thought has had for the people of the West.

The present work, the first of two volumes, stands in a class by itself. Its author, Professor of Sanskrit at Chittagong, Bengal, and lecturer in Bengali in the University of Cambridge, distinguishes himself by his sane and critical treatment of the subject, and by his equal command of eastern and western philosophical discussion. Writing without any obvious prejudice, and with a perfect familiarity with the mass of relevant Indian literature, he has treated the complexities of Indian philosophy with entire proportion; and he manifests an enthusiasm, a modesty and a consciousness of the vastness of his task, such that students of philosophy, both eastern and western, owe him a great debt of gratitude for his labours.

After some introductory remarks he deals with the Vedas and Brahmanas and their philosophy, and the general character of the earliest Upanishads. Preliminary observations on the six great systems of Indian philosophy are followed by chapters on the philosophy of the Buddhist and of the Jaina writers. Next come the Kapila and the Samkhya systems, the Nyaya and Vaisesika, the Mimamsa, and finally the Shankara school of Vedanta. The second volume will conclude with a chapter on his own views with regard to the net value of Indian philosophical development. This we shall await with interest; and a hint is already at hand in his conviction that "many of the philosophical doctrines of European philosophy are essentially the same as those found in Indian philosophy; the main difference is often the difference of the point of view from which the same problems appeared in such a variety of forms in the two countries" (p. 9). Although, as Prof. Dasgupta points out, he has often to use strange modes of expression, rather than adopt European modes of thought for distinctive Indian ideas, there are many striking similarities of thought and doctrine throughout. "This only proves," as he observes, "that the human mind follows more or less the same modes of rational thought." In other words, we are all not only physiologically, but also to a large extent psychologically related; and under the influence of similar experiences, confronted with similar difficulties, or in our endeavour to answer similar questions, we reach conclusions which are not rarely similar, and sometimes strikingly so. This makes the differences between East and West more noteworthy, and it is the task of the student to understand and to do justice to both the resemblances and the differences.

Professor Dasgupta has borne this in mind, and what he has to say upon such distinctive Indian ideas as *maya*, *karma*, *nirvana*—to mention only three—enables us to see how and why Eastern and Western thought can agree, for the reasons mentioned above, and how they can diverge, because of a few fundamental ideas and convictions which will entirely sway the various attempts to systematise experience and reflexion. Our Western ideas of evolution and progress, for example, must sever us from the East, where certain deep-reaching religious and philosophical convictions consciously or unconsciously compel outlooks upon life and thought entirely different from ours.

It is the great merit of this very full volume—it runs to over 530 pages and has an excellent and highly necessary index—that it provides first-class authoritative material for those questions which, though they are essentially philosophical, are of supreme practical importance for the present duty, namely that of learning to understand and to live alongside one another. Herein East and West have much that they can learn from, or teach, each other; and where the antagonism of thought seems most pronounced, there is need of a higher synthesis to resolve the opposition. If to us in the West the hope of some existence after death is the supreme consolation, to the more reflective East the nature of that existence, the certainty of some logical retribution, and the ceaseless chain of cause and effect prolonged through series of rebirths are the chief concern. If in the East speculation may often seem to take what appears to us to be a perverse course, the West, proud of its science and pragmatism, is too ready to ignore the need of speculative thought, and in some respects can hardly be said to have any native systematic theology or philosophy of its own. Eastern thought has ideas and conceptions, which, based upon long experience, have much to suggest to us; even as the historical and pragmatic spirit of the West has much to offer to the more quietist and metaphysical East.

The timeliness of Prof. Dasgupta's admirable survey lies in this, that Western thought has gradually been outgrowing the clothes it has inherited from ancient Greece, whereas the East shows us how thought has developed independently, with many interesting and suggestive results. When one sees, as at to-day, how false or imperfect ideas, doctrines or beliefs can overthrow a people, bring a country to ruin, or destroy social solidarity, one can realise that the study of philosophical and other systems of thought is of far more than merely academic or theoretical importance. When the essence of revolutionary activity is seen to lie in some "ideology" or other which is designed to disintegrate society in order to lay the foundations of some new order, an attentive regard to the ideas that permeate philosophical and other systems is of practical value. If we of the West are characteristically intolerant of philosophy, the fact is that it is the explicit and more systematised philosophising that irks us: our very attitude, like our whole political genius, bears within it a philosophy which is implicit. Similarly, the Bible itself, though no philosophical work, has an implicit philosophy which has given life to those who have made the Book their own. Though not a nation of philosophers we have an implicit philosophy which can profit from a study of the religious and other philosophy of those who are systematic thinkers, as were the Indians.

Though we are hardly a philosophical people, we have, on the other hand, done good work in "comparative" studies. Our tolerance and love of compromise, our desire to be fair, and the exigencies of empire—of dealing justly with different peoples and religions—have combined to foster that "comparative" spirit which can

London: E. MARLBOROUGH & CO., 51, Old Bailey, E.C.

sever the essential from the non-essential and see the spirit behind the letter. The work of "comparative religion," at which this country has excelled, leads naturally onward to "comparative" theology and philosophy; and it is in this direction that Prof. Dasgupta's volume points us. There is urgent need of a deeper and more penetrating comparative study of human thought; and the many excellent and popular works in the field of comparative religion now require to be supplemented by an enquiry which, if less simple, is more vital. No doubt the volume before us is no light reading. No doubt the discipline is severe. But the widespread interest in comparative religion is a slow and steady growth which can only reach maturity when we pass to those ideas and thoughts which make and unmake peoples, and which, in the case of India, seem to have preserved it as a unity through some three or four thousand years.

Prof. Dasgupta is to be congratulated on his fine comprehensive effort to trace a continuous history of Indian thought. We shall look forward to the second volume, which will contain many systems hitherto very little known in Europe, and will review the entire process of development. But it is for us who are not necessarily philosophers, but who are interested in the mental development of India, and in the relation between mental and other culture in general, to utilise the fruits which the author has laboriously culled. And though even this task is not an easy one, it offers prospects of a rich reward.

STANLEY A. COOK.

LAUDATOR TEMPORIS ACTI.

"REMINISCENCES OF AN INDIAN CAVALRY OFFICER." By Colonel Western, O.B.E. (London: Allen & Unwin. 10s. 6d. net.)

Colonel Western has the material for an interesting book, but lacks the power of displaying it. He tells us that he never had any gift for languages. This is only too clear from his text, which contains numerous dastardly crimes on many languages, from Latin to Hindustani. It seems incredible that the author should not have asked some friend to look over the proof-sheets before presenting the finished book to the public. The work is divided into chapters, but these divisions mean nothing. The matter goes rambling from subject to subject, regardless of dates and regardless of sequence of any kind. Nevertheless the book is of real interest as a perfectly straightforward account of the sporting life of a British soldier in India and out of it, in the "good old days" which are now gone for ever. The curious reticence of the author on his military career, which was of more than ordinary credit, and the insistence on sports of all kinds as being apparently his one interest, is a characteristic of a certain class of pre-war officer which was responsible for many a wrong idea about our "contemptible army" on the part of the Germans. It is curious how far away it seems now. Colonel Western tells many good stories, some of which we are tempted to quote, but this would hardly be fair. Let our readers turn to his text for them. They will find much there that is of interest.

MUSICAL NOTES.

ON GRAMAPHONE RECORDS.

The following two records remain to be noticed from the July issue of "His Master's Voice" Company:—

Peter Dawson has many good points, and his fine voice records well, but it was doubtful sagacity to choose the very imaginative "Silent Noon" and "Bright is the Ring of Words" of Vaughan-Williams. These two songs are of course extremely popular, and they are sung by all sorts of people who ought never to attempt them. Mr. Dawson exploits many effects in his singing of them, but one cannot feel a sincere and constant purpose in his performance; his feeling for line seems hazy, his rhythm easily upset, and, perhaps most irritating of all in these essentially English songs, his vowels are reproachable. It should be added that the mechanical part of reproduction is splendidly done.

Rosina Buckman also brings two English (or British!) songs—or rather, one is Irish—Roger Quilter's "A Fairy Lullaby" and Stanford's "Cuttin Rushes." Miss Buckman has an over-pointed style and no unusual facility in the long phrase, but she is honest and her voice is pure. The Irish brogue does not trip too certainly from her lips, but "Cuttin Rushes" is too good a song to miss hearing, even when one hasn't a Plunkett Greene singing it.

The pick of the new August issue of records for me is the Catterall Quartet in the Minuetto from Mozart's Quartet in D-minor and in the Andante from Novacek's Quartet in E major (Op. 10). The Minuet is one of the most entrancing movements of all the string quartets ever written, and the more intimately you know it the fresher it becomes. As played by this North of England Quartet it perhaps lacks a little in *finesse* and in unanimity of tone, but the discipline is admirable, and its easeful lilt is securely held. No greater contrast to it could be supplied than by the Novacek movement, with its rich and distant chording. There is beautiful tone in the playing of this, especially in that of the leading violin, and the sustained breadth of the phrasing is the product of fine musicianship. In both movements the reproduction is well done.

Frankly, I do not know what to say of Rachmaninoff's "Prelude in C sharp minor," even as played by the composer. The seizing of the pianoforte tone is being effected slowly but certainly, but in this record some of the pedalling is imperfectly reproduced. I wouldn't walk a long way to hear this very youthful effort of the composer, but his incisive touch and individual *rubato* do fleetingly invest it with interest.

It is an extremely fine record that Albert Coates has made of Weber's "Der Freischütz" overture; in fact, it is one of the clearest orchestral records that I have heard. The tonal balance is distinct and correct, the characteristics of the various instruments are well caught, and the whole overture is conducted with very notable mastery. Here Coates, his orchestra, and the Gramaphone Company, are all in their best form.

Of the vocal records perhaps the best is that made by that beautiful tenor, Giovanni Martinelli, from Leoncavallo's "Zaza." The song, "O mio piccolo tavolo ingombrato," is by no means well known in England—strange enough, in view of the unworthy popularity of "Pagliacci." It is beautifully sung, Martinelli's *mezzo voce* being of quite exceptional loveliness.

Another excellent record is that made by the soprano, Lucrezia Bori, from Wolf-Ferrari's "O gioia, la nube leggiera" ("Il secreto di Susanna"). It is sung very flowingly and easily, and is effective enough against the piquant, though not original, orchestral accompaniment.

The taste which Mme. Edna Thornton has recently been exhibiting in her records is by no means commendable, and the standard is kept at the same low level in Hope Temple's "Rory Darlin'" and in Moszkovski's "Cradle Song" ("Près du berceau"). The first is an ordinary and therefore worthless ballad, and the second merely a pretty *salon* ditty, with no sort of distinction whatever. It is a pity to waste such good singing on things like these.

ANDANTE.

PERSONAL AND GENERAL.

To-day.
August 10 (New Style).
July 28 (Old Style).
Julhijja 16, 1340 A.H. of the Moslem Calendar.
Ab 16, 5682 of the Jewish Calendar.

The Rajah of Pudukota has left London for Paris.

M. Nicolas Mishu, Secretary at the Roumanian Legation, has gone on leave to France and Italy.

Mgr. Barlassina, the Latin Patriarch of Jerusalem, has left Rome for Palestine.

Lord and Lady Barrymore have left London for Marbury Hall, Northwich.

Lord and Lady Sydenham have left London for The Priory, Lamberhurst, Kent.

M. D. Bikelas, Secretary to the Greek Legation, and Mme. Bikelas have left 102, Park Street, for Frinton-on-Sea.

Lieutenant-Colonel Douglas Capitaneano, Military Attaché to the Roumanian Legation, left town last week for Worksop.

Mme. Gavrilovitch, wife of the Minister for the Kingdom of the Serbs, Croats, and Slovenes, has left London with her family for Belgrade.

The Greek Chargé d'Affaires and Mme. Rizo-Rangabé have taken Oakland Place, Seddlescombe, near Battle, for the remainder of the summer.

Mr. Ronald Storrs left Marseilles last week on board the P. and O. Plassy on his way to Palestine to resume his duties as Governor of Jerusalem.

An engagement is announced between Thomas Milne Chapman, Calcutta, and Robina Hannay, elder daughter of Colonel W. H. Ogilvie, C.M.G., I.M.S.

Mme. Costiesco-Ghika, who has been on a visit to her mother, Lady O'Conor, has left London to join her husband in Bucharest. M. Costiesco-Ghika was formerly First Secretary to the Roumanian Legation.

A marriage has been arranged between Francis Scott Maxwell, 82nd Punjabis, only son of Mr. and Mrs. Maxwell, Torquay, and Mary Eileen, only child of the late Major H. C. Nicolay, 2nd Gurkhas, and Mrs. Chope.

A marriage will take place shortly between Percy Holland Hockaday, captain, I. A., of Highbury, Lydney, Gloucestershire, and Dorothea Victoria, elder daughter of Sydney Ernest Lucas, of The Mount, Hythe, Hampshire.

The Indian delegates at the International Labour Conference at Geneva next October will be Sir Louis Kershaw, Secretary of the Overseas Department, India Office, and Mr. Bhupendranath Basu, member of the Secretary of State's Council.

Prince Nicolas of Roumania, now in camp with the Eton Officers Training Corps, is due to arrive in London to-day, and on Saturday will leave for Bucharest. He has invited the Marquis of Donegal and Mr. Wynn, who were at Eton with him, to visit Roumania.

A marriage has been arranged between C. Morden Collett, I.C.S., and Evelyne S. G. Borthwick, only daughter of the late Lieutenant-Colonel Alex Borthwick, of the Rifle Brigade, and Chief Constable of the Lothians and Peebleshire, and Mrs. Borthwick, of The Elms, Southwick, Fareham, Hants.

The marriage arranged between Jack McM. Sweet, Indian Forest Department, elder son of Mr. and Mrs. W. McM. Sweet, the Woodlands, Limpley Stoke, near Bath, and Phyllis Lilian, second daughter of Mr. and Mrs. J. M. Servaes, Beechfield, Aigburth, Liverpool, will take place about the middle of October in Bombay.

A marriage has been arranged, and will take place in the autumn, in India, between Capt. Basil Randall, Skinner's Horse, only son of Mr. and Mrs. J. L. Randall, of Marchington Cottage, Staffs, and Rena, eldest daughter of Mr. and Mrs. G. Hesiop, of Fontbridge, Beamish, Co. Durham.

The Maharaja of Bikanir will leave on Sunday for Paris, where he will stay a few days before embarking on board the P. and O. Malwa at Marseilles for India on August 18. His Highness has greatly benefited in health by rest and treatment in this country, but on medical advice he has regretfully declined the invitation of the Government to represent the Princes of India at the forthcoming Assembly of the League of Nations.

The following decorations have been conferred in recognition of valuable services rendered :—

Order of the Nile (Egypt).

Third Class.—Mr. V. R. Woodland, Governor, Mongalla Province, Sudan ; Mr. H. B. Day, M.D., Prof. School of Medicine, Cairo ; Mrs. C. B. Sheldon Elgood, M.B., Senior Lady Medical Officer, Egyptian Ministry of Education. Officials of the Egyptian Ministry of Agriculture.—Mr. W. Cartwright, Director of the Higher School of Agriculture, Giza ; Mr. F. E. Mason, Sub-Director of the Veterinary Service. Egyptian State Railways Officials.—Mr. J. Maudslay, Secretary-General ; Mr. A. A. W. P. Murison, M.B., C.M. ; Mr. C. E. C. Peach, Divl. Locomotive Supt. Officials of the Egyptian Ministry of Public Works.—Mr. S. F. L. Fox, Chief Engineer, Main Drainage Dept. ; Mr. G. L. Wingfield, Deputy Director-Gen., Mech. Dept. ; Mr. A. M. Alcock, Deputy Director-Gen., Cairo Tanzim Dept. ; Mr. M. A. Slater, Inspr., State Buildings Sept. ; and Mr. L. E. Bury, C.B.E., Mr. T. B. Carter, Mr. H. Hindmarsh, and Mr. G. Parker, Insprs. of Irrigation.

APPOINTMENTS AND PROMOTIONS.

Sir Joseph Byrne's appointment as Governor of Seychelles was gazetted last week.

The King has been pleased to approve the appointment of Sir Harcourt Butler, K.C.S.I., C.I.E., to succeed Sir Reginald Craddock, K.C.S.I., upon his departure from Burma.

Lieutenant-Colonel Albert Ernest Gallagher has been appointed a member of the Executive Council of Cyprus, and Mr. Hermann Albert Loos a nominated unofficial member of the Legislative Council of Ceylon.

The King has approved of Colonel (Temporary Colonel Commandant) H. W. Higginson, C.B., D.S.O. to be appointed Aide-de-Camp to the King, with effect from July 14, in succession to Colonel M. D. Graham, C.B., C.M.G., C.V.O., retired. Colonel Higginson, who entered the Army from Sandhurst in 1894, saw active service, among other places, in Aden, 1903, and the Blue Nile Expedition, 1908.

OBITUARY.

The death has occurred of Mr. Charles Henry Tawney, C.I.E., the distinguished Orientalist and late Librarian to the India Office. Mr. Tawney was a professor at the Presidency College, Calcutta, in its early days, and in 1876 was appointed as Principal. He combined with the position the Registrarship of the Calcutta University, and he had three officiating spells as Director of Public Instruction in the then undivided province of Bengal. He was awarded the C.I.E. in 1888 and retired from the Educational Service at the close of 1892. In the following year he was appointed Librarian to the India Office in succession to Dr. Reinhold Rost. In this post he pursued the studies which were begun quite early in his Calcutta days, and which made him one of the outstanding contributors to our knowledge of Sanskrit literature. Especially valuable were his researches in the tangled jungle of Jain history and tradition. Among the original texts made available to European scholars by his labours, mention may be made of the Prabandha Chintamani; two centuries of the Bhartrihari, the Katha Sarit Sagara, the Katha Kosa, the Mala-vikagnimitra, and the Uttara Rama Charita.

THE QUARTERLY REVIEW.

The *Quarterly Review* of July is, as usual, full of sound and attractive matter, and contains two articles of special interest to readers of THE NEAR EAST. The first of these, "Cities of Transcaucasia," is by H. C. Luke, and redounds with curious information and individual anecdote. Two of these are sufficient to show its type:—"In the valley below the ridge rises the hot spring that gives Tiflis its name. Of great repute for its healing properties, its waters are conducted into a handsome hammam in the Tatar quarter, where, *pace* Dumas *père*, a luckless Armenian Archbishop, unaccustomed to Turkish baths, once was boiled alive because excessive modesty prevented him from entrusting his person to the bath attendant." And the second:—"One day at Ananur, a mediaeval fortified monastery on the Georgian military road, at the junction of the Aragwa (Strabo's Aragon) and a smaller stream, I witnessed a village wedding where only the priest and the bride were sober and the best man kicked the sacristan, who was prostrating himself before an icon, so that he rolled head over heels in the middle of the service." The article, which makes fascinating reading, has many excellent things.

The other article is by Sir Valentine Chirol, on "The Outlook in India." After summarising along broad lines the present position Sir Valentine puts the matter in a nutshell thus:—"The question which we have got to face—and it presents itself under a variety of forms—is whether we are determined to go through with the constitutional experiment upon which we have entered and to accept the implications of Parliamentary institutions in India even if they carry us further and faster than we had originally contemplated." And: "The acid test of British sincerity will be above all the question of military expenditure, and that of the treatment of the Indians in Colonies."

NEWS IN BRIEF.

The Princess Mary Maternity Ward in the Government Hospital, Jerusalem, has been opened.

It is stared that Rothstein, the Soviet envoy to Persia, is not returning to his post. He was recently instructed to go on leave, and is now in Moscow.

An ammunition depot at Fascani (Roumania) exploded last week, killing six people and injuring ten. Some barracks were destroyed, and all the windows in the town shattered.

An Allahabad message says that the proprietors of the *Independent* announce its reappearance under the editorship of Mr. Upson, formerly of the *Looker On*.

An interesting example of the ignorance and superstition with which the medical authorities have to deal in Basrah was observed not long ago, when one of the food inspectors found a child being placed in the freshly opened abdomen of a slaughtered cow as a cure for measles, states the report of the Health Department for 1921.

PACE-MAKING OR PEACE-MAKING?

There is no reason to doubt that Greece's latest contribution to the Near Eastern settlement was made in good faith and with the best intentions. The present indeterminate position is proving even more irksome to her than it is to others, and practically any settlement that really settled anything would be more advantageous to the Greeks in the long run than a condition of stalemate with the continued expense of a nation under arms. For the Allied Governments a policy of *laissez faire* in the Near East has no special perils; it exasperates the few nationals of each primarily interested in that part of the world, but has no appreciable effect on votes. A Greek Government, however, cannnot afford to wait upon events in a matter which affects the country so closely. The existing Ministry under M. Protopapadakis was formed last May to enable the threatened withdrawal from Asia Minor to be carried out with less personal reflexion on M. Gounaris or M. Stratos and their respective parties than would have been the case if either of these political leaders had been at the head of the Government instead of holding, as both of them now do, office under M. Protopapadakis. As the weeks and months pass, and no steps are taken to enforce the evacuation of Asia Minor, the Greek Government has taken heart from Allied procrastination, even to the extent of having its hopes raised that evacuation in a crude form may yet be avoided. The proclamation by the Greek High Commissioner in Smyrna has been a shrewd attempt to confront the Allies with a *fait accompli*. Greece was placed in occupation of Smyrna by the Allied Powers in 1919, and since that date has been responsible for the local administration. That the occupied territory is much greater than the Allies originally sanctioned is immaterial. Greece now proposes to grant a measure of autonomy to this territory, and in so far as this is a matter of administrative reorganisation, there can be no question that the British attitude of taking no official notice of it is more correct than the desire attributed to the French Government of declaring the proclamation null and void. It is, doubtless, the hope of the Greek Government that the Allies will shrink from the onus of restoring to Turkish sovereignty a province that has once been given a measure of autonomy, and if this should prove to be the case, the Greek Cabinet or the political groups responsible would have a useful asset against any liability arising from a military evacuation. The declaration of autonomy is a good move as far as Greek politics are concerned; it may even have wider advantages, if it brings home to the Allied Governments the mischief of their policy of vacillation and delay.

The second step taken by Greece—the request to the Allies that the Greek Army should be allowed to march upon Constantinople—stands in an entirely different category. It may have been intended primarily to stir the Allies to action; but as a suggestion it is so fraught with evil possibilities that it cannot readily be harmonized with any desire to promote a peace settlement. For what is the actual position in the Near East? Turkey for all practical purposes *is* divided into two separate States; on the one hand there is official Turkey, represented by the Sultan and the Constantinople Government, which has accepted the consequences of defeat in the Great War and is, strictly speaking, at peace with the Allies, although no formal treaty has been signed, and on the other hand is Nationalist Turkey, under Mustapha Kemal Pasha, who has raised the standard of revolt against Contantinople and has refused to accept the Allies' terms of peace. It is with the latter alone that the Greeks are at war. Whether the Turks of Constantinople sympathize with the Angora point of view or not is beside the point; they have laid down their arms, they have signed an Armistice; for a Greek Army at this stage to take possession of the city as an act of war would be an outrage on all the decencies of civilisation. It is a matter for regret that the Greek Government, even in its desire to galvanize the Allied Powers into action, should have put forward such a proposal, because it implies that at the root of all Greek counsel regarding a Near Eastern settlement lies the traditional enmity of Greek and Turk rather than any objective policy based on special and impartial knowledge. The Allied Governments will be blind indeed, if they do not see this aspect of the case, and as a natural corollary they should be more than ever resolved that any settlement must place buffer territory between Greece and Turkey.

While every allowance will be made for Greece in the desperate plight to which Allied mishandling of the Near Eastern question has brought her, there can be little justification for the mischievous and ill-informed speech on the subject with which Mr. Lloyd George brought the session of Parliament to a close last Friday. If the Prime Minister's remarks on that occasion represent the sum total of the Government's knowledge of the problem that it is called upon to solve, we are no longer surprised at Allied procrastination and the resultant muddle throughout the Near and Middle East; but it becomes a serious obligation upon the people of Great Britain to see that the Near Eastern settlement is placed in safer and wiser hands. Mr. Lloyd George devoted part of his speech to the past history of Turkey between 1878 and 1918, as if that had anything to do with the situation to-day. At one point he indulged in a rhetorical reference to Mustapha Kemal, who "might be a great factor, but the head of Islam was in Constantinople," but throughout the rest of his speech he ignored the existence of two separate Turkeys, and refused to recognise any difference between Angora and Constantinople. It was Turkey who "has refused to accept the condition imposed with regard to an armistice"; it is "a war between Greece and Turkey," and Mr. Lloyd George added the egregious and entirely false remark: "We are defending the capital of one of the parties against the other." To the British Prime Minister's eulogies of the Greeks we take no exception, but they have nothing to do with the problem that the Allied Governments are called upon to solve. In the whole of the speech there was not the slightest indication that Mr. Lloyd George appreciated a single one of the real issues at stake. A more lamentable display of uncritical partisanship could hardly be conceived, and this in regard to a subject admittedly complicated and calling for the most dispassionate treatment. Peace in the Near East can only be achieved by some measure of compromise. Mr. Lloyd George's speech left his audience to infer that he had never given a moment's thought to any political method by which the great desideratum can be attained.

IN PALESTINE AND SYRIA.—III

We are indebted to a correspondent for permission to publish the following letter, written from Palestine and describing a journey made, and some impressions gathered, last month. The views expressed are, of course, the writer's, and are not to be regarded as necessarily endorsed by THE NEAR EAST. *The first portion of this article appeared in our issue of July 27, and the second on August 3.*

To-day the Syrians say they pay four times as much in land taxation as they did to the Turk; that before the War they knew exactly the backsheesh a Turkish official would levy, and thus the Syrian merchant could calculate exactly how to price his goods. But now they say the French official charges such backsheesh and so inconsistently that to-day it may be twice and to-morrow ten times as much as the Turkish Customs House Officials; so that the merchant is in despair.

But to the outside observer the French rule the Lebanon, there is no doubt of that. Their policy is consistent, which is more than can be said of ours in Egypt. There is no show of force, no aeroplanes, or armoured cars to be seen, but they are there, and the French don't hesitate to use them when required; and when they send a man to goal he stays there. In General Gouraud and Robert de Caix, the Secretary-General, the French have two very fine men who are able Administrators. But these cannot control all the French minor officials, or be held responsible for every hold-up in back streets by the Senegalese soldiers. Strange to say, of all the French troops, white and black and brown and yellow, it is the Annamese from Tonking who are said to be far the most popular and well behaved. But then they keep rigidly apart from the people of the country. But one must not judge France too hardly—one should discount fifty per cent. of most Syrian stories and remember that France has no money to spend upon the people or the improvement of the country. But as to what I've written above, my authorities are the English and the American and the foreign communities.

Now, if you've reached so far, we'll turn to the pleasant countryside in which there are no faults to discover. The people, men and women in their baggy Turkish trousers, seem nice and friendly enough, but their Arabic is strange to ears suited to the Egyptian tongue. Syrian Arabic is much softer and more accurate than Egyptian, and here and there one hears the expressions that the Crusaders brought back with them to Bishop's Castle. The Arabic for fox is "taalib" and if you want to say "look, there he is!" you say "howa." So when the returned Crusader from Oakley was made Master of the United Hounds in the 13th Century, he called out in his excitement, the view hallo of "tally ho," and his descendants have done so ever since.

The road from Beyrout to Damascus crosses the Lebanon by spiral twists and turns to 5,000 feet or more, then down into the valley where the rivers Litany and Jordan rise, and up again over Anti-Lebanon to the wide plain where Damascus lies among its rivers and its fruit orchards, like a great emerald in the yellow desert with the mountains of the Hauran far in the distance to the East. Lebanon would be very like the Asiago Plateau or the Brenta Alps in Italy, but for the density of its population and its fertility. There is good soil and good water to the very top and the scenery is exquisite. The slopes of the mountains are all terraced; and the Lebanese live in fine stone houses quarried from the rock, and tend their terraced vineyards and fields of bearded wheat and olive trees almost up to 3,000 feet, which sounds incredible. I never knew that wheat would grow at so high an altitude before. But there were the vines and the crops right at the top where the snow storage houses are built into the mountain side. In these strong, windowless houses is stored the winter snow to be cut in blocks and carried in panniers on donkeys to cool our drinks in the heat of Beyrout down below. But of the Cedars of Lebanon very few remain—I suppose in all not more than a thousand trees; and there must be many more and far finer examples in the old gardens of the home counties by London, than in all this country. The all-devouring goat crops the heads of the seedling trees and the all-destructive Turk sells concessions to timber dealers when he wants funds for a trip to Paris or Monte Carlo. When Hiram the Great, King of Tyre, cut the cedars for the Temple of Solomon, he lowered the precious trunks down great wooden slides wet with running water or smoothed with grease, and dropped them gently in the sea to float them down in rafts to Jaffa. And for every tree he felled, he planted two more and no goat dare browse in the cedar forests. But the Turk never plants a sapling tree, and he tumbles the logs down the rocky mountain side till only one in three is not split and spoilt.

I ate my sandwiches under a cedar that might have been planted by Hiram himself, so old and hoary it seemed. The Ford car was drawn up in the shade some way off, and the Turkish driver slept with his tarbush over his face, while I looked across the valley to the eternal snows of Sunnin and Mount Hermon, and down, to my left, to where the red tiled roofs of Beyrout clustered round the bluest sea I've ever seen. And though the air was drenched with the scent of thyme and full of the drowsy hum of bees in the cedar tops, I felt I'd rather *live* with Longmynd all the same.

The Jordan and the Litany lie close to one another in the Lebanon Plain, and they are clear, swift running streams like the Swenny and the Bines at Alcote. The road crosses them on old stone bridges, then turns over the shoulder of Hermon to the Damascus plain below.

I never sympathised so much with Naaman the Syrian as when we descended the mountain road beside the swiftly running Abana dividing into its seven streams to edge the streets and water the orchards of Damascus. For the Abana and Pharpar are as Naaman described them, crystal clear, while the Jordan in the valley by Jerusalem is a muddy uninteresting river with soft treacherous banks. Were it not for its associations, one would hardly boil the water of Jordan for tea, whereas the waters of Damascus tempted one to dip one's face and drink.

I've seen too many Eastern and Oriental cities to be over enthusiastic over any one of them; but there are points about Damascus that make it supreme in many ways. The streets run alongside the running water, the walled orchards are full of walnut and apricot trees and nectarines, the latter two now in ripe and luscious fruit; not the rare and stately apricot of our walled garden at home, but great golden showers of fruit along each green and drooping bough. Fig trees and walnuts in green fruit, and every garden hedged with scarlet pomegranate flowers and the pink oleanders that flourish in every spot of wet earth in Syria. The Bazaars are very fine, though not of the character of the great arcaded and roofed bazaars of Hebron. The Tomb of the Great Saladin is here, but the bronze wreath the German Emperor laid upon the tomb is here no longer. It is commonly said to have been borrowed, as a souvenir, by a British officer, but I suspect Jemal Pasha as he fled. The amusing feature about the bronze wreath was the Iron Cross that formed the centre piece, hardly the kind of decoration to place upon a Moslem Tomb! After a few years and many explanations, I'm told the Arabs got used to this apparent violation of their Mosque.

You'd never know how lovely an oriental house could be until you'd seen a Damascus house with the square enclosed courtyard and the fountain in the centre, the trim orange trees and the pomegranate bushes in green earthenware pots on the white marble floor. The living rooms on the ground floor, and the sleeping rooms off the gallery above. It is the peeps one gets through the great half open doors to these gardens of delight, that make the great attraction of wandering in the narrow streets of the Moslem quarter.

PRESS ON THE NEAR EAST.

In consequence of inquiries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

The Eastern Ferment.

Under the title of "Ferment in the East" the *Glasgow Herald* of July 29 devotes an article to the resurgence of Afghanistan. This country, which, it points out, was most jealously secluded, is now seeking to get into touch with the outside world, as a result of its recent acquisition of political independence.

> But Afghanistan's climb to real prosperity is not likely to be an easy one. For some time past trouble has been brewing in Central Asia, and it will need all Amanullah Khan's sagacity and skill to avoid being drawn into a conflict which may easily jeopardise not only his own throne but the future independence of his country. It will be remembered that not long since the Bolshevists succeeded in Sovietising Bokhara, one of the Central Asian khanates over which pre-war Russia exercised suzerainty, dispossessing the Emir, who had assumed the functions of an independent ruler who after his overthrow fled to Kabul. For a time "Red" rule had complete ascendancy in Bokhara, and Bolshevist influence also began to make headway in Afghanistan. But recently the Amir Amanullah, while maintaining friendly relations with Moscow, imposed restrictions upon Bolshevist intrigues in his capital, and made it clear that further "penetration" will not be permitted. Meanwhile the reaction had set in throughout Bokhara and Russian Turkestan generally, and various risings against the Soviet power took place. Latterly Enver Pasha, who months ago was reported to have been arrested by the Bolshevists and sent by them to Angora to undergo trial by the Kemalist Government, has appeared on the scene, and headed the anti-Bolshevist movement. The Soviet claims to have inflicted a defeat on him, but it is understood that his force is still in being, and in view of the disaffection notoriously rife among the Red troops he may still successfully oppose the religious fanaticism of Central Asia to the tyranny of Bolshevism. But whatever happens to him, the position of Afghanistan in relation to these disturbances is distinctly delicate.
>
> It has long been known that the Amir would greatly like, if not to incorporate the greater part of Turkestan in his dominions, at any rate to be the overlord of the various khanates, and he cannot but view the Sovietising of this region with great disfavour. Already many refugees from Russian Turkestan have sought asylum in Afghanistan, and some of these are said to have returned to fight under Enver, while others are understood to be conducting correspondence with the insurgent leaders. It may be questioned whether the Amir himself would take any step calculated openly to offend Moscow, but it is a curious circumstance that Jemal Pasha, who was assassinated the other day at Tiflis, is now believed to have been on his way to Angora in the hope of reconciling Enver with Mustafa Pasha "on an anti-Bolshevist basis." As Jemal was until lately military adviser to the Afghan Government, it is difficult to ignore entirely the possibility of Turkish anti-Soviet intrigues at Kabul with the intention to produce a definite rupture between Afghanistan and Red Russia. In any case it is quite probable that we are on the eve of witnessing in Central Asia a sanguinary struggle between Bolshevism and Islam, and from any such conflict it would not be easy for the Amir of Afghanistan to keep entirely aloof. In such circumstances it is a cause for congratulation that our own differences with Kabul should have been amicably adjusted, coincidently, it may be observed, with a marked improvement in the conditions of the borderland and more especially Waziristan. At no distant date Afghanistan may be as glad to have a friendly British India at her back as we are to have a friendly Afghanistan as a buffer between India and Bolshevism.

The Mandates of the Middle East.

The *Outlook* of July 29 is not impressed with the prospects of the British and French Mandates in the Middle East, for it says :—

> The historian of the future will assuredly be amazed at the obstinacy of the Arabs, who will not believe that the mandatory system was invented solely for their benefit, to prevent them being exploited by a greedy world. Of course, it was rather brutal of Italy to hold up proceedings until they had received certain economic concessions from the French in Syria to offset their disappointment in Asia Minor. But after what was said at St. James's about the object of the mandates being to fetter the protecting Power, and Mr. Balfour's appeal to the Palestinians to do all in their power to see that a system, in which they have not been forgotten, works to the best advantage, not only to others, but also to themselves, it is pathetic to read of the Palestinian protests, and of the still stronger action taken by the Hauran against the French mandate, in which two French tanks are reported to have been destroyed. One seems to remember that before the war the Turks managed to keep order with a division, probably not more than 5,000 bayonets strong, while we and the French between us have ten times that number in Syria and Palestine, and two mandates. And yet the Arabs are not satisfied, and the Mesopotamians are said to be filled with repugnance at the idea of a mandate for their country, and King Feisal has sent General Haddad on a special mission to this country to tell the Government so.

The cheapest EFFICIENT motor cycle made — 1¾ hp.

McKENZIE

—already famous and proved in use. Thousands now running about all over the country. The success of 1922. Price easily within the reach of all. A real complete motor cycle, not an auxiliary or converted pedal cycle.

After M. Viviani's speech at the closing meeting such an attitude seems worse than obstinacy, it is sheer ingratitude. For he is reported to have said that in the moment of victory it would have been quite possible for Great Britain and France to have annexed Syria and Palestine unconditionally, but both Powers preferred to submit to the limitations of the mandatory *régime*. Of course, M. Viviani, being a French statesman, is not bound to take any note of the engagements into which we entered with the Arabs in 1915, though France was cognisant of them and gained as much as we did from the military assistance rendered by the Arabs as a result of them. But the intoxication of victory should not make M. Viviani forget that on November 7th, 1918, the French Government, conjointly with ourselves, made a most solemn pledge to the inhabitants of the redeemed Arab provinces not to impose any *régime* contrary to their desires, and to recognise the Governments that were set up. Do French politicians live in a world of their own? Or do they only consider that other nations are bound by their obligations? Anyhow, the mandatory system in the Middle East looks a very ramshackle affair, which may fall to bits under any slight strain.

The Near East.

The *Manchester Guardian* of August 3 begins an article entitled "The Scandal of the Near East" thus:—

> The request of the Greek Government that its troops should be allowed to occupy Constantinople can have been made with no expectation that it would be granted. It was made because the Greek Government is beginning to find its position in the Near East intolerable and hoped by this means to bring pressure to bear, if not on Angora, at least on the Allies. So far the attempt has failed. The request has at once been rejected, as it was bound to be, by the three occupying Powers, but there is no sign that they, or any of them, have any effective policy of their own to propose. Instead they are engaged in counter-working each other. France and Italy have each made separate agreements with the revolting Kemalist Government at Angora, of a partial and purely self-regarding kind, with no reference whatever to a general settlement. At the same time, and in pursuit of this separatist policy they are both actively engaged in supplying the Angora Government with munitions of war, by means of which it is enabled to maintain its position and to disregard the wishes and interests of the Powers as a whole. Thus, whereas the first condition of a settlement is that there should be a cessation of hostilities between Greeks and Turks, two of the three great Powers concerned are doing their best to keep the war alive. Not that we ourselves are guiltless. At an earlier stage it was Mr. Lloyd George's policy to encourage the Greeks in their advance upon Angora. The advance failed, but its effects remain. Greece is half ruined, and can neither go forward nor go back. In desperation she has proclaimed an "autonomous" State of Ionia—which apparently includes all Asia Minor inside the present Greek lines—under Greek protection, and has made this desperate feint on Constantinople. How the occupation of Constantinople by Greece, even if it could have taken place, could have any more effect on the Angora Government than its occupation by the Powers does not appear.
>
> Obviously the present situation is in a high degree both dangerous and discreditable. Constantinople is one of the great strategical positions of the world. Its possession has determined the fate of nations and the conflict of civilizations. Even in our own times three great wars have been fought over it. Along with the straits which it commands it is the essential gate for the trade of European Russia and a good part of Asia, to say nothing of the smaller States opening on the Black Sea. In the Great War its control by our enemies prolonged the war by one or two years, and incidentally produced the Russian revolution and altered the whole social order and probable development of Russia. That is one side of the Near Eastern question. The other and only less important one is that of the relations of East and West, typified at the moment by Greeks and Turks, in the great Anatolian peninsula and in the European lands which till the other day formed part of the Ottoman Empire and in which Turk and European, Moslem and Christian must still find means to live and work together. Here, surely, are problems big enough, vital enough, to engage the serious, even the disinterested, attention of those on whom their settlement depends. Nothing can be more discreditable than their selfish rivalries and quarrels, nothing is more essential than that at long last they should forget these and join together honestly in seeking for a just and stable solution of problems not in themselves too easy, but which, unless approached in a sincere and generous spirit, must defy solution. The attempt was made, and not by any means altogether without success, in the Treaty of Sèvres, concluded two years ago. That treaty did at least recognise that the question was a world question and not one for accommodating the special interests of particular States. It provided for the neutralisation of the shores of the straits and of the Sea of Marmora and for an international board to regulate the navigation and control of the passage-way. On lines such as these a permanent settlement can be made. But no settlement can be permanent which does not rest on the same broad basis and which does not have regard to the common interests of all the Powers, great and small, concerned.

It proceeds to describe the causes that have stood in the way of a settlement, and the consequent disastrous condition of Anatolia:—

> It is a hideous story, and the end is not yet. If the Greek armies retire every Greek must retire with them. If the Turks are left to work their will in the territories within their control there may soon be no Greek or Armenian left. The situation will not grow better by delay; it will grow worse. So long as the Great Powers continue to quarrel among themselves nothing can be done. Yet their individual interests are small compared to the great general interests at stake and in which they share. There can be no escape except by an honest reversion to the policy of common accord embodied in the Sèvres Treaty.

The Greeks and Constantinople.

The *Westminster Gazette* of August 1 thinks that the Greek demand on Constantinople may bring matters to a head, and force a decision:—

> The whole situation is obviously intolerable from the point of view of Europe as well as of the Greeks; and if the new Greek demand tends to bring matters to a head, and to force the Allies to an early decision upon the problems of the Near East, it will be amply justified. The Greeks cannot be allowed to occupy Constantinople, and probably in the long run they will have to evacuate Anatolia and a part of Thrace. They cannot hope for an Allied decision favourable to their claims, but even an unfavourable decision, we take it, would be better than none from the Greek point of view. If we are not prepared to allow the Greek Government to take measures to win the war we must at least allow them to get out of it, and to cover their retreat with a plea of coercion.

Preparations are being made to obtain salt from the sea on a lzarge sacle at Athlit, about ten miles south of Haifa, in Palestine.

Abdel-Rahman Bey Fahmy, ex-Secretary of the Wafd el Masri (the Zaghloulist Delegation to Europe), who was sentenced in the Vengeance Society case in 1920, has been transferred from prison in Cairo to Alexandria.

THE CARAVANSERAI.

Think, in this batter'd Caravanserai
Whose Doorways are alternate Night and Day,
How Sultan after Sultan with his pomp
Abode his Hour or two and went his way.
—OMAR KHAYYAM—

We are accustomed to being told that the West treats its women better than the East, and I am not prepared to argue that it does not; though when I consider the charms of the other sex I always feel that we simply cannot treat it too well. What, indeed, would Life be without its harems (in the East) and its homes (in the West)? It depresses me to think of it, even for a moment. But I am afraid that not every Englishman shares my views; for do not the Music Hall Comedian and the Comic Mother of Pantomimia raise many a laugh by cheap jokes at the fairer sex? And do not even such grave folk as Stockbrokers and other City Men do likewise? Only the other day, I am told, the Chairman of a certain Board of Directors, in a speech at a meeting of shareholders, told a story about a father giving his son what he (the Chairman) called good advice. And the advice was: "My son, trust all men and do right. Trust no woman: don't write." What do my lady readers think of that?

Gratitude is a fine thing—when it is not merely "a lively sense of favours to come," and it looks as if certain Labour M.P's. who went out to Egypt as the guests of Zaghloul Pasha are bent upon paying their debt of gratitude for his—or his party's—hospitality. Unfortunately, they are trying to do it by boring the long-suffering House of Commons with endless questions about the state of the Pasha's health. Almost every parliamentary day one of the pair—for there are two of them almost equally solicitous—asks the bewildered Under-Secretary for Foreign Affairs, or some other luckless member of the Government, whether it is true that Zaghloul Pasha is suffering from gumboils, mumps, housemaid's knee, or some other complaint; whether there is a doctor on the Seychelles, or only a vet.; whether the Pasha and his friends are still alive; or some other exciting question of the kind.

My only wonder is that Mr. Cecil Harmsworth and the other victims stand this kind of thing so well. I suppose they regard the questioners as belonging to the class that has to be suffered gladly. But there are signs that the House as a whole is getting a bit tired of this perennial fountain of questions which usually take the form of suggesting that things are very different indeed from what they are in reality. If only the ex-Zaghloul-conducted-tourists would take the hint, and "dry up" for a while it would mean a great saving of parliamentary time and temper.

In this connection, I observe that the Labour Members referred to, who are so very very anxious to see Egypt quite quite "independent" of great bullying Great Britain seem to be equally anxious to see the Sudan handed over lock, stock and barrel to Egypt. Now if they know anything at all about Egypt—which, on the strength of their questions in the House, I very much doubt—it is quite clear that they know nothing at all about the Sudan except what they have been told by the Zaghloulists. So it simply comes to this: they want Egypt to be "independent" and "free," but they want the Sudan to be under the heel of Egypt. And as Egypt is for the moment distinctly anti-British and the Sudan is distinctly pro-British and anti-Egyptian, these Labourite "Statesmen" show that the governing motive of their conduct in this matter is their desire to be "agin" their own "Government" and their own country. Oh, that they would sing their *swan* song and take their departure!

I see that the wife of an Indian potter lately gave birth to four children at one fell swoop. A friend, who knows his Omar Khayyam, remarked on reading the report: "I expect the hand of *that* potter shook when they broke the news to him."

I am indebted to a correspondent for permission to reproduce the following wonderful specimen of Engish as she is wrote. It is the effort of a Croatian peasant, writing to a British official, and runs thus in the original:

> Se ——— plis ju ragjtmi leters vori van fr dat moni ju no ajm vozin frju tu munc go ju telim to Marko Radmanovic ju se moni kom to munc na eff no kom jet. se mister ulje plis ju Rajtmi leters voriju Du frdat. Gut baj. Marko Stevan Radmanovic.

The reader will probably be as surprised as I was on learning that this is English! At any rate it is meant to be English and the recipient attached a "translation" as follows:

> Say, ———, please you write-me letters ? ? for that money. You know I was in for you two months ago. You tell 'im to Marko Radmanovic you say money come two months and have no come yet. Say mister will-you please you write-me letters what-do-you do for-that. Good-bye.

I am not surprised that "vori van beat the "translator," but could it be meant for "(to) worry one"? In any case the epistle's meaning is not very clear to me yet, but it looks as if the official to whom it was addressed was being asked to begin a "dunning" letter correspondence.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square.
E.C. 2.

Continuance of Export Credits.

It was understood that the Export Credits Scheme would be brought to an end next month, but it has now been decided to continue it for another year, though the date for the final liquidation of credit remains unaltered. Since the scheme was amended last autumn it has proved of increasing utility to the business community, and up to the present time guarantees to the amount of well over £10,000,000 have been sanctioned by the Department. In the circumstances with trade still more or less in a state of stagnation it would have been absurd to deprive traders of the assistance the scheme affords. In the most favourable conditions export credits cannot go very far towards promoting a trade revival, but they can help commerce to "carry on" until that day, now perhaps not very far distant, when the wheels of trade will once more be revolving normally.

Bulgarian Reparations.

The impasse that has been reached between the Inter Allied Commission in Bulgaria and the Bulgarian Government cannot be said to be unexpected. Negotiations on the subject have now been proceeding for months, and the attitude of the Government as outlined in their various communications to the Commission suggested that it would be far from easy to arrive at a solution that would be acceptable to them. The question of a moratorium has been the principal difficulty. Bulgaria is desirous of being granted one of three years, and a request has also been made for a reduction of the total debt. The Commission has not been able to see its way to grant these things, and the whole question of reparations has now been handed back to the Governments of the three Great Powers.

The Indian Rupee Loan.

Expectations are being more than borne out as regards the Indian rupee loan. It was estimated that the subscriptions would amount to 25 crores of rupees, or nearly £17,000,000, but according to the latest figures the total already amounts to 29 crores of rupees, or just under £20,000,000, so that by the time the lists are closed the loan should be an outstanding success. The amount of cash subscriptions is unknown, but if, as may be assumed they have been considerable the loan will afford yet one further proof that India is gradually being educated up to the value of investments.

Empire Cotton Growing.

The estimate that the British Empire's contribution to the world's cotton crop this year, excluding Egypt, will amount to approximately 17 per cent. of the total, India being responsible for about 16½ per cent., shows very plainly what a long way we have still to travel before the production of cotton in the Empire has been placed on what can be regarded as a satisfactory basis. If the world's supplies were clearly adequate it would not matter so much, undesirable though it is for us to be dependent on external sources for raw materials that we can very well produce ourselves. But we know that they are nothing of the kind, and the problem with which we are faced is neither more nor less than the production of cotton within the Empire on a scale that will keep Lancashire fully supplied.

Lancashire's Problem.

It is only in recent years that the danger of a shortage of supplies has been really recognised, and it seems very probable that before Empire cotton growing has been adequately developed we shall have cause to regret the lack of foresight that prevented action being taken decades ago. Too much praise cannot be accorded to the development work that has been carried out in the Sudan and elsewhere in recent years, but great though the progress that has been made it needs no emphasis that much more must be done in the near future if Lancashire is to feel herself tolerably safe. Unfortunately the extension of cotton growing is not an affair of a few months, but on the contrary an undertaking that takes a long time, and it seems very doubtful whether anything done now can avert a shortage when the world markets are again in a position to take their normal requirements, but, and this is the all important point, steps taken now will at any rate greatly modify the inconvenience, if nothing worse, to which Lancashire will be subjected. Therefore it is imperative to speed up the work.

The British Trader and Palestine.

It is difficult to find any cause for satisfaction from the point of view of British commercial interests in the recent trade statistics for Palestine which make it only too clear that we are losing ground to our trade rivals who have fully recognised the potentialities of this market, and are rapidly making progress in establishing themselves there. The position is discussed in a recent issue of a Palestine contemporary which puts the blame at the door of the British trader. To a certain extent I am in agreement with this verdict, and it is only too true unfortunately that British merchants as a whole—there are happily numerous exceptions—have not shown any undue enterprise in regard to Near Eastern outlets. Their attitude with regard to Palestine is, however, understandable as there is no question that they have been considerably influenced by the uncertainties of the political situation. Now that our position with regard to the Mandate has been made clear this reason for

BANK OF ROUMANIA LIMITED

Digitized by Google

hesitancy no longer obtains, and it is to be hoped that henceforth British commerce will see to it that it plays its proper part in the Palestine market.

A Promising Market.

At present the requirements of Palestine are somewhat limited in range though they are all the same considerable enough to repay amply any efforts to enter the market. But the real attraction of Palestine as a trade outlet lies in its possibilities of development when the measures that are being taken to open up the country by the utilisation of its resources bear fruit. If the projects now under contemplation achieve the expected success the face of the country will be changed, and instead of being a backward region dependent on a few industries it will become a highly organised community and the demand for commodities from abroad will be correspondingly increased. It rests with the British trader to determine whether when that time comes he is in a position to obtain an adequate share of the commerce or not.

Cox & Co.

The balance sheet of Messrs. Cox & Co. as at March 31, which has just been issued, reflects the influence of the prevailing economic conditions. In September two years ago the balance sheet totalled at £24,317,000, while the total of the present balance sheet is £18,953,000. Deposits are lower than in last September at £16,643,700 as against £18,348,400, and the cash holding is now £4,509,000 as compared with £6,223,900, but on the other hand there is a great increase in the holding of Treasury Bills which stand at £2,036,300 as against £324,800. The most notable feature of the balance sheet is the fact that on the whole the deposits should have been so well maintained. Evidently Messrs. Cox and Co. still number among their customers a very large number of those who first made their acquaintance with this famous bank during 1914-18.

AGRICULTURAL EXPERIMENTAL STATIONS IN CZECHO-SLOVAKIA.

The frequency with which the industrial character of Czecho-Slovakia is emphasized often results in the fact being lost sight of that the republic is almost equally an agricultural country. Industry and agriculture in fact form an unusually happy combination there. In Bohemia 32 per cent. of the population is engaged in agriculture, in Moravia 41 per cent., in Slovakia even 61 per cent. Not only is agriculture thus extensive in the Czecho-Slovak Republic but it is highly developed and can stand comparison with the rest of Europe. There are, indeed, some branches of agriculture in which this country occupies a foremost place, notably in beet-growing, the production of sugar, malt, liquors, etc. Only 4 per cent. of the total area of the country is non-productive land—a figure which compares favourably with the 15 per cent. of non-productive land in England. Agricultural education, too, is well advanced, and there are in all 180 agricultural and forestry schools, 13 of which have been established since the attainment of Czecho-Slovak independence in 1918. More than 50 periodicals are also published regularly for the technical instruction of those engaged in agricultural pursuits.

As regards agricultural experiment and research, there are in Bohemia, Moravia and Silesia, 25 stations devoted either exclusively or mainly to this end. The stations are maintained chiefly either by the State or by municipal corporations, but there are also a few private stations. The majority of the stations are located at Prague, and include the physiological station attached to the Chamber of Agriculture, the experimental station for artificial fertilisers, that for agricultural bacteriology, the consulting bureau of the Lactological Institute, the agricultural machinery test station, the Pedological Bureau of the Chamber of Agriculture, the agricultural chemistry station, and the seed testing station. At Brno, the capital of Moravia, there is a large experimental institute with various departments, administered under independent corporative powers. Its budget for the current year amounts to 1,187,600 crowns. This institute, when completed, will be one of the largest experimental stations in the world. The Brno Corporation also has, at the town of Prerov, an establishment for the improvement of plants.

A number of experimental stations are connected with the various agricultural colleges. Among these are the experiment station at Tabor, the agricultural machinery test station, the phytopathological station, and that for the cultivation of fodder plants; the agricultural chemistry and phytopathological stations at Roudnice, the lactological station at Pilsen, that for the improvement of plants in Chrudim, the lactological station at Kromeriz, a distilling industry station and the research institute for the brewing trade at Prague, the latter being connected with two private schools. In Slovakia, experimental stations have been set up by the State at Bratislava, at Kosice and at Stavnice. Special experimental stations are in process of organization for pisciculture, for apiculture and for sylviculture. Assisted by the Ministry of Agriculture, the Potato Growers' Association at Nemecky Brod are now organizing a special station on the Valecov domain. All the Czech experimental stations are united in a Federation with headquarters at Prague.

NEW COMPANIES.

British Orion Oil Company.

The British Orion Oil Company, Ltd., has been registered with a nominal capital of £400,000 in 395,000 shares of £1 each and 100,000 shares of 1s. each. Objects:—to acquire shares in the Orion Societate Anonima de Petrol, to enter into an agreement with the Phoenix Oil and Transport Company to search for oils and to carry on the business of oil refiners and chemical manufacturers, etc. The first directors are Sir Edward Manville, M.P., 3, Whitehall Court, S.W.; Sir J. Norton Griffiths, Bart., M.P., 3, Central Buildings, Westminster, S.W.; Mr. P. C. Tennant, Alexandra House, Queen's Square, W.C.1; Mr. Jan Koster, 32, Valkenburgerweg, Heerlin, Holland, mining engineer, and Mr. Leo Mesritz, 2, Schereningsche Weg, The Hague, Holland, barrister.

Commerce and Industry.

REPORTS FROM OUR OWN CORRESPONDENTS.

GREECE.

Athens, July 15.

The Drachma Exchange.

Strong measures are being taken to stop illegal dealing in exchange. Letters, it is stated, are being censored; whether this is so or not is best known to persons residing abroad. The newspapers have been forbidden to publish the "street" rate of exchange. Detectives have been instructed to report all illegal dealings. The result of this has been a further fall in the drachma, which is now in the neighbourhood of two hundred to the sovereign. The Consortium has been granting more exchange in the hope of an improvement in the price, and applications have increased. Everybody is racking his brains to find a reason which will have a chance of being approved of by the Committee. The cost of wife and family living abroad, the education of children in foreign countries, dependent parents, etc., etc., in fact anything does, so long as it appears reasonable. The lucky possessor of a Consortium permit feels himself a budding financier, because he knows that he can obtain immediately a profit of sixty to seventy drachmae per £. In order to stop profiteering in connection with steamer tickets, a law has been passed obliging foreign steamship companies to accept drachmae for tickets. The steamship companies will, no doubt, put up their prices to avoid loss on exchange.

New Taxes.

Among the new taxes that have been proposed may be mentioned:—on excess profits of banks and limited companies, 50 per cent.; on tobacco, drs. 32 per kilo increase on first quality and drs. 24 on second quality; on private motor cars, from drs. 1,000 on four-seated touring cars to drs. 4,500 on closed four-seaters. (Taxi cars are excluded); on motor spirit; on beer, malt, and alcohol; on gambling clubs. (This is the first time gambling in Greece has received official recognition.)

Athens, July 22.

Taxation Proposals.

The Parliamentary debate on the proposed Agrarian Laws was continued during the week. The main discussion, however, has been over the proposed new taxes. The proposals made are for the increase of existing taxes and the imposition of new ones. They may be summarised as follows:—

1. Tax on the profits of banks and limited companies:—Banks are allowed a profit of 6 per cent. and limited companies of 10 per cent. on the paid up capital plus reserves. On the surplus profit the tax proposed is on a sliding scale, *i.e.*, if the surplus profit is between 6 per cent. and 10 per cent. the tax is 20 per cent. of such surplus profit and slides up to a tax of 50 per cent. if the surplus profit is 100 per cent. or more.
2. Tax on extraordinary profits:—Law 1643 with its modification is to be re-enacted with effect as from January 1, 1920. The tax is limited to 25 per cent. of such profits.
3. Super tax on income:—Law 1640 has been modified. The limit of exemption will be reduced to 6,000 drachmae per annum. The amount of this tax is 6.2 per cent. up to 12,000 drachmae per annum, and rises to 39 per cent. on incomes of over 70,000 drachmae per annum. This tax is assigned to the amortisation of the "Forced Loan."
4. Tax on amusements:—Tea shops, cafés-chantants, dancing halls, banqueting halls, skating rinks, etc., will pay a tax equal to their annual rent. Theatres and cinematographs are exempt from this tax being already taxed.
5. Motor tax:—Motor-cycles and side-cars tax 200 drachmae per seat. Motor cars from 400-900 drachmae according to the horse-power. For towns other than Athens, Piraeus, Salonika, the tax is one quarter of the above.

Other laws are projected imposing taxes on beer, malt, alcohol and tobacco. From the new tobacco tax it is expected to raise 125 millions drachmae annually.

The Budget for 1922-3 has been postponed until October in order that the new taxes may be included. The Minister of Finance will also bring forward further proposals for new taxes in October. Parliament is sitting practically all day to endeavour to complete its work to enable it to "break up" for the summer holidays. A law increasing the remuneration of members from 18,000 drachmae to 26,000 drachmae was passed without opposition.

The Exchange.

The Consortium of Banks has not altered the rates of exchange since it was reinstituted, sterling remaining at 138-140 drachmae. The "outside" rate is still jumping between 189 drachmae and 204 drachmae in sympathy with the "Bazaar" rumours.

Government Bonds still rise and fall in ratio with sterling. The 1881 5 per cents. reached 1,600 drachmae, dropped to 1,300 drachmae and now stand at 1,410 drachmae.

MESOPOTAMIA.

Baghdad, July 7.

General News.

A law has recently been published which grants legality to sales and mortgages of land made after the occupation of any place by the British forces and before the opening of a *Tapu* office there, provided the sale or mortgage was made in the presence of a Political Officer or other person authorised to sanction such transactions, and the records were countersigned by him.

The excise duty on home grown tobacco has been increased by one anna per kilo, and fees for licences to sell tobacco have been raised very considerably.

ALBANIA.

Tirana, July 20.

Economic Questions.

The economic crisis still continues and imports have greatly decreased, the population suffering from the lack of ready money. Native products are not going abroad, and enormous stocks of wool, hides, olive oil and cereals are still awaiting buyers. As a result of a tax of 300 gold francs imposed on horses from the Muzakya Plain by Italy, the habitual purchaser of Albanian horses, no sales have been possible. This measure has been taken by the Rome Government as a kind of reprisal against Albania, and is directed only against horses coming from this region.

Since the beginning of the war Albania's relations with the outside world have been carried on exclusively through the service of Italian vessels (Bari, Brindisi, and Trieste), and sometimes of Greek ships from Corfu to Sarandra. This fact, with the resultant isolation, so to speak, of Albania, aggravates the economic situation.

For the last two months, however, a regular service of sailing ships and motor-boats has been running between Albania and Italy, thus freeing Albania from being wholly dependent on Italian vessels, although she is still served by way of Italy.

Finance and a National Bank.

For some time the Tirana Government has felt the need of engaging a financial expert to advise the Ministry of Finance. Owing to the difficulty of finding an expert, it thought fit to ask the League of Nations to provide such a supervisor. The League has already decided to comply with the request.

Meanwhile, the Government is trying to interest foreign capitalists to co-operate in the formation of a National Albanian Bank. Certain offers have been made by the Bank of Brabant, in Belgium, and it is stated that M. Nicolas Thaci, Financial Minister, and M. Eshref Frasheri, President of the Chamber of Deputies, who went to Brussels to fix up matters, recently returned to Tirana, but without having arrived at a definite arrangement.

THE BUSINESS MAN'S BOOKSHELF.

Some Aspects of Reconstruction.

GETTING THE WORLD TO WORK. By Sir Charles Macara, Bart. (Sherratt and Hughes, Manchester. 5s.)

This book contains a number of articles recently contributed by Sir Charles Macara to the Press of the world and also a number of letters dealing with various questions that have arisen during the period of reconstruction. A large number of articles are devoted to different aspects of the cotton trade, while the question of a trade revival is also dealt with at length. The variety of the articles can be judged from the fact that they cover subjects so diverse as "Canada and British Trade" and "The Disarmament Conference." One of the most interesting of them is that on "Internationalism in Industry" in which Sir Charles urges the need for unity among nations. He points out some of the effects on world trade of conditions in Europe, and says—

> People are beginning to see . . . that the whole world is inter-dependent, and that you cannot injure one member of the international body without injuring all the rest. With the recognition of this great economic truth may come eventually a sense of the futility of interfering in any way with the freedom of trade between the various countries of the world.

All the articles are well worth reading for Sir Charles is not only an extremely lucid writer but also has the gift of throwing much new light on his subject, and in the present volume he may be said to have made a notable contribution towards the solution of some of the vexed problems of reconstruction.

Some Economic Problems.

HIGH PRICES AND THE QUANTITY THEORY. By Sir John O. Miller. (Sifton Praed and Co. Re-issue. 1s. net.)

This little brochure was first issued in 1920 at a time when prices were at their zenith, and represented an attempt to bring into clearer relief some of the facts regarding currency and its effect on prices. Looking back at the events in Europe in the past few years it would seem rather improbable that anyone would require to be convinced as to the economic consequences of a policy of inflation or deflation. But, as the extracts given show, even eminent statesmen at the time were very far from being clear on the question, and one of them even went so far as to say that "there is no greater fallacy than to suppose that high prices are due to multiplication of the currency."

Conditions have materially changed since 1920. Instead of inflation we have had deflation, and until recently there has been a rapid decline in prices. In other words there has been a considerable advance towards the normal, and while it has not been an easy progress the transition period has not been so difficult as the writer appeared to anticipate. His attitude was that of the two courses a policy of deflation would have possibly worse consequences than one of inflation.

> Both conditions lead to friction and unsettlement . . both foster a sense of injustice, disturb social relations, set class against class, and cause actual distress in some parts of the body politic. If we must choose between them, history seems to be in favour of a rise in prices, while economists frequently appear to incline to a fall. Personally, I believe with the historians that a gradual and not excessive rise of prices promotes the material welfare of the world by reducing the weight of debt for the benefit of the productive classes, on whose energy all prosperity depends.

Of course if it were possible to maintain that the unemployment that this country has been, and is, experiencing is attributable to deflation then the writer's attitude towards this policy would be fully justified. But it arises from causes quite other than deflation, though that has contributed no doubt to some small extent by its inevitable effect on production. The chief cause, of course, has been the almost complete failure on the part of so many countries to make a real effort to place their finances on a sound footing, with the result that a very serious state of affairs has arisen since the exchanges now impose something approaching an effective barrier on the free exchange of commodities. This question of the exchanges, which is only briefly touched on in this little volume, being outside its scope, is the real problem that the world now has to solve.

We would add, in conclusion, that anyone who desires to know more of the importance of currency, of the part that it has played in human affairs and of its present function in the social fabric, can be cordially recommended to read this brochure which covers the subject in broad outline very thoroughly and in a way that the ordinary reader can readily understand.

CZECHO-SLOVAK CHAMBERS OF COMMERCE.

Re-organisation Scheme.

In order to bring about closer co-operation between the Czecho-Slovak Chambers of Commerce and Industry and the State authorities, the former have formed a special central office with headquarters at Prague, which will represent them in dealing with the Government, appoint experts in matters of special importance, publish a periodical in Czech and German, and organize common action with regard to urgent problems. The chairman of the Prague Chamber of Commerce is, at the same time, chairman of the Central Office. The new organization does not affect the independence of the respective chambers. The affairs of the Central Office will be administered by a governing body which will hold periodical plenary meetings, each chamber being represented by one vote. In addition to this, there will be a central committee, several sub-committees and a special bureau. The central committee will consist of five members, three of whom represent the Bohemian Chambers, one the Moravian and one the Slovakian Chambers. The nucleus of the organization will be composed of the six sub-committees: the economic, the transport, the financial, the trade, the social and the committee for general affairs.

The traffic receipts of the Smyrna-Aidin Railway for the week ended July 29 amounted to £5,854.

The National Bank of Turkey have appointed Mr. George R. S. Gallaher, late manager of the London Joint City and Midland Bank, Lothbury, a director, and he will act as a member of the London committee.

The British Consul at Sofia reports that quarantine is imposed on arrivals from Bucharest on account of cholera, and Corfu, Odessa, Rhodes, Scutari, Alexandria, Suez, Port Said, Prevesa, and Zante on account of plague.

The Roumanian *Monitor Oficial* for July 15 contains a decision of the Council of Ministers, dated July 1, which provides that furs may be imported into Roumania without special authorisation, subject to the payment of a luxury tax equal to twice the customs duty.

A decree, dated June 13, imposes an excise duty at the rate of £E1 per metric ton on sugar manufactured or refined in Egypt, except sugar coming from small local factories working without the aid of mechanical force. The decree also provides for a drawback of this duty on all sugar re-exported from Egypt.

The tonnage of vessels entered into British India and cleared outwards with cargoes from and to foreign countries and British Possessions during the month of May amounted respectively to 648,000 and 715,000, as against 611,000 and 693,000 in April, 1922, and 470,000 and 524,000 a year ago.

SHIPPING INTELLIGENCE.

BUNKERING AT ADEN.

Situated as it is on the main route from Europe to India and the Far East, and at the point of divergence to East and South Africa, Aden has developed considerable importance as a bunkering port, and practically all of the vessels calling at Aden do so either purposely or incidentally to bunker, says the Chamber of Commerce *Journal*. Before the war nearly all of the coal came from the United Kingdom, but recently South African coal has come to the fore, although it is reported by the American Consul at Aden as being not so generally favoured as Welsh coal. During the year ended March, 1921, 178,591 tons of coal for bunkering purposes were imported into Aden, 87,333 tons of which came from South Africa and 29,198 tons from England, the remainder being shipped from India and the United States. Coal is stored in Aden in the open, and bunkering is done by means of barges in which the coal is loaded in gunny sacks. All the work of handling is done by Arab coolies. The average rate of handling is 100 tons an hour, with a cost of about 30 rupees per hundred tons for each transfer. Aden is also well equipped for supplying oil for bunker fuel. The Anglo-Persian Oil Company have two storage tanks with a capacity of 18,000 tons each, and oil can be pumped into ships' tanks at the rate of 400 tons an hour.

HOPEFUL MOTOR SHIPBUILDING PROSPECTS.

In spite of the extreme depression existing in the shipbuilding industry, a careful examination of the position appears to indicate that the prospects are distinctly hopeful, so far as motor shipbuilding is concerned. According to a writer in *The Motor Ship*, although recent orders for steamers have been practically negligible, contracts have been fixed during the past few months for 16 motor ships; of these, nine are being built in yards in the United Kingdom, indicating that Britain has already attained premier position in this phase of shipbuilding. Judging from these facts, and bearing in mind that the results achieved with oil-engined vessels during the shipping slump have proved the superiority of the motor vessel over the steamer on most routes, it is believed that the bulk of the orders placed in the future will be for ships equipped with internal-combustion motors. It is evident that, sooner or later, a heavy demand for new tonnage must arise, since the British Mercantile Fleet is now scarcely any larger than it was in 1914, while vessels totalling 3,000,000 tons are over 20 years old and, therefore, virtually obsolete.

NEW STEAMER FOR BYRON LINE.

The single-screw geared turbine steamer Maid of Psara, built at Birkenhead by Messrs. Cammell Laird & Co., Ltd., was recently delivered to the Byron Steamship Co., Ltd., of London. She has been specially designed for carrying grain in bulk. Her dimensions are: length, 374 feet, breadth, 50 feet, and she has a loaded displacement of 10,000 tons. She has been built of steel under special survey to Lloyd's 100 A 1 class, and is rigged as a two-masted schooner with telescopic top-masts for passing under Manchester Ship Canal bridges. Oil fuel is carried in the double bottom and also in deep settling and side bunker tanks. The propelling machinery consists of a set of Parsons compound impulse and reaction turbines.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis :—

Anchor Line.—S.s. Castalia for Bombay (Liverpool, August 11); s.s. Scindia for Bombay (Liverpool, August 18).

Anchor Brocklebank Line.—S.s. Malakand for Calcutta (Birkenhead, August 21); s.s. Mahanada for Port Said, Colombo, Madras and Calcutta (London, August 26); s.s. Media for Calcutta (Birkenhead, September 2); s.s. Mandasor for Calcutta (Birkenhead, September 16).

Bibby Line.—S.s. Rialto for Rangoon (Middlesbrough, August 12); s.s. Oxfordshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 16); s.s. Lancashire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 30).

British India Line.—S.s. Manela for Colombo, Madras and Calcutta (London, August 18); s.s. Trelevan for Bombay and Karachi (London, August 19); s.s. Madura for Bombay and Karachi (London, September 8); s.s. Mashobra for Colombo, Madras and Calcutta (London, September 15); s.s. Domala for Bombay and Karachi (London, September 22).

Byron Steamship Line.—S.s. Maid of Hydra for Patras, Piraeus, Constantinople, Constantza, Sulina, Galatz, Braila, Volo Salonika, Smyrna, Bourgas and Varna (Liverpool, August 15).

Clan Line.—S.s. Clan Murray for Colombo, Madras and Calcutta (Birkenhead, August 24); s.s. Hesione for Bombay and Persian Gulf (Birkenhead, August 26).

Cunard Line.—S.s. Tyria for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk, Poti and Batoum (Glasgow, August 18).

Ellerman Line.—S.s. Serbino for Gibraltar, Malta and Alexandria (Liverpool, August 12); s.s. Cressado for Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, Ancona, Venice and Trieste (Liverpool, August 17).

Ellerman's "City" Line.—S.s. Urbino for Bombay and Karachi (Manchester, August 14); s.s. City of Christiania for Calcutta (Birkenhead, August 19); s.s. City of Poona for Calcutta (Birkenhead, August 30).

Ellerman's "Hall" Line.—S.s. City of Hankow for Bombay, Karachi, the Punjab and Malabar Coast ports (Liverpool, August 22); s.s. City of Simla for Bombay, Karachi and the Punjab (Liverpool, August 20).

Ellerman's Westcott and Laurance Line.—Regular sailings fortnightly for Malta, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

Glen Line.—S.s. Glenapp for Port Said, Port Swettenham, Singapore, etc. (London, August 24); s.s. Glengarry for Port Said, Port Swettenham, Singapore, (London, September 7).

Harrison Line.—S.s. Author for Calcutta (Liverpool, August 16).

Henderson Line.—S.s. Martaban for Port Said and Rangoon (Birkenhead, August 23).

Holt Line.—S.s. Agamemnon for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 17); s.s. Helenus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 17); s.s. Knight Garter for Port Said, Port Swettenham, Singapore, etc. (Swansea, August 17); s.s. Polyphemus for Port Said, Port Swettenham, Singapore, etc. (Swansea, August 17); s.s. Yangtsze for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 24).

Johnston Line.—S.s. Dromore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, August 19).

Papayanni Line.—S.s. Maronian for Algiers, Malta, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, August 12).

P. & O. Line.—S.s. Malwa for Bombay (London, August 11); s.s. Kaisar-I-Hind for Bombay (London, August 25).

Company Meetings

ALEXANDRIA WATER COMPANY.

Improved Results.

The following is the report of the directors, with statement of accounts as at March 31, submitted to the shareholders at the forty-fourth annual general meeting, held at Alexandria on June 1 :—

The directors, in submitting to the shareholders their annual report and statement of accounts for the financial year ending March 31, 1922, have pleasure in stating that the results show a very material improvement on those of the previous year. The total revenue has increased by £13,870, standing at £216,711 as compared with the previous year's total of £202,841. Included in this increase is the sum of £3,451, representing the proceeds of an addition of 4 per cent. on all filtered water accounts, other than those under the heading Sakkas (public street taps) which was authorised as a result of the negotiations with the Municipality, referred to in the last report, and has been collected since October 1, 1921. This increase is temporary and subject to alteration or cancellation according as the cost of filtration may vary. The decrease of £1,609 in receipts from the Egyptian Government is again due to a reduction in the consumption of the British Army. The revenue from the port has declined by £2,790, due partly to slackness in the shipping trade but principally to the fact that additional hydrants having been provided, less water has been supplied by our steam barges and a greater percentage has been taken at the cheaper rate from the quay hydrants. The working expenses show a very satisfactory decrease of £10,726, thanks to a reduction of £15,022 in the cost of fuel. By far the greater part of this reduction is due to the economy in consumption of the new Diesel pumping plant at our Rond Point works, which was put into service on July 1 last and has run almost continuously night and day since that date with most satisfactory results. Our subsidiary services, despite an unfortunate accident to one of the Diesel engines at our Ramleh pumping station, have also contributed to the decrease, but the contract entered into in 1920 for the supply of liquid fuel for our steam pumping plant having only recently expired, this plant has not yet benefited from the reduced cost of fuel. The directors have decided to revert to coal for the steam plant as soon as our stock of liquid fuel is exhausted and a contract has already been placed at satisfactory rates. The cost of fuel should therefore show a further substantial decline during the current financial year.

Increase in Consumers.

The net expenses in connection with the recent issue of new capital amounted to £1,056 and this sum has been written off the reserve belonging to the shareholders. Owing to a smaller consumption of unfiltered water the total quantity of water pumped decreased by 372,553 cubic metres to 23,706,877 cubic metres. The number of consumers continues to grow most satisfactorily and now amounts to 47,505, an increase of 2,520 during the twelve months. In the profit and loss account £17,054 has been written off as depreciation of machinery and other wasting assets, in accordance with the rates fixed by the board, and £2,466 as depreciation of stock of material in hand. The sum of £5,800 has been put aside as a provision to cover the company's liability under the Corporation profits tax up to March 31, 1922, and a sum of £8,000 for provision for compensation claims, which have again been in excess of the average. The board, taking advantage of the favourable opportunity, have sold £35,000 British National 5 per cent. War Bonds and re-invested the proceeds in £56,000 Egyptian 4 per cent. Unified Debt. The securities figure in the balance sheet at the market value of March 31, 1922, or below. The provision of £4,000 made last year for the depreciation of securities being no longer required, that sum has been written back into profit and loss account. The balance of the profit and loss account, after making the above depreciations and allowances and after deducting the interim dividend of 4 per cent. paid on December 15, 1921, is £65,250, from which should be deducted 6 per cent. on the capital of £600,000, shares Nos. 1 to 120,000, £36,000; interest at 7 per cent. per annum on the new capital of £100,000, shares Nos. 120,001 to 140,000, calculated from the dates of the respective calls, £5,250, leaving a balance of £24,000, of which one-half is due to the Municipality according to our Convention, and the other half (£12,000) to holders of shares Nos. 1 to 120,000 which represents two shillings per share and this added to the 6 per cent. above mentioned makes a total of eight shillings per share for the dividend of June 15, 1922, on shares Nos. 1 to 120,000.

Dividend of 12s.

The directors therefore recommend the shareholders to fix the dividend on shares Nos. 1 to 120,000 payable on June 15, 1922, at eight shillings per share, which with the interim dividend of four shillings paid on December 15, 1921, makes a total dividend of twelve shillings for the year, compared with ten shillings and sixpence for the previous financial year. The interest to be paid on the same date on the shares of the new issue Nos. 120,001 to 140,000 will be at the rate of five shillings and threepence per share. The whole of the 140,000 shares, into which the capital of the company is divided, will in future rank *pari passu* for dividend. The sum of £25,310 has been spent during the year on new works, principally to complete new plant already in hand, and comprising machinery and filters, £11,833; buildings, £4,058; water mains, hydrants, valves, etc., £5,969; water meters, £3,396; An amount of £3,538, previously included under the heading "Stocks of Material in Hand," and representing the value of certain tools, transport vehicles and floating plant, has also been transferred to capital account.

Construction of New Reservoir.

The directors have authorised the construction of an additional filtered water reservoir at our Rond Point works, at an estimated cost of £7,000, and the laying of enlarged and additional feeding mains, the cost of which will be about £12,000. The latter work is required to meet the increased number of consumers in certain districts of the town and the contract for the pipes of 30", 20", and 18" diameter has been placed at a satisfactory price. The large number of new buildings under construction in Alexandria has necessitated the laying of 8,124 metres of new mains and considerable additions will be necessary during the current year; 878 metres have also been added to our high pressure fire mains at Minet-El-Bassal. The total lengths of mains now in service are 300,518 metres of filtered water mains, 39,756 metres of unfiltered water mains and 16,115 metres of high pressure mains. In April, 1921, a disastrous conflagation occurred in Minet-El-Bassal and but for our high pressure service and the presence of sprinklers and drenchers in the surrounding buildings the task of the fire brigade in preventing the destruction of a large number of cotton shounahs and presses would have been rendered almost impossible. The insurance companies having recently increased the premiums on cotton stores not provided with sprinklers and drenchers, a considerable number of shounahs are at present being thus equipped and will shortly be coupled up to our mains.

AFRICAN AND EASTERN TRADE CORPORATION

Directors' Resolutions confirmed by the Shareholders.

Mr. J. H. Batty, the chairman, presided over an extraordinary general meeting of the African and Eastern Trade Corporation, Ltd., which was held on August 4 at the Exchange Station Hotel, Liverpool, for the purpose of confirming resolutions which had been adopted at a previous meeting held on July 20 for the purpose of converting the 5,000,000 new 15 per cent. cumulative preferred ordinary shares of £1 each into shares of a character to be determined at the time or times of issue, and also to adopt new articles of association.

The resolutions, which were put to the meeting as special resolutions by the chairman, seconded by Mr. Mazzini Stuart, were carried unanimously.

In addition to a shipping company on the Baltic, the Czecho-Slovak Government is planning a Czecho-Bulgarian Shipping Co., the centre of operations being the Black Sea and its ports.

'BALKAN' NATIONAL INSURANCE COMPANY.
FOUNDED 1895
Capital paid up - - - - - 5,000,000
Total reserves as per December 31st, 1920 63,200,000
Premium Income during 1920 - - 28,300,000
Amounts insured of Life branch exceed 150,000,000
Branches maintained: Fire, Life, Marine, Casualty and Re-insurance of all branches.
HEAD OFFICE: SOFIA, BULGARIA.

Engineering Topics.

By Our Engineering Representative.

Milling Machine.

For some time before the war and until quite recently very few small precision machines for watchmaking and scientific instrument production were actually made in Great Britain. Our machine tool makers contented themselves with turning out small, medium and large sized millers, planers, shapers, lathes and slotting machines for the engineering trades generally and made no attempt to cater for the users of tools designed for treating pieces of metal a few millimetres in cross-sectional area.

During the past year or so several firms of engineers in this country have taken up the production of miniature machine tools for the scientific instrument worker, and there seems no room for doubt that they are already making tools of a better finish and working to finer limits of accuracy than their rivals on the Continent. Precision grinders capable of dealing with small work are of course no new thing and are not referred to in the above remarks; what are meant are small milling machines capable of working to one-three-thousandth part of an inch, small drilling machines capable of drilling a hole too fine for water to pass through, and shaping machines capable of working to a glass-like finish. Lathes which are a miracle of accuracy for turning axles and other parts of watches and clocks are now being made in this country in ever-increasing numbers and are being sold at comparatively low prices. To some extent the cost of production stands in the way of sales but as against that extra cost our makers are able to claim improved design, better material and increased strength of construction.

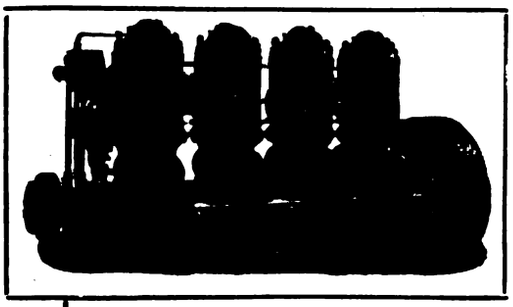
One of the latest miniature precision tools produced is a milling machine which is about 14 inches in over-all height and 12 inches deep by about 6 inches wide. At first sight it seems to be almost a toy, or a scale-model of a larger milling machine, but it is actually one of the finest productions of its kind that British engineering shops have yet turned out.

The spindle is of hardened steel, furnished with a draw-in rod which is made to take standard 8 millimetre split chucks such as are used in connection with the majority of bench precision lathes. The spindle runs in special steel bushes which have been hardened and accurately ground and not only are these bearings of ample size, the front one being particularly large, but they are so arranged that compensation can be made for any wear.

The table, though small, is amply large for the work it has to deal with, as it is over 6 inches in length by 2 in width, whilst it has a longitudinal and vertical travel of 4 inches and 3½ inches respectively and a cross travel of about 2 inches. As is only to be expected all traverse screws are most accurately machined and are of micrometer pitch and working as they do in bronze nuts are not likely to wear. These screws are provided with handles made of steel and fitted with micrometer collars reading to one-thousandth of an inch. This close degree of accuracy could, of course, be increased if required by any of the known methods, but it has been found in practice that for ordinary instruments an accuracy to within a limit of one-thousandth of an inch is quite sufficient. It may be mentioned that the machine can be used for gear cutting as well as for milling, and altogether it appears to be one of the most useful tools yet produced to meet the needs of the scientific instrument maker.

An interesting Lock-Nut.

Some little time ago the subject of lock-nuts and gripping washers was dealt with at some length in these columns, the principal makers of both of these being described and their good points mentioned. Since the article was written little has been done in connection with the subject until quite recently when a locking device on an entirely new principle was protected and described. The old method of fixing a hammer head, by expanding the end of the shaft by a wedge appears to be the nearest analogy to the new method that can be mentioned, and it may well be that that time-honoured expedient for preventing hammer heads from flying off whilst in use suggested the new idea to the inventor. Briefly, the new invention is to bore out the end of the stud or bolt for a depth rather greater than its diameter, leaving a centre piece finishing level with the end of the thread or projecting for a further space equal to the diameter of the original stud or bolt, as may be desired. This centre piece is screwed with a left-handed thread and the outer wall is split by a saw cut for about half the depth of a nut. A locking nut is turned conical at one end to fit into the concavity, and when the ordinary nut has been tightened down, the lock nut is then screwed home. The wedge-like action of the coned end on the walls of the cavity forces the thread of the bolt into extremely tight contact with the thread of the nut and in addition the fact that the locking nut has a left-hand thread and so tends to tighten as the other tends to slacken back, makes this nut so positive in action that nothing short of stripping the thread or bursting the nut could cause it to work loose in use. At the same time the nuts can be instantly removed, undamaged, whenever required, by the aid of an ordinary spanner.



Power at Minimum Cost.
The extreme simplicity of the "Allen" Heavy Fuel Oil Engine renders it particularly suitable for placing in the hands of native or other unskilled attendants without any sacrifice of efficiency.

It is easy to start and runs unattended for long periods.

THE 'ALLEN' HEAVY FUEL OIL ENGINE

From 15 BHP to 200 BHP

Stock and Share Markets.

BUSINESS ON RESTRICTED SCALE.

Gilt-Edged Dull.

(From Our Own Correspondent)
London, Friday night.

Business has been very restricted during the past week as is always the case at holiday periods. Generally speaking the tone of the markets has been very dull, and in some directions, notably in the Oil group, heaviness has developed as a result of the exchange position. Last week I suggested that we should see the mark at a lower level, and since then it has touched 4,000. To-day the rate is considerably better, and a slight improvement in the general outlook has had a stiffening effect on the markets. It would be premature to assume, however, that we are over the worst of the depression, and it seems only too probable that we shall have unsettled markets until the reparations question is finally decided. It is certainly no time for the speculator who looks for a rapid return, though for the investor who is content to "wait and see" it would be difficult to imagine a more satisfactory market position.

Gilt Edged Lower.

Gilt-edged have failed to hold their ground under the prevailing conditions, and prices have reacted somewhat. Consols at 58.5-8 are 5-8 lower, but the Conversion Loan at 76.11-16 is 3-16 up. War Loan Fives are fractionally lower at 100.7-16, a decline of 1-16. Indian stocks have been firm. The Seven per cent. Loan is unchanged at 119½, the 3½ per cent. Loan remaining at 68¼, while the 3 per cent. Loan is ¼ down at 58¾. The Sudan 5½ per cent. Loan has been done at 109½.

With the exchanges fluctuating as they are at present it goes without saying that a very variable tone has been in evidence in the Foreign group. French stocks close about the same, after initial weakness. War Loan Fives are ½ up at 38½; while the 4 per cents. at 29½ are ¾ down. German 3 per cents. have been very weak, but have regained their loss, and are unchanged at 1¾. Italian Rentes have reflected the political situation in that country, and are down to 21. Russians have been neglected, the 4 per cents. being 7½, while the 5 per cents. are 11. Greek 5 per cents. 1914 are 44½. Czecho-Slovak Bonds have weakened to 87.

Industrials Dull.

The lack of business has continued in the Industrial group, and generally a dull tone has been in evidence. There is nothing at the present time to induce investors to pay much attention to this group.

Tobaccos have been fairly steady with Bats unchanged at 84s. 3d., and Imperial Tobaccos at 66s. 3d, a decline of 6d. Textiles are about the same, Courtaulds being 50s. 3d. x.d., at which they are 6d. lower, while Coats are unchanged at 64s. 6d. There has been little change in Iron and Steel securities. Armstrongs have shed 6d. at 10s., Guest Keens are unchanged at 55s., while Vickers are 3d. lower at 12s. 3d. x.d. In Indian railways Bengal and North Western are 136, a gain of ¾, and Burmas are 101, at which they are ½ down.

In shipping securities P. and O. Deferred are 303, Cunards are 20s., and Furness Withys are 31s.

Oils Dull.

Once again the Oil Market has been exceptionally depressed. The foreign political situation has, of course, had a marked influence, and this and other factors are responsible for an almost general movement of prices in a downward direction.

Burmahs have been a steady spot, and close at their previous week's level of 5.3-32 x.d. Mexican Eagles at one time slumped badly, but have recovered to 54s., at which they are 2s. 10½d. lower. In Trinidad issues Apex are 40s. 7½d., a decline of 7½d., Centrals are 2s. down at 30s. 6d., while Leaseholds at 21s. 3d. are 1s. 3d. lower.

Among Egyptians Anglo-Egyptian B have shed 3d. at 26s., while Oilfields of Egypt are 6d. lower at 3s. 9d. In the Roumanian group Phoenix are 1½ up at 26s. 10½d. Steaua Romanas are unchanged at 9s. 9d., while Roumanian Consolidated are 7½d. up at 17s. 4½d.

Banks Fairly Firm.

In Banking descriptions Chartered are unchanged at 18, while National of India are 1-8 up at 43.7-8. P. and O. Banks are 1-16 lower at 13.15-16, while National of Egypt are 20.

Gemsah Oil Reefs.—The directors report that they have received a cable from Gemsah stating that the broken casing and the lost drilling bit have been recovered, the hole cleared, and drilling recommenced.

Cotton & Cotton Goods.

MANCHESTER COTTON REPORT.

Egyptians Spinnings Irregular.

(*From Our Own Correspondent.*)

Manchester, Friday.

The event of importance in the market during the past week has been the official statement on the condition of the 1922 American cotton crop issued by the Washington Department of Agriculture. A condition figure of 70.8 per cent. was issued which compares with 71.2 per cent. a month ago. When the report was received prices for raw cotton immediately advanced nearly 1d. a lb., but owing to the statistics being discredited quotations have since sagged. It was expected in trade circles that the crop would have been in a better condition as according to cables very favourable weather has been experienced throughout the whole belt during the past month. The reverse was the case, and although the report caused some sensation it was received with great scepticism. With regard to the cloth section, no transactions of any weight have taken place for Egypt, the Levant aud Constantinople. The majority of the offers have proved unworkable. Quotations for Egyptian spinnings have been very irregular and users have only taken up small lots to meet immediate requirements. Scattered piece goods transactions have been recorded for India. China has continued very slow. Spinners of American yarns have lost further ground. Prices have favoured buyers. There is no probability of any organised short time working in this section of the industry although the Masters Federation have recommended the mills to close one week during the month of August.

LIVERPOOL REPORT.

Market Unchanged Generally.

Messrs. Reynolds and Gibson report as follows for the week ending August 2 :—

Trading during the past week has been rather on the quiet side, a state of affairs that can be ascribed to the poor offtake for yarns, and to the policy of many spinners to await the publication of the American Bureau report, before adopting a definite policy. The enquiry has not been of a very varied character. Good Fair and Fully Good Fair Sakel constituting the main portion of the business. Low cotton has been in moderate request, but Uppers continue to be neglected. Sudans and Tokar have been traded in, but not to the extent to which we have been accustomed latterly. The better grades of Sakel, that is for cotton grading good and above, have been quite out of demand for some time now, and with the new crop rapidly maturing it is quite probable that we shall witness a narrowing down of the present premium between the higher and medium qualities. C.I.F. business has only been on a limited scale and spot cotton here still rules well below the Alexandrian level. Quotations in the week are raised 25 points for Upper and Brown, for Sakellaridis they are unchanged with the exception of fine and Extra Fine which are reduced 25 points. F. G. F. Sakellarides 18.25. The estimated sales amount to 3,300 bales. (including 700 Sudan) against 2,900 bales (including 1,800 Sudan last week).

THE EGYPTIAN MARKET.

Crop Conditions Good.

The Commercial Co. of Egypt, in their report for the week ended July 21, state :—

Futures.—The future market during the past week has been poor and not much business passing. The weakness cannot be attributed to any new factor—it is but the realization of the fact that the trade revival of which we have heard so much is and will be dependent on price. We repeat that in our opinion the world wants all the cotton that can be produced, but it only wants that cotton providing the price is at a level which it considers reasonable. With the prospects for the new crop as they are, we do not think that we have yet reached that price, but, on the other hand, it is well not to ignore the fact that we are now approaching the critical month of August which may mean so much to the crop—prospects which are now good may be considerably modified and we are not inclined to look for much further decline for the moment.

Crop.—Crop news is good reading and all reports are to the effect that the plant is in good trim and bolling well. We continue to receive the usual reports of boll worm, but the percentage of attacked bolls is, so far, small. Water is still only sparingly distributed, but is apparently enough for the plant as, even although temperature has been somewhat above normal for the last week or two, the plant does not appear to have suffered. The Government has this week issued its estimate of acreage planted in cotton, by province.

The Commercial Co. of Egypt, in a further report for the week ended July 28, state :—

The market during the week under review has been subjected to violent fluctuations and has, at times, been rather panicky. The decline was brought about by the throwing over of positions by disappointed bulls who had entered the market at top prices in anticipation of the largely improved trade demand which they believed to be in prospect and which, it must be admitted, every report from the consuming centres confirmed. We think that there are still some speculative positions open, though the bulk of them have been liquidated and the position is to that extent healthier. Whether the trade are prepared to enter the market at present prices for other than their immediate requirements remains to be seen.

Spot.—Total sales during the week amount to about 5,000 bales of which we estimate 3,200 bales Sakellaridis, 1,500 bales Uppers, 200 bales Brown, and 100 bales Pilion.

Sakellaridis.—The demand has fallen considerably during the week. A good business has again been done in the low qualities, but with the continued scarcity of this cotton, sellers are becoming rather harder to deal with. The better qualities have been more or less neglected. Some interest has been shown in Fully Good Fair but the bulk of the demand remains in the grades Fully Fair to Fully Good Fair. The basis has stiffened up slightly in all grades.

Uppers.—Practically all the transactions registered have been in Fully Good Fair and above—the lower grades have been almost entirely neglected. The basis is slightly harder all round.

Brown.—A small business has been done in Fully Good Fair to Good and Good on a fairly reasonable basis.

Pilion.—A few lots of Good Fair to Fully Good Fair have changed hands but very little of this cotton remains for sale. The basis is unchanged.

Crop.—All reports from the interior indicate good progress; the plant is fruiting well. Boll worm is reported but not to any extent, and the damage by this pest, up to the present, is small. Temperatures are above normal. Water is still short at the tails of some of the distant canals, but no further anxiety is felt under this heading as the storage water which has been freely discharged downstream from the Assouan reservoir for the past ten days has now reached the Delta and within a few days ample water will be available in all districts.

LONDON PRODUCE REPORT.

Price of Sugar Advancing.

(*From Our Own Correspondent.*)

London, Tuesday Morning.

Sugar.—Home refined has been in good demand at higher rates. Tate's cubes have advanced eighteenpence at 60s., while mineral water sugar is 1s. 3d. up at 52s. 9d. London granulated has gained 1s. 8d. at 52s. 3d., while Lyle's granulated shows an increase of 1s. 6d. at 52s. 6d. There has been a further increase in prices for export descriptions. West Indian crystallized is 1s. up at 44s. 6d. and white Mauritius has risen a like amount at 49s. 6d. White Java is 4½d. harder at 22s. 1½d. Cane sugar quotations are :—August, 20s. 6d. ; and September, 20s. 6d. White sugar quotations are :—August, 24s. 3d. ; September, 23s. 9d. ; October, 23s. ; November, 22s. 6d. ; December, 22s. 7½d., and October—December, 22s. 9d.

Coffee.—Steadiness has prevailed. East Indian at 112s. and Costa Rica at 106s., are both firm. Nairobi is unchanged at 100s. The futures market has been dull. Quotations are :—September, 63s. ; December, 60s. 6d. ; and March, 60s. 3d.

Dessicated Coconut.—There has been a slight falling off in the demand during the week, while some second-hand sellers are dealing at a sacrifice so as to clear their supplies.

Rice.—The August vacation has restricted business, resulting in a dull all-round tendency.

Green Fruit.—A small shipment of South African oranges has arrived during the week, and has been rapidly disposed of owing to the abnormal demand. The quality of this fruit continues to give entire satisfaction. The lemon market continues to be unsatisfactory, the business passing being on an exceedingly small scale. Unless fine weather arrives shortly, this market may be seriously affected. The final shipments of the season of Australian and Tasmanian apples have arrived and have been in good demand. The new crop of Valencia onions has met with a ready market, while prices are easier.

Oilseeds.—Prices have declined. Indian linseed is 10½d. lower at 20s. 10½d., and La Plata has shed 1s. at 19s. 4½d. Rapeseed is lower with Toria 6d. down at 18s. 6d. Cottonseed has remained unchanged in all cases. Egyptian black is 11s. 9d. ; Sakellaridis is 10s. 9d., and Indian is 9s. 3d.

Oils.—A firm tone has prevailed throughout. Linseed oil shows a gain of 6d. at 45s. Rape oil is unchanged with crude at 43s. and refined at 46s. Cotton oil is a steady feature with Egyptian crude at 41s., deodorized at 53s., technical at 41s. 6d., and refined at 48s.

Oilcakes.—Steadiness has been in evidence. Cottonseed-cake has advanced 10s. at 190s. ton. Coconut-cake has shown no change at 210s. ton, as also cottonmeal-cake and linseed-cake at 300s. and 280s. ton respectively.

The traffic receipts of the Egyptian Delta Light Railways for the week ended July 10 amounted to £E.8,524 ; total for the year £E.78,589. For the corresponding period of last year receipts amounted to £E.8,926 ; total for the year, £E.89,666.

ROUMANIA'S HARVEST.

(*From Our Own Correspondent.*)

Bucharest, July 23.

The Ministry of Agriculture reports that the harvest is progressing favourably on the whole. In Wallachia and Transylvania cutting is in full swing, and threshing has been started in some regions.

The excessive heat which has prevailed, especially in Northern Moldavia, Bukovina and Bessarabia may affect the quality of the wheat to some extent. The maize plant requires rain.

SUDAN PRODUCE.

The following extracts are taken from the C.E.B. report for May :—

Gum.

Kordofan Province.—The amount of gum sold in El Obeid market during May was 15,175 kantars as against 15,095 kantars during the same month last year, at an average price of LE.1.050 per kantar. The arrival at El Obeid from Nahud were 14,333 kantars as against 4,400 kantars last year. The amount sold at Rahad during the month was 9,311 kantars as against 4,615 kantars last year, the average price being 900 mms. per kantar. 1 710 kantars were sold at Um Buaba at an average price of LE.1,070 mms. the kantar as against 1,887 kantars the same month last year. At Rahad 623 kantars were sold at prices ranging from 112 to 88 P.T. per kantar as against 740 kantars during the same month last year.

Kassala Province.—940 kantars of 100 rottles (45 kilos) of gum were exported from Gedaref and 283 kantars from Mefaza.

Upper Nile Province.—255 kantars of 100 rottles (45 kilos) of Talk and 79 kantars of Hashab were exported from Renk during April.

Miscellaneous.

Dates.—Halfa Province.—An April report states that an exceptionally good crop is anticipated in the Mahas District.

Tobacco.—Darfur Province.—295 kantars of tobacco were sold in El Fasher market during the month.

Garad.—Fung Province.—327 tons of garad were exported from Sennar River Siding during the month.

Charcoal.—Fung Province.—230 tons of charcoal were exported from Sennar River Siding during the month.

Livestock, Hides and Skins.

Berber Province.—1,315 sheep and goats and 150 cattle were sold in Damer market; of these 135 sheep and 38 goats respectively were exported. Average prices sheep LE.1.125 and cattle LE.4.485.

Darfur Province.—13 head of cattle, 4 sheep, 2 donkeys and 26 horses were imported from Wadai during the month.

Fung Province.—113 tons of skins were exported from Sennar River Siding during the month.

Halfa Province.—The following were exported from Halfa during April :—929 cattle, 4 goats, 2,598 sheep, 185 hides, and 2,245 skins.

Kassala Province.—30 head of cattle were exported from Kassala and 64 from Gedaref during May.

Red Sea Province.—12 head of cattle together with 4,059 skins passed through the quarantine. Prices in Tokar animal market continued to fall especially towards the end of the month. Prices of all animals are falling in particular that of camels.

Rainfall and Cultivation.

Berber Province.—A remarkable heavy rain of over 2 inches fell at Zeidab on the 14th. There was a fairly heavy shower at Atbara but only little at Zamar. On the same day a temperature of 119 degrees was recorded at Zeidab.

Blue Nile Province.—There were one or two showers of rain during the month.

Fung Province.—Rainfall during the month was as follows :—Singa, 5.85 mms. ; Roseires, 70.50 mms. ; Korkoj, 15.00 mms. ; Dinder, 10.00 mms.

Kassala Province.—2.7 mms. of rain fell at Kassala on the 27th.

Kordofan Province.—Rains fell in El Obeid and Eastern Districts towards the middle of the month and cultivation has been commenced in some parts of Um Ruaba and Rahad Districts.

Upper Nile Province.—The first rain fell at Malakal on April 12,

Digitized by Google

and very heavy rain 75 mm. on April 15 and 16. Total rainfall for April 95.3 mms. Renk rainfall totalled 45 mms.

Roads and Communications.

Bahr Ghazal Province.—Khor Toor has been opened and is proving very successful. It is hoped now that the Province will never again be dependent on the Shambe routes as a means of reaching and returning from the outer world. The Old Meshra channel has been blocked by stretching wire ropes across it and thus preventing the sudd from floating into Lake Ambadi and the Bahr El Ghazal River.

Nuba Mountains Province.—The Delami Rahad road is now opened having reached Abu Raida where it joins with the Rashad-Rahad road. It is not reported if the road is fit for wheeled traffic. The Talosi-Kadugli-Dilling-Obeid road is quite fit for light cars, and has been all the season. The well at Tekheim, on the new Kaka road, is producing an abundant supply of good water. Water has at last been reached in the well sunk at Habils, and is reported to be in large quantity and excellent quality. This well makes communication between Dilling and Delami and Rashad quite easy. Reports have been received from Delami that the Public Works Department are sinking a well in the station there. No details are given. A good brick and stone lined well is being sunk in Kadugli Suk. The Khor Affin bridge is making good progress.

Energetic measures have resulted in great improvement to the road in Raghad District. The road from Raghad to Rahad is now open to any form of traffic. The Raghad Kaka road will also be suitable for wheeled traffic. It is hoped that the Kaka Talodi road will be open to wheeled traffic early next year.

Upper Nile Province.—A good deal of crushed brick and gravel has been constructed through the centre of Malakal, 1,000 yards long, and a permanent bridge erected over the main drain. Sanitary works are proceeding satisfactorily.

Red Sea Province.—43 merchant ships of a net registered tonnage of 118,355 visited the Port during May.

ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud & Co., Smyrna, report as follows for the week ending July 22 :—

Sultanas.—The total estimated arrivals of new crop sultanas amounted to 40 bags, while the estimated sales total 30 bags.

Shipments.—The s.s. Edenhall has left for London with 380 boxes of sultanas on board.

Markets.—Some four tons new season's sultanas gathered from the immediate neighbourhood and somewhat prematurely dried, reached our market this week. The fruit was promptly bought up at the equivalent of 95s. c.i.f. London and shipped per s.s. Edenhall as above. No important supplies can be reckoned with until the middle of next month. Weather remains favourable. Gathering and drying of the grapes will commence about middle August in all the lower districts.

DRIED FRUIT REPORT.

Messrs. J. C. Houghton & Co., Liverpool, report as follows under date August 1 :—

Currants.—Operators seem disposed to ignore all influences of a bullish nature, for notwithstanding that stocks are very light and that duty paid clearances day by day are satisfactory, demand is still non-existent. No feature of importance has presented itself, and conditions generally are much the same as during June, market shewing no improvement. In Greece values are very firmly maintained and there is no likelihood of shipments being made before the new crop is ready for export. With exception of Pyrgos 52s. there is practically no quotable change in values. Sales comprise :—¼ cases Amalias and Patras (cleaned) 56s. to 58s. ; ¼ cases Patras and Gulf, 55s. to 56s. ; ¼ cases Vostizzà, 58s. to 64s. The bulk of the Fabian's cargo of about 650 tons was warehoused, holders being content to await the demand. Information is to hand from Greece of a scheme introduced by the Government to stabilise prices and fix a minimum at which currants will be allowed to be sold for export. Quotations are :—Pyrgos, 52s. ; Amalias, 54s. ; Patras, 55s, 56s. ; Zante, 54s., 57s. ; Gulf, 55s., 56s. ; Panariti, 58s., 60s. ; Vostizza, 58s., 64s.

Valencia Raisins.—A few parcels in very fresh condition recently arrived sold at 70s.

Australians Lexias realised 80s. to 85s.

Cape Raisins.—Holders here met buyers in the price, and business resulted. Bags 60s., boxes 65s.

Sultanas.—While some slight improvement is noticeable in the buying, there was no general expansion in the demand. Lower quotation for new crop is certainly the main factor, as the trade are carrying no stocks and very little remains in first hands. Buyers continue their cautious attitude, and with pressure to sell, prices have declined. Values range 100s. to 120s. Some sulphured varieties sold 100s., Cape fruit difficult to move 80s. to 115s. Australian three crowns sold 125s. California Soda bleached latest sales at 105s. shew a drop of 10s. per cwt. Afghan growths are neglected. Reds quoted 75s. to 80s. Yellow 90s. to 100s. New crop Smyrna sold 65s. to 66s., c.i.f. September, 63s. c.i.f. October shipment.

Figs.—Smyrna Naturals pressed for sale at 50s.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated July 31 :—

Season. July 24—Rainfall extended to Gujarat and North-West India. July 25—Monsoon weak in Peninsula and North-West India, but very active elsewhere. July 26—Strengthening in the Punjab but weakened in Central Provinces. July 27—Temporarily extended to North-West Frontier Province. July 28—Weakened in Gangetic Plain and Punjab but active in Rajputana and central parts of India. July 29—Temporarily extended to Punjab. July 30—Weak in Peninsula and vigorous in Lower Burma. Condition of Crops. July 28—Central Provinces—Prospects of cotton excellent ; rice and sesamum good. Punjab—Kharif crops have a promising outlook. United Provinces—Sugar cane and rice normal. July 31—Autumn rice, jute, tea, and prospects of winter rice and sugar cane normal.

Markets.—July 27—Bombay cotton market weaker. Fine M.G. Oomras Rs. 442 September. Rs. 425 December-January. Bombay cotton arrivals from September 1, 1921, to July 22, 1922 were 3,331,000 bales as compared with 2,685,000 bales during the same period of the last year. In Bombay imported piece-goods market, retail enquiries continue helpful and some demand in grays and whites. Fancy styles moving to a small extent. Local goods selling satisfactorily. July 29—Calcutta jute and gunny markets quiet but steady. Very little business passing. Hessians ready, 9 porters, Rs. 17.12 ; 11 porters, Rs. 24.12. B. Twills, Rs. 44. At tea sale on July 25 there were useful selections from all districts, and also there was good general demand. Market stronger for all classes. Few Darjeelings with flavour realised high prices. Common tea firm to 3 pies dearer. Medium and broken advanced ½ anna. Keen competition in leaf tea and demands from Persia and Bombay strong. 108,028 packages sold to date at an average price of 10 annas 8 pies per lb. Rangoon, July 25—Special Straits quality rice weakened to Rs. 460. Paddy holders still firm and preventing collapse. July 26—Further weakened to Rs. 442.8 for September. Paddy reported weaker. July 29—Market steadier. Quotations July, Rs. 460. September, Rs. 447.8. Paddy, Rs. 195. July 28—Market quiet. T.N. shellac Rs. 178. Bank rate unchanged.

The oil output of the Anglo-Egyptian Oilfields for the week ended July 28 amounted to :—Gemsah, 30 tons ; Hurghada, 2,421 tons.

Owing to pressure on our space we have had to hold over the Current Prices this week

COMMERCIAL BANK of GREECE, Ltd

(Limited Liability registered in Athens.)

TRADE CONDITIONS AT HAMAH.

Effects of New Tax.

The following extracts are taken from a report received by the Imperial Ottoman Bank from Hamah for the month of June :—

The price of wheat has again fallen. The kantar (256 kgs.) which stood at Ps. 600-700 early in June has fallen to Ps. 510-530. The price of barley is on the other hand maintained, the kantar being at present Ps. 300-315. 90 tons of barley and 70 tons of wheat have been exported to Beyrout and Tripoli.

Wool.—This market has purchased from nomad Bedouins a large quantity of sheep's wool, amounting approximately to 800 kantars. The price of this product is high. The rotol (2 kgs. 500) stood at the end of the previous month at Ps. 19. After having reached Ps. 23½ there has been a slight decline, and the present price is Ps. 22¾. The washing of the wool continues to be carried on in the Orontes, but the exportation of this commodity to Beyrout and Tripoli is less active. 30 tons have been exported to the former place and 22 tons to the latter.

The livestock trade constitutes one of the most important resources of this region. Our merchants have bought at Aleppo during the month 4-5,000 sheep, which have been consigned to Hamah in transit for Zahlé, Beyrout, and Tripoli. Apart from this transaction there have been brought into this district 7-8,000 sheep belonging to our own merchants, and which have been exported to the places above mentioned.

The trade of this district would have been more important during June if the Municipal Council and the Administrative Council had not promulgated a law imposing a tax on the entry into the town of cattle arriving from the desert or the country. That measure has resulted in a number of nomads of the "Aneze" tribe leaving our district, preferring to make for Aleppo where the tax does not exist rather than enter Hamah and have to pay to the Municipality this new tax on their camels, horses, mules, etc. This has considerably affected the trade of this town, which buys from these nomads butter and wool, and sells to them manufactured articles such as calicot and longcloth, and produce such as sugar, coffee, and rice, of which the Bedouins are very fond.

PERSIAN CROP PROSPECTS.

According to a report received by the Imperial Ottoman Bank from Hamadan dated June 10, the whole of the wheat and barley crops will be harvested in the course of a month or forty days. Irrigated crops are of excellent promise, but the *darim* (rain) crops have partially failed. Current bazaar prices are as follows :—wheat, 360 krans for 400 kilos as compared with 180 krans at this season last year, barley, 200 krans per 400 kilos, as compared with 120 krans at this season last year.

Prices are high owing to the insecurity of the roads and the partial failure of the *darim* crops. It is anticipated that with the re-opening of the Sultanabad road there will be a fall in prices.

A Kermanshah report dated June 17 states that the crops are all better than they were reputed to be at the commencement of the season.

British Consular Reports.

VIII. EGYPT.

The Cotton Crisis.

The following extracts are taken from the report of Mr. E. H. Mulock, British Commercial Agent for Egypt, on the economic and financial situation of Egypt for 1921-22 :—

A distinct change was brought about at the opening of the 1921-22 cotton season, when, as the result of a sudden and considerable demand from American spinners—alarmed by the unfavourable reports of the crop in the United States—spot prices rose from 35 tallari on September 2 to 56 tallari on September 30 and 57 tallari on October 7, while November contracts actually touched 63.10 tallari during the week ending October 8. Thereafter, owing to diminished demand from America, spot prices declined rapidly and closed at 40.50 tallari on December 30, 1921, which, however, compares very favourably with the price on the same date in 1920, viz., 31 tallari. The extent to which exports of cotton during 1921 were affected by the boom in September and October is seen from the fact that the last four months of that year accounted for more than half the total quantity and over 64 per cent. of the total value of cotton exported during the whole of 1921. The total quantity and value of cotton exported during the first three months of 1922 was 1,546,224 kantars (£E.9,613,606), as compared with 1,054,308 kantars (£E.4,757,996), for the same period in 1921.

Among many factors which react closely upon the price of cotton, the yield and acreage of the current season's crop and total eventual outturn are of vital importance. The final official estimate of the yield is not usually completed till about December 6, but, owing to a variety of circumstances which need not be enumerated, it can never be more than approximate. The estimate of 3,300,000 kantars for the 1921-22 crop appears to have been very much below the mark. The yield per acre (feddan), according to this estimate, only averaged 2.56 kantars for an acreage of 1,292,878 feddans, as compared with an average per feddan of 3.3 kantars for an acreage of 1,827,868, from which the estimated yield was 6,035,504 kantars in the case of the 1920-21 crop. The decline shown in the total acreage under cotton is, of course, the result of legislative restriction during 1921 to one-third of each man's holding ; but as, on the one hand, the 1920-21 acreage was the largest on record and abnormal, and as, on the other hand, restriction of cotton cultivation is affected by numerous applications for exemption therefrom, it is impossible to take the 1921-22 acreage as a criterion of what a restricted area under cotton should be. The result is that it is difficult to forecast the extent to which the restriction of cotton cultivation will affect the acreage under wheat, maize and other cereals, on which Egypt largely depends for her food supplies.

Lower Wheat Output.

The area under wheat in 1920-21, 1,435,000 feddans (a surprisingly large one considering that it was followed by a record cotton acreage), was estimated to produce a net crop of 900,000 tons, which, on the basis of 82.5 tons per 1,000 of a population of 13,387,000, was 200,000 tons short. This shortage was made good by imports of foreign flour under the aegis of the Department of Supplies, but the shortage proved to be more apparent than real, as the result of a decreased consumption of wheaten flour and a corresponding increase in the consumption of maize. By the time the 1921-22 wheat crop is harvested, all restrictions on imports of cereals and flour through commercial channels will have been removed, as the result of the final liquidation of Government stocks of flour, and it has, therefore, yet to be seen how this will affect Egyptian production and consumption of home-grown food supplies.

British Exporters' Uphill Fight.

As in most other countries, the year 1921 proved disastrous for many small tradesmen in Egypt, and has also hit the large retailers heavily, but owing to the substantial profits made by them during the war and in 1919 and 1920, the majority of the latter have succeeded in weathering the storm. As a result of keen foreign competition—particularly that of low currency countries—and the ridiculously low freights ruling on German and Belgian vessels, the United Kingdom exporter has had a very uphill fight, but from recent indications, even in spite of the diminution in Egypt's purchasing power, the outlook would appear somewhat brighter. The greatest difficulty to contend with has been the rapid fall of prices in the United Kingdom, and in Europe generally, which has encouraged Egyptian consignees to refuse to meet their obligations in the hope that prices will fall still lower, and this has been particularly noticeable in the textile trade. Thus the United Kingdom manufacturer is very much at the mercy of circumstances, as foreign competitors are offering goods at low prices, thereby compelling the British merchant to lower his proportionately. British quotations on the whole are far above those of other countries for all classes of goods, and it is not always the low currency countries which underquote British manufacturers in open tender. Owing to low freights ruling from Antwerp, and low cost of production, Belgian firms are invariably in a position to underquote United Kingdom exporters for all constructional steel work and for many types of machinery. However, in spite of adverse trade conditions during the year under review, it is encouraging to observe that the number of tenders submitted to the Egyptian Government by United Kingdom firms, whether successful or not, has increased very considerably. Technical experts are of opinion that, provided United Kingdom locomotive manufacturers can get down to low quotations, and that terms of delivery (a most important factor) are satisfactory, and spare parts supplied in adequate quantities, there is no reason why they should not secure future orders in competition with foreign firms, as it is admitted that the British article has generally proved itself to be superior in quality and durability to the productions of Germany and the United States.

Competition by Germany.

The efforts of German firms to regain their pre-war position in the Egyptian market call for some comment, particularly in regard to the methods employed in order to achieve the desired result. Messrs. Fried, Krupp have actually offered a credit to their agents, extending over a period of three years, and other German firms are allowing from six months' to two years' credit. Both German and Austrian firms are offering to complete at pre-war prices contracts which were made before the war and abandoned. The Egyptian State Railways have received delivery of a pre-war order from an Austrian firm on these terms, while an Egyptian firm exporting skins and hides to Germany in pre-war days, who claimed payment for a consignment sent before the war, received payment in kind in the form of sufficient electrical apparatus, aluminium wares, sewing machines, cutlery, etc., from a Dresden firm to stock two shops. The eagerness of local agents to secure German agencies is entirely to be attributed to the fact that such agencies are vastly more profitable than British ones. As an illustration of this, a recent consignment of aluminium plates arrived in Egypt from Germany, which, though the value declared at the Customs was only one millieme each, would be retailed at below current market prices at 15 milliemes each. Similarly, German table knives are imported at 4½ milliemes and retailed at 5 piastres, while the low prices asked for German safety razors and nail scissors make these lines more attractive to the buyer than British or American products. German cloth is now arriving in fairly large quantities and compares very favourably with Bradford goods in quality, and of course the price asked is low. During 1921 parcel mails from Germany were very heavy, particularly during the summer months, and it is a matter for comment that a large quantity of Italian parcels contained goods of German origin, with the result that certain Italian firms have made large profits.

Trade Mark Infringements.

The past year has seen an epidemic of infringements of trade marks, and in this respect German firms are by far the greatest offenders. German knives are being imported with the word " Sheffield " stamped on the blade, and German razors are on the market with " Guarantie Solingen " stamped in Latin characters near the handle, and " Real English " in Arabic letters in the middle of the blade. The imitation of the name of a well-known British razor has been effected by changing one letter in the name. These razors are for the most part dispatched from Italy by parcel post to small Egyptian and Levantine traders in the native quarters. Numbers of imitations of well-known American razor blades are being sold which are of very poor steel and blunted. These goods are made in Germany and packed in boxes of the same size as those from America and bearing a facsimile of the signature of the maker.

TOBACCO CULTIVATION IN EGYPT.

A correspondent, in giving us some extracts from the Egyptian Press, writes:—

Much attention continues to be given to the subject of tobacco cultivation, especially in the *Mokattam*. The Under-Secretary of State for Agriculture, Mohammed Pasha Abou'l Futooh, has inspected the experimental grounds at Damietta, Gizeh, and Embabeh, where trial is already being made with Turkish, American, and, Havana tobacco. Others are to be made in various areas in both Upper and Lower Egypt. Specialists will be invited to examine and report on the results. It is realised that all the conditions have to be fully considered, having regard to the large revenue derived from imported tobacco (*viz.*, over £6,000,000) and that the methods of curing will have to be learnt. The Government apparently desires to give very careful attention to the matter, if only on account of the wide-spread demand of the people that this branch of agriculture may be fully tested.

As regards sugar cultivation, the Government has entered into an agreement with the companies. These are to sell sugar at £35 the ton in Egypt, and to buy from the cultivators at 6 piastres the kantar. For the needs of Egypt 60,000 tons are to be kept in the country. The Government undertakes to prevent importation from abroad. The exportation of limited quantities will be allowed, but none can go to the Sudan. The agreement is much discussed and criticised in the papers. It is argued that these measures can only be temporary, and that if cheaper sugar can be imported the Government must facilitate competition in the interest of Egypt.

Much anxiety is felt regarding the cotton worm, the ravages of which have increased in several areas.

MACEDONIAN OIL CONCESSIONS.

In the House of Commons on August 2, Mr. Harmsworth (Under Secretary, Foreign Affairs) informed Lieutenant-Commander Kenworthy that the Anglo-Persian Oil Company had negotiated with the Greek Government the exclusive rights to drill for oil over the whole of Macedonia. The concession did not include the oil rights in Thrace. The frontiers of Eastern Thrace would be one of the subjects discussed in the general settlement of the Near East question, and his Majesty's Government afforded to the Anglo-Persian Oil Company in their negotiations with Greece the usual support given to British firms in negotiation with foreign Governments.

Lieutenant-Commander Kenworthy asked whether any concessions had been given in land that was in dispute between Greece and Turkey.

Mr. Harmsworth—My information is that no concessions have been discussed or arranged in connection with any part of Thrace.

RUSSIAN OIL.

In the House of Commons on August 2, Major Barnett asked the Prime Minister whether in view of the statement that a monopoly concession over the Russian oilfields was about to be granted to a single oil group, he would take steps to discountenance any attempt on the part of a British firm or company to acquire such a concession over oil lands in Russia or Azerbaijan formerly held either by a foreigner or by a British national, except in cases where the consent of such previous owner had been first obtained.

Mr. Chamberlain: I have no information about the proposed concession of an oil monopoly. The attitude of His Majesty's Government on the matter raised in the second part of the question is covered by the terms of the resolution passed at The Hague on July 20, and contained in the last section of Command Paper No. 1,724.

It is stated that the Prague sugar exchange will probably be opened early in September and that the industry will be relieved from all Government control from October 1 next.

A company for making varnish is being started at Prague with a capital of five million crowns.

ADEN'S MARKET FOR STATIONERY.

The market for stationery in Aden is steadily increasing, says the American Consul at Aden, Mr. C. M. P. Cross, in a recent report. At present it is supplied principally by Great Britain, India, Italy, and Austria. The city of Aden is the principal market for stationery in this district. The requirements of the rest of the district are supplied through the Aden merchants.

Imports of stationery into Aden amounted to £22,768 in 1919-20, and £22,927 in 1920-21, compared with only £3,595 in 1913-14. The figures for 1921-22 will probably show a still further increase. The principal reason for this increase is believed to be the greater attention being paid to education. The local government purchases a large part of its stationery requirements locally. There is also a steady demand from the large commercial houses located in Aden, and the general population requires a limited amount of stationery.

BEER BREWING IN CZECHO-SLOVAKIA.

In the year 1918-1919, 566 breweries were in existence in Czecho-Slovakia, with a total production of 3,512,217 hectolitres, amounting to approximately 33.1 litres of beer per head. For 1919-1920 there were 585 breweries with an output of 5,709,294 hectolitres, with 533 litres per head.

As regards producing capacity the breweries may be classified as follows:—442 breweries with an annual capacity of 1,000 to 10,000 hectolitres produced 1,380,239 hectolitres of beer (24.3 per cent of the total), and 143 breweries with a capacity from 10,000 to over 100,000 hectolitres produced 4,323,055 hectolitres of beer (75.7 per cent. of the total).

NEW ENTERPRISES IN PALESTINE.

The Colonial Office issues the following: The first attempt to start the salt industry in Palestine is being made by the "Athlit Salt Enterprise," which has been formed with a capital of £E 4,000. The company has obtained a lease of the marshy land near Athlit from the Jewish Colonisation Association, and if the venture succeeds one of its direct results may be the conversion of the malarial swamps into a healthy zone. Another company, with a capital of £E.100,000, has been incorporated under the name of the Central Bank of Co-operative Institutions in Palestine, Ltd., for the purpose of financing co-operative credit unions and other co-operative undertakings.

BRITISH INDUSTRIES FAIR.

The Birmingham Section of the next British Industries Fair will be held at Castle Bromwich Aerodrome from February 19 to March 2, 1923, and the prospectus which has just been issued invites applications for space from intending exhibitors. In response to many requests, the Council have considerably widened the schedule of the fair and have added new sections for plant used in agriculture, mining, brewing and distilling, building and decoration. The engineering, metals, and hardware sections have also been extended.

NEW ADVERTISEMENTS.

On page 170 will be found an advertisement of Messrs. Dalton, Vase & Co., Import Merchants of Basrah, Mesopotamia, The principal of this firm, Mr. H. Vase, is on a visit to this country and is shortly returning to Mesopotamia. We understand that this firm would welcome good agencies in any of the lines detailed in their advertisement. Mr. Vase's address in London is 6, Coleman Street, E.C.2.

On page 184 will be found an advertisement for the Mackenzie Motor Cycle, a strongly built and remarkably handy light weight machine at a price that makes motor cycling possible to many thousands who would otherwise have to forego the pleasure. This Motor Cycle has successfully passed many stiff hill climbing tests and has been received with acclamation by motor cyclists in this country. The principal of the firm, Mr. Mackenzie, we understand, is shortly proceeding to India with the object of arranging for the sale of the machines in that country and there is little doubt that there will be a rush to secure the agencies

NOTES OF THE WEEK.

The Premier's Oratory.

The effects of the remarkable speech on the Near Eastern situation which Mr. Lloyd George saw fit to deliver just before the rising of Parliament still continue to make themselves felt. His perfervid oratory was, naturally, very much to the liking of the Greeks, and some of its most glowing passages were published in an Order of the Day to King Constantine's troops. Moreover, a mass meeting at Athens, held to express the gratitude and pride inspired in the Hellenes by the speech of "the great British Prime Minister" must have exhausted the supply of such adjectives as "great," "profound," "lofty," and so forth, in its attempt to embody its feelings in a resolution worthy of the occasion. Elsewhere, however, the feelings of surprise and anger to which the speech gave rise have by no means altered with the passing of time; and however popular it may have made Mr. Lloyd George in Athens, it certainly has not increased his popularity in this country, where the desire to see foreign affairs handled by the Foreign Office grows stronger day by day.

"False Drawing."

Other people besides the Prime Minister recognize the good qualities of the Greeks; admire what they have achieved under difficulties, as the result of the great efforts they have made, inspired by their fiery patriotism; and regret that they should have been placed in a false and untenable position largely by the monkey-and-catspaw policy of the Allies. But other people appear better able than Mr. Lloyd George to see Near Eastern affairs—at any rate—in true perspective, and recognize that it is as unfair to represent one side as angelic as it is to represent the other side as diabolic. Indeed, Mr. Lloyd George so entirely overdid both the lights and the shades in his picture that he has defeated the end which he appeared to have in view, and has set people asking what reason can have induced him to speak as he did. The fact that he was asked in the Commons whether he would give the House an assurance that the Government would take measures to prevent the Greeks from occupying Constantinople while Parliament was in recess, was significant; and that he should have given the assurance desired is a relief to sober-minded Britons.

Turkish Defence.

According to Constantinople telegrams, the Porte is expected to ask the Allies' permission to increase its forces in the capital to two infantry divisions. In view of the latest developments, such a request could not be regarded as unreasonable, and the fact that an officer of experience and with a very good reputation is indicated as the probable commander of the force, if raised, is another point in favour of the Allies' granting it. The chief obstacle would doubtless be the embarrassed financial position of the Constantinople Government, which can ill afford luxuries, or even necessities, of the kind. Yet it cannot be denied that many other nations, situated similarly to Turkey in this respect, are spending more than they can afford on armaments, and, in some cases at least, with less excuse. The Sultan's Government does in fact, as we have pointed out before, deserve well of the Allies, and if the latter can see their way to granting its request—if and when made—and, perhaps, to facilitating the carrying-out of the proposal, it would in the long run probably work out to their own benefit.

Little Entente Differences.

The Belgrade correspondent of the *Morning Post* reports that a serious disagreement has arisen between Yugoslavia and Czecho-Slovakia over the question of the representation of the Little Entente at the Council of the League of Nations. It had been arranged that each State in turn should appoint a representative for a year, but who should make the first appointment had been left undecided. Yugoslavia claimed the privilege, on the ground that all the questions on the present agenda concerning the Little Entente were Yugoslav; while Dr. Benesh held that Czecho-Slovakia, as the strongest Power of the Little Entente, should have the right. Feeling has run high on the matter in Belgrade, where hard things have been said of Dr. Benesh and of Czecho-Slovakia, who are represented as relying largely on the Yugoslav army, and as wishing to "manipulate" it. It is to be hoped that the incident will have been satisfactorily closed before these lines appear, but it does not augur well for the durability of the Little Entente.

Egyptian Crisis Averted.

Not long ago it was rumoured that there was some friction between King Fuad and the Adly Cabinet. After the Bairam festival it was reported that the trouble had been surmounted and that all was well; but last week it broke out again, rather acutely, and, for a short time it looked as if there must be a Cabinet crisis. The cause of the renewed trouble was the appearance of an article in the *Ahram* which King Fuad

Digitized by Google

thought was directed against himself, and which led him to request the Cabinet to suppress the journal in question. The Cabinet, however, felt that His Majesty was reading the article wrongly, and that in any case such strong action was not called for; and tension became acute. Happily the latest telegrams inform us that the crisis has been settled. With Egypt in such a politically nervy state as it is at present, it would certainly be advisable to avoid any changes in the Government, which, though it has made its blunders, and disappointed some of the hopes that were placed on it, has acquitted itself not ill upon the whole.

The "Wafd" Trial.

After an unsuccessful attempt on the part of the defendants, or their friends, to secure a postponement, in order to bring out English counsel, the trial of the arrested members of the Wafd was begun in Cairo on August 9. The defendants followed the line of conduct expected of them: they denied the competence of the Court to try them, and declined to defend themselves. At the conclusion of the evidence for the prosecution, however, they, through one of their members, made a statement. This proved to be of some importance, inasmuch as it protested that the Wafd has been always loyal to the Throne, that it has "always deprecated crime and condemned violence," and that it has never "fought the Government of our country." It also implied, though perhaps it did not admit directly, that Egypt is now independent—a fact which will doubtless be borne in mind by the Moderates in the future. After an able, and perfectly impartial, summing-up by the Deputy Judge Advocate General, the trial finished on the second day, and the advertisement that would have been secured to the prisoners by long-drawn out proceedings was thus denied them. The sentences were promulgated on Monday, each of the prisoners being condemned to seven years' hard labour and a fine of £E.5,000. This firm action should have a steadying effect upon the Egyptians as a whole.

Another Outrage in Cairo.

Another anti-British outrage has to be added to the long list of such things perpetrated in Cairo. Last Saturday evening, Mr. Thomas Brown, of the Ministry of Agriculture, was driving with his son, a European maid, and his *syce*, to the Central Station, when he was fired at by a group of Egyptians, some in European, the others in native dress. All the occupants of the carriage were hit, and the *syce* was killed; but Mr. Brown succeeded in getting away from the would-be assassins, and was able to report the attack at the nearest *mudirieh*. It is satisfactory to know that four arrests were made within a few hours of the outrage, and that there is a prospect of some of the assailants at least having to pay the penalty for their crime. Opinion in this country is strongly moved by this outrage, coming so close upon Lord Allenby's recent letter to Sarwat Pasha, and unless the Egyptian Government very quickly gives proof of both its will and its ability to make this the last of this series of anti-British crimes, it will probably find the consequences very serious. It is argued here that if Egypt is fit for independence, it must be able to prevent such things occurring in its capital.

Sudan Irrigation.

Sir Lee Stack, who has been in London, negotiating for the further financial support for Sudan irrigation works that has been rendered necessary by the War, has returned to Egypt on his way to the Sudan. He has been staying with Lord Allenby at the Residency in Alexandria, and it is undertood in that city that it will be possible to resume work on the Blue Nile dam in the autumn. It is unfortunate indeed that the disturbed conditions brought about by the War should have added so greatly to the cost of the irrigation works in the Sudan; for the possibilities, especially in the direction of cotton-growing, appear to be very great, and the more rapidly the work can be completed the better it will be both for the Sudan and for this country. Egyptian fears that the southern land may take off so much water as to affect Egypt's supply are, though not unnatural, quite unwarranted, according to some of the greatest authorities; and in any case, it is quite certain that the schemes now in course of development can do no harm at all to Egypt.

A Minor Persian Problem.

There is no news yet of any further advance of the Persian Government forces against Ismail Agha Simko, the Kurdish chief who has been setting at defiance the authority of Teheran. According to one report the Sardar Sipah has sent very considerable reinforcements of Teheran Cossacks to Azerbaijan, but owing to lack of rail transport only about ten per cent. of them arrive on the scene of action in a condition to fight. With such odds against him, it is obvious that the Minister for War is like to find Simko a very tough nut to crack. It is even possible that it may prove easier to tame the Kurdish chieftain by removing the grounds of his complaints against the Government than by force. Simko, we understand, revolted because he perceived that Teheran did nothing for his part of the country except send it governors and lesser officials who bled the people for their own profit. If it can be demonstrated to him that a change has been effected in this direction, he may throw in his lot with the Government, when he would probably prove a very useful adherent. On the other hand, a fight to the bitter end between him and the Sardar Sipah must almost certainly prove a very big strain on the Government finances and a serious drain upon the by no means limitless supply of Cossacks.

Burma's New Governor.

The selection of Sir Harcourt Butler as Governor of Burma strikes us as judicious. He has already ruled provinces for eight or nine years, but he has plenty of energy left, while he was popular in Burma five years ago, and consequently starts with many advantages in the undoubtedly arduous task of bringing the new Constitution into working order. His departure from the United Provinces will be a blow to the great landholders, who have regarded him, not altogether correctly, as a thorough-going champion of their interests, and who have been conducting a vigorous agitation of late to secure an extension of his term of office; but for that very reason the change will be welcomed widely in Lucknow and Allahabad, where politicians are being grouped by force of circumstances into parties on agrarian lines, and where middle opinion is hoping that the next Governor will be able to stand above parties, and, perhaps, to mould a fruitful economic policy out of the now discordant elements.

The Indian Worker.

Some publications which have reached us since last we wrote of the problems of Indian Labour bring out very clearly the magnitude of the evil of absenteeism,

Digitized by Google

the rock on which industrial development is perhaps most likely to be wrecked. Writing in the *Journal of Indian Industries and Labour*, the Principal of the Calcutta School of Art tells us that, when he was decorating the city for the Prince's visit, about one-fourth of the workmen employed were absent on the average of the whole period, and he describes this as the usual state of affairs in Calcutta. Again in the *Bombay Labour Gazette* we read of the effects of raising wages in a large factory in the Central Provinces. When wages were rather low, absenteeism ranged about eight per cent. of the nominal strength ; when wages were raised by one-half, the percentage increased to 17, and when a bonus was added the figure rose to 22, thus coming into line with Calcutta, where wages are normally high. To practical men such figures tell their own story, but even without actual experience it is easy to understand that, if output decreases as wages rise, the doom of industry is in sight.

The Past and the Future.

An Indian worker, if he knew the story of the past, might put the case somewhat as follows:—"In the good old days, when our ancestors worked hard, they worked under the cudgel or the whip : if they earned more than their food, the surplus was promptly taken from them, and they learned the lesson that happiness lay in working just hard enough to save their skins. But nowadays our employers are not allowed to use the lash, though some of them might like to do so, and when our wages fill our stomachs, that is enough for us." That story is substantially true, and, though the ordinary worker may not know it, the truth is part of his unconscious self. It is quite futile to blame him for being what the past has made him, and what is now needed is to teach him that a wider, and also a happier, life is at last within his reach. He has a chance such as his ancestors never had ; if he will seize the opportunity, he can solve the problem of India's national poverty, and enjoy himself in doing so ; and the task of welfare-workers is to enable him to grasp that fact.

THE WEEK AT HOME.

London, Monday Evening.

Holidays and Floods.

Last week was the chief holiday week of the year. It was therefore quite fitting that our climate should celebrate the occasion by the total disappearance of the sun behind heavy clouds, cold weather which even succeeded in registering frost at Greenwich, and a hurricane of rain which crossed from respectable Bournemouth in the south through the Midlands, which it flooded, and to Nottingham and Sheffield, which were nearly drowned. Great damage was done to crops and fruit, and a certain amount of furniture in private houses learned the art of swimming.

More rain is prophesied, and this summer, so far from imitating the great drought of 1921, appears to be rivalling the wretched performances of the year before, when it rained steadily from July to the end of September, and then, when everybody was safely home again, produced a gloriously warm October and November. Only the doctors, I understand, are happy : the cool summer and the rain is very healthy, particularly for infantile complaints, and the ordinary summer diseases of the towns have taken a very light toll this year.

The International Conference.

The Conference of Prime Ministers in Downing Street seems to have added to the gloom caused by the weather. We have heard of differences of opinion, and even of crises, from day to day ; but the *communiqués* have been reticent even to the point of nudity, and the diplomatic correspondents of the newspapers have been driven to make bricks without straw. So far as one can see the wood for the trees, however, the essential situation appears to be unchanged. The French Government under M. Poincaré in effect stand by the Treaty of Versailles and its subsequent interpretations ; Mr. Lloyd George would prefer an accommodation which would reduce or cancel some of the debt, fix a definite sum which Germany both could and would have to pay, and drop the threat of territorial occupation. Italy on the whole agrees with the British attitude ; Belgium is doing her best to reduce the friendly but apparently fundamental divergence of French and British policy by suggesting a formula for a reasonable compromise.

On the outcome of these discussions depends the orientation of British foreign policy during the next year or two. There is obviously no desire to break with France. But Downing Street certainly cannot go the whole way with the Quai D'Osray ; and on the whole it comes to this: that Britain does not wish to see Germany permanently smashed and broken, an utterly ruined State like Austria ; whereas France would envisage that prospect with a certain complacency. Whether it is possible, as is sometimes suggested, to carry out the French policy to the full is rather doubtful ; at least I think some of our propagandists harm their own cause by so continually harping on the possibility of Germany going Bolshevist. The alternative to the Republic is, I take it, a restoration of a monarchy, not a plunge into the follies of Moscow.

But opinions on this subject of the future of Europe and of British foreign policy are sharply divided. It is interesting to note that since Lord Northcliffe's guiding hand was withdrawn from his newspapers a few weeks ago, their policy has diverged—*The Times* swinging round towards accommodation and cancellation of debt, the *Daily Mail* continuing to "search their pockets" attitude.. The difference is that between the more and the less instructed section of public opinion, but the Government has to take note of both.

Ireland.

It was announced on Saturday morning that Cork had fallen to the Free State troops, and this means presumably that the Republicans will have to take to the hills for the guerilla warfare which they contemplate as a last resource. At the same time there are rumours, and something more than rumours, of renewed troubles in Dublin, and some observers who are not professional pessimists are inclined to think that the trouble in the towns is by no means over.

In all this southern campaign which has involved the capture of Limerick, Waterford and Cork, heavy fighting has been recorded, but the actual loss of life appears to

have been negligible. although the destruction to property by the Republicans was heavy. Some of the correspondents have been speculating as to the effect which the triumph of the Free State over the enemies of its own household will have on the Ulster Government' attitude, but I doubt whether the time has yet come for these discussions. The actual situation in Ireland is obscured by the existence of a censorship.

Sea versus Air.

The aeroplane *versus* battleship controversy, to which I referred some time ago, waxes fast and furious. Sir Percy Scott, who is a bonny fighter, has annoyed the defenders of the capital ship by inventing an imaginary Old Woman asking: "In the event of war with a European country, where could we hide the two battleships that it is proposed to build?" Sir Percy says that nobody can give him an answer, and "the Old Woman is consequently fretting and unable to get on with her knitting."

But the other side have countered to some extent by an American official report issued last year at Washington which lays down quite definitely that "the battleship is still the backbone of the Fleet, and the bulwark of the nation's sea defence, and will so remain so long as the safe navigation of the sea for purposes of trade or transportation is vital to success in war. The airplane, like the submarine destroyer, and mine, has added to the dangers to which battleships are exposed, but has not made the battleship obsolete. The battleship still remains the greatest factor of naval strength." Sir Percy will probably reply that this is mere Admiralty doctrine, and that the American Admiralty is as antiquated in its opinions as the British variety in Whitehall.

Meanwhile there is no doubt that civil flying is slowly increasing in popularity, and it is understood that the Government are taking some preliminary steps to strengthen our air defences, which were perhaps rather excessively reduced.

Mr. Chesterton's Conversion.

The announcement that Mr. G. K. Chesterton has been received into the Roman Catholic Church was not very surprising. His affection for the Catholic and mediaeval aspects of life, and his glorification of what Dean Inge has called "irrationalism" has long seemed to indicate that in his case the road from Beasconfield to Canterbury would eventually lead to Rome. His long association with Mr. Belloc may also have influenced him. I suppose the extreme school of Protestants will growl a little, and swear that they will no longer buy his books. But I doubt whether the Kensitites were ever quite comfortable when reading "Father Brown."

Newspaper Insurance.

I gather that some doubts are being expressed in Fleet Street as to the sanity of the fashion for insuring readers of the big dailies, which seems to have passed all bounds during the past few weeks—the *Daily News* even issuing a pluvius policy against spoiled holidays. Something more than doubt as to the wisdom of this method of stabilising and enlarging a circulation is expressed also by the officials of the big insurance companies, who calculate that the game is not worth the candle from the newspaper point of view, and involves them in too great a risk of loss and too heavy a charge. Probably, however, this experiment, which has now become both ridiculous and extravagant, will not last many months longer.

The Week's Books.

The critics all tell me I should read Benedetto Croce; the fact that I tried to, and failed to find anything particular in his work, is therefore no doubt due to my limitations, not those of Croce, who is becoming a vogue which will last a little while and die, like all other vogues. After this preface I may mention his book on "The Poetry of Dante" (Allen and Unwin) of which a translation has just been published. To judge by some of the reviews, it is rather better than Dante at his best; but there is such a thing as exaggeration, and I have noticed that critics always think that other critics are greater figures in literature than really original writers. I suppose it is one of the minor diseases of egotism.

"A Geography of Imperial Defence" (Sifton Praed) by Vaughan Cornish, frankly denies Mr. H. G. Wells' pleasant prophecy that the "war ended war," and discusses at length and with real knowledge the problems of Empire strategy at the present day, and their relation to a possible Russo-German combination against the British Empire. It is a stimulating and uncomfortable work.

"Amid Snowy Wastes" (Cassels) by Seton Gordon is an account of wild life on the Spitzbergen archipelago. The author was photographer to the Oxford University expedition to the islands last summer, and his book describes his adventures and observations.

"The Outsider" (Constable) by Maurice Samue', is a novel of post-war Paris, It is a brilliant and pathetic study that holds one from the beginning to the end, and the not wuite conventional lady who is its heroine is a charming character.

OCELLUS.

TOPICS IN PARLIAMENT.

The subject headings are those given in the Official Report.

Egypt: British Officials (Compensation); Election and Arrests.—Near Eastern Question; Greece and Constantinople.—India (Lascars).—(Monday, 31st July.)

India: Press Propaganda; Civil Disobedience; Rupee (Exchange Value).—Ceylon (Constitution).—(Tuesday, 1st August.)

Near East: Oil Concessions; St. Sophia, Constantinople.—Middle East (Colonel T. E. Lawrence).—Palestine (Imprisonment, Acre).—Prisoners, Andaman Islands (Newspaper Article).—(Wednesday, 2nd August.)

Egypt: Election; British Policy.—Greece and Turkey.—Enver Pasha.—India: Post Office Staff; Military Police Officers, Burma; Leper Act.—Egypt: Delegation (Manifesto); Government Officials (Compensation); Zaghloul Pasha.—(Thursday, 3rd August.)

Morocco.—India (Postmaster-General).—Near East (Atrocities.)—Sudan.—Bulgaria (Treaty Obligations).—Near East.—(Friday, 4th August.)

ANGLO-CATHOLICS AND THE EASTERN COMMUNION.

It is stated by the Secretary of the English Church Union that their efforts to obtain signatures to the Declaration of Faith and Doctrine drawn up by them for presentation to the Holy Synod of the Eastern Orthodox Church of Constantinople have been "singularly successful." Some little time, the Rev. Arnold Pinchard adds, must elapse, and "certain preliminary and semi-official negotiations be concluded satisfactorily," before the Declaration can be presented.

The Government of India reassembles at Delhi on October 30.

An earhtquake shock was felt on August 9 at Methana (eastern coast of Peloponesus). This shock was slightly felt at Athens.

At a mass meetingin Athens on August 9 a resolution of thanks to Mr. Lloyd George for his speech on August 4 was passed, and an enthusiastic demonstration was made outside the British Legation.

THE NEAR AND MIDDLE EAST.

From Our Own Correspondents.

EGYPT.

Cairo, August 2.

The Political Situation.

Following on the arrest of the signatories of the seditious manifesto reported last week the military authorities have carried out a search of their houses and that of Zaghloul Pasha, which hitherto has been exempted by common consent from such examination. Simultaneously the Cabinet ordered the suppression of *La Liberté*, the principal Zaghloulist organ edited in French, which for some time now has been carrying on a campaign against the present régime of a nature calculated to foment disaffection and disturbance of the public peace. None of these measures has given rise to any demonstrations or other manifestations of public feeling such as would have taken place a year ago; which amply shows that the country as a whole is in a far more rational frame of mind to-day.

With regard to the manifesto incident, while the action taken by the military authorities is regarded in responsible Egyptian circles as being fully justified by the nature of the offence, they are somehwat exercised at the importance which there seems to be a tendency in the foreign press to assign to the persons implicated, as they fear that this may serve as an encouragement to other "limelight candidates." They point out, that the manifesto was issued by the signatories as the mouthpiece of Zaghloul Pasha, who, at his worst, would never have been guilty of such an enormity, but that in reality none of those arrested has any real personal influence in the country. They hold no mandate whatsoever to represent in any way the nation; and they have in fact arrogated to themselves the position of leaders which no one, not even Zaghloul's supporters, recognises. Their activities have on all sides throughout aroused much amused interest, and at times have been turned to ridicule, particularly in the case of the erstwhile companion of Zaghloul at Malta, "qui change d'opinion comme il change de chemise," and who now finds himself on the wrong side of the fence.

The measure of the real position these seven men hold in the eyes of the country is the absolute tranquillity which has followed their arrest and the fact that apart from the curiously misguided articles in certain vernacular papers, which have argued about the principle involved in the arrest rather than the nature of the offence committed, no word has been raised anywhere, even in private conversations, in educated Egyptian circles in their personal defence.

The Ex-Khedive.

An important and interesting step has been taken by the Egyptian Government in the issue of a decree dealing with the property owned in Egypt by the ex-Khedive and with his political rights. It may be explained that when the Protectorate was proclaimed over Egypt and Abbas Hilmy Pasha was declared to have forfeited the Throne the various properties he owned were sequestrated by the military authorities and entrusted to the Public Custodian. The decree now issued regularises all the measures taken by the military authorities in connection with the administration and liquidation of the ex-Khedive's property. It declares the Egyptian Courts to be incompetent to deal with any action brought by Abbas Hilmy Pasha or other parties in regard to this property. If forbids him to land on Egyptian soil, and warns him that if he does so, the executive authorities will expel him. It declares that he has no longer any political rights in the country and forbids him to acquire or administer any movable or immovable property except what he had already inherited, or to administer any Wakf or trusteeship. It announces the creation of a special Administration to deal with the estate administered hitherto by the Public Custodian, the proceeds of the liquidation of which are to be placed to the credit of Abbas Hilmy Pasha; and it declares that all other property will be confiscated by the Egyptian Government.

This decision of the Egyptian Government should put an end to the vexatious claims made against it in virtue of the Wakf which Abbas Hilmy Pasha constituted in Constantinople on the eve of the outbreak of war with Turkey, and it should go a long way to render ineffective the propaganda which he has been latterly carrying on in this country. By agreement with the British Government the balance remaining over from the liquidation of his property after payment of the mortgages and other debts is to be paid over to Abbas Hilmy Pasha. The amount available is stated to be about L.E. 750,000, which does not take into account various sums already paid to him.

This from the ex-Khedive's point of view is an immensely satisfactory solution, and he ought to be very grateful to the British Government for having taken over his affairs. Abbas Hilmy Pasha was reputed to be a shrewd business man and engaged in enterprises which should have proved very remunerative. But in order to carry out the intrigues without which life to him was not worth living he surrounded himself by a coterie of unscrupulous men who bled him to such an extent that none of his properties brought him any return worth speaking of. It is indeed no secret that if the War had not broken out the financial establishments which had advanced him substantial amounts would have intervened and taken over his properties. As it is, thanks to the War, which necessitated British administration of his affairs, all his debts have now been paid off and a sum not far short of a million sterling has accrued to him. Abbas Hilmy Pasha still owns considerable property in Anatolia. Before the War his estate there was to a great extent a white elephant, but the economic

developments which are likely to take place in Asia Minor will probably make that venture a very profitable one.

The Tripoli Frontier.

His Excellency Ibrahim Fathy Pasha, Minister of War, has left on a tour of the Western frontier district, in the course of which he will visit Mersa-Matruh, Sollum and the oases of Jerabub and Siwa. This trip is, however, more than a mere routine visit of inspection. Next autumn negotiations will start between the Italian and the Egyptian Governments in regard to the delimitation of the Western frontier of Egypt, which of course adjoins the Italian zone of Tripoli; and Fathy Pasha, who will be the principal Egyptian representative on the Delimitation Commission, proposes beforehand to investigate the situation on the spot and report to the Cabinet, so that the latter may be prepared for the negotiations.

As a matter of fact I have reason to believe that very little difficulty will be experienced in coming to an agreement. Italy is very keen on retaining within her zone Jerabub, the oasis where the Senussi have their headquarters, while Egypt desires to retain the port of Sollum and a strip of territory to the East. On these two points there is, I understand, agreement in principle, and as the rest of the frontier would run through the desert, the negotiations should not take long and the work of the Delimitation Commission should not be very difficult.

The negotiations between Italy and Egypt will of course deal with that part of the frontier which will run between Tripoli and this country, but there is a portion which will be contiguous to the Western frontier of the Anglo-Egyptian Sudan, and in regard to that portion the negotiations will be tripartite, in that Great Britain will participate. But there again, as the area in question is desert, little difficulty should be experienced in arriving at a final agreement.

ROUMANIA.

Bucharest, July 31.

A New Capital?

During the present uneventful period of political slackness—due to the summer vacation—the Press is again indulging in controversies regarding the choice of another town in lieu of Bucharest as the capital of Greater Roumania. This idea has sprung up ever since the union of the sister provinces to the mother country. In the minds of some, Bucharest no longer suffices as the capital of such an enlarged territory. These critics charge Bucharest with many shortcomings and failings, and maintain that, in consideration of the cost of rebuilding and improving the greater part of the town, it would be just as easy to build an entirely new town according to modern demands. The detractors of Bucharest find it too distant from the rest of the enlarged country—which they consider politically detrimental; and as to its strategical position, find it ill-placed, in the middle of a big plain without any natural means of defence. The water supply, too, is considered inadequate for the ever-increasing number of inhabitants. The surrounding country is decried as not being sufficiently attractive, and furthermore the capital is not sheltered from the inclemency of the Siberian winds during the winter.

The supporters of the change have discovered as their ideal the cosy little town of Fagarash, which is ensconced in the Carpathian mountains, has a large river with clear water running through it, is endowed by nature with picturesque surroundings, and is happily sheltered by the mountains, both climatically and strategically. Its construction as, and elevation to the rank of, the capital of the Kingdom would entail a considerably smaller amount than that required for the improvement of Bucharest, it is contended, the main building-materials —stone and timber—being at hand.

However, the whole scheme must be looked upon as an idealistic dream impossible of realisation except at a tremendous cost and in a very distant future, apart from the difficulties of moving the State Administrations and Royal residence.

It must be mentioned, in fairness to Bucharest that enormous strides are meanwhile being made with the embellishment of the town by the erection of a great number of attractive and modern buildings. The number of the inhabitants is about 800,000 at present, as compared with half this number before the War. The scarcity of housing is acute. The rents for newly constructed houses are fabulous, but it is this very circumstance that has stimulated building on a vast scale. It is computed that during the present building season about 1,600 houses are under construction. These new edifices will provide about 50,000 people with accomodation, and should building continue at this rate for the next four or five years, the housing question will have found its own solution.

The Government and the Minorities Question.

Despite the fact that the Bulgarian Government and Press are not satisfied with the decision of the Council of the League of Nations on the *Komitaji* question, it is not without interest to reproduce the opinion of the Bulgarian Press on the attitude adopted by the Roumanian Government towards the Bulgarian Minority in Roumania.

The following is an extract from the newspaper *Den*, the mouthpiece of M. Daneff, the leader of the Progressive Party, in an article on July 7:—

> "Of all the Balkan States, Roumania is the only one which conceives the Minorities question in a clear way and evinces a certain goodwill in the application of this clause. In the other States, Serbia and Greece, they do not wish even to hear mentioned the application of obligations under the Peace Treaty. Up to the present, Roumania alone has permitted the opening of Bulgarian schools."

The Roumanian Ministry of Foreign Affairs hastened to acknowledge the accuracy of this statement concerning Roumania, and issued a *communiqué* to the Press accordingly.

Digitized by Google

It is interesting at this juncture to record the *rapprochement*, which is noticeable of late, on the part of the Magyar element of Transylvania with Roumanian circles. As an instance, the recent visit of a delegation of Magyar journalists from Transylvania may be cited; they paid a visit to their Roumanian colleagues, with the object of organising a Press congress to be held in Bucharest in September.

This meeting was of a most cordial nature all through. On arriving home, the Magyar delegation in their Press eulogized their Bucharest *confrères* for the spirit of comradeship shown them—which was devoid of any consideration of tongue or nationality.

General News.

The Roumanian Coronation ceremony will in all probability be postponed until next May 10, owing to the impossibility of finishing the work at Alba Julia in this connection sooner.

For about a week we have had here Mr. Alfred E. Zimmern, Professor of Political Science and Sociology at New College, Oxford. The object of his visit is to ascertain the efforts that are being made towards the reorganization and reconstruction of the country.

YUGOSLAVIA.

Heat and Politics. *Belgrade, August 3.*

The great heat is weighing terribly on everybody and everything in Belgrade. The Skupshtina is still sitting, and must do so until the Budget of the War Ministry is fixed. The House will then adjourn for three or four weeks.

The Minister of War has complained that he has no means to prepare the Army for the defence of the nation since the Committee of Control have cut his estimates far below the limit of safety. In his statement he said that the quality of the Army is very high but its technical equipment is very poor. Most of the money he had asked for he intended to spend on refitting the troops, which if left with their present equipment, will be of very little use in providing the safety of the frontiers. An appeal of the Roman Catholic members of the House to exempt Catholic students in religious colleges from service with the colours was rejected on the ground that the students of the other religions are serving in the Army, and that everybody should be proud of being a member of it.

The Loan Bill, after very severe attacks by the Opposition, was passed by a majority of 62. However, no wonderful improvement in the exchanges has taken place yet. Moreover, the dinar declined during the last week and is still showing a downward tendency. This may be due to the artificial pressure exercised by the Banks, but in any case the expected improvement in the exchanges, should it take place at all, will be due more to the harvest than to the benefits of the Loan.

The Differences with Bulgaria.

The Yugoslav delegation which went to London at the request of the Council of the League of Nations is now back in Belgrade. A member of the Delegation stated to local pressmen that the delegates are quite pleased with the results of the Conference. The atmosphere has been cleared of the insinuations that the Yugoslavs are preparing for aggressive action against Bulgaria. The Belgrade Government is taking the most energetic measures against *Komitajis* who are ravaging the country, but they never had any intention of crossing over the frontiers. The feelings of the Serbs towards Bulgaria have changed much lately, and if a little more sincerity is shown by Sofia, the future prospects may become much brighter for both nations.

Italy and the Treaty of Rapallo.

For some time the Yugoslavs have been waiting to see the Treaty of Rapallo ratified by the Rome Government, but so far their waiting has been vain. The Fascisti are making fresh difficulties over the question—already settled—of the minorities. The Yugoslav Minister in Rome has informed Belgrade that yet another conference of experts is demanded before the Treaty can become a *fait accompli*. The holding of the third zone of Dalmatia by the Italians makes the Yugoslavs ready for any conferences, but the moment the Yugoslav frontiers are delimited it is doubtful whether they will remain as submissive as in the past.

General News.

It has been announced that the sixth International Congress of War Invalids is to be held at Belgrade. The Minister of Social Politics will edit a memorial book on Serbia's part in the War and Peace.

A group of Montenegrin bandits waylaid a postal motor van on the Lovtchen Pass, but after a sharp fight with the escort the attack was repulsed.

A group of members of the Skupshtina will, during this year's vacation, visit Roumania, Czecho-Slovakia and Poland. The purpose of this visit is to see more of the Little Entente countries.

BULGARIA.

Sofia, August 1.

Thracian Events.

At the end of last week travellers arriving from Thrace stated that great military activity was to be observed in that region. Accounts differ as to the number of Greek troops that were on the move, but a moderate estimate was that three divisions consisting of 40,000 men were proceeding in the direction of Constantinople.

The Greek authorities in Sofia denied all knowledge of the movements referred to, but telegrams from London and Paris received yesterday confirmed the travellers' stories. Greece has apparently decided to occupy Constantinople and thus confront the Allies with a *fait accompli*. Here it is hardly thought that the Greek troops will succeed in accomplishing this, whilst even their expressed intention to do so is regarded as ill-judged.

Telegraphic communication with Constantinople has been interrupted for the last day or so, and all reports coming from Thrace must be taken with reserve. It appears, however, that the decision to occupy Constantinople and the consequent massing of troops were carried out in great secrecy. It is said that the Greek Army is now waiting west of the Chatalja line. Perhaps their army will meet with the same fate which befell the Bulgarians in 1912.

The Inter-Allied Commission.

Nothing much new has occurred in the deadlock between the Government and the Commission. The latter issued yesterday a *communiqué*, which contains the following: "The Commission reiterated their desire to enter into negotiations with the Government and stated that the latter had rejected the Convention without putting forward any counter proposals."

The Sobranye Closed.

The third extraordinary session of the Sobranye was opened on July 24, and was closed a week later without having discussed the question it was convoked for, namely the Reparations. The Opposition Parties did not have the opportunity to give their opinion on this question.

The regular session of the Sobranye is due to be opened on October 25, but it is said that another extraordinary session may be called in September in order to discuss the Reparations question.

Stormy scenes marked the last sitting of the Sobranye. The Agrarians and Communists accused the Bourgeois *bloc* of not allowing the Sobranye to discuss Reparations. The *bloc* replied by making a formal appeal to the President of the Sobranye asking that the following three matters be put on the agenda: Reparations, the political murders, and the University crisis. The President of the Sobranye was not able to communicate this appeal to the Sobranye, as M. Tourlakoff, Minister of Finance, rose from his seat and read the Royal Decree by which the Sobranye was closed.

Radoslavoff Cabinet on Trial.

The High Court, which during the last year has been engaged in trying the members of M. Radoslavoff's Liberal Cabinet, is at the moment closed. The case for the prosecution ended a few days ago, and when the Court resumes its sittings it will be the turn of the accused. Owing to the interminable time that this

trial has lasted, all public interest has died down. Nevertheless, it is expected that when the Court gives its judgment, most of the accused will receive heavy sentences. The only Minister who is expected to come off lightly is General Jekoff, Minister of War during the first few days of the War and afterwards Commander-in-Chief of the Army.

The Czecho-Slovakian Minister.

On Saturday the 29th, M. Bogdan Pavlu, Minister Plenipotentiary and Envoy Extraordinary of the Relic of Czecho-Slovakia presented his Letters of Credence to King Boris. M. Pavlu is the first Minister accredited by Czecho-Slovakia to Bulgaria. M. Duparinoff, who is now Bulgarian Chargé d'affaires in Prague, will shortly present his Letters of Credence,and diplomatic relations between the two countries will thus be completely established. In the speech delivered by M. Pavlu to King Boris, especial reference was made to the trade links between the two countries. A month ago Czecho-Slovakia opened a Chamber of Commerce in Sofia, and in all commercial matters pertaining to Bulgaria, the the Czecho-Slovaks are very active.

M. Tourlakoff's Voyage.

In a few days M. Tourlakoff, Minister of Finance, is going to Rome. The object of his journey is to discuss the Reparations Question with the Italian Government, and at the same time to arrange some details concerning the Rilo Forest Concession. After a dispute lasting over a year a concession for the exploitation of the forest of Rilo has been granted to an Italian group. This concession is very important, involving as it does a huge tract of forest situated only 50 miles from Sofia.

Meanwhile M. Daskaloff, Minister of Interior, is still abroad, and it is said that after leaving Paris he will go to London. His voyage has been made solely on account of the Reparations problem. It is not thought, however, that M. Daskaloff will succeed in securing more favourable terms for Bulgaria.

Personalia.

Mrs. Bruce (Madam Tamara Karsavina) returned to Sofia from London last week.

Colonel Dodge, the American Minister in Belgrade, has been paying a short visit to Sofia.

ALBANIA.

Tirana, August 4.

The United States.

The Government of Washington has just recognised the Tirana Government. This news was officially communicated by Mr. Maxwell Blake, the American commissioner at Tirana, and he will, no doubt, shortly assume the title of diplomatic representative.

This fact is of much importance, not only because the United States are a great non-European Power which is not a member of the League of Nations, but also because of the significance we find in the decision. Washington had hitherto failed to interest herself in Albania, alleging indifference to European affairs. Albania was obliged to prove that, on the one side, impartiality demanded that the United States should recognise the Tirana Government, and, on the other, that the great American Republic could not afford to be uninterested, either politically or economically, in Albanian affairs.

Disarmament Completed.

As will be remembered, after the troubles of last March, the Government undertook the disarmament of the people of the hills. Until this time Albanians in general, and particularly the people of the Northern hills, had jealously kept their arms. But happily this handing in of weapons has been everywhere accomplished. The inhabitants of the Montenegrin and Serbian borders have voluntarily given in their arms to the military authorities, and—what is very significant—the folk of the Dibra region, without even waiting for the arrival of the collecting detachments, spontaneously delivered up their weapons to the civil authorities. The Albanian militia, having thus performed its task, is returning gradually to Tirana to be disbanded. This work is a great success for the present Government, the authority of which is to-day well established. It is generally hoped that Parliament, which opens its session on September 1, will be favourable to the present Cabinet, and that there will be no more unpleasant surprises.

The Southern Frontier.

Greece has not yet replied to the Note in which Albania opposed the reservation formulated by Greece for the Southern frontier, adjoining Greece. The International Frontier Commission went off to the South on July 28, to proceed with the delimitation of the Serbo-Greek-Albanian frontier between the Lake Ochrida and the Adriatic.

In the North the Commission had reached the town of Yakova, and it is hoped that during the autumn and next winter the southern frontier will be completely settled.

Albania and Italy.

As foretold in my previous letter, the dispute between Italy and Albania has been satisfactorily settled. The Marquis of Durazzo has been made Italian Minister Plenipotentiary, and he has notified the decision of the Consulta to close down shortly the military post-offices and the two radio-stations. Now that the Italian Cabinet has been re-constituted it is to be hoped that the two Governments will reach an agreement on all the small outstanding questions, and will conclude commercial, postal, and consular conventions, so necessary to the resumption of economic relations between Albania and Italy.

The Marquis of Durazzo, a man of refinement and moderation, will have an easy task to fulfil.

TURKEY.

(From an Occasional Correspondent.)

Constantinople, August 1.

The Greek Threat.

The eighth anniversary of the outbreak of the Great War found Constantinople threatened with a replica in miniature. Rumours there were in plenty, and the wildest seemed to gain some measure of credibility when General Harington, Commander-in-Chief of the Allied Forces, issued a *communiqué* warning all concerned that any attempt to advance on Constantinople would be opposed by the Allied troops of occupation. Then with second thoughts came the recollection of a previous *communiqué* issued from Allied Headquarters regarding an alleged *coup d'état* of a revolutionary nature in which local Turks were said to be implicated. A certain number of Turks were arrested; but they were subsequently released and nothing more was heard of the matter. Before speculation as to the possibility of the second *communiqué* being on a par with the first could be seriously indulged in it became known without any shadow of doubt that the Greeks were in fact massing troops on the Chatalja Lines, some thirty-five miles away, for the express purpose of taking possession of Constantinople. Considerable uneasiness prevailed in the city, for the question was at once asked: If the Greeks mean business and were foolish enough to attack, can the Allied forces at present in Constantinople prevent their entering? There was certainly something in the nature of a flutter in naval and military circles; leave was stopped officers and men were recalled, social engagements were cancelled. In fact, as already stated, there was a distinct echo of the last week of July, 1914. Rumours of the cancelling of the British naval regatta fixed for August 3 and 4 are current: but I have reason to know that there is, so far, no foundation for these, although the Clerk of the Weather seems minded to step in where Greeks may probably fear to tread. By the time this reaches you the matter will have solved itself one way or another.

Conflagration at Haidar Pasha.

An event of the past week has been the fire at Haidar Pasha and Kadikeuy, just across the Bosphorus, close to the Britsh residential suburb of Moda. A fire is no uncommon event in Constantinople. In fact, as in the case of our public holidays, it is easier to reckon the days in the year when they do not occur. It was a cautious rather than a facetious Englishman, who,

Digitized by Google

striking Constantinople at a specially thick holiday-patch, and being anxious about cashing cheques before he left, asked a Bank cashier for a list of the days of the year on which the Bank was open. But to revert to fires. So frequent are they here that one consuming less than twenty houses may occur without eliciting any reference to it in the local newspapers.

The fire at Haidar Pasha and Kadikeuy on Wednesday last was, however, a more serious matter. Starting at 3.30 a.m. it continued until the small hours of Thursday morning, destroying some two hundred houses of various sizes, of wood and of brick, and rendering homeless over two hundred people. The damage done is estimated at nearly a million Turkish pounds. Had it not been for the assistance rendered by the British military forces, who hurried men to the scene and transported engines and hose across the Bosphorus, the fire would undoubtedly have attained far greater dimensions. As it is, much misery and suffering have been caused, and Constantinople, which surely could boast before of more refugees to the square yard than any other town, has had several hundreds added to the number.

Horse Show and Tournament.

Last Friday and Saturday witnessed a most successful Horse Show and Tournament, held on the Sports Ground at Haidar Pasha by the British Corps of Occupation. There was a large attendance of the British community, both military and civilian, as well as a number of distinguished visitors of Turkish and Allied nationalities. Perhaps the two most popular events were the musical ride in costume by the 3rd Kings Own Hussars, and the musical drive by the 97th Battery R.F.A. In addition to the usual events such as jumping, tent-pegging, wrestling on horseback, and the best turn-outs in the British units, considerable interest was evinced in the award for the best turn-outs for the Turkish Gendarmerie in Anatolia, and for the Turkish Mounted Police. Lieut.-General C. H. Harington, G.O.C.-in-C., A.F.O., was at the Saluting Point.

General Townshend in Angora.

Apart from the curiosity aroused, General Townshend would have little reason to be flattered by the attitude here towards his visit to Angora. Among those compelled to remain in Turkey during the War the memory of his "incarceration" on the island of Prinkipo, with its periodic visits to the city and to Tokatlian's Hotel, is too recent to make them friendly critics. The best that the British community as a whole can hope for is that the results of the visit, if any, will not be such as to embarrass further an already complicated and complex situation.

CYPRUS.

Nicosia, July 18.

The Bishop of Papho.

The local papers will not leave the Bishop in peace. He is now in Constantinople, and appears to have been interviewed by the Greek paper, the *Herald*. As far as can be gathered, the chief cause of his offending in the view of the papers is that he has attributed the progress made in Cyprus, in social and material life, to the effects of British rule and the liberty enjoyed under it. He praised the administrative system, and the good work carried out by the Public Works Department in towns, roads, and villages. "Such," exclaims one of the papers, "is the picture—such the condition of things—which presents itself to the eye of the Bishop of Papho both in his own District and throughout the island." Had Cyprus remained in the hands of Turkey, it would, of course, have been nothing but the utterly neglected and hopelessly unprogressive fragment of Asia Minor that it was when Britain took over the administration. But little gratitude is ever shown by the Greek Press for the benefits received; and if a Bishop ventures to speak the truth on the subject, he is, it seems, to be sneered at and censured.

Loyalty in Schools.

Attention has been called by the Acting High Commissioner to the latest law regarding supervision of foreigners carrying on missionary work in education, or medicine. Any such foreign subject must obtain the sanction of the High Commissioner, and must sign a declaration, as laid down by the law, to the effect that he must show becoming respect to the Government of the island and that he will abstain from participating in political questions, and will work in friendly and cordial co-operation with the Government as far as his influence can be exercised; and particularly must promise that his influence will be used to encourage loyalty towards the Government in the minds of pupils. Cyprus being now British, Cypriots are not subject to these provisions—it would perhaps be well if they were. Even this very proper regulation is adversely criticised by the papers, and is regarded as "unworthy of a Great Power."

General News.

Unhappily crimes of a serious nature do not decrease, and murders are far too frequent. The last is reported from a remote hill village of the Limassol District. Here a son murdered his father, both being in love, it is said, with the same young woman.

There has been some intense heat, and the migration to the hills continues.

M. J. Vergopoulos, the munificent donor who is rebuilding the large Limassol School, is adding yet another wing to the building. Resolutions recording the gratitude of the School Committees and the community have been passed.

Mr. C. K. Gamble, of the Standard Oil Company, with his wife, and M. P. Nicolaides, are visiting the island, and will consider the question of establishing an office for the Company in Cyprus.

THE NEAR AND MIDDLE EAST ASSOCIATION.

Memorial to the Prime Minister.

The following memorial has been addressed by the Near and Middle East Association to the Prime Minister :—

Sir,—We regret that the peace proposals formulated at the Paris Conference, while they might possibly prevent further fighting at the present moment, do not really touch the root of the evil or hold out any prospect of a permanent solution of difficulties in the Nearer and Middle East. What we desire to see is not merely a temporary cessation of hostilities, but the establishment of a general peace in the Countries concerned and an honest fulfilment of the territorial promises made by the Prime Minister in January, 1918, and subsequently repeated and confirmed by him in February, 1920.

We would be glad of assurances more definite and clear in regard to the future of Asia Minor. We believe that Asia Minor (including the city of Smyrna) should be acknowledged as Turkish territory under the full sovereignty of the Sultan ; and we suggest that minorities might be protected by the institution of local gendarmerie with the collaboration of foreign officers (preferably of nationalities neutral in the War), whose impartiality would guarantee the security of Christian or Moslem Minorities. We should prefer that the whole question of such racial Minorities should be treated as one and handed over to the League of Nations (including Turkey).

We regard the terms proposed in the case of European Turkey as unworkable and provocative of future friction and conflicts. We believe that Turkey is entitled by racial and geographical conditions, by prescriptive right, and by the definite promises of the Prime Minister, to Eastern Thrace including Adrianople. Regarding Western Thrace we suggest that this might be constituted a separate autonomous province under the protection of the League of Nations, and that the promise of access to the Aegean Sea accorded to Bulgaria by the peace of Neuilly, should be fulfilled. In this way the frontiers of Greece and Turkey would not be co-terminous, a valuable provision against the peril of future conflicts.

The proposals for the Allied occupation of the Dardanelles do not appear to us to contain within themselves the elements of a permanent and peaceful settlement. Sooner or later the claim of three Nations to exercise military control over this great international highway will be questioned and resisted. Is it conceivable, for example, that a restored and powerful Russia will indefinitely acquiesce in such an arrangement ?

Further, it is obvious that under the terms of the proposed control of the Dardanelles any effective defence of the Turkish Capital against a sea attack by Greece or other maritime power is rendered impossible. If the Dardanelles Peninsula ceases to be Ottoman territory it should be placed under the administration of the League of Nations (of which Turkey should be a member), with complete and satisfactory guarantees against a hostile attack on Constantinople.

We regard the proposed terms of settlement therefore as extremely unsatisfactory from the point of view of the Minorities provided with no adequate security ; of the Turks, deceived by false promises and rendered defenceless against attack ; of the Bulgarians, cut off from the Aegean littoral ; and of the Greeks, placed between enemies inspired by the memory of a bitter wrong. We regret the suggested settlement also from the point of view of the British taxpayer, whose real interest is not a mere cessation of hostilities, but a just, reasonable and abiding solution of the problems involved.

We venture finally to express a regret that Lord Curzon should have suggested that British graves could not be safely left in Turkish territory. We might remind his Lordship—to go no further—that throughout the War the graves of the British soldiers at Scutari have been carefully looked after by the Turks, whose scrupulous regard for the burying-places of the dead is well known.

We have, etc.,

NEAR EAST BOOKSHELF.

THE ENGLISH WAY OF GOVERNANCE.

"ON SECRET PATROL IN HIGH ASIA." By Captain L. V. S Blacker. (London: John Murray. 18s. net.)

On a first perusal there seems to be one defect in this very readable book—we find incident after incident full of life and zest, but we cannot see the wood for the trees. True there are here and there rides, as it were, dividing one series of events from another. One such is the conclusion of the chase after the Afghans, with the thrilling *dénouement* at Yarkand—another the departure of the author from Merv after the temporarily successful operation against the Reds. Similarly isolated is the history of the episodes in and around Badjiran. These divisions, though, on the face of them, they might be mere accidents of the event, do, nevertheless, suggest that the book has a place—and a purpose, over and above the mere narration of incidents, and yet when one tries to trace the purpose in the light of these divisions one seems continually brought back to the questions "But, why?" "What is it all about?" "How was the Empire served by the capture of the Afghans?" "Was not every adventure rather purposeless sport?"

Well, even so, the book is a very interesting book. There is much worse reading than the story of cool, quick-minded deeds of brave men in the midst of enemies, and if it thrills and exalts us to hear of Everest challenged, and of the attempt to unveil the mysteries of the desolate Southern Seas, may it not be well also sometimes to hear of extremes of cold and heat, of thirst and starvation, of the momentary prospect of death, all faced and endured to shew the tribes that England is awake? One cannot particularise the tales—the spirit of courage is implicit all through the book. But high courage and a sense of humour often go together, and one or two of the really amusing things are worth mentioning here. It is pleasant to read, for instance, that "although Langasti post has a garrison of one decrepit Kirghiz, and would be untenable against a barrage of well aimed brickbats, it has more than once loomed large in Welt-Politik." O Tempora! O Teschen! Page 131, too, describes a really excellent way of getting reliable great-coats, while the British Admiral, with his Bible and his gold lace, may be an old friend, but comes in very happily at p. 152. One may perhaps add that there are traces of a preoccupation with "Nordic" race theories, but the author is far too many-sided and sensible a man to let them become boring.

After dipping into the book again (for indeed it will very well bear a second perusal) one begins to see what is the purpose that does really inform it and make it much more than a mere collection of incidents. The author illustrates rather than teaches the doctrine that the best method of governance depends on moral prestige and on personal character. In conquering, civilising or policing—they all mean the same, when used by one nation of another, but the first of the three words has perhaps the least cant connected with it—you have to adopt one of two methods. A gang of Afghans are out on a mission of mischief—you may hope to catch them hundreds of miles off after journeying through a roadless and doubtfully friendly country—they are well armed. The systematic method deals with such people on the grand scale. Plan out and lay a road to carry artillery, let a railway be built beside it, and every forty miles let an impregnable fortress house the Imperial Guardians of the Way. If there are fifteen possible objectives of the suspects, build fifteen roads and railways, and let each be a monument to an Imperial Race, so that when the Race decays, which, with such material methods, is apt to be fairly soon, the historian of the future may at least give it high marks for engineering, and wonder what catastrophe could overwhelm such great—well perhaps not Empire builders—but at any rate builders. The other method of governance is that of Captain Blacker and of scores of other devoted Englishmen whose ideal is that of making the tribes respect and obey England—not merely of covering the face of the earth with a system of barbed wire cages to contain the tribes. Under the second method you take a handful of brave men, and you go, with no particular equipment, after eight times the number, knowing by instinct and experience that the people are the people all the world over and know a command when they hear it and a man when they see one. You do not materialise the spirit of England in great fortresses and bridges and embankments. For a definitely bellicose or constant purpose these may be excellent, but it is not by them that an ascendancy, a domination, an Empire like ours is best achieved or maintained. Our Empire is not based on warlike conquest. We could never afford it. Our method is rather to idealise and fix in the individual tribesman's mind the conception of the great Country whose sons may turn up anywhere against any odds, and by sheer force of character cause a crowd of wavering or hostile men not only to obey, but to obey gladly, as one obeys a trusted and experienced friend. And this method not only relies on character but makes it. The man who learns to endure hardship, to face danger, lays that up in his soul which is the essence of a great people, and the sons of a great people make their subject peoples great if there be any germ of courage and resource within them. Captain Blacker rode down his Afghans, but it was Abdullah Shah who went after Kazim Beg.

The book is a good book, and one that young Englishmen should read. Incidentally, passages here and there help the European to rid himself of the thoroughly fallacious ideas which spring from always talking of "India." The passion for uniformity has much to answer for, from Disraeli to Mr. Montagu.

E. H. K.

DIPLOMATIC ADVENTURES.

"SOME REVOLUTIONS AND OTHER DIPLOMATIC EXPERIENCES." By the late Sir Henry G. Elliot, G.C.B. With an Introduction and Appendix by his daughter. (London: John Murray. 16s. net.)

Sir Henry Elliot was a fine old diplomat of the old school, level-headed and observant, perhaps content not to go very far below the surface, entirely honourable but somewhat too apt to measure others by insular standards. He was ninety years old when he died, over fifteen years ago, so that his reminiscences take us a long way back, and we have nothing but gratitude for the labour of love which his daughter has undertaken and has so well carried out. She leaves the old diplomat to tell his own story, with as little in the way of notes as possible, and this, to our thinking, is the ideal way of presenting such a record. The loss of Sir Henry's papers in the great fire which destroyed the Constantinople Embassy in 1870 doubtless deprived us of much for which we should now be grateful, but enough remains to justify thoroughly the publication of this book.

We first find Sir Henry at Naples in 1860 during the last days of the reign of the unfortunate Francis II of the Two Sicilies. We do not know where a more vivid picture of this tragi-comic piece of history is to be found, though we cannot but see his British prejudices in his stinging contempt for Cavour's cunning and for the pathetic ineptitude and incapacity for action which characterised the Neapolitans. He appears to have had but little opportunity for doing anything. What he was able to accomplish was all sound and honest. He has but little good to tell us of the "Excursionists," as the English volunteers for Garibaldi's force were nicknamed.

Next we are present in Athens in the last days of King Otho, and the hopeless position of this monarch, who had reigned so long and had achieved nothing, is well brought out. What it comes to, after all, is that Greece owes him nothing but almost thirty years of inertia at a time when an efficient king might have advanced the prosperity of the country very materially.

Digitized by Google

Greece is still paying for King Otho's incapacity to rule. The curtain goes up again to show us the intrigues attending on the choice of Otho's successor. These, while not creditable to any of the parties, probably showed England up in a better light than her neighbours and resulted fortunately for Greece.

A few pages are now devoted to Turin in 1864, with the riots resulting from the decision to move the seat of Government to Florence till such time as Napoleon III's hold on Rome could be got rid of.

The last part of the book is occupied by an account of Sir Henry's long tenure of the Embassy at Constantinople, from 1867 to 1876. This period includes Abdlu Aziz's visit to Western Europe, the opening of the Suez Canal, the *Drei Kaisar-Bund*, the machinations of Ignatieff, the insurrection in Bosnia, the war with Servia, the Salonika murders, the deposition of Sultan Murad, Midhat Pasha's attempts at reform, and finally the Constantinople Conference where Lord Salisbury fell under the spell of the great Russian ambassador, and, acting against Sir Henry's advice, did neither England nor Turkey a good turn either for the moment or for the future. This part of the book we have found very specially interesting, and no student of the affairs of the Near East can afford to neglect it. Perhaps the most personally interesting section of this account is that which deals with the so-called Bulgarian atrocities and explains the apparently inexplicable ignorance of the Home Government and their ambassador in important events which were fully known to the readers of Sir Edwin Pears' correspondence from Constantinople in the columns of the *Daily News*. The political effect of this curious gap in official knowledge was far reaching, and, among more important results, it finally brought about Sir Henry's departure from Constantinople. The explanation was that our nearest Consul, at Adrianople, had reported fully, but that the Consul-General had shown this report to Pears and not to the ambassador. We doubt whether, in these times, this defence would have been thought sufficient. That it was so considered then was shown by his appointment subsequently to the Embassy at Vienna.

MUSICAL NOTES.

ON PIANOFORTE PEDALLING.

The problem of pedalling in pianoforte music is easily the most fascinating and the most difficult of the various departments into which the study of the most generally used instrument may be divided. In pedalling there is probably more bad work done than in any other sphere, for you may any day hear pianists whose finger work is more or less perfect and yet whose actual playing is very unsatisfactory. This may or may not be due to the fact that the use of the right and left pedals is seldom taught as a thing definitely to be mastered; granted that it is in the end a matter for intuition, yet, as in many things that are supposed to be artistic secrets, a little bedrock information is indispensable. I believe, therefore, that the publication (by Messrs. Kegan Paul, at 4s. 6d. net) of Algernon H. Lindo s " Pedalling in Pianoforte Music " will be of immense value to students—to me, at any rate, is has been most stimulating reading.

Professor Lindo is a very wise man. Because he is an examiner to the Associated Board, he is learned in academic ways, and therefore proceeds to lay down certain rules; but long before you have indignantly brought up your exceptions he has forestalled you, and there is scarcely a sentence that he writes to which he has not added a loophole that inhibits criticism. He knows far better than you and I how constantly and triumphantly all his rules have been broken by the greatest pianists; his humanity always seems to remember what his academicism bids him forget.

It was much more than a fairyland of sound that the invention of the right and left pedals in the pianoforte opened; in fact it may be said that a glimpse of both heaven and hell was afforded by it. I need not remind anyone of those awful persons (usually, I think, of the gentle sex) whose ignorance of the very existence of the left pedal by no means equals the strenuous constancy with which they adhere to the right. Their harmonies, like snakes in the nether regions, writhe and overlap, distorted in agony. Then there are others who attempt to screen their technical deficiencies in a cloud of pedal; pitiful and yet very common are these, who are easily identified. But what a world of beauty is opened by those who truly understand the use of the pedal! Listen to Busoni, as, by means of the right pedal, he will raise bank on bank of sound, till, like the sky at sunset, the very air is full of massed beauty, and then, with incomprehensible magic, will waft away that mass to the sound of but a single note. Or to Hofmann, who, with the left pedal, will merge the delicatest *pianissimo* into silence, as exquisitely and imperceptibly as a star will glide into the dawn. Or even to Rosenthal, whose frequent avoidance of the pedals is of the greatest value to students, as showing how great is the danger from their abuse and how possible it is to achieve purity without constant assistance from them.

As I have said, I have been fascinated by the problems, practical and technical, which the author of this book attempts to resolve, though they are rather too detailed for treatment here. It is, therefore, on his general points that one must lay stress; on his refutation, for instance, of the ridiculous idea that the right pedal should be employed only for additional loudness of tone; on his preference for the " Half-Blow " method in left pedal mechanism; on his omission of reference to modern works other than those of the modern romantic school; or on his demonstration that the widely held notion that all pedalling should be syncopated is wrong. I will not reproduce any of the rules or maxims suggested, because, as Professor Lindo says, all pedalling is a matter of intuition, which in the last resort is subject to no rules, though it may well be founded on them. But I wish that he could have found room to say more on modern music, because it is a fashion now to work back from the new to the old, and the conception that if one knows how to pedal modern music the older stuff is easy is entirely wrong. I once heard a quite famous pianist play a Bax Sonata magnificently and then fail, almost entirely through faulty use of the pedal, in a Byrde Pavane!

ANDANTE.

The resolutions of the Government of India in regard to pensions for officers of the Indian Services retiring in consequence of recent reforms and the modifications of the rules are issued as a White Paper (Cmd. 1488).

PERSONAL AND GENERAL.

To-Day.
August 17 (New Style).
August 4 (Old Style).
Julhijja 23, 1340 A.H. of the Moslem Calendar.
Ab 23, 5682 of the Jewish Calendar.

Lord Islington has left London for Devonshire.

The Maharaja of Rajpipla has sailed from New York for France.

The King and Queen of Serbia intend to pay a visit to Marienbad very shortly.

The Bulgarian Minister and Madame Stancioff spent the week-end on a visit to Major Villiers-Stuart.

The Roumanian Minister and Madame Titulesco have arranged to leave London this week for the Continent.

M. Yaroslav Cesar, specially attached at the Czecho-Slovak Legation, has resumed his duties, after leave in Prague.

Mr. Morgenthau, who was United States Ambassador to Turkey during the early part of the War, arrived in London last week from Paris.

Dewan Bahadur Raja-gopala Achariyar, President of the Madras Legislature, has left for India, after a stay of some months at Harrogate.

The recent head of the mission in Jerusalem connected with the London Jews Society, the Rev. John Rooker, is the new rector of St. Botolph's, Cambridge.

The King has granted permission to Mrs. Philip Martineau to wear without restriction the medal "Bene Merente" (1st Class), conferred on her by the King of Roumania.

Sardar Tarzi, the former Afghan Foreign Minister, and father-in-law of the present Ameer, has been appointed Afghan Minister in Paris, whence he will proceed in a month's time.

The engagement is announced between Solomon N. Ziman, M.A., M.Sc., of the Indian Civil Service, and Nellie Frances, daughter of Dr. Anghel Gaster, of 33, Devonshire Place, W.1.

In commemoration of the anniversary of the death of King Peter, King of the Serbs, Croats, and Slovenes, a Memorial Service was held on Monday at the Russian Church, Buckingham Palace Road.

Sir Arthur H. Froom, Lady Kesteven, and Sir A. P. Muddiman left London last week by the P. and O. Bombay express, *via* Calais, to join the s.s. Macedonia at Marseilles, *en route* for Bombay.

Prince Nicolas of Roumania visited The King at Buckingham Palace on August 11, and took leave of His Majesty upon the completion of his studies at Eton and upon his departure from England.

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

The engagement is announced between Captain Noel Tancred Whitehead, M.C., R.A.M.C., Gordon College, Khartoum, and Christiana, daughter of the late Wingate and Mrs. Morrison, 326, Banbury Road, Oxford.

The engagement is announced between Mr. John Healey, M.B., Ch.B., of Mossley, Lancs., ayd May, eldest daughter of the late Captain J. H. Baldwin, Bengal Staff Corps. I.A. The marriage will take place next month.

Mr. Claude Russell was received in audience by The King at Buckingham Palace on August 8 and kissed hands upon his appointment as His Majesty's Envoy Extraordinary and Minister Plenipotentiary at Adis Ababa.

The engagement is announced between Oswald, son of the late William Fenwick and Mrs. Fenwick, of Cambo Lodge, Gosforth, Newcastle-upon-Tyne, and Marjorie Lillian, elder daughter of Mr. and Mrs. K. Jebara of Northwold, Bowdon, Cheshire.

A marriage has been arranged, and will take place on September 16, between Cecil U. Wills, I.C.S., second son of the late C. S. Wills, C.B., R.A.M.C., and Honor, third daughter of the late Alexander H. M. H. Gordon, of Delamont, Killyleagh, County Down, Ireland.

A marriage has been arranged, and will take place in Bombay in November, between Captain Cyril Barlow, 52nd Sikhs, elder son of Brigadier-General and Mrs. Barlow of Heston Lodge, Middlesex, and Lady Helen Boyle, only daughter of the sixth Earl of Shannon and sister of the present Peer.

A marriage has been arranged, and will take place at the Church of St. Michael and All Angels, Overton, on August 31, between Walter E. Giffard, Sudan Civil, Service, youngest son of Mr. H. R. Giffard, of Lockeridge House, Marlborough, Wilts, and Minna, second daughter of the late Major C. L. Cotton, 3rd Dragoon Guards, and the late Mrs. A. Macartney-Filgate.

The marriage arranged between Major Otto Marling Lund, D.S.O., R.A., Aide-de-Camp to the Commander-in-Chief in India, and only son of Captain and Mrs. Albert Lund, 38, Lowndes Street, S.W., and Margaret, daughter of Mr. and Mrs. Frank Harrison, of Bombay, will take place at Christ Church, Simla, on September 11. The reception afterwards will be held at Snowdon, which has been lent by Lord Rawlinson for the occasion.

The Insignia of the Fourth Class of the Order of the Nile has been conferred on the following officers by the King of Egypt, in recognition of good services rendered by them during the operations against the Aliab Dinkas in the Mongalla Province:—Capt. C. E. M. Richards, D.S.O., M.C., E. Lancs. R.; Capt. W. H. Wynne-Finch, M.C., S. Gds.; Capt. W. G. Cowley, Essex R.; Capt. L. C. Bostock, M.C., Manch. R.; Lt. J. D. Lawrence, M.C., Manch. R.; Capt. E. D. M. Heriot-Hill, R.A.M.C.; Capt. S. Arnott, M.B., R.A.M.C.

The Lord Chancellor has appointed the Rev. Alfred Guillaume, M.A., Professor of Hebrew and Oriental Languages at the University of Durham, to be Rector of St. Mary-le-Bow, Durham.

THE PERSIA SOCIETY.

President: *Lord Lamington, G.G.M.G., G.C.I.E.*

Founded in 1911 to study all questions of common interest to Great Britain and Persia.

Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1.

Digitized by Google

The Rev. E. F. Habershon, formerly Chaplain to the Forces in France, Egypt, and Palestine, and now organizing secretary under the Y.M.C.A. of boys' work in London, has been appointed chaplain of the Cheltenham College Mission at Nunhead, S.E.

The Rev. A. D. M. Farrar, M.A., D.S.O., grandson of the late Dean of Canterbury and son of Dr. Reginald Farrar, has been appointed assistant curate at St. Peter's, Harrow. Mr. Farrar served as a major in the Royal Welch Fusiliers, and was awarded the D.S.O. in Mesopotamia for conspicuous gallantry. He was ordained in 1920.

THE BULGARIANS.

Part 10 of "Peoples of all Nations" is given over to Bulgaria, Burma, and Cambodia; and the first part of the Bulgarian section, "The Picturesque Peasant State" is contributed by Mr. H. Charles Woods. As a Balkan expert, Mr. Woods is well qualified for the work, and he has handled his material in interesting fashion. His concluding paragraph gives a clear picture of the remarkable people of whom he writes—"As the Bulgarians devote themselves almost exclusively to the material side of life, they have no arts to attract foreign attention; they boast of no dramatists, sculptors, painters or writers with an international reputation. It, therefore, only remains to repeat that cold, undemonstrative, and reserved as they may be, these people are possessed of sterling qualities which preclude them from disappearance into oblivion. They have built up a modern country in just forty years. They have established a government which is certainly no worse than those of the older neighbouring states. And they have created educational and agricultural systems unequalled elsewhere in the Balkans. Unfortunately for them, the Bulgarians took the wrong side in the war, but time will yet prove that they are destined to play their part in that regenerated world, which one must still hope will be the outcome of the European conflagration."

A MAKER OF RECORDS.

The *Morning Post* of August 10 had an interesting paragraph headed "A Surprising Bag," concerning Sir Harcourt Butler:—Sir Harcourt Butler, Governor of the United Provinces, who has been designated as the next ruler of Burma, has thereby achieved a record in the chronicles of Indian administration by being chosen to fill three Governorships in succession. It is also a new precedent that he should be going back to a Province which he has already governed once. A third record stands to his name, which some men may possibly envy him even more. In 1919 Sir Harcourt, who is fond of shooting both with gun and rifle, took a party to the celebrated Nepal Terai, where it adjoins his present satrapy. The bag in a fortnight was eight tigers and six tigresses. This was in itself well enough, but the extraordinary part of the story is the size of these animals. Many men have seen forty or fifty tigers killed without once setting eyes on a genuine 10-footer. Of the eight Butlerian tigers no fewer than five were up to this standard or over, and the six tigresses in their lesser proportions were equally of abnormal size. The Goliath of the batch was a huge 10ft. 5in., which chose to fall by the Governor's rifle. There is no doubt about the measurements, for they were taken under the supervision of the Forest Officer, who is well known as one of the most experienced sportsmen in India. Not even in any of the Royal shoots in Nepal has such a collection of tigers of the first order been brought to bag.

INDIAN ARTS AND CRAFTS.

Sir William Meyer, the High Commissioner for India, has organized, at 44, Grosvenor Gardens, a museum of Indian art ware and village crafts which will add another permanent attraction to London for lovers of Oriental applied arts. All specimens on view are examples of goods, for which, says *The Times*, orders can be booked by the visitor. At present the parts of India participating are the United Provinces, the Punjab, and Burma, and it is anticipated that other provincial Governments will come into the scheme when present financial difficulties are adjusted. The museum is representative of a wide range of domestic art, the specimens including metal, ivory, brass, silver, enamelled, bronze, laquer, and ebony wares. There are also specimen textiles of silks, printed cloths, satins, embroidered braids, delicately-hued gold and silver embroidered scarves, handsome Amritsar-made carpets and rugs, rich brocaded dress materials, the far-famed Kashmir shawls, plain and bordered, and the many-hued Burmese umbrellas. The effect of the exhibition is heightened by the flooring, show cases and furnishing being of Indian silver greywood. The High Commissioner has appointed Mr. H. L. Chandra to be the Curator of the museum.

The new school for Russian refugee boys at Buyukdere, Constantinople, under the direction of the Russian Relief and Reconstruction Fund, was officially opened last week. Lady Rumbold, General Sir Charles Harington, and Colonel Procter were present.

EGYPTIAN COMIC PAPERS.

(*From a Correspondent.*)

The comic paper *Keshkoul*, with its large coloured cartoons, reflects popular feeling in Egypt quite as faithfully as any European *Charivari*. As regards many of its jokes, however, the Arab proverb may be applied which says "the witty can understand" (*el gida yifhem*). In the latest batch received there are some amusing examples. In one cartoon Sarwat Pasha figures as the Sphinx, wearing a fez and spectacles. The front bears a large note of interrogation, signifying "Is he Egyptian?" Underneath is written "The Prime Minister of Egypt." In another an Egyptian official is speaking. "Some Mudirs," he says, "think that England will never go out of Egypt, just as some diseases can never be driven out of the body." A clever drawing shows John Bull standing outside a fence enclosing the Sudan, on the gate of which is written in large letters "Anglo-Egyptian Sudan." A paint pot is by his side, and he is about to paint out the word Egyptian. Apropos of the fact that the Government is now considering the question of compensation to European officials whose services are being disposed with, two Sudanese employees in Egypt are depicted as applying, at the office concerned, to a Pasha. "If foreigners," they say, "are to receive compensation, we also ought to receive it, as *we* are foreigners." Another cartoon shows the members of the Commission as asleep in various attitudes in their Council Chamber.

THE FUTURE OF THE INDIAN SERVICES.

Much has been said and written of late regarding the position of the existing members of the various Indian administrative services. It is not our intention to-day to contribute to that discussion: the Services have substantial grievances in the present, and very real anxieties for the future; but apart from these matters, which primarily concern the officers now surviving, there is a larger and in the long run a more important question, which in our opinion should be promptly examined, and settled without unnecessary delay, the question whether the time has not come when admission to these Services should be definitely closed, and new arrangements for recruitment should be made, which would be more closely in harmony with the spirit of the recent constitutional changes. This question is fortunately independent of those racial implications which of late have been so much in evidence. We accept the view which has repeatedly been laid down with authority that for some time to come Parliament must retain in India a sufficient number of English agents to ensure the realisation of its policy of establishing democratic institutions, but there is no inherent necessity that the agents to be employed in future should belong to the existing Services, while the conditions prevailing in the employment market make it probable that the present methods of recruiting may fail to secure the minimum supply of Englishmen on which Parliament quite rightly insists. The question is not whether Englishmen or Indians should be recruited, but whether in the new conditions India will still require the elaborate organisation of Imperial Services which in the past has served the country so well. This organisation goes far back into history, for the Services as they now exist derive directly from the Moghul institutions, themselves built on much older foundations, and rulers like Akbar or Shahjahan would have had very little difficulty in recognising the administrative machine of 1920, though they would certainly have been puzzled by the spirit in which its operations were conducted. The Indian Civil Service was formed to take over the duties of Moghul officials, the other Services were modelled largely on its lines, and, taken as a whole, they still constitute the machinery of a unified and highly centralised despotic government, looking to the centre for inspiration, and concerned mainly to execute a policy inspired from above. Is the perpetuation of such machinery consistent with the provisions of the new Constitution?

In seeking an answer to this question, it must be remembered that the change which Parliament has decreed is fundamental. Hitherto every province in India has been ruled in the last resort by a single despotic master: henceforward each province has been ordered to develop democratic self-governing machinery of its own, and it is expressly laid down by statute that each shall enjoy the largest possible measure of independence of the Central Government. Is it in accordance with these provisions that the Central Government shall continue to determine the type, the qualifications, and the terms of engagement, of the officials holding every important provincial post? From the standpoint of theory it is clear that the province should have a free hand with its staff, while on the practical side it is obvious that the provinces are likely to become increasingly restive under a system which they are unable effectively to control, which from its nature must make for centralisation and uniformity, which may take their best officers away for service under the Central Government, and which may stereotype their resources for thirty years ahead at a time when flexibility is certain to be more and more required. The logical arrangement would be to close recruiting for the Imperial Services at once, to allow each province to engage staff in accordance with its needs, and to provide the Central Government with a staff under its own control. If more Englishmen are needed in the provinces, the number, or the proportion, could be laid down under the authority of Parliament, and their supply could be arranged through the High Commissioner, acting as the agent in this country for the provinces, while the terms of engagement could depend partly on the market and partly on the views of the provincial government, which might decide either to offer a career for life, or to follow the example of various commercial bodies and enter into contract for limited terms. The existing Services would then gradually disappear; their members would carry the country over the earlier stage of the long period of transition which lies before it; and when the last of them had retired, each province would be master of its own machinery.

We have little doubt that some such answer to the question we have raised would be given by any nation accustomed to frame its institutions by the rules of logic and theory. That, however, is not the English way, and the practical man of affairs will very rightly demand that, before such a change is made, its probable working should be carefully explored. Need we do anything just yet? Will the provinces be able to get along? Would it not be better to proceed by gradual steps? Such questions as these are absolutely relevant, and some of them cannot be answered off-hand. Speaking for ourselves, we think that the need for doing something is established by the present grievances and the future anxieties to which we have referred, because they seem to us to imply that the old machine is not really adapted to the new conditions, but further than this we are not prepared to go. The question, for instance, whether each province could staff itself independently is beset with difficulties. There are well-known administrative objections to the employment of Indian officers in areas where they have personal interests and connections; there are equally familiar popular objections to employing Indians from other parts of the country; the level of education, and also of character, differs widely; and it is quite possible that a system suitable to Madras might break down hopelessly in Bihar. Again it is necessary to reckon with the popular cry that each community should have its fair share of high office; so long as that attitude is maintained, and it is unlikely to disappear just yet, worried provincial governments may prefer that the main burden of recruitment should continue to rest on the broad shoulders of the Central Administration. No one who has followed the recent history of the Punjab would desire to introduce a new bone of contention among the elements of its restless population; and we fear it is only too true that the communal animosities which have flared up again in the Punjab are still smouldering throughout large parts of India. While, however, there are obvious arguments for letting matters slide, there is an increasing body of opinion which holds that, altogether apart from racial considerations, continuance of the present system of recruiting is fair neither to employers nor employed. Contracts for life, so suitable in the old days of stability or stagnation, are ill adapted to times when the velocity, perhaps even the direction, of change has become so hard to predict. Greater flexibility is in any case called for, and it seems to us that the whole theory of recruitment for the new conditions requires to be thoroughly but cautiously examined, and that commitments should be reduced to a minimum until the process of exploration is complete. The ruling principle in India must be to do whatever is necessary for the success of the institutions which Parliament has called into existence, and no considerations of momentary convenience should be permitted to delay the introduction of any measures which, on careful examination, are found to be required by that paramount consideration.

THE SUDAN AT PLAY.

By "Abu Nakhla."

II. Nuba Wrestlers.

Pressed back centuries ago from their home lands on the Dongola loop of the Nile and from the plains of Kordofan by the great race movements of the Arabs in the centuries after Mohammed, and harried or absorbed by the incursions of the Fung and of others, the Nubas have found a refuge on the hills of their present "Dar." From these strongholds they have waged constant war for the last century against each other, against their Arab neighbours on the plain, and against the Government for the time being. Since Mohammed Bey el Dufterdar conquered and ruled Kordofan for the Khedive Mohammed Ali Pasha the history of the Nuba has been one long struggle against the slave raider and the press-gang. The whips of Egypt were followed by the scorpions of Dervish rule as administered by the Emir Abu Anga, who perpetrated unnameable horrors whenever and wherever he could force his way. Gradually, however, the Nuba resistance stiffened and was greatly assisted by the infiltration of rifles, in the hands of

Photo by C. A. F.
Nuba Wrestlers at Talodi.

deserters from the Dervish armies, by capture, and by trade. Many a Remington now carried by a Nuba was once on the shoulder of an Egyptian conscript in the army of Hicks Pasha.

Such a history has not imbued the wild hill-man with any great respect for, or confidence in, Governments as such. Since the re-occupation of the Sudan it has taken twenty years of patient work, and a few fairly hard knocks, to persuade him that the present Administration means well by him, and that, furthermore, it has the intention and the means to see that its orders are adhered to and its taxes paid. That difficulty over, as it now very nearly is, the Nuba is an admirable person. He is a thorough sportsman and, at his cultivation, a hard worker; driven in the past from the plains below, he hacked terraces out of the sides of his rocky hills and grew enough millet for his needs by the sweat of his brow. Now again he grows thousands of acres on the plain, where he has no enemy more formidable than the ever-encroaching grass and scrub, while the rains of successive peaceful years are gradually removing all traces of his laborious terraces. The conditions which made them necessary will remain longer in the traditions of the race.

It was not, then, without its significance that over two thousand of these hill folk should assemble to meet Lord Allenby in the course of his recent tour in the southern provinces of the Sudan. There were men there who, five years ago, would have regarded a visit to any Government post as a piece of foolhardiness from which no possible compensating advantage could be looked for. Not only that, but it was to many of them a new thing to be able to travel the highway without looking for some blood enemy behind every rock. These things are not altogether past yet, but they are passing.

However, in they flocked and were duly assembled in ordered ranks; all were decked in their best, but that seldom included what could by any stretch of the mean-

Nuba Wrestling at Talodi: the Referee.

ing of the word be called clothes. An exception was the Moslem hill folk from near Kadugli in the west, who paraded each hill under its Arab suzerain: "Sid el Derib"—"The Lord of the Road"—a survival of the days when intercourse between hill and hill was only possible by leave of the Arab of the plain. The rest were nearly all pagans—men from Khorarak, who have a breed of black and tan terriers and go to war striped from head to foot with white lines; great bucks from Krongo in the south-west, wearing plumes of ostrich feathers and clashing girdles of small brass bells; little wiry men from the Koalib—the shyest birds these and the latest to come to hand—whose sole adornment was a Remington and whose only clothing a snow-white head-dress of clotted milk.

As the High Commissioner passed down the lines every right hand went up above the shoulder with open palm turned to the front, an old form of salute of which the origin is that it shows that you have no weapon in your hand. Every hill had its instrument of music—or one should say rather of torture. A goat's horn emits a noise infinitely more painful than that of the original

Digitized by Google

goat ; the blare of a kudu-horn will carry great distances and it is better so heard than at the range of a few feet, when it is more devastating than twelve regimental pipers round a mess table. The most remarkable and the most kindly instruments were a pair of kudu-horns, extended to over six feet in length with trumpet mouths beautifully made from some preparation of beeswax. They gave a note like the big pipes of an organ.

With many of the Nuba hills, wrestling is very much a business, and the teams are trained as strenuously as any University crew. During his few fighting years the wrestler lives on straight meat and milk, and may not marry. When he comes into the ring he looks formidable enough ; his nearly coal black skin is toned to a whitish grey by a liberal application of wood ash, which the seconds constantly renew from a gourd. He stands a good six feet and is broad and deep in chest and limb. Clothing he has none in the ordinary sense, but much finery ; a girdle of four or five rows of little brass bells—at his back the outspread feathers of a kite and at either ankle a garter of white goat hair.

The " ring " is some hundred yards or more square ; round it singly, in pairs, or in teams of four or five swagger the wrestlers, challenging each other with queer little provocative gestures of the hands and sidelong looks of feigned contempt, till each man finds his match. There may be four or five bouts in progress at any moment, and a bout seldom lasts above half a minute. The loser picks himself up to be dusted again with wood ash and to seek another antagonist, but the winner dances up to the audience, supported by his seconds, capering grotesquely, his hands held crossed at the wrists in front of him, thumbs out, fingers spread and palms forward while he whistles shrill war-cries through his teeth. Then he too is dusted and plunges back into the arena to give or take falls with equal good humour. Any hold is allowable, and there are some desperate hard falls, but the good temper and good sportsmanship that prevail among such primitive folk might with advantage be copied nearer home.

Though the Nuba fights and hunts with a rifle for preference, he has not forgotton how to throw a spear. For tournament purposes a bamboo shaft is fitted with an ebony head ; thrown at less than the distance of a cricket pitch, it can be no easy weapon to parry on a round hide shield of about eighteen inches diameter, but we never saw a failure to ward the blow, though the spear broke often enough. It was as pretty an exhibition of skill as the wrestling was of force.

III. Shilluk Dances.

We have gone east and we have gone west, and will return northward by way of the White Nile, paying a visit to the Shilluk in passing.

Time was, according to tradition, when the Shilluk kings held sway as far north as the junction of the Blue and the White Niles, where Khartoum now stands At any rate they played a large part in the tangled story of the African races, and it is possible that the Fung, who long reigned at Sennar, owed their origin at least in part to the Shilluk. They still number not far short of a quarter of a million souls, and physically and intellectually are the finest of the Sudan Nilotic tribes. Organised under a paramount *mek*, they have long been known as making good soldiers ; their language has been reduced to writing in Roman characters, and many of them are learning in the missionary schools to read and write it. Like all the Nilotic tribes, they are men of great height. Very dark brown in colour, they are painted with white wood ash or red clay, and their finery consists of leopard skins, plumes, and bracelets of beads, of iron, or of ivory. Their hair is trained into the most fantastic shapes if not, as it sometimes is, cut quite short.

The Shilluk traditional dances give proof of considerable histrionic talent. There is the " hyaena" dance, where the performers represent the hungry night prowlers round the villages. In another figure the Leopard—wearing skin and mask—is gradually encircled by a winding column of some five hundred hunters with whom he plays a game of " follow-my-leader " before he is finally surrounded. In the Sham Fight there is sometimes a " skeleton enemy " represented by some of the women armed with reeds or sticks. The warriors advance, hesitate, and retire. Again they advance, but suddenly drop as one man behind their long hippo-hide shields—in an instant there is not a head to be seen, and you hear the clash of the imaginary shower of enemy spears parried on the shields. (The noise is made with the shaft of the spear behind the cover of the shield and the effect is very realistic.) More volleys are received and some are parried without checking the advance. The shield is always carried vertically on the left arm, covering the body, but leaving the right shoulder and head clear. The parry is made by moving the left arm upward and to the right, thus covering the head and whole body ; but before the recovery to the original position is made, a quick glance is taken past the left side of the shield to ascertain if it is safe to uncover sufficiently to deliver the volley in return. Finally the attack is pressed home till the spear heads are at the feet of the spectators, while broad grins compete on the faces of the performers with the savage looks which they feel to be essential to their parts.

ARABIAN POLITICS AND PILGRIMS.

News has been received, says *The Times*, that nearly 1,800 pilgrims from Nejd arrived in Mecca on July 31 and received a cordial welcome. Seventy of the pilgrims are the guests of King Hussein, to whom they carried letters and presents from Abd El-Aziz es-Saud, the Sultan of Nejd. Since the advent of the delegation of Palestinian Arabs in Mecca efforts have been made to secure support among the pilgrims for the campaign against the British Mandate over Palestine. It was supposed that the delegates would find a fresh field for their propaganda among these pilgrims from Nejd, and that the reception accorded to them by the Hejazis on their arrival in Mecca would betray the state of relations between the King of the Hejaz and the Sultan of Nejd. It appears, however, that these relations are now less strained than has hitherto been reported.

THE MISSION OF HELP TO INDIA.

The Archbishop of Canterbury will dismiss the missioners of the Mission of Help to India to their work with his blessing on October 5, at Westminster Abbey, at 10 a.m. A public meeting will take place on October 4, at 8 p.m., in the Great Hall, Church House, Westminster, at which the missioners will be present. They will sail on October 6 in the s.s. Nevasa to Bombay, and the s.s. Nyanza to Colombo. The following is the list of missioners completed to the present date :—The Bishop of Peterborough, the Dean of Manchester, Father Waggett, S.S.J.E., the Rev. Basil Phillips, the Rev. E. N. Mellish, V.C., the Rev. J. C. Pringle, the Rev. J. J. G. Stockley, the Rev. M. S. Evers, the Rev. T. H. Masters, the Rev. D. G. Macpherson, the Rev. Spence Elliott, the Rev. Guy Vernon Smith, the Rev. E. L. A. Hertslet, the Rev. Eric Southam, the Rev. J. H. Peabody, Canon J. R. Darbyshire, the Rev. C. Pepys, Canon Greaves, the Rev. C. P. Pattison Muir, the Rev. R. Palmer, D.S.O., the Rev. E. P. Swain, the Rev. S. E. Swann, the Rev. R. J. Wood, Mrs. Woods, Miss Thornton, Miss Higson, Miss Cowlin, Lady Fletcher, and Mrs. G. H. Bell.

A mesage from Kalimpong, North Bengal, states that telegraphic communication was established with Lhasa on July 31.

PRESS ON THE NEAR EAST.

In consequence of inquiries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

The Greco-Turkish Conflict.

It is an extremely divided reception in the Press that the British Premier's recent speech on the Greco-Turkish situation has met with. The *Outlook* of August 5, for instance, lightly says :—

> Eloquence is at a discount in the present House of Commons, but it is extraordinary what can be still done by the power of mere words. Somebody once said that an M.P., reminded of inconsistencies in his past, had only to open his explanation with the magic formula, "I am within the recollection of the House," to be sure of a sympathetic cheer. The important thing is to understand the House of Commons language, and in this the Prime Minister is second to none. Asked what his friends, the Greeks, meant by attempting to seize Constantinople Mr. Lloyd George replied: "The action of the Greek Government was apparently due to a desire to expedite a settlement of the Near Eastern question." The opposition subsided at once! A friend tells me that he was once (before the War) on a small pleasure steamer, plying between Athens and Corinth. A seedy-looking gentleman on the upper deck, after delivering a long and impassioned speech to the assembled passengers, passed round his hat and collected a considerable sum of money. "What did he talk about?" my friend asked a Greek-speaking neighbour. "Oh, the glories of Ancient Greece." "Nothing else?" "Oh, yes; he said, of course, that we must recover Constantinople and Ionia." It was for this cause that the passengers had contributed their money. Constantinople for Greece is the only settlement of the Near Eastern question that the Greeks have any understanding for, or will ever attempt to "expedite."

The *Morning Post* of August 5 describes the speech as "singularly unconvincing," and contrasts the Premier's generous treatment of Germany with his harsh attitude towards Turkey :—

> If Germany has a right to live, so has Turkey. If a Germany ridden by Bolshevism is a menacing possibility, a Turkey under the actual thraldom of a Bolshevist Commissary is a present and overwhelming danger. The most powerful man at Angora at the moment is not Mustapha Kemal Pasha, but Araloff, the representative of Moscow, who has already succeeded in gravely disturbing British dominion and security in the East. Such are the fruits of the Treaty of Sèvres. And such results were inevitable, because Mr. Lloyd George has done to Turkey what he is apparently terrified some hot heads might do to Germany—he has deliberately sought to crush the vital spirit and very existence of what was once a great Empire, and which even still, amid the ruins of war and the dismemberment of her provinces, looks back with regrets on an illustrious past and looks forward with patient tenacity to a possible future. In this war Turkey is fighting for her very existence, for her hearths and homes, for room to breathe, for the elementary right to live. Greece, on the other hand is fighting to win an Empire which is not hers by right, and which she has not yet secured and never will secure by the sword. On the grounds of abstract justice, on the grounds of high Imperial interests, this country ought to remember for what the two combatants are fighting, and frame its policy accordingly. Greece seeks to expand at the expense of the very existence of Turkey. Until Greece radically modifies her programme, there will therefore never be any peace in Asia Minor.

Many attempts have been made to end this disastrous war, but all have met with failure. The March Conference in Paris between France, Italy, and Great Britain was hailed as a great triumph for the Marquess Curzon, who we are glad to hear is restored to health after a long and trying illness, but his triumph has been short-lived. Greece itself has become desperate, for if the struggle continues much longer the country will become completely bankrupt, and King Constantine will go the way of M. Venizelos. Accordingly, in order to speed into some activity the halting diplomacy of the Allies, and to cover their proclamation of a so-called autonomous Ionian State, whose core is Smyrna—in itself a flouting of the March Conference—the Greeks have not only turned their eyes, but have actually moved a few steps nearer to Constantinople. At the moment Smyrna, not Constantinople, is the main consideration of the Greeks, but Smyrna in the hands of an alien Power is the death knell of Turkey. Without Smyrna, Turkey becomes a memory like the Venetian Republic. . . . But there will never be any settlement of this tragic issue until the Allies, particularly France and Great Britain, have agreed on a common policy. The Conference of Paris failed because the unity of the Allies was merely skin-deep. The reparations controversy, the Anatolian war, will never be ended until France and Great Britain have covered, in an agreement as far-reaching as the one which ushered in the Entente, the many issues which at present unhappily divide them.

The Latest Greek Move.

On the Greek move for Constantinople, checked by the Allies, the *New Statesman* of August 5 states :—

> The request of the Greek Government that its troops should be allowed to occupy Constantinople created a very brief sensation. Greece is not in a position to defy the Allies—her financial necessities are far too serious and pressing for that—and she

Civil Servants abroad

retiring on pension and desirous of settling in England should investigate . . . . the claims of . . . . .

PEACEHAVEN

"The Sussex Garden City by the Sea."

There is probably no other place in Great Britain which has become so quickly known throughout the length and breadth of the land as Peacehaven, the Sussex Garden City of the Hills by the Sea.

Its rapid rise to public favour is due to its unique situation on the South Coast, near to the old-world village of Rottingdean, one and a half miles from Newhaven, six miles from Brighton, and within easy reach of London.

Peacehaven offers you Freehold Land for only £25, properly surveyed, with free deeds and no legal expenses, in a rapidly rising Seaside Resort, where it will treble and quadruple its original value as the further development of Peacehaven proceeds.

There are delightful Economic Homes to choose from of artistic Bungalow type, striking a new note in design and decorative effect, containing innumerable labour-saving devices, with Company water laid on, wired for Electric Light, and ready for immediate occupation, or you can build your own Home from materials on the spot, The rates are only 5s. 4d. in the £, half-yearly, and do not commence until you build or occupy your house.

The soil is wonderful, the air invigorating, so much so that Peacehaven has been described as the healthiest spot in England. Hotel Peacehaven will be ready in a few weeks ; steps now lead from the great cliffs to the beach. Golf, Tennis, Bowls, Cricket, Fishing and Boating will shortly be available.

Digitized by Google

cannot have supposed for a moment that the permission she asked would be granted. She might be well-advised, if she were able, to act without regard to the opinion of London or Paris, for the Supreme Council has always shown itself pliant towards the aspirations of those who have set its authority at naught, and certainly Great Britain is not going to undertake any further military obligations in the Near East. Defiance, however, is not possible for Greece and we are obliged, therefore, to assume that her demand was a mere political gesture. As such it is justified. If we refuse to allow her to occupy the Turkish capital we are bound to offer her some other means of bringing to an end a disastrous struggle. The Supreme Council has much to answer for, but in all its record there is nothing less defensible than its miserably indecisive policy in the Near East. The Greek Note is in effect merely a demand for a decision; and that is a demand which must be granted.

The *Outlook* of the same date says on this subject :—

King Tino is a sensational monarch. His threats last week to seize Constantinople sent dozens of our warships hurrying to guard the Straits. But it is inconceivable that he will throw his troops on the inter-Allied forces guarding the city and involve himself in war with the Entente. His gesture is, no doubt, largely intended for home consumption. And it also calls the attention of the world, as it was meant to do, to the difficult position of a bankrupt Greece still at war with Turkey and forced to maintain an army fully mobilised. The Powers have dawdled with the situation in Asia Minor. They are divided, and hence unable to enforce their will upon either Kemal or Constantinople. Meanwhile the Greek Army in the Smyrna region appears to have thrown off the control of Athens, and when the moment for evacuation comes Allied warships may be necessary to bring the Hellenic divisions concentrated there to reason. The moral of all this is that England and France must agree on an Eastern policy, and act on it, or otherwise events will move too fast for them and throw half the Mediterranean basin into turmoil and anarchy.

The Greeks and Constantinople.

In an article entitled "The Gateway of the East," *The Times* of August 9 shows the effect that the British Premier's recent speech had on the Greeks :—

He praised the effort of the Greek Army, he justified the policy that sent the Greeks to Smyrna, and he adopted without any modification the Greek argument that the Allied occupation of Constantinople was protecting the Turks and preventing the Greek Army from securing a decision. The speech aroused enthusiasm in Greece. It was at once assumed that the bold experiment had succeeded and that Great Britain had been again won over to the Greek cause. Passages from the speech have been published, it is stated in orders of the day to the Greek Army. The thousands of young men marshalled near the Chatalja lines are thrilled with a new hope to-day as they hear in their own tongue words to which tired members of Parliament listened last week with but a languid interest. Sir Charles Harington's warning must appear to them to be of slight moment compared with the direct encouragement of the British Prime Minister. Constantinople is but a stone's throw away; the City seems within their grasp, and the British warships that lie in the offing appear now to be but friendly phantoms. This is indeed a sudden plunge in our Near Eastern policy. Only last March the Allied Foreign Ministers agreed on a plan by which it was sought to establish peace between Greeks and Turks on an equitable basis. The Greek Press assumes, with very good logic, that Mr. Lloyd George's speech is a condemnation of that plan and that the British Government is committed afresh to partisanship in favour of the Greeks. In the present circumstances Mr. Lloyd George's speech must be regarded as both injurious to the Greeks and highly imprudent in relation to all our Eastern interests. It is harmful to the Greeks because we cannot believe that the Prime Minister really meant that the Greeks should be allowed to walk into Constantinople and, with that city as a basis, engage afresh in a destructive and perfectly futile war against the Turks in Asia. The possession of Constantinople by the Greeks would not lead to a decision; it would only involve Greece and the Allies in a prolonged and still more disastrous conflict that would aggravate unrest throughout Asia. The Prime Minister of Great Britain has to consider not merely the efforts and aspirations of the Greeks, but the sentiments of British Mahomedans and their efforts in the Great War. Mr. Lloyd George's last speech on the Near East has already evoked a protest in India. It would be lamentable if his encouragement to the Greeks, now turbulently assembled at the gates of Constantinople, should have the effect of barring to Great Britain the gateway to the East.

NEWS IN BRIEF.

Mr. C. R. Das, the Indian non-co-operation leader, was released from prison in Calcutta last week.

It is reported from Kabul that the Chinese mission there is returning to China, and will leave Kabul immediately.

The Georgian Government has been requested to release the steamer George and another vessel which were seized at Batoum at the instigation of the Russian authorities.

The Inter-Allied High Command at Constantinople formally announces the conclusion of an agreement between the Allies and Greece establishing a neutral zone between the frontier of Thrace and the zone occupied by the Allies.

A seaman named Christodoulos, a native of Cyprus, was sentenced to six months' imprisonment at West Hartlepool last week for offering cocaine for sale at a drug store. The man had two bottles containing about 6,000 doses of the drug.

NOTES AND NEWS.

Devonshire Square,
E.C. 2.

The Roumanian Conversion Scheme.

It is satisfactory to learn from our Bucharest Correspondent this week that an agreement has been arrived at with certain French holders of Roumanian Treasury Bonds who had been raising objections to the conversion scheme. They had been standing out for the pre-war rate of 25 francs for sterling, an untenable position in the circumstances, a fact which the French representatives have wisely realised. Rapid progress, it is understood, is now being made with the scheme, and its completion may be looked for in the course of the next couple of weeks or so. The importance of this transaction from Roumania's point of view is naturally very considerable, and we shall not be wrong in attributing the recent financial improvement in the exchange as due in part to this factor. The scheme in short marks a very vital stage in the process of Roumanian reconstruction.

A Coming Loan.

This autumn, I understand, will see the issue here of the Roumanian loan of £2,500,000, which is designed to meet the cost of the conversion scheme, and to provide a fund for the external debt service. The loan, it is stated, will be a 4 per cent. issue, but the terms on which it will be offered are not yet known. Probably I shall not be far wrong in anticipating that the issue price will be between 60 and 70. On that basis there would be an ample margin for appreciation, and there could be little doubt that investors would readily avail themselves of the opportunity.

An Albanian Bank.

The need for an Albanian bank is dealt with at length this week by our Tirana Correspondent who explains how essential its establishment is for the country. It is a surprising thing that a region of the extent of Albania should be without banking facilities of any description, but that is at present the position. A very considerable, and quite uncalled for, burden has thus been imposed on traders, and there have been other obvious disadvantages connected with currency and exchange. Albania is not able to establish a bank without external assistance, and the most promising offer forthcoming—one from a Belgian institution—has so far proved inacceptable. Perhaps one of our banks will now enter the field with suitable proposals. It would be an excellent thing for British interests in a country which offers a considerable and growing field for trade activities.

Phoenix Oil.

From the progress report of the Phoenix Oil and Transport Company which is given on another page it will be seen that this company is making notable headway. For the first six months of the year the company's output amounted to 17,453 tons, but this total does not show the extent of the advance that has been made as the figures for the first few months were small, while for June the total was 6,289 tons. The figures for July show that the rate of production has been well maintained, and it is evident that the next six months should see the company take a high place in the list of Roumanian oil concerns. The report is expected to be issued next month, and in view of developments it is not going too far to anticipate that the company is on the verge of its first distribution.

Trade Methods in Abyssinia.

What our Gambeila Correspondent has to say with regard to "peaceful penetration" in Abyssinia gives one much food for reflection to say the least of it. Think what one may of the methods of our trade rivals one can scarcely fail to admire their thoroughness as illustrated in this instance. A party of Italian missionaries it appears, have obtained an important forest concession, and, to quote our Correspondent, "is now busied in erecting saw-mills, etc., in addition to laying the foundations of a massively constructed church." Another mission, he states, has opened various stations where piece goods and other commodities can be obtained. In both cases evidently a most happy blending of "things temporal and things eternal." There is nothing on our side to set against these developments, and our Correspondent suggests that in regard to the Italian activities in the British sphere of influence "our diplomatists at Adis Abeba have been somewhat hoodwinked in not withholding the required permit."

Anglo-Greek Banking.

Misapplied enterprise seems the best phrase to apply to the reported project for the establishment of an Anglo-French-Greek bank at Constantinople and an Anglo-Greek bank at Smyrna. Obviously there can be no scope for such institutions until there is a complete settlement of the questions at issue between Turkey and Greece, and even then it would seem extremely doubtful if any such extension of banking facilities is called for. Both centres are well served by banks, and it is difficult to see at first sight what useful purpose can be served by adding to their number. There can be such a thing as having too many banks,

Commerce and Industry.

REPORTS FROM OUR OWN CORRESPONDENTS.

ROUMANIA.

Bucharest, July 23.

Extension of Air Services.

The Franco-Roumanian Air Navigation Company whose passenger and post carrying aircraft ply between Paris-Warsaw and Paris-Budapest, will start a similar service between Paris-Bucharest and Bucharest-Constantinople on September 1.

New Electric Railway.

A few days ago, a new electric railway line connecting Bukovina with Transylvania was started, its inauguration being attended by the local authorities. The line runs from Dorna Vatra and climbs up the high mountains which formerly constituted a boundary between Hungary and Austria. It goes through many villages scattered in the mountains, which were up to the present more or less cut off from the outer world. The joy of the inhabitants can be well imagined.

Bucharest, July 31.

Conversion of Treasury Bonds.

As I stated in one of my previous letters, some French holders of Treasury Bonds have refused to accept the conversion on the basis of 50 francs per sterling, insisting on the pre-war rate of 25 francs. In this connection, representatives of the Cie Generale du Levant came to Bucharest to negotiate with the Minister of Finance with a view to arriving at an arrangement. This company possesses Roumanian Treasury Bonds to the amount of 157 million francs, representing the countervalue of the locomotives that have been supplied. I the French pretensions were to be admitted, then the cost of these locomotives would be doubled. The French demand therefore could not be agreed to, and the French representatives' claim had in the long run to be abandoned. This difficulty being thus removed, and the convention with the London group being arranged and duly signed, the conversion operation will shortly be started.

Pre-War Securities.

The Roumanian Government received an intimation from the Italian and Belgian Legations here that some holders of Roumanian securities who are unable to produce their title deeds, alleging that they are " to bearer " and were bought as such, have brought an action against the Roumanian State, asking the respective tribunals to sequestrate in guarantee any Roumanian State property in the respective countries.

The Roumanian State refuses to acknowledge these securities by virtue of the clauses of the peace treaties, on the ground that they originated from the former enemy States. In order to avoid complications until a definite solution of this question has been reached, the Roumanian Government has ordered that Roumanian ships should for the time being not touch at any Italian or Belgian ports.

Nationalisation of the Sub-soil.

The idea of nationalising the sub-soil put forward by M. V. Bratiano, Minister of Finance, and which will in principle be introduced in the coming new Constitution, is to no small extent occupying the mind of political as well as of economic circles, who do not altogether share his views.

In the first place, the owners of plots with valuable sub-strata do not see why the State should encroach upon their rights of property, According to a leading daily, the Minister's views in the matter are approximately as follows :—

The majority of landlords of valuable sub-soil have neither displayed any special energy, nor invested the required capital; but have simply purchased or inherited the lands they possess, and it was by a sheer stroke of luck that the sub-soil of these lands harboured oil, coal, or salt, etc. Therefore these owners, as they are not entitled to the unlimited volume of air above their grounds, are likewise not entitled to the bowels of the earth. Above ground they have the right to erect a house which must not exceed a certain height; likewise they can cultivate the ground, necessitating digging to a certain extent. Beyond this depth and the height of the houses, the ground and the space above it constitute the patrimony of every citizen, which is represented by the State. Once this principle has been established it must become part and parcel of the Constitution.

As regards the *modus operandi* of this principle, the Minister is of opinion that any riches discovered in future should pass automatically to the State, the landowners being indemnified for the surface according to the law relating to agricultural development. With regard to mines which are in course of exploitation at the time of the introduction of the law in question, the entire rights of their ownership will be respected.

It is argued that landlords whose properties would be expropriated should receive a royalty on the eventual production of the sub-soil. This is a middle solution, which the Prime Minister himself is credited with favouring. The whole question will be fully debated in September when the Parliamentary Commission for the revision of the Constitution will reassemble and a definite decision taken.

Miscellaneous.

Following the negotiations which have lately taken place between the Roumanian and Hungarian postal authorities, arrangements are being made for the early resumption of the postal parcel service between the two countries in conformity with the Portorosa Convention.

The Ministers' Council has authorized the exportation by a local gold mining company of one kg. of bullion gold, which will be used in the preparing of a diadem offered by the said company as a gift to Queen Marie of Yugoslavia.

The Commission of the Bucharest Chamber of Commerce, which is entrusted with the mission of negotiating with the syndicate of creditors abroad on behalf of Roumanian debtors of amounts in high currencies, will leave Bucharest during the course of next week. They will first visit London and Manchester, and afterwards Paris, Zurich, Rome and Brussels.

ABYSSINIA.

Gambeila, June 26.

Peaceful Penetration.

There has been a certain amount of comment in commercial circles with regard to the advent of Italian missionaries in the sphere of British influence, and the general opinion is to the effect that our diplomatists at Adis Abeba have been somewhat hoodwinked in not withholding the required permit. Putting controversy to one side, the fact remains that the Mission appears to have obtained a valuable and extensive concession of forest area on the Gambeila plateau, and is now busied in erecting saw-mills, etc., in addition to laying the foundations of a massively constructed church. It is estimated that there will be sufficient lumber forthcoming within the next two or three years to supply all requirements in the Sudan. In a country such as Abyssinia it is fairly certain that any quasi-religious enterprise would not be subjected to any annoyances or interferences worthy of consideration, and the fact that the undertaking is mothered by the Church of Rome would appear to be a guarantee of success.

There has been noticeable activity on the part of the American Mission, which has opened various new stations, where one can obtain American piece-goods, foot-wear and other commodities at reasonable prices. In this connection there is reputed to be a considerable trade in quinine tabloids at the remunerative price of one Maria Theresa dollar per tabloid.

Digitized by Google

The Coffee Crop.

This year's crop for export to the Sudan is estimated at about 60,000 kantars of 100 rotls each; average cost at Gambeila P.T.175 per kantar, making P.T.215 per kantar landed at Khartoum. A considerable impetus has been given to the coffee trade by the new arrangement whereby the Abyssinian Government forego their *Ushur* of 10 per cent. from the natives and collect half a dollar per ferasula (37½ rotls) from the dealers, who are now allowed to buy wherever they think fit, and—the most important concession of all—transport their coffee during the dry season, instead of—as hitherto—having to wait for the rains, in order to move their purchases to the various depots. The crop is notified this year as being excellent in quality, dry and unusually clean.

The Monopoly of the Dollar.

It is rumoured that the Bank of Abyssinia is about to obtain a concession from the Government, whereby they will monopolise the dollar. No merchant, so it is stated, will be allowed to transport specie from one town to the other by caravan, but will have to rely on the various branches of the bank for his finance. Exchange has averaged about P.T.11. per M.T. dollar, and the charges for transferring from Gore to Harrar are stated to be in the neighbourhood of 5 per cent. Some anxiety is manifested at the probable charges for such transfers, if the monopoly goes through and present competition is stifled.

Trade with the Sudan.

There has been a grievous falling off in imports from the Sudan, partly, it is claimed, owing to the freights levied by the Sudan Government Railways and Steamers. In pre-war days at least 3,000 to 4,000 bales of cotton sheeting were annually imported *via* Gambeila, but latterly 600 bales are about the maximum. Salt, which is a staple article of barter, is subject to such excessive charges that the Jibuti salt is cheaper and easier to obtain. It is wondered in Gambeila whether the Sudan Government has ever heard of the undesirability of killing the goose that lays the golden eggs, in other words—of driving us to make use of the French railway and port of Jibuti. The Banque de l'Indo-Chine, which is established at Jibuti and has an organisation of correspondents throughout Abyssinia, threatens, thanks to its efficient methods, to develop trade through French Somaliland at the expense of the Sudan.

ALBANIA.

The League of Nations. *Tirana, August 4.*

M. Calmes, of Luxemburg, who has been appointed financial expert by the League of Nations, arrived at Tirana yesterday. He is accompanied by M. Rosenberg, a Swede, as secretary, and by M. Lush, who has been appointed to accompany him by the League. The mission of M. Calmes is to investigate the economic and financial situation of Albania and to draw up a report for the League. Following that report the League will select a financial organiser to be placed at the disposal of the Government of Tirana.

The Projected Bank.

I propose now to give further details on this subject which I barely touched upon in my last letter. Albania has no bank up to the present, national or private. Credit and exchange transactions are dealt with by the merchants themselves, and often it is impossible for them to manage this or at the best only with great difficulty, so that purchases abroad, orders and all such transactions are affected to a very serious degree.

The money in circulation throughout the country consists of gold and silver coins, 20 franc pieces of France, Italy, Belgium and Russia, the 20 Austrian crown piece and sterling, while the silver coins are the Austrian crown and the Yugoslav dinar. Italian, French and Greek paper money is also in use, the rate of which is regulated not only by the rate of exchange of the large towns (Milan and Paris), but also by the supply and demand in the country itself, so that there is a special rate for Albania which often differs in the various towns.

The rate of interest in Albania is very high, loans and advances on mortgage being in the hands of money-lenders, so that though the legal rate fixed by the Government is 9 per cent. there are lenders who make advances at 40 and 50 per cent.

I give these details so that it will be seen that the question of the establishment of a bank in Albania is a question of the first importance, and to show that such an institution would prove a most remunerative enterprise.

Albania is not in a position to create a bank by herself. It is necessary for her to have the co-operation of a little foreign capital, the assistance of men of experience, and the support of the great financial houses of Europe or America.

Some proposals to this end have been made to Albania, the most promising of which appears to be that of the Banque de Brabant, of Brussels. However the conditions put forward by this institution have been deemed excessive and inacceptable, and for the time being the negotiations which had been entered into and appeared to be well advanced have been broken off.

"Engineering Topics."

Owing to pressure on our space we have had to hold over "Engineering Topics" this week.

AGRICULTURAL OUTLOOK IN INDIA.

The India Office issues the following communique on the agricultural situation in India to the end of July:—The monsoon set in late in Bengal, Upper Burma, Assam, Madras Deccan, Hyderabad, Gujarat, Kathiawar, Sind, Baluchistan and North-West India, but the position at no time caused anxiety, except in Madras Deccan, Gujarat and Kathiawar. Good rains have since fallen in all these tracts except in Madras Deccan, South Hyderabad, and parts of North-West India, and the agricultural outlook in them may now be described as generally satisfactory except in the Madras Deccan, where comparative failure of rains for the third year in succession causes anxiety.

More rain is however required now in Baluchistan and the North-West Frontier Province, and on the East coast. Elsewhere, that is, in Lower Burma, Central Provinces, the remaining parts of Bombay and United Provinces of Agra and Oudh, and Bihar and Orissa, prospects are good, except in a few tracts which have received excessive rain. Test works are open in the Kurnool district of Madras.

The price of grain everywhere is considerably lower than last year, and remains steady, or even shows a tendency to continue falling. Wheat is now slightly over Rs. 5 a maund in the Punjab. The area under jute is about 8 per cent. less than last year, but the condition of the crop is satisfactory.

British Consular Reports.

IX. YUGOSLAVIA.

Outlook More Promising.

The following extracts are taken from the report of Captain E. Murray Harvey, O.B.E., M.C., Commercial Secretary to H.M. Legation, Belgrade, on the economic and industrial conditions in Yugoslavia during 1921 :—

In many respects the year 1921 was a bad one for commerce, and especially for foreign trade. Yugoslavia not being a country dependent upon its manufactures, the universal trade depression was not felt there till some six months after it had become general in most other countries, but then became acute. The beginning of 1921 promised well. The national currency, though depreciated, had not reached anything approaching the low level of those of most of the surrounding states. Trade was comparatively good ; merchants placed large orders abroad, and on all sides it was confidently hoped that an appreciation of the dinar, given a good harvest, would take place. This happy state of affairs, however, did not last long, and when all control over traffic in exchange was removed the dinar fell with great rapidity, and very soon reached its lowest point since the armistice. This fall was particularly marked in the months of August, September and October, when the exchange value of the dinar on London decreased from 125 to 350 to the £ sterling. The Government made numerous efforts to control this depreciation, but without much success, the rate at the end of the year being 283.50 to the £ sterling. These circumstances and the unsatisfactory state of the railways were two of the most serious obstacles to successful trading. The outlook has now, fortunately become much more promising in many respects. The heavy snowfall during the winter augurs well for this year's harvest, river transportation, and for the industries dependent upon water-power.

Agricultural Produce.

The severe drought in the spring and summer, accompanied by a plague of field mice, caused great damage to the crops, and the harvest in some districts was practically a failure. Agricultural co-operative societies are very influential and do much to raise the standard of agriculture, importing implements from Germany and other requirements on a large scale and distributing them among the peasants at very low prices.

It is not possible to obtain exact and detailed statistics of production, but the following round figures of grain for 1921 have appeared in the press :—

	Hectares.	Centners.
Serbia	1,403,000	13,272,000
Croatia Slavonia	1,027,000	10,884,000
Vojvodina	1,129,957	12,337,000
Bosnia and Herzegovina ..	684,706	5,195,000
Slovenia	197,623	1,885,000
Dalmatia	32,518	246,000
Montenegro	23,271	112,000
Total	4,558,075	43,931,000

Wine Production.—The wine production of Yugoslavia is greatly in excess of home consumption. It is estimated that 1,000,000 hectolitres are yearly available for export ; but during the last two or three years stocks have accumulated owing to various causes, among others the difficulty and cost of transportation and the high tariff duties. The wine growers of Dalmatia and Herzegovina are particularly affected by these conditions, as those districts have the largest surplus. Serbia and Macedonia, on the other hand, consume more wine than they can produce, and draw supplies from other sources. In spite of the glut of wine high prices are maintained, owing to transport difficulties. Wine-growing associations have held conferences during the year with a view to finding a way out of the difficult situation. Various measures have been suggested, such as the entire removal of export dues, the reduction of railway rates for wine destined for exportation, and limiting vine growing to existing vineyards ; but so far nothing definite has been accomplished.

Dried Plums and Plum Brandy.—The plum harvest was excellent, but here again the insufficient transport facilities made things very difficult, and the shortage of waggons occasioned by the mobilisation of the army on the occasion of the ex-Emperor Charles' attempt to regain the Hungarian throne, which coincided with the prune-exporting season, was little short of disastrous. Serious attempts are being made both by the Government and private organisations to improve the preparation and packing of this staple product, in order that it may hold its own on the world's markets. The drying ovens destroyed during the war are being replaced with Government assistance. The manufacture of *slivovica* (plum brandy), a universal peasant industry, is also being reorganised as far as possible, and antiquated methods are being gradually replaced by the introduction of modern stills, which the Government loan to the villages.

Medicinal Plants, etc.—In Dalmatia various commercial and medicinal herbs are grown, but no figures of production are available. Principal among these are pyrethrum, rosemary, sage, sumac, belladonna, laurel, gentian, lime flowers, etc. Large quantities of tobacco are grown in Bosnia, Herzegovina and Macedonia. The crop is taken by the State Monopolies, but is insufficient for the country's needs, and tobacco is imported from Greece and Bulgaria. The *papaver somnifera* has been grown very extensively in Serbian Macedonia, where it yields opium of the finest quality. The trade in this product has always been in the hands of Salonika merchants. Poppy seed is also used as an article of diet. Owing to the large quantity of opium produced during the war which has remained in the country unsold, and to the international restrictions of the traffic in this drug, less opium is being grown than formerly and it is likely that the production will be still further reduced. Efforts are being made to extend the cultivation of cotton and rice in those districts suited to their production.

Flourmilling.

This industry, which is one of the most important in this country, has not had a very good year. There are many large and well-equipped steam mills, which would be capable, in addition to providing for home needs, of a large production for export, but these mills during 1921 worked at much below normal capacity, and very little flour was exported.

Miscellaneous Industries.

Generally speaking, manufacturers have not had a prosperous year, although headway was made in some branches, such as textiles. The cotton mills at Trzic (Slovenia) and Dugo Resa (Croatia) did well, as also the woollen factories at Belgrade and Leskovac, all of which were engaged in producing materials for the Army Clothing Department in addition to their ordinary work.

In spite of the fact that the past year's results, generally speaking, were disappointing, many new industrial undertakings, mostly on a very small scale, are springing up, and great things are expected, once the chief hindrance to development—lack of good communications—disappears. It is often stated that many of these new industries, ostensibly founded by national enterprise, are in reality being financed with German capital ; it is even held by many that Germany is in this way endeavouring to obtain economic control of the country ; and this is one of the favourite arguments of those who would like to see greater interest shown by British capitalists.

Imports.

The principal articles imported into the kingdom were, during the first half of 1921, in the order named, cotton tissues, refined sugar, woollen textiles and cotton yarns and thread ; after these come machinery and apparatus, sewn goods, tanned and prepared skins, petroleum, iron, leather footwear, etc. Figures for the whole of 1921 are not available, but statistics of importation for the first six months have been published. Austria with 25 per cent., Italy with 21 per cent. and Czecho-Slovakia with 19 per cent., are the principal countries supplying Yugoslavia, the next in order being Greece and Great Britain, whose shares are only 7 per cent. and 6 per cent. respectively. These figures, however, as the Yugoslavs themselves admit, are unreliable, for the reason that goods imported from Great Britain, France, etc., which reach the kingdom *via* Salonika are often entered by the customs officials as imports from Greece, and similar inaccuracies no doubt occur in respect of merchandise arriving by way of Trieste and through Austria. The value of imports from Great Britain to the kingdom for 1921 was as follows :—

Digitized by Google

Quarter ended March 31	.. ..	£512,479
„ „ June 30	.. ..	£180,099
„ „ September 30	.. .. ..	£222,694
„ „ December 31	.. .. ..	£130,433
Total	.. ..	£1,045,705

It will be seen that the decrease in the amount of these imports followed a line roughly parallel to the depreciation in the exchange value of the dinar, which on December 31, 1920, stood at 134 to the £ sterling, while by the end of 1921 the rate of exchange on London was 284 to the £, which of course means that British goods had become too expensive for this market. The value of the imports of foreign and colonial merchandise from Great Britain into Yugoslavia during 1921 amounted to £27,336.

Exports.

The export of all commodities, with the exception of articles of gold and silver, gold and silver in bars, etc., gold and silver money and articles of artistic and historical value, is permitted. The export of certain articles is, however, limited to fixed contingents decided upon from time to time, such as sheep, horses, swine, wheat and wheat flour. The export of oak sleepers and other oak timber specially prepared for railway work is subject to the control of the Ministers of Communications and Mines and Forests. Of the countries which are Yugoslavia's principal customers, Austria, during 1921, took most maize, meat products and flour, Italy headed the list of importers of oxen, and Germany took more pigs and prunes than any other country.

Trade with Great Britain.

The past year has been a most difficult one in regard to commerce with the United Kingdom. The trade in textiles which is, of course, by far the most important item has suffered from the disastrous effects of the violent fluctuations which took place in the dinar-sterling exchange. Early in the year large quantities of British piece goods, etc., were arriving in the country, but such were the difficulties which arose from the fall of the dinar in relation to the £ sterling that it not only became a matter of the utmost difficulty for the importer of British materials to pay for his purchases, but it was also almost impossible to obtain sufficiently high prices in dinars for goods sold in the country to obviate considerable loss. On the other hand, the merchant dealing with Germany reaped the benefit of the fall in the exchange value of the mark, and did very good business, being able to sell at prices much below those of the trader selling British goods. Another point which made business with Germany and Czecho-Slovakia both safer and easier than with Great Britain was that the mark and kronen rates seldom varied beyond 5 per cent., while the rate for cheques on London was subject to much larger fluctuations. Hence it was comparatively easy to fix selling prices for articles of German and Czecho-Slovak origin, while for Manchester and Yorkshire goods this was very difficult to arrange, especially when giving credit to the retailer; and while it was always easy to obtain marks and kronen with which to pay for goods imported, this was by no means the case with regard to sterling. In fact, the total amount of sterling and other "sound" money instruments on the market here is usually so small that it takes very little extra demand for these currencies at any time to induce a sharp movement of the exchange against the dinar. For these reasons many Belgrade merchants who both before and since the war have dealt almost entirely in textile goods of British origin have been compelled to buy in Germany.

Prices and methods of doing business vary very greatly in the different districts, the former because of the difficulties of transport, so that there is often no relation between the cost of even the country's own produce at different centres. The merchants who have come best through this difficult time are those of Southern Serbia, which fact is a triumph for primitive business methods. With very few exceptions the merchants of Skoplje have refused to avail themselves of any credit facilities and prefer to pay immediately for goods ordered abroad and to fix their prices on the rate of exchange on the day on which sales are effected, and to buy their *valuta* day by day. The consumers are also very conservative; hence, while it is difficult to introduce new lines of goods, it is fairly easy to maintain trade in those already established. For example, in Southern Serbia people are accustomed to buy sewing and embroidery cotton of British manufacture, and, in spite of the high prices prevailing, no other cotton is to be found. At the time of writing the situation as regards the prospects of trade in British textiles is beginning to show distinct signs of improving.

It is interesting to trace the influence of the movement of foreign exchanges on the import of these articles in Yugoslavia. In the summer of 1920, when the dinar appreciated 60 to the £ sterling the local merchants ordered large quantities of British goods, in many cases going themselves to Manchester and Bradford for the purpose; and they based their calculations upon the firm conviction that the dinar would continue to rise in value. When however, the dinar again depreciated, it not only became extremely difficult to meet their engagements contracted in sterling, but for fresh purchases it was found that Italy could best supply the merchants' requirements in cotton, etc., and for a time that country became the principal supplier. The sudden rise in the exchange value of the lira, however, again caused the merchants to seek other sources of supply.

Stocks of Textiles Decreasing.

Now, and for some time past, the appreciation of the Czecho-Slovakian kronen has made it more difficult for Serbian merchants to do business with that country; and merchants say that for this reason, and on account of the reduction in prices in the United Kingdom, it is again becoming more and more possible to place their orders in Lancashire and Yorkshire, even with the dinar at well over 300 to the £ sterling. In addition to this, the persistent reports that a foreign loan is about to be concluded have caused a sharp rise in the exchange value of the dinar, another consideration tending to turn the merchants' attention again to the United Kingdom; and it is thought here that if and when this loan materialises the dinar will further appreciate and maintain its improvement. A further good sign is that, while there is of course nothing nearly approaching a shortage of woollen goods yet, the large stocks of textiles which for so long remained unsold are now gradually being reduced and some of these stocks must shortly be brought up to date by the addition of fresh materials. Merchants state they are now selling two or three pieces at a time to retailers where, up to recently, they have only sold one.

Although textiles, yarns, and certain well-known proprietary and other articles of British manufacture will always find a sale in Yugoslavia, it is very difficult to introduce new lines of goods and to find agents who can devote much time to their sale. Generally speaking, with regard to agents the possibilities are very remote of booking orders for "goods to arrive against sterling credits opened in London," or "payment in sterling against documents." In most cases the agency arrangements likely to produce best results is to provide an approved man with local stocks. The supply of Government requirements by public tender, even in the case of textiles, was one of the directions in which British trade made very little headway during 1921. At least one large order for army cloth was placed in Yorkshire, but for the most part the conditions governing these contracts are so onerous and the time available in which to prepare tenders so limited, that it has been hardly worth while for British firms to compete; furthermore, it is the declared policy of the Government to restrict importation as far as possible, and therefore, as a general rule, no Government stores of any kind are purchased abroad until it is ascertained that they cannot be produced in the country.

SHIPPING INTELLIGENCE.

NEW P. & O. LINER.

The steamer Bendigo, a large twin screw passenger vessel of 13,100 tons, built by Messrs. Harland & Wolff, Ltd., Greenock, to the order of the Peninsular and Oriental Steam Navigation Co., Ltd., for their branch line service was handed over to the owners on the 9th inst., after undergoing satisfactory trials on the Clyde. The new vessel, which is classed 100 A 1 at Lloyds is 520 ft. by 64 ft. by 41 ft., and has accommodation for 500 cabin passengers and nearly 1,000 third class passengers on the main deck.

OIL STORAGE AT EGYPTIAN PORTS.

The British Commercial Agent for Egypt, in a review of the petroleum situation in that country in his recently issued report, states :—In view of the necessity for installations for the safe storage, on a large scale, of oil, not only for consumption in Egypt but also for bunkering oil-driven vessels, the total number of tanks at each port together with their total storage capacity will give some idea of the increasing importance of the Egyptian oil trade. Eight tanks have so far been erected at Port Said, and four more are contemplated, their storage capacity amounting respectively to 50,300 and 32,000 tons. There are also 20 tanks at Alexandria with a total capacity of 70,000 tons, and 4 at Suez capable of storing 19,000 tons, which are exclusive of a large amount of tankage at the refineries and other installations at a distance from Port Tewfik, the present port. At Suez, an oiling basin, designed to accommodate seven tankers at one time, is in course of construction. The danger to public security that would arise from the erection of oil storage installations without a sufficient margin of safety, and the fact that there is no legislation extent in Egypt to regulate the limiting flashpoint of dangerous and non-dangerous oils, led the Egyptian Government during 1921 to appoint a special committee to consider the drawing up of regulations (which up to the time of writing had not been completed) for the import, sale, and storage of petroleum and its products in Egypt. The Egyptian Government as a producer of oil on its own account, is itself closely interested in, and will naturally be bound by, any regulations for safe storage that may at any time be enforced.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis :—

Anchor Line.—S.s. Scindia for Bombay (Liverpool, August 18); s.s. Massilia for Bombay (Liverpool, September 4).

Anchor Brocklebank Line.—S.s. Malakand for Calcutta (Birkenhead, August 21) ; s.s. Mahanada for Port Said, Colombo, Madras and Calcutta (London, August 26) ; s.s. Media for Calcutta (Birkenhead, September 2) ; s.s. Mandasor for Calcutta (Birkenhead, September 16) ; s.s. Mahsud for Port Said, Colombo Madras and Calcutta (London, September 16) ; s.s. Mathura for Calcutta (Birkenhead, September 27).

Bibby Line.—S.s. Lancashire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 30).

British India Line.—S.s. Manela for Colombo, Madras and Calcutta (London, August 18) ; s.s. Trelevan for Bombay and Karachi (London, August 19) ; s.s. Margha for Bombay and Karachi (London, September 8) ; s.s. Madura for Colombo, Madras and Calcutta (London, September 15) ; s.s. Domala for Bombay and Karachi (London, September 22).

Clan Line.—S.s. Clan Murray for Colombo, Madras and Calcutta (Birkenhead, August 24) ; s.s. Hesione for Bombay and Persian Gulf (Birkenhead, August 26).

Cunard Line.—S.s. Tyria for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk, Poti and Batoum (Glasgow, August 18) ; s.s. Phrygia for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Swansea, September 5).

Ellerman Line.—S.s. Cressado for Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, Ancona, Venice and Trieste (Liverpool, August 17) ; s.s. Gerano for Gibraltar, Patras, Piraeus, Syra, Volo, Salonika, Constantinople, Bourgas and Varna (Liverpool, September 2).

Ellerman's "City" Line.—S.s. City of Christiania for Calcutta (Birkenhead, August 10) ; s.s. City of Poona for Calcutta (Birkenhead, August 30).

Ellerman's "Hall" Line.—S.s. City of Hankow for Bombay, Karachi, the Punjab and Malabar Coast ports (Liverpool, August 22) ; s.s. City of Simla for Bombay, Karachi and the Punjab (Liverpool, August 30).

Ellerman's Westcott and Laurance Line.—Regular sailings fortnightly for Malta, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

Glen Line.—S.s. Glenapp for Port Said, Port Swettenham, Singapore, etc. (London, August 24) ; s.s. Glengarry for Port Said, Port Swettenham, Singapore (London, September 7) ; s.s. Carnarvonshire for Port Said, Port Swettenham, Singapore, etc. (London, September 21).

Harrison Line.—S.s. Architect for Calcutta (Liverpool, August 31).

Henderson Line.—S.s. Martaban for Port Said and Rangoon (Birkenhead, August 23) ; s.s. Henzada for Port Said and Rangoon (Birkenhead, September 6).

Holt Line.—S.s. Agamemnon for Port Said, Port Swettenham, Singapore, etc., (Glasgow, August 17) ; s.s. Helenus for Port Said Port Swettenham, Singapore, etc. (Glasgow, August 17) ; s.s. Knight Garter for Port Said, Port Swettenham, Singapore, etc. (Swansea, August 17) ; s.s. Polyphemus for Port Said, Port Swettenham, Singapore, etc. (Swansea, August 24) ; s.s. Yangtsze for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, August 31) ; s.s. Teucer for Port Said, Port Swettenham, Singapore, etc. (Swansea, August 31) ; s.s. Philoctetes for Port Said, Port Swettenham, Singapore, etc. (Glasgow, September 7) ; s.s. Demodocus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, September 7).

Johnston Line.—S.s. Dromore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, August 19) ; s.s. Wingate (to be re-named Vedamore) for Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, August 26) ; s.s. Willowmore for Galatz and Braila only (Liverpool, September 7).

Moss Line.—S.s. Assiout for Gibraltar, Algiers, Malta and Alexandria (taking cargo by transhipment for Moroccan, Algerian, Syrian, and Cyprus ports), (Liverpool, August 19).

Papayanni Line.—S.s. City of Oxford for Melilla, Malta and Alexandria (Liverpool, August 26).

P. & O. Line.—S.s. Kaisar-I-Hind for Bombay (London, August 25) ; s.s. Caledonia for Bombay (London, September 1) ; s.s. Perim for Colombo, Madras and Calcutta (London, September 9) ; s.s. Delta for Bombay (London, September 9).

The output of the Anglo-Egyptian Oilfields for the week ended August 4 amounted to :—Gemsah, 38 tons (last week 30 tons). Hurghada, 3,438 tons (last week 2,421 tons).

Stock and Share Markets.

MARKETS GENERALLY QUIET.

Oils Firm.

(*From Our Own Correspondent.*)

London, Tuesday Morning.

On the whole the markets have been very quiet during the past week, the tendency being to await the issue of the Allied Conference. The fact that it had practically failed was not known before the Stock Exchange closed yesterday, otherwise prices would have eased off somewhat. To-day we shall see the effects, but I do not imagine they will be very pronounced since for a long time it has been very obvious that the Stock Exchange is not now influenced as it used to be by what happens abroad. Otherwise it would be impossible that shares should stand at their present levels with conditions in Europe as they are at present.

Once again we are faced with a more uncertain outlook, and it is evident that it is of not the slightest use to look for brighter markets until the reparations question is finally decided and in other directions things are more settled. Once political affairs present no difficulty there is no doubt that we shall see buoyant markets which will fully compensate holders for waiting since there is no question at all that despite the many obstacles and handicaps trade is beginning to go ahead. Those who want statistical proof of this have only to look at the last trade figures for this country.

Gilt-Edged Quiet.

Gilt-Edged have been quiet but fairly steady. Consols have gained 1-16 at 58.11-16, the Conversion Loan at 76.3-8 is 5-16 down, while War Loan Fives are 3-16 up at 100.5-8. Indian stocks have shown a tendency to ease off somewhat. The Seven per Cent. Loan is ½ down at 119, the 3½ per cent. Loan is unchanged at 68¼, while the 3 per cent. Loan has shed ¼ at 58½. The Sudan 5½ per cent. Loan has gained ½ at 110.

An uncertain tone has ruled in the Foreign group as a result of the weakness of the exchanges. French stocks have exceptionally been firm. War Loan Fives are unchanged at 38½, while the 4 per cents. remain at 29½. German 3 per cents. have been dull, closing 1-16 down at 1.11-16. Italian Rentes are steady at 21. Russians have sagged, the 4 per cents. being 2 down at 5½, while the 5 per Cents. have shed a point at 11. Greek Monopolies are 34½. Czecho-Slovak Bonds have further weakened, and are 2½ down at 84½.

Industrials Featureless.

There is little that calls for comment in the Industrial group. Business has remained on a very restricted scale, and it is evident that buyers are waiting on developments. A few bright spots have relieved the market from dullness. Harrods, for instance, hardened on the resumption of interim dividends. The rise in Home Rails has apparently come to an end, and no doubt people are beginning to realise that in view of the demand for the reduction of rates and lower fares the rates of dividends must be problematical in the future.

Tobaccos have continued a firm spot, Bats being 3s. 9d. up at 88s., while Imperial Tobaccos at 68s. 3d. show a gain of 2s. Textiles have been steady. Courtaulds are 1s. up at 51s. 3d., while Coats have gained 9d. at 65s. 3d. In Iron and Steel securities Armstrongs are 6d. down at 15s. 6d., Guest Keens are 6d. up at 35s. 6d., while Vickers are 3d. down at 12s. In Indian railways Bengal and North Westerns are 2 up at 138, Burmas are 1-8 up at 101.1-8, and Madras and Southern Mahrattas are 105.1-8.

In Shipping securities P. and O. Deferred are 7d. up at 310. Cunards are unchanged at 20s., and Furness Withys are 1s. up at 32s.

Oils Better.

In view of the exchange fluctuations the tone of the Oil market this week can only be described as surprisingly good.

Burmahs have been a firm spot, and at 5¼ are 1-32 up. Mexican Eagles at 3.3-32 show a considerable rise on the week. In Trinidad issues Apex are about the same at 2.1-16, Centrals are harder at 1.5-8, while Leaseholds are unchanged at 1.1-16.

Among Egyptians Anglo-Egyptian B at 1.7-16 are slightly better, while Oilfields of Egypt are 3d. up at 4s. In the Roumanian group Phoenix have improved on the progress report, and at 28s. 6d. are 1s. 10½d. up. Steaua Romanas are 1s. up at 10s. 9d., Dacia Romanos are 7-8, while Roumanian Consolidated are 1½d. up at 17s. 6d.

LONDON PRODUCE REPORT.

Lemon Demand Improving.

(*From Our Own Correspondent.*)

London, Monday Evening.

Sugar.—Home refined has been in good demand at unchanged rates. Tate's cubes have remained firm at 60s. as also mineral water sugar at 52s. 9d. London granulated and Lyle's granulated are unchanged at 52s. 3d. and 52s. 6d. respectively. Export descriptions have been irregular. West Indian crystallised shows no change at 44s. 6d. and white Mauritius has shed 1s. at 48s. 6d. White Java is 1½d. down at 22s. Cane sugar quotations are :—August, 20s. 6d. ; and September 20s. 6d. White sugar quotations are :—August, 24s. ; September, 23s. 3d. ; October, 22s. 6d. ; November, 22s. 3d. ; December, 22s. 3d. ; and October-December, 22s. 6d.

Coffee.—Business has been quiet. East Indian at 112s. and Costa Rica at 100s. have remained steady. Nairobi is firm at 100s. The futures market has been weak. Quotations are :—September, 63s. ; December, 60s. 6d., and March, 60s. 3d.

Dessicated Coconut.—The market is still in a critical state owing to arrivals being greatly in excess of the demand.

Rice.—Restricted business continues. American Java rices have been the only growth in favour, while quotations have advanced a little.

Green Fruit.—The arrivals of South African oranges this week have been the largest on record for this season, while the demand has been so good that the fruit has been cleared almost as soon as discharged from the vessels. There have been signs of improvement in the lemon market, especially for best parcels which have shown a good demand. Messina fruit is almost unsaleable owing to the bad condition, which has been caused during the past weeks of inactivity. Valencia onions continue to be in good favour, although not so good as last week. Prices have eased off considerably.

Oilseeds.—All prices have declined. Indian linseed has dropped 1s. 3d. at 19s. 7½d., and La Plata is 7½d. down at 18s. 9d. Rapeseed is lower with Toria at 17s. 10½d., a decline of 7½d. Cottonseed is lower in all cases. Egyptian black has shed 9d. at 11s. Sakellaridis and Indian are both 6d. down at 10s. 3d. and 8s. 9d. respectively.

Oils.—Unsteadiness has been in evidence. Linseed oil has shed eighteenpence at 43s. 6d. Rape oil has been firm with crude at 43s., and refined at 46s. Cotton oil has been variable. Egyptian crude, technical, and refined have all shed 6d. at 40s. 6d., 41s., and 47s. 5d. respectively. Deodorized at 53s. is unchanged.

Oilcakes.—Prices have been variable. Cottonseed-cake at 190s. ton is steady as also coconut-cake at 210s. ton. Cotton-meal-cake and linseed-cake have both shed 10s. at 290s. and 270s. respectively.

IRAQ'S BUMPER HARVEST.

Date Crop Promising.

A correspondent in Iraq, in a letter just received, emphasises the favourable agricultural position in that region. He writes :—

Iraq has had a wonderful harvest this year, and at the end of June winter cereals were beng harvested in an over ripe condition due to the fact that very much larger areas were sown last winter than it has been possible to harvest economically without the help of labour-saving machinery. This late harvesting adversely affects the amount of atttention cultivators are giving to their cotton this year ; in the majority of cases it is owing largely to the fact that as long as wheat remains standing, everything else has to wait.

It has been reported that 18,000 tons of Iraq grain have been sold on the London market this year, a second shipment for the Home market consisting of 5,000 tons in bulk, is being loaded this week. To those who have the interest of the country at heart this is a most hopeful sign and a sure indication of the increased prosperity of the country.

The date crop is very promising, but the increase in the export duty from 1 per cent. to 3 per cent. is not at all popular. Date trees are subject to a variety of diseases, the more common being those known as the "Mann" and the "Toz" or "Gubar." The former yields to simple spraying operations, and it is believed the disease could be effectively eradicated if the spraying was carried out at the right time. "Toz," which can also be effectively controlled by spraying, has a most deleterious effect on both the quality and quantity of the crop, and the necessity of legislative control measures for its eradication is worth serious consideration.

AGRICULTURAL SITUATION IN IRAQ.

Prospects for Wheat Export Favourable.

The following extracts are taken from the Agricultural Bulletin of Iraq for the month ended June 15 :—

During May the mean maximum and mean minimum temperatures in Baghdad were 97.7 degrees F. and 70.5 degrees F. as compared with 93.85 degrees F. and 68.1 degrees F. respectively for the previous 33 years. The relative humidity was 34 per cent. as compared with a recorded average of 50 per cent. The total rainfall for the current rainy season up to the end of May was 9.32 inches as compared with a recorded average of 6.97 inches. The extreme maximum during the month was 112.0 degrees F. The absolute extreme for May on record is 112.6 degrees F. In Basrah the extreme maximum recorded during the month was on the 27th when the temperature reached 116 degrees F. Winter cereals continue to be harvested in over-ripe condition. This is due to the fact that a very much larger area was sown last winter than it has been possible to harvest economically without the help of labour-saving machinery.

Excellent Crop Outlook.

Water supply appears to have been ample throughout the month. Crops generally are reported to be in good condition. The Baquba fruit crop is said to be rather small this year, but good yields of grapes and pomegranates are being obtained. Summer vegetables are plentiful, but market gardeners are finding prices so low that they do not pay for transport. Early sown rice is progressing favourably. Sesamum is being more widely sown in this than in former years. Threshing has become general throughout, and with the anticipated large surplus of wheat and barley, there is much talk of export.

Grazing on stubble is still sufficient in the riverain tracts. This year has, so far, been an exceptionally good one for stock, and owing to the unlimited supplies of cheap fodder and barley, there is every chance of their condition being well maintained throughout the hot weather.

Experimental Farms.

Varietal tests of wheat have been harvested at Kut, and Baquba, and are now being threshed and weighed. Resowings of cotton experiments have been completed, and fassing is in progress. Flax has been despatched to Baghdad where arrangements are in progress for retting it. Shortage of staff at Rustam is holding up the regular compilation of statistics. This, it is hoped, will very shortly be remedied.

Digitized by Google

Research.

Work is being commenced on a preliminary investigation into the manurial value of river silt. The report on the 1922 locust campaign has been completed. Measures for the control of "Mann" disease of dates are being carried out at Muadthm in continuation of last year's experiments. These consist of simple spraying operations which have really gone beyond the experimental stage, and it is believed the disease could be completely eradicated if spraying were conducted at the right time. The disease known as "Toz" or "Gubar" can also be very effectively controlled by spraying. The deleterious effect of this disease both as regards yield and quality is such that the necessity of legislative control measures is worth serious consideration.

Varietal, date-of-sowing, and irrigation tests of cotton are progressing satisfactorily. Growth and flowering observations are also being taken. Results of varietal tests, and pure line sowings of wheat and barley are being collated.

District Work.

The late harvest is having an adverse effect on the amount of attention which cultivators are giving to their cotton this year. There are, it is true, a few promising cultivators who are really getting down to it, and giving the crop all possible attention, but in most cases it is not getting a fair trial, owing largely to the fact that as long as wheat remains standing, everything else has to wait. Every endeavour is being made to get cotton growers to cultivate and single their cotton, but with varying success. When the first pickings commence, however, there will, in all probability, be a different tale to tell. The object of giving care and attention to the crop will be brought to the notice of indifferent cultivators when they see their painstaking neighbours receiving more money as a result of their industry. This will be all the more forcibly brought home to them when it is discovered that most other produce is a drug on the market.

The result of the locust investigations this year goes to show that little, if anything, can be done to control this serious pest in the Mosul Area until cultivators realize that early action is necessary to destroy the young swarms before they have got to an advanced stage. The two contacticides under trial were successful in that they had a deadly effect on the locusts, but this method of attacking the problem is so costly as to render it impracticable.

Prices of wheat, barley and vegetables continue to fall. The days of high prices for any quality of grain have come to an end, probably not before time. Some are saying that things are getting back to pre-war conditions, but this is not so. Prices may continue to drop to a point even below pre-war, but there is this difference: the cultivator for the past six or seven years has been learning the value of money, a commodity which he rarely saw in the old days when his labour was valued in terms of so much wheat or barley. He may continue to be paid in wheat or barley, but now he mentally converts it into rupees and finds he either has to get a bigger share of the crop, or grow a crop which will fetch a higher price. That cultivators are already realizing this is evident from the fact that several are already asking about the supply of cotton seed for next year, and one enterprising fellow has even declared his intention of growing flax this coming winter.

ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud & Co., Smyrna report as follows for the week ending July 29:—

Sultanas.—The total estimated arrivals amounted to 465 bags; the total estimated sales came to 365 bags while the estimated stock unsold totals 100 bags.

Shipments.—2,800 boxes of sultanas are being loaded on the Assyrian for Liverpool, while the following steamers are loading with sultanas: s.s. Rhea for Amsterdam, sailing on August 5; s.s. Ionier for Antwerp, due on August 5; s.s. Esneh for Liverpool, due August 10, and s.s. Sardinian, for London, due on August 10.

Markets.—Total arrivals of new season's sultanas amount to about 80 tons so far. All the finer grades have met with a ready sale at 93s. to 98s. c.i.f., but shippers show no inclination to touch the inferior sorts for early consignment. All supplies coming forward during the next fortnight will doubtless be early absorbed for consignment to the U.K. and Continental markets. Shippers are endeavouring to depress prices, but unless supplies overtake requirements, an adjustment in values to a lower level cannot be expected. Weather conditions somewhat unsettled. Exchange for sterling weak at 715-720.

LIQUOR INDUSTRY IN CZECHO-SLOVAKIA.

According to the report of the Czecho-Slovak Spirit Commission the production of spirituous liquors during the season 1920-1921 amounted to 648,083 hectolitres, of which 340,916 were made in the agricultural distilleries. The total production exceeds that of the previous season by 244,95 hectolitres. The home consumption amounted to 455,478 hectolitres, exports to 53,419 and 128,128 hectolitres were kept in hand as reserve stock.

CURRENT PRICES.

General Produce.—Bacon (Continental), 142s. cwt.; (Canadian), 130s. cwt.; (American), 118s. cwt.; butter (Danish), 203s. cwt.; (Australian) 184s. cwt.; (New Zealand), 193s. cwt.; cheese (Canadian), 87s. cwt.; (New Zealand), 86s. 6d. cwt.; lard 70s. 6d. cwt.; eggs (Danish), 15s. per 120; (Styrian), 11s. 3d. per 120; chillies 40s. cwt.; cloves (Zanzibar), 1s. 1d. lb.; cocoa (Ceylon good to fine), 85s. cwt.; coffee (Costa Rica), 120s. cwt.; (East Indian), 112s. 6d. cwt.; (Central American), 97s. 6d. cwt.; (Jamaica), 72s. 6d. cwt.; (Mocha Longberry), 104s. cwt.; (Santos superior), 69s. cwt.; (Nairobi), 96s. cwt.; ginger (washed Cochin), 98s. cwt.; nutmegs (110's to 80's), 11½d. lb.; pepper (Singapore black), 4d. lb.; (Muntok white), 7½d. lb.; pimento, 2.1-8d. lb.; raisins (Cape), 57s. 6d. cwt.; currants (Vostizza), 50s. cwt.; currants (Amalias), 53s. cwt.; sultanas (Smyrna), 112s. 6d. cwt.; sugar (Tate's cubes), 50s. 6d. cwt.; (Lyle's granulated), 52s. 4½d. cwt.; (Mauritius crystals), 49s. 3d. cwt.; (West Indian crystallised), 45s. 3d. cwt.; (centrifugal), 19s. 4½d. cwt.; tapioca (fair Singapore), 2d. lb.; rice (Rangoon No. 2), 15s. 4½d. cwt.; (bran Rangoon), £6 17s. 6d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 2s. 1½d. lb.; tea (Indian, common to good common), 11d. lb.; (medium to good), 1s. 3½d. lb.; (fine to finest), 2s. 7½d. lb.; Ceylon (common to good common), 11½d. lb.; (medium to good), 1s. 3½d. lb.; (fine to finest), 2s. 7½d. lb.; Java (common to good common), 8½d. lb.; wheat (English white), 54s. qr.; wheat (Australian), 56s. 9d. qr.; oats (English), 38s. qr.; oats (La Plata, ex-ship), 26s. 4½d qr.; maize (La Plata), 40s. 3d. qr.; flour, 42s. 6d. sack.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 8¼d. lb.; citric, 2s. 7d. lb.; tartaric, 1s. 6d. lb.; ammonia (sulphate), £15 11s. 9d. ton; arsenic (white powdered), £42 ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £12 10s. ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 113s. cwt.; Potassium: Bichromate, 6½d. lb.; chlorate, 3d. lb.; caustic, £32 10s. ton; nitrate, £37 10s. ton; permanganate, 9¾d. lb.; prussiate yellow, 1s. 3½d. lb.; sulphate (90 per cent.), £14 15s. ton; Sodium: Crystals, 115s. ton; bi-carbonate, £11 2s. 6d. ton; bichromate, 5½d. lb.; alkali (58 per cent.), £8 6s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £21 ton; hyposulphite, £16 ton; prussiate, 9½d. lb.; nitrate, £13 7s. 6d. ton; glycerine (crude 80 per cent.), £60 ton; glycerine (industrial 1260 per cent.), £87 10s. ton; lemon oil, 3s. 4½d. lb.; quinine, 2s. 2d. oz.; red lead, £39 5s. ton; white lead, £42 ton; white ground lead, £49 15s. ton; sulphate of copper, £26 8s. ton; sulphate of iron, 60s. ton.

Metals.—Aluminium, £100 ton; antimony (English Regulus), £28 ton; bismuth, 9s. lb.; copper (standard), £65 6s. 9d. ton; copper (electro), £71 10s. ton; gold bars, 92s. 8d. oz.; iron (No. 3 Cleveland), 88s. ton; hematite (mixed number), 92s. 3d. ton; galvanized sheets (25 G), £16 ton; lead (soft foreign), £24 18s. 9d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 32s. 6d. unit; nickel, £155 ton; platinum, 375s. oz.; graphite (80-90), £13 10s. ton; quicksilver, £11 8s. 9d. bottle; spelter (G.O.B.), £31 11s. 3d. ton; tin (standard), £160 18s. 9d. ton; wolfram, 14s. unit; zinc sheets, £36 10s. ton; tin plates (20 by 14), 4½d. box; silver bars, 35d. oz.

Hides and Skins.—Ox and Heifer (first), 90 lbs. and up, 9.3-8d. lb.; 80 to 89 lbs., 9.3-8d. lb.; 70 to 79 lbs., 8.7-8d. lb.; 60 to 69 lbs., 8d. lb.; 59 lbs. and under, 6½d. lb.; (second), 90 lbs. and up, 8d. lb.; 80 to 89 lbs., 8d. lb.; 70 to 79 lbs., 7½d. lb.; 60 to 69 lbs., 6.5-8d. lb.; 59 lbs. and under, 5d. lb.; Cows: (first), 60 lbs. and up, 7¼d. lb.; 59 lbs. and under, 6.5-8d. lb.; (second), 60 lbs. and up 5¼d. lb.; 59 lbs. and under, 5d. lb.; Bulls: (first), 5d. lb.; (second), 3½d. lb.; Kips (first), 5d. lb.; (second), 4d. lb.; (third), 3¾d. lb. Calcutta Market. Prices in rupees per 20 lbs.:—Arsenic hides (cows): Agras, 7 to 12 (7.8 to 12); Durbhangas, 6 to 7 (6 to 7.8); Patnas, 5 to 6 (5 to 6). Salted cows, 6 to 8.8 (5 to 8). Arsenic hides (buffalo), 3.8 to 6.8 (4 to 7). Skins: Calf, 8 to 10 (8 to 10) per 20 lb.; goat, 190 to 260 (190 to 260) per 100 pieces.

Miscellaneous.—Cotton (American), 13.16d. lb.; Egyptian (Sakel), 16.50d. lb.; jute (first grade c.i.f.), £33 ton; jute (lightnings), £30 ton; Oilseeds: Linseed (La Plata), £19 10s. ton; palm kernels, £17 13s. 9d. ton; castor seed (Bombay), £19 11s. 3d. ton; sesame seed (China), £26 2s. 6d. ton; soya beans, £12 15s. ton; Oils: Linseed, £44 10s. ton; olive (Spanish) £75 10s. ton; rape (crude), £43 10s. ton; soya, £40 10s. ton; petroleum, 1s. 4½d. gallon; petrol, 2s. 1d. gallon; fuel oil (ex-tank), 72s. 6d. ton; coconut (Ceylon), £39 2s. 6d. ton; cotton (crude), £41 15s. ton; ground nut, £45 15s. ton; Rubber: Plantation (No. 1 crepe), 7½d. lb.; smoked sheet, 7½d. lb.; fine hard Para, 10¼d. lb.

SPECIAL MARKET REPORTS.

Palestine Market Outlook.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :

Jaffa, July, 25.

Business in general is at a standstill. A decrease of about 10 per cent. has been experienced in ironmongery, fuel, leather goods, textiles, woollen articles, groceries, and of 20 per cent. in oil, grease and paint, while fertilizers have increased by about 10 per cent.

A drop of about 10 per cent. has been caused in Transjordanian and Palestinian grain by imports of flour from foreign countries. Owing to the unfavourable condition of the crops this year, the general opinion is that prices will tend to increase for Palestinian and Transjordanian grain.

The export of Jaffa water melons to Egypt, Syria, etc., has been increasing on a favourable scale and good prices are being realised.

Constantinople's Flour Arrivals.

Constantinople, July 31.

Flour.—As a result of large arrivals of flour during the week prices have given way here. Quotations (per sack of 63 kilos) :—Nelson Ps. 870, Goldstar Ps. 850, Apollon Ps. 725, Duran Ps. 770, while native flour is Ps. 700-725 per sack of 72 kilos.

Cereals.—719 tons of wheat have arrived from Bulgaria. Quotations (per oke) :—wheat, in customs, Ps. 12, rye, in customs, Ps. 9½, maize, in transit, Ps. 7, barley, in customs, Ps. 8½.

Mosul Wool Market Active.

Mosul, July 15.

The wool market is more and more active, the price of unwashed wool being at present Rs. 11 per batman of 13.1-3 kilos as compared with Rs. 8.8 on June 15. Salted guts have fallen during the week to Rs. 50 per 100 pieces as compared with Rs. 80.

CONDITIONS AT PANDERMA.

A report received by the Imperial Ottoman Bank from Panderma covering the month of June states that business during that period has been almost nil. The arrivals of new cocoons from the neighbourhood have alone imparted a certain activity to the market. Up to the present they are estimated at about 83,000 kilos, and the price varies between Ps. 167 and Ps. 170 per kilo. The yield of the crop, it is expected, will not be more than 113,000 kilos.

According to a statement of the Austrian Finance Minister, M. Segur, who last week negotiated with the Prague Government, the largest portion of the second half of the Czech credit (230 million Czech crowns) will be at the disposal of the Austrian Government in a month's time. M. Segur has also received definite assurance that the Czecho-Slovak Government will raise no objections to the participation of Czecho-Slovak banks in the subscription of capital for the new Austrian Note Bank.

Cotton & Cotton Goods.

MANCHESTER COTTON MARKET.

Good Inquiry for Piece Goods.

(From Our Own Correspondent.)

Manchester, Saturday.

The market during the past week has been seriously disturbed by the easier tendency in raw cotton rates. Values sagged with the result that buyers have operated very cautiously. At the same time the opinion is prevalent that many operators are nursing orders, but it must be said that there is still a great dread of any depreciation in values. If raw cotton rates would only display some stability then in all probability quite a good business would be done. Many ups and downs, however, are to be expected at this time of the year when the American cotton crop is passing through the most critical period. With regard to cloth no transactions of any importance have taken place for Egypt the Levant and Constantinople. The majority of the offers have proved entirely impracticable. Quotations for Egyptian yarns have fluctuated and the turnover has not been anything to boast about. Rather more piece goods inquiry has been met with for India and certain prominent shippers have operated on freer lines, and some substantial contracts have been arranged. From cable reports the monsoon in our Dependency is proving very favourable and there is every probability of a much larger business being done in the near future. Small transactions in a variety of fabrics have taken place for China. Isolated sales have been recorded for the smaller Far Eastern outlets. Home trade buying has been patchy. American yarn prices have been easier and many weak sellers have been met with, but on Friday quotations were much steadier. Users have only taken up small lots to meet their immediate requirements.

LIVERPOOL REPORT.

Enquiry Limited.

Messrs. Reynolds & Gibson report as follows for the week ended August 9 :—

The demand for spot cotton has been greatly affected by the rapid fall in values witnessed during the past few days and until some degrees of stability returns, it cannot be expected that spinners will purchase beyond their bare requirements, and then only when they are absolutely obliged to have cotton to keep the mill running. The enquiry has been limited and calls for little comment, the major position of the sales are made up of Sakel cotton, grading from Fully Fair to Fully Good Fair, apart from one or two small lots of Uppers ; all the other qualities have been neglected, a state of affairs that has also ruled in the better grades of Sakel, and for low and recleaned cottons. Trade reports show that little business is being put through in yarns, and it will probably take some little time for manufacturers to adjust their prices to the present level. Sudan and Tokar cottons have been dealt in to a moderate extent, but prices obtained are decidedly on the easy side, this particularly applies to the better grades of this season's crop of Tokar Sakel. White Sudans have been neglected. The estimated sales amount to 2,000 bales (including 700 bales Sudan) against 3,300 bales (including 700 bales Sudan) last week. Quotations are reduced 150 points for Sakel and 100 points for Upper and Brown. Fully Good Fair Sakel 16¾.

THE EGYPTIAN MARKET.

Market Depressed.

The Commercial Co. of Egypt, in their report for the week ended August 3 state :—

Futures.—The market during the past week has been extremely nervous ; the undertone has been decidedly weak. There is not much to say on the market. The continued absence of trade demand is mainly responsible for the weakness which has prevailed throughout the week, whilst the rapid fall of the German mark and the unsatisfactory condition of certain other currencies have likewise contributed their depressing influence. Present prices do not appear unreasonable and we think that consumers would do well to take advantage of the weak markets to secure part, at least, of their requirements.

Spot.—Total sales this week amount to about 4,300 bales of which we estimate 3,200 bales Sakellaridis, 900 bales Uppers, 150 bales Brown and 50 bales Pilion. The market will be closed to-morrow, Friday, for the native festival of Courban Bairam.

Sakellaridis.—The demand this week has been slightly better but still remains in the same grades. Fully Fair to Fully Good Fair, with a small interest in Low cotton, Middling Fair to Fair. The basis remains unchanged.

Uppers.—Much less interest has been shown in this variety. All grades have been dealt in. The basis remains unchanged.

Various.—A small business has been done in Brown, Fully Good Fair and below, at reasonable prices. Some business has also been done in Pilion, Fully Good Fair.

Crop.—Reports from the interior continue to indicate good progress. Bolls are maturing well and in the early plantations of Upper Egypt are already opening. Temperature has been somewhat lower than last week.

MANCHESTER COTTON REVIEW.

Quiet Tone Continues.

The cotton trade review of the Imperial Ottoman Bank for the week ended August 12 states :—

General.—The exceedingly quiet state of affairs reported during recent weeks has again prevailed. Business continues to be very difficult to secure, and the position of spinners and manufacturers gradually weakens. Nevertheless, during the past week there has been some indication, although slight, that the lower range of values is tempting buyers abroad to reconsider their position, thus confirming the opinions of those who hold that the essential thing for the time being as regards the cotton trade is a reasonable measure of stability. It appears quite clear that any attempt to raise prices materially on the strength of a possible cotton shortage, or on any problematical pretext, simply has the effect of cutting off demand. When improvement in prices comes Manchester wants to see it the result of steady trade rather than of speculative activities based on crop forecasts.

Yarn.—Prices of yarn have weakened in sympathy with the substantial fall in raw cotton and there is still a good deal of pressure to sell. Merchants continue to purchase only for immediate requirements and trade is, consequently, of a hand to mouth character.

Cloth.—The same remarks as are made above with regard to yarn may be said to apply equally to cloth, although possibly enquiry this week has been of a rather more encouraging nature than in those immediately preceding. The feeling still prevails that the big purchasing centres in the Far East are only waiting their time to place large orders when they think the proper moment has arrived, but it is quite evident that they are not to be scared into precipitate action. The Near East and other smaller outlets abroad remain quiet and there is very little doing in the home trade.

Raw Cotton.—There was a pronounced fall in the price of raw cotton during the early days of the week, following on better weather reports from the United States, coupled with the lack of confidence in the Bureau report. Consumers seem in no hurry to lay in stocks of cotton even on the present basis, and prefer to wait until actual demand for goods makes purchases essential. Closing prices are as follows :—American Fully Middling 12.60, last week 13.16 ; Egyptian Fully Good Fair 17.25 ; last week 18.00.

On August 21 the head office of the Anglo-Egyptian Bank will be transferred to 37-39, King William Street, E.C.4.

Advice has been received from the Société Algierenne des Petroles de Thouanet—in which the Algerian Oilfields, Ltd., is so largely interested—that the output for July was 135 tons. Well No. 23 has now reached a depth of 140 metres and well No. 26, 40 metres.

'BALKAN' NATIONAL INSURANCE COMPANY.
FOUNDED 1895

OIL NOTES AND NEWS.

Phoenix Oil Progress.

The Phoenix Oil and Transport Company has issued the following circular :—

It will be remembered that the general meeting held in December last was adjourned until such date as the accounts of the company to the 31st December, 1921, were ready for presentation. Every possible effort has been made to expedite the completion of the Roumanian accounts, which are so interwoven with those of the allied companies, and therefore so voluminous, that it has been impossible to get them ready within the time anticipated. Your directors, however, are informed that the work is now practically completed, and hope shortly to receive Messrs. Price Waterhouse and Co.'s report upon them. It will then be necessary to consolidate these accounts with the London figures, and no time will be lost in presenting them to the shareholders.

Meantime your directors are pleased to report that excellent progress is being made on the company's properties, a regular and substantial production (particulars of which are published monthly in the Press) is being obtained, and the extensive drilling programme has been recently further advanced ; and the refinery is running at practically full capacity. Further, your company has recently acquired an interest in the Orion Petroleum Company on most advantageous terms, as well as entered into agreements for co-operative working with that company, which your directors consider will add materially to your company's prosperity, and details of this and all the company's other activities will be given to the shareholders at the forthcoming general meeting,which your directors hope it will be possible to hold shortly.

Report for July.

The progress report of Phoenix and allied companies for July shows that the month's total crude oil production was 5,830 tons. The throughput of the refinery for the month was 6,140 tons. No. 5 well in the Moreni Stavropoleo district continues its regular flow, and well No. 1 in the Runcu district made several flows during the month, and is gradually clearing itself. Well No. 27 in the Bordeni district struck the oil sand at 1,055 ft., and has now been capped pending arrangements being completed for dealing with production.

The position of the wells in drilling at the end of July was as under :—Moreni Stavropoleos well No. 8 ; Depth 1,102 ft. ; well No. 16, preparing site ; derrick cut out. Tuicani well No. 2, Depth 1,026 ft. ; Baicoi well No. 5, Depth 1,601 ft. ; extracted drill stem and bit from well. Ready to deepen. Chiciura well No. 2 : Depth 1,521 ft.; completed rigging up for rotary and ready to resume drilling. Well No. 3 : Depth 1,946 ft., set 12 in. column ; now drilling. Runcu well No. 2 : Depth 1,685 ft. Well No. 3 : Depth 585 ft,: Well No. 4 : Depth 49 ft. Well No. 5 : preparing site. Bordeni well No. 15 : Depth 1,157 ft. Arbanasi well No. 10 : Depth 1,689 ft.

NEW COMPANIES

J. A. Begbie.

Messrs. J. A. Begbie & Co. was registered on July 27 as a private company with a capital of £30,000 in £1 shares. Objects :—To acquire business carried on in London, Bombay and Rangoon by A. R. Finlay, D. K. Love, and P. J. Arnot as J. A. Begbie and Co., with the right to use that name and certain specified assets ; agreement with said vendors, Edith M. Begbie, M. Widdowson, and others, merchants, traders, etc. Registered office, Dashwood House, Old Broad Street, E.C.

Anglo-Eastern Finance Corporation.

The Anglo-Eastern Finance Corporation, Ltd., has been registered with a nominal capital of £250,000, in £1 shares. Objects:—to carry on the business of financiers, underwriters, dealers in stocks, shares and securities of all kinds, concessionaires and merchants ; to acquire rights or other interests in respect of petroleum and other oil-bearing lands, and to adopt an agreement with J. A. Wattie & Co., Ltd. Registered office 39, Lombard Street, E.C.

Amalgamated Oil Lands of Roumania.

The Amalgamated Oil Lands of Roumania, Ltd., has been registered at Somerset House with a nominal capital of £460,000 in £1 shares. Objects :—To adopt an agreement with the National Mining Corporation, Ltd., to acquire any petroleum or oil-bearing lands or interest therein, pipe-lines, or any rights connected with the getting or winning of petroleum or other oil, and to carry on the business of producers, refiners, storers, transporters, suppliers, sellers, and distributors of petroleum and other oils and any products thereof, importers, exporters, wharfingers, barrel and container manufacturers, merchants, carriers, shipowners and charterers, lightermen, barge owners, etc. The minimum subscription upon which the directors may proceed to allotment is seven shares. The directors are :—J. A. Agnew (director National Mining Corporation, Ltd.,) ; F. C. Baker (director, Bwana M'Kubwa Copper Mining Co., Ltd.) ; J. Birkenruth (director, Consolidated Gold Fields of South Africa, Ltd.) ; A. H. Collier (director, Ivanhoe Gold Corporation, Ltd.). The registered office is at Salisbury House, London Wall, E.C.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.
(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade. 35 Old Queen Street. S.W.)

Egypt.

Locomotives.—The General Manager, Egyptian State Railways, Cairo Station, invites tenders for the supply of locomotives. October 12.

Waterworks.—The Director of Technical Services, Section of Municipalities and Local Commissions, Savoy House, Cairo, invites tenders for the extension of waterworks system at Tala. August 20.

Forage.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of forage required for six months commencing October, 1922. Offers will remain valid for ten days from August 28, 1922, and delivery effected within five days from date of order. Conditions of tender and specification are obtainable from Stores Department, Arsenal. August 28.

Tierol (for denaturing ethyl alcohol.)—The Egyptian Customs Administration invite tenders for the supply of 3,000 litres of Tierol required for denaturing ethyl alcohol. Tenders, which must be submitted in sealed envelopes addressed to the Director-General of Customs, with the object of the tender indicated thereon, together with a sample of Tierol proposed, will be accepted at the office of the Chief Inspector of the Customs Administration, Alexandria, up to noon, October 2. (D.O.T.)

Sleepers.—The General Manager, Egyptian State Railways, Telegraphs and Telephones, Cairo Station, invites tenders for the supply of wooden sleepers. September 7.

Money Safes.—The Central Stores, Ministry of Finance, Cairo, invites tenders for the supply of iron money safes. August 19.

India.

Copper Plates for locomotives, Zinc Tiles or Slabs, Steel Wire, Dowlas.—The High Commissioner for India invites tenders for the supply of :—

	No.
Copper plates for locomotives, various descriptions	126
	Cwt.
2. Zinc tiles or slabs	2,500
3. Steel wire annealed :	
Galvanised	700
Black	680
	Yards.
4. Dowlas, brown, drab and white	11,450

Forms of tender may be obtained from the Director-General, India Store Department, Belvedere Road, Lambeth, S.E.1., and tenders are to be delivered at that office not later than 2 p.m. on Friday, August 25, 1922, for No. 1, and on Friday, September 1, 1922, for Nos. 2 to 4.

Stationery.—The Burma Railways Company, Limited, invites tenders for the supply of stationery, etc. Tenders enclosed in sealed envelopes endorsed " tender for stationery, etc.," must be delivered at the company's offices not later than Monday, August 21.

Dining Car Underframes, etc.—The Bengal-Nagpur Railway Company, Limited, invites tenders for the supply of 23 carriage and dining-car underframes, 5ft. 6in. gauge. Specification and form of tender can be obtained at the Company's offices, 132, Gresham House, Old Broad Street, London, E.C.2. August 24.

Goods Wagons.—Tenders are invited for the construction in India and delivery during the year ending March 31, 1924, of 3,000 goods wagons for broad and metre gauge railways of types to the standard designs of the Indian Railway Conference Association. Tenders should reach the secretary, Railway Board, Simla, before October 17, 1922. Tender forms and specification can be had from the Railway Board, and drawings can be obtained from the Secretary, Standard Wagon Sub-Committee, c-o Agent, E.B. Railway, Calcutta.

NOTES OF THE WEEK.

The Near East Conference.

The latest proposal for a Near East Conference emanates from the High Commissioners in Constantinople of the Allies; and is to the effect that the meeting shall take place in Venice, and shall be attended by representatives of both the Turkish Governments, of Greece, and of the Allies. It has been not unfavourably received by the Kemalists, the Greeks appear to be not dissatisfied with it, and generally the outlook is hopeful. Paris was inclined at first to regard the plan with jaundiced eye, and professed to fear that Great Britain desired to resume her freedom of action in the Near East. That was, no doubt, one of the results of Mr. Lloyd George's recent speech, but the fear was very ill-founded. Great Britain is intensely anxious to see peace restored to that part of the world, and it is hardly an exaggeration to say that so long as it comes she will not be disposed to boggle over the manner of its coming. It is satisfactory, therefore, to learn that the High Commissioners' recommendation has now been accepted by France, Italy, and Britain, and that invitations are being issued to the Governments of Constantinople, Athens, and Angora.

Prince George of Serbia.

Prince George, the elder son of the late King Peter of the Serbs, Croats, and Slovenes, who in 1909 renounced his right of succession to the Serbian throne, has lately been causing some embarrassment to the Government of the Triune Kingdom. Three or four weeks ago he arrived in Belgrade from Paris, and his position was made the subject of two interpellations in Parliament. At the same time the Prince himself addressed letters to some members of the Government, declaring that he was not allowed the means to live, and suggesting that a commission in the army might be granted to him. Apparently an attempt was made to hush up the existence of these letters, and their publication in a Belgrade paper is said to have been suppressed by the Censor; but the main facts became public property, and very naturally caused some stir in the city. Then it was announced that the Government had decided to make the Prince an annual allowance of 300,000 dinars, and it was hoped that a settlement would be reached on that basis.

Sympathy with King Alexander.

Unhappily, Prince George seems to have held other views; and though no details have yet leaked out, it is natural to suspect that the impetuosity which had already cost him so dear has played him now another trick. Possibly he thought that, with the dinar at its present low level, the pension offered him was not consonant with his princely dignity. At any rate, it appears that he must have taken some step that angered the Government; for according to Belgrade messages, at a Crown Council held at Bled on August 15, and presided over by King Alexander, it was resolved that Prince George should be deprived of all his Royal privileges, and should be held responsible for verbal and written attacks against either the Royal House of Yugoslavia or the authorities. The report may yet prove to be incorrect, but the Belgrade correspondent of *The Times* in forwarding it declares that there is reason to believe it to be accurate. If Prince George is bent upon making trouble, the position is obviously a difficult one for the Belgrade Government. In view of the past, however, he can expect very little sympathy either in his own country or outside it, and if King Alexander and his Ministers have taken strong action in the matter, it will be generally held that no other course was open to them.

The Palestine Delegation.

The members of the Palestine Delegation, who arrived in Alexandria last week on their way home, declared that their policy is unchanged. This means presumably that the agitation against the Mandate and the present British policy for Palestine is to be continued, and that Palestine must consequently be added to the list of "restless" countries of the world. The Delegation is, of course, perfectly entitled to maintain its own point of view, and to endeavour to convert others—including the British Government—to the same view, and so long as it works in a constitutional manner no exception can be taken to anything it does. Correspondence which has passed between Lord Islington and Mr. Winston Churchill with reference to a memorial, signed by members of both Houses of Parliament, and urging reconsideration of the Palestine Mandate may lend some encouragement to the Arabs. Mr. Churchill, it is true, makes it very clear that in regard to Palestine the British Government has taken the plunge and means to abide by the result; but Lord Islington replies that "the House of Commons have reversed their policy once in Egypt, once in Ireland, and once in Mesopotamia, and will assuredly do so in Palestine." Perhaps the most useful suggestion put forward recently with regard

Digitized by Google

to our position in Palestine is that "as the Mandate has been entrusted to England it should be, in fact, administered by Englishmen."

Status of the Sudan.

Last week the Cairo journal *Al Mokattam* informed its readers that the British Government had reached a decision regarding the political future of the Sudan, and that the decision would be made known shortly. That country, the *Mokattam* declared, is to be transferred to the Colonial Office; and the discussions between Great Britain and Egypt regarding the Sudan will be confined to guarantees for the protection of Egypt's frontiers and the supply of sufficient water for her needs, present and future. Whether the report has any foundation, and, if so, how far it is correct, remains to be seen. But it would be a distinct advantage to have the question of the Sudan's status settled as soon as possible. The present state of uncertainty is bad for Egypt, bad for the Sudan, and bad for this country. It is to be hoped that in arriving at its decision the British Government will be guided by the British officials who have made the Sudan what it is. Then all will be well.

A "Ghazzu."

What is supposed to be a fresh demonstration of the Wahabi spirit is reported from Jerusalem. The reports are a little confusing as to the provenance of the attacking force, but the probability seems to be that they came from the Harb region, as one of the prisoners taken stated they did. There is also some uncertainty as to their real objective. The prisoner already cited declared that they had meant to strike at the Emir Abdulla, but were led by their guide to some villages of the Beni Sakhr, near Amman. In any case, it is clear that they made a somewhat formidable attack on two villages, and inflicted bad losses on the inhabitants. The raiding party—for that, probably, is what it actually was—is reported to have numbered between twelve and thirteen hundred men; while the Beni Sakhr and their allies had three thousand warriors in the field. As the "Wahabis" are said to have lost a thousand killed and wounded, including their youthful leader—aged twelve, according to the reports!—they must have received a very useful lesson. Official advices from Jerusalem announce that the British Transjordanian Force drove off the raiders with aeroplanes and armoured cars—which must indeed be hard nuts for camelmen and horsemen to deal with.

The Ubiquitous Wahabis.

A second raid is reported to have taken place, apparently about the same time as that in the neighbourhood of Amman, but in the Beersheba and Gaza district. The raiders in this case came from the Transjordania district, and made their way round the south of the Dead Sea: and it was feared at first that the raid must be regarded as a protest against the rumours that Transjordania was to form part of the Jewish National Home. It is now suggested, however, that this also was a "Wahabi" raid: though on what evidence we have yet to learn. It is to be hoped that the "Wahabis"—or Akhwan—are not going to be held responsible for every *ghazzu* that takes place, for the instinct for such things is ingrained in all the Arabs, and will not be eliminated for many a long day yet. We are sorry to observe a tendency to put the blame for every ill in Arabia on these "Wahabis" and on Ibn Saud, the Sultan of Nejd. If a whipping-boy has to be found, one might be looked for elsewhere.

The Defeat of Simko.

As announced in the *communiqué* from the Persian Legation, which we publish on another page, the Persian Government forces have defeated Simko, the Kurdish chief who has been giving them so much trouble, and he has had to seek refuge across the frontier, in Turkish Kurdistan. Coming at a time when it seemed probable that the outlaw, owing to Turkish help, might even extend his operations, the news is all the more creditable to the Sardar Sipah's creation, the new Persian Army, and the completeness of the success makes it possible to hope that the Urmia district may now enter on a period of law and order. For not only was Simko compelled to fly into Turkish territory; his forces were thoroughly beaten and broken up after a stiff fight; and it is reported that many guns and prisoners have been taken by the Shah's troops. Against this success must be set a reverse which has been suffered by a force of about 300 Government troops on the march from Ispahan to Ahwaz. They were, it is reported, attacked by Bakhtiari tribesmen, who killed over a hundred of them, and captured one gun and practically all their arms and equipment. In view of the Sardar Sipah's success in the North, we may expect him to demand a reckoning for this attack ere long.

Indian Politics.

The surface-waters of Indian politics still show signs of the disturbance caused by the Prime Minister's speech, which seems to have coincided most inconveniently with the publication of the Government of India's letter on "Indianization," and each of these events has obviously increased the momentary importance of the other. We have not seen the text of the letter in question, but we find no difficulty in accepting the successive *démentis* which assure us that it meant nothing in particular; the central authority is rarely so foolish as to commit itself in advance when it is asking for the opinion of the provinces, but its practice of setting out the arguments *pro* and *con* is always apt to facilitate distortion when the subject under discussion is a burning one, and apparently this is what has happened in the present instance. We do not propose to contribute further to that discussion, for, as we indicated in our leading article last week, we think it is time that attention should be concentrated on the related but distinct question of provincialising recruiting for all races alike. The facts of the moment make Indianization a stale issue, but, all the same, we must expect it to prove attractive to many ardent souls in India; tigers are not the only denizens of the country to prefer meat which has been some time in store.

The "Experimental" Constitution.

Looking back over the outburst of criticism caused by the Prime Minister's speech, the most curious feature is the objection taken by many journals, some of them quite responsible, to the description of the Constitution as experimental. The phrase may be repellent, but to establish its strict accuracy one need go no further than the preamble of the Government of India Act of 1919. Three propositions are there clearly laid down: first, that self-government is to be established by degrees; second, that certain measures must be taken at once; and, third, that Parliament will watch the working of those measures before it decides what to do next; and if that does not mean that the machinery introduced by the Act is experimental, the preamble must be construed merely as so much jargon. Probably the critics in India were in so great a hurry that they failed to distinguish between ends and means. The purpose of Parliament to establish self-government is fixed, and is not likely to change; the present legislatures, the diarchy, and all the rest of the machinery may go up in smoke, but if they should unhappily do so, the servants of Parliament will have to pick up the pieces and endeavour, however painfully, to put them together in a new machine which shall be more effective than the old.

The Threat to the Legislatures.

At the moment it looks as if the crucial stage of the present experiment may be reached soon after the next elections. The brains of the revolutionary party are now working hard; some of the leaders have of late come very near admitting that they have been on the wrong tack; and the idea is gaining ground that they should enter the legislatures in order to wreck them from within. That such a policy might be effective is indicated by our own experience, for Parnell very nearly wrecked Parliament, which was saved only by Speaker Brand's *coup d'état*, acquiesced in by members, and applauded by the country at large. In India the legislatures are not yet rooted in the country—it is quite doubtful whether a wrecking movement could be resisted effectively by the members—and it is practically certain that

Digitized by Google

the bulk of the inexperienced electorate would submit. In that case, we have little doubt that Parliament would scrap the present legislatures as failures, and devise other means of attaining its declared object; and the point is well worthy of the attention of those legislators who consider that they have already got beyond the experimental stage. Parliament has sown seed which it believes to be good, but if the young crop proves unsuited to the environment, it is safe to assume that the next sowing will be made from a different strain.

THE WEEK AT HOME.

London, Monday Evening.

Conference and Mark.

The Conference of Prime Ministers in Downing Street, as was anticipated, has failed to reach an agreement in the question of a *moratorium* for Germany, and the problem remains in suspense. Further inquiries are being made in Berlin by Sir John Bradbury and others, and no definite decision is likely to be arrived at for some time. The German Government professes itself unable to make any further contribution, and its attitude is hardly to be distinguished from one of passive resistance. The French Government wants guarantees either in cash or territory; the British Government wants, but is unable to obtain, a reasonable accommodation between the two.

Politically the situation is at a standstill, and only the optimists—of whom there are few in evidence—anticipate a speedy solution. But economically the position of Europe manifestly goes from bad to worse. The German mark falls steadily and remorselessly day by day, and every day makes a fresh record. But although this depreciation appears to have been arranged in the first instance by the German Government and German financiers, the process seems to have outrun their capacity to control it, and the decline of the mark is now probably as serious a matter to them as to others.

Admittedly, it is impossible to restore the mark to its original value. That perhaps would not matter so much if the mark could be stabilised at some figure that would permit of returning confidence to trade. But that appears to be equally out of the question, and the mark gathers momentum as it falls, in the same way that the Austrian krone did. Indeed, the parallel of the Austrian krone must be a nightmare to German statesmen and business men. The falling mark certainly makes some few people in Germany wealthy, and it has been to their interest to depreciate it, but even their wealth is insecure. And the great mass of the community is impoverished. There is "work for all," as our Tariff Reform newspapers used to say, but the yield of the work is low, and the standard of living appears to be falling, and food riots are threatened.

I am not satisfied that our economists who instruct the daily Press are any better informed as to the reality of the position than the man in the street—or even, one is tempted to add, than some of our politicians. The collapse of the exchanges is only the outward and visible sign of the collapse of trade between one country and another, which steadily decreases. On that fact of an international exchange of commodities the nineteenth century built up much of its material civilisation, and more particularly its great cities. If international trade is to be hampered permanently by tariffs, passports, and other official devices; if its volume is to be diminished, as in the case of Russia and Poland, by a diminution in agricultural productivity owing to the reluctance of the peasantry to grow more than they require for their own consumption, then the European trade of this and, indeed, of all other countries will diminish in proportion. The great cities of Europe would decline in size, as Vienna is already declining; how far the industrial cities of Britain would survive depends on our ability to substitute colonial and overseas trade for continental.

It is evident that for some time we shall have to look to colonial rather than European trade as the staple of our export business. The trade returns, although low at the moment, show signs of increasing. But the July export figures are very disappointing. Some of the newspapers have congratulated the country that the July, 1922, figures are a million or so in excess of those of July, 1921. But last year's figures were affected adversely by the coal strike during all the summer months, and July, at the very end of the coal strike, was one of the worst in our industrial history.

The Return of Mr. Bevan.

Mr. Bevan, the City Equitable financier who fled the country and was arrested some weeks ago in Vienna, has now been brought back to London, and made his first appearance at the police-court on Friday. The trial, which is likely to be rather a long and complicated business, will probably be held in the early autumn.

Lord Northcliffe.

The death of Lord Northcliffe early last week unhappily came as no surprise. When he returned from Switzerland to London some weeks ago he was evidently very ill, and it was recognised there was little hope of his recovery.

So passes, in the middle fifties, the man who has revolutionised Fleet Street. Thirty odd years ago, when young Alfred Harmsworth founded *Answers*, he certainly did not realise what a power he would become; but it was the success of *Answers* that not only founded his fortune—that in itself he reckoned a small matter—but showed him the existence of a vast new public for which the staid old newspapers did not cater. It was less interested in politics, and more in human beings and sensations, than the clubman and the professional or business man who read the mid-Victorian type of daily; and for these Harmsworth catered in the *Daily Mail*.

It began in sneers in 1895, but the *Mail* soon began to cut the ground from under the feet of some of those who looked down on it, and I suppose it has now the largest circulation of any newspaper in the country, almost in the world. Indeed, it is almost impossible to get away from it. I was once staying with a man in a remote country place who was inveighing against the Northcliffe Press, which he never, so he said, admitted into his house. A day or two later I asked one of the servants casually if there was a *Mail* or *Mirror* in the house, and the young woman brought me both—the gardener took the one and the cook subscribed to the other.

Northcliffe created a great machine, and found many imitators, but the Beaverbrooks and Hultons and other newspaper dynasties had not quite the same touch, or so large a view, and I shall be interested to see if the "Northcliffe Press" keeps its freshness now that its originator is no more.

One notices that the Germans are still unable to forgive Lord Northcliffe for his propaganda work during the war—a testimonial he would have appreciated—but his rivals in Fleet Street, who denounced him so heartily when living, have at least not spared compliments now he is dead. I fancy, however, that one detects a note of relief in their lamentations. Northcliffe was a formidable competitor.

Arthur Griffith.

The President of the Irish Free State died quite suddenly in Dublin while the operations against the rebels were still incomplete. I never met Arthur Griffith; but those who did, and knew him well, speak of a man of absolutely determined character, keyed to one idea throughout his life, but withal no fanatic. He was the real political father of Sinn Fein, and he supported it in a struggling newspaper in the days when Redmondite Nationalism was the orthodox faith in Ireland. He had none of the fire and little of the popularity of Michael Collins, but he was the real strength of the movement in negotiation.

He was neither a moderate nor an extremist. He knew that a republic was impossible, but he decided that Home Rule after the 1914 model was not enough, and he succeeded where Redmond, Dillon, and Devlin failed. He was the brain of the whole movement, and there are those who doubt whether Michael Collins is strong enough to carry on his work. There is a touch

Digitized by Google

of the Kerensky in Collins; there was nothing of that in Griffith.

Other Obituaries.

Last week was a busy one for the obituary writers. The death of Miss Genevieve Ward at a ripe old age recalled the name of an actress who was familiar to the mid-Victorian generation; and thousands of book and nature lovers the world over will be grieved to hear of the passing of W. H. Hudson. For many years his writings were not recognised outside a small circle, and he found the kind of literature at which he was an adept anything but profitable; but in the last twenty years of his life "the publishers threw cheques at him"—the phrase was his own—and he was able to resign the small pension he received from the British Government. He leaves a name comparable to that of Richard Jefferies.

A Poisoning Sensation.

Some disquiet has been caused by a catastrophe which has befallen a fishing party at Gairloch in Scotland. Some ten or a dozen of the company ate sandwiches made of potted meat, and were soon afterwards seized with paralysis. Seven of the tourists died, apparently of ptomaine poisoning, and one or two others are seriously ill, but hopes are entertained of their recovery. These potted meats have long been popular as savouries, but the quality of the meat used in them is suspect. An inquiry is to be held.

Mr. Lloyd George—Author.

Mr. Lloyd George, like most other people connected with the War, has written a book—apparently he has anticipated Mr. Winston Churchill's long-promised but always delayed memoirs—and this will be published during the ensuing season. £90,000 is the price to be paid for the work, which is certain to be of unique interest to the public and to historians. Some of the purists are rather shocked at the break with tradition implied in a Prime Minister's publication of his reminiscences while still Prime Minister, but what puzzles most people is how the Prime Minister has found time to write a book in view of the other calls upon him.

SYRIAN PATRIARCHATE EDUCATIONAL FUND.

To the Editor of The Near East.

Sir,—As the future of the Near East is the subject of much interest at the present moment, will you kindly allow me, as the Honorary Secretary, to bring to the notice of the readers of The Near East the "Syrian Patriarchate Educational Fund," which has for its object the providing of assistance for the furtherance of education in the schools within the Patriarchate of Antioch.

I shall be glad to receive donations or subscriptions from anyone interested in the subject in support of the Fund, which is worthy of help. It may be of interest to mention that the late Queen Victoria and also King Edward were supporters of the Fund.

The Church at Antioch can proudly claim to be the "Mother of all Churches."—I am, etc.,

Henry M. Marsh-Edwards, Bishop.

Church Hatch, Ringwood, Hants, August 19.

GENERAL TOWNSHEND ON TURKEY.

(*From Our Own Correspondent.*)

Port Said, August 12.

Yesterday your Correspondent was able to have a long talk with General Townshend, who, on his way through Port Said, gave his views on the subject of his recent unofficial visit to Asia Minor, where he was brought into contact with the heads of the Kemalist Government at Angora. Although very busy with a large correspondence, General Townshend kindly answered all my questions quite frankly. The impression one came away with was his great desire for peace, but whether his methods of pursuing it are the best, can be left to the next generation to decide. One of his first remarks was in reference to the charge of bad faith which had been brought against him on account of his alleged promise to the Government not to go to Angora. He informed me that that promise was only conditional, and that when he arrived in the East he found the conditions had radically altered for the worse, so he thought it his duty, in the interests of world peace and the good of the British Empire, to go and see what he could do in the way of composing differences. He also added, with a smile, that our present Government were hardly the fittest persons to bring a charge of broken pledges against anyone.

He said that his reception all along the line on his way to Angora was more that of a trusted friend and honoured guest than a late enemy or casual visitor. The peasants at wayside stations turned out to greet him, to say nothing of his welcome at the capital, and all over the country he found nothing but friendliness, if not more.

The strength and efficiency of the Kemalist Government struck him very forcibly, as also the real devotion of all ranks of the Army to their leaders, as well as the loyalty of the civil population to the Government. The Army, General Townshend mentioned was, contrary to general opinion, well equipped; the arsenal at Angora was turning out extremely good work in the way of arms and ammunition; and the country, though passionately longing for peace, was by no means exhausted.

I next asked him bluntly: "What are Kemal's terms?" He smiled at the idea of a Turkish diplomat telling anybody in advance what his final terms were; but said that the Turks would only accept peace with honour, and that their point of honour was that the Greeks should clear out of Asia Minor bag and baggage. The Turks are very sore about the original Greek offensive, which took place while negotiations were going on, and it will be hard to convince the Turks that the British Government was not tacitly aware of, if not actively encouraging this—well, let us say, breach of etiquette. Britain has lost a great amount of the prestige which she had at the termination of the War, as there is no doubt that, in spite of official denials, it is believed all over the Near East that she has been behind the Greeks with sympathy and material.

I next asked: "What about the Christian minorities which one hears so much about?" General Townshend replied: "I feel convinced that the Turks would give any reasonable guarantees, and one of the suggestions that has been made, and which I am pretty sure they would agree to, is that there should be resident commissioners in all districts to watch minority interests—the same policy that seems to work well in the case of the Indian native States in India with a British Resident, whose post may be almost a sinecure unless anything calls for his interference." The Commissioners in Asia Minor would be of neutral nationality and Christians, preferably Americans, who are already known to the population for their mission, medical, and educative work in the country. This, the General thinks, would be an adequate safeguard against oppression of minorities.

My next question was: "What about the Greeks, and can they be persuaded to renounce their dreams of Asia Minor?" The General considered the question as one for the diplomatists and politicians to arrange on the basis of compromise and compensations. Again I asked: "Do you think the Turks would compensate them?" A shake of the head was the most significant reply.

DEFEAT OF SIMKO.

The Persian Legation is officially informed that the Kurdish rebel, Ismail Agha Simko, who for a long time past has caused the Persian Government a great deal of trouble in Urmia, north-west Persia, has been defeated by Government forces who have taken from him the town of Salmas, which success was quickly followed up with the capture, after preliminary bombardment, of the rebel stronghold of Chehrig, whither the rebel forces, after losing Salmas, had withdrawn with heavy losses. The rebel Simko himself has escaped, but a contingent of Government forces is in pursuit, and his early capture is expected.

The Near and Middle East.

From Our Own Correspondents.

EGYPT.

Cairo, August 10.

A Threatened Ministerial Crisis.

Bairam festival has passed off quite quietly, although it synchronised with an incipient Ministerial crisis. For reasons on which a certain amount of reticence is maintained, though to those who are behind the scenes the cause is obvious, there has for some little time been some tension between the Cabinet and the Palace; and matters came to a head on the eve of Bairam. Thanks, however, to the good offices of Lord Allenby the misunderstanding seems to have disappeared, and relations are now quite normal, and it is to be hoped will long continue to be so. The country has work of supreme importance in hand, for the successful achievement of which all its energies are required, and it is the duty of all patriotic Egyptians to sink their personal feelings and desires and co-operate in the early realisation of the national aspirations. It would be a thousand pities if party politics or personal differences were to intervene at this juncture, for if they were allowed to assume any importance at the present moment they would undoubtedly retard the attainment of the goal, if indeed they did not permanently put back the clock.

A War Anniversary.

On the 4th instant the French colony performed the ceremony in celebration of Great Britain's declaration of war against Germany which it instituted in 1915. The celebration consists of the deposit of a wreath at the foot of the Stone of Remembrance, with full military honours. Usually the French Agent performs the ceremony, but this year, owing to his absence on leave and the coincidence of the 4th with the first day of Bairam, which necessitated the attendance of the French Chargé d'Affaires at the Palace, his place was taken by Monsieur Mouray, who gave a most eloquent address, to which Lieut.-General Sir Walter Congreve, G.O.C. the troops in Egypt, made a happily worded reply. As usual, the ceremony was very impressive, military honours being rendered by the Hampshire Regiment.

The "Seditious Manifesto" Trial.

Hamad Pasha El Bassel (the Bedouin chief), Morcos Bey Hanna (the head of the Egyptian Bar), and the five other members of the *Wafd* recently arrested for issuing a seditious manifesto were brought this week before a Military Court, presided over by Colonel-Commandant Lawson—already known to the public for the admirable manner in which he presided over the military court which tried Abdul Rahman Bey Fahmy and the other Egyptians implicated in the Vengeance Society case two years ago. Mr. Preston acted as Judge-Advocate and Mr. Maxwell (who is making quite a speciality of such cases) prosecuted. The charges on which Bassel Pasha and his colleagues were indicted were that of having committed an offence against martial law "in that being persons amenable to the criminal law of Egypt, they committed an offence punishable under the Egyptian penal code by printing and publishing a circular bringing the Government of the King of Egypt into hatred and contempt, contrary to the proclamation of May 14, 1916"; and, secondly, in committing an offence against martial law "in that they disseminated a circular, the object of which was to stir up disaffection against the existing order of Government, contrary to the proclamation of November 11, 1914."

Mr. Moriarty (who appeared on behalf of all the accused) applied for an adjournment of fifteen days to permit of a King's Counsel being brought from England, and, on that being disallowed, for an adjournment of two days, as he said he had not yet had time to study the case. The Court also disallowed this application, and Mr. Moriarty then followed the course adopted in every preceding case of this description and challenged the competence of the Court to try the accused. Mr. Maxwell replied, pointing out that a Military Court was not a Court in the strict sense of the word, but really a committee of inquiry convened by the Supreme Military Authority to advise him with regard to the action to be taken towards the accused, and the Court, after a short deliberation, disallowed the objection. The accused all pleaded not guilty, prefacing their plea by a protest against being tried by a military court, and very shortly afterwards Mr. Moriarty withdrew from the case. Although he gave no public reason, it is understood that the accused had decided not to defend themselves, on the ground that they repudiated the jurisdiction of the Court. This withdrawal considerably curtailed the proceedings, particularly as the accused steadfastly refused to put any questions to any of the witnesses and maintained rigid silence, until at the end they put in a written statement. The prosecution concentrated on proving that the accused were the executive committee of the *Wafd* and had widely circulated the manifesto, and that they knew from the events which had preceded the publication of the document the serious effect it would have on popular feeling. Quite a number of circulars and letters which had been discovered at the "Beit El Ommah"—House of the Nation, as Zaghloul's house is called—were produced to prove the connection of the accused with the *Wafd* and the intentions of the latter. The most interesting of them from the British point of view was the circular recommending a boycott of everyone and everything British, together with a printed booklet giving a complete list of local British business houses, doctors, lawyers, etc., to be boycotted; while emphasis was laid on Zaghloul Pasha's statement last September to *The Times* correspondent, that if agreement meeting his views were not entered upon, Egypt would act towards England in the same manner as Ireland was then acting, and on the fact that immediately the Adly negotiations broke down and the Curzon Note had been published in Egypt the series of murderous attacks on Englishmen started and continued down to that on Col. Pigott, which occurred ten days before the issue of the manifesto complained of, to show that Bassel Pasha and his fellow-delegates were fully aware of what impression that document would have on the minds of the Egyptians.

At the conclusion of the proceedings, and before the Judge-Advocate summed up, Hamad Pasha El Bassel read a statement on behalf of himself and his companions repeating their repudiation of the jurisdiction of the military court and affirming that the *Wafd* had always disapproved and condemned violence; that they had never opposed the Government of the country, for they had always placed the Throne above all parties and had on many occasions shown their loyalty to the successor of Mohamed Aly; that, on the other hand, they had opposed the present Cabinet because they did not consider it to be the Government or to represent the nation, and that in doing so they considered they had made use of the legitimate means adopted in all civilised countries. After a short but very clear summing-up by the Judge-Advocate the Court deliberated for about twenty minutes, and then asked the accused whether they had anything to say in mitigation of punishment. On Hamad Pasha El Bassel and his companions declining to say anything, the Court was declared closed, and the sentence will now be communicated to the Commander-in-Chief for confirmation. The proceedings, which throughout had been very orderly, became somewhat uproarious as the prisoners were led out, the crowd of sympathisers in the court, led by some Coptic ladies, making a demonstration in favour of the *Wafd*.

Port Said, August 12.

The Arrival of the Plassy.

The week has been rather exciting here. The arrival of the Plassy with a contingent of school children coming to their homes in Egypt and Cyprus for the summer holidays made an animated scene. In fact, one person said that the scene beggared description as the fond parents tried to sort

Digitized by Google

out the children on board and get them down the gangway into the waiting launches. On the other side of the ship Mr. Ronald Storrs, Governor of Jerusalem, and Mr. Rutenberg were taken off with less commotion and despatched by the Canal Company's fast steam launch to Kantara, where they caught the night train to Palestine. Mr. Rutenberg was questioned very closely by several as to whether he had any of the two millions with him, but he indignantly denied the insinuation. All this may or may not have had anything to do with the fact that the ship got ashore in the Canal and stopped traffic for six hours.

General News.

A sad accident occurred here a day or two ago, when the proprietor of a garage, who was out testing a motor-cycle, collided with a motor-van which was delivering ice. The van was overturned and the cycle wrecked, the rider being killed instantly.

Yesterday the Messagerie Maritime steamer Lotus passed through on her way from Beyrout to Marseilles. She had on board General Townshend, who is returning from his visit to Angora, and hopes to be able to give the public at home some authentic information as to the situation in the Near East, which, he maintains, is steadily getting worse.

Port Said has had one of the hottest spells it has had for a long time, even old residents acknowledging that it has been warm. The beach has been almost uncomfortably crowded.

IRAQ.

Baghdad, August 3.

A Heat Wave.

Iraq has just experienced ten days of heat wave which has done something to spoil the reputation which this summer has gained for being much cooler than usual. The whole of the country appears to have been affected, for, while the highest temperatures recorded were at Basrah (124.7) and Baghdad (123), complaints of excessive heat have also been heard from Mosul and Kirkuk. One very trying feature of this heat was the high night temperature, the minimum temperature in Baghdad on one night being as high as 95.9. Fortunately these conditions did not last long, and the daily maximum in Baghdad has now fallen once again below 110.

The Treaty-Indifference.

The heat, however, seems to have brought to an end for the time being the political activities of Baghdad, and the bitterness which was so prominent in all discussions of whatever nature up to a few days ago has given place to a more tolerant and friendly tone. Nothing is ever heard of the Treaty now, and it has ceased to be a topic of conversation in coffee shops and meeting places, or a theme for the aspiring journalists of the local press. Whether as a result of the heat or merely because of the long delay in signing, coupled with the frequent intimations that the negotiations are almost completed and that its publication may be expected immediately, people appear to have lost all interest in it, and to have ceased to care what has happened to it.

Meanwhile everything in the way of reform or development is being delayed until the Treaty is signed, the elections held, and the Constitutional Law passed by the National Assembly. The present Government is unable to take any important action owing partly to its feeling that it is not certain that it has the support of the community, and also because it is, as Mr. Winston Churchill said, a Coalition Government and, like all coalitions, suffering from the lack of a common policy. Most of the members of the existing Council of Minorities were appointed for political reasons, and all are temporary appointments pending the election of the National Assembly. In such circumstances strong action is not to be expected, and a hand-to-mouth existence is the best that can be hoped for. The longer the signing of the Treaty is delayed, therefore, the longer it will be before the country can obtain a constitutional government basing its actions on a definite and clearly defined policy.

In the Provinces.

Outside Baghdad the situation has improved. In the Hillah division, which has for some time past been the cause of some anxiety, matters have taken a distinct turn for the better, thanks entirely to the energetic action taken by the *naib mutasarrif*, Abdallah Beg as Sana'a. Bracing himself to the difficult task of trying to put a check to the disturbed state of parts of the division, he has been successful, in spite of considerable opposition and the gloomiest of prognostications, in settling several disputes which had been a menace to the peace of the country. By his energetic action he has done much to raise Government prestige, which had fallen dangerously low, and has delivered a telling blow to the forces of unrest and disaffection.

In Sulaimaniyah division Kerim Fattah Beg continues to elude his pursuers, and fears are entertained that he has given them the slip and will not now be caught. The High Commissioner visited Sulaimaniyah a few days ago to discuss with the Political Officer the present situation in South Kurdistan and the policy to be adopted there in the immediate future.

Efforts are being made to improve the train service between Basrah and Baghdad, and two trains a day are now running, one of which completes the journey in twenty-two and a half hours. Unfortunately, however, a day or two after the new time table came into force a serious accident occurred in Guchan station, between Hillah and Diwaniyah, when two trains ran into one another, with the result that seven persons were killed and several injured. Among the killed was one Englishman, Capt. A. N. Thomson, of the Public Works Department, and one Arab officer of the Iraq army. An inquiry into the cause of the accident is being held, but the results have not yet been made known.

Two French officers visited Mosul a few days ago to discuss with the local government measures to be taken to maintain communications between Mosul and Aleppo via Deir-ez-Zor.

ALBANIA.

Tirana, August 14.

The Greek Frontier.

I have already stated that the International Frontier Commission has betaken itself to Kortcha, to proceed to the delimitation of the Greco-Albanian frontier. The Commission was accompanied by one Albanian and one

Greek delegate, as prescribed by the Conference of Ambassadors in the instructions given to the Commission.

It was thought at first that everything would go well. But here, on the 5th instant, at the very moment when the Commission was to begin its work, the Greek delegate demanded the application of the Agreement of Corfu, declaring that he refused beforehand to take part in the operation of delimitation. As the Commission considered that it was incompetent to deal with this question, the Greek delegate left Albania.

The Tirana Government has made representations to the Great Powers and to the Conference of Ambassadors, inviting Greece to send another delegate and to abandon its intransigent attitude.

The Agreement of Corfu.

In 1914, when the revolutionary organisation created at Argyrocastro by Zographos and Karapanos threatened to let its bands loose on the Albanian people, a delegation charged by the International Commission of Control (then installed in Albania) met at Corfu in order to come to a settlement with Zographos and Karapanos, who were demanding ecclesiastical and secular privileges for the Orthodox community. Hence the arrangement that is called the Agreement of Corfu.

But this Agreement was made between the representatives of the International Commission of Control and the chiefs of the Epirote organisation, and in no way between the Government of Athens and that of Albania, so that the Greek Government has no justification in raking up this question. Further, this Agreement has been regarded as null and void and a dead letter since its beginning, both because of the fact that it has never been ratified by the Council of the self-styled Epirote Organisation, and because of the fact that this organisation has broken the Agreement in making incursions and in setting fire to three hundred Albanian villages.

But, even admitting that the so-called Agreement was valid, the Albanians and Greeks have concluded the protocol of Kapishtica, which was signed by the two parties in June, 1920—that is to say, just after the French had evacuated Kortcha. In this document the two contracting parties bind themselves to accept the decision of the Great Powers, which on November 9, 1921, recognised the sovereign rights of Albania without any restriction. In addition, the mandate that the Conference of Ambassadors conferred on the Frontier Commission does not permit discussion on affairs of a political nature, and which concern only the internal administration of the country.

Essad Pasha's Estate.

It will be remembered that Essad Pasha Toptani was assassinated in Paris in June, 1920. He left very large estates at Tirana and at Durazzo. The present Government instituted a Commission to estimate what damages the treacherous conduct of the late Pasha had inflicted on the State. According to this Commission's estimate the damages thus caused exceeded 3,110,000 francs, and the Ministry has decided to confiscate all the estates of the deceased and to appropriate them to the State.

In the sum of three million francs mentioned above the moral and political damage wrought by Essad Pasha against Albania does not figure at all. It is concerned solely with a portion of the material losses.

ROUMANIA.

Bucharest, August 9.

Oxford University and the Minorities.

The Magyar Press states that Oxford University a short time ago approached the League of Nations protesting against the manner in which the minorities were being treated in Transylvania. The rector of Cluj (Transylvania) University addressed a memorandum to Oxford University, showing the real situation in Transylvania, to which the latter replied that it had no knowledge of the protest in question, but should any member on his own account have signed and forwarded such document he had not the approval of the University, which, therefore, did not hold itself responsible. This answer, which was signed by the Vice-Chancellor of Oxford University, is much appreciated by the local Press.

General News.

According to a telegram received to-day from Athens, Prince George and Princess Elisabeth of Greece left Athens for Roumania on the s.s. Androi, and are expected to arrive in Constantza on Friday (August 11), whence they will proceed, by special train, direct to Sinaia, accompanied by members of the Roumanian royal family.

The Roumanian Legations abroad have informed Roumanian subjects from the new territories residing abroad, that they may return to Roumania without fear of punishment for having served in a foreign army. Only young men born in 1899 or 1900 and belonging to the classes at present under arms will be incorporated this year in the Roumanian army. Over the age of twenty-three no Roumanian subject from the new provinces will be enlisted.

Owing to Greece being contaminated with cholera and the plague, the necessary sanitary measures are being applied to passengers and goods from that country, and will be allowed to enter Roumania only through the ports Constantza, Sulina, and Giurgevo.

GREECE.

Athens, August 7.

The Greek Note.

The Greek Government's Notes to the Allied Governments have caused more rubbish to be written than has appeared for quite a long time. It was only to be expected that the Opposition Greek papers would make the most of the opportunity; but that foreigners should think for a moment that Greece would attack Constantinople without the prior consent of the Allies shows a want of sense of proportion.

To understand the manœuvres of the Greek Government the position in which they are to-day must be considered. Penniless and forsaken by the Allies, they find themselves with two large armies to maintain, both of which are quite prepared to fight the Turk, but neither of which is content to waste months and months doing nothing, knowing that wives and families can hardly manage to exist with the main breadwinners mobilised. The main object, therefore, both of the Government and the people, is an early peace; but honour must not be sacrificed. About two and a quarter millions of people in Asia Minor dwell in the area occupied by the Greek army. These people are of many races. There is no majority of one race over another, and therefore no nation can hold with justice that she is the natural ruler of the country. Thus it is a natural decision that the most suitable government for such an area is self-government with the protection of some established State to nurse it through babyhood. If Great Britain or France had made a similar proposal it would have been greeted by the foreign Press as a magnanimous and wise action. The world, it seems, is inclined to believe that no progress can be looked for under a Mohammedan Government. The objective of certain European States for centuries has been to drive the Turk off the soil of Europe and to protect the Christians of Asia Minor from the oppression of the Turkish Government. The dwellers in Asia Minor have just as much right to get rid of Turkish rule as any people in Europe. It was obviously with this idea that the Allies requested the Greek Government to land at Smyrna and hold the country on behalf of the Allies. It is believed that the Allies will never permit Smyrna and its hinterland to be re-governed by Turkey. What, therefore, it is asked here, is wrong with Greece's proposal? Is it believed that Greece is not capable of carrying out the scheme? Is it thought that the scheme is quite impracticable? The scheme, no doubt, will be difficult and completion of it delayed; moreover, it will

Digitized by Google

require very careful and thoughtful handling. It must be remembered that amongst the population of two and a quarter millions there are many men who know the country thoroughly and are competent to help to govern. The Greek of to-day is not admired by his fellow-Europeans for his administrative abilities, and "Ionia" would be well advised to give a thought to the results obtained in Egypt. The services of foreign advisers not only in the higher positions but also in the lower grades of Government services, should be obtained in order to stop intrigue and corruption, which are bound to be rife in any semi-Oriental administration. There is not the least doubt that the declaration of a Free State has given great satisfaction to the population, including even the Turks who have remained.

If the Allied Powers did not wish Greece to declare a Free State they should have taken steps long ago to settle the Near Eastern Question. Greece gave them every chance to do so, and because of their *laisser faire* policy has had to take the question up by herself and to endeavour to settle it in the best way she can.

The Allies' Duty.

The next move must come from the Allies, who, for their own ends, have treated Greece very unfairly. No one can ever forget or repay the assistance Venizelist Greece gave the Allies at Salonika and in Macedonia, but just because the people recalled their King after the War and changed their political Governors, the whole nation is damned for ever. That is to say, that the policy of the Allies was based, not on the Greek State, but on the personality of one man. If Greece was so important to us during the War, surely she must be important to us in the period between wars which is called peace.

People appear to ignore the difficulties with which the present Government has to contend, and consequently think that no good can come out of Athens. That is not the case. Financially, the State is in just as bad a position as it possibly can be, and the longer the Army is mobilised the worse the position gets. The Government is a coalition of minorities, which naturally makes the position precarious, and with the nature of man they will endeavour to keep in power until they are forced out by public opinion, which is daily gaining strength against them. In many ways the acts of the Government appear to be foolish; as, for example, the continuation of the Consortium of Banks in connection with exchange. Again, the voting by the *Voule* of Dr.300,000 to erect a monument to those who suffered during the Venizelist *régime* is not a wise act, either financially or politically. It would appear, therefore, that the present Government is riding for a fall over exceptionally rough ground, but it is to be hoped that it may not be necessary to swap horses crossing the stream, or the race may be irretrievably lost. There will also be very great difficulty in finding anyone to take up the reins of office under present circumstances; very few men would care to risk their reputations under such conditions.

Mr. Lloyd George's Speech.

Just as the above words have been written the summary of Mr. Lloyd George's remarks in the House of Commons has been received. His remarks have called forth pæans of joy from all parties. Why each political party should read into the remarks signs of future prosperity is difficult to comprehend, but nevertheless such is the result, and the papers go even as far as suggesting that a statue of Mr. Lloyd George should be placed alongside that of Mr. Gladstone in front of the University. It is a very wonderful state of affairs when the words of a British Prime Minister are able to cheer a whole nation out of its despondency!

PERSIA.

Teheran, July 22.

Northern Oil Concession.

Since my last letter discussion in the local Press, and, in fact, in every circle, regarding the question of the Northern Oil Concession has continued unabated, to the exclusion of almost every other topic, and the matter is still unsettled by the Government, though their final decision is expected to be known shortly. The Standard Oil Company have been handicapped by not having their own representative in Teheran, and negotiations with them by cable through the Persian Minister in Washington have necessarily been protracted, and, being conducted secretly, this company's terms are not known to the public. The Sinclair Group, on the other hand, have their representatives here on the spot, and their terms, which have been published in the Press, offer royalties up to 25 per cent. (according to results) on the net profits and an immediate loan of $10,000,000 on the granting of the concession, guaranteed by excise duty and local revenues. It would appear to be a *sine quâ non* that the company obtaining the concession should be a purely independent American concern, and the fact of the recent agreement arrived at between the Standard and the Anglo-Persian Oil Companies seems to be a stumbling-block in the way of the negotiations with the former company.

It is to be hoped that the Cabinet and the Mejliss will soon make up their minds as to which of the two companies offers the best terms, and grant the concession without further loss of time; for Persia will thus obtain the loan of which the Government stands so sorely in need to replenish its well-nigh empty treasury. As an example of the difficulties, the whole police force threatened a fortnight ago to come out on strike if their pay, several months in arrears, was not forthcoming within ten days. This strike has been temporarily averted by a payment on account, but a week ago all the servants of the Imperial Court also went on strike for the same reason, and this was settled by a similar compromise.

While on the question of the Northern Oil Concession, it is interesting to note that the ex-Minister of Public Works, Adib es-Saltaneh, has just returned to Teheran from a tour of inspection in Ghilan, on which he went during his tenure of office in the last Cabinet, and in his report to the Mejliss he states that his investigations confirmed the discovery of oil-wells in Lahidjan, east of Resht, samples from which he brought with him, and which are now exhibited in Teheran. These samples contain 10 per cent. of more or less fine petroleum, which was found welling up in a bath.

The Internal Situation.

In my last letter I mentioned the insecurity prevailing on the principal roads and the troubles in the provinces, largely due to the absence of a central government owing to the protracted Cabinet crisis. The Minister of War, Sardar Sipah, has, however, taken matters in hand seriously. With his usual habit of "getting a move on," he has quickly despatched troops to the affected districts; and reports from the provinces confirm the successful results of his energetic measures and the consequent growing security and restoration of order. His troops have put down the rising of the Jungalees in Ghilan under Seyed Jelal, who has himself fled and his followers dispersed. Sardar Sipah has not refrained from resorting to public executions of robbers, and these measures seem to have produced a salutary effect. An extraordinary case is reliably reported from Kermanshah of a well-known robber who was publicly

hanged there. He was left hanging for half an hour, and when taking down his body the party who had been detailed off to bury it were surprised to find signs of life in it. The man was thereupon taken to hospital, where he later recovered consciousness, and he is apparently still in the land of the living!

Sardar Sipah was recently the recipient of a jewel-studded sword, and the buckling-on of it was made the occasion of a reception at his house, at which a large number of mullahs, religious dignitaries, and other notables were present. The story goes as follows:—Some time ago one of the priests of the Holy Places at the Shiah shrine at Nejef had a dream, in which Hazrati Abbas, the hero descendant of the Prophet, appeared to him and told him that a sword of honour should be presented to the present-day hero of Persia, Sardar Sipah, in recognition of his services to his country and to the Mohammedan faith. A sword was accordingly purchased out of the funds of the Treasury of the Holy Places and despatched to the Minister of War, who, at the reception, buckled it on himself with all due reverence.

The following incident, which I have from an eye-witness, will show that Sardar Sipah stands no nonsense The other day he was driving in town in his Rolls-Royce when a cab kept on getting in front of his car and prevented it passing. The Minister of War, exasperated, at last jumped out of his car and there and then gave the cab-driver a pummelling which may teach him to respect the rule of the road in future, and to make way for his betters!

In spite of his determination to dispense with all foreign influence in the army out here and to run it on his own lines (in which we wish him "more power to his elbow"), the Minister of War has decided to send sixty cadets to France for a year's course of military training, and the Mejliss has approved a credit of 671,000 francs for this purpose, plus £3,000 for travelling expenses.

American Advisers.

The papers mention the name of Mr. Millespaul as head of the financial advisers engaged by the Government to institute reforms in the Ministry of Finance. The Government has also authorised the engagement of an American expert to run the Teheran Municipality on self-supporting lines. During the short-lived régime of Seyyid Zia ed-Din's Premiership last year the quaint and picturesque north side of the Artillery Square, where formerly ambitious would-be military bandsmen used to blare forth the most hideously discordant music from the balcony under which rested sundry rusty pieces of antiquated cannon, was pulled down and a more modern town hall built on the same site—or, rather, started, for by the time the outer walls were completed funds ran out (no uncommon thing in Persia!). It has remained roofless, exposed to the elements, ever since, a regular eyesore in comparison with the imposing façade of the Imperial Bank of Persia on the east side of the Square, the neat buildings of the Telegraphs and other Government departments on the south, and the police offices on the west. It is to be hoped that the American adviser, whoever he may be, will waste no time in putting the finishing touches to this building, which, when completed, should be quite an imposing structure.

Rates of Exchange in the Caucasus.

The following rates of exchange in Baku, reported by a traveller just returned from that town, will give some idea of the sorry state to which Russian credit has fallen. For one English pound note one can obtain 25 million roubles in local notes, for a dollar 5,600,000 roubles, and for a franc 500,000 roubles. The price for gold is naturally higher, and one gold piece of 10 roubles is now worth 30 million roubles in notes!

TURKEY.

Constantinople, August 8.

British Naval Regatta.

It had been feared that the little comedy now being enacted in our midst, known as the Greco-Turkish War—if not the Clerk of the Weather—might necessitate the postponement of the Annual Regatta of the Fourth Battle Squadron of the British Mediterranean Fleet. In spite, however, of wars and Chatalja rumours, and of the three days of rough weather with heavy rains immediately preceding it, this popular naval event was held off the bay of Moda on Thursday and Friday last under the most perfect weather conditions.

The Battle Squadron comprises the Iron Duke (Flagship of Vice-Admiral Sir O. Brock), the Benbow (Flagship of Rear-Admiral Sir R. Webb), the Ajax, the King George V., the Centurion, and the Marlborough. The regatta consists of a series of rowing contests between the competing ships, points being granted according to the finishing positions of the various boats. To the mere landsman, the regatta, perhaps, is more of a spectacular event than one of sporting interest; as in view of distances, and of the difficulties in distinguishing the competing boats, the individual events are often difficult to follow. This year the honours went to the Iron Duke, who carried the day with a score of 3,033 points, against the 2,825 of the Benbow, followed by the Ajax with 2,626, King George V. 2,366, the Marlborough 1,452, and the Centurion 1,006.

Our naval regattas, however, serve a useful purpose other than that of providing entertainment for the landsman, or of encouraging physical efficiency in our sailors. They afford the British and the foreigner alike an opportunity of witnessing, though at sport, a combination of our naval forces. Accused though we may be to-day of crying peace where there is no peace, these grim, grey walls, at their silent anchorage in the placid waters of the Marmora, stand as it were as witnesses of the determination on our part that the present great sea power of Britain, created and maintained to ensure the world's peace, shall ever remain fit and ready to defend it.

An Old British Constantino-politan.

Constantinople is losing an old and popular resident, the British community one of its most valuable members, and the Ottoman Public Debt Administration a tried and most capable servant in Mr. Henry Philip Kerney, who is taking his pension and, to our great regret, is leaving us to-morrow. Mr. Kerney began his career as a journalist in Dublin at the age of seventeen, studying first at the Royal University and afterwards at Trinity College. Before he graduated he went to London as a Parliamentary reporter and had the distinction of being the youngest member of the gallery staff. He came out to Constantinople at the age of twenty-three as private secretary to Sir Edgar Vincent (now Lord D'Abernon), who had just been appointed general manager of the Imperial Ottoman Bank. He subsequently entered the Bank's service as head of the foreign exchange department in its Alexandria agency. Five years later, at the request of his friend Sir Edward Law, who had become president of the Council of Administration of the Ottoman Public Debt, he joined him as private secretary, and soon afterwards became a permanent official in this important institution. After doing valuable work in reorganising both the French and Turkish sections of its accounting system, he was, in 1907, put in charge of its principal revenue, the salt monopoly. His management of this department has been most successful; its present importance is largely due to his substitution of order for chaos in its commercial branch, and to his radical reforms of the salt industry in its main centre—the works at Phocæa near Smyrna.

During the War Mr. Kerney did good work in London. Outside his official activities he has taken a share in various activities of local public interest, such as the Building Society, Lady Lowther's War Relief Fund, and the Constantinople Club.

On Friday evening a farewell dinner was given to Mr. Kerney by members of the British colony at the Constantinople Club, and the conviviality and joviality which characterised this function were sufficient evidence, if such had been needed, of the popularity and esteem in which Mr. Kerney is held by the British colony.

A LETTER FROM BASRAH.

Basrah, July.

Dear Mr. Editor,

In the old, old days before the Great War, when I was a humble member of the Fourth Estate, your journal provided me with many an interesting bit of copy, and I would like to repay the compliment by sending you a few lines from Basrah that may perhaps be of some little interest to your readers. Fortunately we have changed our name to Iraq; for the word Mesopotamia amongst people at Home has long since ceased to be blessed! Nevertheless, romance is not yet dead, and the modern Briton out here, working in a land which was the cradle of the human race, feels that he is helping to resuscitate a Kingdom whose future shall far outshine the glories of bygone ages.

Here in Basrah we are practically dependent on the British India Shipping Company for our communications with the outside world. The Company have a regular service every three days from Basrah. The fast mail boats leave on Sunday mornings and reach Bombay the following Friday, which enables homeward bound passengers to spend a few hours in Bombay and catch the mail boat, so that by travelling overland from Marseilles one can be in London twenty-three days after leaving Basrah. The mid-week boat from Basrah is a slow mail and cargo steamer, calling at most of the Gulf ports *en route* to Karachi and Bombay, which is reached some fourteen days after leaving Basrah. Nearly every month Messrs. Strick Scott and Co. also have a direct boat from Basrah to the U.K., and these receive considerable patronage, as the ordinary fare is but £65. These boats are, however, primarily cargo boats, and carry only one class of passenger. Both British and Arab shipping merchants run boats for the Haj (Pilgrim) traffic during the season between Basrah and Jeddah. Every year many thousands of devout Moslems make their way to Mecca by this route, the cost varying from £10 to £3 for a deck passage, according to the law of supply and demand.

Mandate or Treaty.

For months past Baghdad has been seething with excitement over the Mandate Question. The Moderates have accepted the proposal of a Treaty between Great Britain and Iraq more or less quietly, but a minority, albeit a very noisy one, decry both Mandate and Treaty, and demand the complete and absolute independence of the State. A *communiqué* recently issued stating that King Faisal, the Council of Ministers and H.E. Sir Percy Cox have reached complete agreement on the subject of the Treaty has had a tranquillising effect on the situation in Baghdad. In the South there is but little excitement. Overshadowing King and Government at Baghdad loom the much-dreaded and all-powerful Akhwan, and the people here realise fully that without the British the whole country would drop like a ripe plum into the mouth of the Akhwan leader, should he desire so indigestible a morsel. The future peace and prosperity of the country lie in acceptance of the Treaty by King, Government, and People. Since 1914 Great Britain has sunk 350 millions of pounds in this country, practically all of which has been spent on the War and unproductive work. If Great Britain is to receive any return for this enormous expenditure, further capital must be supplied for reproductive public works, principally irrigation, agriculture and communications, and the development of the mineral wealth of the country; and given settled conditions, a rich return may be confidently looked forward to.

The Railways.

The outstanding monument of British doggedness and perseverance in this country is the railway system between Basrah-Baghdad and the Persian frontier. The great ambition and secret aim prosecuted for many years silently, though none the less efficiently, by the German Foreign Office and their railway engineers, was to link the Persian Gulf to their Constantinople-Baghdad Railway. This great achievement was carried through in 1920 by our railway directorate, and with the exception of a few months during the Arab rebellion of that year, trains have been running satisfactorily ever since.

At the present time the service is suffering severely from want of capital. The necessity for the strictest economy at home has naturally reacted on this country, and we are now passing through a period of great financial stringency. The railways working of the past year resulted in a deficit of, roughly, £250,000, and the situation became impossible. When the present Director assumed office last December, he was faced with the herculean task of framing a budget in which expenditure could be so reduced as to balance the moderate estimate of traffic earnings that could legitimately be reckoned upon, and, more difficult still, of so administering the system that, given normal conditions, there should be no deficit at the end of the year's working.

At the time of writing trade is exceptionally bad, and owing to small demands and overstocked markets the mercantile community is passing through a period of great depression, and this depression naturally reacts unfavourably upon the railway traffic receipts. The silver lining to the cloud is, however, visible in the abundant harvest and the promise of a good date season: the export of which, it is anticipated, will be double that of last season.

The railway line passes on its way to Baghdad close to the ruins of the Temple of the Moon at Ur of the Chaldees, and within a couple of miles of the ruins of Babylon. An extension has brought the railway to within twenty miles of the Holy City of Kerbella, to which tens of thousands of pilgrims wend their way every year. It would be not only a boon to the pilgrims, but a paying concern to carry the line on to Kerbella, but the few thousand pounds it would cost are not at present available.

The Port.

The trains cross the Tigris at Baghdad by means of a ferry, and the line runs north-east through Baqubah and Kizil Robat to Khanikin on the Persian frontier. The mention of this line recalls the hopes and belief, not only of "railway men," but also of many others, that the day will come when from Teheran a line will run through Baghdad to the Mediterranean at Haifa. Then, indeed, would a golden age dawn on Persia and Iraq, and Baghdad would become, as the entrepôt of the Middle East, more famous and prosperous than ever she was in her most palmy days.

The port of Basrah is one of the very few really flourishing institutions in Iraq. It is a product of the War: there has been for centuries, of course, a port here, but one without quays, cranes, railway lines, sheds, coal-tips, electric light, and roads. These things, which it now has, cost the British taxpayer hundreds of thousands of pounds, but the outlay has provided as compact and effective a port as can well be imagined or desired. The Port Director requires a minimum of 10,000 tons monthly to allow a margin over the port expenditure, a very modest requirement, even for a small port, and it is very encouraging to know that the average monthly tonnage for the three months ending June has been 11,500 tons, exclusive of native craft, which comes to, in round figures, 1,000 tons a month.

Basrah is not a delectable spot; a narrow fringe of palm trees along the river banks, and then nothing but a sandy waste for hundreds of miles. In the summer, with a temperature anywhere between 120 and 130 in the shade, one is tormented by mosquitoes and sand-flies (the "Basrah particular") and sand-storms all day and every day, except when the south wind blows up the Gulf and the atmosphere becomes like a wet blanket. In the winter the rains make it impossible to play games, or even to get about with any degree of safety either on horse, foot, or car. Still, we have fun. The centre of the social life here is the Makina Gymkhana Club, which is now a civil club run on a subscription list—and, of course, the bar. The fine room which many of your readers will remember as the billiard room has been turned into a ballroom, and the billiard tables, have been removed into the smaller room that formerly was used for dancing, and where many a lottery has been held. There are dances after dinner on Wednesdays and Saturdays; a most excellent jazz band of some talented members of the club greatly adds to

the gaiety and enjoyment of these gatherings. There are still a score and more ladies who, rather than be separated from their husbands, are braving the severity of the Basrah summer, but the less robust have gone off to the Hill Stations, or the European "Mecca" of Iraq—Baghdad—with its salubrious climate, fine houses, glorious gardens, lawns, spacious clubs, military bands, moonlight bathing picnics at "Devonshire," and its nightly *feu-de-joie* of rifles and revolvers accompanying the raids of armed thieves and marauders.

FERROBASE.

PRESS ON THE NEAR EAST.

The Premier's Indian Speech.

The *New Statesman* of August 12 comments thus on the "unfortunate" effects of the Prime Minister's recent Indian speech:—

> When making his Indian speech last week, Mr. Lloyd George was doubtless aware that it would cause offence in India, but he can hardly have been prepared for a thoroughly bad Press. That, however, has been his portion. The Anglo-Indian papers, which always stand by the services, argue that, although the Prime Minister affirmed the permanence of the British Civil Service, his declaration had no more substance in it than his praise, since there is no evidence that the Government is dealing seriously with the service grievances, while the promise of support for the old privileged position is obviously incompatible with the present policy. This contention is strikingly enforced by the *Morning Post*, which has dealt at length with an important recommendation from Lord Reading, aiming at the drastic cutting down of recruiting for the services in England, in view of the rapid development of provincial self-government. On the Indian side it was understood that the extremists would announce that the Prime Minister had himself demonstrated the hollowness of the constitutional reforms—the point upon which they have insisted ever since the Montagu Bill was drafted. But the extremists have been joined by the moderate Press and the Reform leaders, their complaint being that Mr. Lloyd George's speech foreshadows the abandonment or emasculation of the new Constitution. Of course, it does nothing of the kind; but, as we have pointed out, the Prime Minister's language was so inexpert as to make this construction inevitable. Two other recent turns in the situation have been unfortunate. Mr. George's adjournment speech on Turkey and Greece has added to the restiveness of the Indian Moslems; and the National Congress Deputation, which is inquiring into the progress of Non-Co-operation, has been the occasion of trouble in Southern India.

The Caspian Sea.

The *Manchester Guardian* of August 5 has an interesting article on the waterway from the Baltic to the Caspian: it is entitled "From Sea to Sea":—

> The great waterway across European Russia from the Baltic to the Caspian may again become important. If the German capitalists, who are said to be trying to reopen it, succeed, their vessels will have to follow a rather complicated route. The Volga is, of course, the backbone of the system, but it also includes a lake, a canal, and three other rivers. Even so, the conception of commercial shipping being able to pass from end to end of those immense plains in voyages to Persia and Turkestan is a magnificent one. Yet there was a time in history when it would have been curiously less difficult. A map, for instance, designed to assist traders between the Baltic and Northern Persia would, at one period in the past, have traced an arm of sea flung southwards from the Arctic into the Caspian. The Caspian, moreover, is only the diminished relic of a tremendous sea that stretched once from the Middle Danube through Roumania, South Russia, and along both flanks of the Caucasus. It included that is, more than the present Black Sea, Caspian, and Sea of Aral. The records of man are silent on the subject, but its proof is written for geologists in the ground. Had those changes in the face of the earth not happened, the history of the West would need rewriting. That arm of sea from Polar regions to Turkestan would have set up a logical boundary between the two continents. Had it remained to play its part in the destinies of man, migrating barbarism of Roman days would have at least been delayed: the mediæval emperors, relieved of their frontier problem, could have concentrated successfully on crushing the Papacy; and, in the nineteenth century the Slav policy of Germany must utterly have changed. It is not an exaggeration to say that the civilisation of Europe has been affected from its birth through the rising of the plains out of this shrunken sea. But such hypotheses might be carried on indefinitely. The Mediterranean was once divided into two, and its western half did not communicate with the Atlantic, or its eastern half with the Black Sea. And England was not always an island.

Persia.

The *Times of India* of June 23 persists in its advocacy of non-intervention in Persia:—

> The foundations for the better relations with Persia which we all desire can only be laid by a policy of benevolent abstention. We should inform the Persian Government and the Persian people that we wish them well, and will assist them so far as lies in our power when the overwhelming sentiment of the country desires it. But we shall not interfere. If Persia wants foreign financial advisers, by all means let her have them, so long as they are not British. If Persia desires the development of the Northern oilfields, by all means let her do so, as long as the concessionaires are not British. If on some subsequent occasion, when prejudices have died down and suspicions have been allayed, Persia desires British help, it can be freely given. But it is not open to doubt that as long as Lord Curzon is at the Foreign Office every British move will be suspect. Nor is it open to doubt that if any premature action is taken, the subsidence of anti-British feeling in Persia, now in evidence, will be arrested. Great Britain is suffering from her own mistakes and from Persian ultra-sensitiveness. Though we are convinced that Lord Curzon's resignation is essential to a revival of confidence in British policies in Persia and elsewhere, we are equally convinced that in the Agreement he meant Persia well. The trouble is that no one in Persia believes that he did

or ever will. Given a period of rigid abstention and genuinely friendly policy, the old cordial relationship between the two countries will revive. Any attempt to hasten it will set back the hands of the clock for another decade.

The Egyptian Situation.

The *Manchester Guardian* of August 16, in an article entitled "The Freedom of Egypt," declares that the only solution of the present *impasse* in Egypt is the release of Zaghloul Pasha from the Seychelles. It begins thus:—

> The news from Egypt is severely restricted; what news does manage to penetrate the network of restriction is bad news. However, certain facts emerge. The Wafd members (Egyptian delegates) were arrested during July because they had signed a manifesto which was regarded as a direct incitement to violence by Lord Allenby, nominally High Commissioner, but in fact a military dictator of a country whose "independence" was formally declared by the British Government last February. The document asked the Egyptian people to "communicate to the civilised world by every means possible expressions of your anger and protest. The responsibility for whatever may accrue from this tyrannical policy rests on the British Government and the present Egyptian Ministry." These do not seem very desperate words, but they were enough to have the members of the Wafd taken before a military tribunal and sentenced to death. That sentence was commuted to a fine and seven years' penal servitude. It needs little knowledge of psychology to guess what happened next. A new Wafd was appointed and made its protest against the first convictions. The protestants have now themselves been arrested. Meanwhile King Fouad had apparently been urging his Ministers to further assaults on liberty and provoking a Cabinet crisis by his demand for the suppression of a newspaper which accused the Constitution Commission of preparing a draft that allotted too much power to the King. The journal had the further audacity to suggest that the Government of a democratic country should be in the main in the hands of the people. It was suppressed. That this campaign of repression has the authority of Egyptian Ministers behind it does not relieve Great Britain of its share of guilt. For those Ministers have scarcely a fraction of democratic support. They have marched into office under escort of British troops. Martial law has been intensified. Yet on February 27 of this year, a week after the declaration of independence to Egypt, Mr. Lloyd George stated in the course of a despatch to the Prime Ministers of the Dominions that "the Egyptians will now be free to develop national institutions in accordance with their aspirations."
>
> This preposterous situation has arisen owing primarily to the fact that the declaration of independence carried limitations which completely stultified it. The third section of the declaration "reserved to the discretion of his Majesty's Government, until such time as it may be possible by free discussion and friendly accommodation on both sides to conclude agreements in regard thereto," not only the security of the communications of the British Empire, but the defence of Egypt against all foreign aggression or interference, direct or indirect, the protection of foreign interests in Egypt, the protection of minorities, and the Soudan. This meant, in fact, the continued presence of the British Army and the rule of Lord Allenby as High Commissioner. Furthermore, no Egyptian statesman with any claim to popular support would dare to accept an independence which reserved the essentials of freedom for further discussion. Accordingly, Mr. Lloyd George called it "a unilateral declaration," and Egypt was left to make the best of this belated and so far barren gift. The country has still to make its treaty with Great Britain and to establish its own parliamentary government, and this with no sort of freedom of discussion permitted to its people. It is a farce, and a tragic farce, with serious possibilities of worse to come. Yet the British Government is apparently satisfied.

It goes on to recount the refusal by the British Government to grant the request, made "by many prominent English men and women," to reconsider the question of the Egyptian deportees in the Seychelles, and proceeds:—

> But it is flatly impossible for any Egyptian Government to have the confidence of a majority of Egyptians while its power is based on military law and its policy is one of sheer repression. No election is being held, and any election held under these circumstances would be valueless. The British Government, in fact, will only negotiate over the reservations to independence with a democratic and responsible Egyptian Government. But it continues to make the existence of such an Egyptian Government impossible. The contradiction is complete.

And, in conclusion, it states that, even if there is no way through these difficulties, there is a way round them:—

> But there is a way round these difficulties, even if there is no way through them. The solution of the Egyptian problem is in the Seychelles, where Zaghloul Pasha is kept in banishment by the British Government. Zaghloul commands the enthusiastic loyalty of his people; it is estimated that 90 per cent. of the Egyptian nation are his devoted followers. The Seychelles deportations are as bitter ashes in Egyptian mouths, and now the report is abroad in Egypt, despite the clumsy efforts of the censorship to prevent it, that Zaghloul is dying. The reactions of such a political martyrdom on a country already ready for revolt may easily prove disastrous. Zaghloul may not appear a fitting leader to the British Government, but it is not the business of the British Government to pick and choose the leaders of a nation whom it has decided to call "independent." At any rate, he is no impossibilist, although we have done our best to make him one, and terms of settlement would have been settled long ago between him and Lord Milner had not the British Cabinet, under the instigation of Lord Curzon and Mr. Churchill, unhappily intervened. To arrest and deport popular leaders when the Egyptian Constitution is being framed and the Egyptian relationship with the British Empire is due for discussion makes any real co-operation between the nations impossible. Peace can only be built, as the British Government admits, on a basis of democratic concord. But that concord is impossible apart from the release of the popular leaders. The British Government had to translate the Irish leaders from prison to Downing Street in order to secure the Irish Treaty. The parallel is a close one. There have been the same blunders and obstinacies; there must be the same solution. We do not grudge Mr. Lloyd George a holiday; but, with the tangled issue of reparations temporarily laid aside, there remains this needless and scandalous confusion in Egypt. The national honour, as well as the national interest, demands a speedy solution. For as the days go by embitterment increases and the possibility that Zaghloul may die in exile comes fatally more near. Should that disaster occur the change of settlement again recedes amid a vista of growing anger and revolt. The question of a real independence for Egypt, compatible with the security of British communications with the East, must be tackled thoroughly and tackled soon.

THE INDIAN GYMKHANA.

The annual match which the India Gymkhana have with the M.C.C. at Lord's was this year a most exciting encounter. Holding a lead of nine on the first innings (218 to 209) the M.C.C. made a sporting declaration in their second innings with eight wickets down, leaving the Gymkhana 258 runs to win. This the Gymkhana actually accomplished within two hours, and for the loss of but four wickets. The match was a great triumph for Dr. C. H. Gunasekara, who, besides taking in all seven wickets for 109 runs, scored 118 runs for once out. The winning hit in a fine match was made with only two minutes remaining for play.

Near East Bookshelf.

AN ARMENIAN PATRIOT.

"THE LIFE AND ADVENTURES OF JOSEPH EMIN: 1726-1809." Written by himself. Edited by his Great-great-grand-daughter, Amy Apcarr (London, Luzac & Co.)

Joseph Emin was an Armenian, who, in the year 1751, at the age of twenty-five, left his protesting father in Calcutta to go to England, which he felt to be the home of true freedom, seeking "for knowledge, to be of some use to his poor countrymen." His adventures began at once with the rough English sailors amongst whom he worked on the voyage, and for five years he barely succeeded in keeping himself from starvation in London, where he worked for part of the time as a porter. Then his luck suddenly turned, and he was brought to the notice of the Duke of Northumberland, who became his patron. He was sent to Woolwich as a cadet, and launched on his career. He had suddenly become a fashionable hero, and we are dazzled by the list he gives of those great ones who took an interest in him, although he omits "many others, who would fill up two pages if he were to name them all." Mrs. Montague, "the Queen of the Blue Stockings"—several of whose letters referring to him Miss Apcar publishes amongst her notes—became an ardent supporter. Between this date and the time of his retirement to Calcutta, where he published this book in 1792, he made three separate journeys to Armenia and spent many years there trying to rouse his fellow-countrymen to throw off the Turkish rule and to stand by one another. This immense volume gives his adventures in full. The adventures of a solitary man, a stranger, with practically no money, who set out with such a great aim in view, would be bound to be worth reading. And as written by Emin they certainly are worth reading He is astonishingly long-winded, but we can forgive him that for the vividness of some of his details and the unconscious humour of his moralisings and self-revelations. The fact that he is writing in a foreign language gives a quaintness to his narrative which is a great advantage. It is a very difficult story to follow because of the complete lack of proportion and distinction in emphasis. A trivial occurrence is told with quite as much circumstance and vehemence as incidents which altered the whole course of his adventures. So that we are reading on, amused and delighted, following Emin through the narrow lanes of Tiflis or amongst the mountains of Circassia, when we suddenly become aware that the whole aspect of things has changed and that we are at another phase in the story. Not that it really matters, because poor Emin hopelessly and completely failed in his mighty task. It is impossible to see how he could have dreamt of succeeding. He gives a sufficiently clear impression of the difficulties of the situation and of the attitude of the people to make us realise that even a Napoleon would have had no chance of success in such an undertaking. However, he made a very sporting attempt and faced both a good deal of danger and a great many snubs with the same calm self-confidence and bland self-satisfaction. He was met everywhere with a demand for money, which he never possessed and which he could not have kept safe for a minute even if he had had it. Also the priests, with their great influence over the people, were against him from the first. As Emin himself most picturesquely sums up matters, "Attempts of this kind Emin often made (and he hopes he may mention them without boasting), nor ever failed to endanger his single life, at several times and in several ways, in hopes of delivering his country while he was in Armenia. But alas! it was to no purpose, as the rich men hugged their bags of money to their miserable hearts; and, on the other hand, the demi-gods of the Church undermined the foundation of it."

We could not have imagined that anyone in writing his autobiography could so unconsciously and so thoroughly have given away what other people were thinking about him and what a nuisance they found him. Where his beloved Cause was concerned Emin was amazingly thick-skinned, and his perseverance was truly remarkable. Everyone who took him up or gave him the slightest encouragement found how impossible it was to shake him off again. It was the same unwavering determination to stick to his point that had taken him through those years of terrible hardship in London. When Emin as a cadet was not allowed, as he had hoped, to accompany the Duke of Cumberland to Westphalia, but was "left behind, neglected," he worried all his influential friends until he was finally sent after the expedition. In the same spirit he stuck firmly to the Court of Heraclius, Prince of Georgia, who had welcomed him for the sake of his rumoured English gold, long after that wily Eastern potentate had shown very plainly that he had no further use for him and his disturbing patriotic schemes. And even after thirty or more years of absence from his patron, the Duke of Northumberland, he wrote asking for his help in obtaining a post. The Duke made his determination to do nothing sufficiently clear to draw from Emin—who very seldom has anything but rapturous praise for the "noble English"—the very human exclamation that "it was discouraging in the highest degree to the grateful mind of one who had rung the name of Northumberland, like the great bell of Moscow, in the ears of people in Turkey, Persia, Armenia, and Georgia, who never had heard of it before in their lives." Emin, with his pluck and perseverance, his colossal conceit and all his triumphs and disappointments, big and little, is a delightful acquaintance to have made. As for his adventures, they are enthralling, whether he is living with a Swede and his English wife at Wapping, or nobly rejecting an offer of marriage from a Princess of Armenia; when he is marching at the head of eight thousand mountaineers, or when he is merely turning on his horse to look back at a beautiful Georgian girl, who had directed him on his road—one of the many "female angels" who came to his aid in time of trouble.

But stranger than anything else in this history of a forgotten enterprise are the glimpses of other people that it gives us: Calcutta dignitaries in the service of the East India Company, men and women, great and humble, who lived in London then, Georgians, Armenians, Russians, Turks, standing quite suddenly before us illuminated by some comment of the patriotic Armenian. There is, for instance, the maid servant at Wapping, "the beautiful Sally, lately married to a sailor who was gone to sea," who, when she rose to work in the early morning, "warbled the song, 'All in the Downs the fleet was moored,' etc., with so fine a voice," a vivid Hogarth picture. And, in a blaze of romance, there is "Michael, the Centurion," the perfect mountain bandit, who was killed in a fight against Heraclius and who "received nine balls in his body before he fell, pronouncing Lallah, Ilalah, etc.: then he laid himself down with as much composure as if he was going to sleep, and with his right hand under his head, looked as fresh as a rose." It seems to us that the fascination and interest of reading about these lives, some of which are only in this way rescued from oblivion, alone made it worth Miss Apcar's while to republish her ancestor's detailed autobiography.

But of course it has an interest far greater than this in the glimpse that it gives into the history of a conquered race, helpless to free itself, hopeless of any result from the help of others. It is a depressing picture of intrigue, bribery, oppression, and exile. We are struck by the calm resignation with which even Emin writes of the wanderings of his own family and of other exiled Armenians, of the voyages many months

long, of the meetings of relatives after many years in India, and in all parts of the Near East. And the names of the places to which they find their gradual, difficult ways never fail to suggest fairy tales and romance, with whatever events of the modern world they may be associated.

The notes which Miss Apear has added are all helpful and of interest, and we feel that Emin's story is likely to be appreciated more highly in the twentieth century than was apparently the case in the eighteenth.

BALKAN PROBLEMS.

"NEAR EASTERN AFFAIRS." By Stephen Panaretoff. (London: Macmillan, 10s. 6d.)

This book is published in this country for the Institute of Politics Publications, Williams College, Massachusetts. With so important a sponsor, one has a right to expect a treatise of authority and learning. What we actually get is a series of popular lectures treating Balkan problems in a sketchy manner and viewed distinctly from the Bulgarian side. The lectures were no doubt interesting to the audience, but they hardly bear republication as a serious contribution to the solution of these problems. Though the work, as stated above, is distinctly pro-Bulgarian, this is not meant to imply that it is unfairly so, but rather that it seems to forget that the Balkans contain other nations, and that they too have problems worthy of attention. The author seems to have become conscious of this fact by fits and starts only.

PERSONAL AND GENERAL.

TO-DAY.

August 24 (New Style).
August 11 (Old Style).
Moharram 1, 1341 A.H. of the Moslem Calendar.
Elul 30, 5682 of the Jewish Calendar.

M. Slobodan Yovanovitch, Secretary at the Yugoslav Legation, has left for the Continent, on leave.

The Aga Khan, who is now on the Continent, has arranged to come to London on September 6.

Mr. Henry Morgenthau, formerly American Ambassador to Constantinople, left London last week for Torquay.

Prince Nicolas of Roumania, accompanied by the Marquess of Donegall and Mr. Wynne, left Paris last week for Bucharest.

M. D. Bikelas, Secretary to the Greek Legation, has been transferred to the Legation in Berlin, and will take up his duties early next month.

The Maharaja of Bikanir, Lieut.-General Sir George Barrow, and Lieut.-Colonel Sir James R. Roberts have left Marseilles for India in the Malwa.

The Roumanian Minister and Madame Titulesco left London last week for St. Moritz. M. Radu T. Djuvara will act as Chargé d'Affaires during the absence of the Minister.

The Persian Minister left London on August 19 for Deauville. Mirza Mohammed-Ali Khan, Counsellor, will act as Chargé d'Affaires during the absence of the Minister.

M. Vidoslav Andjelkovitch, Secretary to the Legation of the Kingdom of Serbs, Croats, and Slovenes, has left London for Belgrade, accompanied by Madame Andjelkovitch.

A marriage has been arranged, and will shortly take place, between Mr. R. B. Templeton, of Calcutta, and Maie, widow of Captain J. L. Cottle (late Tank Corps), and daughter of the Rev. J. Morgan Gibbon, of Stamford Hill.

The engagement is announced of Captain Hugh de Lisle Penfold, 9th Gurkha Rifles, son of the late Very Rev. J. B. V. Penfold, Dean of Guernsey, and Barbara, younger daughter of Dr. and Mrs. E. V. Gibson, of Guernsey.

As Doctors Pashitch and Ninchitch, who were to have gone to Marienbad with the King and Queen of Yugoslavia, have had to defer their visit, their conference with the Czecho-Slovakian Ministers is postponed until next Sunday.

M. Jan Masaryk, Counsellor at the Czecho-Slovak Legation, has been recalled to Prague to attend the meeting of the "Little Entente" at Marianské Lazné (Marienbad). M. Fr. Borek Dohalsky takes his place as Chargé d'Affaires.

The engagement is announced of Henry Bernard Turle, of Calcutta, son of Edward Turle, of Hindhead, Surrey, to Alison Lee, only daughter of P. A. Rabett, of Sydney, New South Wales, and 17, Berkeley Street, W. The wedding will take place early in October.

The marriage arranged between J. C. Campbell, M.C., Royal Artillery, only son of D. A. Campbell, late of Calcutta and of Ghylos, Sedbergh, Yorkshire, and Rosamond Rhodes (Dody), youngest daughter of W. Rhodes, of Flore Fields, Northamptonshire, will take place on September 12 at Flore.

A marriage has been arranged, to take place in Calcutta at the end of the year, between Conrad Laurence Corfield, M.C., B.A., I.C.S., Assistant Private Secretary to his Excellency the Viceroy of India, son of the Rector of Finchampstead and Mrs. Egerton Corfield, and Phyllys, daughter of Mr. and Mrs. Pugh, of Calcutta.

The King has been pleased to approve the following appointments: Mr. Behin Behari Gosh, to be a Puisne Judge of the Calcutta High Court in succession to Sir John Woodroffe, who is retiring from the Bench in November next. Mr. Satish Ranjan Das, to be Advocate-General for the Presidency of Bengal in succession to Mr. T. C. P. Gibbons, K.C.

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.
ORIENTAL LANGUAGES AND RELIGIONS.
Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.
For particulars, apply to Sir E. DENISON ROSS, Director.

THE PERSIA SOCIETY.
President: Lord Lamington, G.C.M.G., G.C.I.E.
Founded in 1911 to study all questions of common interest to Great Britain and Persia.
Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1

Digitized by Google

An engagement has been announced, and the marriage will take place early in December, in Bangalore, South India, between Captain Thomas James Barnes, 64th Pioneers, son of the late Thomas Barnes, Engineer-Commander, R.N., and the late Mrs. Barnes, and Miss Aileen Elizabeth Stevenson, second daughter of Signora Guido Portiolli Rocca, and step-daughter of Dr. Portiolli Rocca, of Milan, and second granddaughter of Mr. and Mrs. Alex. Apcar, jun., of Cardrew, Friern Park, Finchley, N., Abshot, Bangalore, and Calcutta.

Earl Winterton, M.P., Parliamentary Under-Secretary of State for India, has, with the permission of the Secretary of State for India, accepted an invitation extended to him before he took office by the Governor of Bombay to pay a private and unofficial visit to India during the recess. He will spend part of the time with the Viceroy at Simla, and hopes to take the opportunity of paying visits to other personal friends in India. He sails in the P. and O. s.s. Kaisar-i-Hind from Marseilles on September 1, and expects to return at the commencement of the Parliamentary session.

A Constantinople correspondent writes (August 8):—His Honour Judge Linton Thorp has returned to Constantinople from Smyrna, where he had been sitting in H.B.M. Supreme Court. Amongst other cases tried was that of Mr. Dicran Dedeyan and the Oriental Carpet Manufacturing Company, Limited, in which the plaintiff recovered a verdict for nearly £5,000 sterling.

Great sympathy is felt in Constantinople, where they are so well known, with Sir Harry H. Lamb, K.C.M.G., and Lady Lamb, in the loss they have recently sustained by the death of their daughter after a long and painful illness.

The King has granted permission to wear the following decorations, which have been conferred in recognition of valuable services rendered during the War:—

By the King of the Hejaz.

Order of El Nahda (Third Class).—Mr. Christopher Cookson, M.B.E., Assistant Telegraph Engineer, Egyptian State Telephones, Cairo.

By the late Alexander, King of the Hellenes.

Order of George I.—Commander.—Acting Captain William H. Cottrell, C.M.G., O.B.E., R.N.V.R.

Conferred by the King of Egypt.

Order of the Nile.—Fourth Class.—Mr. Charles George Dupuis, Sudan Political Service.

The King has approved the following appointments:

Sir Robert Thorne Coryndon, K.C.M.G., to be Governor and Commander-in-Chief of the Colony and Protectorate of Kenya and High Commissioner of Zanzibar in succession to Major-General Sir Edward Northey, K.C.M.G., C.B., A.D.C.

Sir Geoffrey Francis Archer, K.C.M.G., to be Governor and Commander-in-Chief of Uganda, in succession to Sir Robert Coryndon.

Brevet Lieutenant-Colonel Gerald Henry Summers, C.M.G., 26th King George's Own Cavalry, Indian Army, to be Governor and Commander-in-Chief of Somaliland, in succession to Sir Geoffrey Archer.

Sir Graeme Thomson, K.C.B., Colonial Secretary of Ceylon, to be Governor and Commander-in-Chief of British Guiana, in succession to Sir Wilfred Collet, K.C.M.G.

OBITUARY.

Mr. Howard Crosby Butler, Professor of Princeton University, who has organised archæological expeditions in Syria and Asia Minor, has died in Paris. He had just returned from Constantinople.

The death is reported of General Sir Robert Melvill Jennings at the age of eighty-one years. He entered the Bengal Cavalry in 1859. He served on the North-West frontier in India in the early sixties, for which he received the medal and clasp, and also in the Egyptian War in 1882, for which he was awarded the fourth class of the Order of Osmanieh and the Khedive's Star, and was also mentioned in despatches.

The death has occurred of Colonel Thomas Marshall Harris, who served for thirty-five years in the Royal (Bombay) Artillery. In the Persian Expedition of 1856-7 he took part in the storming and capture of Reshire, the surrender of Bushire, and the bombardment of Mohammerah. In the Indian Mutiny he was present at the capture of Kotah and of Gwalior and Pawree, and was severely wounded in the pursuit at Koondrye. For his services he was mentioned in despatches and received the medal with clasp.

The death is announced of Lieutenant-Colonel Laurence Edye, formerly of the Royal Marine Light Infantry. He took part in the Egyptian Expedition of 1882, and was present at the battles of Kassassin, Tel-el-Kebir, and other engagements, for which he received the medal with clasp and the bronze star. In the Sudan Expedition of 1884-5 he was at the battles of Hasheen and Tofrek, and at the burning of Tamai.

THE EXPERIMENT IN EGYPT.

There is a tendency to misjudge the situation in Egypt. It is not as satisfactory as it might be: but no good purpose is served by making it out to be worse than it is, from whatever angle the misrepresentation comes. Among the letters that have appeared during the last week in the daily Press, references may be made in particular to two, one from Mr. Harry Barnes, M.P., in *The Times*, the other in the *Morning Post*. Mr. Barnes deals with the conviction of the signatories of the recent manifesto, and attributing what he regards as a policy suppressing liberty in Egypt to British "Bourbons," urges that Egyptians should be left to deal with Egyptians. The writer in the *Morning Post* argues that the time has come to ring down the curtain on a sorry farce, and to restore Egypt to "British management." When two such contradictory interpretations of the position in Egypt can be put forward by serious critics, it would seem necessary to analyse the essential facts of the situation. What has happened is that the British Government has come to a definite arrangement with Egypt, by which the latter is free for the future, subject to certain conditions, to manage her own affairs. The conditions have been laid down in broad outline, and are to be settled in detail by treaty when an Egyptian Parliament has come into being to represent the supreme authority of the nation. In the meantime, and under the arrangement between Great Britain and Egypt, an Egyptian Cabinet is responsible for the administration of the country, with martial law nominally in existence, but kept entirely in the background, and available only as an emergency safeguard. In the case of the deportation of Zaghloul Pasha last year it is true that the British military authorities acted under the powers conferred upon them by martial law; but it would be a mistake to infer that he is being kept out of Egypt to-day solely by British action. There is the best reason for supposing that the Egyptian Government is well content to be rid of the intransigent leader of the extremists at this transition period, although it could not say so publicly, and must continue to press for the repeal of martial law. Thus all the ordinary official acts of the day in Egypt are to be regarded as being performed by the Egyptian Cabinet, either entirely of its own initiative, or at least not against its wishes, even if recourse has to be had to the powers conferred by martial law. A member of the House of Commons ought not to have to be reminded that a Government, at least in the East, must govern. Even an Egyptian Ministry that has realised that if it does not look after itself no one else will, needs no prompting from British "Bourbons" in taking firm measures against those who are striving to put an end to it.

It is equally wide of the mark to urge the immediate restoration of "British management." Great Britain stands committed to the experiment of self-government in Egypt, and there can be no going back on the undertaking unless and until an adequate trial has proved that the experiment is incapable of any other result than complete failure. Up to the present the trial has not properly begun. There can be no illusions as to the future in an independent Egypt. British standards will in all probability never be reached. The Egyptians may possibly object to them on principle, and will certainly reject any claim to measure the success or failure of self-government by any other standard than that which they care to call their own. Nor is the advisability of the course adopted by Great Britain any longer a matter of useful discussion. Both for those who favour the British action or accept it as having been inevitable and for those who are still opposed to it the only practical attitude to adopt now, in the interests of all concerned, is to stand aside, watching dispassionately, if they do not feel called upon to help. Certainly no step ought to be taken, nor even any criticism offered, until the facts of the situation are appreciated. It is not fair, for instance, to identify the Egyptian people as a whole with the dastardly outrages that have been committed upon British subjects, or to hold the present Egyptian Ministry entirely responsible for their continuance. The murders are a by-product of the extremist agitation, which began with serious rioting and attacks on foreigners before the recent concessions towards independence were made. They can be used as arguments against the fitness of Egypt for self-government, as can also any hesitation on the part of, or incapacity shown by, the Administration in dealing with them; but this particular point, as we have seen, is no longer under discussion. Again, in view of the inevitable disparity between British and Egyptian standards, there is justification for British official representations on a subject in regard to which Egyptian endeavour appears to be lagging far behind Egyptian professions. But the most useful part that the British onlooker can play is to emphasise standards possible of attainment without girding at all the inevitable shortcomings.

It is not necessary to hold a brief for the present Egyptian Cabinet in order to recognise that its path is not proving a bed of roses. The murders of British subjects and the recurrence of "manifestoes" are proof that it is far from having done with the Zaghloulists, and consequently that formidable dangers lie ahead in the elections. That almost simultaneously a Ministerial crisis should be brought about by disagreement with the King, and the paper *El Ahram* should be temporarily suppressed, is a further indication to those with knowledge of Egyptian politics of the thorny character of the Cabinet's path. Some practical measures in the reorganisation of the police would seem to have been taken, and they cannot be held up at once to condemnation if crime does not automatically cease. The appointment of an Englishman as Secretary for Foreign Affairs suggests that the present Government does not subscribe to the bag-and-baggage policy of the extremists in regard to all British officials. Individual acts, however, may fall under one category or another, and time should be allowed for their cumulative effect to be judged. The important point to be borne in mind at this stage is that the Government of Sarwat Pasha is the one that the British High Commissioner considered worthy of support. It may fairly claim, therefore, to be given fuller opportunity than it has had already of making good. Much that it does or leaves undone will cause disappointment in Great Britain, but until actual failure has to be recorded British chivalry requires that the Egyptian experiment should be watched in a sympathetic, not a captious, spirit.

ENVER PASHA.

By the Rev. W. A. Wigram, D.D.

With the death of Enver Pasha there passes the last of that triumvirate of "Young Turks" who ruled and ruined Turkey in the days before and during the Great War. Enver, Talaat, Jemal, will be remembered as the men who secured control of a fine and promising movement, which was to relieve a great nationality of the nightmare of Hamidian rule, and who contrived to make of it something so awful, that Ottoman and resident foreigner alike both looked back to the days of Abdul as to a past golden age. To have accomplished this is certainly a feat, of a kind, and Enver is distinctly the most striking character of the triad, and one for whom, in spite of his acts, most Englishmen feel a sneaking kindness!

That all of the three should die by violence was only fitting, and nobody need have any sympathy for Talaat. "He is a Bulgarian gipsy," said gossip in Constantinople, in the days of his greatness, and the speaker would usually go on to remark that no gipsy had any morals anyhow, and that those of the Bulgarian gipsy were a markedly minus quantity. The man who deliberately organized the Armenian massacres, punishing any decent Turk who ever showed mercy, and who boasted openly that he "would settle the Armenian question for the next fifty years," had no cause for complaint when an Armenian dagger found his heart.

Jemal was the only true Turk of the trio, and he looked the part. Short, stout, and heavy, Nature had given him the body and head of a giant, but then kept him down to something less than average stature by rigorous economy in the items of neck and legs! Being a Turk, he had manners—which Talaat had not—and could be both generous and gentlemanly, on occasion, and to those whom he regarded as his equals. But—also as becometh a Turk—where he feared he was simply merciless, and knew but the one way of "taking precautions." Hence, his record is a red one indeed in the land of the Syrian Arab and the Druse, and it was from there that his assassin came.

The fact that Jemal had a cheerful way of issuing orders when he was drunk, and then forgetting them when he was sober, until the execution of them was announced to him, made him an uncertain person to deal with at times; for it will be understood that the habit is one that is apt to cause trouble, when death warrants and pardons are on the tapis. Hence, certain Englishmen, who were in his hands, had an exciting time of it. It was so difficult for their American well-wisher to persuade Jemal sober that Jemal drunk had really sentenced them to death. To do him justice, he was ready enough to countermand the order when really convinced that he had issued it. Further, both drunk and sober, he remembered old frends, as certain of the old British colony at Baghdad have good reason to know. Let this, then, be accounted unto him for righteousness!

Enver, however, was by far the most picturesque of the three, both in appearance and in career. Talaat was grossly fat; Jemal, a heavy Turk; Enver was to the last active and slight, and one of the handsomest men in Constantinople. Further his good military figure was always well turned out, and residents in the Turkish capital during the war may remember the fact that, when deportations of "enemy subjects" were very much the order of the day, one of the two men in the city who were safe from that peril was the English tailor, for that he was the only man who could cut riding-breeches to Enver's liking. (The other artist who enjoyed similar safety was the ladies' hairdresser, as the only man who could be trusted to arrange the flaxen locks of the gracious Frau Ambassadress Wangenheim!)

In character, Enver was not very attractive, for though he was of most courteous address, and—to give the devil his due—personally, fearless, yet he was no more than an unscrupulous adventurer, ambitious, treacherous, and relentless.

By blood he was, again to quote Constantinople talk, no Turk at all, but a Pole, and son or grandson of one of the numerous refugees who found a new home in Turkey after the rising of 1867 against Russia. Enver had thus some excuse for a hereditary hatred of that power.

It has always been Ottoman policy to receive, and give a career to, such refugees as come to Turkey after having, in any fashion, made their own land too hot for them. Let such a one bring himself to a verbal acceptance of Islam—no more was sought—and a new name, a new career, almost a new identity, were at his disposal, while he could bring military science to a nation that are the finest soldiers, but almost the worst generals, in the world. Most of the great Ottoman generals, from the time of Mohammed II. onward, have been acquired thus, though the Mohammedan name disguises the fact. Many readers of The Near East will probably recall the story (*ben trovato* at the very least) of the Russian and Turkish generals, who met for a conference in 1878, and who only discovered, when both swore at the interpreter in good broad Scots, that both were North Britons, and both from the same village!

Enver, then no more than a subaltern officer, took up with the "Young Turk" party in the days when that organisation really had aspirations for a free and modernised Turkey, which could be a member of civilised Europe. Abdul Hamid suppressed them, perhaps with a more accurate notion of the capacities of the country he governed, and applied his usual methods to them. Hence they were driven to plot, and to use, it is believed, the machinery provided by Freemasonry and Harems in their political work. Enver was an agent in all this, and was used as the figurehead of the party rather than its real leader, a figurehead that could be sacrificed without much injury if the plot should fail. The fact of its success, however, made him the idol of the hour in Constantinople, and a personality even for Europe, and this seems to have turned his head.

Becoming Military Attaché at Berlin, Enver was then taken up by the Germans, whose position in Constantinople was then all to re-make, for the whole web of their Oriental diplomacy had been shattered by the success of the revolution. (It seems like a dream to recall that in those days the British Ambassador, returning to his post after a temporary absence, was drawn in triumph to his residence in Pera by a deliriously enthusiastic crowd of Turks! The tale of how we, with all the strong cards in our hands, allowed Germany to take all the tricks in the diplomatic game of the years 1908-1914, is not one that reflects much credit on our diplomacy!) Berlin saw the makings of a convenient tool in the young officer, and not only won him by flattery and attention, but simply hypnotised him by the spectacle of German readiness and power. He was allowed, we understand, to put his finger on any one of the list of army corps, and a telegram was despatched to its headquarters. Enver followed in a special train, and on arrival found the corps actually in a state to take the field. It was an exhibition that would impress a Turk with some sense of his country's shortcomings. Thus, on his return to Constantinople, still a prominent member of the sinister "C.U.P.," he had German backing behind him at all times, and his friends had no objection to his rapid rise to real power—usually over the bodies of wiser and more patriotic Turks than himself. No one in Constantinople had any doubt that Enver had sent the assassins who murdered Shevket Pasha and Nazim Pasha, and all understood what was meant when the windscreen of the latter's motor-car, shattered by the revolver bullets, was exhibited in the war museum of the capital as a sign to all men not to oppose Enver! Thus it was he, more than any other individual, who hurled Turkey into war in 1914. It was he and von Wangenheim who despatched the Goeben to shell Sebastopol, and so force the hands of his hesitating colleagues. Talaat, for instance, knew nothing of this, and was actually dining at the "Cercle d'Orient" with a member of the American Embassy when the news came in. Talaat turned white as a sheet and sprang from the table, crying, "C'est impossible!"

Enver had his reward, for he became Minister of War, vice-generalissimo of the Ottoman armies, ruler of the country conjointly with Talaat, then Grand Vizier, and, finally, husband of the Sultan's daughter.

Facts were to prove to him that he was a poor general in the field, a trade of which he had, of course, no experience. He was utterly defeated by the Russians

Digitized by Google

at Sara Kamish, and the Turkish invasion of the Caucasus was broken at a moment when a victory was very welcome to the Entente. During the Gallipoli episode Enver paid occasional visits to that front, and the common word in the capital was: "He has gone down there again. Now there will be another Turkish attack on the British, and another murderous defeat." If not a victor in the field, Enver was, however, a truly magnificent profiteer, and one of his "deals" (again we quote Constantinople gossip) might fill the bosom of a British or American financier with envy. It was toward the end of the War, when Batum had fallen into Turkish hands, and there was a famine of petroleum in the capital. Enver secured a ship, and bought 1,000,000 "bidons" of petrol at Batum at £T1 each. This was some six times the pre-war price, but the Turkish Government paid. The goods were put on sale in Constantinople at £T10 per tin for the private account of the War Minister and his friends! Enver invested his share in real estate on the Bosphorus, for which, we must allow, he paid royally, as he could afford to do. Then came the Turkish collapse, the flight of both Enver and his friends, a few years of wandering and obscure adventure, and his death in the obscure scuffle mentioned in *The Times* of August 19. It seems that he was trying to rouse the Turkomans for something, perhaps he himself hardly knew what, save that it was to be anti-English and also anti-Russian, and was to produce, somehow, a principality and a position for himself.

His end was deserved and appropriate enough. Perhaps death with his back to a wall and his face to a firing party would have been fitter still, but when that is said let us own to a kindness for so magnificent an Adventurer, whatever his crimes against his country and other men. In 1907 a "black-listed" subaltern under Abdul Hamid, doomed to eat his heart out in obscure provincial garrisons. In 1908, a figure that had attracted European sympathy and admiration. In 1917, a figure of world importance; the ruler of his country, the friend of emperors, the husband of a princess. He had plunged his land into an appalling gamble, but then it looked as if he had won, and Turks were already counting what a grateful and victorious Germany would do for the Power that had turned the doubtful scale in her favour. The restoration of Egypt, of the Caucasus, and the recognition of the Sultan (Enver's father-in-law) as head of a pan-Islamic league from the Atlantic to Kabul were the least that they were counting on. It was a good ten years' work, for his own benefit and that of his country, for any man to look back on. Then came the fall of everything; Enver had gone up like a rocket, and he came down like the stick, but at least he had scored, and made a fine, if transitory, exhibition in the political firmament!

No doubt he was treacherous, selfish, blood-stained; to call him all of those things is simply to say that he was an Oriental adventurer; but taking him just as the adventurer he was—what a career! We have had so many Englishmen of his type—though usually with less of selfishness and more of scruple—that we need not refuse to feel a kindness for one whose career has revived the old personal touch, in days when the political stage has grown to be so big, that all the human figures on it look small.

SERBIAN GIRLS IN ENGLAND.

(From a Correspondent.)

During the war a few women, English and Serbs, joined together in a scheme to give permanent aid to Serbia by training some Serbian women in various professions in England and sending them back, when trained, to practise those professions in their own country. It was found advisable to bring over girls of school-age and put them to good schools for not less than two years, so that they should learn English thoroughly and become conversant with English ways and English methods of work. The society also realised that home life is a vital necessity in the training of any girl, and that no matter how good a school may be its influence on the character is not so important or so lasting as that of a home. It has, therefore, placed each girl in a suitable home, where she is like the daughter of the house, and receives the individual care and affection without which no girl can develop properly in mind or body.

The girls are now growing up, and the time for their leaving school is coming near. One has already left, and has chosen hospital nursing as her profession. To those who are acquainted with Eastern Europe, where trained nurses are unknown, either in hospitals or for the sick in their own homes, it is evident that this one girl will do an immense amount of good, not only in her work but also as an example to her country-women. That example is already taking effect on another of our girls, who is leaving school at the end of this term. She is, however, too young to enter a hospital, and we propose to fill the year of waiting by giving her a course in domestic science, which will be an extremely valuable asset to her when she holds an administrative post in a hospital.

There are many careers besides nursing open to our girls: medicine, commerce, horticulture (peculiarly useful in a fruit-growing country like Serbia), teaching, especially the teaching of English, as English is now compulsory as a second language in all Government schools in Serbia.

The society is supported entirely by voluntary subscriptions. Schools and private families have been most generous in receiving our girls, but the time has now come for specialist training, which means that the expensive period of the girls', and therefore of the society's, career has arrived.

We therefore appeal for help, not so much for the benefit of the girls themselves as for the larger aspect of the scheme. By training these girls in our best schools and in our best English traditions, we establish a close friendship between England and Serbia, a friendship founded on the mutual affection and trust between families of both nations, which is the true "union of hearts," and is a closer and firmer tie than political treaties can ever be. By this means the best which England can give will be introduced into Serbia by the Serbs themselves, who will carry with them the remembrance of happy years among their English friends, and will therefore influence their own nation towards friendship with us.

Donations to the society may be sent to: Dr. Dorothea Tudor, Hon. Treasurer, 14, Endsleigh Street, W.C.1, or to Miss M. A. Murray, Hon. Secretary, 16, Somerset Terrace, Duke's Road, W.C.1.

The Egyptian Council of Ministers has (says a Reuter's message) approved the continuation of the new railway station at Alexandria, and the appointment of a commission of military and other experts to deal with the preparation of the proposed Italian frontier agreement.

NOTES AND NEWS.

The Roumanian Exchange.

It is an unfortunate fact, as I had occasion to point out a few weeks ago in connection with Czecho-Slovakia, that the improvement in the exchanges, if it be too rapid, brings a whole crop of new ills in its train. Roumania, as will be seen from what our Bucharest correspondent says this week, is undergoing this experience. The good harvest, the development of the oil industry, and the Treasury Bill conversion scheme have had the effect between them of bringing about a very marked improvement in the leu in recent weeks, and this, our correspondent explains, has affected all classes of the business community adversely, and in particular the farmers, for whom it means lower prices for the grain exported. This has brought about a demand for measures to stabilise the leu, among those proposed in the local Press being a new issue of paper currency. Movements of the leu during the past week suggest that official intervention has taken place. Let us hope that the measures adopted have not included further inflation, and also that extreme care will be taken in safeguarding Roumanian commercial interests that the leu is not unduly maintained at an unreal level. For the general good the path to parity must be as straight as possible.

Ottoman Debt Report.

The special report of Sir Adam Block on the Ottoman Public Debt has now been issued together with a translation of the annual report of the Council of Administration of the Debt for the fiscal year 1920-21. It is a far from encouraging document, as is only to be expected, considering the conditions that have prevailed in Turkey since the Armistice. Sir Adam emphasises the adverse political situation, and points out that "under such circumstances all hopes of the financial and economic regeneration of the country are out of the question." The handicap with which the Council has had to contend are outlined. The position as a matter of fact can be summarised by the statement that during the period in question the Council had to rely on the receipts available in Constantinople and the adjacent districts. Apart from the effect of large territories being temporarily cut off from the Central Government, the Council has been embarrassed by the action of the Mandatory Powers in retaining ceded revenues. It appears that the Angora Nationalists have utilised all the revenues collected for the war. This is the first time, it is pointed out, that there has been a systematic infringement of the Decree of Muharrem. "It is a matter of regret," it is added, "that the authorities in Anatolia should have felt obliged to resort to such a measure which even in the late war Turkey refrained from adopting."

The Receipts.

Prima facie the results of the year are not unsatisfactory having regard to all the circumstances. There was an increase of almost £T1,000,000 in the gross receipts, this being due to the better yield of the tobacco revenue and the Customs and Treasury operations, all the revenues under the direct administration of the Council being down except the fisheries revenue. There was a decrease in the spirit revenue of 31.94 per cent., while the silk revenue showed a decrease of 29.04 per cent. The latter industry has suffered more than any other in Turkey, as the result of the prevailing conditions, and it is to be feared that a long period must elapse before it is thoroughly re-established again. "When the country is pacified," says Sir Adam, "there may be an improvement, but it is doubtful if and when the prosperity of the years 1903 and 1909 will return. It takes six months to build a spinning factory, six years to restock a mulberry plantation, but how many years will it require to bring back the populations to their former number and vigour?"

The Council's receipts were £T8,187,000, as against £T7,766,000 for the previous year. It is estimated that the gross receipts for 1921-22 will show a slight decrease in the figures for 1920-21.

The Import Duty.

Commenting on the reversion to the *ad valorem* system, Sir Adam points out that this duty on imports (3 per cent. of which goes to the bondholders) should mean an increasing revenue. Naturally, nothing very favourable can be expected until trade with Anatolia has been resumed and until the conditions in Turkey and the neighbouring States change for the better, "but, in any case, the *ad valorem* system will in the present circumstances produce more than was the case under the very incomplete and out-of-date specific tariff which was previously in force." Besides the resumption of payment on account of the Unified coupons by the Council, Sir Adam records an agreement between the Turkish Government and French holders of bonds outside the Decree of Muharren for a payment on account of the coupons from 1914 to 1920. "The only remark I feel called upon to make with regard to the arrangement," says Sir Adam, "is that whilst there may be an advantage in receiving a small payment on account, it is evident that unless the bondholders' consent is previously obtained, no Turkish Minister of Finance can modify the terms of the loan contracts or of the bond, and oblige a bondholder to accept payment in francs when it is clearly stipulated that the coupon is payable at the option of the holder in sterling."

A Tour in Yugoslavia.

Details have been sent to me of a tour in Yugoslavia which is to take place early next month. It is quite out of the ordinary run of these things; in other words, it is not to be a breathless expedition led by an ultra-energetic guide round the chief centres of interest. Pleasure will play its part in the tour, it is true, but it will be a restricted rôle, the principal purpose of the tour being to enable British business men to make the acquaintance of their Yugoslav *confrères*. There is nothing like personal contact for the promotion of com-

mercial intercourse, and those who take part in the tour will have every facility afforded them in the way of influential introductions, etc., for opening up new business relationships. The Yugoslav Government, I understand, are taking a keen interest in the undertaking, while the King has given permission for the use of the royal saloon on the mountain railway by the members of the party. The tour, the cost of which is £100, undoubtedly offers a special opportunity to the business men who are thinking of interesting themselves in the Yugoslav market; and I hope that they will not be backward in taking advantage of it. I shall be glad to supply further details to readers on application.

A New Roumanian Capital ?

I see that the question of a new Roumanian capital has been under discussion, but I do not suppose anything will come of the project at the present time. The position of Bucharest may, and doubtless has, serious disadvantages, but the construction of a new capital is not a project to be undertaken lightly by a country situated as Roumania is. There will be time enough for plans of this kind when the leu is once again near parity, but perhaps a little interval for thought may result in the abandonment of the scheme. Changes of this kind cannot be relied upon to work out satisfactorily.

COMMENTATOR.

BUSINESS CONDITIONS IN IRAQ.

A Trader's Views.

To the Editor of THE NEAR EAST.

Sir,—We traders in Iraq are wondering how long the present unsatisfactory state of affairs in this country is to continue. We are told to have patience, and that when the Treaty is ratified or peace with Turkey is effected, or something else, equally as vague or indefinite, happens we shall be rewarded by something just as nebulous and uncertain.

It is now nearly four years since the Armistice was declared, and we who served the Government and did our bit during the war turned to more peaceful pursuits and began to pave the way for opening up commerce on expansive lines. We communicated with exporters at home, and established agencies and connections, but instead of any revival of trade setting in a decline took place, and now business is practically dead. Many firms have been compelled to cut their losses and close down. A small number still exist, and are hanging on in the hope of lasting until the long-delayed settlement with the Iraq Government takes place and the long-looked-for improvement in trade comes along. What the nature of the settlement will be, or when it will be effected, no one can guess, but we do think the time has arrived when some definite pronouncement should be made by the Government on the subject.

The country requires money badly. Revenues are totally inadequate to cover expenditure, and the incidence of taxation has, we should think, reached its utmost limit. The deficit is Rs. 50,000,000. We are anxious to get to business to develop the wonderful resources of the country, but sympathetic as our administrators are, they can neither help nor offer advice. What we want first of all are roads, then railways. Private enterprise has already commenced, with very little encouragement, to open up road communications with the Mediterranean littoral. But as the roads are mere tracks across the desert, and as the vehicles used are old army material, there seems little likelihood of success. Give us good roads to the Mediterranean coast, suitable for heavy transport, and we shall be ready for the development of trade when the resources of this country begin to come on the market. We hear the A.P.O.C. may possibly take over the working of the Mesopotamian Railways, and we hope the rumour is true.

The Department of Agriculture has proved that this country can produce grain and cotton which will hold its own in any market. But with what result? Cultivators have been induced to grow grain. They have had a bumper harvest, but have been unable to market their crops on account of the prohibitive cost of transport, and have been left with their produce on hand. The British Cotton-Growing Association has done a great deal towards promoting the growth of cotton, but its efforts will be greatly handicapped unless provision is made for transportation of the fibre to buying centres.

The question which exercises the minds of most people here, as at home, is oil. What is being done in regard to this, Iraq's most valuable asset? We have little or no information but that which we can glean from occasional paragraphs in the *Baghdad Times* or any of the home papers which publish anything that transpires in Parliament on the subject. Mr. Winston Churchill recently declared that "the British were not complete masters of the situation," and that "they recognised certain oil rights, but the United States did not." Does this statement mean that the absurd claim of the Turkish Petroleum Company still forms the bone of contention with America? Your readers will remember that this claim was declared by the Foreign Office in 1915 to have "no legal validity."

In this connection it may interest your readers to learn that the only producing wells in Iraq at present are being worked by a military department for the benefit of the Army of Occupation. These wells were worked by the Germans, and were taken over by the British when they occupied the district. Why have they not been returned to the owner?

We do not want any monopolistic concern to get control of the whole of the mining rights of this country. We think that individual enterprise, such as has obtained in the Caucasian, Roumanian, Mexican, and other oilfields, should be encouraged. Finally, we ask for a speedy settlement of all questions concerning this country, as we are anxious to get to business. Every day's delay in fixing up the Treaty is landing Iraq deeper in debt.

Baghdad, August 4. "ARMENIUS."

The traffic receipts of the Suez Canal from July 29 to August amounted to 3,050,000 frs., against 2,400,000 frs. for the corresponding period of last year.

Traders from Turkey at the Nijni Novgorod Fair, Russia, are to be given the same privileges as are accorded to those from the Middle East, but "Turkey" in this sense is confined to the territory controlled by the Grand National Assembly at Angora.

Messrs. N. M. Rothschild and Sons will pay on September 1 the dividends, due on that date, on the Egyptian Guaranteed Three per Cent. Loan, and on the Brazil Government Four per Cent. Loan of 1911.

The Commercial Secretary to the British High Commission at Constantinople reports that the law on the stamp duty promulgated by the Turkish Government in 1906 has recently received certain modifications at the instance of the Allied High Commissioners. Further details are obtainable from the Department of Overseas Trade.

The firm of S. Webster, Ltd., of Moorgate Station Chambers, E.C.2, which went into voluntary liquidation following the death of its organising director, Mr. S. Webster, has now been reorganised and will continue to trade as hitherto under the same title and from the same address. The management of the new concern will be in the hands of Mr. Harry Webster, son of the late managing director.

Bucharest, August 9.

The Problem of the Exchange.

The outstanding feature of this week's events is undoubtedly the rise in the value of the leu. The rise was certainly desired, but it came too suddenly and rapidly, taking everybody by surprise, and has consequently caused a certain amount of anxiety in interested circles. Both commercial and official circles here would prefer that the improvement in the value of the national currency should take a slow and even course without violent fluctuations, and it is felt that it would be best that the rate should not for the present go better than 100 lei to 10 French francs, which amounts to about 540-550 lei to sterling, because a sudden and rapid rise will seriously affect very many commercial and industrial undertakings, whose transactions are based on the low state of the currency, and who have therefore been able to compete with similar foreign products. Furthermore, local manufacturers would have great difficulty in redeeming the heavy sums of lei invested in plant and machinery should this rapid improvement of the national currency continue. Farmers, however, would be the worst hit of the lot, for the rise in the leu has set in just about the time when the grain is ready to be sold and exported. The grain prices will naturally drop in proportion to the appreciation of the national currency, for prices abroad for Roumanian grain do not follow the fluctuations of the rate of exchange, but are dictated by the state of the world's markets. Farmers here will certainly not submit without fierce resistance to lower prices, the more so as the cost of working the soil has been excessively high on account of the depreciation of the currency, and they are, therefore, running the risk of obtaining for their crops less lei than they invested. The local grain markets are in consequence at a complete standstill, and home prices have tumbled by leaps and bounds. It must be borne in mind that each rise of one franc per 100 lei in Paris represents a loss of about 1,000 lei per wagon of 10,000 kgr. to the grower. It is already reported that at several country markets the peasants, who came to market their produce, returned home with their grain unsold. This reluctance on the part of the farmers to part with the product of their labour, below cost as it were, will have as an immediate consequence a delay in the exports until conditions will have settled down.

A large number of importers have also begun to feel the pinch, especially those who settled for their goods during the last weeks at rates ruling between 700 and 800 lei to the £, thus sustaining losses which are almost irretrievable. Prices for a large number of manufactured goods have already started to decline.

The general demand, therefore, is not for a rise in the value of the national currency, but for a temporary stabilisation round a reasonable parity, say about 540-550 lei to the £, to be followed after a few months by a slow and steady improvement once the crops have been marketed.

Nobody knows exactly the real cause of this sudden improvement of the leu; some attribute it to the frequent gambling on the Paris Bourse, others are of the opinion that foreign grain buyers have every incentive to further the improvement of the leu while Roumania is exporting grain in order to buy this vital produce as cheaply as possible.

Suggestions are already being made in the local press that the Government should intervene to counteract this rapid rise of the leu by authorising the National Bank to make fresh issues of bank notes. This measure would have a double advantage, as a shortage of liquid money is being felt at the present moment on the principal local markets. Of course, the foregoing is merely a suggestion; it remains to be seen what steps the authorities concerned will take to apply a brake to the upward move of the rate of exchange, which instead of bringing joy to the people of this country—as one would rightly expect—has caused alarm in most spheres.

Roumania's Exports.

According to official figures published by the Ministry of Finance, Roumania's exports during the first five months of the current year amounted to about 2½ milliard lei. Cereals naturally occupy the first place with about 980 million lei, maize heads the list with 372 millions, then follows barley with 286 millions, oats with 150 millions, and haricot beans with 58 millions. Petroleum products figure at 749 millions, of which the export of petrol amounted to 463 millions, of refined oil to 235 millions, and residues to 15 million lei, etc. Timber figures at 239 million lei, while cattle is responsible for 272 millions. The report concludes with sundry commodities, such as eggs, which were largely exported to Switzerland and Austria; wines to Germany and Austria; and salt to the south-eastern and central countries of Europe.

New Export Taxes.

The *Monitorul Oficial* publishes the following export taxes to come into force as from August 1 for commodities as specified below:—Ham, 8 lei per kilogramme; buffaloes, 1,000 lei per head; and nuts, 300 lei per ton.

GREECE.

Athens, August 7.

Food Prices.

In order to control the prices of provisions a syndicate has been formed by merchants in conjunction with the Ministry of Food for the importation of sugar, coffee, rice, dried vegetables, etc., and the distribution of the provisions to the retail shops at certain prices. The committee of this syndicate have informed the Ministry that they will require at the least £30,000 per month in order to carry out the scheme. It is not yet known whether the Consortium will be in a position to supply this amount, which is, of course, exclusive of Government requirements.

Poor Harvest.

The harvest throughout Greece has been a very poor one, especially in the Thessalian Plain. Continued rains in the autumn and winter prevented sowing, and a complete drought in the spring completed a most unsatisfactory season.

The Bourse.

Values continue to fluctuate from day to day, seemingly based on rumours probably circulated by the speculators. On Tuesday last the 1914 Loan gained 65 points. Marginal operations in guaranteed Government stocks have been prohibited, and speculators have turned their attention to the shares of banks and limited companies. The National Bank shares lost 900 points on Wednesday, regaining them on Friday.

Exchange.

The Consortium rates are unchanged, while the "outside" rate has increased to 205 drachmæ per £.

CZECHO-SLOVAK FINANCE.

According to statistics just published, the 367 Czecho-Slovak savings banks had at the end of the first half of 1922 8,044 million crowns of deposits, which means an increase of 733 millions, or 10 per cent., as compared with January 1. The net increase for June amounts to 42 millions, and the net amount of deposits was 4,288 millions in the case of the 194 Czech savings banks and 3,204 millions in the case of the 171 German savings banks. The two privileged provincial savings banks—viz., the Bohemian Savings Bank at Prague and the First Moravian Savings Bank at Brno, which are under joint Czech and German management—had at the same time 551.5 million crowns of deposits. They are the biggest institutions of this kind in the Republic. The highest increase in deposits was noticed during the first quarter of the year. In April and May larger amounts were withdrawn, which in most cases have been used for the payment of the property tax. In spite of this, however, the deposits were steadily increasing, and their present amount, 8,044 million crowns, represents a considerable loss.

According to the last statement of the Banking Office, the circulation of paper money shows a further decrease by 140 millions, being 1,170 millions lower than permitted by law. The proceeds from property tax amount to about 1,470 millions. At the same time, it is reported that during 1921 the output of gold amounted to 354.5 kilogrammes and the output of silver to 21,866.9 kilogrammes.

British Consular Reports.

X.—CZECHO-SLOVAKIA.

The following extracts are taken from the report of Mr. R. H. Bruce Lockhart, Commercial Secretary to H.M. Legation, Prague, on the industrial and economic situation in Czecho-Slovakia during the period June, 1921, to May, 1922:—

To-day, after three and a-half years of intensive work and reconstruction, Czecho-Slovakia has won for herself and for her people the reputation of being the one State in Central Europe which has set its house in order, and which has avoided at all costs the evils of the printing press. The British financial and commercial community has ceased to regard Czecho-Slovakia as an ephemeral and artificial creation, likely to be submerged by Bolshevism, and at any rate destined sooner or later to extinction as an independent entity. Even if the average British business man's knowledge of Czecho-Slovakia is still not all that it should be, the ignorance of the past is disappearing very rapidly. That this is so is reflected in the largely increased number of British traders who have visited the country during the past twelve months. If further evidence of this increased confidence is required, it is provided by the realisation of the Czecho-Slovak State loan in London and by the creation of the independent Anglo-Czech Bank in Prague through the agency of the Bank of England. Both of these events are of paramount importance to Anglo-Czech relations.

This establishment of Czech credit abroad must be very gratifying to the Czecho-Slovak Government, and in particular to Dr. Rasin, the first Finance Minister of the new Republic, who, in spite of all the attractions which a low *valuta* offered to the Czech export industry, set himself resolutely and fearlessly to the task of establishing his country's currency and finances on a solid basis. The Czech crown, which until September, 1921, had invariably followed the fluctuations of the German mark, has broken away entirely from this state of financial dependence, and is now firmly established on its own merits on the principal exchanges of the world.

The Economic Position.

The mere fact, however, of the improvement of the Czech crown, combined with the continued collapse of the exchanges of those countries to which Czecho-Slovakia must look for her export markets, has created an industrial crisis fraught with danger and in many respects similar to the crisis through which Great Britain has been passing during the past two years. To-day Czecho-Slovakia is facing this crisis with a relatively high exchange. On her ability to emerge from that crisis will depend her reputation as an independent nation with a firmly established future. Her economic position is, indeed, in many respects analogous to that of Great Britain. Like Great Britain, she has an industry far beyond the needs of her own population. Like Great Britain, too, the very vitals of her existence depend on the success or failure of her export trade. Until November, 1921, the date on which the Czech crown began its rapid ascent, the Czech manufacturer had lived in a state of easy prosperity. Bolshevism had been crushed almost before it had revealed itself. From the beginning of the republic strikes had never been a serious menace, while, thanks to the *post bellum* demands of an impoverished Central Europe, profits had been realised on a scale which before the war was without precedent. This prosperity is reflected in the trade balance for 1920, which shows a surplus in favour of exports of over four milliards of crowns.

It is obvious, however, that this prosperous state of affairs is unlikely to continue during 1922. Owing to the high value of the Czech crown, which since October, 1921, has risen by nearly 100 per cent., Czech industry can no longer compete abroad in the same easy manner as hitherto. The country is, therefore, faced with the problem either of artificially lowering the exchange value of the crown or of making sweeping reductions in prices and in the cost of living. To anyone who knows the Czech people it is not difficult to forecast which method the Czech Government will choose. Every Czech has seen for himself the results of the printing press and of reckless inflation in Germany, Austria, and Poland, and, while some manufacturers may complain, the majority will prefer to have their hard times now with the prospect of a prosperous future rather than have recourse to the printing press, with its temporary alleviation, at the price of a future and still more serious crisis. It would be idle to deny, however, that Czecho-Slovakia is still confronted with many serious problems which must be solved before her consolidation as an independent State can be regarded as complete. Some of these are purely local, and can and should be solved locally. Others, again, are beyond the range of the Czecho-Slovak Government, and concern her neighbours almost more than Czecho-Slovakia herself. Their solution will depend upon the general policy which will prevail in Europe during the next ten years.

Trade Conditions.

As a country dependent on export for its existence, Czecho-Slovakia has more to gain from the speedy restoration of normal economic conditions in Central Europe than almost any other State. With an industry far exceeding the needs of the home population, and with neighbours whose low *valuta* makes it difficult for them to purchase Czech goods, the Czech people are faced with the serious problem of reviving their old markets and discovering new outlets for their export trade. Quite apart from all political questions, it must be evident that it is on the economic policy of the Czecho-Slovak Government during the next few years that the future welfare of the country will depend.

In spite of the prosperous trade which the country has enjoyed up to the end of 1921, the situation is not devoid of danger. Since the creation of the republic the bulk of Czech trade has been with Germany. According to the official figures of the Statistical Office for 1921, 47.7 per cent. of Czech imports came from Germany, the latter country taking 36.2 per cent. of Czech exports. While it is true that to a certain extent these figures represent an exchange of raw materials, no other country absorbs anything like so large a proportion of Czech trade. Opinions may differ as to what should constitute the best economic policy for this country, but every Czech realises that the future of Czecho-Slovak trade is in Central Europe. He is naturally anxious to avoid, as far as possible, any economic dependence on Germany. It may be taken for granted, therefore, that for the future the economic policy of the country will be directed towards reducing the balance of trade with Germany and increasing the percentage with the various Succession States, such as Yugoslavia, Poland, Roumania, Austria, and Hungary. Russia, too, looms very large in the eyes of the Czech exporter, but for the present it would be idle to speculate on the possibilities of Czech trade with that country. In view of Russia's weakness, the immediate efforts of the Czecho-Slovak Government must be directed towards securing the economic consolidation of Czecho-Slovakia in Central Europe. During the past three years steady and sure progress has been made in this direction.

Somewhat contrary to expectations, 1921 has proved an even better year than 1920, the industrial crisis not making itself felt until the close of the year. The figures for 1921 in crowns are not yet available, but during the year Czecho-Slovakia exported 96,457,659 quintals of goods and imported for the same period 39,617,161 quintals. There is, therefore, little doubt that the crown balance in favour of exports will largely exceed that for 1920. Since the beginning of 1922 there has been a marked fall in Czech exports. The continued collapse of the exchanges of most of Czecho-Slovakia's neighbours and the improvement of the Czech crown have had their natural effect, and to-day the country is faced with much the same crisis as Great Britain has undergone during the past two years.

Commerce and State Control.

In spite of repeated promises, the Government has not yet abandoned its system of State control. During the year under review, however, many of the most irksome restrictions have been removed. In particular, the restrictions on the buying of foreign *valuta* have been greatly diminished, and most of the "central commissions" for the control of various supplies have been abolished. Even in the matter of import and export licences, which are still required in all cases, a great improvement has taken place. It is perhaps natural that, in view of the collapse of the exchanges of the various countries which surround Czecho-Slovakia, the Czechs should take precautionary measures to prevent an export country like their own from being flooded with cheap manufactured goods. The retention of State control, if even in a modified form, is due far more to the collapsed exchanges than to any desire on the part of the Government to retain a system which has been subject to criticism from both the Czech and German-speaking business community. It is not too much to say that the introduction of complete decontrol depends more on her neighbours than on Czecho-Slovakia herself. In practice there is now no difficulty in procuring an import licence for raw materials or an export licence for manufactured goods. On the other hand, it is still almost impossible for a foreign firm to export to Czecho-Slovakia any article which is manufactured in the republic itself.

Trade with Great Britain.

During 1921 Czecho-Slovakia exported to Great Britain 1,524,383 quintals and 426,803 pieces, and received in exchange 976,926 quintals and 1,040 pieces. The chief Czech exports were:—Sugar, 932,076 quintals; clothing, 426,771 pieces; and wood, coal and peat, 149,371 quintals. The chief imports from Great Britain included:—Grain, flour and rice, 804,487 quintals; fats, 16,242 quintals; cotton

Digitized by Google

goods and yarns, 15,372 quintals; flax, hemp and jute, 25,889 quintals; woollen goods, 30,458 quintals; and metals and metal goods, 16,900 quintals.

It has always been recognised that Czecho-Slovakia does not and cannot present a very large field for the export of British manufactured goods. The country itself manufactures for export many, if not most, of those manufactured articles which form the staple export commodities of Great Britain. There should be a fair opening for British goods of the highest quality, but at the present moment the State control of commerce makes the introduction of these goods almost impossible. For the future, therefore, the bulk of British trade with Czecho-Slovakia should take the form of raw and semi-raw materials. In sugar the Czechs have already resumed their former export to Great Britain, and in 1921 over 90,000 tons were sold to London.

At the end of 1921 a British firm secured a large contract for the sale of tobacco to the Czecho-Slovak Régie. At the present moment British firms are tendering for the contemplated construction of the new Prague Municipal Gas Works, while other prominent British firms are interesting themselves in the various constructional schemes projected by the Government for the development of Czecho-Slovakia. It is in this field that the greatest openings for British finance and industry may be expected.

British Companies in Czecho-Slovakia.

During 1921 the various British steamship companies who are seeking registration in Czecho-Slovakia continued their negotiations with the Czecho-Slovak Government. These negotiations, which have been protracted and subject to numerous difficulties, have now been brought to a more or less satisfactory conclusion. In the past eighteen months several British insurance companies have sought to obtain licences to do business in Czecho-Slovakia. In this case also the negotiations with the Government have been protracted Though, in principle, no objection is raised to British companies operating in Czecho-Slovakia, in practice numerous difficulties, especially in regard to taxation, are encountered. At the present moment practically all reinsurance business is done with Germany.

Industry and Production.

As a result of the war Czecho-Slovakia has acquired between 70 and 80 per cent. of the whole industry of the former Austro-Hungarian Empire. It is obvious that this vast industry, which far exceeds the needs of the home population, must be seriously affected by the depreciated exchanges of those countries which formerly furnished its chief markets. Although the year 1921 was almost a normal one as far as unemployment was concerned, and was actually a prosperous one in business results, there is every reason to believe that 1922 will be a very difficult year for the Czech manufacturer. Until September, 1921, in spite of relatively high prices, the Czech manufacturer had been able to dispose of his goods abroad, not so much because he was able to compete with German prices, but because the German manufacturer was unable to carry out all the orders which were offered to him. It is probable that this state of affairs still holds good to-day. In the meantime, however, Czech prices have increased as a result of the sharp rise in the Czech crown in December, 1921, while the exchanges of neighbouring States have collapsed still further. During the first five months of 1922 the industrial crisis has developed steadily, and it is probable that the situation will become worse before any improvement can be expected. It should be pointed out, however, that by far the larger portion of Czech industry is well prepared for the crisis which is regarded by the majority of manufacturers as inevitable, and, indeed, necessary. This is proved by the fact that so far there have been practically no large industrial failures or bankruptcies, nor, indeed, are failures on a large scale to be anticipated. While it is true that the industrial crisis, both here and in other countries, is largely a question of the exchanges, there is little doubt that Czech industry will require serious reorganisation if it wishes to retain its export trade. The seriousness of the crisis in Czecho-Slovakia will depend on the ability of the Government to reduce the cost of living and of the manufacturers to reduce their costs of production.

Glass.

Glass holds the third place in the list of Czecho-Slovak exports for the year 1921, in spite of the fact that the period under review has been one of the most difficult that the industry has had to face.

Window Glass.—In pre-war days 85 per cent. to 90 per cent. of the Czecho-Slovak production of window glass was disposed of within the boundaries of the late Austrian Empire, but to-day, with new fiscal boundaries and the depreciated currencies obtaining in the Succession States, Czecho-Slovak manufacturers have been forced to seek new markets for their goods overseas. In order to do this successfully it was necessary for the manufacturers to adopt a single line of policy, and to this end they formed two sales organisations under the names of "Vitrea" and "Fenestra." These two organisations have spared no effort in introducing Czecho-Slovak window glass on the foreign markets, and manufacturers, through technical efficiency, economic production and keen prices, have not only been able to hold their own in competition with Belgium and Germany, but have secured markets which should prove to be of inestimable value when normal conditions return.

Glass Bottle Industry.—This industry was in a flourishing condition until the Customs rates in France, Italy, and Spain were considerably increased, making the export of glass bottles to these countries almost impossible. The loss of these markets was a severe blow, and manufacturers are face to face with a crisis, the end of which is difficult to see.

Sugar.

The State control of sugar, which was introduced during the war, remained in force until the spring of 1921, when it was finally decided to liquidate the Sugar Commission. In order, however, to avoid possible disorganisation of the industry and serious losses, all the sugar manufacturers of the republic combined and formed a syndicate called the Czecho-Slovak Sugar Syndicate. The object of the syndicate is to sell sugar for the common account of all manufacturers, and any losses arising out of sales of sugar abroad are to be borne in equal proportions by all the manufacturers jointly. The present arrangement is that the manufacturers are paid a fixed price for all sugar taken over by the Syndicate, and any losses sustained by sales abroad are borne by the raw sugar factories and refineries mutually according to a definite fixed scale. The beet growers run no risk whatever, but participate in any profits accruing from the sales of sugar abroad to the extent of 43 per cent. The remaining 57 per cent. is divided between the Government (50 per cent.) and the manufacturers (7 per cent.). It was as a syndicate that the sugar industry began the season of 1921-22.

Owing to the abnormally dry summer, the 1921 beet harvest was far below the average, and only 35,027,700 quintals of beet were worked up in 1921-22, as compared with 41,904,053 quintals in 1920-21. The better quality of the beets, however, almost compensated for the loss in quantity. The figures for the 1921-22 season are not yet complete, but it is estimated that about 6,500,000 quintals of raw sugar were produced. At the end of 1921 over one-third of the sugar contingent for export was still unsold, and, owing to the rapid rise of the Czech crown that has set in since and to the unfavourable state of the sugar market abroad, is now being sold at a considerable loss. This loss will have to be made up by the manufacturers in so far as it is not covered by profits made during the first half of the season. The stock of refined sugar in hand on April 1 amounted to 230,000 tons. During the month of April, 21,000 tons were consumed at home and 29,000 tons exported, leaving a balance in hand at the end of April of 180,000 tons.

Textiles.

During the past year the situation in the textile industry has undergone a complete change from that immediately following the end of the war. After the close of hostilities there was an unprecedented shortage of raw materials, and home and foreign buyers were waiting eagerly to replenish their stocks of goods. During the period under review there was a plentiful supply of raw materials, while the former difficulties of transport had been overcome. Other difficulties, however, arose, namely, the general stagnation on the markets of the world and the depreciated exchanges of the most important buyers of textile goods from this country.

Cotton.—During 1921 most of the factories were only working at about 50 per cent. of their capacity, and business in spring and summer was decidedly slow. In August an improvement set in, probably on account of the strengthening of cotton prices. This improvement, however, proved to be only of short duration; new orders began to fall off, and the factories again began to work for stock. The rapid rise of the Czech crown towards the end of 1921 and the beginning of 1922 made it impossible for Yugo-Slavia, Hungary, Austria, and Poland to buy goods in this country; this led to a real crisis in the cotton trade.

(To be concluded.)

The Indian Committee of the British Empire Exhibition held a first meeting on August 16, under the chairmanship of the High Commissioner for India.

Stock and Share Markets.

MARKETS QUIET BUT STEADY.

Industrials Better.

(From Our Own Correspondent.)

London, Tuesday Morning.

My remarks last week that the Stock Exchange no longer reflects as it used to do what happens abroad has been amply borne out by what has happened during the past week. We have had the break up of the Conference and the departure of "the captains and the kings"—happily there is no ceasor now to delete the last word on the ground of solid fact—entailing a further postponement of the stabilisation of the exchanges, and *ipso facto* delaying and putting back the trade recovery. In the circumstances one would have expected prices in certain markets, at any rate—to have broken sharply, but nothing of the kind happened. It was not without effect for a moment, it is true, but the influence was short-lived, and the markets quickly reverted to the listless condition that has characterised them now for so many weeks.

I have my own view as to the cause of this phenomenon. Briefly it is this. People are so convinced in their own minds that ultimately there will be a general recovery that they obstinately refuse to sell, no matter how adverse the news, their determination being strengthened by the fact that after what has happened since 1914 shocks fail to have the same effect. It seems to me that the most obvious example of this is to be found in the Rubber market. This group has suffered from a very prolonged depression, the outlook still remains uncertain, and yet prices are maintained well above the level that would seem to be justified by the existing conditions.

Gilt-edged Quiet.

A very quiet tone has ruled in the gilt-edged group. Consols at 58⅜ are 5-16 down, the Conversion Loan has shed ⅛ at 76¼, while War Loan Fives at 100 5-16 are 5-16 lower. Indian stocks have fallen away slightly. The Seven per Cent. stock is ½ down at 118½, the 3½ per Cent. stock at 68¼ is unchanged, while the 3 per Cent. stock is ¼ lower at 58¼.

The Foreign group has inclined to be weak. French stocks have been dull, War Loan Fives being 37¼ x.d., while the 4 per Cents. at 20¼ are 1¼ lower. German 3 per Cents. are 1 9-16, at which they are ⅛ lower. Italian Rentes remain at 21. Russians are rather better, the 4 per Cents. being ¼ up at 6, while the 5 per Cents. are about the same at 10½. Greek Monopolies are unchanged at 34¼. There has been a marked recovery in Czecho-Slovak bonds, which at 91 show a gain of 5½.

Industrials Firm.

Generally speaking, a firm tone has obtained in the Industrial group, though as usual business has been on the smallest possible scale.

Tobaccos have once again been a strong spot. Bats at 88s. 9d. are 9d. up, while Imperial Tobaccos at 70s. 3d. are 2s. up. Textiles have been fairly firm, with Courtaulds 6d. down at 50s. 9d., and Coats unchanged at 65s. 3d. In Iron and Steel securities Armstrongs are 9d. up at 16s. 3d., Guest Keens have gained 6d. at 36s., while Vickers are unchanged at 12s. In Indian Railways Bengal and North-Westerns are 1¼ up at 139¼, and Madras and Southern Mahrattas are ⅛ up at 105½.

In Shipping securities P. and O. Deferred are 5 down at 305, Cunards are 20s. as before, and Furness Withys are 1s. up at 33s.

Oils Variable.

Oils have been rather variable. Burmahs are ⅛ up at 5⅜, while Anglo-Persian Ordinary, which have been in strong demand, close at 5 5-16. Mexican Eagles are 3 1-16, at which they are 1-32 lower. In Trinidad issues Apex are unchanged at 2 1-16, Centrals at 1 15-16 are 5-16 up, while Leaseholds are unchanged at 1 1-16.

Among Egyptians, Anglo-Egyptian B are 1⅜, a decline of 1-16, while Oilfields of Egypt are 3d. up at 4s. 3d. In the Roumanian group Phœnix are 27s. 9d., at which they are 9d. down, Steaua Romanas are 6d. lower at 10s. 3d., Dacia Romanas are unchanged at ⅞, while Roumanian Consolidated are 1s. down at 16s. 6d.

Banks Steady.

A fairly steady tone has ruled in Banking descriptions. Chartereds are 18¼, National of Indias are 43⅜, P. and O. Banks are 14 1-16, while Bank of British West Africas are 4⅜ x.d.

In Egyptian securities, Aboukirs are 20s. 6d., Beheras are 8. Egyptian Markets are 21s. 6d., Gharbieh Lands are 1 5-32. New Egyptians are 23s. 3d., Sidi Salems are ⅞, and Union Foncieres are 2⅜.

Rubber.

Nothing of special note has transpired in the Rubber market. As usual, a very dull tone has obtained, but price movements have been on a very small scale. This week has seen an increase of stocks in London, but it has not made much difference to the market.

Engineering Topics.

Lubrication Problems.

The average reader would probably be astonished to hear that even to-day there are problems connected with lubricating which engineers have not yet solved. There are even stray differences of opinion as to whether one good, high-grade oil of high viscosity will not give average results for all purposes, and more than one engineer would be prepared to argue that there is no need for all the many grades that are marketed, and that some of the sub-divisions are made more to please the buyer than because they are in any way necessary.

It is probable that there is something to be said on both sides of the question. It is obvious that a light cutting oil for use as a lubricant in drilling or other forms of metal working and in fine grinding would be hardly the thing to use in a 1,000-h.p. aero-engine. Nor would a heavy, viscous tar oil be of much use for oiling a typewriter. A good brick oil might be quite the wrong kind to use for the ring oilers of an electric motor, or the shuttle guide of a sewing machine. It seems certain that different oils must be demanded by different processes, but it may be that there is something in the contention that when it comes to dealing with moderately high speed reciprocating machinery what may be described as a good all-round useful oil should be generally suitable.

That is not to say that an oil which would be about correct for lubricating the cylinders of a low-pressure condensing steam-engine would be ideal for a high-speed petrol engine of the air-cooled type, or that Diesel fuel oil would be quite suitable for use in the water-cooled engine of a light car. At the same time it is approximately correct that a careful selection of the grades on the market should give, say, three oils by means of which most lubrications could be properly and carefully carried out.

It has been found in actual operation that the entire range of oil service as a lubricant could be carried out by, at most, four oils; one for forced lubrication, one for splash lubrication, one for use in cylinders of internal combustion engines, and one for general light machinery. It has been said by an expert that, so far as marine practice is concerned, even on a motor ship driven by an internal combustion engine using the general run of machinery one could, by choosing those two, out of the above four grades, which were best suited to her needs, lubricate properly everything on board that needed lubrication.

Electric Welding.

At one time it was considered that finality had practically been reached by the carbon arc process of electric welding, but the wheels of development moved so quickly that already that method has been almost entirely superseded by the metal electrode process. Of course, the carbon arc method had the advantage of being much easier to manipulate than those which followed it, but their advantages are such that the carbon arc process to-day is practically used only for filling up blow-holes in castings and for dealing with minor flaws. One of the chief troubles in connection with it was that the character of the metal was changed locally. In the vicinity of the weld it contained a high percentage of carbon which rendered it difficult to machine, and also to some extent liable to fracture. It has been stated by an expert that given skilled operators, however, on certain types of joints, where there is a considerable amount of metal to fuse, and where a single negative carbon is used, very good results may be obtained, equal in many cases to those obtained by the metallic arc process. But for all practical purposes the latter is by far the most generally used, and gives better results. These results are uniformly better, in the hands of the average operator, by reason of the shortness of the arc employed, the automatic fluxing, and the ease with which almost any composition of metal can be dealt with. At the same time it has been pointed out that many qualities of steel and cast-iron, and nearly all the non-ferrous metals as yet refuse to be welded successfully by this process. We do not seem to understand as yet all laws regarding the transference of metal across the arc, and we are also still somewhat uncertain as to the best fluxes to use and the best conditions for perfect fluxing. Further, we do not know by any means all the conditions which govern the penetration of the added metal into the surface of the original metal on which the weld is being carried out. In this, as in many other engineering problems, further research work and scientifically conducted investigation is necessary.

The use of the electric resistance process for butt, spot, and seam welding is rapidly becoming popular, and it would seem to be one which is highly efficient. Further, as Mr. Nightingale points out, it is simple, rapid, and combines a heating and forging action. Properly carried out, the welded joint made in this way is of much better material, and since the heating is commenced and continued from the inside of the metal and not from the outside, comparatively little oxide is formed. For jointing bars, wires, and sheets by means of "spot" welds it is by far the most efficient and reliable process yet discovered, and its application is rapidly invading the field hitherto solely occupied by soldering and brazing. There has been much more research work carried out in connection with this process than has yet been made public, and according to the authority quoted above the various phenomena in connection with it have been investigated very thoroughly. The process does not call for the manipulation of either flame or arc by the operator. It consequently calls for less skill, and is therefore particularly suitable for all repetition or quantity production work.

Motor Cycles for All.

There is, I suppose, no doubt that motor-cycling would long ago have been an almost universal pastime were it not for the expense entailed. When it is, as it has been, a question of paying £60 or upwards for a good machine, it is obvious that the demand must remain limited. It is not that moderately priced machines are not on the market, but they have simply not been good enough to make their acquisition a real economy. The position has now been altogether changed, however, by the introduction of a motor-cycle which is cheap and at the same time extremely efficient. I refer to the McKenzie $1\frac{3}{4}$ h.p. two-stroke light-weight safety motor-cycle, which can be obtained for 26 guineas. The machine's appearance does not suggest the requisite strength for hard work, but a trial will speedily convince anyone that it is equal to any reasonable calls that are likely to be made on it. The machine is started as an ordinary cycle would be, and it is one of its great advantages that in case of the petrol supply giving out it can be pedalled, while the rider is able to give assistance to the engine up really severe hills. But this will rarely be found necessary, for the machine is a good hill-climber, and will surprise those who imagine that the little machine will not be able to tackle successfully a really stiff ascent. The machine is controlled by one lever, which is opened to accelerate and closed to stop. A maximum speed of about 28 m.p.h. can be attained, while the petrol consumption works out at something like 160 miles per gallon.

A Useful Lock-Nut.

Since I touched on the subject of lock-nuts in these columns recently, I have received particulars of a new type of lock-nut—the Snow Nut, it is called—which is shortly to be introduced on the market by Messrs. Philip Chapman and Co., and whose qualities would seem to ensure for it a very ready demand. In the first place it is extremely simple, as the stud or bolt does not require to be bored and screwed; and, secondly, it is cheap. The following is a description of the nut suitable for railway purposes:—The main sleeve or lock is internally screwed, and the outer surface is tapered not exceeding seven degrees. On this cone is another nut or clamping ring, also tapered inside to co-operate with the main sleeve. The end of the main sleeve is spun over to prevent the two pieces coming apart. The main sleeve is screwed up tight, and the outer nut is driven down the taper with a hammer by placing a cup over the end of the bolt. As the main sleeve is slit, this action ensures a perfect bind on the whole of the threads and prevents the nut coming loose with vibration. I understand that this lock-nut was tested by the Royal Aircraft Establishment against another lock-nut for thirteen hours in all, the final comments being: "In all cases where the cantilever arm dropped, the Snow Nut did not rotate visibly on the bolt."

Shipping Intelligence.

TANKER CHARTERING.

Decline in Rates.

Messrs. John I. Jacobs and Co., of London, in their half-yearly report on oil-tanker chartering, state:—Since the publication of our last review, tank steamer rates have declined to levels not generally contemplated. Running costs and bunkers, it is true, have fallen to some extent, but not in proportion to the further slump in freight rates. We have again to record that the supply of tonnage has quickly exceeded the somewhat increased demands for the carrying requirements of the world. No firm benefit can accrue to tank steamer owners until the supply and demand equalise themselves. With bunker coals at their present costs, it is somewhat surprising that oil fuel prices have not further declined to compete with it. At the end of 1920 there was a total gross tonnage of tankers under construction of about 2,200,000 tons, but the latest figures published by Lloyd's show that tonnage now under construction only just exceeds 500,000 tons, of which over two-thirds is building in the United Kingdom. The oil companies, both here and in the United States, have had at most times tonnage to spare. The amount of tank tonnage owned in Western Europe has been considerably added to.

The three outstanding features of the six months under review are:—Firstly: The increasing shipments from South Russia. Secondly: The level to which time charter rates have sunk. Thirdly: The fact that the first cargo of Argentine oil has been brought to Europe. The Roumanian producers have been less active in so far as shipments are concerned, and their demands are still satisfied by boats of under 4,000 tons capacity. During the period under review, freight rates from the principal shipping countries have been as follows:—

Northern States of America.—Earlier in the year tonnage was obtaining 21s. 6d. to U.K., Continent, and 22s. 6d. for Denmark, but tonnage is now willing to take as low as 15s. 6d. for clean cargoes. The rate for dirty tonnage earlier in the year was somewhat lower than that for clean boats, but they are now more or less on a parity. These rates are for steamers of from 7/9,000 capacity; smaller boats, of course, getting rates proportionately higher.

The Gulf of Mexico commenced by paying for large boats 5s. more than the Northern States, but at present owners are willing to accept 3s. extra. Rates have dropped during this year from a 30s. basis to 19s. actually done and 18s. offering. Small boats from the Gulf, however, have obtained as high as 36s. 6d., and the present rate is in the neighbourhood of 30s.

Mexico to United States Refineries.—This trade has again taken a considerable amount of tonnage, principally of large size, but rates have dropped from the basis of 28 cents per barrel to New York down to 22 cents, and for New Orleans from 18 cents to about 15 cents.

There has been a very limited inquiry for tonnage home from California, and a fixture was done at 42s., but tonnage is now offering at between 32s. 6d. and 35s. in response to the inquiry lately in the market. Russia has paid 30s. for handy tonnage for lubricating oil, which is about the current rate, but for kerosene and/or spirit the rate has fallen from 27s. 6d. to 22s. 6d. for steamers of about 6,000 tons capacity, and to about 19s. to 20s. for larger boats. Roumania, as mentioned, takes only handy boats, and the rate earlier in the year was 37s. 6d., but 28s. 6d. is now the current rate of freight. Shipments from this country consist of clean cargoes only, as there is still a total prohibition on the export of heavy oils.

ANCHOR LINE

First-Class Passengers only.

LIVERPOOL TO BOMBAY.

KARACHI via Bombay, calling at Gibraltar & Egypt.

LARGE STEAMSHIPS. UPPER DECK CABINS.
FITTED WITH ELECTRIC FANS.
RECOGNISED BY INDIAN GOVERNMENT.

Passenger sailing dates:—

Scindia, Aug. 24.	Olympia, Nov. 7.
Massilia, Sept. 8.	Castalia, Nov. 21.
Elysia, Sept. 20.	Scindia, Dec. 6.
Circassia, Oct. 20.	Massilia, Dec. 22.

ANCHOR LINE (HENDERSON BROTHERS), LTD.,
16, GRACECHURCH STREET, LONDON, E.C.3.

The German market has again been a very important one, but owing to the continually increasing financial difficulties of that country business has, of course, been restricted to the very barest demands of the population. Spain has imported a considerable amount of oil, but so far as fixtures are concerned they have not been numerous, owing to the fact that the importing companies, which are subsidiaries of the large French and American groups, have been able to obtain practically all the tonnage they require from their parent companies. Fixtures to the Mediterranean ports do not call for special mention, owing principally to the number of Italian tank steamers which have been laid up, and which in many cases are being run under Government control to import the requirements of that country.

Creosote.—Larger quantities of this oil have been shipped from Europe to America and Canada, whilst the Pacific Coast has taken, so far, one large cargo at 32s. 6d. Representative fixtures in this trade are 13s. for 5,000 tons to Montreal, although 20s. was at one time paid, whilst Thames to New Orleans gets tonnage for 4,000 tons at 11s. 6d.

Time charter, as already mentioned, has been an outstanding feature owing to the very low rates, which in some cases have been accepted by owners. At the beginning of the year 8s. was obtained for charters of not over 12 months' duration, but towards the spring the rate dropped to 6s. on the dead weight. At the present, the rate for good-class steam-driven tonnage may be put down at 4s. 9d. on the steamer's dead-weight carrying capacity, although in one case a cylindrical tanker accepted so low a figure as 4s. 3d. Oil-driven tank steamers demand a very much better rate, and probably 2s. more than the current steam rate might be obtained for this class of boat. Terms of charter, however, and duration of the charter are entirely in charterer's favour, options being given for extensions, which under more favourable circumstances owners would probably not entertain.

During the period under review, owners have found considerable difficulty in showing even a bare margin of profit on the voyages undertaken, and in the majority of cases it is a question of keeping a boat at sea in order to minimise deterioration and employ officers and crew. The outlook for the remaining summer months is very far from hopeful, but owners are inclined to think that now the amount of tonnage to be built is so strictly limited they will see some better rates in the autumn, when the demand for oil in Europe generally expands. This can be best illustrated by the fact that the majority of owners prefer to fix their tonnage voyage by voyage, or if on time charter for short periods only.

THE WATERWAYS OF CZECHO-SLOVAKIA.

Improvements at Komarno.

The Commercial Secretary to H.M. Legation, Prague, in the course of his report on Czecho-Slovakia, states:—

The Ministry of Public Works has devoted its chief attention to the Danube and the improvement of the ports of Bratislava and Komarno. A general project was drawn up with a working programme for five years to make the port of Bratislava suitable for an annual transhipment of 3,000,000 tons. The port of Komarno is to be furnished with an equipment necessary for transhipment of 1,000,000 tons per annum. The carrying out of this project was begun in 1921, and the Government expended on the construction and improvement of these two ports approximately 22,000,000 kronen. In Bratislava large depots for the storage of mineral oils and general merchandise were built, and a storehouse for corn (40,000 tons) is under construction. Railway sidings were considerably extended, and orders were placed with home engineering firms for the construction of seven large cranes and one pneumatic grain elevator. Similar work on a smaller scale was done at Komarno. As regards the Labe (Elbe) and its tributary the Vltava (Moldau), canalisation of the section between Melnik and Pardubice was continued, and a lock was completed at Prague on the Moldau, so that the river will now be navigable for direct navigation from Hamburg to Prague.

NEW ATLANTIC LINER.

The new Canadian Pacific liner Montclare (16,400 tons) sailed from Liverpool on August 18 on her maiden voyage to Canada. She is a sister ship to the Montcalm and the Montrose, and completes the post-war shipbuilding programme of the Canadian Pacific; seven steamers, with a total of approximately 135,000 tons, having been added to the fleet during 1922. The Montclare is an oil-burning vessel, and many new features have been introduced in her construction. The cabins have been fitted with patent non-jammable doors and locks, which render the cabin doors unjammable, thus removing the possibility of passengers being imprisoned in their cabins should an emergency arise. The vessel is fitted with a surgery and an operating theatre, a playroom and nursery for children, a cinematograph installation, etc. All berths, including third class, are fitted with spring mattresses.

Digitized by Google

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis :—

Anchor Line.—S.s. Massilia for Bombay (Liverpool, September 4).

Anchor Brocklebank Line.—S.s. Mahanada for Port Said, Colombo, Madras and Calcutta (London, August 26); s.s. Media for Calcutta (Birkenhead, August 31); s.s. Mandasor for Calcutta (Birkenhead, September 16); s.s. Mahsud for Port Said, Colombo, Madras and Calcutta (London, September 16); s.s. Mathura for Calcutta (Birkenhead, September 27).

Bibby Line.—S.s. Warwickshire for Rangoon (London, August 28); s.s. Lancashire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 30); s.s. Yorkshire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, September 13); s.s. Arracan for Rangoon (Middlesbro', September 27).

British India Line.—S.s. Margha for Bombay and Karachi (London, September 8); s.s. Madura for Colombo, Madras and Calcutta (London, September 15); s.s. Domala for Bombay and Karachi (London, September 22).

Clan Line.—S.s. Clan Murray for Colombo, Madras and Calcutta (Birkenhead, August 24); s.s. Hesione for Bombay and Persian Gulf (Birkenhead, August 26); s.s. Clan Malcolm for Colombo, Madras, and Calcutta (Birkenhead, September 7); s.s. Clan Mackenzie for Bombay and Persian Gulf (Birkenhead, September 8).

Cunard Line.—S.s. Phrygia for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Swansea, September 5).

Ellerman Line.—S.s. Gerano for Gibraltar, Patras, Piræus, Syra, Volo, Salonika, Constantinople, Bourgas, and Varna (Liverpool, September 2).

Ellerman "City" Line.—S.s. City of Poona for Calcutta (Birkenhead, August 30); s s. City of Brisbane for Calcutta (Birkenhead, September 16); s.s. City of Genoa for Bombay and Karachi (Birkenhead, September 22).

Ellerman's "Hall" Line.—S.s. City of Simla for Bombay, Karachi and the Punjab (Liverpool, August 30).

Ellerman's Westcott and Laurance Line.—S.s. Castilian for Malta, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila (London, August 26); s.s. Eden Hall for Malta, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila (London, September 6); s.s. City of Alexandria for Gibraltar, Malta and Alexandria (London, September 9); s.s. Tasso (new steamer) for Gibraltar, Malta and Alexandria (London, September 20); s.s. Borodino for Malta, Piræus, Salonika, Smyrna, Constantinople, Galatz and Braila (London, September 23).

Glen Line.—S.s. Glenapp for Port Said, Port Swettenham, Singapore, etc. (London, August 24); s.s. Glengarry for Port Said, Port Swettenham, Singapore (London, September 7); s.s. Carnarvonshire for Port Said, Port Swettenham, Singapore, etc. (London, September 21).

Harrison Line.—S.s. Architect for Calcutta (Liverpool, August 31). A steamer will sail from Birkenhead on October 5 for Port Said, Port Sudan, Aden, Mombasa, etc.

Henderson Line.—S.s. Henzada for Port Said and Rangoon (Birkenhead, September 6).

Holt Line.—S.s. Polyphemus for Port Said, Port Swettenham, Singapore, etc. (Swansea, August 24); s.s. Yangtsze for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, August 31); s.s. Teucer for Port Said, Port Swettenham, Singapore, etc. (Swansea, August 31); s.s. Philoctetes for Port Said, Port Swettenham, Singapore, etc. (Glasgow, September 7); s.s. Demodocus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, September 7).

Johnston Line.—S.s. Wingate (to be renamed Vedamore) for Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, August 26); s.s. Willowmore for Galatz and Braila only (Liverpool, September 7).

Moss Line.—S.s. Siptah for Gibraltar, Malta, Syra, Piræus, Smyrna, Salonika, Constantinople, Bourgas, Varna and Constantza (Liverpool, September 9).

Papayanni Line.—S.s. City of Oxford for Melilla, Malta and Alexandria (Liverpool, August 26).

P. and O. Line.—S.s. Kaisar-I-Hind for Bombay (London, August 25); s.s. Caledonia for Bombay (London, September 1); s.s. Perim for Colombo, Madras and Calcutta (London, September 9); s.s. Delta for Bombay (London, September 9).

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on August 3 were as follows:—Agricultural Bank of Egypt, £5 3-32; Alexandria Water Company, Ltd., £8½; Anglo-American Nile Steam, £2 27-32; Associated Cotton Ginners, 29-32; Banque d'Orient, 49 fr.; Behera Ord., £E8; Brasseries d'Egypte, 73 fr.; Building Lands of Egypt, £1 3-16; Cassi di Sconto Priv., 96 fr.; Comptoir Fin et Com. d'Egypte, £1 3-16; Consolidated Lands, Pt. 7½; Credit Foncier Fondateur, 990 fr.; Credit Foncier Act, 699 fr.; Credit Foncier 1886 Oblig., 315 fr.; Eaux du Caire, Capital, 86 fr.; Eaux du Caire Jouissance, 113 fr.; Egypt and Levant, S.S. Ord., 31s. 3d.; Egyptian Delta Light Railways, £4 25-32; Filature National d'Egypt, £10½; Immeubles d'Egypte Soc. an des., £6½; Khedivial Mail S.S. Ord., 110s.; Khedivial Mail S.S. Company Pref., £3½; Kom Ombo Ste an de Wadi, £4 5-32; Kom Ombo Ste An Fondateur, £32½; Land Bank of Egypt, Parts de Fond., £45; Lots Turc., £47½; Menzaleh Canal Navigation, Pt. 251; Nungovich Hotels, £7 9-16; Ramleh Railways, £2¾; Urbaines et Rurales, £3¾; Union Fonciere Fond., £3½.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.
(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

India.

Goods Wagons.—Tenders are invited for the construction in India and delivery during the year ending March 31, 1924, of 3,000 goods wagons for broad and metre gauge railways of types to the standard designs of the Indian Railway Conference Association. Tenders should reach the Secretary, Railway Board, Simla, before October 17, 1922. Tender forms and specification can be had from the Railway Board, and drawings can be obtained from the Secretary, Standard Wagon Sub-Committee, c.o. Agent, E.B. Railway, Calcutta.

Rails and Fishplates.—The Great Indian Peninsula Railway Company invites tenders for the supply of steel rails and fishplates; Sheffield tools, etc.; hinges, handles, etc.; linoleum. August 29.

Wheels and Axles, Steel Sheets, Flannel, Gas and Water Tubes.—The High Commissioner for India invites tenders for the supply of wheels and axles for light riding trolleys, 5 ft. 6 in. gauge, 24 in. diameter on tread (200 pairs); steel sheets, corrugated, and ridge capping, galvanised (1,470 cwt.); flannel, silver grey, 30 in wide (250,000 yards); tubes, gas, black, and tubes water, galvanised, various diameters, and fittings (199,000 ft.). September 8. (D.O.T.)

Egypt.

Cotton Waste (Coloured).—The General Manager, Egyptian State Railways, Telegraphs and Telephones, Cairo Station, invites tenders for the supply of 100 metrical tons of coloured cotton waste. October 5.

Locomotives.—The General Manager, Egyptian State Railways, Cairo Station, invites tenders for the supply of locomotives. October 12.

Roofing Tiles.—The Superintendent of Stores, Egyptian State Railways, Telegraphs and Telephones, Bulâq, Cairo, invites tenders for the supply of "Marseilles" roofing tiles. September 14.

Tierol (for Denaturing Ethyl Alcohol).—The Egyptian Customs Administration invite tenders for the supply of 3,000 litres of Tierol required for denaturing ethyl alcohol. Tenders, which must be submitted in sealed envelopes addressed to the Director-General of Customs, with the object of the tender indicated thereon, together with a sample of Tierol proposed, will be accepted at the office of the Chief Inspector of Customs Administration, Alexandria, up to noon, October 2. (D.O.T.)

Sleepers.—The General Manager, Egyptian State Railways, Telegraphs and Telephones, Cairo Station, invites tenders for the supply of wooden sleepers. September 7.

Wood Naphtha.—The Chief Inspector, Direction General of Customs, Alexandria, invites tenders for the supply of 30,000 litres of wood naphtha for denaturing ethyl alcohol. October 25.

A FRENCH REPORT ON ASIA MINOR.

We have received from the London Moslem League a copy of a report made by M. A. Raymond Ainé, a French architect, on the devastation committed by the Greeks in Asia Minor. In this report are details, for the towns of Broussa and Jamid, with the estimated amount of damage, of the destruction of oriental architecture, mosques, shrines, and colleges. The London Moslem League expresses the hope that, "as the vandalism has been the direct result of the permission given by the Allies to the Greeks to land troops in Smyrna and to occupy Asia Minor," if the Hellenic Government do not make full reparation, the Allies will make good the damage. The report has been forwarded to Lord Curzon.

DEMAND FOR WEBBED BELTS IN ARABIA.

The American Consul at Aden, Mr. C. M. P. Cross, in a recent report, states that a strong demand for cheap webbed belts in the Red Sea district is developing, but is confined to the type with pockets. Belts are worn as an ornament and convenience, the most prized belts being made of cotton webbing about 2 ins. wide, furnished with two leather pockets large enough to contain small articles. Belts of Austrian manufacture are most in favour, being made of two-colour webbing with a nickel buckle. Japanese belts of similar style but of a dull green colour are worn by the poorer classes. German belts of inferior quality have also appeared recently on the market.

The traffic receipts of the Egyptian Delta Light Railways for the week ended July 20 amounted to £E8,154; total for year, £E86,743. For the corresponding period of last year receipts amounted to £E9,454; total for year, £E98,520.

Up to September 15 the Bulgarian Agricultural Bank will receive proposals for the construction of grain elevators at the Bulgarian ports on the Black Sea and the Danube, and the conclusion of a loan with bonds issued for that purpose.

LONDON PRODUCE REPORT.

Abnormal Demand for Oranges.

(*From Our Own Correspondent.*)

LONDON, Monday Evening.

Sugar.—Home refined has met with a good demand at firm rates. Tate's cubes are steady at 60s., as also mineral water sugar at 52s. 9d. London granulated and Lyle's granulated are unchanged at 52s. 3d. and 52s. 6d. respectively. Unsteadiness prevails in export descriptions. West Indian crystallised shows a gain of 9d. at 45s. 3d., and white Mauritius has risen to 48s. 10½d., an increase of 4½d. White Java has shed 10½d. at 21s. 1½d. Cane sugar quotations are: August 19s. and September 18s. 6d. White sugar quotations are: August 23s., September 22s. 1½d., October 21s. 10½d., November 21s. 7½d., December 21s. 9d., and October-December 21s. 9d.

Coffee.—Prices have risen. East Indian has gained 4s. at 112s., and Costa Rica is 4s. up at 110s. Nairobi at 100s. shows no change.

Desiccated Cocoanut.—Further heavy shipments have arrived, while there has been a decided improvement in the demand.

Rice.—A slight improvement has taken place during the week, a new arrival of Carolina rice being in special favour.

Green Fruit.—So great has been the demand for South African oranges during the week that twice the available quantity of this fruit could have been cleared, but owing to light arrivals this week the market has been unable to cope with the demand. The congestion in the lemon market has now been relieved by the disposal of out-of-condition fruit. Some new fruit has just arrived, but has only met with a small demand. The market shows no change with regard to Valencia onions.

Oilseeds.—An unsteady tone prevails. Indian linseed has shed 1½d. at 19s. 6d., and La Plata has dropped a similar amount at 18s. 7½d. Rapeseed has risen, with Toria 7½d. up at 18s. 6d. Cottonseed has been irregular. Egyptian black remains unaltered at 11s. Sakellaridis is 4½d. down at 9s. 10½d., while Indian is steady at 8s. 9d.

Oils.—Lower quotations have obtained generally. Linseed oil has shed 3s. at 40s. 6d. Rape oil is 1s. lower at 42s., while refined is 3s. down at 43s. Cotton oil has been steady. Egyptian crude and technical have been firm at 40s. 6d. and 41s. respectively. Refined has gained 1d. at 47s. 6d., and deodorised is steady at 53s.

Oilseeds.—A variable tone prevails. Cottonseed cake at 190s. ton is unchanged, as also coconut cake at 210s. ton. Cotton meal cake and linseed cake have both gained 10s. at 300s. and 280s. ton respectively.

ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud and Co., Smyrna, report as follows for the week ending August 5:—

The total estimated arrivals are 1,250 bags; the estimated sales are 1,000 bags; while the estimated stock unsold amounts to 250 bags.

Markets.—Arrivals of sultanas are still coming in slowly, the Turkish Bairam holidays having suspended all movement during the past four days. Gathering and drying commence this week in all districts, and regular supplies are expected to come forward from August 15 onwards. So far all supplies available till the sailing of the Rhea for Amsterdam have been bought at 75s. and 100s. f.o.b., according to quality. This steamer has loaded between Vourla and Smyrna about 190 tons sultanas, a good portion, however, being old fruit of the 1921 season. Details will be given in our next report, as manifests are not yet completed. Exchanges weak, sterling at 710/5, with declining tendency.

COMMERCIAL BANK OF GREECE, LTD.

(Limited Liability Registered in Athens.)

CAPITAL PAID UP - Drs. 20,000,000.

RESERVE FUNDS - Drs. 11,360,832.45.

Head Office: ATHENS.

Branches: **Piraeus, Argos, Pyrgos, Patras, Corfu, Cephalonia, Nauplia, Vostizza (Aegion), Calamata, Syra, Chio, Candia, Volo, Salonica, Larrissa, Triccala, Mitylene, Canea, CONSTANTINOPLE**

AGENTS IN ALL PARTS OF GREECE, THE LEVANT AND ABROAD.

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT.

The Bank undertakes the warehousing and sale of goods consigned.

ROUMANIAN GRAIN CROP ESTIMATES.

(*From Our Own Correspondent.*)

BUCHAREST, August 9.

Estimates of Grain Crop.

The Ministry of Agriculture gives the following estimates regarding the output of autumn sowings (the figures representing tons):—Wheat, about 2,000,000, rye 175,000, barley 119,000, rapeseed 2,600. The estimates for the spring sowings, which form the bulk of the sown area, such as maize, barley, oats, etc., will be published at a later date. As regards the maize plant, it is ascertained that the area sown covers over 4½ million hectares, and that the rains of last week have done this plant a great deal of good.

PERSIAN PRODUCE.

The following particulars are taken from a report received by the Imperial Ottoman Bank from Hamadan, dated June 28:—

The new barley crop is now being harvested. Wheat will be cut in a fortnight's time. Last year's crop is being offered in Hamadan bazaar at the following prices per *khalvor* of 400 kilos.:—Wheat, 320 krans; barley, 175 krans. There are, however, no important buyers.

The new harvest at Sultanabad, where the crops are of excellent quality, is offering at:—Wheat, 200 krans per *khalvor;* barley, 150 krans, delivery Hamadan in one month's time.

Gum Tragacanth.

Hamadan is the central and most important market for the sale in Northern Persia of gum tragacanth. The gum is despatched from Kermanshah, Sultanabad, Ispahan, Teheran, Malaya, and Burugird districts to Hamadan for disposal. Best quality gum is cultivated in the Malaya and Burugird districts (Luristan). The crop is now being harvested. Prices have fallen from 90 krans per batman of four kilos. a month ago to 70 krans. There are numerous buyers, all for American account. There are no buyers for London account, where it is supposed that heavy stocks are held. The Persian Government has recently imposed an additional 30 per cent. *ad valorem* tax on gum tragacanth.

Opium.

There is no market for opium owing to the complete cessation of demand from Europe. The standing crop is being left in the fields, and cultivators intend to discontinue further poppy cultivation. Opium is offering at 5,500 krans per case containing 19,600 lb. There are no buyers.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news, received from the Director-General of Commercial Intelligence, Calcutta, dated August 14:—

Season.—August 7 to 9: Activity of monsoon mainly confined to Gangetic Plain. Monsoon was weak in Bombay, and elsewhere there was a break which continued to August 13. There was some rain in Central Provinces on August 11.

Condition of Crops.—August 10: In the United Provinces, prospects of all crops, especially sugar cane and cotton, are promising, but in westerly districts in Central tracts a break in rain is necessary for cotton. In other provinces prospects are unchanged.

Markets.—August 10: Bombay cotton market steady. Fine M.G. Oomras, Rs. 444 September, Rs 404 December-January. August 10: Bombay imported piece-goods market unchanged and local goods quieter. August 13: Calcutta jute and gunny markets quiet and hardly any business passing. American demand improved towards close of week. At tea sale on August 8 selections in useful qualities were good, and price level was generally same as last week. All markets interested. Leaf grades commanded most attention. Medium Pekoes and Orange Pekoes further advanced by 6 pies. Best liquorings Brokens and tea with tips sold at increased price. Dusts steady. 152,443 packages sold to date at an average price of 10 annas 9 pies per lb. Rangoon rice market weak. Quotations on August 11: Special Straits quality rice, Rs. 427.8 August, Rs. 419 to Rs. 420 September, Rs. 417.8 two months, Rs 415 October. Small mills, Rs. 502.8 for immediate deliveries. Boat paddy, Rs. 203. Sheilac.—August 11: Market continues dull, with no business. T.N. Rs. 150.

Bank rate unchanged.

The production of the British Burmah Petroleum Company and the Rangoon Oil Company for July amounted to 71,412 barrels.

According to a Prague report, an important new oil well has been just brought into production in the Egbell region of Slovakia, and during its first flow of seven hours produced over 900 tons of oil. There was an enormous gas pressure, the oil being thrown considerably above the derrick top.

Czecho-Slovak manufacturers are importing pig iron from the United Kingdom, as it is cheaper than the domestic pig, in spite of costs of transport and Customs duties.

Digitized by Google

SUDAN PRODUCE.

The following extracts are taken from the C.E.B. report for June :—

Gum.

Kordofan Province.—14,510 kantars were sold in El Obeid market during June, as against 7,768 kantars during the same month last year, at an average price of £E1.165 per kantar. The price went as high as £E1.560 on June 28, 1922. The arrivals at El Obeid from Nahud were 8,403 kantars, as against 6,690 kantars last year. The amount sold at Nahud during the month was 8,174 kantars, as against 2,521 kantars, the average price being 910 m/ms. 804 kantars were sold at Um Ruaba at an average price of £E1.100 m/ms. the kantar, as against 723 kantars last year. At Rahad 94 kantars were sold at prices ranging from 950 m/ms. to 800 m/ms. the kantar, as against 97 kantars during June last year.

Kassala Province.—79 kantars of 100 rottles (45 kilos) of gum were exported from Gedaref and 25 kantars from Mefaza.

White Nile Province.—3.043 kantars of 100 rottles (45 kilos) of gum were exported from Tendelti, as compared with 260 kantars last year.

Dura.

Darfur Province.—Dura sold for 750 m/ms. per ardeb in El Fasher market during May.

Blue Nile Province.—Price remained stationary throughout the month at 428 m/ms. per ardeb of 300 rottles (135 kilos).

Kassala Province.—Average market prices of dura for the month were as follows :—Per ardeb of 300 rottles (135 kilos) ; Kassala, 960 m/ms. ; Gedaref, 650 m/ms. ; Mefaza, 240 m/ms.

Upper Nile Province.—The market price of dura at Malakal is rising slowly, and is now over P.T.80 per ardeb, but dura from the Northern Provinces is still cheaper.

Sesame.

Kassala Province.—218 ardebs of 300 rottles (135 kilos) were exported from Gedaref and 4 ardebs from Mefaza. Average price per ardeb : Gedaref, 1,700 m/ms. ; Mefaza, 1,400 m/ms.

White Nile Province.—251 ardebs of 300 rottles (135 kilos) were exported from Tendelti in June, as against 854 ardebs for the same period last year.

Livestock, Hides and Skins.

Berber Province.—1,532 sheep and goats and 169 cattle were sold in Damer market ; of these 34 and 53 respectively were exported. Average prices : Sheep £E1.005, and cattle £E4.585.

Darfur Province.—No cattle were imported from Wadai during May.

Red Sea Province.—Six sheep, 2,252 skins, and 28 hides passed through the quarantine station during the month.

Kassala Province.—Thirty-one head of cattle were exported from Kassala and 41 from Gedaref.

Rainfall and Cultivation.

Bahr-el-Ghazal Province.—8.517 ins., which is double the fall last year, and over an inch more than the average for May. Thunderstorms were particularly severe. Sowing is generally in progress, and in many districts the crops are already up and doing well.

Upper Nile Province.—The total rainfall at Malakal was 164 mm. on the 18th ; there was an exceptionally heavy fall of 92 mm. in four hours. Owing to the great improvements in drainage works the town was not flooded. The rainfall at Renk totalled 88 mm.

Kassala Province.—A good deal of rain fell in the latter half of the month, and the people are busy round Kassala clearing and burning cotton-stalks and preparing land for cotton and dura. Water was lying on the Atbara Road near Goz Rageb on the 11th. The Gash is expected early in July. The Atbara reached Khashm El Girba on the 21st, and by the end of the month had risen from 10.50 metres to 12. Rainfall to end June was respectively 1,322, 106, 112. and 10.4 millimetres at Mefaza, Gallabat, Gedaref, and Kassala.

Roads and Communications.

Bahr-el-Ghazal Province.—The roads and bridges in Rumbek and eastern district have been greatly improved, and all are good for motor transport. The new roads into the Gok country and from Lau to Yirrol have proved of great utility in opening up these heretofore little-known districts. The causeway to the new landing on Khor Toor is progressing, and it is hoped will be completed about June 20.

Halfa Province.—The river reached its lowest on June 8, when the reach was 0.22, which was 1.10 lower than the normal average for the last fourteen years. Despite this, river steamers suffered very little delay. By the end of the month the river had risen to 1.08.

Red Sea Province.—Forty merchant ships of a net registered tonnage of 101,287 visited Port Sudan during the month.

CURRENT PRICES.

General Produce.—Bacon (Continental), 141s. cwt. ; (Canadian), 132s. cwt. ; (American), 119s. cwt. ; butter (Danish), 206s. cwt. ; (Australian), 186s. cwt. ; (New Zealand), 195s. cwt. ; cheese (Canadian), 87s. cwt. ; (New Zealand), 83s. 6d. cwt. ; lard, 67s 9d. cwt. ; eggs (Danish), 14s. 9d. per 120 ; (Styrian), 11s. per 120 ; chillies, 130s. cwt. ; cloves (Zanzibar), 1s. 2½d. lb. ; cocoa (Ceylon good to fine), 55s. cwt. ; coffee (Costa Rica), 117s. 6d. cwt. ; (East Indian), 112s. 6d. cwt. ; (Central American), 97s. 6d. cwt. ; (Jamaica), 72s. 6d. cwt. ; (Mocha Longberry), 103s. 6d. cwt. ; (Santos superior), 69s. cwt. ; (Nairobi), 101s. cwt. ; ginger (washed Cochin), 52s. 6d. cwt. ; nutmegs (110's to 80's), 11½d. lb. ; pepper (Singapore black), 4d. lb. ; (Muntok white), 7½d. lb. ; pimento, 2.1-8d. lb. ; raisins (Cape), 60s. cwt. ; currants (Vostizza), 58s. 6d. cwt. ; currants (Amalias), 53s. cwt. ; sultanas (Smyrna), 100s. cwt. ; sugar (Tate's cubes), 60s. cwt. ; (Lyle's granulated), 52s. 7½d. cwt. ; (Mauritius crystals), 49s. 3d. cwt. ; (West Indian crystallised), 46s. cwt. ; (centrifugal), 19s. 4½d. cwt. ; tapioca (fair Singapore), 2d. lb. ; rice (Rangoon No. 2), 15s. 4½d. cwt. ; (bran Rangoon), £6 17s. 6d. ton, cinnamon (firsts), 10½d. lb. ; mace (fair Singapore), 2s. 1½d. lb. ; tea (Indian, common to good common), 11d. lb. ; (medium to good), 1s. 3½d. lb. ; (fine to finest), 2s. 7½d. lb. ; Ceylon (common to good common), 11½d. lb. ; (medium to good), 1s. 3½d. lb. ; (fine to finest), 2s. 7½d. lb. ; Java (common to good common), 8½d. lb. ; wheat (English white), 53s. 3d. qr. ; wheat (Australian), 55s. 6d. qr. ; oats (English), 38s. qr. ; oats (La Plata, ex-ship), 26s. 9d. qr. ; maize (La Plata), 40s. 3d. qr. ; flour, 41s. 6d. sack.

Chemicals.—Acids : Boric, 61s. cwt. ; oxalic, 8¼d. lb. ; citric, 2s. 3½d. lb. ; tartaric, 1s. 4½d. lb. ; ammonia (sulphate), £15 11s. 9d. ton ; arsenic (white powdered), £42 ton ; benzole (standard), 2s. 5½d. gallon ; bleaching powder (35 per cent.), £12 10s. ton ; borax crystals, 29s. 6d. cwt. ; cream of tartar, 111s. 6d. cwt. Potassium : Bichromate, 6¼d. lb. ; chlorate, 3d. lb ; caustic, £31 15s. ton ; nitrate, £37 10s. ton ; permanganate, 9¾d. lb. ; prussiate yellow, 1s. 3½d. lb. ; sulphate (90 per cent.), £14 15s. ton. Sodium : Crystals, 115s. ton ; bi-carbonate, £10 15s. ton ; bichromate, 5½d. lb. ; alkali (58 per cent.), £8 6s. 3d. ton ; chlorate, 3½d. lb. ; caustic (70 per cent.), £20 10s. ton ; hyposulphite, £16 ton ; prussiate, 9¼d. lb. ; nitrate, £13 7s. 6d. ton ; glycerine (crude, 80 per cent), £60 ton ; (industrial, 1.260 per cent.), £87 10s. ton ; lemon oil, 2s. 11½d. lb. ; quinine, 2s. 2d. oz. ; red lead, £39 5s. ton ; white lead, £42 ton ; white ground lead, £49 15s. ton ; sulphate of copper, £26 8s. ton ; sulphate of iron, 60s. ton.

Metals.—Aluminium, £100 ton ; antimony (English Regulus), £28 ton ; bismuth, 9s. lb. ; copper (standard), £64 3s. 9d. ton ; copper (electro), £71 ton ; gold bars, 92s. 5d. oz. ; iron (No. 3 Cleveland), 83s. ton ; hematite (mixed number), 92s. 3d. ton ; galvanised sheets (25 G), £16 ton ; lead (soft foreign), £24 16s. 3d. ton ; manganese Poti, 1s. 1½d. unit ; molybdenite, 32s. 6d. unit ; nickel, £155 ton ; platinum, 375s. oz. ; graphite (80-90), £13 10s. ton ; quicksilver, £11 8s. 9d. bottle ; spelter (G.O.B.), £31 11s. 3d. ton ; tin (standard), £158 12s. 6d. ton ; wolfram, 14s. unit ; zinc sheets, £37 15s. ton ; tin plates (20 by 14), 19s. 1½d. box ; silver bars, 35d. oz.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 9.3-8d. lb. ; 80 to 89 lb., 9.3-8d. lb. ; 70 to 79 lb., 8.7-8d. lb. ; 60 to 69 lb., 8d. lb. ; 59 lb. and under, 6⅞d. lb. ; (second), 90 lb. and up, 8d. lb. ; 80 to 89 lb., 8d. lb. ; 70 to 79 lb., 7½d. lb. ; 60 to 69 lb., 6.5-8d. lb. ; 59 lb. and under, 5d. lb. ; cows (first), 60 lb. and up, 7¼d. lb. ; 59 lb. and under, 6⅜d. lb. ; (second), 60 lb. and up, 5½d. lb. ; 59 lb. and under, 5d. lb. ; bulls (first), 5d. lb. ; (second), 3½d. lb. ; kips (first), 6d. lb. ; (second), 5d. lb. ; (third), 3⅜d. lb. Calcutta Market. Prices in rupees per 20 lb. :—Arsenic hides (cows) : Agras, 7 to 12 ; Durbhangas, 6 to 7.8 ; Patnas, 5 to 6. Salted cows : 6 to 8. Arsenic hides (buffalo) : 3.4 to 6.8. Skins : Calf, 8 to 10 ; goat, 190 to 260 per 100 pieces.

Miscellaneous.—Cotton (American), 12.60d. lb. ; Egyptian (Sakel), 16.60d. lb. ; jute (first grade c.i.f.), £31 12s. 6d. ton ; jute (lightnings), £28 12s. 6d. ton. Oilseeds : Linseed (La Plata), £19 10s. ton ; palm kernels, £17 13s. 9d. ton ; castor seed (Bombay), £19 11s. 3d. ton ; sesame seed (China), £25 15s. ton ; soya beans, £12 17s. 6d. ton. Oils : Linseed, £43 12s. 6d. ton ; olive (Spanish), £75 10s. ton ; rape (crude), £43 10s. ton ; soya, £39 15s. ton ; petroleum, 1s. 4½d. gallon ; petrol, 2s. 1d. gallon ; fuel oil (ex-tank), 65s. ton ; coconut (Ceylon), £39 2s. 6d. ton ; cotton (crude), £40 15s. ton ; ground nut, £46 5s. ton. Rubber : Plantation (No. 1 crepe), 7½d. lb. ; smoked sheet, 7½d. lb. ; fine hard Para, 10¼d. lb.

YUGOSLAVIA'S FRUIT HARVEST OUTLOOK.

The Commercial Secretary to H.M. Legation, Belgrade, states that, owing to the favourable climatic conditions which have prevailed in Serbia, Bosnia, and Slavonia during the past year the plum orchards are in a very healthy condition, very little disease or caterpillar having been seen. It is estimated that the output for Serbia and Bosnia will amount respectively to 4,500 and 2,500 wagons of dried plums. The Slavonian crop will principally be used for spirit.

Plum marmalade (pekmes) will this year be largely made in Serbia, but the Bosnian output will be small. The total production is estimated at from 600 to 800 wagons. Prospects for the 1922 apple and pear crops are not favourable, and as the old crop is almost entirely exhausted it is anticipated that prices for dried apples and pears will be high. The Bosnian nut crop appears to be good.

SPECIAL MARKET REPORTS.

The following extracts are taken from the monthly circular of the Imperial Ottoman Bank for the period July-August:—

Mitylene.

Industry.—The industrial development is somewhat slow, owing to the fact that capital, although important, is not invested in industries. There are at present in the island four steam tanneries, two engineering workshops, one electric power station, one spinning and weaving mill, four flour mills, four cigarette factories, eight olive oil factories, etc. There is an abundance of oil-cakes which could be used advantageously as gasolene fuel.

Agriculture.—The principal produce is the olive, outside various fruit and fresh vegetables. The olives grown in Mitylene can only be used for oil purposes, the crop is consequently estimated by the quantity of oil extracted from the olives. As a general rule a good crop is followed by a poor one. Thus in 1920 the crop was 34,000,000 kilogs; in 1921 it fell to 3,750,000 kilogs. Climatic conditions were very favourable in 1922, and it is hoped that the crop will practically equal that of 1920.

Exports—Consist mainly of olive oil and its derivatives. This trade is paralysed for the present by the necessity of obtaining special permits granted by auction by the Greek Government, and available for three months. The difficulty is to make the delivery of permits coincide with the demand from abroad. The exchange regulations of the Bank Consortium add to the obstacles with which foreign trade has to cope.

Imports.—The island and the port of Mitylene were at one time the centre of trade for the Anatolian shores which face it. The Greco-Turk conflict has almost annihilated all transactions. Mitylene has become a tributary of Piræus and Athens for part of its imports, as importers find it easier to obtain the necessary exchange in these towns.

Palestine.

Cereal Situation.—It is gratifying to note that the months of March and April have shown a considerable increase in the export of cereals from this country to Syria. The increase of exports appears to be due to several causes, the chief among which is the termination of contracts made last year by Syrian merchants with Roumanian exporters. Cereals can no longer be exported freely from Roumania, and the contracts have, therefore, been terminated. Prices in Palestine are now more reasonable, in view of the general rise in the price of cereals throughout the world, and Syrian importers are, therefore, turning their attention to this country.

Import of Egyptian Cigarettes.—The Egyptian Customs' return for the first quarter of 1922 show a very large increase in the export of cigarettes to Palestine. In the first quarter of 1921 this country took £E8,146 worth of cigarettes; this year the value was £E69,018, an extraordinary tribute to the popularity of Egyptian cigarettes in Palestine.

Considerable quantities of wheat and barley have recently been imported to Palestine from Transjordania.

Mesopotamia.

The market for piece-goods remains quiet, and very little business has been done during the month of May. There have been important arrivals of loaf sugar from Holland and France, and 80 per cent. of the total arrivals have been re-exported to Persia, where there is at present a great demand for this commodity. Imports of crystallised sugar from India have decreased lately owing to the comparatively low prices for loaf sugar quoted by French and Dutch firms. This year exports of wood, gall-nuts, skins, and sheep-casings have been very active, and were made on a much larger scale than in 1920-21.

Cotton and Cotton Goods.

THE EGYPTIAN MARKET.

The Commercial Company of Egypt, in their report for the week ended August 11, state:—

The market has, during the past week, been subject to heavy fluctuations; the tone has been erratic. The early part of the week was marked by a continuation of that weakness which has recently prevailed in our market, and on Wednesday prices declined, under bear pressure, to the lowest points touched for many months—31.05 dollars for November Sakellaridis and 23.15 dollars for October Ashmouni. The unpromising outlook as to the result of the London Conference, and the continued absence of trade support, left the market open to bear manipulation, and a considerable short interest has been created from 35.00 dollars downwards. Some trade inquiry at these low levels and some purchases on American account quickly stampeded the weakest of the shorts, and as a result of covering we have to-day seen a recovery which has brought prices to about the level ruling a week ago—even higher in the case of Ashmouni.

Spot.—Total sales this week amount to about 8,000 bales, of which we estimate 5,200 bales Sakellaridis, 2,600 bales uppers, and 200 bales brown

Sakellaridis.—The better grades have been more sought after during the week, and quite a good business has been done in fully good, fair to good and good at about last week's prices. There continues to be good demand for the low and medium grades, but this cotton is difficult to find.

Uppers.—There has been a very considerable increase in the demand for this variety, with a consequent stiffening in the basis. The grades dealt in have been fully good fair and above.

Brown.—A small business has been done in fully good fair and fully good fair to good. The basis remains unchanged.

Crop.—Progress, as indicated by reports from all districts, continues to be very satisfactory, and few complaints are heard. Bolls are forming and opening well, and the damage by pink boll worm is small up to the present—only 8 per cent. to 10 per cent. bolls attacked. Temperature is slightly above normal.

MANCHESTER COTTON REVIEW.

Egypt and Levant Business Dull.

The cotton trade review of the Imperial Ottoman Bank for the week ended August 19 states:—

General.—The past week has again been one of extreme dullness, although possibly the undertone might be described as a little better. The Board of Trade returns for last month, figures from which we quote below, are indicative of the better state of the market during May and early June rather than of the actual month in which the goods were shipped.

Yarn.—There is a slightly better feeling in this section due to increased inquiry, following the stronger tone of cotton, although the actual turnover has not been large. The view is persistently held that considerable improvement will be seen as soon as it is felt that prices of the raw material are reasonably stable. Exports of yarn during the month of July were 19,852,000 lbs., against 15,744,000 lbs. in June, and 8,971,000 lbs. in July last year. The increase is spread over practically all consuming markets.

Cloth.—The most important feature has been the better inquiry from India for certain classes of goods, and at the close of the week some moderate business has been definitely booked. Small lots have been sold for China, but these are said to be in no sense reflective of the volume of inquiry. Other Far Eastern markets remain dull, and business for Egypt and the Levant continues under the cloud of political complications. Both in the home and colonial trade there is little worthy of mention. Shipments of cloth last month amounted to 443,610,000 sq. yds., against 311,907,000 sq. yds. in June, and 177,530,000 sq. yds. in July last year.

Raw Cotton.—The price of raw cotton has advanced substantially since our last report. On Monday and Tuesday there were slight falls, but towards the close of the week less favourable weather news from the United States caused a sharp upward turn, both in "spot" and "futures." As we have before pointed out, such rapid advances, whilst no doubt beneficial to holders of stocks, have, for the time being, at any rate, a disturbing effect on Manchester trade. Closing prices are as follows:—American fully middling, 13.35; Egyptian fully good fair, 18.00.

The Postmaster-General states that the air mail for Baghdad dispatched from London on July 27 reached Baghdad on August 8. The next air mail to Baghdad will leave London on August 24.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ending August 16:—

The somewhat wild fluctuations in the futures markets of the world, coupled with the uncertainty of the political situation, have so far discounted any tendency amongst the trade to come in and take advantage of the present low level of prices. Only a very limited inquiry has been met with, and those spinners who have been forced to buy have contented themselves with picking up at bargain prices odd lots that have been pressed for sale. Chief interest continues to centre in good fair to fully good fair Sakellaridis, whilst a half-hearted inquiry for uppers and low white cotton has taken second place. The demand for Tokar Sakellaridis and Sudan cotton shows a distinct falling off, and other qualities have been neglected. It is most unfortunate that clouds on the political horizon are so heavy at the moment, for by all accounts there is a growing cloth inquiry from India which, taking into account the attractive level in prices ruling here, might easily materialise into good trade buying were it not for the haze of uncertainty surrounding the immediate outlook. China remains quiescent, and there seems but little likelihood of any assistance coming from that quarter just yet. C.i.f. business is practically at a standstill, and it is remarkable under the circumstances how firm quotations from Egypt remain. Optimism in the land of the Pharaohs is not dead yet! Receipts still keep dribbling into Alexandria, and stocks there and in Liverpool still remain at an abnormally high figure for this time of the year. Total sales 1,800 bales (including 400 bales Sudan). Quotations of Sakellaridis are raised 50 points, and those of upper and brown are 75 points dearer on the week. Fully good fair Sakellaridis to-day 17¼d.

EGYPTIAN PHARMACEUTICAL CHEMISTS' ASSOCIATION.

H.M. Commercial Agent for Egypt states that an Association of Egyptian Pharmaceutical Chemists has just been founded with the object of promoting the interests of pharmaceutical chemists generally; affording financial assistance to any of its members temporarily in need of same; to assist members in defending themselves legally in the event of their being sued in the Courts on a plea which affects the whole profession, and, generally, to develop a spirit of solidarity among the members of the profession. According to the Egyptian Directory there are about 180 pharmacies in Cairo, and nearly 100 in Alexandria.

EGYPTIAN CROPS.

Rice Crop Poor.

The following particulars of the crop conditions in Egypt are given in the *Bulletin* of the Egyptian Ministry of Agriculture for the month of July:—

Cotton.—Weather was favourable. In most provinces shortage of water supply was felt, more especially at tails of canals; flowering and boll-formation, however, have been normal. In Lower Egypt cotton worm (*Prodenia*) attack continued in increasing severity until about the middle of the month, and then rapidly diminished. In Upper Egypt the attack was slight. Control measures were successful, and no appreciable damage has been done by this pest, except in some small areas. Boll worm (*Gelechia*) has appeared in various parts of the cotton zone. The extent of attack is about normal. Crop prospects continue favourable.

Millet (Sêfi).—Cobs have formed in the early-sown crop. The condition of the crop is good.

Bersim.—Harvesting has been completed. Owing to the cotton worm attack, the seed yield is below the average in Lower Egypt.

Earth-nuts.—The condition of the crop is satisfactory, and nuts are forming. In some parts in Sharqiya Province the crop suffered from the deficiency of water.

Rice (Sêfi).—The crop suffered considerably from the scarcity of water, especially in unauthorised zones in Sharqiya and Daqahliya Provinces. The condition of the crop is below normal.

Sugar-cane.—Weather was favourable and water supply sufficient. The crop is growing well, and is free from pests.

Maize.—Preparation of land for sowing is in progress. Shortage of water has caused delay in sowing in most places.

COMPANY NOTES AND REPORTS.

Furness, Withy.

The report of Messrs. Furness, Withy and Co., Ltd., for the year ended April 30, states that the profits, after providing for taxation, and including the balance brought forward, amount to £858,554 19s. 4d. The year has been one of serious depression in the shipping industry, and consequently only a small portion of the profits are derived from the earnings of the steamers. They mainly arise from other branches of the company's business, and from dividends on investments. The usual half-yearly dividends on the preference shares were paid on November 1, 1921, and May 1, 1922, and on the same dates dividends were paid on the ordinary shares, at the rate of 5 per cent., free of income tax. The directors recommend the payment of a bonus of 5 per cent., free of income tax, on the ordinary shares for the past twelve months, which will represent a total dividend for the year of 10 per cent., free of income tax.

The appropriation of the profit of £858,554 19s. 4d. will therefore be :—Dividends on preference shares at 5 per cent. per annum, less income tax, for six months, paid November 1, 1921, £26,250; for six months, paid May 1, 1922, £26,250—£52,500; dividends on ordinary shares, at 5 per cent. per annum, free of income tax, for six months, paid November 1, 1921, £100,000, for six months, paid May 1, 1922, £100,000—£200,000; bonus of 5 per cent., free of income tax on ordinary shares, payable September 16, £200,000; transferred to general reserve account, £200,000; balance carried forward to next year's account, £206,054 19s. 4d.—£858,554 19s. 4d.

The above-mentioned bonus will be paid to all shareholders registered on the books of the company on August 3, and the warrants will be posted on September 16.

In respect to the current financial year, the warrants for the half-yearly dividends on the ordinary and preference shares will be posted on October 31. Meeting, Furness House, Leadenhall Street, August 31, twelve noon.

Anchor Line.

The directors of the Anchor Line (Henderson Brothers), Ltd., in their report for the year to April 30 last, state that, having regard to the conditions which have ruled, the various services of the company have been well maintained throughout the year. The freight business during the year has been carried on at a very low level of rates, especially in the Indian trade. The directors regret that there are no apparent signs of improvement in the immediate future. The passenger carryings of the company, both to the United States and the East, have been satisfactory, despite the continued operation of the U.S. Act limiting immigration.

Delivery of the new steamer Tuscania from the Fairfield Shipbuilding and Engineering Company, Ltd., is expected in September, 1922, and of the California from Messrs. Alexander Stephen and Sons, Ltd., in June, 1923. Owing to the continued high cost of construction, the directors have deemed it prudent to suspend all work meantime on the other vessels which have been contracted for. The Columbia has been converted from coal to oil burning, and the change has added greatly to the efficiency and popularity of the vessel.

The profits for the year, after providing for depreciation and other contingencies, amounted to £151,738, and £109,132 was brought in, making £260,870. The directors place to reserve £100,000, and after paying dividend on preference shares for year, less tax, recommend a dividend on ordinary shares at the rate of 5 per cent. free of tax, and carry forward £135,858. Meeting, 14, St. Vincent Place, Glasgow, August 29, 11 a.m.

Shahdara Light Railway.

The earnings of the Shahdara (Delhi)-Saharanpur Light Railway Company for the half-year ended March 31 totalled Rs. 4,25,100. The working expenses (excluding Rs. 50,000 charged by credit to renewal account for sleepers) were Rs. 2,31,407. The net revenue, after debiting Rs. 50,000 transferred to renewal of sleepers account, was Rs. 1,43,693, against Rs. 1,47,842 for the corresponding previous half-year. The interest on the sterling debentures, amounting to Rs. 67,632, and London Agency charges, Rs. 2,254, have been paid. The United Provinces Government moiety of surplus profits amounts to Rs. 26,846, managing agents' commission Rs. 19,229, and income-tax and super-tax provision Rs. 2,649, leaving Rs. 2,85,671. The directors recommended a dividend (free of tax) of 7 per cent. per annum, carrying forward Rs. 2,38,171.

Oriental Carpet.

The report of the Oriental Carpet Manufacturers for 1921 states that the year's trading has been influenced by exchange depreciation, Customs tariffs, and restrictions in Italy, France, and Central Europe, the drop in sales in Great Britain, and continuance of hostilities in Turkey. Further stocks have greatly depreciated in value. Although trading profit is £52,578, profit and loss account still contains a debit balance of £12,564, after allowing for taxation. The company's interests in Austria have been liquidated, loss being covered by redemption fund. Its claim against Soviet and ex-enemy Governments are £137,824, which figure in assets as 1s.

Agricultural Bank of Egypt.

The following was the position of the bank's encashments on June 30 :—Existing Loans : Short Term Loans £E8,039, Category "B" £E3,344,224, total £E3,352,263; Matured Loan Instalments : due £E8,846, falling due £E575,425, total £E584,271. Perceptions : Outstanding on January 31, £E223,938, balance £E159,299, encashed £E64,689; Matured Loan Instalments : Encashed, £E4,749; total encashments of instalments due, £E69,438.

NOTES OF THE WEEK.

Yugoslavia and Czecho-Slovakia.

Representatives of Yugoslavia and of Czecho-Slovakia met last week at Marienbad to discuss relations between the two countries. The alliance concluded between them in 1920, and directed chiefly to mutual assistance in case of any aggressive action on the part of Hungary, has proved so satisfactory that it was only natural for both parties to it to be quite prepared for its renewal and for a widening of its terms on its lapsing—it was originally for a period of two years only. At the time of writing no definite announcement on the subject has been made, but it is generally understood that a new agreement has been entered into, for a term of ten or fifteen years, and that it aims chiefly at upholding the Treaties of Trianon and St. Germain as they stand, and, secondly, at improving still further economic relations between the countries concerned.

Conference at Prague.

The Marienbad Conference was followed, on Sunday, by one at Prague, which was attended by representatives of Roumania Yugoslavia, Czecho-Slovakia, and Poland. Probably the first thought of Prague, as of Marienbad, will have been the thwarting of any attempt to upset either of the two Treaties referred to; but in view of the economic situation it is safe to conclude that financial questions affecting the four countries represented will have received much attention; while the representation of the Little Entente at the meeting of the Council of the League of Nations will also have been discussed. It is perhaps a little difficult to understand the nervousness which some of the States participating in the Conference profess to feel regarding the likelihood of attacks upon them; but if the Conference puts their minds at rest on this subject, and does not result in their entering upon further extravagant schemes of armament, it will serve an excellent purpose. If it does anything at all to improve the economic situation in Central and South-Eastern Europe it will indeed deserve the thanks of the world.

A Kemalist Success.

The Turkish Nationalists last week attacked the Greeks in the Meander sector, and claim to have cut railway communications with Smyrna by destroying the line for some distance. They claim also to have inflicted heavy casualties on the Greeks; but the latter declare that the engagement was of no importance, and that they had only a very weak force, opposed to one of over two thousand men supported by artillery. Subsequent actions on other sectors of the line suggest that a Turkish offensive is being attempted. If this is so, Angora must be under the impression that a spectacular advantage on the eve of the Venice Conference would more than compensate for the risk of a possible failure. Most people will have imagined that the Kemalists were better off as they were.

Iraq Cabinet Resignations.

As long ago as the end of June it was commonly reported in Iraq that agreement on the subject of the Anglo-Iraq Treaty had been reached between the High Commissioner and the Iraq Cabinet. Indeed, on June 27 the Baghdad correspondent of the *Times of Mesopotamia* sent his journal a message to that effect, which was published in the "stop press news." Unfortunately, all these reports are now known to have been too optimistic. There may have been agreement regarding the details of the Treaty; but whether there shall actually be a Treaty at all is still a warmly debated point. At least, that appears to be the only rational explanation of the delay, and of recent events in Baghdad. Some fortnight ago six of King Faisal's Ministry tendered their resignations, and on August 22 the Nakeeb of Baghdad, the Prime Minister and the most generally respected and trusted member of the Government, also resigned. The situation was further complicated by the illness of King Faisal, who last Friday had to undergo an operation for appendicitis.

Extremist Agitation.

According to the latest telegrams, all the Ministers continue to carry on their duties, and it is improbable that any attempt to form a fresh Cabinet, or to reconstitute the old one, will be made during the first half of Moharram—which is always

Digitized by Google

a ticklish period in Iraq. Thereafter it is to be hoped the trouble will be grappled with resolutely. Opinion in Iraq is divided on the question of the Mandate, and, according to one report, several of the Ministers who have just resigned, and many of the tribal sheikhs, strongly support its retention; while the extremists are working and scheming for its abrogation. What may be described as "outside" Arab opinion also wishes to see an end of the Mandate, if we are to trust the voice of the recent Moslem Congress at Mecca. Possibly those Iraqians who profess to be anxious to see the British depart, bag and baggage, from the country are not aware what a large body of public opinion in this country would also welcome that move; and certainly they cannot have worked out the consequences for Iraq that would follow on such a withdrawal. The chances that Great Britain will gratify the wishes of these visionaries are extremely small, and it would have a stabilising effect if that point were made perfectly clear to all Iraq.

A Palace "Incident."

The Iraq extremists have given further proof of their political incapacity by offering a personal affront to the best friend, even from their own point of view, that the country has; for whatever measure of independence Iraq acquires will be largely due to the advocacy of Sir Percy Cox. But when the High Commissioner went to the Palace to offer congratulations to King Faisal on the anniversary of his accession he found not only the approach to the palace, but also the staircase leading to the reception rooms, blocked by a crowd applauding speeches delivered against the Mandate. It would, perhaps, have been well if Sir Percy Cox, on finding that adequate staff arrangements had not been made for his visit, had withdrawn without attempting to see the King; but he kept his appointment, and subsequently addressed a letter of strong protest to the King's secretary, demanding an apology and the immediate dismissal of the King's Chamberlain. King Faisal, as was to be expected, expressed the fullest regret for the incident as soon as it was brought to his notice, and no one acquainted with the King and knowing the cordial relations existing between him and Sir Percy Cox would imagine that he would have wittingly allowed the affront to be offered. The episode suggests that the extremist movement is in the hands of the riff-raff of Baghdad, as it is difficult to believe that any group of Arab effendis would so far ignore the claims of etiquette as to turn any man's house—to say nothing of the King's residence—on the occasion of a ceremonial visit into a political bear-garden.

Minorities in Egypt.

By fifteen votes to seven the Egyptian Constitution Commission last Friday rejected the proposal to accord the minorities in the country special representation in the new Parliament. The decision does not come as a surprise, for it was known that the majority of the members of the Commission were strongly opposed to the idea of minority representation; but it was thought possible that the representations made recently by leading Copts and other people of influence might affect the voting more than has proved to be the case. Needless to say, the decision of the Commission is not the last word on the subject. The Government will have to consider the point; and, finally, it is necessary to remember that the whole question of the representation of minorities was one of the points reserved for future discussion between Great Britain and Egypt.

Egyptian Outrages: Arrests.

The recently created Political Crime Investigation Department has shown considerable activity in its attempts to bring the authors of the recent outrages in Egypt to justice. It is reported to have high hopes not only of conducting the case of Colonel Piggott to a successful issue, but also of capturing those responsible for the attack on Mr. Brown and the murder of his syce; and if it does that, it believes that it will be hot on the track of the authors of some of the other outrages. It actually arrested in Alexandria a chauffeur who was suspected of being one of Colonel Piggott's assailants, and though this man is expected to prove an alibi, several other arrests have since been made. Over a dozen Egyptians have been taken into custody in connection with the attack on Bedr ed-Din Bey, of the Public Security, and four more are expected to be charged with taking part in the attack on Mr. Brown and his family a fortnight ago. This is, in any case, a welcome change from the do-nothing policy formerly pursued, which must have lent to criminals a feeling of security which they will now no longer enjoy.

The Political Situation in India.

The news received from India during the past week does very little to clear up the political situation, and ordinary readers may fairly be said to have some excuse for complaint when one side of the country says the non-co-operation movement is dead, or worse, while the other reports it to be very much alive. We take the truth to be that the struggle inside the movement, which has been obvious for some time, is at present tending towards a cleavage on geographical lines, though there are various cross-currents which may prevent this result, and correspondents whose vision is limited by the walls of the compound naturally report only so much as they can see. It is clear that there is a strong feeling on the Bombay side in favour of a change of tactics, but we can find very little evidence of the change of heart which is called for in the interests of India. It is equally clear that in Bengal and some other provinces the old tactics still command a good deal of support, but it would be rash to attempt a confident estimate of the outcome of the conflict. The leaders will certainly strive to keep the movement together, and they may be successful in arranging a compromise for a time, but if no fresh inspiration is granted, it is, perhaps, equally probable that various provinces will take their own lines.

Fissiparous Tendencies.

In this respect the position of the revolutionary movement presents some analogies with the state of opinion in the country as a whole. India is not yet a psychological unit. During the last century or so the unifying tendencies have predominated, and we are still justified in looking for the day when the country shall speak with one voice; but the constitution has breathed new life into provincial aspirations, and there are now strong centrifugal forces at work. Putting aside Burma, which is not really Indian, and is likely to cut the painter at no distant date, there are strains of provincial opinion which on a long view must be taken seriously into account. Finance is, of course, the great danger to political aggregations, and some of the provinces are already very restive in regard to their financial position. Madras, in particular, is nearly furious over the burden of the annual contribution. Sind is threatening to secede from Bombay unless capital is promptly provided for her ambitious irrigation schemes. In the Central Provinces there is a definite protest against the future employment of officers of various Imperial services. Such matters as these count for comparatively little at the moment, but they show how the wind is setting,

Digitized by Google

and they may serve as warnings against complacent assumptions that Delhi is destined to be the capital of a united and homogeneous country.

The Imperial Services.

The protest from the Central Provinces, which we have mentioned, is of interest also as an illustration of the view we recently put forward that it is time to examine the whole question of providing officers for service in the various provinces. The occasion was the meeting of an "Axe" Committee appointed by Sir Frank Sly. The Inspector-General of Police said he wanted no more Imperial officers till the position became clearer; the Director of Public Instruction urged provincial control of recruitment of educational officers; and two officers of the Indian Medical Service insisted that no more of that distinguished band should be sent to Nagpur. No suggestion was made that economies would result from these proposals, and of course there is no doubt that if the provinces get bidding against each other they will have to offer more nearly the market value than is now paid; the ideas put forward were thus not likely to interest the members of the "Axe" Committee, who were on cheeseparing intent, and, having regard to the reputation of the Nagpur administration for discipline and homogeneity, it is reasonable to infer that in one province at least the Government is convinced that the whole question of recruiting should be ventilated at once.

THE WEEK AT HOME.

LONDON, Monday Evening.

Michael Collins.

Deep clouds have again rolled over Ireland. On Tuesday morning last a small party under General Michael Collins was attacked by Republicans, and after a heavy fight, in which several were killed, the head of the Irish Free State was shot. He died of his wounds a few minutes later, his last words being "Forgive them."

Thus, within a week, Ireland loses both heads of the Free State—Arthur Griffith and Michael Collins; the one killed by overwork, the other slain in action. (The first reports were that Collins was assassinated, but later accounts make it clear that he was killed in open fighting.) Probably Griffith was the greater man, but Collins had become almost a hero of legend and romance by his innumerable hairsbreadth escapes during the last five years, and his tragic end appeals more to the imagination. He had appealed to the sword; he perishes by the sword.

The future is again bleak and dark. No sign of regret or sorrow has come from De Valera or the Republicans, who, indeed, regarded both Collins and Griffith as traitors for signing the Treaty with Britain; and their implacable hatred of the Free State and those who stand by it will assuredly claim further victims. Admittedly, they are in a minority, but they appeal, not unsuccessfully, to terror, and their power of reducing the country to anarchy is still formidable. It remains to be seen whether the crisis in the fortunes of the young Free State will produce a leader worthy of the occasion. Its resources are heavily mortgaged, and the task of reconstruction, which also involves the suppression of the Republicans—who are still strong, even in Dublin—will be a thankless one.

The Mark and Europe.

The European situation is no clearer. The German mark has again depreciated heavily day by day, and other exchanges have fallen in sympathy. The Bradbury Commission has made its examination, and the German Government has put forward new proposals, but these appear not to be satisfactory, and the position has to be considered afresh. Meanwhile, every day makes the crisis more difficult to deal with, and in the case of Austria at least it is almost too late. The heads of the British Government have again assembled in Downing Street to discuss the situation, but no indication has been given of any decisive action.

Broad Churchmen in Conference.

The annual week of the Broad Churchmen, which has just been held at Oxford, has not provided a repetition of last year's sensational discussions at Cambridge. For that reason it has been given far less prominence in the newspapers, but I understand from a friend who attended the meetings that the papers were thoughtful and interesting. The subject of debate was the relation of Christianity to other religions; but there was also an outspoken criticism by the Rev. C. W. Emmet, of University College, from which I extract two or three sentences. "It was the extraordinary folly of the Church in the nineteenth century," said this speaker, "that it was so slow to see that a belief in evolution was the crown of the Christian doctrine of the world and of God. Evolution fitted into the Christian scheme as it could fit into the scheme of no other religion." This will prove a hard saying to some of the more conservative Churchmen, who realise that evolution denies the fundamental Christian doctrine of the fall of man, but it will hardly cause any general disagreement.

On the other hand, the High Churchmen will be holding their third Anglo-Catholic Congress in the autumn, and there are indications that it will be as largely attended as its predecessors, which were quite notable gatherings, and were very successful. I imagine that they are probably a stronger, and they are certainly a more numerous force, than the Broad Churchmen, at least among the clergy; so far as the laity are concerned, their position is perhaps not so strong. As to the Evangelicals, one hears little of them in these days.

A Healthy Summer.

According to the almanac the summer is nearing its close, but it has been so cold and cloudy that most of us were not even aware that it had begun—perhaps it may condescend to appear by the middle of October, when everybody is back at work again. As a matter of fact, a house agent at a sea-

side town whom I had occasion to interview last week told me that a great many people were rather cutting short their holidays this year, and the holiday trains bear witness to the fact that there are fewer people about than usual.

The only consolation is that the doctors assure us about once a week that the cool weather is amazingly healthy. Never has the death-rate in London been so low. It is not the adults so much as the babies whom the hot weather helps.

The Cricket Championship.

Cricket has not been particularly exciting this summer, but the game at the Oval was interesting because it practically settled the question of the championship. If Yorkshire won, or even drew the match, they were practically certain of the championship; on the other hand, if Surrey succeeded in beating them, they were likely winners. Surrey batted rather slowly and carefully in the first innings on a perfect wicket, but Yorkshire knocked their bowling to pieces and ran up a score of nearly six hundred. Surrey succeeded in saving the game, but Yorkshire won on points, and they can now hardly fail to secure the trophy.

On the whole, they have deserved this success. If they are not quite the team of fifteen years ago, they are the best all-round eleven of to-day, with Middlesex on their best days a keen rival.

Sir Thomas Brock.

Sir Thomas Brock, who died last week, was best known as the sculptor of the Victoria Memorial, that immense pile of statuary of which very different opinions have been expressed by the art critics. But he was responsible for many statues in many parts of the world; perhaps the most successful was the monumental effigy to Lord Leighton in St. Paul's Cathedral.

The Week's Books.

The second volume of "Death and Its Mystery" (Fisher Unwin), by M. Camille Flammarion, deals with the moment of death and apparitions of the dying and those just dead. Much of the material is taken from the celebrated book, "Phantasms of the Living," published some years ago, and M. Flammarion holds that some phantasms are objective and real, while others are mere hallucinations. The former, he considers, may arise from human beings possessing a duplicate form which may detach itself from the physical body and apparently travel through space. He does not appear to prove his contention—indeed, he admits frankly that "we are still in a state of ignorance comparable to that of the astronomers who preceded Copernicus and Galileo"—but it would be unfair to judge the whole work before the third and final volume has appeared.

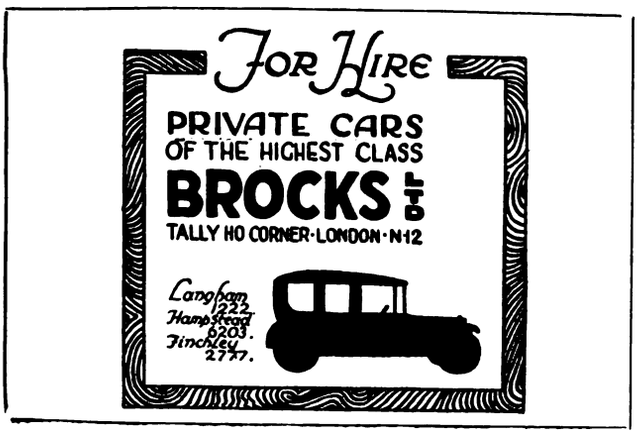
"A Cricketer's Log" (Hodder and Stoughton) is by Mr. G. L. Jessop. It is sufficient to mention it for all cricketers to put it down on their list of books that simply must be bought.

Promised Revelations.

A perfect orgy of war books has been promised during the past few days. While the newspapers have been discussing rather critically Mr. Lloyd George's decision to write his memoirs, there has been some gossip as to the number of chapters Mr. Churchill has done, or has yet to do, in his description of 1914-18. On top of this comes the preliminary announcement that Mr. Asquith is also employed on a war book—in his case, in reply to the ex-Kaiser's memoirs, which, as a fact, seem to need little answer; and then, again, it is reported that Lord Grey is at work on an account of his share of the negotiations. So far I have not seen Lord Haldane's name mentioned, but it would be interesting to hear his story of the unofficial embassy to Berlin in 1912.

After that, I really think we might give the war a rest for a while. My sympathies are with the General who told me recently, with a twinkle in his eye, that he would soon be the most distinguished man in the world—because he was the only person who had not written a book explaining how he won the war.

Ocellus.



GALLIPOLI GRAVES.

The High Commissioner for Australia has been informed that the First Lord of the Admiralty, Lord Lee of Fareham, in the course of a recent visit to Gallipoli, expressed to the officer in charge of the Imperial War Graves Commission's operations at Anzac, Suvla, and Helles his appreciation of the dignity of the design and the simplicity of the treatment of the cemeteries at those places. Lord Lee further commended the spirit in which the work on the cemeteries was being carried out and the care displayed by those concerned in it.

THE WILL OF SIR JOHN REES.

Sir John David Rees, 1st Bt., K.C.I.E., C.V.O., M.P., of Chesham Place, W., and of Thurland Street, Nottingham, and Stanmore, Middlesex, Conservative M.P. for East Nottingham since 1912, and Liberal M.P. for Montgomery 1906-10, formerly of the Indian Civil Service, Under-Secretary to the Government of Madras 1882-4, Private Secretary to successive Governors of Madras, afterwards a member of the Governor-General's Council, an authority on Eastern languages, chairman of the British Central African Company, Limited, London Film Company, Limited, Associated Provincial Picture Houses, Limited, and the Liberian Rubber Corporation, Limited, vice-chairman of the Shire Highlands Railways, Nyasaland, Limited, and a director of several Indian railway and other companies, who died at Chesterfield from the effects of a fall from a train on June 2, aged 68, left estate of the gross value of £84,637, with net personalty £81,922.

The codicil to his will, written on a half-sheet of the Carlton Club notepaper, reads as follows:—

Ἐμοῦ θάνοντος, When I shall expire,
Μιχθέτω πυρὶ σῶμα, Burn with fire,
This clean and Classic rite is dear, I trust,
To GOD, who gathers up His creatures' dust.

J. D. Rees.

NEWS IN BRIEF.

The Angora Delegation to the proposed Conference at Venice will include Raouf Bey, the Premier; Fethi Bey, Minister of the Interior; Jellal-ed-Din Arif Bey, Angora Minister in Rome; and Hamid Bey, Angora representative at Constantinople.

Typhus is said to be spreading in the Red Army, chiefly in the garrisons of the Volga regions, the Caucasus, and the Ukraine.

A message from Allahabad says that the death sentence passed on Gunner Eaton, of the R.F.A., for murder of the watchman of a tailor's shop at Lucknow in June has been commuted to penal servitude for life by the Governor in Council, in view of the jury's strong recommendation to mercy.

The Near and Middle East.

From Our Own Correspondents.

EGYPT.

Cairo, August 17.

The Ministerial Crisis.

Another Ministerial crisis occurred this week in connection with an article which appeared in *Al Ahram* explaining the Bairam crisis reported in my last letter. It appears that King Fuad took exception to this article on the score that it reflected on him, and that he requested the Prime Minister to suppress the paper. The Cabinet considered that neither the article in question nor the present situation justified such a drastic measure, but the King insisted, and as the Cabinet would not give way a very delicate situation arose. For at least four days the tension was exceedingly acute, and it looked very much as if the Cabinet would resign. Fortunately, however, wiser counsels prevailed, and an agreement was come to which it is hoped will permanently clear the air and will set a term to the various incidents of a somewhat similar nature that have marked the last couple of months. Subsequently the Cabinet consented to suspend the *Ahram* for three days. This settlement has been welcomed with obvious relief by all instructed and responsible-minded Egyptians. On all sides there is agreement that it would be a disaster if the Sarwat Cabinet withdrew from power before the constitutional reforms had been introduced. It is recognised that there is a party in Palace circles which is strongly opposed to the liberal principles on which the new Constitution is to be based, and that if the Sarwat Cabinet were now to fall a reaction might quite possibly set in which would wreck the work which has been done so far.

Sentences in the Manifesto Case.

No time has been lost in promulgating the decision of the court in the manifesto case, the trial of which was reported last week. The court sentenced all the accused to death, but the Commander-in-Chief commuted the sentence to one of seven years' imprisonment with hard labour and a fine of £E5,000, and the accused have already been removed from Kasr El Nil Barracks to the Citadel Prison, where they should carry out part of their sentence. It is to be hoped that more strict supervision will be exercised over Hamad Pasha El Bassel and his comrades than has been the case with Abdel Rahman Bey Fahmy, the principal accused in the "Vengeance Society" case, who, if my information is correct, was accorded unheard-of liberties, and because of this laxity of supervision was recently removed to the Hadra Prison at Alexandria.

Scarcely had the public recovered from the shock of the news of these sentences—which, however, are regarded by responsible-minded Egyptians as not too severe considering all the circumstances—than there came the news of the arrest of seven other Egyptians who have been closely identified with the political activities of the extremist element during the past few months. These men have been detained, it is understood, in connection with certain investigations which are being carried out at present by the new Department that was formed a fortnight ago in the Ministry of the Interior for conducting political crime investigation.

Another Brutal Anti-British Outrage.

Once again it is my sad duty to report a cowardly outrage on a British subject. This time it is not only against an Englishman that the outrage has been directed, but also against members of his family, which opens up an entirely new phase. Mr. T. W. Brown, Director of the Horticultural Service of the Ministry of Agriculture, was driving to the Cairo Station from his house at Giza with his little son, his daughter, and his maid, when, as he emerged from the Giza Gardens, he passed a group of five Egyptians, who fired at him. The first shot wounded the maid, and Mr. Brown whipped up his pony in order to get out of reach of the assassins. The latter then fired a regular volley, wounding Mr. Brown and his little son, and killing his coachman. Fortunately, by then the pony had taken fright, and running away, took the carriage out of danger. The five assassins made good their escape, and, the spot being a deserted one, Mr. Brown had to drive some way before he obtained assistance.

This crime has horrified everyone, not only because Mr. Brown is one of the best-known and respected officials in the country, where he is familiarly known as "Sheikh Brown," but also because this is the first time that a woman or a child has been included by the assassins in their attacks. It more than justifies the heavy sentence passed on the seven manifesto signatories. As pointed out last week, they issued their manifesto only three days after the attempt on Colonel Piggott, without in any way reproving acts of violence; and although it is not intended to connect them with this latest outrage, there is no doubt that they have had a contributory part in its commission since documents of the nature issued by them cannot fail to keep the pot boiling in regard to encouragement to the clique responsible for these misdeeds to continue their attempts.

Egyptians of every class have been unanimous in their expression of disgust at this continuation of anti-British outrages. Attempts have not unnaturally been made to assign to this one a personal motive, but it is generally agreed that things have nowadays reached the point where there can be no dividing line between personal and political motives in cases of this description, and the more far-seeing Egyptians are frankly perturbed at the new phase which this latest outrage introduces, for they realise that it may mean more drastic and direct action on the part of the British Government.

The New House of Parliament.

The Egyptian Government has, I understand, decided to erect a building for the accommodation of the new Parliament on what is known as the Ismailia Palace site. This site, which is opposite to the Kasr El Nil Barracks, was formerly the residence of Ahmed Mukhtar Pasha El Ghazi, the Ottoman High Commissioner. In 1916, when the Anglican Bishopric was created, and it was proposed to erect an Anglican Cathedral in Cairo, the late Sultan Hussein presented this land to the British community for that purpose. As the project of a cathedral has had to be dropped in view of the changed political situation, the community decided to use All Saints' Church as the pro-Cathedral of the Anglican Bishop of Egypt, and to return the site to the Egyptian Government, who have lost no time in finding a suitable use for it. In taking this action the British community has certainly done the right thing. It would obviously have been unreasonable to keep this site unbuilt on for an indefinite period, and it can be certain that if later on circumstances justify or permit the execution of the Cathedral scheme a suitable site will be found for it. As regards the new Parliament it will be left to the House of Deputies to decide on the kind of building it considers should be erected and the amount of money which should be spent thereon, and in the meantime the present Cabinet has voted the sum of L.E.50,000 for the erection of a temporary building, to be completed in six months, in the garden of the Public Works.

BULGARIA.

Sofia, August 21.

Bulgaria and the Little Entente.

There has of late been a certain amount of talk regarding the entry of Bulgaria into the Little Entente. Bulgaria would welcome the idea, as her somewhat strained

Digitized by Google

external relations would be greatly strengthened thereby. The four Powers that form the Little Entente are, however, of different minds on the subject. Czecho-Slovakia welcomes the idea, Poland has nothing against it, but Roumania and, above all, Yugoslavia are frankly antagonistic.

The point of view of these four countries is easily understood. Czecho-Slovakia and Poland do not border on Bulgaria, and are therefore only indirectly interested. Czecho-Slovakia has, in addition, certain trade relations with Bulgaria which she would like to increase. Serbia is strongly opposed, partly on account of war memories, and partly on account of Bulgaria's friendliness with the Croats and Slovenes. Roumania considers that Greece should become a member of the Little Entente before Bulgaria, and is in any case on not too friendly terms with her southern neighbour. In the event of Bulgaria's being excluded from the Little Entente, the only ally left to her will be Turkey. Bulgarians and Turks may not be natural allies, but at the moment they have in Greece a common enemy whose occupation of Thrace would be rendered somewhat precarious by a Turko-Bulgarian alliance.

So far M. Stambolisky's Government has shown a praiseworthy disinclination to meddle in foreign affairs, but signs are not lacking that, given, first, a change of government and, second, a Turkish victory over the Greeks, Bulgaria might well make common cause with Turkey. In these circumstances the attitude of Serbia regarding Bulgaria's entry into the Little Entente is quite understandable, but it remains an open question if it would not be better for all concerned were Bulgaria allowed to join the Little Entente and thus be restrained from any Eastern adventures.

The Komitaji Question.

It will be remembered that the recent League of Nations Conference in London, after having heard the delegates of Bulgaria, Yugoslavia, Roumania, and Greece regarding the question of frontier bands, recommended that Bulgaria should negotiate direct with her neighbours. Roumania and Greece have made Yugoslavia their spokesman, and a short time ago the latter sent a Note to the Bulgarian Government. This Note contained three requests: first, that all Macedonian benevolent societies should be disbanded, on the ground that these societies were benevolent only in name, in reality being hotbeds of anti-Serbian intrigue; second, the dismissal of all Bulgarian officials employed on the various frontiers; third, that Serbian, Roumanian, and Greek frontier commissions might have permission to enter Bulgaria whilst in performance of their duties.

Last Friday the Bulgarian Government sent a reply to the Serbian Legation formally refusing all three requests. It is expected that the next Serbian Note may be somewhat threatening in tone.

Marking Time.

There is still no news as to the Allies' intentions concerning Bulgarian Reparations. The Inter-Allied Commission in Sofia is awaiting instructions from London, Paris, and Rome, but no reply is expected until September. M. Daskaloff, Minister of Interior, whose special mission is chiefly concerned with the Reparations, is still abroad. There is, however, no evidence to show that he has succeeded in obtaining any concessions. Owing to the *impasse* between the Government and the Commission having lasted over a month, public interest has entirely waned, and even the local newspapers have stopped attacking the Commission.

League of Nations Assembly.

It is announced that M. Stambolisky will represent Bulgaria at the third General Assembly of the League of Nations, which is due to be held in Geneva on September 15. He will be accompanied by General Savoff and M. Kosta Todoroff, Bulgarian Ministers at Paris and Belgrade respectively. The delegates will leave Sofia at the beginning of September.

Cabinet Reconstruction.

It is said that M. Oboff, Minister of Agriculture, has resigned, and that one and perhaps two other Ministers will shortly follow his example. M. Omartchevsky, Minister of Education, who is now in Brazil, will on his return probably occupy another post. In this connection it is interesting to note that M. Thomoff, Acting Minister of Education, recently announced that the dispute between the Government and Sofia University had been satisfactorily arranged. Some months ago the Senate of the University declared that until certain professors were reinstated the University would remain closed. It is, however, believed that in October the University will open its autumn session.

Compulsory Labour.

The Government Department which deals with compulsory labour has issued the following statistics:—

During 1920 and 1921 826,568 men performed compulsory labour. Assuming that their work is worth 20 levas a day, the State has gained over 800,000,000 levas a year.

Up to date 200 kilometres of new roads have been marked out, and 329 kilometres constructed. 640 new bridges have been constructed, whilst 254 have been repaired. 8,571 kilometres of railway have been repaired, and the lines Alexandrova-Vidin and Toulova-Kasanlik have been finished.

ROUMANIA.

Bucharest, August 17.

Political Currents.

Despite the apparent calmness in the political atmosphere during the recess, some events occurred which denote the direction of the various currents. The two most important parties of the Opposition, the Transylvanian Nationalists and the Peasants' Party of the Old Kingdom—the latter being backed by the Bessarabian section of the same denomination—have, after frequent meetings and prolonged parleys, concluded a pact with the view to combined action for the overthrow of the Government. Their old war-cries remain unaltered, viz., withdrawal of the Government, dissolution of Parliament, fresh elections under a provisional neutral Cabinet, and formation of the future Government on strictly constitutional lines in conformity with the result

Digitized by Google

of the elections. M. Marghiloman, in the name of his small political group, has also unhesitatingly declared his adherence to this plan of action, and quite recently General Averescu, who not long ago was at daggers drawn with the two above-mentioned parties, stated that his party would join its efforts to those of any party determined to overthrow the present Government. The Democratic group, being more or less disorganised since the death of its leader, M. Take Jonescu, has so far not expressed clearly its future attitude. There remain only M. Jorga and his followers to be secured for the Opposition's campaign. This learned professor has preferred during the last months to devote his time more to his lectures on Roumanian history, which he has been delivering both in the country and abroad. But the Transylvanians attach great importance to the political attitude of M. Jorga, not so much on account of the number of his followers—which, indeed, is anything but large—but on account of his personal prestige. M. Jorga would not be averse from collaborating with the Transylvanian National Party, but, on the other hand, he objects to certain leaders of the Peasants' Party and to two other parties in the Opposition. In other words, though the autumn session is rapidly approaching, no decisive result has yet been reached through all the meetings and parleyings between the Opposition parties. What is interesting to note, however, is that the people themselves, especially in the Old Kingdom, at this juncture, are watching almost indifferently the demeanour of the Opposition: which goes to prove that they have no special complaint against the present Government, or that they do not expect anything better from a future one; and above all they would prefer now, when the first real signs of the country's economic and financial rehabilitation have begun to appear, that this progress should not be impeded by the usual political squabbles.

Rumours of a shuffling of the Cabinet are in the air, but if this takes place, it will have no great bearing on the situation; for the changes will, in all probability, be made only among the members of the Government Party.

In certain exalted circles hopes are still entertained of a reconciliation between the Government and the National Transylvanian Party, but so far all attempts at such an accommodation have proved fruitless.

Stranding of a Foreign Balloon.

A few days ago it was reported from the district of Gorj (in the southern side of the Carpathians) that a very large foreign balloon alighted near the locality of Baia de Fier without causing any damage to the balloon or to the passengers, although it fell among trees and got entangled. The peasants of the locality, who rushed to lend a helping hand in extricating the air vessel, by their unexperienced manœuvring let the rope slip from their hands, and the balloon resumed its flight without its passengers. When the airmen came to Bucharest to report the mishap, it was found that the balloon was the "Belgiça I.," piloted by the Belgian airmen, Lieutenant E. Demuyter and M. A. Veenstra, competitors for the Gordon-Bennet Cup. According to the latest reports this balloon has won the first prize, having flown a distance of 2,200 kilometres. Shortly after their arrival in Bucharest, the Belgian pilots were gratified to hear that their balloon has since been found, having alighted from a tremendous height near a village in the vicinity of the Danube not far from Giurgevo. Arrangements have now been made to transport it by rail to Geneva. The airmen stated that the balloon would have flown even farther had it not suffered certain damages owing to the very low temperature while crossing the Alps.

The Cholera.

The authorities announce that during the last few days no fresh case of cholera has been reported either in Bessarabia or in any other part of the country, and that this epidemic is now well under control.

YUGOSLAVIA.

Liubliana, August 16.

General Sokol Gathering.

The Great Zlet (Gathering) is over; and the Yugoslav Sokol Union, the Zlet Committee, and the town and citizens of Liubliana may justly congratulate themselves on its complete success. Before the War Liubliana proper was a small provincial town of some 40,000 inhabitants; now, owing to post-war conditions, the same area is unpleasantly overcrowded with 55,000; and during the Zlet week another 50,000 (apart from Sokols and day excursionists) poured in from all parts of the country, and had to be provided for. The Sokols, both Czecho-Slovak and Yugoslav, were, of course, dealt with on military lines, and their commissariat was managed independently from that of the rest of the host of visitors. And all this had to be done in a country short of rolling-stock and with an administration not four years old. Yet the most serious troubles that occurred were a shortage (purely local and temporary) of ice-creams and a scarcity of waiters.

The entire festival occupied seven days—August 11 to 15, and the two preliminary days on July 23 and August 6. The two early dates—Juniors' Day and Soldiers' and Students' Day—really served as excellent dress rehearsals for the organisation of the main festival, apart from being very enjoyable in themselves. The King and Queen came over from Bled on August 6, and obviously enjoyed both the display and the spontaneous enthusiasm with which they were greeted. The arena was supposed to afford space for 5,000 performers, but was comfortably filled by the 2,500 soldiers on parade. The movements were beautifully carried out, very varied, and there was something pleasantly symbolical in the men being led in by Sokols in gymnastic kit walking in line with the officers. Besides exercises, we were shown a poignant representation, in pantomime and tableaux, of the War of Liberation, accompanied by music almost too tragically expressive. August 11 and 12 were occupied by gymnastic competitions under the auspices of the International Gymnastic League. France, Belgium, Roumania, and Luxemburg had sent teams, a party of Arabs from Algeria had come to show their national athletic sports, and the Czecho-Slovak and Yugoslav teams were on the spot. It was very soon obvious that, in spite of the excellent work done by some of the Frenchmen, victory lay between the Czecho-Slovaks and the Yugoslavs. Eventually the Czechs won by a very few points, the Yugoslavs being first, however, in swimming and the high jump.

The First Zlet Day.

August 13 was the first real Zlet day. The stadium was crowded—at least 70,000 spectators were there—and it was good to hear the thunderous greetings with which the entering squadrons of Sokols were hailed, the regular "detonations" of the Yugoslav "*Zdravo*" (the Slovene makes an absolute monosyllable of it) culminating in the double beat of the Czech "*Na zdar!*" That day we saw 3,000 men and afterwards 2,500 girls go through their Sokol exercises with that mixture of precision and elasticity which makes Sokol work so delightful to watch. The arrival of the King and Queen just before the performance was timed to begin again

gave rise to a tremendous ovation. August 14 was in the main a repetition of August 6, with the difference that on this occasion there were Czech detachments as well. August 15 provided a programme very like that of the previous Sunday, and wound up with a musical ride by the Yugoslav mounted Sokols, which provided a beautiful and effective finish to a truly wonderful display of Czecho-Yugoslav athletics.

Perhaps, however, the most imposing event, of the whole Zlet took place outside the stadium. I mean the Sokol Parade on Tuesday morning. The march past occupied over three-quarters of an hour, and took place in the Kongresni Trg, the square used for military functions in the old days. The King, Queen, and Ministers watched the scene from the balcony of the former Government House, now the University. A special miniature "grand stand" had been erected in the shade of the chestnut trees of the Zvezda Square to accommodate distinguished guests. Under the glorious southern August sun the square was simply one blaze of colour, in which the scarlet of the Sokols' shirts and the Sokolicas' handkerchiefs provided the dominant note. There were sumptuous banners and national dresses from all parts of the kingdom, the most striking being, I should say, the holiday dress of the Slovene women, who looked not unlike an army of Merry Wives of Windsor in their characteristic gold-embroidered hoods. It was quite restful to see a squad of Serbs marching by in cool white linen with light blue coatees and dun-coloured caps.

March of the Sokols.

As the Sokols began to march, every section was greeted with rapturous applause, but unquestionably the greatest display of feeling was reserved for the fine-looking body of men led by the Rieka (Fiume) Sushak banner surmounted with crape.

Every evening twelve excellent entertainments were arranged for the same time, so as to break up the large crowd of strangers in the towns, and the enclosure reserved for the annual fair was turned into a kind of people's park, where dancing went on till three o'clock in the morning. A very effective and impressive event was the serenade given by the massed bands and male voice choirs in town from the terrace of the Castle at eleven on Monday night.

English Visitors.

On the 11th the Viceroy gave an evening reception in honour of the various foreign guests, and on Sunday evening the *Stareshinstvo* of the Yugoslav Sokol Union received their guests in the Casino ballroom, where the prizes were bestowed. Senator M. Reynald presented the Yugoslav Sokols (falcons) from their French brother gymnasts, with the French Cock in bronze, and also handed over a beautiful silver cup, France's gift to the Yugoslav Army. The Belgian representative, M. Gaillez, presented two watches, the gift of the King of the Belgians, for Yugoslav competitors only. Great Britain was represented at the function by Mr. Maclean, British Consul in Zagreb, and by Dr. Lloyd Storr-Best, Mr. G. T. Hankin, and Miss F. Copeland. Dr. Storr-Best and Mr. Hankin, who are travelling through the countries of the Little Entente with a view to seeing something of the world of education in these new States, are well known for their great and practical interest in all forms of sport and physical culture. Dr. Storr-Best is also a Russian scholar, and found no difficulty either in understanding the speeches made (as at the Women's Congress) in Slovene and Serbo-Croatian, or in conversing with Dr. Ravnihar and the other members of the Senate of the Yugoslav Sokol Union. Both Dr. Storr-Best and Mr. Hankin repeatedly expressed their admiration of the whole festival, from the actual displays to the organisation of the various details, and the excellent order which prevailed throughout, in spite of the size of the crowds, and the very small number of police, assisted merely by Sokol stewards. They were also greatly interested in hearing from Dr. F. Skaberné about the educational work done in Yugoslavia since the Liberation.

ALBANIA.

Tirana, August 20.

By-Elections.

In consequence of the withdrawal of the Serbian troops, the population of the North and East of Albania has increased since the beginning of this year, and it had been decided to proceed to new elections in the two prefectures of Dibra and Kossovo, recently created. These elections have just taken place, and ten deputies, five in each of the prefectures, have been elected. The results are favourable to the Government.

Two Congresses.

Two meetings have been held at Tirana during the last weeks under the auspices of the Ministers of Public Instruction and of Public Works. The first was occupied with secular and educational questions; many professors and other competent educational authorities were invited to take part. The aim of the second meeting was to provide measures for the amelioration of the economic condition of the country. Many merchants and delegates of the Chambers of Commerce were asked to be present.

It should be noted that these two congresses, and especially the latter, are a sign of progress, inasmuch as it is the beginning of a movement of co-operation between the population and the authorities, so necessary in a country where the Government is looked to for every improvement and all progress.

A Social Measure.

Those who know Albania will remember what great ceremonies are made of marriages and funerals, and how heavy are the expenses entailed. An Order from the Minister of the Interior prescribes the limitation of such ceremonies and their reduction to bare necessities.

Henceforth people will have to refrain from making themselves bankrupt for the sake of a marriage or a funeral, and—as the prohibition comes from the Government—no one will be able to blame his neighbour. The new restrictions lay down the number of guests to be invited, and the maximum sum to be spent on the proceedings, and limit to one day the wedding festival, which used to last for four or five days, and even longer.

M. Sederholm in Greece.

The delegate of the League of Nations, M. Sederholm, who has been entrusted with the supervision of the execution of the decisions of the Conference of Ambassadors upon the Albanian frontiers, has just gone to Greece to explain to the Athens Government the necessity of submitting to the decisions of the Great Powers and of ceasing to make further difficulties in the delimitation of the Greco-Albanian frontier.

CYPRUS.

Nicosia, August 8.

Census Figures.

The census, taken last year, gives the population as 310,715, including 249,376 non-Moslems and 61,339 Moslems. Greeks of the Orthodox Eastern Church form the large majority of the former. As regards occupations, 51,568 are engaged in agriculture as landowners or labourers. Shepherds and goatherds number 7,344; merchants, 1,360; coffeehouse-keepers, 1,550; Government officials, advocates, 107; medical men and surgeons, 119 (including two women doctors). The "literate" amount to 111,173 (77,407 males and 33,766 females). This shows a very great advance in education during the British occupation, and progress steadily continues.

An Expensive Accident.

While a timber store keeper of the Forest Department, Mr. M. Markides, was proceeding from Troodos to the nearest point on the railway to Nicosia, escorted by a zaptieh, and conveying a sum of £1,500 to be paid over, his mule stumbled and he fell and injured himself. The mule bolted, and the zaptieh, after attending to the storekeeper, went in pursuit of the animal, which was not caught for some hours. When caught the leather pouch containing the money had disappeared, and so far no trace has been discovered. Mr. Noble, assistant P.F.O., and police detectives are investigating the affair on the spot.

Measures for Economy.

Estimates for next year will be based on the anticipation of a falling revenue. The general outlook is far from being as favourable as could be desired. The Government is, by circular, impressing upon all Heads of Departments the need of stringent economy. Steps are being taken to see what reductions, if any, can be made in the number of officials, to ascertain what are the working hours in all offices, and so forth. The Greek Press suggests that the economy sought for might be effected by a reduction not of native but of British officials.

Nicosia Water Supply.

Anxiety is again felt regarding a reported contamination of the water ducts that bring the supply of drinking water to the capital. It was hoped that the board, appointed some years ago, would succeed in maintaining the channels, which have periodically given trouble, in such order as to prevent the recurrence of any alarm.

The Library of M. J. Gennadius.

The *Phoné* gives some details regarding the gift of M. Gennadius (late Hellenic Minister in London) and Mrs. Gennadius of their valuable library to the American School in Athens. It includes from 40,000 to 50,000 well-bound volumes, some of them very rare works and editions, and is the result of painstaking collection during fifty years. Besides the books, which all relate to the history, geography, philology, arts, and ecclesiastical annals of Greece, and to Hellenism, there are many pictures, engravings, coins, medals, etc. Various conditions are imposed as to the custody of the library, which is to be called the "Gennadeion," in honour of the father of the donor, M. George Gennadius. The gift and conditions have been gratefully accepted, and a suitable site close to the American School acquired. The trustees of the Carnegie Endowment Fund have voted 200,000 dols. towards the building on condition that the Greek Government also contributes a suitable sum.

General News.

The Government having appealed in the Houstoun case against the judgment of the Kyrenia Court in the action taken to confiscate certain land on account of non-cultivation, the case will come before the Supreme Court in October.

August 21 has been fixed for the gathering of carobs in the Nicosia district.

CORRESPONDENCE.

CAPITULATIONS IN TURKEY.

To the Editor of THE NEAR EAST.

SIR,—In view of the approaching Conference on the Near East Question, it may be well to disentangle from the many complex problems with which the Allied Powers will be faced, that one which so materially concerns the lives and well-being of the foreign European population in Turkey. I refer to the much-discussed question of the Capitulations.

It is hardly too much to say that there is a feeling of genuine alarm in Constantinople on this question; and I understand that this feeling is going to be voiced at an early meeting of our British Chamber of Commerce, when a resolution will be put forward with a view to its ultimate submission to the proper authorities.

It has been remarked that a new association has recently sprung up in London, called the Near and Middle East Association—an offspring of the combined efforts of certain British Members of Parliament. *The Times* of July 29 contained a report of a luncheon held by this infant body, the main object of which is stated to be "the maintenance of a sympathetic attitude towards Moslem sentiment in the British Empire, and the Moslem world at large." To such a pious platitude there can be hardly a man or woman in the British Empire, and certainly there is no one who has lived in Turkey, who would not, instinctively, subscribe.

Would that this Association might be the means of inspiring the formation of a similar association by the Nationalists or Young Turks of the Angora Parliament, whose main object would be "the maintenance of a sympathetic attitude towards Christian sentiment in the Turkish Empire and the Christian world at large"! Then all might be well. The object of such a Nationalist Association would certainly not be belittled in this country as being a mere platitude, but it might be difficult to foretell exactly what amount of support it would meet with. But that is just where the difference comes in. There is not yet any indication that the Near and Middle East Association is likely to inspire the Nationalist and Young Turk members of the Angora Parliament to adopt that attitude towards the Christian world, which, in the case of the Christian towards the Moslem is part and parcel of the Christian faith. This point should be borne in mind by the Near and Middle East Association, before its members proceed, as they did at the luncheon referred to above, to advocate the return to Turkey of practically all that she lost in the war, and the granting of the "right of the Ottoman people to exercise complete sovereignty within its borders."

If this last phrase includes the abolition of the Capitulations, whereby we foreigners would be subject to arrest by the Turkish authorities, and to subsequent trial in a Turkish Police Court—then we foreigners, in common parlance, "are not having any." It is only necessary to discuss the matter with a Briton, a Frenchman, or a Greek, and he will tell you that if the Capitulations are done away with, his first thought will be to clear out. This opinion was, moreover, voiced to me in conversation the other day by an old British merchant of many years' standing in Turkey. He said: "Our fear is that if the Nationalists come to Constantinople the Capitulations will be abolished. We view with dismay the attempts that are being made by British Members of Parliament towards this end. If such is done life here will be impossible. We believe it to be in the interests of all nationalities that the Turks be allowed to remain in Constantinople, but they must be controlled, and in expressing this view we have the support of a large number of the Turks themselves."

It is to be hoped that before any alteration or "modification" in the principle of the Capitulations is considered, the feelings of those on the spot, the foreign nationals in Turkey, will be sounded and given the due weight they deserve.—I am, etc.,

C.

PRESS ON THE NEAR EAST.

The Situation in Egypt.

The *Westminster Gazette* of August 19 deals with the present condition of Egypt, which, it says, causes a certain amount of disquiet:—

> We are supposed to have conceded the independence of Egypt, and yet we are still governing the country by martial law and trying political offenders by military tribunals. This is to get the worst of both worlds, and, while making the concession of self-government, to incur the odium of governing the country by force. The news from Egypt is so scanty that it is almost impossible for anyone in this country to form an intelligent judgment of what is happening. Extreme Nationalist leaders, as we see in Ireland, may compel even their friends to take strong measures against them, and those who followed Zaghloul Pasha's activities in the early months of last year will certainly not be hasty in censuring Lord Allenby for having thought it necessary to deport him this year. But continued prosecutions of the Zaghloulist party are at the best a very unfortunate necessity, which is only to be justified by clear proof that their proceedings are an incitement to crime.
>
> We must suppose this evidence to have been forthcoming in the recent trials, for nothing short of it could have justified either the trials or the very severe sentences that have been passed; but the authorities in Cairo need to be carefully on their guard not to lend colour to the Zaghloulist allegation that criticism of the Egyptian Ministry or of the policy to which it has consented is now regarded as a penal offence by the British military courts. We may think that policy a very good one, and wish all success to the Sarwat Ministry, but if Egypt is to enjoy self-government, freedom to criticise both is an essential part of it, and all Egyptian voices should have a fair hearing during the transitional period, when the Egyptian Constitution is in the making. If this is denied, we run the risk of being told hereafter that the Constitution was forced through by a clique which silenced its opponents and critics; and when the Assembly meets next year we may run into another crisis.

And it concludes with an expression of regret that the Imperial Government did not act upon the Milner Report after December, 1920:—

> Zaghloul, it must be admitted, has a serious responsibility for what followed, but it is impossible to doubt that he and his party stood for something important in the life and policy of the country, and it will be bad for us, and bad for Egypt, if we drift or are driven into a position in which they have all to be treated as exiles and outlaws. That will increase their following and revive the danger of underground movements, against which an Egyptian Government would have to rely on our support. This would not be a real solution of the Egyptian question, and it would leave us still with the greater part of the responsibility from which we had sought to relieve ourselves. But if this situation is to be avoided the most skilful and patient handling of the situation is necessary during this transition period.

The *Daily News* of August 17 is also disappointed at the turn events have taken since the recent settlement. It says:—

> The position is not the less sinister because it is difficult to understand what exactly is happening. The Women's Delegation Committee in Cairo, for instance, has just issued a strong protest against the sentences passed on the members of the old Delegation Committee, and appeal to "British justice in England" to interfere and quash them. The implication, apparently, is that these arrests and sentences are really carried out by the British authorities, and that Sarwat Pasha and his Government, in whose name these things have nominally been done, are really mere tools in the hands of Lord Allenby. If that is true, the position is, of course, impossible; the grant of autonomy is a hypocritical pretence. It is not necessary at present to believe it. What appears to be almost certain is that Sarwat is using British authority and British arms to attempt to crush his political opponents; and this again is an indefensible proceeding, which can only result in the reassertion of the Protectorate in another and much more objectionable form. If Sarwat cannot govern the country without our aid, he should be left to his fate.
>
> It is none of our business to secure for Egypt or for Ireland or for Russia an ideal administra
> The very idea of autonomy implies the abandonment of this forlorn task, and assumes that the nations concerned will be left to work out their own salvation. The last thing we desire is to be involved in an Egyptian party struggle, and in this sense the appeal to "British justice" for one party or the other does not lie. Our duty to Egypt is simply to leave her to find herself, subject to the observance, by whatever government she may choose, of the guarantees which have been accepted by both countries as necessary for the protection of vital British interests. It is Lord Allenby's task, no doubt, to secure that the new government has a fair field, and that it is not overwhelmed by anarchy or civil war before it is fairly in the saddle; but once the machinery of government has been established, the duty of guiding the destinies of Egypt should be left to the Egyptian people; and the sooner that can be done the better.

Peace in the East.

The Times of August 25, in an article entitled "The Eastern Horizon," has hopes of peace from the forthcoming Conference at Venice, believing that Turkey must not be destroyed, and that Greece must not be overloaded with impossible burdens:—

> The echoes of European controversies reverberate strangely in the East, and the war in Turkey is a crude illustration of the kind of peace that is now plunging Europe into fresh dangers. That war should never have been allowed to begin, and it would have been ended long ago if there had not been a perilous discord in the purpose of the Allies. There was no real occasion for the war. Greece should never have been encouraged to land troops in Smyrna; no provocation should have been given to the defeated Turks to organise armed resistance in the interior of Asia Minor. The Allies—not Great Britain alone, but all the Allies—committed the defence of their interests to the Greeks, and thereby abandoned a great moral asset, which was the joint prestige won by a joint victory. There was a brief moment when the Allied forces established in Constantinople represented the incontrovertible triumph of Western civilisation. No further demonstration was needed. The demonstration had been given with irresistible force in Syria and Mesopotamia and in the battlefields of Europe. The Allies could have made in 1919 a workable peace with a united and submissive Turkey. Instead, they chose to land Greek troops in Smyrna, and thereby provoked a new war which has led to massacre, to the paralysis of trade, and to endless suffering and conflict. The war continues. The Christian minorities, whose interests the Western Powers undertook to defend, have found themselves exposed to all the horrors of a new war, in which their hope of defence is daily mocked. The Turks have massacred Greeks and Armenians, while the Turkish population in the Greek area of occupation has suffered cruelly from Greek reprisals. No one has gained, everyone has lost by this most miserable war. The Greeks have suffered a heavy loss in blood and treasure in their pursuit of an unattainable ideal. But the most serious fact in the present Near Eastern situation is the growing divergence in the aims of the Allies. It is no secret, it is an obvious and alarming truth, that for some time past the British and French Governments have been pursuing conflicting policies in the Near East. It is useless to gloss over this fact; it is folly to ignore its
